The earliest story among the "founding legends" of U.S. national consciousness were of devout, faith-filled, and profoundly moral pilgrims leaving England to practice their faith on what would become U.S. soil. Before the Boston Tea Party, before the cry of, "No taxation without representation!" or the shot heard round the world, before any other legendary event is the story of *pilgrims* seeking to live their faith as purely as they could. Do the legends give us reason to speak of the U.S. as holy land? The devout American Evangelicals I know wouldn't dream of

it: when they say "holy lands", they very clearly mean, "the lands of Christ and the Bible." It wouldn't occur to them to use the term "holy land" to mean "land of the pilgrims' pride" or the lands of history like the Great Awakening.

But you are missing something about Christ if you think his Incarnation is limited to when his Mother conceived him; the Incarnation of Christ unfurls in his saints, and the purpose of becoming Christian is to become a little Christ, and become by grace what God is by nature. Equally, you are missing something about holy land if you think that Christ by living on land may make it holy, but Christians cannot do anything like this. The prolonged effect of many saints over many years is to lift their land up to God, and the Gospel that reaches out to the whole earth is a Gospel that can raise the whole earth up to God. When you understand that Christ lives in the faithful, then you see why holy land unfurls to be where Christ lives through his saints and does not stop with the list of places Christ visited personally.

Orthodoxy in the U.S. has its own ["patron saints of this blessed land"](#), and this is an excellent start. Russia has had Orthodox saints for over a millennium, and its list of saints is all but innumerable. There are Russian patriots who would agree that the communist government was godless, but the other side of what it showed in its attacks on Russian Orthodox Church was how tough a Church there was to "need" such attacks and still not be killed: National Socialism in the Third Reich killed more than ten million Jews and other unfortunates, and socialism in the U.S.S.R. killed more than a hundred million Orthodox Christians and other unfortunates: socialist persecution in the Soviet Union created more Christian martyrs than in, ultimately, the rest of history put together. And that dearly costly witness means that even the Soviet persecutions left a river of martyrs' blood to sanctify Russian soil. "Holy Russia," made holy by saints living as faithful monks and made holy by saints dying as faithful martyrs. Christ unfurls in their stories.

There are profound differences between Russia and the U.S.; any number of books could explore the differences. But there are also some similarities, and not just the profound similarities of shared humanity. There were some eerie similarities when I read about educated "progress" in Russia that was ever so much more sophisticated and enlightened than the country's backwards religious roots. The similarity to things I had grown up with in the U.S. was almost spooky.

grown up with in the U.S. was almost spooky.

One person surveyed a religion poll and tried to play down the exaggerated claim oddly shared by U.S. militant atheists and militant fundamentalists: "American religious roots are being rapidly abandoned," a drum that has been beating nonstop since the days of the Puritans. Notwithstanding this claim, the person argued from the religion poll that there has never been a nation as Christian as America today: America today, he explicitly argued, is more Christian than Israel is Jewish or Utah is Mormon. Maybe people veer more towards "spirituality" and less towards "religion", and maybe there are twenty things conservative Evangelicals wince at: but to someone who said, "You have a rather, um, inclusive definition of 'Christian'," the author might well respond, "You have a rather inclusive definition of 'not Christian at all'." And, even if Orthodox may wince at this, devout American Evangelicals do have a sense of "Either you're in Special Forces or you're not really a patriot at all." Perhaps no nation ever has satisfied the devout for religious commitment, but if we can call India a Hindu nation, Turkey a Muslim nation, and Italy a Catholic nation even though none of these are theocracies, maybe it's missing the point to say, "America is not a Christian nation, at least not today. It's not a theocracy, for starters, and it's not nearly religious enough to satisfy the religious right." That's not the *point*.

Someone else has said, "If India is the most religious nation on earth, and Sweden is the least religious nation on Earth, then the U.S. is a nation of Indians ruled by Swedes." There is a grain of truth there, and it is a grain of truth reminiscent of Russia as it was engulfed with socialism. Russia, too, was a nation of Indians ruled by Swedes, and it has been a long and difficult struggle for Russia's Indians to start regaining ground.

There are other spiritual similarities; Russia's story does not begin with socialism. To Russians, nineteenth century Russia may be a proverbial golden age, spoken of as some Orthodox theologians speak of the fourth century and its Christological victories, or as Protestants might speak of the days of the Reformation. On the Orthodox humor site [The Onion Dome](#), the loving caricature of Fr. Vasily habitually derides proposals by saying, "Was [*such-and-such proposal*] in nineteenth century Russia?" (The obvious answer was no, and if it wasn't to be found in nineteenth century Russia, the implication was that Orthodox Christians have no need for it.) But some Orthodox in the gulag—I think

in particular of [Fr. Arseny](#)—explained the terrors all about them as a divine chastisement for Russia's arrogance in the nineteenth century. Russia fell when it was struck because it was rotted from within.

We speak today of the global economic crisis. The word *crisis* comes from the Greek word for judgment, and we are in a moral and spiritual crisis that comes from seeking treasures on earth and ignoring treasures in Heaven, a charge I am guilty of too. We believe in a high and rising standard of living, and here in America we will mortgage our future if it will only let us try to keep our standard of living for now. And that is the kind of rottenness from within that leaves us vulnerable to blows. Or one kind; there are others.

## 50 Things You Can Do Even If the Writing Is on the Wall

As I write, some U.S. journalists have started to say, "We really like our President, but we still have big problems as a country."

Expecting socialism to neatly give us we want is, perhaps, naïve: but it is not my main intent to ask people to read the introduction to [The Black Book of Communism](#), or to organize a crusade to straighten out Washington. I would rather talk about what we as people can do if more trouble happens.

Out of the many saints in Russia, God did not stop the concentration camps, but he was at work, in his saints, *in* the concentration camps. It may seem strange to say that Heaven could be present in socialist concentration camps—horrid camps where Hitler sent observers for guidance and inspiration, for the camps planned for Jews—but there were saints sent to those socialist camps, and those saints brought Heaven with them, because Heaven is there wherever God's saints live and die in faithfulness and prayer. Think I'm being a bit too poetic and unreal? [Read about a devout priest who was sent to concentration camps with all manner of painful realities, and brought Heaven with him in the death camps.](#)

The Orthodox Church has great experience living under adverse circumstances, and it is simply not the case that the Church can only function normally in easy times. When St. Constantine ended Roman persecutions against the Church, some saints complained because times had become easy: hard times adorn the Church with martyrs, and what do soft times offer that compares with that? The Church may be stronger under some persecution than when everything goes our way. We may be in for more of a rough ride, and the bad news is that there may be no way

to escape it to live normal life. But the good news is that there is an *alternative* to trying to escape it: we can live normal life *in* the rough ride. Orthodoxy is a way of living normally in a hard world.

What I most want to do in this piece is share some of what the Orthodox Church has lived under socialism. There could be significance in the fact that one of the patron saints of America was born in Russia, came over to America and ministered among some very poor people, and then returned to Russia and became the first priest to be martyred under the socialists: [St. John Kochurov](#). Orthodoxy in Russia has had a lot of opportunity to learn to live under socialism.

Here are **50 things you can do even if the writing is on the wall**:

1. Don't believe spam.

Don't believe spammers (and other advertisers) who offer ads of a classy-looking watch that will make you happy and contented.

Asking a watch to make you *either* of these things is like asking a stone to lay an egg or using gasoline to extinguish a fire. Watches can tell time and maybe do other things, but *no* watch can make you permanently happy.

If you try to buy a watch to make you content, a nice-looking "replica luxury watch" will only feel good for so long; then you'll need the real thing, or think you do, until your discontent grows and you want something you can't get like a watch that is worth as much as your car. But even if you could get it, there would be more standing between you and happiness than not having enough money to keep indulging yourself. You would still be discontent—until you got a watch worth as much as a good house, or maybe a collection of exotic watches, or maybe some super-special watch that ought to be in a museum. But still you won't be content; you'll be less content than when spammers told you you needed a replica watch to live well.

And, for that matter, even if you had the money to indulge that fancy, you will paradoxically be less content with a unique, handmade, multi-million-dollar Swiss watch than you were with that first almost-convincing "replica" watch sold to you by a spammer. Trying to get more and more things that will make you happy doesn't work. As far as the game of being happy by owning a good enough watch

goes, *the only way to win this game is not to play at all.*

2. The Bible says, "In humility consider others better than yourself," and it really would have been a lot easier if it said, "Be grateful to God for making you superior." Or at least *I* would have found it easier, at least if an exception were made for me.

But these offensive words conceal a treasure. When I am full of myself, I find it difficult to enjoy and appreciate others. Nietzsche thought of most others as scum and slime and could not enjoy their company. But humility is more than not being so full of yourself; it is a key to enjoying others.

In terms of difficult co-workers, [Fr. Arseny](#) lived in a concentration camp where the food was rancid (and tasted like kerosene), there was not nearly enough of it, and some of the people assigned to be his co-workers were hardened criminals (one liked card games where the loser paid with his life, and tried to have him killed). And yet reading his story is not a morose pity party, but a tale of a saint's triumph. *And* Fr. Arseny lived with profound respect for his nasty co-workers and the people in charge of the camp, and found some spark of beauty, some reflection of God, in even the most blackened soul. And his tale is profoundly uplifting.

He knew the secret of in humility considering others better than himself. And he lived a joy unlocked by many holy keys, *including* a humility that lived respect for others.

3. Share.

There was one woman who posted a note to a forum I read, saying that after being distressed that she could not find work, she began volunteering and, if she had no money to give, gave her time to others. There is a seed of the Kingdom of Heaven in her response, and also a seed of how people survived the Great Depression.

I do not say that you should share a big gift that will make things all better. It is better to try starting off by giving a dollar or two when you know it is inadequate: if you can easily write a big cheque that will completely solve a problem, God may not really be working through you. Far from feeling a godlike power to put an end to suffering, most doctors feel powerless in the face of real suffering. (Are we more powerful than doctors?) But what about going to church and putting a dollar or two in the collection plate, even or especially if you cannot afford it, or if you do have a job, bring a meal

especially if you cannot afford it, or if you do have a job, bring a meal—nothing fancy, a cheap meal is fine—to a friend or neighbor who cannot find work?

What brought a lot of people through the Great Depression was pulling together: in a situation where people could not live separate lives, dependent on wealth and independent from others, people pulled together and even if they had less, shared the little they had—as some people are doing, and discovering, today.

"He saved others, but he cannot save himself" is a definition of the Kingdom of Heaven, and some people who have been stripped of the treasures of wealth—no one-person cars, no fancy meals in restaurants, no iPhones and consumer electronics—have grown so poor that they have moved on to *real* treasures, the treasures of God, and communities pulling together, of love and service to others. (The best things in life are free!) They have been, perhaps, like children whose parents pulled them away from their beloved mud pies until it dawns on them that the reason their parents took them away from their mud pies wasn't cruelty at *all*—it was a vacation better than Disneyland.

4. Take the worst parking spot.

I remember a poster which encouraged people to "take the worst parking spot," out of a concern for physical health: if you are going to drive rather than walk, a minute or two extra walking is worth it. But taking the worst parking spot can also be excellent for our *spiritual* health. And our survival.

We often take as much luxury as we can have. And we are softened by it: we get new conveniences, and we find that we need them. Part of a good preparation for disaster is to wean ourselves, or at least try to weaken our dependency just a little. We become more independent even if we still use them.

What can we do besides take the worst parking spot? We can wear clothing we don't like, for one day only, or spend a weekend without touching a computer, or use desktop computers but leave our smartphones at home. The Orthodox ways of fasting from certain foods are in part a way to take the worst parking spot: the principle is, "Foods have their place but I want to be more spiritually independent and less ruled by my belly." It may be much more than this, but there is a core principle that is not only good for spiritual

health when times are easy, but good for survival when times are hard.

How could you stretch your spiritual muscles? What could you do to "take the worst parking spot?"

5. Remember that life neither begins at 18 nor ends at 30.

In older Russian tradition (and, for that matter, older American tradition), children are held very dearly, and elders are held dearly too. One hears a lament that the Russian Orthodox Church has seminaries to form priests but no such schooling to make its devout old women. These elders are not looked on as has-beens but as treasurehouses.

One (American) friend has said that one decision that he has *never* regretted was that, for the last two years of his grandmother's life, he wrote her a letter each week. After she passed away, he learned that she kept the stack of his letters close by, in her bedstand.

If hard times strike, we will not be able to afford to segregate ourselves by age and market segment.

6. Live real life in a virtual world.

There are many good uses for technology: perhaps the good uses have no exotic sizzle, but technology has been used to support human life: the letter mentioned above uses the full technology of a postal system, online libraries make classic books available, forums work very well for certain discussions, and cars and watches have their uses.

But using technology to escape basic spiritual discipline—I will elaborate shortly—is like using whisky to chase your blues away.

However attractive it may seem, it will bite you in the end.

Using technology to anaesthetize boredom—to have the chatter of the TV on, or always be texting when you have time to kill—is using technology to avoid feeling uncomfortable and maybe practicing a little spiritual discipline. Something deep in older Russian tradition (but not really foreign to older American tradition) is the discipline of silence, a discipline of life without added distractions. It may be hard to explain what the advantage is of not carrying around distractions to anaesthetize boredom, but we grow in silence, and trying to become a mature and rounded person without working through waiting and silence (sometimes *uncomfortable* waiting and

silence) is like trying to be healthy without cutting back on junk food or making a deliberate attempt to exercise consistently.

Today it is an exotic storybook image to ride a horse or live "in harmony with nature" in an old rural village where you saw peasants and a priest, guildsmen and maybe a knight; not long from now it may be a faroff, exotic storybook image to meet most of your friends face or show the harmony of nature to go in person to a university where people come face-to-face to study, teach, and learn like scholars had since medieval times, or work at a quaint "company" where telecommuting is not yet the norm. The ancient reality of face-to-face community *may* become more exotic than riding horses, but it is profoundly more important.

Growing spiritually has never been easy, but it's harder when technology makes it easier to dodge foundational lessons in the spiritual life. But the solution needs to go beyond what technologies we do and do not use. It is not about not-technology. It is about God; the stories of the saints are not stories about how most of them lived before our cherished technologies, but about how they lived and grew in the divine life. It is about their love for their neighbor, about their prayer, and yes, about their letting go of luxuries: but one hardly walks away impressed with how deprived they were, any more than one learns of the struggles, training and victory of an Olympic gold medalist and says, "Wow, there was one deprived athlete!" Virtual life is always at our fingertips, but the door to real life is and ever shall be open to us, whether our life is easy or hard.

7. Don't be a cowboy.

The U.S., more than most nations in history, has a rebel for its hero: a Western never has a tight-knit band of warriors sharing the limelight, but a lone, solitary cowboy. Its religious roots are Protestant, not really Catholic and far less Orthodox. And it's not just Protestants who may have more than a streak of the Independent Christian: the expression "American Catholic" has connotations of a sort of Burger King "Have it your way!" version of Catholicism where people announce, "Hi. I'll have an order of ritual, hold the guilt and authority, with a side of feeling extra special, and could we make it a bit more progressive?" This mentality is simply not helpful. There may be enough points of contact between, for instance, older Russian tradition and older American tradition, but being a cowboy Christian

tradition and older American tradition, but being a cowboy Christian simply does not cut it.

Finding a good Orthodox parish can be hard, but it's worth it. A great many things about the spiritual walk are hard enough *with* the support of a good parish and priest—but much harder without.

8. Pray the [Psalms](#).

I had read through a couple of Shakespeare plays and simply not connected, and then went to a live performance of a play and was riveted. When I asked a Shakespeare-loving friend for his thoughts, he explained, "With due respect to my friends in the English department, Shakespeare (or at least most Shakespeare; I don't mean his sonnets) is not *literature*." I looked at him in puzzlement until he continued. "It's *drama*." That is, *Romeo and Juliet* is not in its living and dynamic form when it is read like a novel, but when it is performed as live drama. Something like this is true for the Psalms: they are in their living and dynamic form not when they are merely read, but when they are prayed, chanted, or sung. And I know I've made the mistake of merely reading them when I should have been *praying* them.

The Psalms offer up the whole human life to the Lord: everything from exultant glory and thanksgiving to, "[My God, my God, why have you forsaken me?](#)" And I know that I, at least, don't know them well enough. I've done a couple of things; besides reading them, I have created the [Psalm Picker](#), which pulls a random Psalm each time you visit. It's something I made in the first place, not for other people, but first and foremost to help myself. There's also [the whole book of Psalms in the Powered Access Bible](#). And a trusty paper Bible is even better.

I hope to pray the Psalms more.

9. Make peace with death, and remember the fact that you will die.

Unlike Russian culture, either ancient or modern, American culture is in strong denial about death. Our medical system does not just prevent (or, rather, *postpone*) death; it hides it when it happens, and death is more off-camera than in most societies. There is a great, often unspoken, collective effort to avoid unpleasant reminders that (if the Lord tarries) each one of us will die. Denial is rarely a helpful way of coping with life or with death.

There is an alternative, and one can ultimately live one's whole life

preparing to die. This is not morbid: if every moment brings us to death, it is unreal and therefore morbid to try to live as if this were not the case. Dying each day means in part not only realizing that our bodies will not live forever, and even that our bodies are aging day by day, but it also means dying to have our way: as in the Rolling Stones song, "You can't always get what you want." It is a dying that day-by-day gives birth to maturity and spiritual resurrection. And *this* is how we can avoid recoiling from aging and death as horrors we are trying to dodge: death, as well as life, is like a thistle: touch it timidly and it will prick you, but grab it boldly, and its spines will crumble in your grasp. When Christ drank his cup to the dregs, there was no bitterness left in the cup: only resurrection that would trample death by death. Few of us get quite *that* far along while we are alive. Still, an imperfect job of facing death with resolve and acceptance is better than a perfect job of sticking your head in the sand. Whether we will die in gruesome circumstances or pass away peacefully in old age, we are all headed towards the grave that holds beggars and kings alike. Today is a good day to begin dying, to die to our self-will and graspingness, to die to how we would like to run the world, and to make peace with the fact that none of us will live forever and triumph over it in that peace. Our triumph comes by accepting it, not by running away from the thought, and if this is a difficult thing that takes years to accept, we might as well begin making peace with death now.

10. Read **from** the *Philokalia* ([Volume 1](#), [volume 2](#), [volume 3](#), [volume 4](#)).

*The Philokalia* is a classic anthology that has been very influential in Orthodoxy in recent years: the more recent classic [The Way of a Pilgrim](#) shows the place the *Philokalia* holds in the heart of Russian piety.

When I was an Evangelical, some of the biggest excitement we had was when we discovered something about how the spiritual life works, or where we read something that had its finger on the pulse of how spiritual life works. And I would add to both of those, "because both of them were something like the *Philokalia*." The *Philokalia* is not the only Orthodox theology and is not the only kind of spiritual writing out there, but it is, more than anything else I've read, the

"science" of spiritual struggle and spiritual growth towards contemplation.

I don't want to give a heavy reading assignment, or give the sense that you must read the *Philokalia* cover to cover if you're serious. Many people would be better to dip into it now and then—or, even better, have sections suggested by a good priest (which is probably more like how it was first used than simply reading it cover to cover). But a little bit each day can be very valuable, and I would underscore my remark that it is the "science" of spiritual struggle and growth.

11. Say, "Thank you!" But not like they do in *The Secret*.

For people who are not satisfied with their current clunker and wish they had a really nice car, the popular New Age book *The Secret* encourages people to imagine they were wrapping their hands around the leather steering wheel of a top-notch luxury car, and say "Thank you!" for the car they were attracting to themselves.

*The Secret* really does encourage saying "Thank you!" but never does it suggest we might say "Thank you!" for the things we already have: certainly the book never suggests that if we are dissatisfied with a regular car that works quite well, we might say "Thank you!" for the car we already have. And they seem to be pretty safe in their assumption that the reader who is invited to drool over a luxury car will not protest, "But I already have a car that works. Can't I say 'Thank you!' for the car that I have?"

All of us have a habit of being ungrateful. There was one time when I was a graduate student who had to choose between paying for medical care and paying for books, but many people who heard of my salary (a bit below \$15000) would be astonished and wish their village could have some fraction of that much wealth to share. And as the case may be, I *survived*. That's something to be thankful for, along with much bigger things: the love of friends, talents and virtues with which to love and serve, the grace of God, and a Heaven that begins in this life and is perfected in the next. There are any number of graces large and small, from being saved from a nasty situation, to eating for one more day, to that daily comic strip or funny story from a friend, to a pleasant chat with a loved one, to the pile of dirty clothes that belong to someone with more than one change of clothing. It is a profound mistake to think that if we lose our wealth

we lose all that we have to be grateful for. Life may be harder. Indeed, it may be so hard that we start to appreciate how much we still have to be grateful for!

We can thank God by praying aloud through Psalms and liturgical prayers (such those in the [Jordanville prayer book](#)), by keeping our eyes open to what we have to be grateful for and inwardly thanking God when we recognize a blessing, by spending time to "count your blessings," and by sharing with others out of grateful recognition of what we have received as gifts we have not earned.

12. Don't live for activism: live for sonship.

The Renaissance *magus* lived to transform the world, and the *magus* is the grandfather of the Western idea that it is worthy to transform the world. In the *magus's* eyes, society as it exists then and now is just a rather pitiable raw material which gains value when the *magus* starts improving it. The *magus* is also grandfather to statism and grand social programs: the idea that whatever problems a society may have, the solution is for the government to fix it.

The 19th century Russian great Nicolas Federov said, "Our social program is the Trinity." It may take some strained imagining to see the the Trinity as another secular program to improve society, but that's *almost* the point. The insight could also be restated, "If you look at the Trinity and think that a Church with the Trinity additionally needs a social program as well, you don't get it." In that sense Orthodox saying "Our social program is the Trinity." is like Amish saying, "Our medical system is a lifetime of hard exercise and healthy food," or devout Evangelicals saying "Our juvenile correctional system is families applying love and discipline to our children."

There are saints who have transformed the world, but this was a side effect of their seeking a life of sonship before God. To pick a Protestant example, one of the Wesleys believed that there were Christians, and then there were super-Christians, and then they were missionaries. So he crossed land and sea to be a missionary, and failed completely. He finally returned home as a defeated failure, and while he was on the ship there was a tremendous storm. He heard the sound of singing from the deck, and when he asked the Christians on deck why they were singing in this deadly storm, they

simply said that they believed in God. And the terrified Wesley broke down and wept. And after he had hit rock bottom, God used him as a tremendous force in American Christianity, but not before. Even if God did want to make a mark on the world through him, it was not nearly so important as having that Wesley sit at the Lord's feet in sonship. I know it is a tough lesson, but if God is at work with you, he will wait for you to flounder through your plans as an instrument to change the world for however long it takes for you to let go of them and approach him, not as a mere *instrument*, but as a *son*, and work out of sonship.

Sonship is a theme that may or may not be hit on today (not just because it may be seen as politically incorrect), but it is woven through the Bible. The New Testament does not just talk about the Son of God; it also talks about the sons of God, and there is an ancient maxim that the Son of God became a man that men might become the sons of God. Don't live for a secular transformation of the world; live to let God transform you in sonship. Anything else is putting the cart before the horse, and it's hard to be practical and get a horse to keep pushing a cart in a straight line!

13. Empty yourself of noise.

All of the Christian walk is a walk of being emptied; to become of like mind with Christ is to empty yourself ([Philippians 2:5-11 RSV](#)):

Have this mind among yourselves, which is yours in Christ Jesus, who, though he was in the form of God, did not count equality with God a thing to be grasped, emptied himself, taking the form of a servant, being born in the likeness of men. And being found in human form he humbled himself and became obedient unto death, even death on a cross. Therefore God has highly exalted him and bestowed on him the name which is above every name, that at the name of Jesus every knee should bow, in heaven and on earth and under the earth, and every tongue confess that Jesus Christ is Lord, to the glory of God the Father.

Other things in Orthodoxy involve emptying yourself (humility, for instance, or chastity), but here I would like to talk about emptying oneself of idle noise. The idea that idle chatter is something to avoid

is not obvious because noise is indispensable to our way of life. We have not only noise in conversation and technology, but inner noise. My priest has said more than once that when we are praying, we should not strive to have *good* thoughts, however good, but *no* thoughts. Heaven is silent, without our worrying and plans and schemes to have things our way, and a saint is not someone who has nothing to worry about or who has very good plans and has God's blessing on those plans, but someone in whom the silence of Heaven has taken root.

The place for this silence is not sometime in the future when, maybe, we imagine we will have nothing to worry about: it is now. There will always be something to worry about, but the [Sermon on the Mount](#) with its "Do not worry" does not say, "Here is how you should live life if everything goes your way," but "Here is how to live life now, in the situation you are in here and now."

I write this as a worrier who has just begun to experience the peace and silence of Heaven.

14. Mind more than what you eat.

The U.S. has been called a "toxic environment" for weight: it's not just supersized meals that make it easy, easy, easy to eat more than is good for you.

But what isn't talked about is that the toxic environment is more than oversized food portions: the toxic environment is in us, and if we understand it simply as a battle of willpower, we have *already* lost. Perhaps you have bent over to uproot a weed and pulled until you almost strained yourself because you had not imagined what a root system that tiny-looking weed had. Overeating has a remarkably deep root system.

Do you watch a lot of television, for instance? What I am interested in here is not that the human body burns fewer calories watching television than sleeping; it is that, even if food is never even *mentioned*, watching television feeds the root system of overeating. Or are you big into fantasy? Playing obscure games? Chances are that you aren't a big TV watcher, but this feeds the root of the problem as well. Or are you interested in the occult? Do you read a lot of romance novels? Do you dally around with SecondWife? *Guess what?* You're doing the same thing.

"*Foul!*" I expect to hear: "*It's none of your business!*" And perhaps it isn't my business, personally, but this has every relevance to what we have to do if we are really going to uproot this weed.

The common thread running through all of these things—and more—is that they are different kinds of medication to provide a painkiller for our life. And if we want a painkiller to adjust life, we want it for all of our life: someone who wants a painkiller for constant backaches wants the pain to be continuously medicated away, not just every once in a while. This basic habit is one we can use with different drugs, and one of them is food. If we treat existence as something to medicate, and look for things to medicate it, then we may use food to medicate it—and it's awfully hard to say no to the pleasure of food, and staying in it as long as we can, if life is something we want medicated away.

This is what is missing if you are only told how many calories to take from what food groups and what food to avoid. If you are trying to use food and other things to medicate life, continuing in that basic attitude while trying to cut back is a nasty game: the only way to win that game is not to play at all. Not that it is easy to uproot the whole root system: trying to reject and progressively uproot using things like food to medicate is not an easy game at all. But it is a game that *can* be won, and the prize is much better than a smaller waistline. We're obsessed with waistlines. But the biggest cost of eating too much is *not* what it does to your waistline, but to your immortal spirit: people who indulge too deeply in physical sweetness lose the ability to enjoy or even seek spiritual sweetness. The lie that traps is to think that good is a way of delivering pleasure that happens to nourish the body. The truth that frees is to know that food is a way to nourish the body that happens to deliver pleasure. And there is more than this.

Fasting is good, but eating is a much more powerful good. One Orthodox bishop, in a place where there are many faithful but shockingly few clergy, gave advice to a community that rarely had a priest. He said two things:

- Keep meeting together.
- Eat together.

Family eating around a table is a powerful thing. Friends eating together is a powerful thing. Table fellowship is a powerful good, and

together is a powerful thing. Table fellowship is a powerful good, and we have not progressed because we have moved to individual meals fried in microwaves.

And this is leaving out the greatest meal of all. The Orthodox teaching is clear: Adam and Eve lost paradise by eating, and we are called back to paradise by eating. The Eucharist is the one sacrament from which every other sacrament flows, and it blesses our whole lives.

The ultimate alternative to a life that is medicated away is a life offered to God, and received back, under the brilliant, blazing shadow of the Eucharist. The unspoken command of "Do not escape" is not given to us for misery, but joy, given that we may find the paradise, here where God has put us, rather than in a doomed effort to escape. "Eucharist" comes from the Greek for thanksgiving, and it is a life unlocked by thanksgiving and in touch with the many things it can be thankful. The "bad" news is that you can't escape, but the good news is that you don't need to.

15. Don't live by throwing things away. Or at least cut back a bit. Living in a disposable world is not good for us, and it's definitely not going to help if disaster strikes.

One Ukrainian friend who immigrated to the U.S. wrote about defeating clutter, writing that her more Spartan husband, who is Russian, purchased few things, but then chose good quality items that was built to last. And this relates, perhaps somewhat strangely, to what another friend said about buying clothing: don't buy a shirt at Navy Pier because, however fashionable it may be, the shirt will wear out quickly. Just go to a second-hand store, and find something that may well "work like iron" because the clothing, even if it is second-hand, was made a time when clothing was *not* made to wear out. These two people's attitudes, of "Don't buy much, but buy high quality" and "Don't buy your clothes at Navy Pier: shop at second-hand stores" have a lot more in common than you might think.

The U.S. economy works by having people buy things more often, and part of this is that things are meant to break down (or go out of fashion, or become obsolete, or...). The disposable mindset is deeply enough rooted that even if Orthodox Christians really try to avoid throwing away "prospora" (bread that has been blessed), there is nothing like an Orthodox Jewish seminary practice of burying paper

in a Jewish cemetery if it has the Divine Name or part of the Mosaic Law written on it. When we need to dispose of worn-out icons, we bury them according to canon law, but it is common practice to print bulletins with maybe an icon on the front and some bit of liturgy or Scripture inside, created to be used once and then thrown away. This is a major red flag.

One joke tells of a couple of students who wanted to try out marriage, for as long as they both shall love. And a professor who had warned them about treating marriage as something you can throw away *did* attend the wedding—and gave the gift of paper plates. A lot more is "disposable" in American culture than just paper plates: we have disposable relationships, disposable personal philosophies, disposable jobs and careers. We assign a shelf life to almost everything. It is true that if the economy comes to a grinding halt, a stack of paper plates won't last very long. But we have other problems with disposable relationships, beliefs, and the like if disaster strikes. It's not just that, in a depression, disposable plates are a luxury you cannot afford: disposable relationships are a luxury you cannot afford, too, even more than disposable plates. Disposable relationships aren't exactly good for us even in good times, but then there's at least the illusion we can afford such luxuries. In a disaster we do not have even *that* illusion.

We need places to take root and deepen. Even warts have something to give to us: it is a mistake to think that saying we need to take root with people and communities is the same as saying that they will always be perfect. It has been said that a person knows the meaning of life when he plants a tree with the full knowledge that he will never live to sit in its shadow. That may be beyond most of us, but we can all strive for a little more permanency each day, each week, each month, each year, each decade.

16. Rethink harmony with nature.

In [Exotic Golden Ages and Restoring Harmony with Nature](#), I wrote about restoring some bygone age:

Here is what you might do one day to live a bit more like prehistoric Grecians, or ancient Celts, or medieval Gallic peasants, or whatever. Keep in mind that this is at best half-way to its goal not a full-fledged return to living like an ancient in

to his goal, not a full fledged return to living like an ancient in harmony with nature to a day, but making a rough equivalent by using what is closest from our world:

1. However exotic the setting may seem to you, remember that it is a fundamental confusion to imagine that the setting was exotic *to those inside the experience*. We not only meet new people frequently; we see new technologies invented frequently. In The Historic Setting, people most likely were born, lived, and died within twenty miles, and even meeting another person who was not part of your village was rare. A new invention, or a new idea, would be difficult to imagine, let alone point to. So, for one day, whatever you're doing, if it feels exotic, avoid it like the plague. Stop it immediately. Don't read anything new; turn off your iPod; don't touch Wikipedia. Don't seek excitement; if anything, persevere in things you find boring.
2. Remembering that there was a lot of heavy manual labor, and stuff that was shared, spend your nice Saturday helping a friend move her stuff into her new apartment. Remember that while stairs were rare in antiquity, it would be an anachronism to take the elevator. Be a good manual laborer and do without the anachronism.
3. Remembering how the Sermon on the Mount betrays an assumption that most people were poor enough that houses would only have one room, spend your time at home, as much as possible, in one room of your house.
4. Remembering that the ancient world had no sense of "Jim's trying to lose weight and is on an old-fashioned low-fat diet, Mary's a vegan, Al's low carb...", but rather there was one diet that everybody day ate, go to McDonald's, order a meal with McDonald's McFries McSoaked in McGrease, and a sugary-sweet, corn-syrup-powered shake.  
If you just said to yourself, "He didn't say what size; I'll order the smallest I can," order the biggest meal you can.
5. Remembering that in the ancient world the company you kept were not your eclectic pick, spend time with the people around you. Go to your neighbor Ralph who blares bad '80s rock because he thinks it's the best thing in the world, and

like a good guest don't criticize what your host has provided—including his music. Spend some time playing board games with your annoying kid sister, and then go over to visit your uncle Wally and pretend to tolerate his sexist jokes.

6. Lastly, when you head home do have a good night's sleep, remember that a bed with sheets covering a smooth mattress was only slightly more common than a Frank Lloyd Wright home is today, go to sleep on a straw pallet in your virtual one room house. (You can use organic straw if you can find any.)

This may seem, to put it politely, a way you would never have thought to live like an age in harmony with nature. But let me ask a perfectly serious question:

What *did* you expect? Did you imagine dressing up as a bard, dancing on hilltops, and reciting poetry about the endless knot while quaffing heather ale?

When we think of "harmony with nature", we often associate it with some exotic experience: it's like getting out of the office and going camping on vacation. Or maybe something more exotic and special than that. The idea that chores could be a form of harmony with nature—even the chores associated with technology and luxury—is almost inconceivable.

But there is a truer and deeper harmony with nature in a trip to the grocery or hardware store than an adventure vacation. One LinkedIn question was quite perceptive: it noted that in other days people hunted or gathered or farmed their food, and people's relationship to nature was not an extra, but the core of how life itself worked. Now it is an add-on and a special luxury: if we fish for our food on vacation, it is never simply how we can get food. It's almost like Wii warriors meticulously donning period-accurate athletic garb and playing frisbee as a full-fledged historical re-enactment, like a Civil War re-enactment.

There is a reason parents have assigned chores, and not just because the chores needed to get done. Persevering through chores instead of always having your way helps children grow to be mature adults and not be spoiled brats. And it has a connection to the more ancient

not be spoiled stars. And it has a connection to the more ancient understanding of being in accord with nature, a deeper understanding that ultimately reached into virtue. (Not to mention that it's just a little bit more like what living off the land was like when there was no alternative!)

It may be that if something seems hollow about robotic pets (if not vampiric), it has something to do with a pet that needs no chores from you—no feeding when you don't feel like it, no arrangements if you are going to leave town, no cleaning out the litterbox. Your pet is there when you want to give it attention, but you can ignore it whenever you want. It is a pet on your terms, and it is entirely at your disposal. And it doesn't compare to the old-fashioned kind of puppy that whines when you want to leave it alone, misbehaves, and is alive enough to need you to do chores.

Learn to love your chores.

17. Don't have all your experiences made for you.

One of the computer professions that has been on the rise is "user experience", which is not exactly about getting the basics to work or even making things be friendly, but about creating a smooth and enchanting experience. This isn't just a computer thing: music, for instance, or movies have their own user experiences, but this sort of thing has been neglected with computers and is now coming into the limelight.

I've read a fair amount about user experience, but one article today drew my attention to something of a spiritual bad smell. It talked about "user enchantment" as a better way of looking at things than "user experience," and to explain the red flag, I would like to talk about experience and enchantment in Orthodox liturgy.

For many people, a first visit to an Orthodox Church may be an enchanting experience. Things look strange (dare I say *mystical*?): liturgy is chanted, there are pictures all around that may not look anything else they have seen, and different things happen. And this is just on a material level. But for all this, the experience has things that a user experience professional aiming for enchantment would wince at. In many parishes, most people stand, and your first time standing for over an hour brings pain to your legs and back. And, if you come more than once or twice and want it to be exotic, you will find that it's not that exotic after a while. If you look for an experience that will

simply be like Disneyland, you will almost certainly be disappointed. Something about the pictures is hard to see. If you look at them in the hope that they will be normal pictures, you will be disappointed: the pictures look awkward and oddly proportioned, and that impression may last a while. What you may not guess at is that after something has happened, there is something in the pictures, or rather *icons*, that goes much deeper than famous oil paintings in museums. The icons are *windows of Heaven*, something like a fantasy portal or a time machine, or a meeting-place, and something *alive*. Heaven and earth meet there, and the reason that people do things with icons—offer kisses, for instance—is that they are not just a picture to look at on a wall, any more than an open doorway to the outside world is simply a tall picture of the world outside. But it takes spiritual sight to see this, and despite the images I have used, the experience is not exotic like getting swept off your feet by a movie's special effects is exotic.

What unlocks icons, and other things in Orthodox worship, is a gradual but lifelong process of transformation of which worship with the parish plays a *part*. It's a bit like saying that hitting a baseball on television is the result of years of disciplined practice. The point isn't to get to the experience of icons being alive and windows you can see through to Heaven; the point is a many-sided spiritual walk.

And the experience is not stand-alone. I have spoken about the experience of Orthodox worship, but the point is not to deliver an experience, but to transform people. The experience may be meticulously cultivated, and it is important, but it is one dimension of something deeper. It's not just that there are things you contribute, but it is somewhat myopic to make the experience the center.

This is not just true of Orthodox worship. It is true of human life: marriage, parenting, friendship, work, leisure, and more. You should be giving of yourself, it should hurt at times, and never is there a standalone experience delivered to you. And it is a much greater good than the kind of experience movies and music deliver.

For now we may have the luxury of standalone experiences being delivered to us. But seeking experiences is a way to create a dependence, and it is a dependence that does not prepare us for rough times. People in the Great Depression had marriage

rough times. People in the Great Depression had marriage, parenting, friendship, and work. Few of them had iPods with music whenever they wanted.

And iPods wear out.

18. Treat your situation as a spiritual training ground.

In some monastic literature, one reads of spiritual fathers giving rather nasty orders ("obediences") to their monks. At first brush, it seems to be cruelty, pure and simple. The more you understand it, the less cruel it is. These unpleasant "obediences" may sometimes be bitter medicine, but they are the medicine of a physician. The purpose is to bring freedom to the monk: spiritual freedom that dwarfs political and economic freedom, the kind of freedom that even an icy labor camp could not take from [a monk, priest, and spiritual father like Fr. Arseny](#). And the entire of monastic life is meant to be a training ground where even the hard parts are there to build up the monastery's members.

This is a microcosm of life for all of us. It may be true, as some say, that all Orthodox are called to asceticism, not just monks, but there is a bigger point. All of us, whether or not we have the monastic kind of spiritual father, have an even bigger Spiritual Father, God, who arranges a spiritual training ground in this life. "All things work together for good" ([Rom 8:28 KJV](#)) for those studying, being trained, and being formed in the great spiritual academy called life. It's just a little easier to see when you understand monasticism as a training ground.

This is easy enough to say as eloquent words and impressive rhetoric; it is much harder if your life has not been easy, you have been scarred by rough experiences, and it seems that random forces buffet you and knock you away from where you want to be. But let me give an analogy.

My brother, then working at a major internet corporation, mentioned that one of the system administrators, whenever a higher-up would come up to him and ask, "Is there a way to—" would cut him off and say, "Stop! Tell me what you want to do." Wanting to give an example, he described a manager saying, "Is there a way to run a `df` [an obscure Unix command that gives a page or two of information about disks] and send the output to a system administrator's pager?" And a terrible response would be for him to

say, "Yes," at which point the manager would say, "Why don't you do that," and have him do something that would look good on paper to a manager, but not even look good on paper to a system administrator. The core issue, the "Tell me what you want to do," might be "A disk got too full recently", with an implication of "I don't want this to happen again. What can we do so system administrators can deal with this?" And there are things that could be done. Perhaps one might write a program to check if a disk is too full, and send a warning (perhaps even to a system administrator's pager), and another tool to sound an alarm if a disk is filling up quickly. But the Unix `df` command is not just obscure; it was much too verbose for the pagers of the day; even an excellent system administrator would have to do a lot of scrolling to find out if the page was a warning about a problem. So the solution as proposed is to cry "Wolf!" every five minutes, and make on-call system administrators do a lot of busy work to figure out if the constant cries of "Wolf! Wolf! Wolf!" actually correspond to a rare enough real problem. The system administrator mentioned by my brother did not like implementing solutions that were not in his employer's best interests, and what different managers were coming to him and saying, with "Is there a way to [*insert solution that only looks good on paper*]?" is, "I've solved a problem badly, and I want you to implement it." This is not just a story about managers and rude system administrators. It's also the story of much of our prayers: "God, I've solved a problem badly, and I want you to implement it." And we bitterly resist when God offers us something that actually *is* in our best interests. On the one hand, St. James tells us, "You ask and do not receive, because you ask wrongly, to spend it on your passions." ([James 4:3 RSV](#)) Our plans to have what we believe will make us happy have much to do with what it means to "spend it on your passions." On the other hand, Christ tells us, "Every branch of mine that bears no fruit, he takes away, and every branch that does bear fruit he prunes, that it may bear more fruit." ([John 15:2 RSV](#)) The "pruning", for many of us, means progressively liberating us from our plans to arrange what we think will make us happy. It is God, the Spiritual Father, ever seeking to spur us to grow up. Blessed are they who struggle in earthly pain, for they may rest in Heavenly victory. Blessed are they whom God frustrates in their

heavenly victory. Blessed are they whom God frustrates in their desires, for they may reach true satisfaction. Blessed are you when your earthly training ground includes suffering you would never have chosen, because in the same way God has trained legion upon legion of saints before us. Thank God, and ever pray for the spiritual sight to see his loving providence in your life.

19. However terrifying it may be to repent, repent anyway.

Sin is not the most popular term today; saying that we are all terrible sinners is not something we want to hear. But we have sins, and we need to repent of them.

One counselor wrote of a man who was preparing to break off an affair forever, and wept: he had come to the insight that what made it so hard to break things off was not because he was going to lose the woman he was having an affair with, but because he feared that "some shining part of him would be lost forever." This is a tiny slice of why the [Philokalia](#) says that *people hold on to sin because they think it adorns them*.

Repentance may be the most terrifying experience a human can adorn; sin is a disease of the soul, and part of its damage is that even if it makes us miserable we are afraid to let it go. Among Protestants repentance has been called "unconditional surrender", and this is absolutely true: lifelong repentance is lifelong surrender, and it is surrender more than once.

But there is another side to repentance. *Before*, it is terrifying and painful surrender. *Afterwards*, there is more than relief: you realize that what you were holding on to, because you thought it adorned you and you would not be able to live without it, was in fact a piece of Hell, and you needed it like you needed one foot stuck in a cruel bear trap. Orthodox speak of repentance from sin as awakening, and part of John the Baptist's proclamation, "Repent, for the Kingdom of Heaven is here," is, "Wake up, for God's glorious reign is coming here." This is why St. Paul quotes, "Awake, O sleeper, and arise from the dead, and Christ shall give you light." ([Ephesians 5:14 RSV](#)) Sin is sleep. It is also spiritual sickness, and for that matter it is worse than standing in something gross: and repentance is awakening, being healed, and stepping out of something vile and feeling truly *clean*—repentance is all of this and much more. It may be Heaven's best-kept secret.

What are you trying to forget you need to repent of? Call it sin, and repent of it.

20. Learn how to make things and make at least minor repairs.

One of the prominent present-day philosophers of virtue wrote [Dependent Rational Animals: Why Human Beings Need the Virtues](#).

The argument is that in real life, dependency is a normal part of human life, and virtues help us with a real life that includes sickness and not being able to do everything you imagine.

One of those ancient virtues is thrift, and Dorothy Sayers's classic essay, "The Other Six Deadly Sins," talks about how thrift was always considered a virtue. Even if we can dodge this virtue, it's still not a good idea.

It is not that hard to check (or change) a car's oil or sew back a missing button, and if you don't know how to do these things, I'd encourage you to visit [a how-to site like eHow.com](#). You don't have to digest the whole site at once, but what might be a better idea is, when something minor breaks, instead of paying someone to fix it, see if you can fix it instead. And, for that matter, buy a basic cookbook (if you don't want to use the internet) and start cooking. (You might find that you start feeling better. If you cook food yourself, your body is running on a higher grade of fuel than horrid microwave dinners.)

21. If not now, when?

There is a temptation to believe, "Life will really begin when I grow up," or "when I get into college," or "when I get married," or "when I get a job," or on a smaller scale "when I get my next paycheck," or "when so-and-so comes to visit," or "when quitting time rolls around." Happiness is something we imagine in the future, and sometimes we don't really enjoy what we were waiting for: we have made our habit to be waiting, and we often find something else to wait for. This dirty secret may be enough of a secret that we don't even know it ourselves: it's just that when The Moment We've Been Waiting For finally rolls around, we find ourselves looking forward to another, more remote, Moment We've Been Waiting For. And we still believe, "Then I'll be happy."

There is profound wisdom in the [Sermon on the Mount's](#) words, "Take therefore no thought for the morrow" ([Matthew 6:34 KJV](#)).

The issue is not just worrying; God keeps giving us this now and this

today, and we exhaust ourselves trying to arrange our future and waiting for life to *really* begin. Perhaps there is some place for planning, but there is no place for being so preoccupied that you are not grateful for what God has given you today, and it is something of a missed opportunity to keep pushing back the date when life really begins. Paradoxically, the best way to arrange for contentment when you cross the next big threshold is to begin living that contentment in this now that God has given us (a now, incidentally, in which many of the things you were waiting for have already been given).

The Sermon on the Mount, in saying not to borrow trouble from tomorrow because "each day has enough trouble of its own," is giving very practical advice. The [Bible](#) says a great deal to the modern world: in stress management terms, it says, "Do not give yourself double stress by adding tomorrow's stress to today's stress. Today has enough stress by itself." The more stressful things get, the more essential it is to cut needless stress. And it is very hard not to keep being preoccupied with tomorrow in stress if you are preoccupied with tomorrow whenever you look for happiness. Eternity and Heaven are in this *now* that God has given us.

Don't say "This sounds great," and decide to start tomorrow. Start today.

22. Don't wonder why you don't have a good enough [*fill in the blank*]. Wonder instead why you have a [*fill in the blank*] that you are unworthy of.

We live in an economy fueled on discontent: advertisements are designed with the powerful unstated purpose of making us discontent with what we have. And discontent has become a way of life. It is no longer mere possessions that we are discontent with: even friendships and family are the sort of thing we wish we could trade up for something better.

"Who is rich? The person who is content," reads one church sign, and it's true. Advertisements perversely promise exactly what they take away: they invite you to be discontent so you can "trade up" in the hope that something better will give you the contentment they beckoned you to cast away.

Think it would be nice to be a king in the Middle Ages? Here's something to think about. In those days, the higher up you were on

the pecking order, the less physical exertion you was expected of you. *However*, royalty needed to do more physical exertion than one would expect of a middle class exercise enthusiast today. If you wish you were a king in the Middle Ages, why don't you sit down and try to make a list of the luxuries you have today that no medieval king could even dream of? The list doesn't just include an obsolete computer or even a car that breaks down. To pick just the area of plumbing, hot and cold running water were unimaginable, like it would be unimaginable today to have a faucet that would pour out clothing whenever you want. Nor would a king have had daily showers / baths to have a body that didn't smell: a gamy-smelling body was just part of the picture. Nor would there be an indoor toilet that so cleanly removes unpleasant odors. Armchair fantasies of being a king are one thing, but there are things no king could dream of that we take for granted.

Instead of taking things for granted and pining for possessions, or friends, or whatever else that are "worthy" of us, why not be not only thankful but mindful of our many blessings?

It is [a strangely joyful thing to realize how many good things God has given us that we do not observe.](#)

23. Live in the real world. (Wishful thinking doesn't really help.)  
C.S. Lewis scholar Jerry Root wrote, [C.S. Lewis and a Problem of Evil: An Investigation of a Pervasive Theme.](#) The book is a study of how C.S. Lewis treats "subjectivism": trying to choose your version of reality over God's. Subjectivism is the belief that corresponds to being curved in on yourself in narcissism and pride.  
Root's readable scholarship looks both at Lewis's nonfiction work, but four works of fiction from different decades of his life. The villains all act and talk like subjectivists, and the villain in "Dymer", a magician who has taken the hands off a clock because he does not want to be subject to time, calls to mind for me my own subjectivism/narcissism/pride in employing almost the same image in [A Personal Flag.](#)  
The Greek word *hubris* refers to pride that inescapably blinds, the pride that goes before a fall. And subjectivism is tied to pride. Subjectivism is trying, in any of many ways, to make yourself happy by being in your own reality instead of learning happiness in the

God-given reality that you're in. Being in subjectivism is a start on being in Hell. Hell may not be what you think. Hell is light as it is experienced by people who would rather be in darkness. Hell is abundant health as experienced by people who would choose disease. Hell is freedom as experienced by those who will not stop clinging to spiritual chains. Hell is ten thousand other things: more pointedly, Hell is other people, as experienced by an existentialist. This Hell is Heaven as experienced through subjectivist narcissism, experiencing God's glory and wishing for glory on your own power. The gates of Hell are bolted and barred from the *inside*. God is love; he cannot but ultimately give Heaven to his creatures, but we can, if we wish, choose to experience Heaven as Hell. The beginning of Heaven is this life, but we can, if we wish, be subjectivists and wish for something else and experience what God has given us as the start of Hell. When I foolishly wished I could live in the Middle Ages, I found the contemporary abundance around me drab, and that is a bit of how God can offer us joy and we can experience it as Hellish. Whether you experience the temptation exactly as I do, or in a different form, the end is always the same. And trying to be somewhere else than reality, even in your mind, is only a liability in dealing with the only reality that counts.

If you want to cope successfully even in a disaster, live in the real world you as you are in it.

24. Don't kick against the goads, and that includes in matters of sex, men, and women.

When I was an undergraduate, I gleefully passed on what I had heard, all the more gleefully as it seemed an opportunity to take a stand against wrongful prudishness: a friend, in class, had heard a professor lecture against alleged [ludicrous Victorian prudish advice to brides](#), advising brides-to-be to "GIVE LITTLE, GIVE SELDOM, AND ABOVE ALL, GIVE GRUDGINGLY."

I had gleefully retold the story to over a dozen people until the deflating experience of hearing a friend, whose judgment I otherwise respected, express skepticism about whether it held the ring of truth. Now, some years later after I have developed more of an interest in history, his skepticism makes sense. The external details all look right, at least at first pass, but the letter is too crisp, too clean, and too perfect. It is too perfect in a way where real historical sources

too perfect. It is too perfect in a way where real historical sources seem to be intractably messy and hard to pin down. There is not a single sentence which does not create or contribute to an effect of more-than-idiotic sexual prudishness and hatred of sexual pleasure. I've read a number of historical sources where the author was suspicious of how deep a good sexual pleasure really is—and not one of them is like this. Some contain even more striking statements—but not one contains sentence after sentence that reads as ludicrous to the modern reader. It's not just a historical forgery; that's almost a surface detail. It gives the impression that someone Wanted to Take a Stand Against Sexual Prudishness, picked a time frame associated with Sexual Prudishness, namely the Victorian era, and wrote for no other purpose than to impress the modern reader with how absolutely ludicrous Sexual Prudishness in any form really is.

Fast-forward a decade and a half. Retro aesthetics have resurrected 1950's black-and-white photography, or photos made to look to us today like they had been taken in the 1950's. Photoshop is on the scene, and hobbyists can make photoshopped images and send them to the web or email. And one of the things passing around the net now is the, um, uh, *authentic* [The good wife's guide](#), complete with the, um, uh, *authentic* words "Advertising Archives" next to the retro picture of a wife happily greeting her husband. However convincingly ragged the *visuals* may look, the *advice* is too crisp, too clean, and too perfect in its offensiveness, and where every sentence in the other forgery—the alleged Victorian advice ("alleged", as in *Monty Python's* "alleged Hungarian-English phrase book") for brides-to-be—is apparently written to impress the reader with how ludicrous Sexual Prudishness is, *every single suggestion* in the more recent "discovery" appears written as if to rile up feminists today. (Even if feminists today might not approve of real 1950's advice to housewives, the 1950's-ish [Letters to Karen](#) is absolutely *nothing* like this.) It appears that someone wanted to impress readers with How Bad Sexism Really Is, picked a time frame popularly associated with How Bad Sexism Really Is, and wrote a forgery (even if "forgery" isn't really the point) designed to impress today's reader with How Bad Sexism Really Is.

These kinds of forgeries reveal something, but not about the Victorian era or the 1950's: people who pick the Victorian era or the

1950's as a popular emblem of something they hate rarely have a particularly empathic understanding of the time period in question, even if they do a good imitation of its external trappings. But that's only half the story. They do take in a lot of people and spread far and wide, and that reveals something about the audience that repeats them.

I'll leave treatment of Bold Denunciations of Sexual Prudishness to the last volume of Foucault's history of sexuality; what I am interested in is not only why [The good wife's guide](#) would be created in the first place, but why it would spread like wildfire, as it manifestly has. The answer has to do with a way we are kicking against the goads.

[The good wife's guide](#) is very revealing. It tells something about the sort of society where it would be so quickly passed on. It tells something about us.

If you've had the misfortune to hear enough dirty jokes, you may notice that when a "beautiful woman" occurs in a dirty joke, unless it's a feminist joke, she does not correspond to the psyche of *any* woman you know. In most dirty jokes, a "beautiful woman" is not a whole person, but something else, the other "person" implied by male desire in its unrefined, unchanneled state. The academic term is "implied other", as when Orientalist Westerners project onto the East the mirror image of what they imagine as Western tendencies: a projection that tells much more about the West than Asia. And here is fleshed out the "implied other" to a decently broad group of feminism as it exists in popular culture today.

If the question is, "Who does feminism see as the enemy?" the best answer is not "Sexist men." Nonfeminist men may be treated as part of the problem rather than part of the solution, and some feminist writing may speak fondly of castration, but the real enemy is wives who stay home, raise children, and may write [a blog about passionate homemaking](#), but don't want anything more, or rather "more" (the assumption being that an independent, at least part-time professional career is an acceptable aspiration for a woman, but being a stay-at-home mom is despicable). Feminists may take offense at nonfeminist men, but not like nonfeminist women. Feminism kicks against the goads. Of all the ways that Christians

kick against the goads today, I don't know of any that are as acceptable to people, or at least an agree to disagree matter, as feminism or Biblical egalitarianism. If I were to go through queer readings of key passages, I could say that the scholarship is misusing cultural context to neutralize the passages in the Bible where God vetoes their claim, and hold up the scholarship as an example of subjectivist adjustment of Tradition to fit contemporary ideologies. I could pointedly say that every single queer interpretation I've read uses cultural context as a drunken man uses lampposts—for support rather than illumination. And if I were to do this, the more liberal scholars would challenge me, but most conservatives and moderates would be sympathetic, or at least open, to my argument. But if I were to make the same arguments about Biblical egalitarian scholarship, I would hear cries of "*Foul!*", cries that I was imposing something political on the study. But I've spent a lot of time reading Biblical egalitarian scholarship closely—read through everything I could find in Tyndale's library (on one point) and written a thesis, as well as reading queer scholarship under liberal scholars—and even if the conclusions are different, the scholarship is disturbingly similar. And subjectivist scholarship is a red flag: it is a red flag for socially unacceptable queer scholarship, and it is also a red flag for perfectly socially acceptable egalitarian scholarship. The fact that egalitarianism is seen as a normal position, entirely consistent with being the sort of person who can say the Creed without crossing his fingers, may be a fact about our cultural and historical context but does not change the reality of kicking against the goads.

I've written above that it is a good thing to learn how to cook, for instance, and sew, and change a car's oil. Doesn't that mean androgyny? Well, I cook, sew buttons and have used sewing machines, change my car's oil, fix flats, and lift weights. Sounds a bit androgynous, and I would like to reply to that. (And not just by saying that I work in a male-dominated field where the odds are good but the goods are odd, and for that matter I've lifted weight machines.)

Neither masculinity nor femininity come from imitating what we think the 1950's were like, nor will they come from any other historical reconstruction. What they do come from is not easy to say.

Stephen Clark tried to answer that question in [Man and Woman in Christ](#) (online edition of a thick book). Clark is quite conservative, and he asserts that simple repetition of the past is impossible. He offers few neat boxes: he does *not* give a simple endorsement of a husband working and a wife staying at home. What he says is rather messy; the only clean statement he makes on that point is that the arrangement of "The husband works a full-time job; the wife works a full time job, and in addition she does all the housework," is clearly condemned (even if it is the most common arrangement). In step with his argument, feminists complain about housewives suffering from depression, this may be because having a woman destitute of adult company for over eight hours a day is *not* truly traditional; in older traditional societies women were in adult company during the day, and may have had much less depression. For reasons like this, Clark gives a rather serious analysis but seems to always end with messy recommendations.

This messiness is appropriate. I've tried to explore this in some of my writing: both in essays like [Knights and Ladies](#) and longer fiction like [The Sign of the Grail](#). And the best answer I can give after my own digging is, "Seek ye first the Kingdom of God, and all these things shall be added unto you."

But why am I claiming that feminism kicks against the goads? Journalist Wendy Shalit's [A Return to Modesty](#) is first about modesty and second about feminism, and it is an exposé of how immodest living such as feminism has encouraged is a recipe for women's heartbreak. In that regard, it offers detail into a remark in a counselor's book on friendship, on how in years of practicing psychology in California he has seen every sexual arrangement you could imagine, and the more he sees, the more convinced he is that the rules God has given are intended to help us and not to harm us. Shalit discusses how sleeping around and hooking up rips up women: their modesty is still there, but it is driven underground and clogging the pipes with vomit. Not that she is setting out to criticize feminism: Shalit was delighted to meet Mary Daly and to have Daly sign Shalit's copy of Daly's *Wickedary*. But when feminism says that old-fashioned modesty and chastity are not good enough for today's women, Shalit says, "No." She exposes how abandoning the

protection of modesty is kicking against the goads. And this is not the only way feminism kicks against the goads.

There's an old joke about a boy whose parents were trying *very* hard not to raise him with any gender preconceptions; his mother worked as a pilot. Someone asked if he wanted to fly airplanes when he grew up, and he said, "No, that's women's work!" And that may be funny, but it is not funny to find out that when kibbutzes ran their experiment on raising children free from sexist preconceptions, the result of this grand experiment was children who were as confused as any about who they were and what it meant to be human. And there are other signs that the kibbutzes were kicking against the goads. Some of their best efforts to free women from traditional behavior kept finding more traditional behaviors that were

Let's return to what we are supposed to think is the only real alternative to feminism. [The good wife's guide](#) shows a caricatured "other" that we are to react against, and realize that a woman should be concerned for herself alone, should push back against traditional expectations. The "good" wife we are to react against has no hopes, needs, desire, or personhood of her own; she absolutely does not contribute to shared life with her husband except as an empty slave, and there is not a shadow of the traditional Christian "two shall become one" that can mean anything but unilateral absorption of the wife into the husband. And something of the fallacy of the excluded middle is at play: one gets the impression that progressive feminism, and [The good wife's guide](#), represent the two basic options: up-to-date feminism, and a caricature that is no closer to nonfeminist women's aspirations than a "beautiful woman" in a dirty joke matches the psyches of real women.

It tells something, not about the 1950's, but about us that today's pop feminism confuses a beautiful-woman-as-in-a-dirty-joke version of 1950's advice to housewives with a real glimpse into the soul of the Bad Old Sexist 1950's. To be a little more picturesque, [The good wife's guide](#) is the Bad Old Sexist 1950's as today's pop feminism would like to jack off to it, as the example of alleged Victorian sexual prudishness was before it. The joke ain't on the Victorian era or the 1950's. It's on us.

I wrote above that we shouldn't believe spam when it tells us that we

need replica luxury watches. Truth be told, we also shouldn't believe spam that tells us how empty our lives are without Viagra and its kin. I thought I knew several happily married couples in their seventies, and I thought I heard the consistent claim that they were more and more happily married as the years wore on, so that each decade of marriage was better than the last. But my old pharmacy knows better, or say they do; they clearly inform readers that you can't be happily married if you lose 17-21 year old desires. Or maybe the pharmacy is, in fact, *wrong*. There is a great spiritual force bombarding us; it urges on women a feminist duty of stepping outside of modesty and chastity, and into a world of heartbreak; though this is hardly feminist, it urges another kind of heartbreak on men bombarded by spam which hawks porn that is in the beginning as sweet as honey and is in the end as bitter as gall and as sharp as a double-edged sword, as those who have fought addiction to porn can attest.

God has created us men and women, and we are trying to escape this fact and ancient wisdom about how to best live as men and women. And we live in a time where, as in feminist fairy tales, we are working hard to subvert what we were given.

It still hurts to kick against the goads.

25. "Put not your trust in princes." ([Psalm 146:3 KJV](#))

Barack Obama may well have unearthly charisma unlike any other U.S. President, ever. I've never heard of anyone else needing to quip, "Contrary to popular opinion, I have not walked on water, nor was I born in a stable." It may be one thing to approve of his achievements or his policies, but it is another to start believing in him as one believes in God—such as "Change you can believe in," and "Yes, you can!" seem to invite. Of course it would be just as bad to believe in John McCain that way, only he does not have such an enchanting charisma, and it's a whole lot harder to confuse him with a Messiah. [The Bible](#), alongside human experience, warns about putting too much trust in political leaders, even when leaders were much less charismatic and people were much less inclined to look to governments to be their saviors. Government has its place, but please do not believe in it as you should believe in God. Governments will all ultimately fail us, and it's best not to be caught off guard.

If you believe government is not to be trusted too far, and your government fails you, you have a problem. But if you trust government as a savior and your government fails you, you have *two* problems. *When*—not if—something goes awry, it's really better to have just the *one* problem, and look to God for your salvation.

26. Waste not, want not.

For now, we've been taught to waste, so that it is normal to throw perfectly good things into the trash / recycle bin. This wastefulness has never been good for us as humans, but the poorer we get, the less waste we can afford.

There is a story about a young man who was on a boat who was sinking, and told his friend, "Help! Show me how to swim—I don't know how!" But the time to learn how to swim is not when you are on a sinking boat, and it is better to learn how to cut down on unnatural waste when you can.

27. Beware of subjectivism in the small.

In Orthodoxy there is a *watchfulness*: an inner mindfulness that guards the heart. Learning this watchfulness, however imperfectly, is a foundational aid in spiritual growth and repenting from sin.

This watchfulness helps uproot problems when they are just a little thought or desire, and uproot them as soon as possible. This applies to anger, to lust, and to the subjectivism in the small that is also called wishful thinking.

The saying, "Procrastination is the thief of time," is true, and it wasn't until I started fighting procrastination that I understood why people would say that—and finally realized how much work *and leisure* time I was losing to the useless time sink of procrastination. I still procrastinate some, but I procrastinate less, and that makes a tremendous difference.

On more of a microscale, there are times that I wasn't *exactly* procrastinating in the sense of dodging work with Facebook, playing games on company time, or making excessive non-professional conversations, but after I read [Jerry Root's study of subjectivism as treated by C.S. Lewis](#), I started finding subjectivism even in things I wouldn't think to hide if someone walked by. For one example, part of my job is troubleshooting computer software. When I had created some new feature and it didn't work, I almost always tested the

problem a time or two or three more before starting to investigate why it didn't work. The reason? However irrational, I was hoping that the problem would go away if I tried again. Not that double-checking can never have the right motive; sometimes trying again is the best thing to do. But my motive was wrong, and I was wasting too much time checking. My motive was wishful thinking, wishing the problem would go away so I wouldn't have to do the hard work of fixing the problem at its source, and this "subjectivism in the small" is no help to my productivity at work. As things are, I noticed a sharp productivity boost when I started exercising watchfulness and began fighting this wishful thinking.

I doubt if this is just an Information Technology issue. The advantage of learning to fight your "subjectivism in the small" is important enough in good times but all the more in a bad economy. [Proverbs 22:9](#) says, "Do you see a man who is diligent/skillful/swift in his work? He will stand before kings, he will not stand before obscure men." If you're unemployed, this is relevant to a jobhunt where it may be hard to stay on task after a demoralizing string of rejections. If you're trying to hold on to your job, this could also help.

28. Remember why you are on earth.

The Westminster Catechism asks, "What is the chief end of man?" and answers, "To glorify God and enjoy him forever." This is the question that sets the stage for everything else. It is an exceptionally well-chosen opening that puts first things first.

There is a saying among some Protestants, "Mission exists because worship does not." And I misunderstood it at first, but the point is this: God does not create people so that they can be missionaries. Absolutely no one is created for that purpose. Everyone is created, not for the purpose of being a missionary, but for the sake of worshiping God. However, there are some people who are not in a position to worship God; they cannot do what they were made for. *Therefore*, Christians are responsible for mission and some Christians should be missionaries.

It is in the same spirit that one might say, "Ascesis, or spiritual discipline, exists because contemplation does not." This work is largely about ascesis in its concrete forms, but God did not create us for ascesis; he created us to contemplate him: in the language of the

Catechism, "to glorify God and enjoy him forever." But we ourselves may not be in a position to contemplate God fully; we need the cleansing, the surgery, of asceticism. If asceticism exists because contemplation does not, all Christians are responsible for asceticism and *all* Christians should be ascetics.

But however important asceticism may be, it is not an end unto itself. Contemplation shines through it; for that matter, asceticism is what contemplation looks like when it puts on work gloves and starts scrubbing. Asceticism and contemplation are at the heart of the Orthodox maxim, "Save yourself and ten thousand others around you will find salvation." To Protestants, this may sound like a warped prescription for missions, but it has a lot to do with how [St. Herman of Alaska](#) and other missionary monks brought Orthodoxy from Russia to Alaska. Asceticism for the sake of asceticism is missing the point, and however much asceticism may contribute to survival, it's not enough to just view asceticism as a survival tool. Asceticism is for the sake of contemplation. Survival, missions, and ten thousand other things all fall under the umbrella of, "Seek ye first the Kingdom of God, and his righteousness, and all these things shall be added unto you."

([Matthew 6:33](#))

29. Use money, but don't trust it.

[Proverbs](#) says money is not to be trusted: "Riches do not profit in the day of wrath, but righteousness delivers from death," "He who trusts in his riches will wither, but the righteous will flourish like a green leaf," "Riches do not last for ever," "Do not toil to acquire wealth; be wise enough to desist." Money seems like a way to control the riskiness of life, but part of human existence is that we will never be in control. We need to be at peace with not being in control, and be at peace with being under God's care.

God's hand shows more strongly and more plainly when we have little power than when it seems we can get along well enough without him. People who have no blanket of wealth, and those who face great danger, seem to see providence much more clearly. If praying "Give us this day our daily bread." is a ritual formality to us, we will gain, not lose, the meaning of these words if we can no longer buy a month's food at once. We may exhaust our money, but we can never exhaust God or his care for us.

If you have money, try to use it well, but do not fear that all is lost if

if you have money, try to use it well, but do not fear that all is lost if you only lose money. You may see God's providence as you have never known it before.

30. Dig deeper than "Eat, drink, and be merry."

The movie *Dead Poets' Society* enchants the reader with what may seem to be a tremendous summons to the fullness of life. And it is not an accident that the movie's celebration of life has the teacher showing students old pictures of athletes who are all dead. A form of "Eat, drink, and be merry" is quoted with warning in the Bible: "Let us eat and drink, for tomorrow we die" ([I Corinthians 15:32 RSV](#)). This "exhortation" is no more an exhortation to true joy than students saying before a wickedly tough high school physics test, "Be sure to write your name at the top of the page, because that's the only two points you're going to get." G.K. Chesterton writes, "It is the *carpe diem* religion; but the *carpe diem* religion is not the religion of happy people, but of very unhappy people. Great joy does, not gather the rosebuds while it may; its eyes are fixed on the immortal rose which Dante saw." Chesterton lived and died decades before *Dead Poets' Society*; it's odd that his words in [Heretics](#) read so much like a reply.

However bad things get, don't believe that grasping all-too-fleeting pleasures is all you can get. Don't sell yourself short with, "Be sure you put your name at the top, because those are the only two points you are going to get." The best things in life, now as ever, are free: friendship, family, the different loves, God, grace and providence, wisdom, rightly used suffering. Some very nasty things may happen, and they may take away what we think are the best things in life. But it's good to remember what's important in life, and the best things in life are free.

31. Ignore brands.

One teacher asked his students, "Imagine your successful self in the future. With which brands do you see yourself associating?" He looked, and saw no raised eyebrows, no puzzled looks, and certainly no one offended by the question or its implications. All of the students answered it as a straight question, and all of them succeeded in identifying brands that their successful future selves would fit in with.

This teacher mentioned this in writing about how the brand economy

does the job today that spiritual disciplines did in earlier ages. He never to my memory used the term "ersatz," but identifying with a brand is all too often an ersatz spiritual discipline. Russian Orthodoxy is shaped by prayer and fasting, and America's orthodoxy is shaped by iPods and Coke. And people say, "I'm a [*name of brand*] person," and no one really seems to ever be offended.

Sometimes some brands are better: if you are buying an external hard drive, I would recommend Seagate over Western Digital. But I would really wince at saying, "I am a Seagate man;" I may appropriately understand myself as a man, as an Orthodox Christian, as having certain people for friends and family, and in other ways as well, but *not* define my identity by a brand of hard drive. And brand loyalty often exceeds what the products justify. You know all those Chevy fans' bumper stickers that show Calvin relieving himself on the Ford logo? The fanaticism goes well in excess of the functional superiority of the average Chevy over the average Ford, if any such superiority exists. Almost certainly one of the better Chevies is better than one of the worse Fords, and one of the better Fords is better than one of the worse Chevies. Even if Chevies tend to be slightly better than Fords, this is *not* a rational comparison of mere material tools. It's buying into an identity.

For some of us, the items we need to buy are almost branded: it's a tall order to walk into an electronics store and ask for an a computer that is unbranded. And for things that are available in generic, buying generic may or may not be the best purchase. I can hardly say, "Don't buy branded merchandise." But what I can say is, "Don't buy into the *mystique* of branded merchandise, and never let brands become your spiritual discipline." And practice all the classic spiritual disciplines: reading the Bible, going to church, praying, fasting, silence, giving to the poor, repentance, and the like. Brands are a distraction from these, and we need true asceticism, not ersatz spiritual discipline.

32. Limit your exposure to advertising.

Some years ago, I used to say that a television is the most expensive appliance you can buy. The reason? All appliances have an up front cost, and there are electrical bills to pay, and maybe repairs. But the expense is usually limited; an air conditioner may take a lot of electricity, but you pay your electric bill and the expense is paid

electricity, but you pay your electric bill and the expense is paid. A television, by contrast, costs more than sticker price, electricity, repairs, and perhaps today removal expenses when you want to get rid of it. A television exposes you to the most effective propaganda in history: commercial advertising meant to manipulate you to buy, buy, buy, and seek your happiness in one product after another, always discontent. An article from *The Onion* tells us,

### **Amazing New 'Swiffer' Fails To Fill The Void**

CINCINNATI-The blank, oppressive void facing the American consumer populace remains unfilled today, despite the recent launch of the revolutionary Swiffer dust-elimination system, sources reported Monday.

The lightweight, easy-to-use Swiffer is the 275,894,973rd amazing new product to fail to fill the void-a vast, soul-crushing spiritual vacuum Americans of all ages helplessly face on a daily basis, with nowhere to turn and no way to escape.

"The remarkable new Swiffer sweeps, dusts, wipes, and cleans with a patented electrostatic action that simply cannot be beat," said spokeswoman Judith McReynolds, media-relations liaison for Procter & Gamble, maker of the dustbroom device. "Whether it's vinyl floors, tile, hardwood, ceilings, or stairs, the incredible Swiffer quickly cleans any dry surface by attracting and trapping even the tiniest dirt and dust particles."

"The incredible Swiffer's extendable telescoping action has just what it takes to cut clean-up time in half," McReynolds continued. "Say goodbye to tedious dusting chores forever... the Swiffer way!"

Upon completing the statement, McReynolds was struck, as she is most days, with a sudden, unbearable realization that she has wasted her life.

Despite high hopes, the Swiffer has failed to imbue a sense of meaning and purpose in the lives of its users.

"The new Swiffer, as seen on TV, requires no spray or chemical cleaners, so I'm sure you can understand how excited I was to finally find something that could give my sad, short existence a sense of worth," said Manitowoc, WI, homemaker

Gwen Hull. "When you finish the clean-up job, simply tear off the patented Swiffer Cloth and throw it away-as easy as one, two, three. But when I did this, tossing the soiled, disposable Swiffer Cloth into the garbage can like so many hollow, rejected yesterdays, I thought to myself, 'Is that it? Aren't I supposed to feel more fulfilled than this?' It all felt so futile. I felt like that Swiffer Cloth in the trash represented me, my hopes and dreams made manifest. I felt like it was my goals and aspirations for a better life that were lying there in the garbage, never to be heard from again."

"I felt so alone," added Hull, loosening her grip on the Swiffer's convenient extendable handle-which can reach even the tightest corners-causing the product to fall to the floor. "So very, very alone."

Bridgeport, CT, homemaker Christine Smalls tries in vain to overcome her clinical depression using the amazing new Swiffer sweeper.

Hull's reaction was echoed by fellow Swiffer owner Glenn Pulsipher. A 45-year-old telemarketing coordinator for a Van Nuys satellite TV company, he said his recent Swiffer purchase has proven to be an ineffective void-filling measure.

"Ever since my divorce nine years ago, I'd been meaning to keep this place a little more clean and presentable for visitors," said Pulsipher, who last had a houseguest in April 1997. "But with all the different sprays and sponges you have to use, who has the time? But when I saw the Swiffer ad on TV, I thought to myself: Wow, all that cleaning power in one simple, easy-to-use tool! And such a bargain! I guess I thought that maybe if I bought one, my life would be easier, more fun, more special. Well, I thought wrong."

"Not that it doesn't work," Pulsipher added. "It does: It works exactly like they said on TV. But after using it once or twice, the sad fact was I no longer cared."

"Why would I?" he continued, sinking into his living-room La-Z-Boy to watch ESPN alone for the 478th time this year. "I mean, it's a dustbroom. What more is there to say?"

"Dust in the wind," said Pulsipher, his voice taking on a muted tone of resignation as the TV blared. "That's all our

limited tone of resignation as the TV blared. That's all our various pitiful and deluded human endeavors ever amount to in the end. My job, my marriage-dust. All dust. And all the Swiffers in the world can't sweep it all up."

Many Swiffer owners have attempted to bolster the fleeting satisfaction the product offers with other Swiffer-related activities, but to no avail. In the past four weeks, more than 40,000 aching empty consumers have logged on to [www.swiffer.com](http://www.swiffer.com) to download pages of "Swiffer FAQs" and "Useful Tips" on optimal Swiffer use. Also widely downloaded was the tour schedule for the "Swiffer Mobile," a Swiffer-themed truck-complete with promotional displays, demonstrations of anti-dust technological innovations, and a stated mission to "examine the mundane task of housecleaning under the keen eye of science"-which will travel to 20 markets across the U.S. this summer. None of these efforts, however, have met with anything but crushing, soul-depleting disappointment and failure.

The hope that the right product will one day come along and bring happiness to consumers' lives is a longstanding American tradition. However, the Swiffer's failure to fill the void has led some to doubt that any product, no matter how revolutionary and convenient, will ever do so.

"It's time we woke up and realized that the wait is never going to end," said Dr. James Ingersoll of the D.C.-based Institute For American Values. "The void is never, I repeat, never going to be filled by something we see on TV and can order with our credit cards."

For others, however, there remains hope.

"Just because the Swiffer and the other 35 new products I've bought over the past three months haven't filled the void, that doesn't mean the next product won't be the one," said Minneapolis homemaker Ellen Bender. "I just ordered the new HyperVac Advanced CyberCarpet CleanWare System, and I just can't wait until it arrives and completely transforms my flat, unsatisfying life."

Procter & Gamble offered its apologies to those who had pinned their hopes on the new dustbroom.

"We are deeply sorry for the Swiffer's failure to ease the crushing ennui faced by U.S. consumers, and we promise to redouble our efforts to one day develop a product that will succeed in soothing your tortured souls," a statement released by Procter & Gamble read in part.

What more is there to say?

Try to avoid the manipulative illusions in advertising.

33. Avoid Facebook at work.

Facebook can be rightly used: for instance, to log on, get a friend's contact information, and log off. And of course if you are your company's representative on Facebook, you shouldn't stay off of Facebook. But both of these cases represent an atypical use of Facebook. The usual use of Facebook is as an absorbing place where you don't notice the passage of hours. And there is something there that doesn't belong at work, and should at least be used in moderation outside of work.

Some people who know the history of technology may point out that email, and for that matter computers themselves, were things bosses tried to keep out of work because they weren't useful and they distracted people from useful work. Today it would be quite provocative, to say the least, for a company to get rid of office workers' computers as distracting and simply pointless for office productivity. And isn't it benighted to fail to learn from history and be superstitious about, in this case, Facebook?

It's *not* superstitious. There ~~may someday be a time~~ will almost certainly be a time where Facebook is no longer such an absorbing place, and saying that office workers can productively use Facebook will be as obvious as saying that they can productively use web browsers or email. And that time is probably just a few years away. But bosses who want to limit Facebook today are not being superstitious.

Robert A. Heinlein, in *Stranger in a Strange Land* has the "man from Mars," who is at first biologically human but raised on Mars, by Martians, in the alien world of Martian culture and language, come to earth and among other things kiss girls in the most impressive way. A little later on, an inquisitive host tries to understand:

"What's so special about the way that lad kisses?"

Anne looked dreamy, then dimpled. "You should have tried it."

"I'm too old to change. But I'm interested in everything about the boy. Is this something different?"

Anne pondered it. "Yes."

"How?"

"Mike gives a kiss his whole attention."

"Oh, rats! I do myself. Or did."

Anne shook her head. "No. I've been kissed by men who did a very good job. But they don't give kissing their whole attention. They *can't*. No matter how hard they try parts of their mind are on something else. Missing the last bus—or their chances of making the gal—or maybe worry about jobs, or money, or will husband or papa or the neighbors catch on. Mike doesn't have technique . . . but when Mike kisses you he isn't doing *anything* else. You're his whole universe . . . and the moment is eternal because he doesn't have any plans and isn't going anywhere. Just kissing you." She shivered. "It's overwhelming."

Now this is part of a Messiah story, of sorts, but a Messiah story where the hero kills lightly and without guilt, and encourages people to throw off sexual shackles: in other words a Messiah story as written by a sex-crazed, anti-Christian libertine. So of course, if this insight is expressed, it may well be portrayed in erotic terms. And as an insight from alien Martian culture which has nothing to do with earth. But portraying it that way is backwards.

This alien Martian kissing insight is in fact an insight that the older generation knows, or at least knew, well. When Walkmans were first becoming popular, one friend recounted to me, his mother talked about how if you were running and had a Walkman on, you were not being attentive to your surroundings. There is a basic principle of asceticism: a principle of being attentive that used to be bedrock to American culture (and, quite obviously, Russian culture) that when you are talking with someone, or working, or at church, or practicing a hobby, the moment is eternal because you don't have any plans and you aren't going anywhere. And we have more and more ways to dodge this spiritual lesson and have noise to keep us away from a

judge and spiritual lesson, and have noise to keep us away from a life where eternity is in our moments. And this is not good for our spirits.

But it's also practically relevant to work; a company that tries to stamp out Facebook at work is not trying to take on the job of your spiritual director; it is trying to make ends meet. Unrestricted Facebook use doesn't just cost time; it costs momentum and energy; it costs attention; it's a way to take bright employees and have them make poorer decisions and make lower quality work.

Being able to work in an office, or jobhunt, or work at home, is an area where this spiritual discipline affects success. If the stakes are survival, then this spiritual discipline becomes a matter of survival.

34. Don't try to wag the dog. More specifically, don't try to wag God. One of my friends has a print-out of two poems side by side:

**"Invictus"**

*by William Ernest Henley*

Out of the night that covers me,  
Black as the Pit from pole to pole,  
I thank whatever gods may be  
For my unconquerable soul.

In the fell clutch of circumstance  
I have not winced nor cried aloud.  
Under the bludgeonings of chance  
My head is bloody, but unbowed.

Beyond this place of wrath and tears  
Looms but the horror of the shade,  
And yet the menace of the years  
Finds, and shall find me, unafraid.

It matters not how strait the gate,  
How charged with punishment the scroll,  
I am the master of my fate:  
I am the captain of my soul.

**"The Soul's Captain"**

*by Orson F. Whitney*

Art thou in truth? Then what of Him  
Who bought thee with His blood?  
Who plunged into devouring seas

And snatched thee from the flood,  
Who bore for all our fallen race  
What none but Him could bear—  
That God who died that man might live  
And endless glory share.

Of what avail thy vaunted strength  
Apart from His vast might?  
Pray that His light may pierce the gloom  
That thou mayest see aright.

Men are as bubbles on the wave,  
As leaves upon the tree,  
Thou, captain of thy soul! Forsooth,  
Who gave that place to thee?

Free will is thine- free agency,  
To wield for right or wrong;  
But thou must answer unto Him  
To whom all souls belong.

Bend to the dust that "head unbowed,"  
Small part of life's great whole,  
And see in Him and Him alone,  
The captain of thy soul.

Trying to be "the captain on your soul" today is often more of a Oprah-style touchy-feely self-improvement project than an abrasively stiff Nietzschean campaign. But the core is unchanged and the end is the same, and it is a real temptation. It's there when we make our plans without first seeking the Lord's guidance, and then ask God to give a rubber stamp blessing. The severity varies, but all of us do this at least a little. (I know *I* do.)

Peter Kreeft said that the chief advantage of wealth is that it does not make you happy. The statement may sound strange, but it is sensible. If you are having trouble financially, you can believe that if only you had enough money, the toughest difficulty in life would be taken care of. But if you have lots of money and you still have problems, you don't need more money; you need something more *than* money. And something like this—but dealing with much more in life than money—is at the heart of George Bernard Shaw's "There are two great tragedies in life. One is not to get your heart's desire.

The other is to get it." The first tragedy is the tragedy of seeing ads for the Amazing New Swiffer, pining for how perfect your life would be with it, yet despite all your longing and all your best efforts, the Amazing New Swiffer forever remains beyond your grasp. The other tragedy is getting the Amazing New Swiffer, finding that it really does have the Cool Telescoping Handle the ads say it does, and then becoming painfully aware that you have the same spiritual void as you did before you owned the Amazing New Swiffer. But these two tragedies in life are not the only possibilities.

The third option is the way of the [Sermon on the Mount](#). It is the way of letting yourself be clay, shaped in the hands of the potter; it is the way of trust in providence. The dreams we imagine for our success could be incapable of making us truly happy; but the plans God provides for our growth and maturity can give us a joy we would never expect. There was an Evangelical T-shirt that shows one Christian fish symbol swimming in the opposite direction from a number of predatory fish, and says, "Go against the flow." And if it is talking about what is wrong in the world, then the message is true. But there is another sense of "going with the flow": the lifelong and difficult struggle of cooperating with the flow of God's providence. It may be paradoxical that we need to work to go with the flow, but it really is work to go with the flow, and it really is a flow, such as an Orthodox priest-monk wrote in [Christ the Eternal Tao](#): which, from what I've heard, is like what I wrote in, [The Way of the Way](#) before becoming Orthodox—but better. [Christ the Eternal Tao](#) places the Fall in relation to the human race leaving a first tranquility and entering worry and becoming distracted with plans to arrange things our way. If we chase after our own versions of the Swiffer, whether or not we succeed, the chasing and the goal are marks of the Fall. You cannot get happiness either if you fail in your quest for the Amazing New Swiffer or if you succeed in the selfsame quest, but there is another option: to give up the quest altogether and live in something better. And that something better is Christ, the Way, the Truth, and the Life.

Happiness can never come from trying to wag God. It comes from God wagging us: it comes from praying, not in order to change God, but to actively work with God changing us. Virtue is easy, much

easier than vice. Getting to virtue may seem harder than remaining in vice, but this is because we do not see how hard vice is. And something funny happens along the way. If we are wise, we see our quests to be the captain of our souls as sin, nothing less, and we repent of it. And we let God work on us, slowly shaping us. Some time along the way, we think of something else we did not think to ask for: God is the Great Choreographer and we have fought his invitations to happiness by dancing the Great Dance, often without ever recognizing the invitation. And second, in his work with us, in our situations, in our prayers and other ascesis, in our successes and failures, our greatest joys and our greatest pains, he is there, working with us, mending our spiritual diseases and freeing us from internal chains that were invisible us, preparing us for freedom. And what we find, long after we realized chasing after being the captain of our souls was a silly fantasy that could never satisfy us, we realize that God is preparing us for deep spiritual freedom: beyond a freedom *in* doomed quests, a freedom *from* doomed quests, a freedom not to have one's soul chained by chasing after the Swiffer. God is the Great Physician, ever working to free us from spiritual disease and the constriction of sin; God is the great Spiritual Father arranging everything in our lives for our freedom: beyond the freedom we know to ask for, another, deeper kind of freedom that we would never even think to ask. God ever seeks to free from chains we do not see how we can live without. And God is the giver who gives us ever better, ever wilder gifts than we ask.

It matters not how strait the gate, nor how charged with punishment the scroll: we turn to God with head ever bowed: and the Master of Our Fate shapes us to be, after him, *the captains of our souls*.

35. Never settle for ersatz sacraments.

There is something that might be called "sacramental shopping:" buying something, not really for the use you will get out of it, but to adjust things inside. This chief ersatz sacrament, and the ersatz spiritual discipline of consuming brands, are two major pillars in the ersatz religion of the ersatz god called Money. But it is not the only ersatz sacrament.

Many first world nations are working really hard to unleash the goodness of sex; and yet their birth rates are almost morbidly low

compared with nations with no pretension of such a "celebration" and "unleashing." The chief good of sex is seen as a pleasurable experience. If you say that the chief good of sex is that it brings life in the world, you are seen as a bit of a sophist or a slightly self-deluded fool. These are symptoms of a real problem, the same problems that are blared loud in spam hawking a range of porn up to and including smut that makes *Penthouse* look like Botticelli. (And, as mentioned before, Viagra ads that proclaim that our natural lust, even if we lay the reins on the horse's neck, is never enough: we always need to goad ourselves more, more, more.) We are trying more and more to get the ultimate sexual thrill, and somehow it never satisfies. And where an older generation would merely call using porn (and relieving yourself) sin, and serious sin at that, we *know* it as an addiction; men are learning the hard way that addiction to porn is as joyless a chain as addiction to some narcotics. All this is tied to approaching sex chiefly as means to pleasure, and used that way it is much worse than what happens when we use eating as our constant pleasure delivery system.

This is a much nastier ersatz sacrament, partly because sexuality runs to the core of our being.

The *only* way to win this game is not to play at all...

We need *real* sacraments.

36. Live the Eucharist.

Orthodox believe in seven sacraments, but you can also say that there are a million sacraments, or only one: the Eucharist.

I am not sure what really to say about the Eucharist; perhaps one starting point might be the Holy Grail. Respected Arthurian scholar Richard Barber wrote [The Holy Grail](#) that he began his research expecting a paper-thin Christianization of originally pre-Christian pagan sources, and came to believe that the Holy Grail in medieval literature centered on the Eucharist, so much so that the so-called secrets of the Grail were in fact the so-called secrets of the Mass, an orthodox spiritual interpretation of the Mass and its various details. I am not sure I believe him all the way; I'll get to that momentarily, but this adds weight to C.S. Lewis's and Charles Williams's Arthurian commentary where they talk about the Holy Grail absorbing into itself all the Celtic pots of plenty, a Holy Grail which is significant

precisely as the first fount of the Eucharist. Whatever other influences may be present in medieval Arthurian legend, it is a clumsy move to try to interpret Christianity as at most a superficial influence in the Arthurian legends and the Grail, and it really tells more about the reader than the text.

And I wanted to make an Orthodox treatment of the Holy Grail, and engage the legends. I wrote my last novella, [The Sign of the Grail](#), after reading a lot of medieval forms of Arthurian legends, and I believe there is more than meets the eye to the legends' presence in [The Sign of the Grail](#): if the narrative is dreamlike, it follows the Arthurian tellings of never-never land. And, sadly enough, part of my impetus was that I was studying in a theology program with not-very-theological theology; reading the legends almost felt like theology compared to my coursework. But I found out something during and after my writing: I succeeded, in a way, but found that I was trying to do something that was impossible, or rather didn't make sense.

In the days that the legends of King Arthur and his court began spreading, the Western Church discouraged people from involving themselves with "idle romances;" online versions of *The Catholic Encyclopedia* are no warmer; and the Eastern Church's response is more, "the holy what?" I had to overlook a spiritual foul smell to become engrossed in the legends, and the foul smell has become a full-fledged stench over the centuries—it's not just *The da Vinci Code*. Richard Barber may be right that the Holy Grail in the medieval legends was not taken from non-Christian legends and given a Christian resurfacing. But in today's Grail questing, the Christian dimension has shrunk almost to oblivion, and been replaced by more occult forces.

In the medieval legends, the Holy Grail is something elusive: if you grasp it, it very soon slips through your fingers. You may quest for it, but it is almost by definition something beyond your reach. It has been said that if the *definition* of dinosaurs includes being extinct, then it is true on purely philosophical grounds that no dinosaurs exist: if Jurassic Park were to open up, it would still be true that no dinosaurs exist: even if enormous, ancient kinds of reptiles were right next to you, they could not be dinosaurs *by definition*, because

they are not extinct. And this is very much like the quest for the Holy Grail. It is like King Pellinore in his pursuit of the ugly Questing Beast that would forever elude him. Part of the (implied) definition of the Holy Grail is that it is something you can't have.

Orthodoxy doesn't really have a tradition of questing for the Holy Grail, nor does it offer any obvious means to possess the Holy Grail. The only game in town is to *become* the Holy Grail.

The sanctification of Holy Communion is a mystery *en route* to the transformation of the faithful. Bread and wine really and truly become the body and blood of Christ. The Eucharist is not consecrated to remain in the chalice; it reaches its full stature only when the vessel that receives it is no longer a lifeless cup, but a living vessel: a living person. And that reaches its full stature in transformed believers and transformed lives. The wine becomes the blood of Christ, and becomes the divine life that is lived by the body of Christ, the Church. There are icons where the chalice is present: one layer of Rublev's [icon of the Trinity](#) is the Father and the Spirit on either side in the Heavenly reality reflected in earthly chalices. The chalice is easier to see in [an icon of Christ, the bread of life](#). But in these layers, not only is every chalice mystically the first chalice: we are made to be more truly the Holy Grail than the Holy Grail itself. We are to receive the Eucharist, and live it in our lives.

There was a Russian saint who authorized more frequent participation in Communion when hard times were descending on Russia. I am wary of treating why some devout Orthodox receive Communion almost every week, and others only on the highest of feasts, but whether Communion is frequent or not, it is a powerful aid for hard times.

37. Hope for God to be a cruel man, harvesting where he has not sown and gathering where he has not scattered (see [Matthew 25:24](#)). There is a Chinese saying associated with Taoism: "Heaven's greatest mercy is without mercy." And there are senses in which Orthodox would not say this: Orthodoxy decisively rejected Novatianism, which is an Orthodoxy without the principle of oikonomia. Both oikonomia, the principle of mercifully relaxing strictness, and akgravia, the principle of striving for strict excellence, are of profound importance. But there is another way in which God's

greatest mercy is without mercy. All of us have the spiritual disease called sin, and God the Great Physician will never stop until he has uprooted all of it. Sin is a spiritual cancer, and as long as we live on earth, we need to repent. And the Great Physician will not stop so long as there is one tiny tumor hidden in our smallest toe. In that way, the Great Physician who is also the Great Choreographer arranging for our good in hard times and easy is merciless: he is a cruel man, altogether without mercy. I've been through chemotherapy; it could perhaps have been worse, but it was one of the nastier things I've been through. But, in my chemotherapy and radiotherapy, the doctors and nurses weren't aiming to give me an enjoyable experience; they were aiming to give me my *life*, and I am profoundly grateful to them for this. Sometimes God's work with us is very pleasant. He wants to give us every good, and even his calls to repentance are meant to give us a host of good things, joy included. But all of us have the seeds of Hell inside us, and all of us need unconditional surrender to the Great Physician. And to those of us who hold on to sin because in our warped state we think it adorns us, God's greatest mercy is without mercy.

How then does God harvest where he has not sown? The Nicene Creed's opening words announce, "I believe in one God, the Father Almighty, Maker of Heaven and earth, and of all things visible and invisible." The first chapters of [Genesis](#) proclaim that the world is God's creation. God has created everything outside himself: the very demons owe their existence to God as much as the angels do. Every fish, rock and tree; every good or bad person, every angel and demon, time itself—all these are sown by the Great Sower. Then what is there to harvest that God hath not sown?

The answer is that God has not sown evil, nor sin, nor death. And he harvests where he has not sown. The Devil killed Christ in the hour that darkness reigned, but this was the beginning of the three-day Pascha of Christ's resurrection, where Christ crushed death, the Firstborn of the Dead ([Colossians 1:18](#)), who opened the doors of death so that all might enter: the moment Satan seemed to secure certain victory was only the final sacrifice by which God secured checkmate. God did not sow the death of his Son, but he harvested where he had not sown: God harvested from the death of his Son the

resurrection of his sons, the saints, his whole Church. And the same is true in the saints' lives. The gulag where [Fr. Arseny](#) served was nothing other than the work of the Devil. God did not sow this, but he worked in it, and he harvested from it a saint's life that touched others. God did not sow those evils, but he worked in them. As "The reason the Son of God appeared was to destroy the works of the devil" ([I John 3:8](#)), but not by turning back the clock and simply erasing them, but by moving forward and transforming them. And the story of [Fr. Arseny](#) is the story of God's triumph in and through his people, triumph even in a death camp. Have you ever met a recovering alcoholic who has been dry for years, and who shows a singular warmth and caring for others? Some of the most beautiful people I know have been recovering alcoholics, and God has harvested where he has not sown and destroyed the Devil's work. And the same is true of our sins and the problems in our lives: God will, if we let him, transform them and harvest where he has never sown.

We live in a time of unusual fragmentation; the postmodern age is more of a bazaar than much that went before, but one and the same God who harvests where he has never sown also gathers where he has not scattered, and gathers into himself. We were all made for communion with God, but sin has scattered us much farther than our expulsion of Paradise. But God is stronger. Even if he has not scattered, he wills to gather all to himself.

Must we allow God to be cruel? We do not have the authority to veto God on this. Some have complained about "The God I believe in would never [*fill in the blank*]," but the God we believe in surprises us and catches us off guard. If we correct God on how he may love, this is a problem, and sticking our head in the sand does not make hard times genuinely easier. Better open ourselves to the infinite mercy of a God who is cruel, harvests where he has never sown, and gathers where he has never scattered.

Fighting this will never help us, and certainly not help us survive hard times.

38. Pray all the time.

The *Philokalia* say a lot about the Jesus Prayer, and [The Way of the Pilgrim](#) tells not only of the life and survival of a homeless man

amidst many dangers, but of God truly blessing him. Much of his book is about him living the Jesus Prayer: "Lord Jesus Christ, the Son of God, have mercy on me, a sinner."

39. Read the saints' lives.

I didn't really know what I missed until I started reading the saints' lives. Difficult lives are not the exception in the saints' lives: they are the rule. Yet the deepest thing one encounters is not this, but God's triumph in his saints.

[The Orthodox Church in America page for saints' lives](#) links to different saints each day, and it is an excellent place to read something each day. ([The Natural Cycle Clock](#) includes related links for the so-called Old Calendar.) Either of these can be bookmarked and revisited for a daily portion of spiritual nourishment.

40. Work hard.

There are different kinds of work in life: work that earns money, work at home, and spiritual work among others. We often pray for God to make life easier for us, when we should pray, "God, give me mountains to climb and the strength for climbing." Every kind of work has merit, and wisdom literature tells us ([Proverbs 6:6-11](#)),

Go to the ant, O sluggard; consider her ways, and be wise. Without having any chief, officer or ruler, she prepares her food in summer, and gathers her sustenance in harvest. How long will you lie there, O sluggard? When will you arise from your sleep? A little sleep, a little slumber, a little folding of the hands to rest, and poverty will come upon you like a vagabond, and want like an armed man.

A lot of work we need to do is work without any chief, officer, or ruler: job hunting, for instance. The word "wisdom" in the Bible does not conjure up the image of a seer with deep, piercing insights; we would do well to read it as "skill for living" if nothing else.

[Seven Habits of Highly Effective People](#) makes an interesting point in its introduction. When the author looked through wisdom literature from different ages, he noticed a recent trend. All of the wisdom literature aimed for skill for living, but the most recent wisdom literature offered what he called a "personality ethic" that

sought success in superficial tricks and techniques. Almost all of the other wisdom literature recognized a "character ethic" that said true success in life is a matter of character and virtue that reaches to the core of our being. "Get rich quick" has been called "the perennial cry of the lazy man," and lots of ads on the web promise a secret that will provide lots of steady income but require little time or work. And the best response is like the wisdom books: "Consider the ant, lazybones. How long will you fall for these scams? Get off your duff, roll up your sleeves, get to work, and keep working!"

41. Go beyond work.

It is true, not only that virtue is easier than vice, but that the Christian life is a life of grace, a Sabbath rest in God: "Be still, and know that I am God" ([Psalm 46:10 KJV](#)). Someone said, "I wouldn't give a fig for the simplicity on this side of complexity, but I would give my life for the simplicity on the other side of complexity." The rest on this side of hard work is only laziness, but the rest on the other side of work is Heaven, and it begins in this life.

42. Go beyond nice, but don't settle for mean.

Being nice is not enough. We in America work hard at being nice, at making other people feel good and at trying to avoid hurting other people's feelings.

But do not confuse being nice with Christian love. Love, like a person, has soft flesh and a hard spine. How a person feels now is not the only concern to love: a much bigger concern is giving what you can to the other person's growth for a lifetime. George MacDonald said that love is easy to please but difficult to satisfy, which is a much greater gift than nice. Life is hard, and people can have trouble believing both that God is in charge and that he is good when really hard things happen. But God is *both* in charge *and* good. The problem is that we have confused being nice with being good. We ask what is wrong with God when he fails to be nice, and the answer is that God has never been merely nice. He works for our good on a deeper level, concerned with discipleship and growth and doing better things for us than simply be nice and give us what ask when we try to inform him what will make us happy.

Our hard work to be a nice world may or may not last. I would not assume that nice is permanent any more than a booming economy is permanent, and some have suggested that nice will come to be

permanent, and some have suggested that nice will come to be replaced by mean. But as for us, we don't need to be merely nice, let alone merely mean. We need a concern for others' growth as people, and we need love with soft flesh and a hard spine.

43. Pay attention to the wallflowers in life.

One theologian, speaking in a chapel, told how when he was younger his mother told him, to pay attention to the wallflowers at a dance, not the eye-catchers dancing in the center of the room. The wallflowers were ultimately much more interesting, his mother told him. And, he said, she was right, and the lesson wasn't just about dancing. When they are considering what doctrines to explore the most, he suggested that we look at the wallflower doctrines.

This is not just a truth about dancing and theology either. Good software developers may use buzzwords on an as-needed basis when dealing with people who expect them, but in the best software developers' favorite professional conversations, the discussion is all about professional wallflowers that the best computer science has been discussing for years, if not decades. It is a *faux pas* to use a string of buzzwords, much like trying to show off your vocabulary by constantly dropping the F-bomb.

"Local" is one of the eye-catchers, and there may be something to it; there is a good case that our ability to make our own private worlds with likeminded friends from the internet loses something that was part of life when life was local because there was scarcely an alternative. "Green" is far from being a wallflower, and there's something to it. But turning off the lights (like reducing and reusing) was once part of the old-fashioned virtue of thrift before it was rediscovered as being green, and for that matter Christians spoke of stewardship before being green was such a watchword. Ages before that, Christian theologians spoke of the tie between humans and nature, looking on the natural world with respect. But the point is not just that local and green have taken a few moves from the wallflowers. The eye-catchers are not as interesting as the wallflowers.

There are other wallflowers in life, and they are also interesting.

44. Don't assume that because Church Fathers could not imagine the world we live in that their words are irrelevant.

The wisdom of the Fathers may be all the more relevant. It is true

that we have been able to cast off much of thrift like a shackle, but the words of the Fathers on thrift were not just because of economic conditions unlike ours; they are written because thrift is good for us as humans. The Fathers could not imagine porn as it comes to us, but what is obsolete about the words of [Proverbs](#) on lust is all on the surface: if [Proverbs](#) tells us that lust is toxic, these words lose nothing today. (Ask a recovering porn addict.) If our technologies and our culture give us more ways to indulge narcissism, the words of the Fathers on pride are far from obsolete. Old warnings about addiction to too much alcohol are *more* relevant, not *less*, when drinking too much alcohol serves as a gateway to meth and cocaine. And this is just some of what the Fathers say about sins; what they say about goodness is even deeper.

The Fathers represent advice that transcend their historical situation to speak to other times and ages. Possibly some of the details need to be adapted, but this is really a side issue. The Holy Spirit moves in the Fathers, they speak to human life, and they have much to teach us.

Some postmodern scholarship that I've read makes a critique of the philosophies that immediately preceded postmodernism, and then assumes, "without loss of generality" as mathematicians say, that nothing more needs to be said about anything else people have said in the ages before. It does help keep articles to a manageable length if postmodern philosophy is compared only to one other philosophy. But more is going on. There is a real temptation to compare a new trend only with what came right before it, and not consider that much older trends may have a better alternative. This is a loss; we need wisdom that has been accumulating for ages.

45. Store up treasures in Heaven.

The [Sermon on the Mount](#) speak to us today:

Do not lay up for yourselves treasures on earth, where moth and rust consume and where thieves break in and steal, but lay up for yourselves treasures in heaven, where neither moth nor rust consumes and where thieves do not break in and steal. For where your treasure is, there will your heart be also.

If danger is looming, we may conceive of a practical response in

terms of laying up treasures: gold, which can be stolen, or stocks, which can crash, or money itself, which can fall prey to inflation. But we shouldn't be reaching for treasures in earth: we need treasures in Heaven: golden virtues that can strengthen us for hard times, community that can pull together, and kindnesses that may be responded to when we least expect it. And even this much is a materialist view of treasures in Heaven: storing up treasures in Heaven teaches us to work with the divine providence that we need most in disasters. It puts first things first:

The eye is the lamp of the body. So, if your eye is sound, your whole body will be full of light; but if your eye is not sound, your whole body will be full of darkness. If then the light in you is darkness, how great is the darkness!

These words are tied, if subtly, to their context: storing up treasures in Heaven gives us a sound eye, while merely storing up treasures on earth stores up blindness, the blindness of being penny wise and pound foolish. The last thing we need in a rough situation is for the light in us to be darkness; it is in disasters we need a sound eye more than any other time, and trying to solve our problems by storing up treasures on earth is simply not up to the task before us.

The [Sermon on the Mount](#) continues after this:

No one can serve two masters; for either he will hate the one and love the other, or he will be devoted to the one and despise the other. You cannot serve God and mammon.

Therefore I tell you, do not be anxious about your life, what you shall eat or what you shall drink, nor about your body, what you shall put on. Is not life more than food, and the body more than clothing? Look at the birds of the air: they neither sow nor reap nor gather into barns, and yet your heavenly Father feeds them. Are you not of more value than they? And which of you by being anxious can add one cubit to his span of life? And why are you anxious about clothing? Consider the lilies of the field, how they grow; they neither toil nor spin; yet I tell you, even Solomon in all his glory was not arrayed like one of these. But if God so clothes the grass of the field, which today is alive and

tomorrow is thrown into the oven, will he not much more clothe you, O men of little faith? Therefore do not be anxious, saying, 'What shall we eat?' or 'What shall we drink?' or 'What shall we wear?' For the Gentiles seek all these things; and your heavenly Father knows that you need them all. But seek first his kingdom and his righteousness, and all these things shall be yours as well.

Therefore do not be anxious about tomorrow, for tomorrow will be anxious for itself. Let the day's own trouble be sufficient for the day.

Virtues are one kind of treasure in Heaven, and they are powerful in themselves: one Greek word, *arete*, means both virtue and excellence. But this last passage from the [Sermon on the Mount](#) says more. The [Sermon on the Mount](#) does not *need* to say, as I have, that virtues and other treasures in Heaven can do things on earth. The major point is that God looks out for us in his divine providence, and we are better building our lives on this providence than trying to do everything ourselves. We are better off living the lifelong lesson of trusting in God than trying to get enough money to replace the providence we do not trust God for.

It is a mistake to say, "Yes, but we do not live in a perfect world and I need something more practical." The [Sermon on the Mount](#) is concerned with practical realities in practical life. When it says, to paraphrase, "Don't make yourself bear tomorrow's stress today; each day has enough stress of its own," it is not telling us that it would be nice to have our lives be stress-free. It's telling wise advice for people whose lives are not stress free, and the more stress you are under, the more practical the advice becomes. Having problems in your life but being too practical for the [Sermon on the Mount](#) is like having a computer program that you can't get to work, but being too smart to read the manual or try to Google a solution on the web. It's a very *impractical* way to be practical.

46. "Stand back, and take off the shoes from your feet, because the place where you are standing is holy ground!" ([Exodus 3:5](#))  
*Take off the shoes from your feet.* In ancient times, shoes were dead things, made not from synthetic materials but from the leathery dead

skin of animals. And these words first spoken to Moses still speak today. If we encounter God, we must spiritually take off dead shoes from our feet: if we are to meet God, it will cost us our dead preconceptions and the dead idols that are a dead weight to us. These words come in Moses's great encounter with God in [Exodus 3:13-15](#), and when Moses draws near he is told to shed his dead shoes on sacred ground.

Today's New Age works very hard to dislodge dead preconceptions. What better way to strip off dead preconceptions than to celebrate any and all religions? To pick a popular topic—an eye-catcher these days—the Mayan "astrological" calendar is a cultural work of beauty; one of the core insights is that each day has an appointed purpose, and Mayan practitioners meet their spiritual leaders to work out how to best live the day as is fitting to its place in the cycles of their calendar. Orthodoxy has something like this: there is a liturgical rhythm which its people are to live out, and what I first read about the Mayan calendar in anthropology helped me to start living a real asset in Orthodoxy. Orthodox, among others, distinguish *chronos* from *kairos*:

There are two [Greek] words [*chronos* and *kairos*] that are both translated time, but their meanings are very different. Translating them both as time is like translating both genuine concern and hypocritical flattery as "politeness" because you are translating into a language that doesn't show the distinction.

as I wrote in [The Horn of Joy](#). *Kairos* is appointed time, time where moments are there with a purpose, time such as liturgical time highlights with its rhythms of seasons and days and the varying ways they are lived out. *Chronos* is time without this meaning, time such as a clock can measure, and in the words of one Orthodox homily, the time of "one damn thing after another." We have largely fallen into *chronos* and largely forgotten *kairos* even if we still yearn for what we miss, and the Mayan calendar did and does understand *kairos* extremely well. But something more (or, rather, less) appears to be going on in the sudden interest in the Mayan calendar. This something ~~more~~ less has to do with how New Age fails to really

remove dead shoes from our feet. New Age is like waterskiing: one moves along quickly, skimming along the top very quickly, where really removing dead shoes from our feet is like swimming: you fall in the water and stay in. What may be going on in the sudden interest in Mayan time is, as I wrote in [Technonomicon](#),

There was great excitement in the past millenium when, it was believed, the Age of Pisces would draw to a close, and the Age of Aquarius would begin, and this New Age would be an exciting dawn when all we find dreary about the here and now would melt away. Then the Age of Aquarius started, at least officially, but the New Age failed to rescue us from finding the here and now to be dreary. Then there was great excitement as something like 97% of children born after a certain date were born indigo children: children whose auras are indigo rather than a more mundane color. But, unfortunately, this celebrated watershed did not stop the here and now from being miserable. Now there is great hope that in 2012, according to the Mayan "astrological" calendar, another momentous event will take place, perhaps finally delivering us from the here and now. And, presumably, when December 21, 2012 fails to satisfy us, subsequent momentous events will promise to deliver us from a here and now we find unbearable.

The quotes are because the anthropology I've read talks about the Mayan calendar without making any connection to astrology, even if they find it beautiful and deep. I have run into New Age hope for a Mayan 2012 watershed, but it never discusses things like, "The Quiché [Mayan calendar-based] reality causes them to scrutinize each day and its character as it relates to their own character, their desires, and their past, as well as the tasks that lie ahead," as *The Dance of Life* tries to explain the beauty and wisdom. *The Dance of Life* is written to challenge one's dead preconceptions; that it does so in an occult way is not the point. No New Age hubbub about December 21, 2012 seems to really challenge the dead shoes we need to be freed from—certainly not the dead shoe of trying to escape a miserable here and now, an idol diametrically opposed to the

spiritual beauty not only of the Mayan calendar, but of the Christian calendar too. Whether the Mayan calendar should be understood as "astrological" I am not sure; certainly *The Dance of Life* with its occult bent never connects the Mayan calendar with astrology. But to ask the Mayan calendar to deliver an escape from the miserable here and now is to ask it to work against its fundamental beauty and its fundamental principle: the point of the Mayan calendar, like the Orthodox Christian one, is not to provide *escape* from the here and now but further provide us help to *engage* the here and now. However much New Age may offer to open our minds, what it gives here at least is further help nailing the dead shoes to our feet. All of us stand on holy ground. The whole world is created by God, and to God it returns. Can we escape? *Never!* [Psalm 139 KJV](#) reads,

Whither shall I go from thy spirit?  
Or whither shall I flee from thy presence?  
If I ascend up into heaven, thou art there:  
If I make my bed in hell, behold, thou art there.  
If I take the wings of the morning,  
And dwell in the uttermost parts of the sea;  
Even there shall thy hand lead me,  
And thy right hand shall hold me.  
If I say, Surely the darkness shall cover me;  
Even the night shall be light about me.  
Yea, the darkness hideth not from thee;  
But the night shineth as the day:  
The darkness and the light are both alike to thee.

The whole world is an emblem of God's glory: God's plan to share his glory with the human race is ultimately the glorification of the entire Creation, and God wills to engage us in the situations we are in. And his glory will ever shock us to remove our dead shoes and enter life more abundantly. There is no place we can flee from God, nor any place that is not holy ground where God will tell us we have dead leather shoes to remove. And taking off our dead leather shoes is lifegiving.

47. Take a cue from an older kind of fermented drink.

[Nourishing Traditions](#), which calls for a return to less plastic-y industrial foods such as was eaten in nutritional golden ages, has a curious inconsistency. She grinds an axe against what you could buy at a liquor store: her nutritional golden ages include colonial America, but in the "traditional" recipe for punch she censors rum and even substitutes something else to make up the five ingredients for an alcohol-free punch. Not that she is a teetotaler: she advocates another kind of rather different alcoholic beverages that are made by another process, "lacto-fermented" beverages made by a process that isn't found in today's commercially prepared beer, wine, and liquors. But, none the less, she grinds quite an axe against drinks that are commercially available. She offers no convincing, or even unconvincing, explanation for how negatively she treats modern drinks as used in her nutritional golden ages.

When I spoke with a friend who was a big advocate of the [Nourishing Traditions](#)-style movement, she openly acknowledged that this was an inconsistency and made no blanket condemnation of the modern drinks a liquor store sells (I think she said she enjoys a glass of wine now and then), but she did say something that [Nourishing Traditions](#) could have said but didn't. The older kind of drinks, home-made fruit of lacto-fermentation rather than yeast fermentation, satisfy in a way that yeast-fermented commercial drinks don't. And there's something to that. When I brought a jar of lacto-fermented water kefir to church for a special occasion, the remark I got, completely unsolicited, said it was satisfying.

I remember when I was in France, hearing some of the history of Champagne and how it came to be. Early on was discussion about how they raised the alcohol content; today's wine is 12-13% alcohol, but in the ancient world wine was around 4% alcohol. And I'm not sure I've ever had a lacto-fermented drink above 2% alcohol, but there is a difference. However much I may love a good wine, I have to be disciplined because if it tastes good, I could drink a drop more than is good for me if I don't pay close attention to how much. But the difference with a good home-made lacto-fermented drink is that the temptation to drink and drink is much less. It's not just that it would take much more of it to get drunk; even if you like it you don't want to keep on drinking because you are satisfied the way you are  
after a good meal

after a good meal.

This is of course dwarfed by the real motivation for lacto-fermented drinks, namely that they are believed to offer much better nourishment, (*probiotic* and all that), but I mention this because this is a microcosm of pervasive changes that have taken place and are taking place throughout the world we live in, and affecting all our life. If I may make a table of what this is a microcosm of, with one column for each vastly different fermented drink:

**Yeast-fermented modern Lacto-fermented ancient  
wine drinks**

At least a little buzz. Satisfaction.

We seem to be shifting further left, and this is not a good thing.

48. Prepare for losses.

Christ told St. Peter, [John 21:18 RSV](#),

Truly, truly, I say to you, when you were young, you girded yourself and walked where you would; but when you are old, you will stretch out your hands, and another will gird you and carry you where you do not wish to go.

These words may be given to all of us.

The Christian Way is a Way of being emptied; its triumph is a triumph precisely *in* loss, a way of life resurrected from death.

The Way before us may be, as for St. Peter, "you will stretch out your hands, and another will gird you and carry you where you do not wish to go." We may have enough to forgive now, but we may have much more to forgive in the future. If that is the case, the best preparation in the future is to work on forgiveness now, even if you make a mess of it as I do. Forgiveness is a way of emptying, a letting go that is connected to the Man who said from the Cross, "Father, forgive them for they do not know what they do" ([Luke 23:34](#)). And this forgiveness is key to opening us up to receive forgiveness: of all the points in the Our Father given as a model prayer, forgiveness alone is singled out for further comment ([Matthew 6:14-15 RSV](#)):

For if you forgive men their trespasses, your heavenly Father also will forgive you; but if you do not forgive men their trespasses, neither will your Father forgive your trespasses.

Unforgiveness, trying to hold on to what we think is our due, locks us out of God's work to give us a greater good than we are wise enough to look for. But if we surrender to God in forgiveness, emptying ourselves, our emptying is in continuity with the emptying of Christ, who again ([Philippians 2:5-11 RSV](#)):

though he was in the form of God, did not count equality with God a thing to be grasped, emptied himself, taking the form of a servant, being born in the likeness of men. And being found in human form he humbled himself and became obedient unto death, even death on a cross. Therefore God has highly exalted him and bestowed on him the name which is above every name,

that at the name of Jesus every knee should bow, in heaven and on earth and under the earth, and every tongue confess that Jesus Christ is Lord, to the glory of God the Father.

This Way of forgiveness, this emptying, is the Way, the Truth, and the Life who is Christ Jesus himself who gives triumph where we can anticipate only defeat. Christ's words to St. Peter announce a martyr's triumph, and Tradition holds that St. Peter was sentenced to be crucified, and said that he was unworthy to be crucified as his Lord was crucified, and asked to be crucified upside down: inverted crucifixion being the one form of crucifixion more excruciatingly painful than Christ's kind of crucifixion. But this is triumph, eternal triumph, a triumph in St. Peter's humbly emptying himself. And if we are emptied, if we forgive, Christ will triumph in us. And this may be the kind of triumph that God works in and through us.

49. Light one candle: it is better to light one candle than to curse the darkness.

Some have said that a candle, such as Orthodox use in prayer, is an emblem of Christ: it gives light, and it gives light by emptying himself. Not everyone uses that image, but God is light, and Christ shone with the uncreated light as he was transfigured. The halo of light around the head of a saint on an icon is not just convention: it is there because Christ blazed with glory so that his face shone like the sun. And this same glory manifests, to some degree, in his saints. One saint, at the end of a holy life, lay on his deathbed with his face shining with the light of Christ, and said, "I have not even begun to repent." This is a microcosm of God's emptying victory.

Light a candle. Or *be* a candle.

50. "Seek first the Kingdom of God, and his perfect righteousness, and all these things will be given to you as well."

*All else is commentary.*

All of what I have said above has real imperfections and leaves enormous gaps. But I would like to address one question: Have I said I was going to offer guidance for rough situations and pulled a bait and switch, offering spirituality instead? To answer that, I recall one friend in high school who said with some disgust that he wished C.S. Lewis had left his religion out of [The Chronicles of Narnia](#). I kept my mouth shut, but

the suggestion struck me as strange, even clueless, like saying you wished Newton had kept all math out of his physics. To dislike Newtonian physics may be one thing, but it betrays some confusion to say that you like Newtonian physics but treat the math as an intrusion, as if the math had been artificially inserted like zombies and ultra-violence into [Pride and Prejudice](#). C.S. Lewis was a man fascinated by myths and legends even before he became a Christian. Tolkein and others showed him his inconsistency in praising a pagan myth of a dying and rising god and then turning his nose up at Christianity as utterly trite; C.S. Lewis became a Christian precisely because he came to believe that the myths he loved all came together in Christ. Lewis crafted [The Chronicles of Narnia](#) out of love for all of these stories, and it is, to put it politely, a somewhat surprising suggestion to say that the story Lewis found truest and most beautiful simply does not belong in [The Lion, the Witch, and the Wardrobe](#). And perhaps it is a bit of a surprising suggestion to say "Tell me what you can about surviving in a disaster, but recognize that your religion is irrelevant to this question."

Robert Heinlein, in [Stranger in a Strange Land](#), wrote, when the characters faced a rather daunting emergency,

"...But I took other steps the first night you were here. You know your Bible?"

"Uh, not very well."

"It merits study, it contains practical advice for most emergencies..."

And this in a distinctly anti-Christian book. Perhaps the text goes on to a rather secular application of [John](#), but the Bible is, among other things, God's own manual for how to deal with rough situations. (And this is to say nothing of the Orthodox Church.)

## Saints Cheering Us On

The famous Hall of Fame ([Hebrews 11:4-40 RSV](#)) tells,

By faith Abel offered to God a more acceptable sacrifice than Cain, through which he received approval as righteous, God bearing witness by accepting his gifts; he died, but through his faith he is still speaking. By faith Enoch was taken up so that he should not see death; and he was not found, because God had taken him. Now before he was taken he was attested as having pleased God. And without faith it is impossible to please him. For whoever would draw near to God must believe that he exists and that he rewards those who seek him. By faith Noah, being warned by God concerning events as yet unseen, took heed and constructed an ark for the saving of his household; by this he condemned the world and became an heir of the righteousness which comes by faith. By faith Abraham obeyed when he was called to go out to a place which he was to receive as an inheritance; and he went out, not knowing where he was to go. By faith he sojourned in the land of promise, as in a foreign land, living in tents with Isaac and Jacob, heirs with him of the same promise. For he looked forward to the city which has foundations, whose builder and maker is God. By faith Sarah herself received power to conceive, even when she was past the age, since she considered him faithful who had promised. Therefore from one man, and him as good as dead, were born descendants as many as the stars of heaven and as the innumerable grains of sand by the seashore.

These all died in faith, not having received what was promised, but having seen it and greeted it from afar, and having acknowledged that they were strangers and exiles on the earth. For people who

speaking thus make it clear that they are seeking a homeland. If they had been thinking of that land from which they had gone out, they would have had opportunity to return. But as it is, they desire a better country, that is, a heavenly one. Therefore God is not ashamed to be called their God, for he has prepared for them a city.

By faith Abraham, when he was tested, offered up Isaac, and he who had received the promises was ready to offer up his only son, of whom it was said, "Through Isaac shall your descendants be named." He considered that God was able to raise men even from the dead; hence, figuratively speaking, he did receive him back. By faith Isaac invoked future blessings on Jacob and Esau. By faith Jacob, when dying, blessed each of the sons of Joseph, bowing in worship over the head of his staff. By faith Joseph, at the end of his life, made mention of the exodus of the Israelites and gave directions concerning his burial.

By faith Moses, when he was born, was hid for three months by his parents, because they saw that the child was beautiful; and they were not afraid of the king's edict. By faith Moses, when he was grown up, refused to be called the son of Pharaoh's daughter, choosing rather to share ill-treatment with the people of God than to enjoy the fleeting pleasures of sin. He considered abuse suffered for the Christ greater wealth than the treasures of Egypt, for he looked to the reward. By faith he left Egypt, not being afraid of the anger of the king; for he endured as seeing him who is invisible. By faith he kept the Passover and sprinkled the blood, so that the Destroyer of the first-born might not touch them. By faith the people crossed the Red Sea as if on dry land; but the Egyptians, when they attempted to do the same, were drowned.

By faith the walls of Jericho fell down after they had been encircled for seven days. By faith Rahab the harlot did not perish with those who were disobedient, because she had given friendly welcome to the spies. And what more shall I say? For time would fail me to tell of Gideon, Barak, Samson, Jephthah, of David and Samuel and the prophets -- who through faith conquered kingdoms, enforced justice, received promises, stopped the mouths of lions, quenched raging fire, escaped the edge of the sword, won strength out of weakness, became mighty in war, put foreign armies to flight. Women received their dead by resurrection. Some were tortured.

refusing to accept release, that they might rise again to a better life. Others suffered mocking and scourging, and even chains and imprisonment. They were stoned, they were sawn in two, they were killed with the sword; they went about in skins of sheep and goats, destitute, afflicted, ill-treated -- of whom the world was not worthy -- wandering over deserts and mountains, and in dens and caves of the earth. And all these, though well attested by their faith, did not receive what was promised, since God had foreseen something better for us, that apart from us they should not be made perfect.

The image is of a stadium where athletes have run the full race, have received their crowns of victory, and now stand around cheering those who are still running: the faithful who are still in life's struggles.

This is not just the prophets and righteous saints from the Old Testament cheering on the first Christians; it is also the saints from the ages cheering on Christians today. If in America we have a revolution, and it turns out horribly, we will enter it with the prayers of the host of Russian saints. In the worst case, it will be an extremely difficult struggle, but there are others who have struggled before us and will stand, crowned in victory, cheering us on to join them in victory.

The text continues to call these saints, "a great cloud of witnesses." We do not know, for sure, what will happen, but whether we have a recovery or a maelstrom, the whole world, including the United States, will have the prayers of this great cloud of witnesses, including the vast army of Russian saints from ancient and modern times.

We have prayers, *from Russia with love.*

# The Fulfillment of Feminism

There was one time when I was sitting in Danada Convenient Care, waiting for a blood draw. A mother led in a little girl who was bawling, sat her down in the waiting area, and began to attend to all the little details: sign in on a clipboard, speak with the office staff, sign a waiver, present an insurance card. The girl was bawling because she had apparently slammed her thumbnail in a door. After a little while I came over and began talking with her. I asked her what her favorite color was. I asked, "What kind of musical instrument does a dog play?" (answer: a trombone). I tried to get her talking, but most of what I said went over her head. After a while, I realized two things. First, I was failing rather miserably to engage her in conversation; I literally could not think of many things to say that a child of that age could respond to. And second, she stopped crying. Completely. I was struck by the near-total lack of pain in her face as she looked at me.

Eventually, I was called in for my blood draw. When I came out, things were totally different. The mother was sitting next to her daughter, and paying attention to her. The daughter was drawn into her mother's attention. I said goodbye and left.

On another occasion, I was at a dinner at someone's house, and my eyes were drawn to a goldfish in a fishbowl. I asked the hostess how old the goldfish was, and her answer was followed shortly by my asking how she managed to keep a goldfish for that long. And I remember vividly her answer. She said, "I talk to it," and then stooped down and began talking to the fish like it was a small child. The fish began eagerly swimming towards her, as if it were trying to swim through the glass to meet her.

Love is a spiritual force, and I thought her answer was looney then because I didn't understand that there are more than material forces that can affect whether a fish is healthy. I thought that the idea of love or hate affecting how a plant grows made a great exotic feature in fantasy, but in the real world science accounts for all the factors in how long a fish lives. Of course it matters that the hostess fed the goldfish and kept the fishbowl clean, but the reason the fish was alive and healthy was because she loved it. (And she's a woman with a *big* heart.) And it matters, no doubt, that I made eye contact with the little girl and squatted to try to be at eye level. But the reason I was able to draw her out of intense pain was the power that love has. I can count on my fingers the times I've been in worse pain than smashing my thumbnails as a child; her pain was atrocious. What was strong enough to pull her out of that pain wasn't my posture, or anything suave at my clumsy failures to say things that were age-appropriate. What pulled her out of her deep pain was love, and I was delighted to see her mother, who had been so busy with a thousand necessary details, giving her attention and love to her now comforted daughter. The mother told me as I said goodbye, "You have a very gentle way about you," and I hold that story in my heart as one of my triumphs.

It's hard to pick out a theme more foundational to feminist ethics, and perhaps the whole of feminism, than caring. Many feminists understand feminism as trying to move from a world dominated by male aggression to a world nurtured through motherly love and caring. And I would like to talk about love in Orthodoxy after talking about aggression.

The term "male aggression" is used a lot. The word "aggression" has a double meaning. Narrowly, "aggression" means "unprovoked violence," a violence that is evil. But there is another meaning to "aggressive," when a doctor pursues an "aggressive" treatment, for instance. Here "aggressive" does not literally mean violence and need not be at all evil... but there is a connection between the two. There is a real reason why we speak of an "aggressive" business plan as well as an "aggressive" assault. Why does "aggressive" sometimes mean "energetically active," something that can be good, when the "main" usage is for something despicable?

Men are more likely to be aggressive than women. In which sense? Actually, both, and there's a link between the two senses that offers insight into what it means to be a man. Talking about "male aggression" is not simply man-bashing, even if it is often done in exactly that fashion. There is something spirited and something fiery that is part of manhood

There is something spirited and something fiery that is part of manhood, something that can be very destructive, but something that can be channeled. I don't think any of us need to be told that masculine aggressiveness can be destructive. But that is not the full story of masculine energy. Channeled properly, male aggressive energy means projects. It means adventures and exploration. It means building buildings, questing after discoveries, giving vision to a community. The same thing that can be very destructive can also energize a man's gifts to society. It can be transformed.

I would pose the question: If masculine aggression can be transformed in this manner, what about feminine and motherly caring?

Love is big in Orthodoxy. God is love. God is light, and other things can also be said, but he is love. The entirety of ethics and moral law is about loving God and one's neighbor. The entirety of spiritual discipline, which Orthodoxy as well as feminist spirituality recognize as important for sustained growth, is a spiritual support not simply to one's salvation, but to love. If my spiritual discipline does not turn me in love towards you, it is fundamentally incomplete. Spiritual discipline without love for others is self-contradictory as a friendship without another person.

What's the relationship between love and caring? Are they synonyms? There is a deep connection, but I believe that an important difference shows up in the question of abortion.

"My body, my choice!" makes a powerful and easy-to-remember political slogan. But nobody believes it, or at least people who have abortions don't believe it. Post-abortion is not about assuring women that it was just a surgery that removed something unwanted, but quite to the contrary is about helping women grieve the loss of a child. You may be able to make a legal argument that the child is part of the mother's body, or say it's just a *potential* life that was stopped. But trying to use that in post-abortion counseling is like telling someone who's drinking milk that has gone bad that the milk is really quite fresh. You might be able to convince *other* people that the milk is really quite fresh, but not the person who's actually *drinking* it. And women who have abortions are the ones who are drinking the rancid milk. In coffee table discussions you can deny that the death of a child is involved and say it's just unwanted tissue. If you're not drinking the milk, you can be conned into believing it's still fresh. But if you're *drinking* it? Post-abortion counseling helps women grieve the loss of a child, and for that reason cannot say "It was just a

*potential life!"*

If women who have abortions don't believe the rhetoric, then why does abortion take place? Quite often, these women feel stuck between a rock and a hard place in which there seem to simply be no good options. This is part of why the pro-life movement has made a major shift to offering compassion and practical help to people in that position. It's a difficult position, and feminists will often argue that abortion is the most caring way out. It is not caring, the line goes, to bring a child into a situation where it will not be cared for, and women should be caring to themselves by not saddling themselves with too much responsibility. And so the ethics of caring sometimes finds abortion the appropriate choice.

In many ethical frameworks you can get away with saying that a mother's love is one love among others. That simply doesn't fly here. In feminism, a mother's love is considered the most intimate love and a mother's caring is meant to be the foundation of a better way of living. It is feminists who have given motherly caring the greatest emphasis and the most central place, and feminists who most fervently defend what any woman who's had an abortion knows and grieves as the loss of a child. It's almost as if a coalition of historians and archivists were the ones most fervently defending the practice of burning old documents.

My reason for mentioning this is not simply irony. My reason for pointing this out is to suggest that something's wrong, and maybe motherly caring isn't strong enough to support the weight feminism asks it to bear. Part of this odd picture is surely rationalization: part of what feminists want is the freedom to live a certain way but not deal with its consequences: be sexually active and not deal with children when they don't want to, and if killing, or in today's carefully chosen terms, "reproductive choice," is the necessary price for freedom on those terms, they accept that price. Part of this is rationalization, but not all. Part of this is the weakness of caring when it is asked to do what feminists hope it will do. Asking motherly caring to do what feminists want is kind of like trying to drive a top-notch car engine to work. It may be a very good engine, and an engine may be *indispensible* to any functioning car, but things go much better if we have the whole car. I'm not just saying that abortion is wrong. I'm saying that if the people who bear the banner of "mother's love" as the healing balm for society's ills are the ones who defend that practice, we have a red flag that may point to another

problem: maybe caring might not do what feminists think it does. Maybe it's not enough.

So what would a whole car look like?

I'd like to quote a passage that has one teacher's take on love:

Then a Jewish law scholar stood up to test Jesus, and said "Teacher, what must I do to inherit eternal life?"

Jesus answered him, "What is written in the law? How do you read it?"

He said to him, "You must love the Lord your God out of your whole heart, with your whole soul, with your whole strength, and with your whole mind, and love your neighbor even as you love yourself."

He said, "That's right; do this and you will live."

But the scholar wanted to be proved righteous before Jesus. He said, "Who is my neighbor?"

Jesus answered and said, "Someone was going down from Jerusalem to Jericho and brigands assaulted him, stripping him and leaving him half dead. And by providence a priest was going down that way and saw him and passed by, giving him a wide berth. Likewise, a Levite was travelling the same way, saw him, and gave him a wide berth. Then a travelling *Samaritan* came across him and was moved with mercy, in the depths of his bowels, and came over, and dressed his wounds with oil and wine, mounted him on his own beast, and brought him to an inn and nurtured him. And the next day he gave a good chunk of his wealth to the innkeeper and said, 'Take care of him, and if he needs anything more, I will repay you when I come back.' Now which one of these three do you suppose showed himself a neighbor to the man who was assaulted by brigands?"

He said, "The one who showed mercy to him."

Jesus said to him, "Go and live that way."

(Luke 10:25-37, my translation) Cloud and Townsend's appropriately titled *Boundaries: When to Say Yes, When to Say No to Take Control of Your Life* argues that this story is a good illustration of their version of boundaries, and that was when I started listening to some nagging doubts

about their theory. They said this was a good example of a measured response: the Samaritan made a moderate and limited response, got the Jew to safety and paid some expenses, and left. Cloud and Townsend ask us to imagine the wounded Jew saying "I need you to stay here," and the moderate Samaritan drawing a their-version-of-appropriate-boundary and saying "I've made a moderate response and need to move on." and saying "No," the way their version of boundaries draws a line and says, "No." And I have not heard a treatment of this story that is further from the truth.

The route from Jerusalem to Jericho was up until the eighteenth century a dangerous place with bandits, and one well-known ruse was to have one bandit lying in the way, apparently grievously wounded, and if someone stopped, the bandits would take advantage of that mercy to assault and rob him. Jesus was saying that the Samaritan stopped in a bad part of Chicago in the middle of the night because a voice in a dark alley said, "Help me." And the Jews and Samaritans hated each other; they didn't have, like today, a setup where people want not to be racist. For that Samaritan to help that Jew was for one gang member to stick his neck out pretty far for a stranger who was from a hostile gang. This is near the top of stupid things you *absolutely* don't do. Was Jesus exaggerating? He was making a quite ludicrous exaggeration to make the point that your neighbor is every person you meet and every person you do not meet, every person who you like, every person who bothers you, every person who is kind, every enemy and every pest you loathe. Jesus was exaggerating, in fact, to respond to someone who was trying to be too comfortable and make him pointedly uncomfortable. I believe the other person was expecting Jesus to draw a reasonable line of reasonable boundaries to his love, and Jesus was quite blunt about setting an impossible and unreasonable standard.

If we try hard enough, we can shut our eyes and neutralize this story. We can neutralize how uncomfortable it makes us; we can neutralize any way this story might contradict today's psychological dogma of boundaries... and we can neutralize the priceless pearl that this story is meant to help us find. And this story does hold a priceless pearl for us.

The point is not that if someone asks you into a situation that makes you uncomfortable, you must go. I don't really think the point is to set much of *any* kind of literal prescription for how far your love must go.

The point is that what is being asked is impossible. Simply impossible, and beyond your power, and beyond my power. It's a command of, "You must be strong enough to lift a mountain." If someone said, "You must be strong enough to lift four hundred pounds off the ground," that would be possible for some people with dedicated training. But the most powerfully built athlete who goes through the most disciplined training cannot lift a medium-sized boulder, let alone a mountain. Jesus isn't saying, "You must be strong enough to lift four hundred pounds," which is something that some of us could achieve through a gargantuan effort. He's saying, "You must be strong enough to lift a mountain," and he's exaggerating, but the whole point is that he's asking something impossible. Only the divine can love that way.

The whole secret hinges on that. The divine became human that the human might become divine. The Creator entered into the creation that the creation might enter into the Creator. Orthodoxy is not a set of rules, however good, to safeguard purely human love. The point of Orthodoxy is to be transformed by the divine love so we can live the life that God lives and love with the love that God loves. It is to live the life of Heaven, beginning here and now. It is to transfigure every human love so that it becomes divine love. Out of love, God became as we are, that out of love we might become as he is. And what feminism seeks in caring grows to its full stature in Orthodoxy.

There is something fundamental that is missed about Orthodoxy if it is understood as a set of practices organized around love, or a set of ideas in which love is prominent, or a movement which tries to help people be more loving. That has some truth, but the truth is more than that. The human cannot be understood without the divine; to be human is to participate, however imperfectly, in God. Orthodoxy can no longer be understood as a movement or a system of ideas and practices than a campfire can be understood as a collection of sticks. The sticks are not just arranged a certain way in a campfire; they burn, and you cannot understand even the arrangement of the sticks unless you are aware of the fire that is the reason they are arranged. Not only to be Orthodox but to be human is to be made in the image of God, which in Orthodoxy has always meant that we are not separate miniatures of God, but manifestations of his glory. God is not merely a First Cause who started things off; he is the blazing Sun whose light shines on everything that daylight illuminates.

daylight illuminates.

Orthodoxy is the fulfillment of feminism. If feminism is a deep question, Orthodoxy is a deep answer that responds to the depths of motherly love with the limitless depths of divine love. This is not just with love. More spiritual feminists tend to like the idea of synchronicity, the idea that materialist causation isn't the whole picture. Synchronicity is the idea that they're not just isolated domino chains with one domino knocking another domino down; the chains are linked in ways that go beyond dominos bumping into each other. There is a richer picture. And Orthodoxy believes all this and more. Orthodoxy has never been through the Enlightenment, when people tried to argue that scientific knowledge is the only valid kind of knowledge and that the kind of cause-and-effect science studies is not only valid but the only way things come about. People used to believe something richer, and in Orthodoxy we still do: that there can be reasons why things happen; there is an *explanation* for "*Why?*" and not just a *mechanism* that answers "*How?*" Dominoes do fall, but you will never understand the picture if you only think there are isolated chains of dominoes. All of this is part of the Orthodox understanding of divine providence. Yet providence is deeper than synchronicity. Synchronicity is a jailbreak; providence is a voyage home. Less flatteringly, synchronicity is providence with its head cut off. Synchronicity recognizes interesting designs in the events of our lives. Providence turns from those interesting designs to an interesting designer, and to some Orthodox, the idea of trying to be spiritual by delving into synchronicity and other themes of Jungian psychology is like inviting people over for wine and cheese and serving Velveeta. We have Camembert, we have Brie, we have goat cheese, and when Orthodox see how often "being spiritual" to a feminist means "digging into Jungian psychology," we want to tell you that Velveeta isn't your only choice! Jesus said, "You will know a tree by its fruits:" people's lives can offer a serious red flag about whether you should trust them and trust what they say. Orthodoxy has saints with better lives than a psychiatrist widely known to have slept with his patients in a relationship that was far more problematic than a mere case of raging hormones. Velveeta's the easiest cheese to find at most stores, but it's possible to find better. Orthodoxy deeply engaged the pillars of Jungian psychology far earlier than Jung did, and the reason we reach for something better is that there is something better to reach for.

Feminism senses that there is something wrong with Western culture, and is searching for healing. One of the strange things about Orthodoxy is that you realize you were right all along. Becoming Orthodox has been a confirmation of things I've sensed, and this is not because I was a particular type of Christian or because I am a man, but because I'm human. I believe that becoming Orthodox, to a feminist, will mean much more than an affirmation of what feminism yearns for. But that's not the only strange thing. One Calvin and Hobbes strip shows the two characters walking through a wood. Calvin asks, "Do you believe in evolution? You know, do you believe that humans evolved from monkeys?" Hobbes' answer is simple: "I can't tell any difference." The strip ends with Calvin chasing Hobbes. Orthodoxy might answer the question, "Do you believe evolution is the right answer to the question, 'Why is there life as we know it?'" by saying:

No, evolution is absolutely not the right answer to the question, "Why is there life as we know it?" For that matter, it is not even a wrong answer to the question, "*Why* is there life as we know it?" It is not an answer to any "Why?" question at all. It is an answer to a "*How?*" question, and even if evolution were the whole truth and didn't have any problems answering, "*How* is there life as we know it?" it is a mechanism to tell how things happen and not an explanation of why things happened. To say, "Why is there life as we know it? Because life evolved just like the theory of evolution says," is a bit like saying, "Why is the dining room light on? Because the switch is in the 'on' position, causing electricity to flow so that the light glows brightly." That's how the light is on, but the reason *why* the light is on is that someone decided, "I want light."

The theory of evolution doesn't answer that question. It might answer a different question, but the theory of evolution is not so much false as a distraction, if you are interested in the great and terrible question, "*Why?*" Instead of figuring out whether evolution is the correct mechanism, you might realize that it answers a different question, and start to ask the question, "*Why* is there life as we know it?"

"Why is there life as we know it?" is a meaty question, a you can grow into, and if you grow into it, you can learn about a creation that reflects God's glory. You can learn about layers of symbol and a

reflects God's glory. You can learn about layers of symbol, and a physical world that is tied up with the spiritual and manifests its glory. You can learn about many layers of existence, and the body that has humanity as its head. You can learn that the mysteries in a woman's heart resonate with the mysteries of life, and begin to see how a woman in particular is an image of the earth. You can learn about all sorts of spiritual qualities that the theory of evolution will never lead you to ask about. And you might learn that there are other questions, deeper questions to grow into, and start to grow into something even deeper than trying to answer questions.

So no, the theory of evolution is not the right way to answer the question, "Why is there life as we know it?"

And most of the time it happens without any philosophy or need to wrap your mind around some dense or subtle idea. Part of Orthodoxy is being caught off-guard by God again and again. It's being informed, "I can't tell any difference." It's asking how to pursue a great goal and learning that you shouldn't have been pursuing that goal in the first place. It's trying to find the best way to get all your ducks lined up, and asking the Lord's help, and realizing that the Lord is calling for you to trust him and let him worry about the ducks. *If* he wants to. These are two sides of a paradox, and Orthodoxy presents them both to everyone.

And both are part of coming home.

# **Game Review: Meatspace**

## Game: *Meatspace*

**Score:** **âœ— âœ— âœ— âœ— âœ—** **âœ— âœ—** (7 out of 5 possible!)

**Category:** First Person Immersive/Puzzle/Real Life Adventure

---

**meatspace:** /meet'spays/, n.

The physical world, where the meat lives — as opposed to [cyberspace](#). Hackers are actually more willing to use this term than 'cyberspace', because it's not speculative — we already have a running meatspace implementation (the universe). Compare [RL](#).

[The New Hacker's Dictionary](#), "[meatspace](#)"

I am faced with the daunting task of reviewing Meatspace. The temptation is to say, "This is stunning! It makes [*insert name of classic*] look like a bad Pong clone! I want to play it again and again!" It's a *temptation*, not because the game doesn't live up to that praise, but because discerning readers read reviews like that and their defenses go up against a reviewer who is, to put it delicately, getting slightly carried away.

So I'll let go of the obvious temptation, and talk about how Meatspace handles physics. There's another game we all know where player slang for a smoke grenade is "lag bomb", because the physics of the smoke is so taxing that it slows the other player's computer to a crawl: a smoke grenade, aka lag bomb, is a cheap way to half-paralyze other players. Maybe that's an extreme example, but haven't we all dealt with games where things get choppy (maybe just a little) when there's a lot going on?

That doesn't happen in Meatspace. End of discussion. Period. For one example, one of a million little effects done *perfectly* is a squirrel running across your path. It's a throwaway effect, really: the game would appear quite convincing without it, but every single detail, from how the furry little body changes shape as it moves to the artificial intelligence controlling its motion to every single perfectly rendered hair, is flawless. Trying to find something that works as a lag bomb simply doesn't work. Move over, physics engines that have a reasonably convincing rag doll effect. Move over, for that matter, the supercomputers I used at the National Center for Supercomputing Applications. The physics is absolutely stunning.

But to say that and stop there is to paint a deceptive picture. Very deceptive. The physics and the graphics are the best I've seen, but there is more to the game than the physics. Many players don't give the physics a

second thought. However well done the physics may be, and however stunningly advanced, the physics is one piece among a million. A beautiful piece, admittedly, but not even one of the biggest. At least to most players; there are some players who play only for the sight and sound aspect, but you can play the game well without those things even being much of a consideration. As impressive as the physics are, and as impressive as every sensory effect is, it would be deceptive at best to say that the game is driven by sight and sound.

In *The Hitchhiker's Guide to the Galaxy* (the book, but unfortunately not the movie), Zaphod Beeblebrox is drawn towards the Total Perspective Vortex, which we learn is a horrifying death, before learning *why* it is a horrifying death. The Total Perspective Vortex shows a person's absolute (in)significance within the universe as an insignificant and forgettable item in a universe that is vast beyond measure. And that is such a horrifying experience that people die from the trauma. Except that Zaphod walks into the Total Perspective Vortex and walks out not only not dead, but contented, happy, proud, and even more full of himself than usual.

What has been happening is that Zaphod has been in an alternate universe, and more specifically an alternate universe that completely revolves around him. *He* is the most important feature of the universe, and the universe knows it. Had he been thrown into the *real* universe's Total Perspective Vortex, he would have been destroyed by it.

And in fact with the other computer games I've played and written, the player is the center of the universe. And that's not the end of it. The universe revolves around the player, and in fact nothing is put into the game but things that are for the player. In a room in a first person shooter, there are millions and in fact billions of ways to see the room. But, if there is a player in the room, only one of those perspectives or angles is calculated: the player's. Everything else is simply ignored. If there isn't a player in the room, the room might as well not be visible. And the rooms themselves exist for the player. The player is a good deal more than the center of the universe: if it's not there for the player, it's not there.

Maybe I've been the center of the universe in other games I've played. In Meatspace, I am *not* the center of the universe. Meatspace has such an immense, fathomless universe that you or I could never be its center.

In Meatspace, if I am in a room and I can see, the light goes just as well where I can't see it as where I can see it. If I leave the light on and walk out of the room, the room is visible—the physics calculations go on—just as well as I am in the room. There are places I could get to, and places I could never get to, and both are developed in full detail—even though there are many more places I couldn't get to than places I could (conceivably) travel to. When I play the game—or, to be more exact, when I *join* the game—there are billions of others in the game, the vast, vast majority of whom have no idea that I am there. If I'm the center of a game's universe, the universe is miserably small. In Meatspace, there is a universe with so many stars that no one inside the game knows exactly how many, and one planet on one of those stars is a rich enough world that no matter how long you played you could never see more than a tiny slice of its treasures.

And AI in the game... To talk about artificial intelligence, I need to draw an analogy with anime. When people watch anime, they are not so imperceptive that they think that the pictures look exactly like people, or cars, or whatever. What they do is cooperate with pictures that most people would never confuse with the real thing, and make believe with some not-very-realistic cartoons, and in their minds give something that isn't really there. The pictures certainly *suggest* people, or whatever else they are supposed to represent. But people watching it cooperate and overlook some rather vast differences between the pictures and what people pretend the pictures are.

In games, the artificial intelligence is like this. You can pretend that you're really having a conversation, or even that the non-player characters move around in a natural way. You can cooperate with the artificial intelligence the way anime enthusiasts cooperate with the cartoon. But you're being generous.

I didn't have to pretend the Meatspace people were intelligent. They *were* intelligent, without my pretending. The game was much more interesting than if the universe, and everybody's life, revolved around me. People had an infinite wealth of experiences, stories, goals, projects, desires, habits, and I may have been part of the picture, but the picture was far bigger than me. When I talked with people, I was not pretending they were intelligent. There was no need. I was stepping into a larger world. In a fantasy world, characters talk about selling magic items,

rumors, joining a party, and other things that revolve around a cramped player. I can't list all the things people talk about in Meatspace (my hard drive only has 30 gigabytes of free space), but talking with another person is an encounter with a larger world that includes more than your priorities. The way other people appear in Meatspace is something I've never seen in another game: an opportunity to step into something deeper and vaster than "Me! Me! Me!"

And this is deceptive, because it generally describes something in a game where nothing is generic—everything is always specific. I'd like to give a slice of specifically what I encountered.

I went through a meandering course that took me through shops with sundry wares, ended up purchasing a few square feet of something very much like leather, and settled down at a place where I could get a food ration. Except "food ration" is a generic and therefore inappropriate term; they did not sell me a "food ration", but (in this case) a delightfully spiced beef curry with vegetables and rice.

As I was waiting for them to make my food, there were pictures around. There was one picture of a beautiful Asian woman sitting on a low stone wall in front of a French formal garden and chateau, one picture of a beautiful Asian woman sitting on a camel in front of an Egyptian pyramid, and one picture of a beautiful Asian woman sitting against a powerful red sports car. There were other pictures obscured by stacked boxes of soda. The women, as well as being beautiful and wearing flattering Western clothes, had the general build and almost the complexion of a Western ideal of beauty.

I had seen this kind of artwork in previous levels of Meatspace—in one large area, there was simply no other kind of picture you could buy on a calendar—but I'd always been puzzled by it. This time, there was something else I could see. They were almost like religious icons. This is not to say that people specifically believed religious doctrines about them, or that there was some failure of perceivedly due reverence in stacking boxes of soda in front of them, or some other things like that, but it is to say that they aren't just pictures of what they show. What they show is not only exotic but the emblem of something transcendent that's shining through. And I can be saddened by some things about them—those pictures can easily slide into the pornographic—but there is something I was saddened by that I am no longer bothered by.

The image of beauty and transcendence is Western much for some of the same reasons that (for a tongue in cheek example) we have a Great White Ninja played by Chris Farley in *Beverly Hills Ninja*. The West is exotic to the East, and the East is exotic to the West. The pictures are misunderstood if they are not seen as a sort of stained glass window that people look at because they see something shining through it.

There's probably a lot more to be said. If I spent several more years of play just to investigate the question, I might also be able to tell you why the shops allowed me to purchase about a square yard of an artificial surrogate for leather, and a few yards of cord, for less money than I would earn in an hour. For now, my game play has included little research into how communities can produce or fail to produce wealth. I just know enough to know that a detail like that, like the kind of system where there are poor people who eat meat with every meal, is a balancing act that has never before been managed in two and a half million years of human community, and quite probably a balancing act that will not survive longer than its civilization, any more than a tree can keep growing once its river runs dry.

There is something about the Meatspace levels we find ourselves in that makes it harder to see the gems around us. The medieval and the Arthurian looks a certain way to us after they no longer exist. What do things look like if we look at our placement in Meatspace as it might appear when our technological society is but a memory?

My avatar (but one could take a long time explaining how it is more than an avatar) was just in a place with Gothic lettering on a sign on the ground, saying, "Spaccarelli Meditation Garden." A pale, almost luminous statue of the Virgin overlooks a waterfall, rocks, plants, and a bench. The garden is small, but in its enclosed space one can be drawn into the quiet of the waterfall's song, forget about the outside world, even the nearby Gothic buildings—Gothic buildings that did not exist in the Middle Ages but do exist on a level that didn't exist in the Middle Ages. I have since moved to a building that combines the Gothic with the modern: I can see stonework that evokes the Gothic, and I see it through a glass wall which would have been extremely unlikely at a time when glass cost as much as a precious metal.

Some players entered the game wishing they were set in the future instead of the past—anything but where they are now. What would my life have been like if I were born in the Middle Ages? That's simple enough. I

have been like if I were born in the Middle Ages? That's simple enough. I would have died in infancy, and my mother with me. Usually when I imagine myself in the Middle Ages, I take any number of things for granted.

The Middle Ages—the knights in armor of Arthurian legend, a picture which becomes even more interesting when it is deepened with scholarly resources to include a different way of perceiving time and space, the shadow of Plato, minstrels singing love songs, precursors to scientific method which become all the more interesting if one looks not at what they became but what they came from—all of this makes for a lost world that is all the more haunting because it can only be entered as a memory.

The character I play is studying theology at a university. "University" means a tradition that began in the Middle Ages, and it means living in community with other students and scholars, free to use technology but always connecting face-to-face and meeting as flesh and blood. As well as the older kind of university, the technology in Meatspace has allowed another kind of education which is a new enough possibility that many players remember when it would have been impossible. In the new model, a student may never meet any of his teachers; there is no sense of living together in community and no real sense that a path or way which has defined teaching since before the ancients is necessary. Not everyone in the ancient model understood or even would accepted the idea that a university should be an embodied community. But the only alternative, the older kind of correspondence school, never enjoyed the same prestige. Now there is another model, not so much another kind of community as a way to substitute for community and embodied presence, and it is gaining a massive ground in a short time. It is a real threat to the older university.

Given the rapid ascent of the "bodiless university", it seems to me quite possible that by the end of my game, I will have seen the old order of a university as an embodied community as it has been since its medieval birth, will have vanished as the horse-drawn carriage vanished after Henry Ford introduced what seemed to simply be another option (besides riding a horse). Perhaps this will never happen, but if you consider how much could vanish, and how much is easy to take for granted, the scholarly community has something as hauntingly beautiful as the knight in shining armor, or perhaps more beautiful, and this is not only because the university is a medieval institution and some

universities have Gothic architecture. The roots run much deeper than that. And that is only one slice of the game—a rather small slice, all things considered.

Technology in this area of the game is interesting, and more importantly than just the technology, the cultural forces surrounding technology are interesting. They hold a tragic beauty, in its own way as tragic and as beautiful as the tale of Arthur's death: two armies stood across from each other, and each had been ordered not to attack unless the other side drew a sword. Then one soldier saw a snake in the grass, drew his sword to protect himself. Then the battle began, and King Arthur was mortally wounded. On the side of technology, the community had achieved technology that opened up possibilities that never existed before partly because it had oriented itself toward technology as no such community had done before. That made for a sorcerer's bargain that made it difficult to perceive other kinds of beauty in other cultures—or for that matter, their own. The full cultural story—were it possible to fully understand—is even deeper in its tragic beauty than the bittersweet hypothesis of a disembodied university opening up something new while hurting the older tradition. One cannot seriously examine technology without seeing its power—and even its *beauty*—yet in this society, it is a minority at best who know what it means, and what the beauty would consist of, for a society ordered around other principles like contemplation.

Yet to say that is silly. It's like reviewing a chess program by describing the art history behind the pictures representing the pawns. Interesting, perhaps, and perhaps impressive, but it falls short of the mark, as does any serious attempt to review Meatspace. I haven't discussed 99% of an expanse of pavement stretching as far as the eye can see and then further, nor a room that lets me look out over trees and buildings as if I were suspended in the sky, nor a melting pot which combines the wealth of Africa, indigenous Americans, Europe, and Asia and which is believed to be the birthplace of hip hop, nor indeed what it means to be in an outer borough in the "capital of the world," nor why some dismiss the Bronx as being not a very nice place to live. I believe I have deeply failed to capture the global spirit of Meatspace because I gave too little attention to the unique local character of my level—and you cannot play Meatspace without encountering such a unique local character. To play Meatspace is to enter a world rich with apples and

character. To play meatspace is to enter a world rich with apples and appearances, books and buttercups, children and cats, drivel and daydreams, electronics and excellence, fables and fairy tales, grandeur and giggles, horses (yes, they still exist!) and houses, igloos and imagination, jumping and justice, kites and katana, languages and laughter, microscopes and megaphones, noses and noise, operas and obverses, porpoises and porcupines, quiet and quickness, roaches and Russia, Swiss Army Knives and spirit, transportation and tummies, understanding and understatements, vowels and vices, water and wisdom, xanthan gum and xylophones, yule logs and youth, zebras and zits. It is far beyond my power to describe them.

# A Glimpse Through a Crystal

I lay on my bed, half-awake, half-asleep, the spectres of dreams beginning to flit through my mind. I saw a castle, a bog, a car with computer screens for its wheels, and many other fleeting images before my mind, when the forms and images began to coalesce.

I saw myself a little boy, blonde-haired, blue-eyed, filthy, and clothed in tattered rags. I was at the end of a pathway, at a pair of massive iron doors, set in a wall of granite that reached as far and as high as the eye could see. On these doors were bronze knockers. I reached, and struck the door; it resounded, as of thunder. I struck the door a second time; it resounded again, and I could sense something — a presence? I know not how to name it. Then my hand reached and knocked the door a third time, and the sound echoed, grew louder, stronger. I stood in place only because I was too terrified to run, and then a blast of light seared the air and shattered the doors. A god came out — he looked majestic enough to be a god, although I could not see his face, for it was covered with a veil — and reached his hand down to me, and said, "Welcome, traveler. I am come to show you the world that is to come. I am to show you Heaven."

I stared in awe and fear, a thousand questions on my mind. And he stood, with a repose that drove away fear. This time, something of the little boy was not only as I saw myself appear on the outside, but inside me; I somehow lost my guile and dignity, and said, "You know what every theologian dreamed of. Can you give me theology from Heaven?"

He laughed, a laugh that burned me and yet was somehow good. He said, "I am sorry, Jonathan. I cannot give you that, because there is no theology in Heaven. It isn't needed. It is one of the brightest lamps that is no more because the Lamb of God himself is our light. When the perfect

no more because the Lamb of God himself is our light. When the perfect comes, the imperfect will pass away. Did you want an answer to some area that Christians debate?"

I thought, and answered truthfully, "No. I — I don't know how to explain it. I want something bigger than that."

The god looked at me, and said, "You have answered well. Calvin, Beza, and Arminius are all up here, all in accordance with each other, and none of them has changed his mind. At least not over the points that Calvinists and Arminians debate. There were plenty of other points where they were wrong. Theology is work well worth doing; it contributes to God's glory, but the best of theologians make quite a few errors. Keep seeking the heart of God, the something bigger, and you will find it. What else do you want to know?"

"Do you have laughter still, I hope?"

"Yes, certainly."

"Could you tell me a few jokes from Heaven?"

"No. I will not mock you with things that are too heavy for you. Your funniest jokes have the barest seed the full-grown plant that lives in Heaven and nourishes everyone; you would be destroyed by our humor."

I looked around, and saw a faint emanation of light from beyond the doorway, a vanishing light; mist and darkness were beginning to appear, and the image looked vague and hazy. I asked, "Why can't I see?"

The being before me said, "You don't see. Or, rather, I am seeing with you and for you. Your eyes cannot bear the load of even my veiled face. I appear to you as you are asleep, beginning to dream, but no such thing exists with us. Sleep is an image of death, and has no place in Heaven. Yet only when you are sleeping is your guard down low enough to let Heaven in."

I asked, "Why should I be granted the special privilege of seeing Heaven?"

He said to me, "It is not nearly so rare a privilege as you think. Heaven is breathed by much of art, literature, music, by friendships, deeds, prayer; in many of these things, the people have insights of Heaven, only not consciously. A great many works you ignore breathe Heaven in a way you will never come close to. The Father is dealing with you as he chooses to deal with you, just as he is dealing with others as he chooses to deal with them. Are you ready to come in?"

I hesitated and said, "One more question. Theology won't exist in

Heaven; laughter will exist aplenty, too real for me to bear its form. I have some guesses about mathematics, which I will not venture to guess. Will I see anything that I know in Heaven?"

He said, "Yes, indeed, a great many things. You will come to see things in Heaven that will make you wonder how you ever saw them on earth without seeing Heaven in them. The custom among believers of holding hands when praying — community and touch (yes, I know you've written a treatise on touch) naturally accompanying communion with God — exists here, filled with the resurrection life as never before. The blessed here who join hands in prayer are totally present to God and totally present to each other — save that it is not only soul-body touching soul-body, but resurrected spirit-body touching resurrected spirit-body. It is a form of communion with God and man. At least that is as much of it as I can tell you in the words of your language. You who wield your language with skill and power have struggled with its limitations, while still a mortal who has never touched the lifegiving energy of the Great River — nor shall you see it tonight. You may see Heaven when you are with me, as you may see Brazil by riding about Rio de Janeiro for an hour on a bus — that is to say, you cannot see one part in a thousand of what is there, nor can you comprehend one part in a thousand of what you see. You will still learn much. Jonathan, you are really not that far off from joining us; your life on earth is passing, fleeting, however many times it may appear to drag; when you will die, you will look around you and say, 'Am I in God's presence already? That was short.' Then you will drink in full from the wellspring of truth —

"Jonathan, I know why you thought but did not ask about mathematics. Mathematics exists here, as an art form — you were right when you thought of all mortal mathematics having to pass through the gates of finiteness. It has to be decidable in a finite time. That is no longer part of man; we can look and immediately know the answer to any of your great unsolved questions. As to how there can still be mathematics when every person can immediately see the answer to the hardest question — I can't explain it to you, but I assure you that God provides an answer to that more stunning than anything a mathematician on earth will ever know. Eye has not seen, ear has not heard, nor has any mind imagined what God has done with the things his children treasure.

"Come, take my hand. We will pass through the doorway together."

I gasped as he took my hand. It was as if I was holding a burning coal

I gasped as he took my hand. It was as if I was holding a burning coal. I looked at my hand, and saw to my surprise that I was looking at the hands of a man again, one whom the fire did not wound. Then the god gave me a pull, and I passed through the blazing portal.

It was with a disappointment that I looked around and saw that I was only in a candy store.

I looked at the wall of glass bowls skeptically, not being in a particular mood for candy. My host said, "Come on! Take as much as you want! It's on me." I took a colorful assortment of candies, and then went out into a sunny field. We stood, looked at the clouds for a while, and then dove into a pool of water. After swimming, he asked me, "Do you want to come to an amusement park? There are roller coasters there unlike any you've seen on earth."

I hesitated, and said, "This isn't much like what I expected in Heaven. This is like what one of my professors called a Utopia of spoiled children. I expect to see pleasure in Heaven, but if Heaven only offers early pleasure — is this all there is to Heaven?"

My host looked at me and said, "You are quite the philosopher. Pleasure is not all there is to Heaven, but God told me to bring you in by this gateway. You need to become as a little child to enter the Kingdom of Heaven, and there is something a little boy sees when he is told, 'In Heaven you can eat all the candy you want,' that you do not. Become as a little child. Would you like some cotton candy?"

I tried to submit to God's will; I'm not sure I got my attitude right, but I tried at least to do the right thing. So I took the candy, and — have I been blind all these years? I know it sounds presumptuous, but I think I really did taste that candy as a little boy would. It left me thirsty, and I am sure it is only because I was in Heaven that it did not leave a big sticky mess all over my face and clothes, but I *tasted* it — sheer, simple bliss. I've heard the old quotation about how a child can't believe that making love is better than ice cream; at that point, perhaps only partly because I am not married, I began to suspect that that statement stems from a forgetfulness of what a child experiences when he eats ice cream — something that is the highlight of a day, the highlight of a week, something that can make a bad day into a good day.

Some people came along, and we began talking, and it wasn't until a good bit into the conversation when I realized that the conversation was switching fluidly between languages — Italian one moment, Arabic the

next, then Sanskrit, then the unbroken language from before the Curse of Babel, the language of the Dawn of Creation — and I began to cry. One of the things I know I can never have in this life is a mastery of all languages — and something in Heaven, perhaps even that cheap candy, had affected me so that I was able to move among languages and cultures among the gods and the goddesses that surrounded me. There was something else I don't know how to describe — a change that was beginning to be wrought in me. It wasn't so much that I was enjoying what was around me, as that I had an enjoyment coming through who I was. And it was not a cause of pride.

Then, as it were, a veil was torn, and I saw one — what can I call it? a rock, or a flame, or a pulsing mound of energy, unmoved and yet dancing, and around it a constellation of little rocks, each one both like the first rock and totally unlike any other. They were all part of a dance, a dance which combined total order with total freedom — and I was part of the dance! I was aware of a kind of communion with the other dancers; space did not separate us. I would not have been more honored if they had all been spinning about me; there is something about it that I cannot describe, even badly.

The dance continued, and as it continued I saw myself walking through a vast hallway, with floors of marble and shimmering golden trees. There was a stand, and on it lay open a massive book. My host opened it, and I only glanced at the pages — enough to see that it recorded the entire story of creation, from Eden to the Second Coming. My life was written on it, every pure thought and action, every sin; I sat stunned that such a thing could be.

"Every place in Heaven is special, unique," my guest said, "and this is a place of remembrance, of story. The special, sweet, fleeting time on earth that each of us had, is remembered for the goods it had that will not exist here. Choosing the right when one's nature is warped and sinful, making disciples of unbelievers, penitence, forgiveness, and ten thousand other things, from marriage to even theology — they do not exist for us, except as a far off memory. We stand clothed in the good deeds of our life on earth — what we could do in the limited time we had. You have a very special place, part of the tiny minority of runners who approach the finish line, while the rest stood outside, cheering. This is the Story of how we came to be, and it is your Story too. Cherish your time as mortal man; it will not last long. You have not long before the perfect comes and the

will not last long. You have not long before the perfect comes and the imperfect disappears. You know how children always wish to grow up, how they rush on, and how adults see childhood as a special time. You want to be through with the race, to have received your crown. Rightly so. At the same time, wish to make the best use of the fleeting moments, of the scarce time before you enter into glory. Before you will know it, many of the goods you know now will be only a memory.

"I would like to show you one more thing. Walk this way." He took me, and opened a door, to a place that seemed to open out onto a countryside, or a palace. The palace had a courtyard, a pool in which to swim, a view onto forest. Inside were books, and meeting places, and a tinkering room, and a gallery of artwork. "You know that our Lord said, 'In my Father's house there are many rooms.' This is one of those rooms. It is a room that the Father has prepared for a believer, knowing all of his life and his virtues and his good works. Each one holds things in common with others, and is different. And they're connected, though you can't see the connections now. Would you like to know whose room you are looking at?"

"Yes, very much. I would like to meet him," I said.

"It's your room, Jonathan. And you haven't seen the tenth part of it. You will forever be king over a corner of Heaven, having this place in which to commune with God and invite other people over — and visit their rooms. It is impossible on earth to be friends with a great many people — but not here."

As I was listening to my guide, I heard footsteps behind me. I looked, and saw a Lamb next to me, soft and gentle. I took it into my arms, and it nestled against my heart. I held the Lamb for a while, and then said, "This guardian fills me with the terror of his majesty; how is it that you do not?" The Lamb looked into my eyes and said, "All this in time you shall understand — when you do not need to. I will hold you in my heart then, as I hold you in my heart now. Would you like to come here? For real?"

I thought and said, "It would not be the best thing. I have longed many times for Heaven, but then where would my creations be? I hope that the time will pass quickly, but I have work to do on earth. Lord, please help me bear the time until then, and let it be fruitful! But I want to enter into Heaven after living to the full the lifetime of work you have for me — whether it is a long lifetime or being killed in a car accident on the road to work tomorrow. I want to come to Heaven through earth."

He said, "You have chosen well, mystic. It will not be that long. And I will always be with you."

I awoke with a jerk, and looked around. 9:58 PM. Time to get a good night's sleep and be rested for tomorrow. And pray for God's providence in my work.

# A Glimpse into Eastern Orthodox Christianity

## Introduction

Do children and adults understand each other? To some degree, and if many adults have lost touch with childhood, there are some who understand childhood very well. But when I was a child, I wanted to write a book about things adults don't understand about children. (I have since forgotten with what I wanted to write.) There is a gulf. A father can read a [Calvin and Hobbes](#) strip, and his little girl can ask what's funny, and the father is in a pickle. It's not that he doesn't want to explain it, and he may be able to explain the humor to another adult, but all of those explanations fail with his daughter. Children often believe that there's a big secret the adult conspiracy is refusing to tell them. And the adult who is trying to get a child to "be serious" by setting aside "make believe" and dealing with what is "real" is like someone who wears a raincoat to the shower. The things that go without saying as part of being serious are in many cases not part of childhood's landscape.

In this sense, children understand each other. This understanding is compatible with friendship, liking, hating, being aloof, and several other things, but there are certain things that go without saying, and the things that go without saying are shared. Two young children will have a world

where the difference between "real" and "imaginary" is not very important, where they have no power and adults laugh at things the children don't understand, and where the world is full of wonder. And in that sense two children can understand each other even if they don't know each other's heroes, favorite ways to play, and so on and so forth. And adults likewise understand things that can normally be taken for granted among adults.

Before suggesting that Western Christianity (in other words, Catholic and Protestant Christianity) is best understood in continuity with the West, I would like to explain what I mean. There are a good many Catholics and Protestants who try to be critical towards Western culture, and who do not accept uncritically what is in vogue. I know several Western Christians who tried to live counterculturally and not accept sour things in Western culture; I was such a Western Christian myself. So is it fair to talk about the continuity between Western Christianity and the West?

There is a common Western tendency to criticize common Western tendencies. I've seen Christians eager to criticize Western tendencies. I've also seen liberals who were not Christian eagerly criticize common Western tendencies. For that matter, I don't remember ever hearing someone use the term "common Western tendency" in a flattering way, even though the West is home to many great cultural triumphs (as well as problems). Criticizing "Western tendencies" is a Western thing to do. Taking a dim view of the culture that raised you is a Western thing to do. Working to create a counterculture is a Western thing to do. The focus of this article is not to rebut the West but to explain the East and describe things Western Christians may not know to look for. The Orthodox classics do not try to be Christian by making unflattering remarks about "common Western tendencies." For reasons that I will elaborate, I know that there are countercultural Western Christians who strive to construct or reconstruct a Christian culture that is very different from the Western mainstream (I was such a countercultural Western Christian), and I still consider their continuities with the West to be significant. More on that later.

This article explores the suggestion that **Eastern (Orthodox) Christianity is best understood in continuity with the East, and Western (Catholic and Protestant) Christianity is best**

**understood in continuity with the West.** There are of course continuities between Eastern and Western Christianity. But they usually aren't the point where Western Christians do not understand Orthodox. There are important ways that a Western Christian understands an Eastern Christian and members of (other) Eastern religions don't. There are also important ways that members of (mostly) Eastern religions understand each other. **The purpose of this article is to explain things that the East naturally understands about Orthodoxy,** not to explain everything important about Orthodoxy. The understanding between Orthodox, Hindus, Muslims, Orthodox Jews, Buddhists, and many less well known religions is of this kind. And so is understanding within the West, but East and West are different as children and adults are different—not because one is more mature than the other (each can see the other as childish), but because there is a gulf. The understanding isn't a matter of how many details you know, or agreement on important matters. For that matter, it's not even a matter of civil disagreement. Understanding another religion is perfectly consistent with fighting religious wars. But there is a gulf that is rarely bridged, and I am trying to bring a spark of understanding of the gulf. I am trying to explain what is shared that Westerners, even Western Christians, need to have explained. And I will be looking at both East and West, at both worlds.

This article is partly Eastern and partly Western, and doesn't completely belong to either world. It's meant to give explanations a Westerner would recognize, while addressing important things that a Westerner might not think to ask about. I was raised an evangelical, and I am a relatively recent convert to Eastern Orthodoxy. This means that for better or worse I have a foot in both worlds. I hope to use this position to build a bridge.

## The Most Important Thing Is

"Article on understanding Orthodoxy" is a dread oxymoron, a red flag like the phrase "committee to revitalize," or for that matter a thick commentary on Ecclesiastes 6:11: "The more the words, the less the meaning, and how does that profit anyone?" (NIV)

Orthodoxy is something you understand by doing. If you want to learn to swim, you get in the water with someone who can show you how to swim. So the first thing an article on understanding Orthodoxy can say is that you can't understand Orthodoxy by reading an article on understanding Orthodoxy. You can understand it by visiting a parish and seeing how we worship, and maybe participating. A book can be a useful tour guide that can help you keep your eyes open for what to see at a historic site, but it cannot substitute for visiting the site yourself. The first thing to do is, if you know someone Orthodox, ask, "May I join you at church?" Orthodoxy is a live community, and the way to understand it is to interact with the community. If you don't have that live connection, you can [search online for a nearby parish \(and ignore the error message\) \(Outside the US\)](#). Some parishes (churches) are warmer than others. There are some parishes that unfortunately aren't welcoming. If a church doesn't have a sign out in front, that may be a warning. But there are many churches that are welcoming. And don't worry if everybody seems to be doing things that you don't understand. There is a great deal of freedom in Orthodoxy, and apart from receiving communion you should be welcome to do (or not do) anything people are doing. Sometimes you will see different members of the faithful doing different things, walking around, entering, leaving. This is because of the freedom in Orthodox worship and a grand tradition of not sticking your nose in what other people are doing. When I first visited my present parish, well before I became Orthodox, I was self-conscious about following what other people

were doing and sticking out. In the time that I've been Orthodox, I realized that there was no need to be self-conscious, and in fact no one cared that I wasn't acting like everyone else.

So make a note in your planner, or call a friend who's Orthodox. Decide exactly when you will make that contact, and do what you need to do to get that in your planner. Actually visiting the site is infinitely more valuable than reading a guidebook about it.

## Symbol and Nominalism

Before explaining what symbol is in the East, I would like to talk about what has happened in the West. Symbol in the West used to be close to what it was in the East—like two trees standing tall. Then something called *nominalism* came along, and cut down the Western tree, leaving a stump of a once great tree. Nominalism is a good part of what has defined the West.

Nominalism was one side in a Western medieval debate, and it was called the "modern way." The debate was whether categories of things were something real that existed before things and before our minds, or whether categories are things we construct after the fact. What people used to believe, and what the nominalists' opponents believed, was that a lot more things were real than the nominalists acknowledged. Their opponents looked at the structures we perceive and said, "It's out there," and the nominalists said "No, it only exists in your head." Nominalism was an axe for cutting down most of what people sensed about the world around us. In its extreme form nominalism says that brute fact is all that exists; if it's not a brute fact, it can only exist in people's heads. Some scholars will recognize that as a postmodern distinction; nominalism was something that flowered in modernism and bore fruit in postmodernism. At one stage, nominalism defined modernism and the Enlightenment, while at a later stage, people were more consistent and became postmodern.

Another thing that nominalism did was to cut apart the thing that represents and the thing that is represented in a symbol. **Nominalism is the disenchantment of the entire universe.** Nominalism is a disenchanting force that says, "If you can't touch it, it can only be in your head," and the place of symbol was changed from what it once was. Symbol wasn't the only casualty, but it was one of the casualties.

Imagine two very different surfaces, like the surface of the ground. The first surface, Orthodoxy, is rich in connections, layers, and colors. Imagine that the first surface is textured, like the surface of the earth, while there are not only buildings but great arcs connecting one part to another so that what is present in one place is present in another. A symbol is an arc of this kind, and symbol is not something externally added to reality; it is something basic to what reality is, so that the surface is in fact richer than just a surface and is as connected as a web. If there is something in you that responds to beauty in the surface, or to ways it has become ugly, that is because something inside you is resonating with something out there.

Now imagine another picture, of a surface that is flat and grey, where there is no real order, and any structures and connections you see are only ways of lumping things together inside your head. You can read things on to it; you can imagine structures in its randomness and pretend any two parts are linked; because it has no order, you can project any kind of structure or connection you want, even if this freedom means it is only your particular fantasy. If you find it to be drab and empty, that is a private emotional reaction that says nothing interesting about the drab and empty world, in particular not that it is failing to be in some way colorful like it "should" be. "Should" has no meaning beyond something about our private psychology.

If you imagine these two surfaces—one of them structured, many-layered, colorful, and possessing a veritable web of connecting arcs (symbols), and the other one having only a single grey layer and no connections—you have the difference between what Orthodoxy believes and where nominalism leads. Few people believe nominalism in a pure form; I don't even know if it is *possible* to believe nominalism in a few form. Nominalism is more a way of decaying than a fixed system of ideas. Part of what has shaped Western Christianity is the influence of nominalism as the disenchantment of the entire universe. Nominalism disenchantments the treasure of a world of spiritual resonance, where symbol and memory have a rich meaning, where a great many things are not private psychological phenomena but something that is attuned to the world as a whole, as much as a radio picks up music because someone is broadcasting the music it picks up.

What was before nominalism in the West, and what is the place of symbol in Orthodoxy now? Christ is a symbol of God, and he is a symbol

symbol in Orthodoxy now: Christ is a symbol of God, and he is a symbol in the fullest possible sense. How? Christ is not a miniature separate copy of God, which is what a symbol often is in the West. Christ is fully united with God: "I and the Father are One." God is fundamentally beyond our world; "No man can see God and live." But "in Christ the fullness of God lives in a body." And if you have seen Christ, you have seen the Father. Christ visibly expresses the Father's hidden reality.

The image of God, in which we were all created, does not mean that we are detached miniature copies of God. What it means is that we, in our inmost being, are fundamentally connected to God. It means that we were created to participate in God's reality, and that something of God lives in us. It means that every breath we breathe is the breath of God. It means that we are to reign as God's delegates, the moving wonders who manifest God in ruling his visible world.

As an aside, symbol is one important kind of connection that makes things really present, but it's not the only one. Memory is not understood as a psychological phenomenon inside the confines of a person's head; to remember something is to make something really present. "This do in remembrance of me" is not primarily about us having thoughts in our heads about Christ, just as saying "Please assemble this cabinet" is not primarily about us seeing and touching tools and cabinet pieces. Saying "Please assemble this cabinet" may include seeing and touching what needs to be assembled, but the focus is to bring about a fully assembled cabinet which not just something in our minds. When Christ said "This do in remembrance of me", he wasn't just talking about a psychological phenomenon, however much that may be necessary for remembering; he was telling us to make him really present and be open to his presence, and he isn't present "just" in our thinking any more than a working cabinet is "just" a set of sensations we had in the course of assembling it. And the idea of "This do in remembrance of me" goes hand in hand with Holy Communion being a symbol in the fullest possible sense: the bread and wine represent the body and blood of Christ. The bread and wine embodies the body and blood of Christ. The bread and wine *are* the body and blood of Christ. All of these are tied together.

Among these symbols, a reader may be surprised about one kind of symbol I haven't mentioned: the icon. Icons are something I tried to overlook to get to the good parts of Orthodoxy; it took a while for me to recognize how much icons *are* one of the good parts of Orthodoxy. Icons

are in fact key to understanding Orthodoxy.

When one bishop is giving a speech, sometimes he will hold up a picture, of a traffic intersection (or something else obviously secular), and then say, "In Greece, this is an icon. It's not a holy icon, but it's an icon."

Part of what icons are in the East is easier to understand in light of what happened to icons in the West, not only religious artwork but painting as a whole. What happens if you ask an art historian to tell the story of Western art after the Middle Ages, roughly from the Renaissance to the Neo-classicists?

The story that is usually told is a story of Western art growing from crude and inaccurate depictions to paintings that were almost like photographs. It is a story of progress and advancement.

Orthodoxy can see something else in the story. Western art became photorealistic, not because they progressed from something inferior, but because their understanding of symbol had disintegrated.

If a picture is real to you as a symbol, then you don't have to strive too hard to "accomplish" the picture, in the same sense that someone who has never gotten in trouble with alcohol doesn't have to make an unprovoked lecture on why he doesn't have a drinking problem. People who use alcohol responsibly rarely feel the need to prove that they don't have a drinking problem; it's someone who has a drinking problem who feels the need to make sure you know that his drinking is under control. People who don't have a problem don't feel the need to defend themselves, and artists and publics who haven't lost symbols don't feel a need to cram in photorealism. When Renaissance artists inaccurately portrayed the place of Christ's birth as having a grid of rectangular tiles, they were cramming in photorealism. It wasn't even that they thought they needed photorealism to make a legitimate picture. They went beyond that need to make the picture an opportunity to demonstrate photorealism, whether or not the photorealism really belonged there. From an Orthodox perspective the problem is not the historical inaccuracy of saying that Christ was born in a room with a tiled floor instead of a cave. The anachronism isn't that big of a deal. From an Orthodox perspective the problem is that, instead of making a symbol the way people do when they really believe in symbol, people were making pictures the way people do when the pictures are unreal to them as symbols. The artists went for broke and pushed the envelope on photorealism because the West had lost something much more important

photorealism because the West had lost something much more important than photorealism.

Good Orthodox icons don't even pretend to be photorealistic, but this is not simply because Orthodox iconography has failed to learn from Western perspective. As it turns out, Orthodox icons use a reverse perspective that is designed to include the viewer in the picture. Someone who has become a part of the tradition is drawn into the picture, and in that sense an icon is like a door, even if it's more common to call icons "windows of Heaven." But it's not helpful to simply say "Icons don't use Renaissance perspective, but reverse perspective that includes the viewer," because even if the reverse perspective is there, reverse perspective is simply not the point. There are some iconographers who are excellent artists, and artistry does matter, but the point of an icon is to have something more than artistry, as much as the point of visiting a friend is more than seeing the scenery along the way, even if the scenery is quite beautiful and adds to the pleasure of a visit. Cramming in photorealism is a way of making more involved excursions and dredging up more exotic or historic or whatever destinations that go well beyond a scenic route, after you have lost the ability to visit a friend. The Western claim is "Look at how much more extravagant and novel my trip are than driving along the same roads to see a friend!"—and the Orthodox response shows a different set of priorities: "Look how lonely you are now that you no longer visit friends!"

The point is that an icon, being a symbol, is connected to the person represented. It is probably not an accident that in the Reformation, the most iconoclastic people were those in whom the concept of symbol as spiritual connection had completely disintegrated. When I was a Protestant, the plainest sanctuaries I saw were the sanctuaries belonging to people who disbelieved in symbols as spiritual connections. If a symbol is not spiritually connected, then reverence to an icon is inappropriate reverence to a piece of wood; Orthodox believe that reverence to an icon passes through to the saint depicted in part because of the connection that is real to them.

There are other things to discuss about icons. Here I want to talk about them as symbols, and symbols in an Orthodox picture—the mental image I drew above that has a web of interconnections, has both spiritual and material layers, and is very different from the (almost empty) nominalist picture. A lot of people who try to understand icons are trying

to fit the Orthodox icon into the nominalist picture, or at least a picture where part of the Orthodox framework is replaced with something more nominalist. I want to return to icons later, after some comparisons.

## Compare and Contrast

How is Orthodoxy different from Western Christianity? I would like to answer, focusing on evangelical Christianity in my treatment of Western Christianity but referring to Catholicism. I don't believe evangelical Christianity is the only real version of Western Christianity, but it is the middle of the (Western) road. From an Orthodox perspective, "Catholic," "evangelical," and "mainline" (or, if you prefer an alternative to "mainline," you can say "oldline," or "sideline," or "flatline") represent three degrees of being Western, much as "rare," "medium," and "well done" denote three degrees of a steak being cooked. There are important differences, but there is also something that's the same. Catholicism is like a rare steak, is almost raw in some parts and almost well done in others. A Catholic may be almost Orthodox (certainly a Catholic is not discouraged from trying to be almost Orthodox), and there are a lot of Catholics who believe that Vatican II says that the Reformers were right about everything (or something pretty close to that).

Catholics tend to be sensitive to the differences to Catholic and Protestant (even if they choose not to pay enough attention to those differences). Yet it is common for Catholics to believe that Catholics and Orthodox only differ in the addition of "and the Son" to a creed. Saying that's the only difference between Catholicism and Orthodoxy is like saying that the difference between the Bible and the Quran is only that "Bible" was a French word for "book" and "Quran" is, with remarkable similarity, an Arabic word that can mean "book." Catholic priests will tell you that Catholics and Orthodox believe almost exactly the same thing, and this is because Catholics know how they are different from Protestants but don't know where their differences with Orthodox lie. The Reformation took a lot of trends in Catholicism and pushed them much further, but the problem isn't just that the Reformers pushed them

further. The problem is that the trends became a part of Catholicism in the first place. To Catholic readers who have been told that Catholicism is almost the same as Orthodoxy and the two should be joined together—I understand why you believe that and it is what one would expect the Catholic tradition to say. But to the Orthodox that is like saying that the Quran is of a piece with the Bible. You're looking in the wrong place for the differences between the Bible and the Quran when you try to reconcile them by pointing out that "Bible" and "Quran" both mean book in influential languages. Not only do the differences lie elsewhere, they are far, far deeper.

<b>Western Christianity</b>	<b>Orthodoxy</b>
<p>Sin is understood as essentially crime, and the remedy to sin provided by Christ is understood as being cleared for the guilt of a crime. Hence in <i>Pilgrim's Progress</i>, for instance, there are elaborations designed to convince you that your crimes (sins) are great, and that you cannot ever clear yourself of these crimes (sins), but Bunyan does not seem to even see the question of whether sin and the consequence of sin are like anything besides crime and criminal guilt.</p>	<p>Sin is understood as spiritual disease, and the remedy to sin provided by Christ is understood as healing. The Eucharist is "for the healing of soul and body," and as the Great Physician Christ is concerned for both spiritual disease and physical disease, and drawing people into the divine life that he gives.</p>
<p>The reformation created mass literacy so that everyone could read the Bible. As a culture, it is heavily oriented towards</p>	<p>If evangelicalism is essentially a written culture, then in keeping with the observation that the opposite of a "literate" culture is not "illiterate" but "oral," Orthodoxy has the attributes of an oral tradition. Many of its members can</p>

written text. Someone said after visiting an Orthodox Church that it was the only church he'd been to that didn't offer him printed material. At least for Protestant churches, a visitor is offered some kind of paper documents; there is a bulletin that is passed out; one of my friends had been a member of church where people said "No creed but Christ!" (which he was quick to point out, *is a creed*), and then asked him to sign a sixty page doctrinal statement.

read and write, but writing has different implications. It's the difference between a natural environment that includes some things people have created (a campsite) and a basically artificial environment (a laboratory). At the parish where I was accepted into the Orthodox Church, there was no literature rack and no stack of booklets for you to follow along the service. Even where those booklets are offered, incidentally, I prefer to participate without reading what is being said—I think it's not just economic reasons that the main historic way for Orthodox to follow along a service doesn't depend on reading.

Part of an oral tradition means things that are alive, things that are passed on that have a different basic character to what can be preserved in a text. This is present in Western Christianity, but it is more pronounced in Orthodoxy.

The written character of the culture is focused on Scripture. It is expected, especially among Evangelicals, that if your faith is strong, you will read Scripture privately.

Catholics and some Protestants do not believe Scripture has sole authority; Catholics assert the authority of Tradition alongside Scripture ("Scripture and Tradition"), and different Protestant groups have

Scripture is the crowning jewel of Tradition. Scripture is not something understood apart from Tradition; Scripture is something alive, something dynamically maintained by Tradition and something inspired not only in that the Spirit inspired ancient words but in that he speaks today to people who can listen to him. And Scripture is at its fullest, not read privately, but when proclaimed in Church.

One Orthodox priest tells people, "Reading Scripture privately is the second most spiritually dangerous thing you can do. All sorts of temptations will flare up,

different solutions to the problem of how to balance the authority of Scripture and tradition.

you'll be assailed by doubts, and the Devil will whisper into your ear all these heretical 'insights' about the text. It is an extraordinarily dangerous thing to do."

Some people are intimidated, wonder if they should really be reading the Bible privately, and ask timidly, "Well, I should reconsider reading the Bible privately. But one question. What's the *most* dangerous thing you can do spiritually?"

"Not reading the Bible privately."

There is a set of important questions, "What part of the person do we know with?" "What is knowledge?" "How can knowledge be built in another person?" Let me start with some secular answers:

*What part of the person do we know with?* We know with the mind, which is what is studied by the secular discipline of cognitive psychology. One big example is the part of us that reasons.

*What is knowledge?* Knowledge is having true mental representations that correspond to the world. It is the sort of thing we acquire from books.

*How can knowledge be built in another person?* Knowledge is built, to speak crudely, by opening the head

I'd like to answer the same basic questions as I outlined to the left:

*What part of the person do we know with?* At least in matters of faith, we know with something that could be called "spirit" or "mind," a part of us that is practical (the knowing we have when something becomes real to us). This part of the person thinks precisely because it is the center of where we meet God. It is the part of us we use to pray and worship. It is part of us that is connected with God and can *only* be understood with reference to God.

*What is knowledge?* Knowledge is when you participate in something, when you drink it in, when you relate to it. Someone's talked about the difference between knowing facts about your wife, and knowing your wife. The West uses the first kind of knowledge as the heart of its picture of knowledge. Orthodoxy uses the second.

It is normally vain for a person to say, "To know me is to love me." But there is another reason why someone might say that. To know something is to love it. To

and dumping something in. Now of course we need words/numbers/pictures to do this, but you teach by a classroom or a book.

Now this is a purification of something that is mixed in any Western Christian. It doesn't even represent postmoderns well; in fact, it describes something postmoderns are trying to get away from. But admitting all these things, there is an element of the above answers in how Western Christians understand knowledge. Many Western Christians do not purely believe these answers, but they do believe something mixed with them.

I'd like to look at one more specific kind of knowledge, theology. In the West, theology is an academic discipline, and used to be called the queen of the sciences. Theology is a system of ideas, much like philosophy and every other

that. To know anything is to love it. To know any person is to love that person because knowledge is connected to love.

*How can knowledge be built in another person?* Knowledge works from the outside in. The reason the first chapter after the introduction asked you to visit Orthodox worship is that that is how one comes to understand Orthodoxy. We don't believe in trying to open the head and dump in knowledge. You can't gain knowledge of Orthodoxy that way. You might be able to learn some of the garments surrounding Orthodoxy, but not the spirit itself. The point of asking you to visit Orthodox worship is that that's not something important that needs to be added to learning about Orthodoxy. It is learning about Orthodoxy.

By the way, the same kind of thing is true of evangelicalism, even if people are less aware of it. Evangelicalism can never be understood as a system of ideas. An evangelical might only be aware of the ideas to be known, but that can only happen if the participation-based knowledge of the evangelical walk, in other words the Orthodox kind of knowledge, is in place.

It took me a long time to make head or tail of my deacon's insistence, "Theology is not philosophy whose subject-matter is God," or of the ancient saying, "A theologian is one who prays and one who prays is a theologian." But that was because I was trying to fit them into my Western understanding of theology tightly tied to a philosophy

philosophy, and every other kind of theology is a branch of systematic theology.

... to a philosophy.

Theology is not the queen of sciences because it is not a science, and only with reservations can it be called an academic discipline. Calling theology an academic discipline is like calling karate an academic discipline (because you can take classes in both at college). Academic theology has a place, and in fact I intend to study academic theology, but the real heart of theology is not in the academy, but in the Church at prayer.

Theology is knowledge. More specifically, it is mystical or spiritual knowledge. It is knowing with the part of you that prays, and that is why Orthodox still say, "A theologian is one who prays and one who prays is a theologian." Theology is knowledge that participates in God, that eats and drinks Christ in Communion, *Communion*, that seeks a connection with God. And because Orthodox theology is Orthodox knowing, as described above, books can have value but can never contain theology.

In the West, some Christians regard Christianity as a system of ideas. Hence one Catholic author writes, "It is fatal to let people suppose that Christianity is only a mode of feeling; it is vitally necessary to insist that it is first and foremost a rational explanation of the universe." If this is not universal among Western Christians, it

Eastern Orthodox would agree that Christianity is not primarily a mode of feeling; indeed, Orthodox do not believe that feelings are the measure of worship. But we part company with the Catholic author quoted, in trying to fix this by placing a system of ideas where some place emotion.

Orthodoxy is a *way*, just as many Eastern religions are a way. It is a path one walks. A worldview is something you believe and through which you see things;

nonetheless represents one of the threads that keeps popping up.

those elements are present in a way, but a way is something you do. It is like a habit, or even better a skill, which you start at clumsily and with time you not only become better at, but it becomes more natural. But it is more than a skill. It is even more encompassing than a worldview; it is how you approach life. Part of the West says we must each forge our own way; Orthodoxy invites people into the way forged by Christ, but it very much sees the importance of walking in a way.

The West tends to treat society as to a raw material, a despicable raw material, which will begin to have goodness if one puts goodness into it, transforming it according to one's enlightened vision.

This undergirds not only liberalism but most criticism of "common Western tendencies", and in particular most Christian attempts at counterculture. This attitude behind counterculture is not only that the Fall has impacted one's culture, but that there is nothing really good or authoritative about culture unless one puts it in.

Counterculture tends to be seen as essentially good.

In the East, as in the medieval and ancient West, the assumed relationship between a man and his culture is like the relationship between a man and his mother. It is a relationship which respects authority, femininity, and kinship.

This is not to say that one's culture cannot be wrong. What it is to say is that there is a world of difference between saying, "Mother, you are wrong," and "You are not my mother! You are nothing but a despicable raw material which it is my position to put something good in by transforming it according to my ideas." There can in fact be counterculture, but it is not counterculture according to the example of the Renaissance magus, the Enlightenment (or contemporary liberal) social engineer, or the postmodern deconstructionist. It is rather like the wild offshoot into Christ's body the Church, who regards his mother the Church, and patristic culture, as more authoritative than the culture he was born in.

Counterculture can be seen as a  
necessary evil.

## **What the Incarnation Means**

In the West, doctrines have worked like elements in a philosophical system, while in the East, the focus is on what doctrines mean for us. There is a difference of focus, more than ideas contained, in the doctrine of the Trinity. The Western emphasis has been on philosophical clarity in describing the Father, Son, and Holy Spirit. The Eastern emphasis has been on what the persons of the Trinity mean for us and how we relate to them.

The Church didn't even spell out a philosophical analysis of the Trinity until almost three centuries had passed and a heresy contradicted what they had always known. The Church had always known that the Son and the Holy Spirit were just as divine as the Father, and it taught people to appropriately relate to the Father, Son, and Holy Spirit before it spelled out why people should relate that way.

The Incarnation, God becoming human, is recognized by all Christians who have their heads screwed on straight (and quite a few who don't). But in the East, believing in the Incarnation isn't just an idea that we agree with (although that is important). It is something that in practice determines the shape of a great many things in our spiritual walk. It is something that has great practical relevance. I would like to explain some of what the Incarnation means in the East, and that means explaining how the Incarnation gives shape to our spiritual walk.

There has been a saying rumbling down through the ages. The Son of God became a man that men might become the Sons of God (Protestant). The divine became man so that man might become divine (Catholic). God and the Son of God became man and the Son of Man that men might become gods and the sons of God. This teaching has mostly fallen away in Protestantism, even if Luther and Calvin believed it, and it is one puzzle piece among others in Catholicism. To the Orthodox it is foundational.

The whole purpose of Christ becoming man, and our becoming Christian, is to become like Christ. Furthermore, becoming like Christ does not simply mean becoming like Jesus the morally good and religious man without reference to Christ's divinity. We don't split Christ like that. If God wants to make us like Christ, he wants to make us like Christ who is fully God and fully human, and that means that we "share in the divine nature" (as spelled out in II Pet 1:4). It means that if we read Paul talking about the Son of God as meaning divinity, then when Paul talks about us as sons of God he is saying something in the same vein. There are caveats the Orthodox believe that help balance the picture—in particular, we can be made divine by grace, but only God can be divine by nature, ever. We cannot make others divine. God has his essence which is beyond knowing and his energies which reach out to us, but we can never reach beyond his manifest energies to see his essence. Catholics believe in a "beatific vision" that in Heaven we will see God as he truly is. Orthodox call that heresy. God can reach out to us and we can meet him when he reaches out, but it is radically, utterly, and absolutely impossible for us to ever know God as he truly is. Neither our being divine by grace nor our glorification in Heaven can ever overcome God's absolute transcendence. The Orthodox liturgy and prayers not only take account of sin; they spend more time bringing sin we need to repent of before God, than our being made like Christ. With all these caveats, the basic picture means that the Incarnation is not a one-time unnatural exception, something which runs against the grain of how God operates, or something totally unlike what can happen with us. The Incarnation is a peerless model that established the pattern of what it means to be Christian. Christ as the example of who a Christian should be is the only human who was fully divine, and even the only one to be fully human, but the Christian walk was meant to be, *and is*, a symbol that both represents and embodies what happened in the Incarnation. Christ is really incarnate in every member of the Church, and the Incarnation is not an anti-natural exception, but the pattern for being Christian. The purpose of being Christian is what Orthodox call "theosis," or "divinization," or "deification."

Part of understanding that Christ became human, and in fact became flesh, requires an understanding of how spirit and matter relate. DesCartes is one of the more Western philosophers. Part of his contribution was a lot of thinking about the famous problem of the "ghost in the machine." The problem of the "ghost in the machine" is the

in the machine. The problem of the "ghost in the machine" is the problem of how our minds can interact with our bodies, once you put mind and body in watertight compartments and assume that they shouldn't be able to interact. It's possible to be Western and disagree with DesCartes—but the main Western starting point is that mind and body are things one would expect to be separate.

In the East we don't have trouble with the "ghost in the machine" problem because we don't treat matter and spirit as things that are cut off from each other. We believe that matter and spirit are tightly bound together. It doesn't seem strange to us that our minds can move our bodies—it's a wonder, as all of God's works are wonders, but it's not something illogical.

This understanding means that the Incarnation doesn't just mean that Christ had a body; it means that Christ was connected to his body on the most intimate level. What the Incarnation means for us isn't just that Christ's body, and our bodies, are somehow part of the picture. It means that our bodies are an *inescapable* part of the picture, and they are very relevant to our spirits.

If you visit Orthodox worship, you may wonder why people stand, cross themselves, bow, kiss icons, and so on and so forth—in short, why their bodies are so active. The answer is that since our spirits and bodies are tied together in the whole person, worship includes the whole person. We don't just park our bodies while our spirits get on with worship. We might do that if we thought that our minds and bodies were separate, but we don't. We believe that Christ's incarnation is a matter of the Son of God, and the man's spirit, mind, soul, *and body* making one being, Christ, who was as united as possible. And that means that worship at Church and the broader spiritual walk both involve the whole person.

This integrated view of spirit and matter, and of the Incarnation, helps create the space for icons. I found icons strange at first, largely because as a Western Christian I had no place for icons that was appropriate. Believing that physical matter can have spiritual properties, that an icon can embody a real presence, all seems strange to someone shaped by nominalism and a rigid separation of spirit and matter. But I am learning to appreciate that to an Orthodox, to say that Christ had a body and to say that matter and spirit are tied together paves the way to recognizing that icons are a gift from God. They mean that matter is not cut off from spirit when it comes to our bodies, and they mean that matter is not cut off

from spirit in places where we worship. Icons are another part of the incarnate faith of the Orthodox Church, and if you disagree with them, please understand that they are part of the understanding of how the Incarnation tells us practically how the Father wants us to worship him.

When I was a Protestant, the songs I heard in Church were about spiritual themes, and more specifically they are about themes in the Bible that seem spiritual and theological given a watertight idea of spirit. As contrasted to the Psalms, there was almost none of the imagery of the natural world. Orthodox liturgy, which contains a lot of teaching, sweeps across the both material and spiritual creation. One hymn praises Mary, the mother of our Lord, as "the volume [book] on which the Word [Christ] was inscribed," and "the ewe that bore the Lamb of God." The frequent physical and nature imagery that seamlessly praises God and rejoices in his whole creation is what being spiritual looks like when spirit is recognized as so deeply connected with the material dimension to our Lord's creation.

Like other Eastern religions, Orthodoxy has a supportive framework of formal and informal prayer, fasting from foods, ritual worship, hesychasm (stillness) and other aspects of spiritual discipline (which some Orthodox call "asceticism"). These are not "rules," but they do provide a concrete structure to help people. Partly because Orthodoxy assumes the relevance of matter to being spiritual, Orthodoxy doesn't just say "Go, be spiritual," without giving further direction as it doesn't just say "Park your bodies so your spirits can worship." The structure provided for spiritual discipline is shaped by the Incarnation, and not only because it addresses the whole person. The spiritual discipline is not very different from other Eastern religions, but the meaning of that spiritual discipline is very different. In Hinduism and Buddhism, asceticism is something you do for yourself, and other people often aren't part of the picture. When the Buddha decided to turn back and share his discovery with others, he was choosing a second best—according to Buddhism, the best thing would have been to enter complete release (salvation) instead of compromising his own benefit to share his discovery with others. Being good to other people, in Buddhism and in Hinduism tends to be like a boat you use to cross a river: once you have crossed the river, you don't need the boat any more.

What about Orthodoxy? One Orthodox saying is, "We are saved in community. We are condemned all by ourselves." Another Orthodox

community. we are condemned all by ourselves. Another Orthodox saying puts it even more strongly: "We can't be saved. The Church is saved, and we can be in it." Orthodox spiritual discipline is not something that makes ethics unnecessary. The whole point of spiritual discipline is ethical. If I pursue asceticism, the goal isn't for me to be saved all by myself; it is impossible for me to be saved all by myself, just like it's impossible for me to have a good friendship all by myself. The goal of asceticism is for the Orthodox to love God and his neighbor, and if someone fails to recognize this, this is a problem. Spiritual discipline is Incarnational because, as much as the Incarnation was an act of love for others, spiritual discipline is oriented to loving with Christ's own love.

In the West, people see salvation as accomplished through Christ's cross; in Orthodoxy, we believe that Christ's whole time on earth, including the cross, saves us. "Incarnation" means not only the moment when the Son of God became a man, but his baptism, ministry, cross, tomb, and resurrection. And thus the Incarnation I have discussed above is not simply the moment when the Son of God became a man, but Christ's whole coming that saves us.

## *Ella Enchanted*

The movie *Ella Enchanted* has beautiful fantasy-themed computer graphics. Ella, the daughter of a nobleman, lives in a lovely Gothic-looking house in the middle of a suburban yard, goes down a lovely rustic-looking wooden escalator complete with a rustic-looking peasant turning a manual cogwheel, and is surrounded by stained glass windows and other medieval-looking trappings when she goes to her coed community college and gets into a debate about government policy and racial exploitation. One of the characters is an elf who wants to break out of the stereotype and be a lawyer instead of an entertainer (which is prohibited by law), and one of the nice things that happens at the happy ending is that the elf and a giantess fall in love with each other.

This movie is not just historically inaccurate; it is historically irrelevant, and it wears its historical irrelevancy with flamboyance. Everything you see has a medieval theme. The lovely Gothic-looking architecture, the richly colored medieval-looking clothing, and the swords and armor all tried to communicate the medieval. And it would be horribly unfair to treat the film as a botched version of historical accuracy, because it simply wasn't playing that game. However much things had been made to look "medieval," to someone who didn't understand the Middle Ages, it wasn't even *pretending* to faithfully represent that era. It was using the medieval as a projection screen as a whimsical place to address today's concerns. That was its real job.

That basic phenomenon affects a lot of how the West tries to understand the East, even when it is trying to faithfully represent it. In *Ella Enchanted* it is intentional, and the effect must be seen to be believed. (But then, that may be too high of a price to pay—as has been said about another movie.) I was appalled when I visited Victor Hugo's house, heard about Victor Hugo's fashionable interest in the Orient, and

saw an Oriental-themed wooden painting of Chinese acrobats using their bodies to make a V and an H for "Victor Hugo." China has produced acrobats, and Chinese acrobats are presumably capable of making those shapes with their bodies. But is this China, even allowing for cultural translation errors?

One major thread in most cultures outside the West is a tendency to exalt the whole of society and de-emphasize the individual person; indeed, people are seen without the Western concept of an "individual." Individualism is historically anomalous, and having acrobats shape their bodies to the greater glory of Victor Hugo would be about as out of place in Chinese culture as a large pro-censorship demonstration would be at an American university. Here and in other places, the "East" is not really the East, even an imperfectly understood East, but a projection screen for use by the West. *Ella Enchanted* was tongue-in-cheek and knew what was going on, where this was serious (and didn't know what was going on), but they were both using exotic places as a projection screen rather than something understood in itself.

New Age quotes the East, as well as "anything but the modern West," and it has its various attempts to create an alternative to traditional society. The East is over-represented in terms of spiritual practices and ideas, but I suggest that the same thing is going on here as *Ella Enchanted* or the supposedly Chinese acrobats celebrating the greater glory of Victor Hugo. In other words, we have a projection screen (in this case, non-Western) being used to project a thoroughly Western approach to life. The forces displayed are much an exaggeration of things that are accepted in Protestant Christianity.

What is the Western element that is found in New Age?

In the West, heresy is understood as condemned ideas. But the word "heresy" comes from a Greek word meaning "choice," and in the East heresy is making a private choice apart from the Orthodox Church. This can mean rejecting Church teaching, or splitting off from the Church, but the core of heresy is not the destructively false idea but the private choice. (This already has implications for the American definition of religion as a private choice.)

New Age is Gnostic, but there is something interesting in how it departs from ancient Gnosticism. Ancient Gnosticism was not a single, unified movement, but a broad collection of related but quite different movements with conflicting ideas. In this sense it was like New Age, and

movements with conflicting ideas. In this sense it was like New Age, and for that matter there is a certain *deja vu* between New Age and ancient Gnosticism. What's interesting is how New Age is unlike Gnosticism.

Gnostics had a lot of different ideas that conflicted not only with Orthodox Christianity but with each other. *And they argued.* Gnostics argued with other Gnostics and with Christians. Agreeing to disagree was as foreign to the Gnostics as it was to the Orthodox Christians. Saying "That's true for you, but this is true for me" or "That's your choice but this is my choice" would be as strange in classical Gnosticism as an escalator would have been in the Middle Ages.

New Age is a choice, and it is even more of a choice than in Gnosticism in its classical forms. Yes, the ideas are often Gnostic. Yes, New Age gives many of its members permission to indulge in magical, sexual, pride-related, and other sins, almost the same list as what ancient Gnosticism gave its members license for. But the essence of New Age is about a *choice*, the kind of choice that undergirds heresy. You choose (within certain broad parameters) what you will believe, what your spiritual practices will be, and so on and so forth, and the religion you practice is the sum of the private choices you make.

Where does this idea of religion as defined by private choice come from? One gets the impression from the New Age that it is the wisdom of the East to recognize that all religions say the same thing, and that a sort of Western style inquisition wouldn't happen. And that is true. *Kind of.*

In English, poetic license is a legitimate aspect of the language. And there isn't any central authority to approve instances of poetic license, nor can a poet be expelled from the English Speaker's Guild for abusing the language. But if one simply tears up the English language, it loses its coherence as English. And so there is poetic license in English, but that doesn't mean that anything goes. And in Hinduism, for instance, there is no centralized authority and no systematic purge of heretics, but that doesn't mean that a Hindu (or Buddhist, etc.) approves of religion being approached as a salad bar. Leaders in many Eastern religions may say that all religions are equivalent, and Japanese are often both Buddhist and Shinto, but most Eastern religious leaders would rather have you be coherently Christian, or Taoist, or Buddhist, or Hindu, or Jain, than simultaneously try to mix being Christian, *and* Taoist, *and* Buddhist, *and* Jain. That kind of incoherence is not very Eastern in spirit, nor is the idea of creating your own religion particularly Eastern.

What does Orthodoxy say? It matters whether or not you are Christian, and it matters whether or not you are Orthodox. But there is a saying that we can tell where the Church is, but not where it isn't. There is real truth in all religions, and if the Orthodox Church claims to be the fullness of Christ's Church, she would never claim that Christ's Church is limited to her walls. And her rules mean something different from in the West; instead of meaning "You must or must not do \_\_\_\_\_," they are resources that your spiritual father can use in addressing the specifics of your situation. In Orthodoxy your spiritual father helps decide what you are going to observe instead of you making the decision on your own, but the rules are more guidelines that your spiritual father can use in meeting the specifics of your situation, than rules in the Western sense. "Oikonomia" is an official recognition that your priest can work with you to figure out how Orthodoxy plays out in your situation.

Which brings me to the Reformation. Martin Luther did something original, but it was not the substance of his criticisms. Almost everything he had said was said earlier by someone else; there were things a lot like the Reformation floating around. Nor would Luther claim to have originated his criticisms much more than a baseball coach telling a boy to "Keep your eye on the ball" would claim to be the first one to give that advice. Luther didn't get his historic position solely by copying other people, but if you seek new criticisms from him, you're barking up the wrong tree.

Did Martin Luther contribute anything new? His criticisms had generally been circulating in the Catholic Church. An Orthodox might say that the Catholic Church had drifted from its Orthodox roots even further since 1054, when the Catholic Church broke off from the Orthodox Church. An Orthodox might interpret the general malaise in the Catholic Church as a malaise precisely because it had drifted from its Orthodox roots, and that the Orthodox Church agrees with the vast majority of Luther's criticisms (as for that matter the Catholic Church has—it acted on many of Luther's criticisms). Then what was new about Luther? Is Luther famous for an obscure reason?

Unless I am convinced by Scripture and plain reason—I do not accept the authority of Popes and councils, for they have contradicted each other—my conscience is captive to the Word of God. I cannot and will not recant anything for to go against

God. I cannot and will not recant anything, for to go against conscience is neither right nor safe.

After Luther said this, he split the Church. This is a rousing statement, and it is a rousing statement that contains the heart of heresy. A heretic is not so much someone who has a wrong idea, but someone who has a wrong idea *and is willing to split the Church over it*. Luther's distinctive and historic contribution was not levelling particular criticisms against the Catholic Church, but *choosing* to split the Church rather than go against his conscience, and his understanding of Scripture and plain reason. This choice is at the very heart of heresy.

Luther was a monumental figure, a great hero and a great villain rolled into one. His courage was monumental; so was his anti-semitism. And Luther was a prime example of a heretic. He was a heretic not so much by the points which he had wrong, which are relatively unimportant, but because he defined the Reformation with his precedent of splitting the Church.

So Luther worked to establish the re-established ancient Christian Church, and I am not particularly concerned here with the ways the re-established ancient Christian Church served as a projection screen for ideas that were in vogue at the time. (Somehow, when people re-establish ancient glory, their work ends up with a large dose of ideas that are in vogue with their creators. It happens again and again, and I think it has to do with how the ancient glory serves as a projection screen, much like New Age.) That tendency aside, Luther and the Catholic Church treated each other as heretics for a very good reason. It wasn't that they weren't ecumenical enough, or that they needed to be more tolerant, or that they needed to be told they were all Christians and Christianity is Christianity. The reason was something else. I can lament the blood that was shed, but there was a very healthy reason why people went that far against their opponents.

The Catholic Church, along with Luther, and for that matter along with the Orthodox, recognized that there is one Church, bound together in a full communion that cannot exist without agreement in doctrinal matters. Luther's reconstituted Church and the Catholic Church differed in doctrine and could not have this common basis. If you have two different groups which differ in doctrine, at least one of them is not the true Church. This is for the same reason that if one person says that an

airplane is in Canada and another person says the same airplane is in Mexico, at least one of them has to be wrong. They could both be wrong; nothing rules that out. Luther and the Catholic Church might neither be the true Church. But if there are two conflicting organizations competing to be called the true Church, at least one of them has to be wrong, just as an airplane cannot simultaneously be in Canada and in Mexico. Luther and the Catholic Church both recognized this.

What one might have expected, if Luther were simply re-establishing what the Christian Church was in ancient times, was that there would be one and only reformer's Church. When Luther couldn't agree with other reformers, they split off from each other, each saying, "We're the true Church!" "No, we're the true Church!" It wasn't long until there were seventy or so different groups, and the claim, "We're the true Church" could no longer be taken seriously. In retrospect, Luther's saying "I do not accept the authority of Popes and councils, for they have contradicted each other," and then moving to Protestant churches was a move out of the frying pan and into the fire. Perhaps Luther could not have foreseen this unintended consequence, but the disagreements and divisions in Luther's wake made the disagreements of Popes and councils pale in comparison.

At that point, the reformers reconsidered what was going on, but they chose to consider the Church structure generated by the Reformation as valid. There was an unwritten rule: "Whatever you say about churches, it has to approve of what's happened with the Reformation splintering into many groups that could not be in communion with each other, no matter what Christians have believed about Church since the days of the Apostles themselves."

The solution they invented included the concept of a "denomination". The idea was that these different groups were not competitors for the title of "true Church;" instead, they were simply names for parts of the true Church. The true Church was not a unified organism complete with authority as it had been understood from the days of the apostles; it was something invisible and quite independent of formal structures. It's kind of like there had been a supercomputer club whose charter said that they would have one supercomputer, but they couldn't agree on which computer was the most appropriate supercomputer, so they violated the club charter by each buying his own computer, and to be able to say they

had one computer like the charter said, hooked the computers up and said that the real club supercomputer was something invisible, a sort of virtual computer, that was emulated over the club network—and then said that this is what the original charter *really* called for. This is *not* because the reformers read the Bible and this was the best picture they could come up with of what the Church should be. It was much closer to an answer to the question of "How can we re-imagine Church so it won't look like the Bible condemns the church structures which the Reformation can't escape?"

Today we have:

- All denominations point to the same Christian truth.
- It doesn't matter which denomination you're part of, as long as you have faith.
- It doesn't matter much whether you stick to one denomination's prayers, doctrines, and so on and so forth, or for that matter whether you consider yourself a member of one denomination at all.
- We should pursue the goal of uniting all the different denominations.

But let me change barely more than one term:

- All religions point to the same truth.
- It doesn't matter which religion you're part of, as long as you have faith.
- It doesn't matter much whether you stick to one religion's prayers, doctrines, and so on and so forth, or for that matter whether you consider yourself a member of one religion at all.
- We should pursue the goal of uniting all the different religions.

Sound familiar? It should. It's New Age. It's the foundation to the New Age movement that all the exotic Asian decor rests on, and it is more Western than most of the West. Or at least there's an uncanny resemblance between Protestantism and something most Protestants wouldn't want to be associated with. (Or at least evangelicals wouldn't want to be associated with New Age. With mainline, er, oldline, er, sideline, er, flatline Protestantism, the line between "Protestant" and "New Age" is often crystal clear, but at other times can be maddeningly difficult to tell the difference.) Beyond all New Age's Eastern trappings,

the heart of the New Age is a non-Christian twist on a very Western way of thinking about religious community. That way of thinking is the Protestant understanding of Church.

Why am I making such a disturbing and perhaps offensive connection? Do I believe Protestantism is as bad as New Age? Absolutely not; I think there's a world of difference. The answer has to do with something else, something about Orthodoxy that seems strange to many Protestants. What is this something else?

Jesus, in the great prayer recorded before his execution, prayed fervently that all his disciples may be one, and Paul made incendiary remarks whenever he discussed people having different denominations. So it is important for all Christians to be united, and that goes for Orthodox. So why do Orthodox refuse to attend non-Orthodox worship and especially to take non-Orthodox communion? Why do we exclude non-Orthodox from our own communion cups? So why don't Orthodox recognize that we are just one more denomination, even if we are a very old denomination? Why are there so few Orthodox at ecumenical gatherings?

Something has to give, and Protestants often try to figure out whether the observations about Orthodoxy are what gives, or whether Orthodox really being Christians gives. Which one gives? *Neither*. Neither the practices that seem so strange to Protestant ecumenism, nor the imperative to Christian unity, give. What give are the Protestant assumptions about what makes Church, that determines what Protestants see as real ecumenism.

I've written a long and subtle discussion about *Ella Enchanted*, New Age, and other things because I wanted to get to this point. New Age may do all sorts of things to get an impression of being Eastern, and it may be chock full of exotic decor. But underneath that decor is something very Western. It is a modified form of Protestant teachings about Church. The similarity between:

- All denominations point to the same Christian truth.
- It doesn't matter which denomination you're part of, as long as you have faith.
- It doesn't matter much whether you stick to one denomination's prayers, doctrines, and so on and so forth, or for that matter whether

you consider yourself a member of one denomination at all.

- We should pursue the goal of uniting all the different denominations.

and:

- All religions point to the same truth.
- It doesn't matter which religion you're part of, as long as you have faith.
- It doesn't matter much whether you stick to one religion's prayers, doctrines, and so on and so forth, or for that matter whether you consider yourself a member of one religion at all.
- We should pursue the goal of uniting all the different religions.

is a disturbing similarity. And most evangelicals wouldn't touch the second list of statements with a ten foot pole. Yet it is connected to the first statement. The first set of statements isn't what the Bible says. It isn't what Christians have believed from ancient times. Its job was to give a rubber stamp to the sort of churches the Reformation created, and serve as a substitute for what the Orthodox believe about Church. And, with modifications, that way of thinking about Church has been perfectly happy to abandon Christianity and help give us the New Age movement.

My purpose isn't to get you to reject Protestant assumptions about church. But it is my purpose to help you see that they are assumptions, and that Orthodox have worshipped God for two millenia with a quite different set of assumptions. If you can see your own objection to New Age treating all religions as interchangeable, you may be able to see the Orthodox objection to treating all denominations as interchangeable, even if it's on a smaller scale. And to show why Orthodox do not simply see the Protestant style of ecumenism as necessary to a full and robust obedience to the commandment to Christian unity.

## The Focus

In Chinese translations of the Bible, the main rendering of Logos (Word in the prologue to John) is Tao, a concept in both Taoism and Confucianism which is important to Chinese thought and includes the Eastern concept of a Way. In Chinese translations, the prologue opens, "In the beginning was the Tao, and the Tao was with God, and the Tao was God." Is this appropriate?

"Tao" translates "Logos" better than any word that is common in English, and the real question is not whether it is appropriate for the Chinese to render "Logos" with their "Tao," but whether it is appropriate for us to render "Logos" with our much less potent "Word," which is kind of like undertranslating "breathtaking" as "not bad."

Is it OK to mix Christianity and Taoism? There are important incompatibilities but my reading the classic Taoist *Tao Te Ching* put me in a much better position to understand Christ the Logos and the Christian Way than I would have otherwise had. God has not left himself without a witness, and Taoism resonates with Orthodoxy.

In fact, there are quite a lot of things that resonate with Orthodoxy; it would be difficult to think of two religions, or philosophies, or movements, that have absolutely no contact. It may be easy to forget this in the West; one of the Western mind's special strength is to analyze things by looking into their differences. This is a powerful ability. But it is not the only basic insight. Essentially any two grapplings with human and spiritual realities (religions/philosophies/movements) will have points of contact. It isn't just Taoism that resonates with Orthodoxy. Hinduism is deep and has a deep resonance with Orthodoxy. The fact that I have not said more about Hinduism is only because I don't know it very well, but I know that it is deep. Catholicism resonates with Orthodoxy even more than Western Christianity as a whole. Platonism resonates with

Orthodoxy, and the Church Fathers learned from their day's Platonism, however much they tried to avoid uncritically accepting Platonism. For that matter, Gnosticism resonates with Orthodoxy. But isn't Gnosticism a heresy? Yes, and it couldn't have a heresy's sting unless it resonated with Orthodoxy. Part of a heresy's *job description* is to be confusingly similar to Orthodoxy. Postmodernism resonates with Orthodoxy. I wouldn't be surprised if some scholar has said, "Orthodoxy is postmodernism done right."

It should not come as a surprise that feminism resonates with Orthodoxy, evangelicalism, and the Bible. Jesus broke social rules in every recorded encounter with women in the Gospels. And "In Christ there is no Jew nor Greek, slave nor free, male nor female" is profound, and cannot be separated from the rest of the Gospel message. Looking at a historical context and a cultural context where feminism is floating around, where some form of feminism is the air people breathe—in other words, not the Early Church's context, but *our own* historical and cultural context (yes, we have one too!), it should come as no surprise that people see the Gospel as moving towards what we now call feminism, a moderate feminism of course, and so people work to develop a Biblical egalitarianism that will coax out the woman-friendly vision the Gospel is reaching towards, and correct certain abuses and misunderstandings of the Bible in its cultural context.

This should not come as a surprise. What I had originally thought to write is as follows: It is entirely understandable to try to adjust Christianity with a moderate feminism and try to help Christianity move in the direction it seems to have been moving towards, from the very beginning, but even if it is understandable it is not entirely correct. It is not entirely incorrect but it is not entirely correct either.

Christ's robe is a seamless robe that may not be torn. So is the Gospel. The same God inspired "In Christ there is neither Jew nor Greek, slave nor free, male nor female," and equally inspired, "Wives, submit to your husbands... Husbands, love your wives even as Christ loved the Church and gave himself up for her." *The same God who inspired one inspired the other*, and if your interpretation doesn't have room for both, it is your interpretation that needs to be adjusted, not God's revelation.

But what about cultural context? That question comes up a lot. And let me share some of what I found in my studies. I set out to do a thesis on how to tell when a book which treats a Bible passage's cultural context is

HOW TO TELL WHEN A BOOK WHICH TREATS A BIBLE PASSAGE'S CULTURAL CONTEXT IS misusing the context to neutralize a pesky passage that says something the scholar doesn't like. The first time I heard that someone had made an in-depth study of a pesky passage's cultural context and it turned out that the pesky passage meant something very different from what it appeared to mean, I believed it. I fell hook, line, and sinker. But after a while, I began to grow suspicious. It seemed that "taking the cultural context into consideration" turned out to mean "the pesky passage isn't a problem" again and again. And I began to study. That seemed to happen with every egalitarian treatment of one particular important passage—not only that I could find, but that my thesis advisor could find, and my advisor was a respected egalitarian scholar who spoke at a Christians for Biblical Equality conference! There were a lot of things I found about using cultural context, and my advisor liked my thesis. But in the end, there is a simple answer to, "How can you tell, if a book studies a pesky passage's cultural context in depth and concludes that the passage doesn't mean anything for us that would interfere with what the scholar believes, if the book is misusing cultural context to neutralize the passage?" The answer is, "There will be ink on its pages."

"In Christ there is no male nor female" is true, and it is for very good reason that that resonates with feminists. What a Biblical Egalitarian or feminist may not realize is that there is also a truth which feminism does not especially sensitize people to. "God created man in his image" is tightly connected with "Male and female he created them." There is unity in Christ, and we are called to transcend ourselves, including being male and female. But when God invites us to transcend our creaturely state, that doesn't annihilate our creaturely state; it fulfills us—just as God's promise that our bodies which are sown in decay and weakness will be raised in power and glory. Christ's promise of a transformed resurrection body does not take away our bodies; it means that our bodies will be glorified with a depth we cannot imagine. Christ's establishment of a Church that transcends male and female does not mean that being male and female is now unimportant, but that God uses them in his Kingdom that is being built here on earth. Men and women are meant to be different, in a way that you're going to miss if you're trying to see who is greater than who else. Paul writes, "There are Heavenly bodies and there are earthly bodies; but the glory of the Heavenly is one, and the glory of the earthly is another. There is one glory of the sun, and another glory of

the moon, and another glory of the stars, and star differs from star in glory" (I Cor 15:40-41). If star differs from star in glory, so do women differ from men in glory. Men and women are different as colors are different, or as a blazing fire is different from a deep and shimmering pool. This is truth, and if you take the feminist truth alone and not the other side of the truth, you flatten out something that is best not to flatten out—and it makes a bigger difference than many people realize.

That's what I would have written earlier. What I would have focused on now is different. It seems that when people return to past glory, or *try* to return to past glory, the past resonates with what's in vogue, and we don't pick up on things people knew then that we aren't sensitive to now, or even worse we pick up on them but neutralize them. ("Man will occasionally stumble over the truth, but most of the time he will pick himself up and continue on.") We unwittingly make the past a projection screen for what is sensible to us—which often means what's in vogue. The Renaissance called for a return to past glory and ended up being an unprecedented break from the past. The same thing happened with the neo-classicist Enlightenment. And something like this happened with the Reformation. When you sever yourself from tradition to get to the past, you're cutting open a goose to get all the golden eggs.

Part of being Protestant, whether it is evangelical, or the more liberal *Prayers of the Cosmos: Meditations on the Aramaic Words of Christ* (note the effort to reach further back than even the Greek New Testament), or deconstruction to get to what a text really meant (so that the text agrees with deconstructionist revisions to morality)—part of all of this is the idea that you dig past the tradition's obstacles and barnacles to unearth the Bible's meaning, perhaps a meaning that is hidden from the common multitude who blindly accept tradition. The idea that tradition is a connection to the past seems to be obscured, and sometimes the result seems to be digging a hole with no bottom. There's no limit to how much tradition you can dig past in an attempt to reach the unvarnished text. And this phenomenon is foundational to Protestantism. There are things that distinguish evangelicals from liberal Protestants, but not the effort to liberate the text's original meaning. In that sense Biblical egalitarianism is a member in good standing of Protestant positions—not the only one, but one member in good standing. And if past glory has functioned as an ambiguous projection screen, this may mean that Biblical egalitarianism

has problems. But it doesn't mean that Biblical egalitarianism is a different sort of thing from Protestantism. It may be an example of how a Protestant movement can misunderstand the Gospel.

Attempts to recover past glory **can** be for the better. One group of evangelicals, originally in a parachurch organization, came to realize that "parachurch" wasn't part of how Early Christians operated. There was no parachurch, only Church. So, assuming that the ancient Church disappeared, they agreed to research the ancient Church and each century's developments and follow them if they were appropriate, and founded the Evangelical Orthodox Church. They went some distance into this process before they ran into a Russian Orthodox priest, and they (the real Church) were examining the outsider, or so they thought... and they found that Orthodoxy preserved the ancient teaching about the Lord's body and blood, and about Church structure, and... things were suddenly upside-down. The ancient Christian Church had not dried up. It was alive and well; they had simply overlooked it when they tried to re-create the ancient Church. It was *they* who were the outsiders. And they realized they needed to be received into the Orthodox Church.

My parish was Evangelical Orthodox before it became part of the Orthodox communion, which I think is special. So Evangelical Orthodoxy turned out all right. Why then would Biblical egalitarianism have gone wrong? That's not the puzzle. The puzzle is Evangelical Orthodoxy. Evangelical Orthodoxy is a surprise much like getting an envelope that says "Extremely important—open immediately!" and finding that it has something extremely important that needs to be opened immediately. Usually "Extremely important—open immediately" is a red flag which suggests that the contents of the envelope are something other than what you're being led to believe.

But my focus is not to say who's wrong and who's right in the Protestant theme of recovering the glory of the Early Church. It's not even to suggest that tradition is a mediator that connects us with past glory, a living link, instead of an obstacle which chiefly gets in our way. My focus is to talk about something that looms this large in Orthodoxy.

Orthodoxy is not understood best as the content of a private choice, any more than learning physics is privately choosing ideas about how the world works. In one sense it's hard to out-argue someone who says that, but that isn't a very Orthodox way of thinking. It could be called using Orthodoxy as if it were a private heresy. (Once I wanted to be Orthodox

Orthodoxy as if it were a private heresy. (Once I wanted to be Orthodox out of that kind of desire, and God said, "No.") It's also deceptive to say that a convert Orthodox should select Orthodoxy as a sort of winner in the contest of "Will the real ancient Church please stand up?" which he's judging. It's truer to say that that happens for many former evangelicals (including Your Truly) than I would like to admit, but Orthodoxy points to something deeper.

Repentance (which some Orthodox call "metanoia") looms almost as large in Eastern Orthodoxy as recovering the past glory of the ancient Church looms large in Western Protestantism. For that matter, it might loom larger. And I'd like to comment on what repentance is. This may or may not be very different from Western understandings of repentance—I learned much about repentance as an evangelical—but it would be worth clarifying.

Repentance is not just a matter of admitting that you're wrong and deciding you'll try to do better the next time. That's what repentance would be if God's grace were irrelevant. But God's grace is key to repentance. Grace isn't just something that God gives you after you repent. Repentance itself is a work of grace.

If repentance isn't simply admitting your error and deciding you want to do better, then what else is repentance? In this case, Orthodoxy becomes clearer if it is compared and contrasted with other Middle Eastern or Eastern religions.

"Islam" means "submission," and "Muslim" means "one who submits to God." Submission is not one feature of Islam among others; it is foundational to the landscape, and one of the deepest criticisms of Islam is that the Islamic way of understanding submission, and the Islamic picture of God, effectively deny the reality of man. How does Islam deny the reality of man? God alone contributes to the world's story. The only real place for us is virtual puppets—not people who help decide what goes into the story. But Islam's central emphasis on submission is itself something that's not too far from Orthodoxy.

In Hinduism and Buddhism, one of the defining goals is to transcend the self and become selfless, and both Hinduism and Buddhism believe this requires the annihilation of the self. In some of Hinduism, salvation means that the self dissolves in God like a drop of water returning to the ocean. In therevada Buddhism, to be saved is to be annihilated altogether.

Orthodoxy, by contrast, is deeply connected with the Gospel words, "Whoever finds his life will lose it, and whoever loses his life for my sake and for the sake of the Gospel will find it." (Mark 8:35) One of Orthodoxy's founding goals is to become selfless and transcending oneself—offering oneself totally and wholly to God, saying, "Strike me and heal me; cast me down and raise me up, whatever you will to do." This is how Orthodoxy believes in transcending one's being male and female: something that is totally offered up to God and which God, instead of annihilating, breathes his spirit into. This is the difference between Orthodoxy on the one hand, and on the other hand Hinduism, Buddhism, Islam, and even moderate feminism. Unlike Islam's picture, whoever totally submits to God, or strives for submission, hears God's voice boom forth, "Come! I want you to contribute to the story of my Creation! I want you to work alongside me!" The goal of Orthodoxy, or one of its defining goals, is to help each person to be fully who God created him or her to be.

What does this have to do with repentance?

Repentance means losing yourself. It means unconditional surrender. Losing yourself for Christ's sake and for the sake of the Gospel is transformed to mean finding yourself. Repentance is unconditional surrender, and it is one of the most terrifying things a person can experience. It's much more than letting go of a sin and saying, "I'm sorry." It's letting go of yourself. It's obeying God when he says, "I want you to write me a blank check." Perhaps afterwards you may be surprised how little money God actually wrote the check for—I am astonished at times—but God insists on us writing a blank check. God tells us to place our treasures, our sins, our very selves at his feet, for him to do whatever he wants, and that is absolutely terrifying. *Repentance isn't letting go of sin. It is unconditional surrender to God.* And it's the only way to transcend the self and become a selfless and transformed "me."

One pastor used the image (he held up his keys when he said this) that we've given God absolutely all of our keys—all but one, that is. And God is saying, "Give me that one," and we're giving God *anything* but that. God demands unconditional surrender, and he calls for unconditional surrender so that we can be free, truly free. In my own life I've offered God all sorts of consolation prizes, all sorts of substitutes for what he was asking me, and when I did let go, I realized that I was holding onto a

piece of Hell. Before it is terrifying to let go, and then after I let go of my sin, I am horrified to realize that I was holding on to a smouldering piece of Hell itself. A recovering alcoholic will tell you that rejecting tightly held denial is something that an alcoholic will do absolutely anything to avoid—and that rejecting to denial is the only way to be freed from bondage to alcohol. That is very much what Orthodoxy announces about repenting from our sin.

Hell is not something external that will be added to sin starting in the afterlife. Every sin is itself the beginning of Hell. Orthodox theology says that the gates of Hell are bolted, barred, and sealed *from the inside*. It's not so much that God casts people into Hell as that Hell is a place people refuse to leave: Hell's motto may be, "It is better to reign in Hell than serve into Heaven." Hell is where God leaves people when they refuse to unbolt its gates and open themselves to the Father's love. I've experienced the beginning of Hell, and the beginning of Heaven, and you've experienced them both. Every sin is a seed that will grow into Hell unless we let God uproot it, and that means letting him dig however deep he wills.

Repentance needs to be not only admitting to a sin, but an unconditional surrender that leans on God's grace because apart from God it is beyond us. Repentance needs to be unconditional surrender because only when we give God our last key will we be released from holding on to that one piece of Hell we are trying to avoid giving to God. Repentance is a work of grace, both in God taking the piece of Hell we were clinging to, and in God's power helping us give us the strength to let go of that one piece of Hell.

That much is true, but this article is incomplete even as a tour guide. I'm not even sure it's an accurate picture of Orthodoxy. There's a joyful dance, a dance of grace and ever-expanding freedom, and this article is a still, flat picture of that dance. Everything I describe is meant as Orthodox, but I have flattened out its living energy (which is why this is so philosophical), without doing it justice. The solution is not a better and more complete picture of the dance that will still be flat and still. The solution is for you to see the dance live, whether or not these observations are what God wants you to see. God may want to show you things I've never hinted at, or use something I've written to help you connect with Orthodox worship, or for that matter use this article as a key to open the treasuries of Orthodoxy. But that is God's choice. And he can also

treasurehouses of Orthodoxy. But that is God's choice. And he can also connect you with the here and now as many Orthodox emphasize, or make everyday life more and more a home for contemplation, or pick out other treasures that you need. We don't know our true needs—God does, and he cares for them.

## For Further Reading...

If you've read this far and want to know how you can read more, I have not succeeded very well at communicating. I'm not saying there aren't any good books out there. There are scores and scores, and I've even read some of them. I love to read. But please don't try to read five more books on Orthodoxy so you'll understand it better. *Please* don't.

Go visit a parish. Participate, and come to experience firsthand, for real, what this book is at best a tour guide to. Even if this tour guide helps you see things you might not pick up on your own, it's only the tour guide. The reality is the life that Orthodox live, and if you come to a service wanting to take something in, I will be surprised if nothing happens. Joining Orthodox worship (even just sitting or standing) and trying to take everything in, is like falling into a lifegiving river, being surrounded by its mighty currents, and coming to contact with a little bit of it. Don't worry if you don't understand everything that's going on. I serve at the altar as an adult acolyte, and I *certainly* don't understand all that's going on. But I don't need to. There's a saying that a mouse can only drink its fill from a river, and it's simply beside the point that we can't drink all the water in the river. We don't need to. What we can do is take away what we are ready for and drink our fill.

And if you still feel a bit intimidated, like most of this is too subtle to understand—don't worry. You don't need to understand it the Western way, by figuring out all the concepts in an article. The Eastern way is to go to an Orthodox Church, and let God teach you over time. If you do that, it doesn't matter how much or how little this article seemed easy to think about.

[Would you like to find an Orthodox parish near you? \(Outside the US\)](#)

# Glory

Glory,  
Wonder,  
World without end.

World without end:  
Have I sought Thee,  
When I fled afar off from Thee,  
Thou alone whose Glory slaketh thirst,  
*World without end?*

To Thee belongeth worship,  
To Thee belongeth praise,  
To Thee belongeth glory,  
To the Father, and the Son, and the Holy Spirit,  
Both now and ever, and unto ages of ages.  
Amen.

Why am I athirst,  
I who seek water any place,  
But from Thine own hand?

Whosoever drinketh of this water shall thirst again:  
But whosoever drinketh of the water that I shall give him,  
Shall never thirst;  
But the water that I shall give him,  
Shall be in him a well of water,  
Springing up into everlasting life.

I seek my glory,  
In thinly gilt traps,  
And turn my back,  
On the unadorned portals,  
Through which Thou hast glorified me

through which thou hast glorified me,  
Ever seeking my glory,  
While forbidding me to quest,  
For my glory along accursed routes.

For we have committed two evils:  
We have forsaken Thee,  
The fountain of living waters,  
And hewed ourselves out cisterns,  
Broken cisterns that can hold no water.

We have committed this evil;  
I must repent of it.

Glory and wonder, majesty and power,  
Thou forbiddest us to seek our own glory,  
That Thou mightest rightly glorify us,  
With the maximum glory that could ever be ours.

Glory, glory, glory:  
Glory surroundeth thee—  
And drencheth those who humbly seek,  
Thine own glory to magnify.  
No man who seeketh,  
Thine own glory to magnify,  
Can far pursue his quest,  
Before an invisible trickle comes before thy Throne,  
And drencheth him,  
In the glory he seeketh not,  
Not for himself.

After this I looked, and,  
Behold, a door was opened in heaven:  
And the first voice which I heard was as it were of a trumpet,  
Talking with me;  
Which said,  
Come up hither,  
And I will shew thee things which must be hereafter.  
And immediately I was in the spirit:  
And, behold, a throne was set in heaven,  
And one sat on the throne.  
And he that sat was to look upon,  
Like a jasper and a sardine stone:

And there was a rainbow round about the throne,  
In sight like unto an emerald.  
And round about the throne were four and twenty seats:  
And upon the seats I saw four and twenty elders sitting,  
Clothed in white raiment;  
And they had on their heads crowns of gold.  
And out of the throne proceeded lightnings and thunderings and voices:  
And there were seven lamps of fire burning before the throne,  
Which are the seven Spirits of God.  
And before the throne,  
There was a sea of glass like unto crystal:  
And in the midst of the throne,  
And round about the throne,  
Were four beasts full of eyes before and behind.  
And the first beast was like a lion,  
And the second beast like a calf,  
And the third beast had a face as a man,  
And the fourth beast was like a flying eagle.  
And the four beasts had each of them six wings about him;  
And they were full of eyes within:  
And they rest not day and night, saying,  
"Holy, holy, holy,  
LORD God Almighty,  
Which was, and is, and is to come."  
And when those beasts give glory and honour and thanks  
To him that sat on the throne,  
Who liveth for ever and ever,  
The four and twenty elders,  
Fall down before him that sat on the throne,  
And worship him that liveth for ever and ever,  
And cast their crowns before the throne, saying,  
"Thou art worthy, O Lord, to receive glory and honour and power:  
for thou hast created all things,  
and for thy pleasure they are and were created."  
There is more glory in Heaven and earth,  
Than I ever dream of in my grasping:  
Honor,

Majesty,  
Glory,  
Praise.

Let me seek this Thy glory,  
And leave to Thee the seeking of mine own glory.  
Thou hast said,  
The greater thou art,  
The more humble thyself,  
And thou shalt find favour before the Lord.

Wonder.

Glory.  
Help me forsake the quest,  
To slake my thirst for mine own glory,  
That thou mightest slake my thirst,  
With a draught that infinitely eclipseth,  
Such things as I have grasped.

Eye hath not seen,  
Nor ear heard,  
Neither have entered into the heart of man,  
The things which God hath prepared for them that love Him,  
Things that begin in this here and now,  
In ways beyond human reckoning.

Eye hath not seen,  
Nor ear heard,  
Neither have entered into the heart of man,  
The things which God hath prepared for them that love Him,  
The eternity that is here now,  
That which was from the beginning,  
Which we have heard and still rings in our ears,  
Which we have seen with our eyes and can still see how it looks,  
Which we have looked upon,  
Which we have touched with our very own hands,  
Of the Word of God:

The Lord is King!  
He hath clothed Himself in glory!

# God the Game Changer

Some people wince at terms like *game changer* today the same way they winced in earlier years when they heard, "paradigm shift".

But the terms overuse suggests there might be something that triggered the buzz. When Apple introduced the Macintosh, they changed the scene, not only by causing a few Macintoshes to be sold, but by pushing a permanent shift for mainstream computers to be sold with Macintosh-style Windows, not the older command line MS-DOS. Apple may never have sold the same number of units as Microsoft, and they survived due to a Microsoft bailout, but once Apple introduced the Macintosh, Microsoft considered it non-negotiable to release Windows to compete with the Macintosh environment (even if Vista was a painful enough imitation MacOS to earn the scorn of Microsoft's usual fans). It may be in the end that Apple's biggest gift to the world of desktop computing is Windows: Apple's gift to desktop computing today is that you can now buy, as a mainstream choice, Windows 7 instead of something more like MS-DOS.

It is no longer a provocative statement that Apple's introduction of the iPhone may be a more profound game changer than the Macintosh. It may turn out, in the end, that Apple's gift to mobile computing may be the Droid and Google-based smartphones—Verizon's "Before you choose a phone, choose a map", and, "iDon't"<http://cjayward.com/>"Droid does" marketing campaigns certainly reflect a realization on Verizon's part that shooing Apple away when Apple wanted Verizon to be the iPhone's exclusive carrier was perhaps not Verizon's best decision. But the iPhone changed the game profoundly enough that it was the gold standard everyone was trying to beat, and at least before the Droid, no

standard everyone was trying to beat, and at least before the DROID, no "iPhone killer" even came close.

In both of these cases, Apple didn't offer their own brand of the existing options: while it was not the first graphical user interface, the Macintosh did not offer an attempt to improve on MS-DOS; it showed what a graphical user interface done right for desktop computing could look like. Likewise, the iPhone did not offer a miniaturized standard desktop environment like Windows Mobile, but it showed what mobile computing done right could look like. While the iPhone may no longer be the only phone that does mobile computing right, the Droid underscores that if you're going to beat Apple now, you need to beat it by the same game as Apple is playing in the iPhone. In neither of these cases did Apple try to beat Microsoft at its own game by providing a better MS-DOS, or a better Windows Mobile. Instead, *they changed the game.*

**In our lives, we want God to help us struggle better at the games we are playing. What God wants to do is something different: to change the game.**

## **God the Game Changer at work: A story**

Every Lent, Orthodox remember a great saint with a great story. There was a very accomplished priest and monk who was troubled by the idea that no one had gotten as far as him in asceticism (spiritual work). And he was sent to a monastery by the Jordan, where as the custom was, every Lent monks would go out into the desert. And after a while, he saw a person, and chased this person; after a time he asked for the other person to stop fleeing; the other person called him by name and asked for his cloak, since her clothes were long since gone. He was terrified.

She asked why a great ascetic like him could want to speak with a sinful woman like her. They bowed down and asked each other for a blessing; then she told him that he was a priest and he should bless her, terrifying him even more by knowing that he was a priest. Then they spoke, and the woman called herself a sinner without any single virtue, and asked him to pray. So they began to pray, and a long time the priest looked up and saw her above the ground, levitating. He fell to the ground, weeping in prayer. Then he asked her story.

The woman asked his prayers for her shamelessness; in modern terms, she was a sorority girl who majored in men, money, and margaritas, except worse. Much worse. She went to a religious festival, got to church, and a force kept her from going in. She tried to go around it, then prayed before an icon of Mary the Mother of God asking to be let in and then saying she would do whatever she was told. Then she was able to enter in; she worshipped, and returned to the icon and asked to be told what to do. Then a voice from on high said, "If you cross the Jordan, you will find glorious rest."

She was given some money and purchased three loaves of bread as she

left, and then went, and struggled and struggled and struggled in what seemed like endless temptations and struggles. She had given free reign to her vices for seventeen years, and for seventeen years in the desert she wanted men, wanted wine and lewd songs, wanted meat, and just kept on struggling. After a time—a long, *long* time—things got easier. And she had been living for almost half a century in the desert, eating desert plants and at the mercies of the elements. It came up in the conversation that she quoted from the Bible with understanding. The monk asked her if she had read them. She said she had never seen another person since making the journey, had no one to read holy books to her, and like most people then, she didn't know how to read. Then she alluded to Scripture and suggested that Christ the Word may teach by himself.

She told him he wouldn't be able to come the next year, but to come the year after and give her communion. The next year illness pinned him down, and the year after he went, then saw her on the other side of the river. She crossed herself and walked over the water. They met again like the first, and she asked him to come again in a year.

He returned in a year to find her dead, kissed her feet and washed them with his tears, and found written next to her her last request and her name, Mary. He didn't see how he would bury her, as per her request, but when he took a piece of wood and began to dig, an enormous lion approached, and at his command dug her grave. Then he and the lion went their separate ways, and per an earlier request, the monk addressed numerous things that needed correction. Somewhere along the way, he asked in perfectly good faith if she would return to the city. Her answer was that no, she would be returning to temptation and ruin all her work. Old woman as she was, she still couldn't handle the temptation of having all those young men around.

What can we learn from all this? In the Parable of the Talents, a master calls his servants and entrusts one with five "talents" (70 pound silver bars), one with two, and one with one talent. He returns and calls an account. The master commends the servant who was given five talents because he has earned five more, and likewise commends the servant given two talents who has earned two more. Then the we hear a different tune ([Matthew 25:24-27](#)):

He also who had received the one talent came forward, saying,  
"Master, I knew you to be a hard man, reaping where you did not

...master, I knew you to be a hard man, reaping where you did not sow, and gathering where you did not winnow; so I was afraid, and I went and hid your talent in the ground. Here you have what is yours."

But his master answered him, "You wicked and slothful servant! You knew that I reap where I have not sowed, and gather where I have not winnowed? Then you ought to have invested my money with the bankers, and at my coming I should have received what was my own with interest..."

This is a bit of a hard passage. The master represents God quite clearly, and this parable not only has the servant say that his master is (to use different words) cruel, but he harvests where he did not plant seeds and gathers where he has not scattered. Worse than that, the master, i.e. God, seems to endorse the portrayal. What are we to make of this?

One thought is that this is rhetorically abstaining from pressing a point. In other words, we could paraphrase the master's reply, "You wicked and slothful servant! Let's say for the sake of argument that I harvest where I did not plant seeds and gather where I have not scattered. Shouldn't you at least have invested it so I could have it back with interest?"

But in fact a deeper understanding is available, and it hinges on a question. What has God not sown? He created Heaven and earth, all things that can be seen and all things that cannot be seen. The demons themselves were created by God; everything from the highest of the angels to the lowest grain of sand, from the greatest saint to the Devil is a creation of God. What then could there be that God hath not sown?

The answer is that God has not sown sin, nor suffering, nor evil, nor pain, nor sickness, nor death. He created the Devil, but not the rebellion of angels once created pure. God has not sown this; he has not scattered us out of the glory he intended for us. And he has not planted sin, nor suffering, nor evil, nor pain, nor sickness, nor death, but he harvests them.

The servant's accusation, which the master repeats, is that God is so intent on harvest that he harvests whether or not he has sown. The priest, monk, and *saint* Zosima is among the greatest of saints, and he lived a life of spiritual work and spiritually sober living before God. His life was full of seeds that God sowed, and probably from childhood. And God

harvested Saint Zosima's good works. But Saint Zosima needed something. He needed to be knocked completely flat on his back.

But to stop here is to miss the glory of God the Game Changer. The woman in the desert did a great many things that God would never sow. She was a worse sinner than a prostitute. But God harvested her and her sins too, and when Zosima had reached a point where he did not know if there was his equal on earth, God showed Saint Zosima, "*Here is someone who leaves you completely in the dust.*"

Saint Mary wondered how many souls she ensnared. The answer is certainly, "Many," and this is tragic. But God harvested her sins, many as they were, and out of her person, her story, and her intercession God has helped innumerrably more people reach salvation. She is one of the greatest saints the Orthodox Church knows. And something is really destroyed in the story if you omit her numerous sins of sexual self-violation.

And in all this, God changed the game. He did not tear up the fabric of time, but he harvested what was planted in her even more than what was planted in Saint Zosima. God harvests where he has sown, and God the Game Change also harvests where he has never sown. And when he does, he pushes the game to another level entirely.

A present-day example of God's game-changing, this time not with sin but with injury, is in the life of Joni Erickson. At a young age, Erickson dove the wrong way into shallow water and broke her neck, instantly paralyzing her in all four limbs. And she assuredly prayed what everybody who has such an accident prays if prayer is even considered: "Lord, heal me." And some people are healed, miraculously. But an entirely different, in a way deeper, miracle occurred with her. She adjusted to her loss and is a woman who has not only discovered that her life is still worth living, but has become a vibrant and well-known ambassador for the claim, "*Even after a tragedy like mine, life is still worth living.*" None of this would have happened if she had not suffered an injury that cost her the use of all four limbs. For that matter, none of this would have happened if God answered her prayers by giving her the supernatural healing she wanted. Instead, God changed the game. He answered her prayers, not by giving what she asked for, but by moving the game to the next level. God did not plant her injury, but he has harvested where he did not plant and gathered in where he never scattered.

## More than a game change

The Gospel is the story of God changing the game. It was much more than Pharisees who did not recognize Christ; his own disciples seemed to have their eyes equally wide shut.

Christ's people looked for a military Messiah who would deliver the Jews from Roman domination. Christ changed the game; he did not offer salvation as military deliverance, but salvation from sin. He didn't give people what they were looking for; he pushed the game to the next level.

Darkness reigned in the crucifixion of Christ. Something like a quarter to a third of the Gospels are devoted to Christ's passion. The message appears to be very clear: "But this is your hour—when darkness reigns" (Luke 22:53 NIV). *Game over. All hope is lost.*

Yet this profound evil is precisely what God harvested treasure beyond all beauty. In [I Corinthians 15](#) Saint Paul writes,

But some one will ask, "How are the dead raised? With what kind of body do they come?" You foolish man! What you sow does not come to life unless it dies. And what you sow is not the body which is to be, but a bare kernel, perhaps of wheat or of some other grain. But God gives it a body as he has chosen, and to each kind of seed its own body. For not all flesh is alike, but there is one kind for men, another for animals, another for birds, and another for fish. There are celestial bodies and there are terrestrial bodies; but the glory of the celestial is one, and the glory of the terrestrial is another. There is one glory of the sun, and another glory of the moon, and another glory of the stars; for star differs from star in glory. So is it with the resurrection of the dead. What is sown is perishable, what is raised is imperishable. It is sown in dishonor, it is raised in glory. It is sown in weakness, it is raised in power. It is sown a physical body, it is raised

a spiritual body. If there is a physical body, there is also a spiritual body. Thus it is written, "The first man Adam became a living being"; the last Adam became a life-giving spirit. But it is not the spiritual which is first but the physical, and then the spiritual. The first man was from the earth, a man of dust; the second man is from heaven. As was the man of dust, so are those who are of the dust; and as is the man of heaven, so are those who are of heaven. Just as we have borne the image of the man of dust, we shall also bear the image of the man of heaven. I tell you this, brethren: flesh and blood cannot inherit the kingdom of God, nor does the perishable inherit the imperishable. Lo! I tell you a mystery. We shall not all sleep, but we shall all be changed, in a moment, in the twinkling of an eye, at the last trumpet. For the trumpet will sound, and the dead will be raised imperishable, and we shall be changed. For this perishable nature must put on the imperishable, and this mortal nature must put on immortality. When the perishable puts on the imperishable, and the mortal puts on immortality, then shall come to pass the saying that is written: "Death is swallowed up in victory." "O death, where is thy victory? O death, where is thy sting?"

And Saint Paul knew a game change in his own life. English translations seem to put this point much more delicately, but Saint Paul, earlier in this chapter, compares himself to a miscarried child, as the least of the Apostles. He almost seems to be saying, "If there's hope for me, there's hope for anybody." And yet God harvested from what was sown in this persecutor of the Church.

The Resurrection is the ultimate game-changing move. Saint John Chrysostom's famous resurrection homily proclaims:

Let no one bewail his poverty,  
For the universal Kingdom has been revealed.  
Let no one weep for his iniquities,  
For pardon has shown forth from the grave.  
Let no one fear death,  
For the Saviour's death has set us free.  
He that was held prisoner of it has annihilated it.  
By descending into Hell, He made Hell captive.  
He embittered it when it tasted of His flesh.

And Isaiah, foretelling this, did cry:  
Hell, said he, was embittered  
When it encountered Thee in the lower regions.  
It was embittered, for it was abolished.  
It was embittered, for it was mocked.  
It was embittered, for it was slain.  
It was embittered, for it was overthrown.  
It was embittered, for it was fettered in chains.  
It took a body, and met God face to face.  
It took earth, and encountered Heaven.  
It took that which was seen, and fell upon the unseen.

O Death, where is thy sting?  
O Hell, where is thy victory?  
Christ is risen, and thou art overthrown!  
Christ is risen, and the demons are fallen!  
Christ is risen, and the angels rejoice!  
Christ is risen, and life reigns!  
Christ is risen, and not one dead remains in the grave.  
For Christ, being risen from the dead,  
Is become the first-fruits of those who have fallen asleep.  
To Him be glory and dominion  
Unto ages of ages.  
Amen.

We would do well to remember the scene a short distance after the funereal scene of joy turned to weeping at the death of King Caspian in [Prince Caspian](#):

"Look here! I say," he stammered. "It's all very well. But aren't you—? I mean didn't you—"

"Oh, don't be such an ass," said [King] Caspian.

"But," said Eustace, looking at Aslan. "Hasn't he—er—died?"

"Yes," said the Lion in a very quiet voice, almost (Jill thought) as if he were laughing. "He has died. Most people have, you know. Even I have. There are very few who haven't."

Earlier in the Gospel, in Luke chapter 7, there is a scene where a widow's only son is carried out on a bier, and Christ says something truly

strange: before doing anything else, he tells her not to weep. He is speaking to a woman who has been twice bereaved, and with her last bereavement went her source of support. And he tells her, "Weep not!" He then goes on to raise her son from the dead. That isn't what is happening in Christ's resurrection.

Christ, the firstborn of the dead, opened death as one opening the womb. And he himself was sown a natural body and is raised a spiritual body. And God did more than simply flip the switch and make Christ's body like it was before death. The marks of crucifixion remain imprinted on his body as Joni Eareckson Tada remains quadriplegic. But Christ moved forward in triumph. He remains forever imprinted with the marks of death suffered for our sakes, and he bears them as his trophy. His victory as God the Game Changer takes us, harvesting what he has sown in our good deeds and our repentance, and what he has not sown in our sins and in evils that happen to us, and alike transforms us as trophies in his wake. Christ God is victor over both sin and death, and this victory is not just something that could be ours at Judgment Day; it is the central reality of day to day life. Saint Seraphim would greet people with the Paschal greeting year round: "Christ is risen, my joy!" While that is not the usual Orthodox custom, that he did so is entirely fitting and not in any sense an exaggeration of the Resurrection's importance. The Resurrection, the greatest act yet of God the Game Changer, is what God will do on a smaller scale in our lives. God sometimes gives us victory in the game we are playing, and sometimes changes the game and pushes us to the next level. It may be a painful and difficult process; it may involve loss and any amount of bewilderment. But when we seem to have lost, it may just be God the Game Changer's power at work.

*Christ is risen, His joy!*

# God the Spiritual Father

I believe in one God, the Father, Almighty...  
*The Nicene Creed*

All of us do the will of God. The question is not whether we do God's will or not, but whether we do God's will as *instruments*, as Satan and Judas did, or as *sons*, as Peter and John did. In the end Satan may be nothing more than a hammer in the hand of God.  
*C.S. Lewis, paraphrased*

The king's heart is a stream of water in the hand of the Lord; he turns it wherever he will.  
[Proverbs](#)

My precious, precious child, I love you and will never leave you. When you see one set of footprints, it was then that I carried you.  
[Footprints](#), paraphrased

Look to every situation as if you were going to bargain at the market, always looking to make a spiritual profit.  
*The Philokalia*, paraphrased

For it was fitting that God, for whom and by whom all things exist, in bringing many sons to glory, should make Christ the pioneer of their salvation perfect through suffering.  
[Hebrews](#)

There are a lot of concerns on people's minds. For those of us in the U.S., we've been facing an economic disaster. Is "the decade from Hell" over and done? Or has the economic depression just begun? Has the *real* nightmare just *begun*? People have faced unemployment, and some are worried about hyper-inflation. And the big question on almost everyone's mind is, "Can I survive this? And if so, how?" And these quotes have something to say to the billion dollar question on almost everyone's mind.

Let's turn the clock back a bit, to 1755. There was a catastrophic earthquake in Lisbonne in Portugal, and its untold misery shook people's faith in the goodness of the world we live in. In the questioning that came afterwards, Voltaire wrote *Candide* in which the rather ludicrous teacher Pangloss is always explaining that we live in "the best of all possible worlds:" no matter what misfortune or disaster befell them, the unshakable Pangloss would always find a way to explain that we still lived in the best of all possible worlds. And Voltaire's point is to rip that preposterous idea apart, giving a dose of reality and showing what the misery in Lisbonne made painfully clear: we do *not* live in the best of all possible worlds. Far from it. But there is another shoe to drop.

We do not live in the best of all possible worlds. Far from it. But we live under the care of the best of all possible Gods, and it is a more profound truth, a more vibrant truth, a truth that goes much deeper into the heart of root of all things to say that we may not live in the best of all possible worlds, but *we live under the care of the best of all possible Gods*.

Once we have truly grasped that God the Spiritual Father is the best of all possible Gods, it becomes a mistake to focus on how, in fact, we simply do not live in the best of all possible worlds. Perhaps we all need to repent and recognize that we ourselves are far from being the best of all possible *people*. But we need to raise our eyes higher: raise our eyes and see that our lives and our world are under the love of the best of all possible Gods: God the Spiritual Father.

The Orthodox Church has understood this since ancient times. Let's read some longer quotes:

We ought all of us always to thank God for both the universal and the particular gifts of soul and body that He bestows on us. The universal gifts consist of the four elements and all that comes into

universal gifts consist of the four elements and all that comes into being through them, as well as all the marvelous works of God mentioned in the divine Scriptures. The particular gifts consist of all that God has given to each individual. These include:

- Wealth, so that one can perform acts of charity.
- Poverty, so that one can endure it with patience and gratitude.
- Authority, so that one can exercise righteous judgment and establish virtue.
- Obedience and service, so that one can more readily attain salvation of soul.
- Health, so that one can assist those in need and undertake work worthy of God.
- Sickness, so that one may earn the crown of patience.
- Spiritual knowledge and strength, so that one may acquire virtue.
- Weakness and ignorance, so that, turning one's back on worldly things, one may be under obedience in stillness and humility.
- Unsought loss of goods and possessions, so that one may deliberately seek to be saved and may even be helped when incapable of shedding all one's possessions or even of giving alms.
- Ease and prosperity, so that one may voluntarily struggle and suffer to attain the virtues and thus become dispassionate and fit to save other souls.
- Trials and hardship, so that those who cannot eradicate their own will may be saved in spite of themselves, and those capable of joyful endurance may attain perfection.

All these things, even if they are opposed to each other, are nevertheless good when used correctly; but when misused, they are not good, but are harmful for both soul and body.

### *The Philokalia*

He who wants to be an imitator of Christ, so that he too may be called a son of God, born of the Spirit, must above all bear courageously and patiently the afflictions he encounters, whether these be bodily illnesses, slander and vilification from men, or attacks from the unseen spirits. God in His providence allows souls

attacks from the unseen spirits. God in His providence allows souls to be tested by various afflictions of this kind, so that it may be revealed which of them truly loves Him. All the patriarchs, prophets, apostles and martyrs from the beginning of time traversed none other than this narrow road of trial and affliction, and it was by doing this that they fulfilled God's will. 'My son,' says Scripture, 'if you come to serve the Lord, prepare your soul for trial, set your heart straight, and patiently endure' (Ecclus. 2 : 1-2). And elsewhere it is said: 'Accept everything that comes as good, knowing that nothing occurs without God willing it.' Thus the soul that wishes to do God's will must strive above all to acquire patient endurance and hope. For one of the tricks of the devil is to make us listless at times of affliction, so that we give up our hope in the Lord. God never allows a soul that hopes in Him to be so oppressed by trials that it is put to utter confusion. As St Paul writes: 'God is to be trusted not to let us be tried beyond our strength, but with the trial He will provide a way out, so that we are able to bear it (I Cor. 10 : 13). The devil harasses the soul not as much as he wants but as much as God allows him to. Men know what burden may be placed on a mule, what on a donkey, and what on a camel, and load each beast accordingly; and the potter knows how long he must leave pots in the fire, so that they are not cracked by staying in it too long or rendered useless by being taken out of it before they are properly fired. If human understanding extends this far, must not God be much more aware, infinitely more aware, of the degree of trial it is right to impose on each soul, so that it becomes tried and true, fit for the kingdom of heaven?

Hemp, unless it is well beaten, cannot be worked into fine yarn, while the more it is beaten and carded the finer and more serviceable it becomes. And a freshly moulded pot that has not been fired is of no use to man. And a child not yet proficient in worldly skills cannot build, plant, sow seed or perform any other worldly task. In a similar manner it often happens through the Lord's goodness that souls, on account of their childlike innocence, participate in divine grace and are filled with the sweetness and repose of the Spirit; but because they have not yet been tested, and have not been tried by the various afflictions of the evil spirits, they are still immature and not yet fit for the kingdom of heaven. As the apostle says: 'If you have not been disciplined you are bastards and not sons' (Heb. 12 : 8). Thus trials

and afflictions are laid upon a man in the way that is best for him, so as to make his soul stronger and more mature; and if the soul endures them to the end with hope in the Lord it cannot fail to attain the promised reward of the Spirit and deliverance from the evil passions.

*The Philokalia*

## **All These Things Were From Me**

*(The new St. Seraphim, of Viritsa was born in 1866. He married and had three children. In 1920, at the age of 54, he and his wife quietly separated and each entered monastic life. Eventually he became the spiritual father of the St. Alexander Nevsky Lavra in St. Petersburg, where, as a clairvoyant staretz, he also confessed thousands of laity. He said, "I am the storage room where people's afflictions gather." In imitation of his patron saint, he prayed for a thousand nights on a rock before an icon of St. Seraphim of Sarov. He reposed in the Lord in 1949 and the Church of Russia glorified him in August of 2000.)*

*The following is (slightly abridged) from a letter sent by St. Seraphim to a spiritual child of his, a hierarch who was at that time in a Soviet prison. It is in the form of consolation given by God to a troubled man's soul.*

St. Seraphim of Viritsa

Have you ever thought that everything that concerns you, concerns Me, also? You are precious in my eyes and I love you; for his reason, it is a special joy for Me to train you. When temptations and the opponent [the Evil One] come upon you like a river, I want you to know that This was from Me.

I want you to know that your weakness has need of My strength, and your safety lies in allowing Me to protect you. I want you to know that when you are in difficult conditions, among people who do not understand you, and cast you away, This was from Me.

I am your God, the circumstances of your life are in My hands; you did not end up in your position by chance; this is precisely the position I have appointed for you. Weren't you asking Me to teach you humility? And there - I placed you precisely in the "school" where they teach this lesson. Your environment and those who are

where they teach this lesson. Your environment, and those who are around you, are performing My will. Do you have financial difficulties and can just barely survive? Know that This was from Me.

I want you to know that I dispose of your money, so take refuge in Me and depend upon Me. I want you to know that My storehouses are inexhaustible, and I am faithful in My promises. Let it never happen that they tell you in your need, "Do not believe in your Lord and God." Have you ever spent the night in suffering? Are you separated from your relatives, from those you love? I allowed this that you would turn to Me, and in Me find consolation and comfort. Did your friend or someone to whom you opened your heart, deceive you? This was from Me.

I allowed this frustration to touch you so that you would learn that your best friend is the Lord. I want you to bring everything to Me and tell Me everything. Did someone slander you? Leave it to Me; be attached to Me so that you can hide from the "contradiction of the nations." I will make your righteousness shine like light and your life like midday noon. Your plans were destroyed? Your soul yielded and you are exhausted? This was from Me.

You made plans and have your own goals; you brought them to Me to bless them. But I want you to leave it all to Me, to direct and guide the circumstances of your life by My hand, because you are the orphan, not the protagonist. Unexpected failures found you and despair overcame your heart, but know That this was from Me.

With tiredness and anxiety I am testing how strong your faith is in My promises and your boldness in prayer for your relatives. Why is it not you who entrusted their cares to My providential love? You must leave them to the protection of My All Pure Mother. Serious illness found you, which may be healed or may be incurable, and has nailed you to your bed. This was from Me.

Because I want you to know Me more deeply, through physical ailment, do not murmur against this trial I have sent you. And do not try to understand My plans for the salvation of people's souls, but uncomplainingly and humbly bow your head before My goodness. You were dreaming about doing something special for Me and, instead of doing it, you fell into a bed of pain. This was from Me.

Because then you were sunk in your own works and plans and I wouldn't have been able to draw your thoughts to Me. But I want to

teach you the most deep thoughts and My lessons, so that you may serve Me. I want to teach you that you are nothing without Me. Some of my best children are those who, cut off from an active life, learn to use the weapon of ceaseless prayer. You were called unexpectedly to undertake a difficult and responsible position, supported by Me. I have given you these difficulties and as the Lord God I will bless all your works, in all your paths. In everything I, your Lord, will be your guide and teacher. Remember always that every difficulty you come across, every offensive word, every slander and criticism, every obstacle to your works, which could cause frustration and disappointment, This is from Me.

Know and remember always, no matter where you are, That whatsoever hurts will be dulled as soon as you learn In all things, to look at Me. Everything has been sent to you by Me, for the perfection of your soul.

All these things were from Me.

*St. Seraphim of Viritsa*

For all who are led by the Spirit of God are sons of God. For you did not receive the spirit of slavery to fall back into fear, but you have received the spirit of sonship. When we cry, "Abba! Father!" it is the Spirit himself bearing witness with our spirit that we are children of God, and if children, then heirs, heirs of God and fellow heirs with Christ, provided we suffer with him in order that we may also be glorified with him.

I consider that the sufferings of this present time are not worth comparing with the glory that is to be revealed to us. For the creation waits with eager longing for the revealing of the sons of God; for the creation was subjected to futility, not of its own will but by the will of him who subjected it in hope; because the creation itself will be set free from its bondage to decay and obtain the glorious liberty of the children of God.

We know that the whole creation has been groaning in travail together until now; and not only the creation, but we ourselves, who have the first fruits of the Spirit, groan inwardly as we wait for adoption as sons, the redemption of our bodies. For in this hope we were saved. Now hope that is seen is not hope. For who hopes for what he sees? But if we hope for what we do not see, we wait for it

with patience. Likewise the Spirit helps us in our weakness; for we do not know how to pray as we ought, but the Spirit himself intercedes for us with sighs too deep for words. And he who searches the hearts of men knows what is the mind of the Spirit, because the Spirit intercedes for the saints according to the will of God. We know that in everything God works for good with those who love him, who are called according to his purpose. For those whom he foreknew he also predestined to be conformed to the image of his Son, in order that he might be the first-born among many brethren. And those whom he predestined he also called; and those whom he called he also justified; and those whom he justified he also glorified. What then shall we say to this? If God is for us, who is against us? He who did not spare his own Son but gave him up for us all, will he not also give us all things with him? Who shall bring any charge against God's elect? It is God who justifies; who is to condemn? Is it Christ Jesus, who died, yes, who was raised from the dead, who is at the right hand of God, who indeed intercedes for us? Who shall separate us from the love of Christ? Shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword? As it is written, "For thy sake we are being killed all the day long; we are regarded as sheep to be slaughtered." No, in all these things we are more than conquerors through him who loved us. For I am sure that neither death, nor life, nor angels, nor principalities, nor things present, nor things to come, nor powers, nor height, nor depth, nor anything else in all creation, will be able to separate us from the love of God in Christ Jesus our Lord.

### [Romans](#)

We may be entering an economic depression. We live in hard times, and things may get much harder. It is becoming more and more clear that this is no mere recession: it looks more and more like a depression. We see people asking, "Where is God when it hurts?" And there is something important about the answer to "Where is God when it hurts?": something very important, something profoundly important.

I believe in one God, the *Spiritual* Father Almighty.

I'm not sure how to explain this without saying something about Orthodox monasticism, but the Orthodox concept of a *spiritual father* is

of someone one owes obedience in everything, and who normally assigns some things that are very difficult to do, unpleasant, and painful. And this seems a strange thing to be getting into. But there is method to what may seem mad: we do not reach our greatest good, we do not flourish, we do not reach our highest heights, if we are the spiritual equivalent of spoiled children. And the entire point of this duty of obedience is to arrange things for the good of the person who obeys in this situation. *The entire point of obedience in what the spiritual father arranges is for the spiritual father as a spiritual physician to give health and freedom through the disciple's obedience.*

In that sense, only monks and nuns are expected to have spiritual fathers to shape them. The rest of us have God as our Spiritual Father, and we can kick against the goads, but God the Spiritual Father is at work in every person we meet. *God the Spiritual Father is God the Great Physician, working everything for our health and freedom if we will cooperate.* People and situations he sends us may be part of his will for us as instruments, or they may be part of his will for us as sons of God, but God's will unfolds in each person who acts in our lives: kind people and cruel, having excess and having lack, getting our way and having our will cut short as a spiritual father does to form a monk under his care, becomes part of the work of God the Spiritual Father. Even economic nightmares become part of "We know that in everything God works for good with those who love him, who are called according to his purpose."

When God gives us our true good, *nothing* can take it away.

What exactly is our true good unfolds in [the saints' lives, which are well worth reading](#): many of them lived in great hardship. Some were martyred; [the beloved St. Nectarios](#) lost his job repeatedly for reasons that were not just unfortunate, but completely and absolutely unfair. God was still at work in his life, and he is now crowned as a saint in Heaven. God allowed things to happen, terrible things to happen, but not one of them took him away from God giving him everything he needed and ultimately working in him the glory of one of the greatest saints in recent times.

[The Sermon on the Mount](#) says some harsh words about how we use money, but these words set the stage for a profound treasure that we can still have, even in an economic depression:

Do not store up for yourselves treasures on earth, where moth and rust consume and where thieves break in and steal, [*or, today, where economic havoc can ruin our financial planning*] but store up for yourselves treasures in heaven, where neither moth nor rust consumes and where thieves do not break in and steal [*or, today, where your treasures cannot be taken away even by a complete economic meltdown*].

For where your treasure is, there will your heart be also...

No one can serve two masters; for either he will hate the one and love the other, or he will be devoted to the one and despise the other. You cannot serve God and Money.

Therefore I tell you, do not be anxious about your life, what you shall eat or what you shall drink, nor about your body, what you shall put on. Is not life more than food, and the body more than clothing? Look at the birds of the air: they neither sow nor reap nor gather into barns, and yet your heavenly Father feeds them. Are you not of more value than they? And which of you by being anxious can add one cubit to his span of life? And why are you anxious about clothing? Consider the lilies of the field, how they grow; they neither toil nor spin; yet I tell you, even Solomon in all his glory was not arrayed like one of these. But if God so clothes the grass of the field, which today is alive and tomorrow is thrown into the oven, will he not much more clothe you, O men of little faith?

Therefore do not worry, saying, 'What shall we eat?' or 'What shall we drink?' or 'What shall we wear?'

For the godless seek all these things; and your heavenly Father knows that you need them all. But seek first his kingdom and his righteousness, and all these things shall be yours as well.

Therefore do not worry about tomorrow, for tomorrow will have its own worries. Each day has enough trouble of its own.

The life of St. Philaret the Merciful speaks volumes:

Righteous Philaret the Merciful, son of George and Anna, was raised in piety and the fear of God. He lived during the eighth century in the village of Amneia in the Paphlagonian district of Asia Minor. His wife, Theoseba, was from a rich and illustrious family, and they had three children: a son John, and daughters Hypatia and

Evanthia.

Philaret was a rich and illustrious dignitary, but he did not hoard his wealth. Knowing that many people suffered from poverty, he remembered the words of the Savior about the dread Last Judgment and about "these least ones" (Mt. 25:40); the the Apostle Paul's reminder that we will take nothing with us from this world (1 Tim 6:7); and the assertion of King David that the righteous would not be forsaken (Ps 36/37:25). Philaret, whose name means "lover of virtue," was famed for his love for the poor.

One day Ishmaelites [Arabs] attacked Paphlagonia, devastating the land and plundering the estate of Philaret. There remained only two oxen, a donkey, a cow with her calf, some beehives, and the house. But he also shared them with the poor. His wife reproached him for being heartless and unconcerned for his own family. Mildly, yet firmly he endured the reproaches of his wife and the jeers of his children. "I have hidden away riches and treasure," he told his family, "so much that it would be enough for you to feed and clothe yourselves, even if you lived a hundred years without working."

The saint's gifts always brought good to the recipient. Whoever received anything from him found that the gift would multiply, and that person would become rich. Knowing this, a certain man came to St Philaret asking for a calf so that he could start a herd. The cow missed its calf and began to bellow. Theoseba said to her husband, "You have no pity on us, you merciless man, but don't you feel sorry for the cow? You have separated her from her calf." The saint praised his wife, and agreed that it was not right to separate the cow and the calf. Therefore, he called the poor man to whom he had given the calf and told him to take the cow as well.

That year there was a famine, so St Philaret took the donkey and went to borrow six bushels of wheat from a friend of his. When he returned home, a poor man asked him for a little wheat, so he told his wife to give the man a bushel. Theoseba said, "First you must give a bushel to each of us in the family, then you can give away the rest as you choose." Philaretos then gave the man two bushels of wheat. Theoseba said sarcastically, "Give him half the load so you can share it." The saint measured out a third bushel and gave it to the man. Then Theoseba said, "Why don't you give him the bag, too, so he can

carry it?" He gave him the bag. The exasperated wife said, "Just to spite me, why not give him all the wheat." St Philaret did so.

Now the man was unable to lift the six bushels of wheat, so Theoseba told her husband to give him the donkey so he could carry the wheat home. Blessing his wife, Philaret gave the donkey to the man, who went home rejoicing. Theoseba and the children wept because they were hungry.

The Lord rewarded Philaret for his generosity: when the last measure of wheat was given away, a old friend sent him forty bushels. Theoseba kept most of the wheat for herself and the children, and the saint gave away his share to the poor and had nothing left. When his wife and children were eating, he would go to them and they gave him some food. Theoseba grumbled saying, "How long are you going to keep that treasure of yours hidden? Take it out so we can buy food with it."

During this time the Byzantine empress Irene (797-802) was seeking a bride for her son, the future emperor Constantine Porphyrogenitos (780-797). Therefore, emissaries were sent throughout all the Empire to find a suitable girl, and the envoys came to Amneia.

When Philaret and Theoseba learned that these most illustrious guests were to visit their house, Philaret was very happy, but Theoseba was sad, for they did not have enough food. But Philaret told his wife to light the fire and to decorate their home. Their neighbors, knowing that imperial envoys were expected, brought everything required for a rich feast.

The envoys were impressed by the saint's daughters and granddaughters. Seeing their beauty, their deportment, their clothing, and their admirable qualities, the envoys agreed that Philaret' granddaughter, Maria was exactly what they were looking for. This Maria exceeded all her rivals in quality and modesty and indeed became Constantine's wife, and the emperor rewarded Philaret.

Thus fame and riches returned to Philaret. But just as before, this holy lover of the poor generously distributed alms and provided a feast for the poor. He and his family served them at the meal. Everyone was astonished at his humility and said: "This is a man of God, a true disciple of Christ."

He ordered a servant to take three bags and fill one with gold, one with silver, and one with copper coins. When a beggar approached, Philaret ordered his servant to bring forth one of the bags, whichever God's providence would ordain. Then he would reach into the bag and give to each person, as much as God willed.

St Philaret refused to wear fine clothes, nor would he accept any imperial rank. He said it was enough for him to be called the grandfather of the Empress. The saint reached ninety years of age and knew his end was approaching. He went to the Rodolpheia ("The Judgment") monastery in Constantinople. He gave some gold to the Abbess and asked her to allow him to be buried there, saying that he would depart this life in ten days.

He returned home and became ill. On the tenth day he summoned his family, he exhorted them to imitate his love for the poor if they desired salvation. Then he fell asleep in the Lord. He died in the year 792 and was buried in the Rodolpheia Judgment monastery in Constantinople.

The appearance of a miracle after his death confirmed the sainthood of Righteous Philaret. As they bore the body of the saint to the cemetery, a certain man, possessed by the devil, followed the funeral procession and tried to overturn the coffin. When they reached the grave, the devil threw the man down on the ground and went out of him. Many other miracles and healings also took place at the grave of the saint.

After the death of the righteous Philaret, his wife Theoseba worked at restoring monasteries and churches devastated during a barbarian invasion.

This merciful saint trusted God the Spiritual Father. He cashed in on the promise, "Seek first the Kingdom of God and his perfect righteousness, and all these things shall be given to you as well."

In terms of [how to survive an economic depression](#), the right question to ask is *not*, "Do I have enough treasures stored up on earth?" but "Do I have enough treasures in Heaven?" And the merciful St. Philaret lived a life out of abundant treasure in Heaven.

The biggest thing we need right now is to know the point of life, which is to live the life of Heaven, not starting at death, but starting here on

earth. C.S. Lewis lectured to students on the eve of World War II when it looked like Western civilization was on the verge of permanent collapse. I won't try to repeat what he said beyond "Life has never been normal" and add that God's providence is for difficult circumstances every bit as much as when life seems normal. God's providence is how we can survive an economic depression. [The Sermon on the Mount](#) is no mere wish list only for when life that is perfect; it is meant for God's work with us even in circumstances we would not choose, *especially* in circumstances we would not choose, and speaks of the love of God the Spiritual Father who can and will work with us in an economic depression, if we will let him, and work with us no less than when life is easy.

(Some have said not only that God provides in rough times as well as easy times, but that God's providence is in fact clearer in rough times, such as an economic depression, than when things go our way and we can forget that we need a bit of help from above.)

God the Spiritual Father wants to use everything for our good. Everything he allows, everything in our lives, is either a blessing or a temptation that has been allowed for our strengthening. His purpose even in allowing rough things to happen is to help us grow up spiritually, and to make us Heavenly. [The Great Divorce](#) imagines a busload of people come from Hell to visit Heaven, and what happens is something much like what happens in our lives: they are offered Heaven and they do not realize Heaven is better than the seeds Hell that they keep clinging to because they are afraid to let go. Heaven and Hell are both real, but God does not send people to Hell. C.S. Lewis quotes someone saying that there are two kinds of people in this world: those who say to God, "Thy will be done," and those to whom God says, "*Thy* will be done," respecting their choice to choose Hell after Heaven has been freely offered to them. The gates of Hell are bolted and barred from the inside. Hellfire is nothing other than the Light of Heaven as experienced by those who reject the only possibility for living joy there is. And neither the reality of Heaven nor the state of mind we call Hell begins after death; their seeds grow on us in this training ground we call life. We can become saints, heavenly people like St. Philaret, or we can care only about ourselves and our own survival. God the Spiritual Father wants to shape us to be part of the beauty of Heaven, and everything he sends us is intended for that purpose. But in freedom he will let us veto his blessings and choose to be

in Hell.

Heaven is generous, and that generosity was something Heavenly that shone during the Great Depression. People who had very little shared. They shared money or food, if they had any. (And even if you have no money to share, you can share time; if you do not have a job, you can still volunteer.) St. Philaret shared because he knew something: "Knowing that many people suffered from poverty, he remembered the words of the Savior about the dread Last Judgment and about 'these least ones' (Mt. 25:40)..." In this part of the saint's life, the reference is to some of the most chilling words following [The Sermon on the Mount](#) in the Gospel:

When the Son of man comes in his glory, and all the angels with him, then he will sit on his glorious throne. Before him will be gathered all the nations, and he will separate them one from another as a shepherd separates the sheep from the goats, and he will place the sheep at his right hand, but the goats at the left. Then the King will say to those at his right hand, "Come, O blessed of my Father, inherit the kingdom prepared for you from the foundation of the world; for I was hungry and you gave me food, I was thirsty and you gave me drink, I was a stranger and you welcomed me, I was naked and you clothed me, I was sick and you visited me, I was in prison and you came to me.

Then the righteous will answer him, "Lord, when did we see thee hungry and feed thee, or thirsty and give thee drink? And when did we see thee a stranger and welcome thee, or naked and clothe thee? And when did we see thee sick or in prison and visit thee?"

And the King will answer them, "Truly, I say to you, as you did it to one of the least of these my brethren, you did it to me."

Then he will say to those at his left hand, "Depart from me, you cursed, into the eternal fire prepared for the devil and his angels; for I was hungry and you gave me no food, I was thirsty and you gave me no drink, I was a stranger and you did not welcome me, naked and you did not clothe me, sick and in prison and you did not visit me." Then they also will answer, "Lord, when did we see thee hungry or thirsty or a stranger or naked or sick or in prison, and did not minister to thee?"

Then he will answer them, "Truly, I say to you, as you did it not to one of the least of these you did it not to me "

ONE OF THE LEAST OF THESE, YOU DID IT NOT TO ME.

And they will go away into eternal punishment, but the righteous into eternal life.

St. Philaret the Merciful will be greeted before Christ's awesome judgment seat and hear, "Inherit the kingdom prepared for you from the foundation of the world, for I came to you and asked for a little wheat, and you gave me all six bushels you had, and your only donkey with them." God did provide, but the reward is not just that a friend gave him forty bushels of wheat. The ultimate reward is that Christ regards how St. Philaret treated other people as how he treated Christ himself, and because St. Philaret was merciful, there is a reward for him in Heaven, a reward so great that next to it, the forty bushels of wheat from his friend utterly pale in comparison.

Remember this next time you see a beggar. If you can't give a quarter, at least see if there is a kind word or a prayer you can give. This has everything to do with [how to survive an economic depression](#).

We are at a time with terrible prospects for earthly comfort, but take heart. Let me again quote Lewis: "Heaven cannot give earthly comfort, and earth cannot give earthly comfort either. In the end, Heavenly comfort is the only comfort to be had. To quote from my own [Silence: Organic Food for the Soul](#):

Do you worry? Is it terribly hard  
to get all your ducks in a row,  
to get yourself to a secure place  
where you have prepared for what might happen?  
Or does it look like you might lose your job,  
if you still have one?

[The Sermon on the Mount](#)

urges people to pray,  
"Give us this day our daily bread,"  
in an economy  
when unlike many homeless in the U.S. today,  
it was not obvious to many  
where they would get their next meal.  
And yet it was this [Sermon on the Mount](#)  
that tells us our Heavenly Father will provide for us,

and tells us not to worry:  
what we miss  
if we find this a bit puzzling,  
we who may have bank accounts, insurance, investments  
even if they are jeopardized right now,  
is that we are like a child with some clay,  
trying to satisfy ourselves by making a clay horse,  
with clay that never cooperates, never looks right,  
and obsessed with clay that is never good enough,  
we ignore and maybe fear  
the finger tapping us on our shoulder  
until with great trepidation we turn,  
and listen to the voice say,  
"Stop trying so hard. Let it go,"  
and follow our father  
as he gives us a warhorse.

This life is an apprenticeship, and even now, when we may be in situations we do not like, God is asking us to be apprentices, learning to be knights riding the warhorse he gives us *even in the situations we might not like*. The life of Heaven begins on earth, *even in an economic depression*.

However much power world leaders may have, God the Spiritual Father is sovereign, and their summits pale in comparison for the work God the Spiritual Father is working even now.

Why do the nations conspire,  
and the peoples plot in vain?  
The kings of the earth set themselves,  
and the rulers take counsel together,  
against the LORD and his Christ, saying,  
"Let us rip apart their religious restrictions,  
and throw off their shackles."  
He who sits in the heavens laughs;  
the LORD has them in derision.

[Psalms](#)

For the conqueror says: "By the strength of my hand I have done

it, and by my wisdom, for I have understanding; I have removed the boundaries of peoples, and have plundered their treasures; like a bull I have brought down those who sat on thrones. My hand has found like a nest the wealth of the peoples; and as men gather eggs that have been forsaken so I have gathered all the earth; and there was none that moved a wing, or opened the mouth, or chirped."

Shall the axe vaunt itself over him who hews with it, or the saw magnify itself against him who wields it? As if a rod should wield him who lifts it, or as if a staff should lift him who is not wood!

### [Isaiah](#)

World leaders may work his will as instruments or as sons, but they will always work his will. This is true in an economic depression as much as any other time. God the Spiritual Father rules the world as sovereign on a deeper level than we can imagine, and he works good out of everything to those who love him and are called according to his purpose to make them sons of God.

Some people really hope that if the right government programs are in place, we can get back on track to a better life. But even if governments have their place, "Put not your trust in princes," or rather, "Do not put your trust in governments," is not obsolete. Far from it: government initiatives cannot make everything better, even in the long haul, even with lots of time, sacrifices, and resources. But having given that bad news, I have good news too. Even if government initiatives fail to do what we want them to, we have God the Spiritual Father trying to give us the greatest good, and the time he offers us his will does not start sometime in the future: it is for *here*, and it is for **now**. He works his will alike through instruments like Satan and Judas, and sons like Peter and John, but in either case he works his will now, not sometime in the future when some human effort starts achieving results. Again, "We know that in everything God works for good with those who love him, who are called according to his purpose." "The king's heart is a stream of water in the hand of the Lord; he turns it wherever he will."

God and the Son of God became Man and the Son of Man that man might become god and the sons of God.

*St. Maximus Confessor*

There was one time when two theology professors were talking when the weather was very rough. One of them said, "This is the day that the Lord has made," and the other said, "Well, he's done better!" And the joke may be funny, but sun and rain, heat and cold, are all given by God. We miss something if we only think God is working with us if it is warm and sunny, if we find ourselves in a violent storm and assume God must have abandoned us, if it seems that God can't or won't help us because the weather is so bad.

And we are missing something if we look at the news and the world around us, and want to say, "This is the day that the Lord has made... he's done better!"

If we are in an economic depression, say, "This is the day that the Lord has made." You're missing something if you need to add, "Well, he's done better!"

A friend quoted to me when I was in a rough spot,

"Life's Tapestry"

Behind those golden clouds up there  
the Great One sews a priceless embroidery  
and since down below we walk  
we see, my child, the reverse view.

And consequently it is natural for the mind to see mistakes  
there where one must give thanks and glorify.

Wait as a Christian for that day to come  
where your soul a-wing will rip through the air  
and you shall see the embroidery of God  
from the good side  
and then... everything will seem to you to be a system and order.

And it is true. It is not just, as some have said, that *God's address is at the end of your rope*. That is where you meet God best. It may be easier, not harder, to find God and his providential care in an economic depression. God is working a plan of eternal glory. Westminster opens with the great question, "What is the chief end of man?" and answers, "To glorify God and enjoy him forever." But there is a deeper answer. *The chief end of man is to become Christ*. The chief end of man is to become by grace what Christ is by nature. God and the Son of God became Man

and the Son of Man that man and the sons of man might become gods and the sons of God. The Son of God became a man that men might become the sons of God. The divine became human that the human might become divine. This saying has rumbled down through the ages: not only the entire point of being human, but the entire point of each and every circumstance God the Spiritual Father allows to come to us, as a blessing or as a temptation allowed for our strengthening, as God's will working through instruments or sons, is to make us share in Christ's divinity, and [the saints' lives](#) show few saints who met this purpose when everything went their way, and a great many where God worked in them precisely in rough and painful circumstances. If we watch the news and say, "This is the day the Lord has made. Well, he's done better," try to open your eyes to the possibility that "Well, he's done better" is what people want to say when, in the words of C.S. Lewis in [The Chronicles of Narnia](#), "*Aslan is on the move.*"

Christ's Incarnation is humble. It began humbly, in the scandalous pregnancy of an unwed teen mother, and it unfolds humbly in our lives. Its humble unfolding in our lives comes perhaps best when we have rough times and rough lives, in circumstances we would not choose, in an economic depression above all. You do not understand Christ's Incarnation unless you understand that it is an Incarnation in humility, humble times, and humble conditions. You do not understand Christ's humble Incarnation until you understand that it did not stop when the Mother of God's scandalous pregnancy began: Christ's humble Incarnation unfolds and unfurls in the Church, in the Saints, and Christ wishes to be Incarnate in every one of us. Christ wishes to be Incarnate in all of us, not in the circumstances we would choose for ourselves, but in the circumstances we are in, when God the Spiritual Father works everything to good for his sons.

Take heart if this sounds hard, like a tall order to live up to. It is hard for me too. It is hard, very hard, or at least it is for me. But it is worth trying to live up to. Even if we do not always succeed.

God became man that man might become God. In whatever circumstances God gives us to train us, as God the Spiritual Father, let us grow as sons of God.

*In the name of the Father, and of the Son, and of the Holy Ghost.  
Amen.*

# **The Grinch Who Stole Christmas**

My dear Wormwood;

I still do not have your report on the status of the yearly festivals. As you have not informed me of the circumstances for several years, I may unfortunately be forced to demonstrate drastic consequences in the case that you fail again to even tell what is happening.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

It is about as well as could be expected. This is a time of festivities which we have very little difficulty turning the people away from; it is, also, one of the ones where there is joy and exuberance such that it is very difficult to introduce even a dead and ritualistic approach to ceremony. We have succeeded at least in enticing a handful of people to drunkenness and adultery on one hand, and on the others have slowly been building an interest in sorcery. I am currently contemplating the introduction of a number of grimoires to heighten the interest in spellcraft; unfortunately, this is the rare exception rather than the rule, and we can make very little progress with the great many. I suppose that we should expect greater success at other times of year.

Your nephew,  
Wormwood.

---

My dead Wormwood;  
YOU IDIOT!

You speak of getting a handful of people interested in spellcraft as a great achievement. Were you here, you would see that your letter caused me to engage in something not unlike men's prestidigitation; I immediately raised my arm and extended my middle finger.

So, you have enticed a tiny handful. Whoop-de-doo. Nobody minds that you've chopped down a tree or two, but we are here to burn a forest.

It is evident that your abysmal lack of understanding of temptation has produced the silliest possible results. If you are going to tempt a man, TEMPT him. A large shipment of spellbooks to devout people is not productive. Have you no idea why you are trained to masquerade as an angel of light?

Use the right tool for the right job.

I want a full analysis of the situation, and a preview of any ideas, just to ensure that you do not do anything dumber.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

It is the season when they celebrate the greatest gift they have ever received; namely, when the Enemy became one of them and died to create a way of escape from our trap of sin.

There are two basic intertwined ways in which they celebrate, and we have been able to do very little to stop either.

The first is by thanksgiving and enjoying what they have been given. They come to friends and family; they pray, sing songs, eat, drink, and be merry. A few we've managed to get drunk on the wassail or abstain from it as if it were an evil thing, but that is a chink here and there; we have had trouble making it larger. There is a wholehearted attitude of thanksgiving and worship at all the gifts which they've received; the time when we've set famine to take away some of their food only seems to make them all the more grateful and all the more prayerful.

The second is by giving each other gifts. Whether the gifts are simple or costly, they are heartfelt; they celebrate the gift given them by giving gifts to each other. Even in the lands where an evil duke has imposed harsh taxes on the peasant, so that they have little to give, their little gifts are taken as seriously as more lavish gifts from people who do have enough to live on.

I have been trying to deter them from the celebration and the gift giving, but results have been frustrating to the extreme.

Your nephew,  
Wormwood

---

My dear Wormwood;

Having taken some time to think, I should like to temper some of my previous remarks. Nor that your bungling incompetence does not warrant them, but I should like you to be better informed.

There is both an individual and a corporate side to sin. The individual side is of extreme importance. Our father below personally tempted Job, and it is not an understatement to say that every last person should be tempted as far as possible. By chipping at one tree at a time, it is possible to clear cut a forest. (The importance of the individual is so great that it may be an interesting temptation to make people appear to be nothing but individuals). When the temptations facing a society do not affect a person, it is perfectly acceptable to give some variation. Once in a while, even that can be worked into a good plan for even greater corporate sin. It is spectacular to have a few become prostitutes and a great many become Pharisees; a few become witches, and a great many become witch hunters.

As important as individual sin is, it is now your responsibility to see to corporate sin, and tempt the society as a whole.

There is something I should like to remind you about the nature of sin.

Man is created to embrace what is good. Even in his fallen state, even with the power that we hold over them, that man still somehow desires to embrace the good is so true that it dictates the nature of temptation. When we tempt, it is necessary to give a candy coating to that sin with what is good. Sexual sin is only possible when we twist the tremendous goodness of human sexuality; idolatry can not exist except as an exploitation of the need of man to worship the Enemy.

There is a time and a place to use intimidation, terror, and force, but your attempts here to either tempt solid believers with sorcery, or make their celebrations impossible by physical hardship, are clumsy and inappropriate. Gold which is passed through fire only grows purer; that is why you see their devotion flowering. Instead, why don't you appear as an angel of light and lull them to sleep?

There is a note about patience... Though occasionally we manage the sudden and sharp, it is much better in most cases (including this one) to work ever so slowly. So slowly that there doesn't seem to be any real progress; so slowly that everything appears to them to be as they want it

progress, so slowly that everything appears to them to be as they want it. If you suddenly hold a candle by a frog, it will jump away. If, instead, the frog is placed in a pot of cool water and the candle beneath the pot, it will never notice; nothing constrains it from jumping out, and yet you need only wait for the ever so slowly growing heat to destroy it. Be patient; wait for decades or centuries if need be.

Now stop wasting your energy on stupid spellbooks, droughts, and taxes. Take away these hardships; for now, I want you to only make things easier. Help their economic systems be productive; don't take away from the laughter at the feasts. If you find an opportunity to get someone drunk at a festival, then by all means take it, but don't worry about having things now. Just do as I have said, and wait.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

It is ten years now, and I have done as you have said. I do not understand why; they enjoy the festivities as much as ever, giving and receiving gifts in a manner that enjoys each other; enjoying each other in a manner that loves and worships the Enemy. By all counts, things have only gotten worse. Am I to continue to wait?

Your nephew,  
Wormwood

---

My dear Wormwood;

Patience, my dear. Patience. If you continue, you are making more progress than you think. Now, I still don't want you to do anything spectacular. Only give an idea to an inventor here, an economist there. Don't introduce anything nasty; just make the economic system more productive, and do nothing to impede their thoughts of giving generous gifts at this season.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

It is twenty years since I last wrote you, and I still do not see the point. People have more money; they are giving it generously. The hungry are fed; the naked are clothed. The season is one of great festivity, and, as ever, they give generous gifts. Am I to continue?

Your nephew,  
Wormwood

---

My dear Wormwood;  
Still, you need patience. Now, I want you to do two things:  
First of all, continue to increase the productivity of their economic system.

Second of all, without actively disparaging love for God or their neighbors, I want you to use the season to cause them to think about how good their material possessions are, and look forward to it.

Give it ten more years, and write back.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

I have succeeded in making them think about the goodness of their material possessions (which I still do not fully understand; most of the time, you have had me delude people into thinking that the material is evil and an obstruction to spiritual growth; I am now emphasizing that truth in the matter as you say, and I don't see any real progress). It is ten years; what should I do now?

Your nephew,  
Wormwood

---

My dear Wormwood;

Now, slowly, slightly, introduce seeds of greed. Not too much; just a little. And give them more money.

It is the time to twist, and everything you twist should be done, at least at first, in a slow and slight, imperceptible manner. Twist the good of the celebration and the presents just a little; that's all that it takes, for the moment. Just make the goodness of God and the gift the season celebrates seem less of an easy thing to think about than the goodness of all the material gifts.

Give it ten years or so, and write me back again.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

Wow. Though it's been slow, this work has been beginning to show some real results. Though every gift given by one person is a gift received by another, people are thinking of this much less as a time to give gifts, and much more as a time to receive them. I've now made it a major part of their economy; people are beginning to look forward very much to all of the Christmas gifts they can receive.

Should I continue as I have been?

Your nephew,  
Wormwood

---

My dear Wormwood;

There is something to be said about greed. Like most other sins, it produces satiety for the moment, but over time it yields only insatiety. Those who have enough and are content with what they have remain content; those who have much with greed grow more wealthy and less satisfied. More than that, many of those who have the most material possessions enjoy them the least; time to acquire possessions, and worry for them, becomes a consuming desire. A powerful chief executive officer who can buy anything he wants, will enjoy much less the leather seats of his Porsche, the view from his yacht, the beauty of his art collection, than many children of more modest means enjoy a chain of dandelions and a grape flavored lollipop.

Just continue, and put some serious thought into the trash that you teach them to prize. I could give more detail, but I think you're beginning to understand. Write me back in a few more years; tell me what happens.

Your affectionate uncle,  
Screwtape

---

Dear uncle Screwtape;

Things have really been taking off.

The holiday celebration has become a tremendous commercial extravaganza, the best time of year when people look forward to getting glowing plastic dolls and combination pizza oven/clothes dryers. I have gone wild with the items which are produced. I've made one device so that much of the time people spend "together" is distant and mechanical, with no eye contact and no touch. They now have, and look forward to ever more advanced entertainment devices with blinking lights and spectacular sound effects, bright and shiny enough to distract people the emptiness within, and ever becoming more effective. (You might also be pleased to learn of the content; although the type of devices would facilitate excellent strategy games, I've made graphic violence seem more and more attractive; a wonderful entertainment. Now I don't even have to be slow and patient in making a more realistic sadism; all that needs to be done is put somewhere in the storyline that you're the hero and morally justified in wading through blood. (I'm working on taking that away as well)) I'm making sure that the games are solitary by nature; you can't really play these games with your friends the way you can play cards, having a friendly chat as well as thinking about what to do as the next move. On a scale of glitz and convenience, they seem far more attractive than reading a book, holding a friend's hand, going for a walk, or having a relaxed meal together. I've been working on a faster, exciting, frantic pace for the entertainment, and people are "learning" that having fun means moving at a breakneck speed; leisure is beginning to be considered boring. There is a great air of celebration and festivity, and an air of gifts; the facade is tremendous.

I think that the festival is mostly under control. Should we make a shift in strategy?

Your nephew,  
Wormwood

---

My dear Wormwood;

Congratulations! You have passed this portion of your training with flying colors. Although I have more experience in this matter and have enjoyed many times sitting back and watching the flames as a society crumbles under the weight of its own sin, you have celebrated trivia to an extent that even I find astounding. My hat is off to you.

For now, your responsibilities (which you have made much easier) have been shifted; as you have so masterfully learned your lessons in corporate sin, it is now time for you to learn the next lesson. Your next area of training will be in the area of heresy, a battleground to which we are shifting focus.

I look forward to seeing what will come of your apprenticeship there.

Your affectionate uncle,  
Screwtape

# Halloween: A Solemn Farewell

I remember, from when I was a little boy, that I asked my parents some question about Halloween, and I was told that I would be welcome to dress up, but not as something occult or macabre, like a witch or a zombie. My Mom helped me put together several homemade costumes, and my parents accompanied me for years of trick-or-treating. I was, in essence, invited to celebrate Halloween as a secular holiday (in time, it became my second favorite holiday), but not to celebrate ghoulishness.

Some readers may see this as needless legalism about something harmless. A few Christians who have concerns about Halloween might wonder if I was being invited to participate in something un-Christian. But back in the eighties, where it was considered superstition to believe that witches really existed, my parents took seriously something that more people take seriously today: not everything about Halloween is trivial or absolutely harmless.

In retrospect, I am quite grateful for this decision, and I respect it, much as I appreciate their decision to limit my time watching television, while encouraging me to play outside, read books, and tinker with mechanical things. (I do not own a television now, and I am glad not to have one.)

Not, in particular, that I feel any guilt about dressing up as my favorite TV character (MacGyver), or creating homemade costumes, one of which won an award. But there seemed to be, if not absolute innocence, at least a grey area. There are many things I disagreed (and disagree) with my parents about, but I really saw no need to reconsider what my parents taught me here. Even if I was trying to smoke Halloween without inhaling

anything macabre, there seemed to be a reasonable case for this attempt to "smoke, but not inhale." I believed that I was succeeding in taking Halloween *à la carte* and dressing up without participating in anything either my parents or I would have objected to.

But something has changed. Even though it has again become fashionable for adults (as well as children) to dress up as Halloween, I am finding that I have concerns about what exactly it is that is fashionable. It seemed to be the sort of thing you could least give the benefit of the doubt, but that seems a harder benefit to give now. There are other things going on in this occult awakening; I would like to look at herbs. Perhaps people have thought of herbs simply as a seasoning for cooks to use. This is no longer true. It is no longer enough to say that people also see herbs as a natural alternative to chemically manufactured medicines, even if that is no doubt true. Herbs are part of a picture that is changing with a magical awakening. Seeing ads for herbs for witches' use and growing witches' gardens is the tip of an iceberg. Herbs are microcosm of a picture that is changing.

Before I go on, let me be very clear about something, as I am going to be talking a fair bit about herbs.

There is an old Orthodox saying that talks about spending Church money: "If you have two small coins, you use one to buy bread for the offering, and you use the other to buy flowers for the altar." The point isn't really about herbs, but it is entirely appropriate that herbs come to mind even when making a point that isn't really about herbs. A great many of the holiest things in Orthodoxy come from herbs: flowers to adorn the icons regularly, adorning the whole Church along with other herbs for the greatest festivities; herbal aromatic resins making incense; olive oil, mingled possibly with herbs, for every sacred anointing, wood as the most fitting material for icons, and bread and wine for the greatest and holiest rite there is. There is one rite labelled as the rite for the blessing of herbs, but herbs are blessed on a number of other occasions as well. Nature, including herbs, keeps coming up in the liturgy.

But you really cannot understand what this means until you come to the tale of herbs, if you remember that trees are herbs. I am thinking about two trees in particular.

One of these two trees was set in the center of a garden of unequalled splendor, and our first mother looked at its fruit with greedy spiritual lust, saw what the fruit could do, and then ate from it. She experienced a

lust, saw what the fruit could do, and then ate from it. She experienced a thrill of almost indescribable ecstasy, which quickly vanished into horror, despair, and misery. She had been created immortal, believed the words, "You shall be like gods," found that what was created godlike about her was slipping through her fingers, and felt the seed of death already working in her heart.

That is how our first mother fell. Her husband did no better, and Orthodox writers blame now one, now the other, but I am interested in something besides assigning blame.

That is not the last tree to bear fruit, nor is it the end of the story. The wound that came by the first tree had its answer and healing from the second tree. First there was a new Eve, who triumphed where the first had failed. Then the new Adam, fully God, fully man, whose life was a journey to not a living tree in paradise but a dead tree in a desolate place: for the Cross has been considered a tree from ancient times. But this last tree is ultimately transfigured to be the Tree of Life. We were forbidden to eat from the first tree. But the Tree of Life has its own fruit, and we are commanded to eat from its fruit.

Every herb that is part of the Church's blessings is an outpouring of that last herb, the Cross. We can and should feed on herbs. But it matters a great deal *which* herb we are feeding on. And Halloween has the taste of the fruit of the first tree.

I am concerned about the history of Halloween, *up to a point*. It is said that various pagan customs in a fight against Christianity, are at the root of almost every Halloween custom we have today—Christianity was shaped by martyrs who chose to be killed rather than offer just a pinch of incense in pagan sacrifice, and some have said that people would intimidate Christians by threatening offensive acts of vandalism unless they gave them food to use in pagan sacrifice, and that when we say "Trick or treat," we are carrying on a custom that began with a rather vile form of extortion.

This explanation may or may not be true, and my first thought—perhaps not the most Orthodox thought—was, "The origin of something is not its present meaning." A standard illustration is that shaking hands is a custom from the far past that was originally to prevent another person from drawing a weapon—a bit like reaching for a can of pepper spray. As such, it is a poor candidate for a friendly greeting. But it really seems hard to believe that learning something like this is a reason to try

to avoid shaking hands. And the fact that a particular practice has an origins Christians today might find vile is not decisive by itself. Even what those origins were is hard to tell, as the historical data are incomplete and highly ambiguous.

But there is another concern. Let's set aside murky questions about where Halloween comes from. There is the question of what Halloween is *now*, which is far less murky on several counts. Whatever the good, bad, known, or unknown roots of Halloween may be, in its present form it is associated with magic or ghoulishness—you're not barred from dressing up as something that is neither associated with the occult or ghoulishness, but you're stretching things a little. That much was true in my childhood. What was not true in my childhood is that Halloween is quickly becoming a second national holiday. When I was growing up, you could buy or rent costumes, but now there seem to be large, heavily-funded Halloween stores. There were yard decorations—not just pumpkins—during my childhood, and I remember putting up a package of imitation spider web. Today there are, as before Christmas, large and elaborate yard displays that are much more impressive than a snowman. But gone are the days when my parents seemed quaint for saying that magic is real and to be avoided, or just for taking magic seriously. Even a skeptic would need to be trying to be obtuse to deny that a lot of people are trying to be magicians of some sort.

I am grateful to my parents for giving Halloween the benefit of the doubt. There was really something special to me. But I am coming to a point of saying that appearances do not always deceive, and that a festival celebrating the spooky, a festival to dress up as zombies and witches and decorate with the macabre, and so on may in fact be a spiritual force, an appetizer, if you will, for the herb that gave our race the seed of death.

If one is trying to make an Orthodox response to Halloween, there is one obvious response of keeping out of the holiday and praying. Another Orthodox response to Halloween has been to have a parish party for all the children, inviting them to dress up as their patron saints. This decision may sound like a shallow change, but it shows wisdom and theological beauty. Trying to be like your patron saint is not just a day's make-believe, but a lifelong imitation and challenge. Your patron saint is to look out for you, praying before God. This adaptation is well-chosen, and is in the spirit of the original intent: "Halloween" abbreviates "Hallowe'en" "All Hallowe Eve" the evening of all hallowed people, holy

Hallowe'en , All Hallows Eve , the evening of all hallowed people, holy people, an evening that was in fact the beginning of All Saints' Day. And perhaps there are others.

But perhaps the best response Orthodoxy is not obvious if you are trying to think of something to do.

The spiritual world, in Orthodoxy, is never really far; we can be insensitive to it but never escape it. Orthodoxy provides not a single holiday each year but unfolding seasons and cycles of spiritual discipline and life as they encounter all kinds of spiritual realities. (Many people look for the spirit world to be closer at Halloween.) Death is important in Orthodoxy. Orthodoxy is a mystery of life in death, and to fail to be mindful of death is a profound spiritual failure. Even if Halloween eclipses Christmas, the Orthodox concern is not that people are too interested in death, but that people are not engaging death enough, and the ways we are engaging death are not nearly deep enough. Nor is the line in the living and the dead within the Church any terribly great chasm. But although these things are present in the Orthodox Church—woven into its fabric—they all rest in the protecting shade of the Tree of Life, and it is a protection that they all need. The concern is not at all that people are getting interested in spiritual phenomena, but that they are pursuing that interest in the wrong way, tasting from the herb that is poison when they could be eating their fill from the herb that is life and medicine and healing. It is a "treasure hunting" that consists of digging around to find a few copper coins hidden in a dark place... when there are piles of gold out in the open.

If Jack'o'lanterns have the origin I have heard, then they are not a pagan custom, at least not in the sense that Druids used them in worship. The candle is of Christian origin, and more specifically, made to be a frightening mockery of the candles in Christian worship. In Orthodoxy today, beeswax candles still illuminate icons, which have a spiritual radiance shining through. (Heaven shines out through them.) They can take time to connect with, but people can look at them and continue to see something for years. I would have trouble finding new layers in a Jack'o'lantern over years, and not only because they would go bad. It's not as deep a kind of thing. The difference between the two is like the difference between one of Bach's fugues, and Bart Simpson butchering an advertising jingle.

I do plan on dressing up for Halloween one last time. Call it, if nothing

else, a farewell, in addition to some more mundane reasons. It has been a cherished holiday for years. But only in the shallowest sense am I saying farewell to what I most valued about Halloween.

At Vespers, we chant, "The Lord is King; he has put on majesty." This "put on" is a translation of a Greek word, *enduno* (ενδυνω), a word of being equipped. The Epistle to the Ephesians tells us to "put on" full Heavenly armor that includes the breastplate of righteousness and the helmet of salvation. In Isaiah, it is God who puts on the breastplate of righteousness and the helmet of salvation for spiritual war. Not to put too fine a point it, but we have a command to put on God's own armor, and that is not all. At baptism, one of the most memorable parts is the verse chanted from Scripture, "As many as have been baptized in Christ, have put on Christ."

At an ordination, the ordinand is clothed in liturgical vestments that remain almost unchanged since Byzantine times when they were court regalia. But this is not a costume that people pretend for a day. The person is made into something new, and when the ordinand puts on the garments, he puts on a new blessing and sacred service. But it is a fundamental mistake to think that royal priesthood is only for those who are ordained and "wear vestments": the bishop is called to put on the regalia of the Byzantine Emperor, but the whole Church is called to put on Christ. This is no mere costume but a transformation of the highest order.

Perhaps we need to give up our Halloween costumes, to make room to put on something far greater: Christ himself. But that is not simply something to do about Halloween: it is the work of a lifetime and it includes the entirety of Christian practice. (Even if it might be a good idea to simply pray over Halloween.)

*With thanks to friends and family with whom I have discussed this.*

# The Hayward Nonstandard Test: An Interesting Failure

In recent years, I published what I then (and now) consider an interesting test. It was meant to look for indirect signs of profound giftedness. I wrote it with the hope that it would circumvent the ceiling of standard model tests, and I wouldn't have been surprised if it showed a floor above some other tests' ceilings. Let me cite the questions before continuing:

1. Describe who you are, how you see the world, and what your inner world is like.
2. Describe your most impressive and distinctive achievements.
3. Describe your most impressive and distinctive failures.
4. Describe what you hope/wish/want/intend to accomplish with your life. What do you believe you *will* accomplish?
5. What is your educational background? Include out of classroom learning you consider appropriate.
6. What is (are) your domain(s) of desired excellence? What is your work there? What have you achieved? What failures have you experienced?
7. Have you ever had management problems or been fired? If so, describe each time.
8. Describe any unusual or distinctive characteristics of your childhood

- physiology and physique.
9. What mental health diagnoses and misdiagnoses have been considered for you (that you are comfortable divulging)? Elaborate if desired; if there is information you'd prefer to omit, please say so.
  10. What are your interests?
  11. On a scale of -1.0 to 1.0, rate yourself on the dimensions of the Myers-Briggs test: E(-1) to I(1), S(-1) to N(1), T(-1) to F(1), P(-1) to J(1). Elaborate if desired.  
There are a few ways to take the Myers-Briggs test, one of the cheapest of which is to check out e.g. Kiersey's *Please Understand Me II* from the library; [the Kiersey web site](#) has assorted information online.
  12. What is one of your favorite books? Why? Elaborate.
  13. Provide a sample of your best writing.
  14. What is one of your most cherished of your creations? Explain. If feasible, include a copy; if not, describe.
  15. As a child or youth, what was one inconsistency you observed in the adult world that was painful?
  16. Describe, with examples, your sense of humor.
  17. Do you fit in (yes/no/question does not admit a yes or no answer for you)? Explain.
  18. Provide, and answer, one question that you believe will provide me with deep insight into your intelligence.
  19. Write your own short intelligence test.
  20. What else can you say to provide me with evidence of your intelligence?

Richard Feynmann's [Cargo Cult Science](#) address talks about the need to publicize failed experiments as well as successes. I am publishing results, not to claim a new success, but because in its failure it may be interesting. Someone else may find a refinement of the idea that works, or other lessons may be taken from its failure. This seems to be an interesting failure.

I received responses from four men, whom I will call Adam, Brandon, Charles, and David. I opened and read them at the same time to limit bias. Adam seemed gifted, around the top of the range of "optimum intelligence" where you have a definite advantage over others but aren't so different that it starts to really hurt. Brandon seemed just over the

so different that it starts to really hurt. Brandon seemed just over the edge; I hesitated in comparing them and finally placed Brandon slightly above Adam. Charles showed signs of real giftedness; earlier in life he had effectively solved a problem that it originally took Euler to solve. Charles struck me as profoundly gifted. Finally, if Charles showed brilliant complexity, David showed a simplicity on the other side of complexity. ("I wouldn't give a fig for the simplicity on this side of complexity, but I'd give my life for the simplicity on the other side of complexity.") In my notes, I compared his communication to how Richard Feynman closed the O-ring debate: "Feynmann, after people enquiring into the Challenger disaster had spent days arguing whether it was too cold for the O-rings, took an O-ring, swirled it around in his icewater, and pinched it, snapping it." David struck me as not only profoundly gifted but at a higher plateau than Charles's dazzling performance. Trying to describe the spread, I said that if the lowest score were a 1 and the highest were an 8, then I would give Adam 1, Brandon 2, Charles 6, and David 8. (I guessed numbers at 150, 155, 165, and 185; I intentionally did not reconcile these two sets of numbers.) Then I opened their prior test scores.

Charles had scores of 140-151, which I regarded as ceiling scores which did not provide useful information beyond being ceiling scores. Adam, Brandon, and David had highest prior scores of 168, 172, and 174 respectively. (I am inclined to lend more credence to the higher scores as it is more plausible to say that someone properly rated around 170 hit his head on the ceiling and scored around 130 than someone properly rated at 130 accidentally obtained a score around 170. I acknowledge that this could inflate my estimates.) After an hour or so of trying to convince myself I could interpret their scores so that they would say my test worked, I realised that my test found a significant difference where none was independently verified. Adam, Brandon, and David had highest scores well within measurement error of each other. Furthermore, Adam had consistently high scores: his lowest score was 156, while no one else had two scores above 155. Comparing with previous data, there was no positive correlation to prior test scores, and the person who looked best from previous scores was the person I'd ranked the lowest.

This does not necessarily mean my test is invalid. Four responses, three of which were within measurement error of each other, do not a norming make. Given that responses had appeared at a rate of about one

per year, it's not clear how long it would take to obtain a basis for a solid anchor norming, and if I would still be alive when enough responses had been completed. I opened the responses more on an intuition than anything else, and what I have is not a norming but an understanding of why it might not have been helpful to wait for enough responses for a norming. Furthermore, the fact that previous test data does not distinguish between them does *not* mean that they are at the same level. All four normees are bright enough to get ceiling scores on standardized tests. That leaves open the possibility of significant differences between them, including the possibility that Charles and David are appreciably brighter than Adam and Brandon. However, I am speaking about what is possible and not about claims that my results support. My results do not say anything positive about my ability to discriminate between responses. If there is anything interesting obtained from my test, it is not between responses but the fact that people responded at all. My website, [Jonathan's Corner \(Sitemap\)](#), averages between 500 and 1000 unique visitors per day, with an average of two people reading the test per day. Only four people responded in three years, with all of the normees being brilliant. That seems significant, and I'm not sure what all it means. Apart from that, no ability to discriminate usefully between scores has been established in the usual fashion.

## Summary of Responses

I would like to briefly describe the responses I received, both to provide an overall picture and to describe what I would single out in my evaluation. Here and elsewhere in the evaluation, I am intentionally using vague and generic descriptions rather than ones that are detailed and specific. This impoverishes the writing and gives a less valuable analysis, but I want to be cautious about confidence, and I expect that some of the people reading this will be quite good at connecting dots.

### **Adam**

Adam's response was three pages long, seemed candid (as did the others), and included achievements at state level. His responses answered the questions, but did not have the florid, ornate, wheels within wheels quality I associate with someone brilliant who is speaking on a topic he finds interesting. The content of his responses strikes me as reflecting more intelligence than the writing style: it was well-written, but did not reflect the "mental overflow" I was looking for. His list of interests was relatively short (twelve), and included a few items that do not specifically reflect intelligence. Several of his choices suggest noteworthy social maturity; this, combined with my losing track of how he opened his responses, led me to assume that he was more gifted than profoundly gifted.

### **Brandon**

Brandon's response was also three pages long, and showed the pain of the social disconnect which many profoundly gifted experience. His list of interests was also short, but the activities themselves more distinctively

suggest high intelligence. His general approach, in particular to society and authority, shows many of the signature traits David Kiersey (*Please Understand Me II: Temperament, Character, Intelligence*, Buffalo: Prometheus, 1998) describes in profiling the NT "rational" temperament. (Three out of the four normees were NTs, and all of them were strongly intuitive.) He also has an uncanny knack for guessing certain kinds of information—which is an anomaly that I'm not sure what to do with. The examples, however, did not leave me wanting attack the anomaly by pointing him to Thomas Gilovich's *How We Know What Isn't So* (New York: Free Press reprint, 1993). He showed a desire to use his mind to transform society that seems to be common among very bright people.

## Charles

Charles's response was twenty-seven pages of wheels within wheels. From the first page I was met with nuance that let me know I hadn't taken everything in on the first reading, despite it being well-written. He claimed not to have any distinctive achievements. This modest remark was followed by no fewer than eight pages of dense summaries of some of his theories. These theories were subtle. They had a logical and scientific character and a spark of something interesting that stretches outside the bounds of science. He used a nonstandard format that made their logical structure clearer—successfully modifying a familiar format to make an unfamiliar format that works better, which is difficult. In the pages of his response I met an edifice of thought which impressed me and which I knew I didn't understand. (I say this as someone who has put a lot of effort into understanding other people's belief systems.) His response to that question reminds me of a passage in my current novel:

The woman looked at me briefly. "What languages do you know?"  
If anything, I sank further back into my chair. I wished the question would go away. When she continued to listen, I waited for sluggish thoughts to congeal. "I... Fish, Shroud, Inscription, and Shadow are all spoken around my island, and I speak all of them well. I speak Starlight badly, despite the fact that they trade with our village frequently. I do not speak Stream well at all, even though it is known to many races of voyagers. I once translated a book from Boulder to Pedestal although that is hardly to be reckoned; it was

border to Russia, although that is hardy to be reckoned. It was obscure and technical, and it has nothing of the invisible subtlety of 'common' conversation. You know how—"

The man said, "Yes; something highly technical in a matter you understand is always easier to translate than children's talk. Go on."

"And—I created a special purpose language," I said, "to try to help a child who couldn't speak. I did my best, but it didn't work. I still don't understand why not. And I—" I tried to think, to remember if there were any languages I had omitted. Nothing returned to my mind.

I looked down and closed my eyes. "I'm sorry. I'm not very good with languages."

Charles listed approximately fifty different interests—which is less significant than it sounds, as he broke his interests down in more detail than the other normees, but the detailed breakdown strikes me as significant independent of its content. He was the one normee who answered the Myers-Briggs question in the mathematical format requested—which does not mean that he is the only normee who could do that task, but may suggest that he was the one person who didn't take a shortcut by "just using adjectives". I wrote the test to listen for a certain accent in how people respond, and his sense of humor showed that accent loud and strong.

He wrote a complete test which seemed to have a low ceiling, but was polished enough that I wouldn't be surprised to see something similar on the web, and he showed self-criticism in writing the test, acknowledging that it was culture-biased. The completeness and level of polish for that answer caught me off guard.

I was looking to be surprised in a certain way, and for reasons discussed above Charles gave me the kind of surprises I was looking for.

## **David**

David's response was twenty pages. He provided an extended writing sample, and (to my surprise) a complete transcript of grades from childhood. His answers were by far the most polished; they give the impression of finding, out of a large space of things that could be said, a microcosmic gem that encapsulates the whole space. Most of his

responses were short; the twenty pages stem from the length of his answers to a small number of questions.

Question 11, requesting Myers-Briggs personality type, contained a hidden question. I was interested in Myers-Briggs type, but most interested in whether the normee would question the test or talk about not fitting in the frame the Myers-Briggs test provides. David told his type en route to making a dismissive remark about the test. In other words, he was the one respondent who questioned the test. The most cherished creation he gave was one that showed a certain kind of mental fireworks, reminiscent of the dialogues in Douglas Hofstadter's *Gödel, Escher, Bach: An Eternal Golden Braid* (New York: Basic Books reprint, 1999).

David also surprised me, and I heard an accent of brilliance.

## Interesting Features

What are the distinctive features of my test? I would like to describe them below.

### Emphasis on Tacit Knowing

The way Western culture is shaped means that psychology tries to know its subject-matter with the same kind of knowing as physics has of its subject-matter, in other words I-It rather than I-Thou knowing that is depersonalised and banishes tacit knowing as far as possible. (Banishing anthropomorphism is appropriate when you're studying rocks. It's more debatable in trying to understand people.) When I was thinking about how to write up the experiment, before I looked at prior scores, one of the things I intended to compare was writing samples. Brandon offered a clever placeholder in place of a "real" composition. Adam provided some poetry that reminded me of fifth grade English reading; I objectively recognized quality but felt no subjective emotional response. Charles provided poetry that I wasn't sure I understood but none the less felt like something powerful was washing over me, and I was sorry when it ended. David sent a fiction excerpt that filled me with despair. The tone of the writing was not despairing; I felt the despair of being shown writing so perfect that I despaired of ever attaining that standard.

Why am I talking about my subjective emotional reactions instead of objective assessment? That is why I chose this specific example, instead of examples of thought that would have more to justify them from the framework that understands knowledge in depersonalized and objective terms. I choose it because I paid attention to subjective emotional reactions. I believe that they are tied to tacit and personal ways of knowing: I experienced subjective emotional reactions because I was

responding to different pieces of writing that were not of the same quality. Subjective emotional response is one of several things that can be a cue worth listening to.

(I am intentionally keeping the philosophy brief; the philosophical dimension involved in this topic is one that admits very long discussion.)

## **Listening for an Accent**

In most tests, there is a suite of questions meant to map out where a person's intelligence breaks down, and scoring is how many points total are earned. In this test, the questions do not represent a direct attempt to present difficulty in answering. The intent is rather to obtain a composite picture, and shed indirect light on how bright a person is. The assumption is that different levels of giftedness will leave a definite mark on a person, and that that definite mark is discernible through understanding the person. For one example, above a certain level, a person is so different from the majority of people that there is a social disconnect; children above IQ 170 tend to feel that they don't fit in *anywhere*. That kind of social disconnect was clearly discernible in all but one of the responses; Brandon clearly articulated it.

To some extent, that is corroborated by the data. I identified all of the normees as significantly gifted—which I had no reason to anticipate. The first norming of the Mega test had fewer than 10% of normees successfully answer any of the questions. (People who are emotionally insecure often attempt difficult tests to get an answer that may feel special; as the number of emotionally insecure people vastly outweighs the number of people at that level of giftedness, they "should" have been a small minority.) So I was able to recognize giftedness in all of the normees when I was not expecting it. That stated, the evidence does not warrant the conclusion that my test usefully discriminates among the normees.

## **Problems with the Norming and Test**

As this test, or at least this norming, has been a failure, it's worth paying attention to what went wrong.

### **Pool of Normees**

I have not done any real statistical analysis because there is no basis for analysis, and the statistics would only give a more precise quantification to the statement, "The measurement error exceeds the difference measured." Even if the four normees represented an optimal 120-140-160-180 spread, four points would be questionable. As is, the only conclusion I can confidently claim from prior test data is that all of the normees are at or above standardized test ceilings. In other words, data from previous tests do not provide a basis to claim that my test discriminates (and what correlation exists is negative).

### **Two Dimensions Flattened Into One**

Giftedness affects personality, but it is inadequate to simply say, "Giftedness is personality." There is diversity at each stratum of giftedness, and the normee pool did not permit the kind of two-dimensional analysis that would be needed to properly interpret responses (if there is a proper interpretation to be had).

### **An Invasive Test**

This test is invasive. It's painful and offensive. There is probably a way to attempt a similar operation much more gently and delicately. My guess

is that this, more than anything else, is why I only had four responses in three years. If this principle were put to serious use, it would have to be rethought so that it went about its aims with a far defter touch. (Or perhaps just remove certain questions.)

One question which I wonder is whether this offensiveness, which is partly an unedited form of giftedness, was the main reason why only brilliant men responded. The test's form may have been a powerful selector. So it would have put most people off. But that is not the whole story. Keep in mind that "reading" on a conscious or unconscious level is a two-way street, and the test reveals something significant about me as well as requesting revelation of the normee. A few very bright people, however, might be bothered by the invasiveness, but they recognize and respond to a voice that feels like home. It connects. That, at least, is speculation which seems plausible, but which I don't see how to support without writing a gentler test.

### **Not Personal Enough**

In one sense, this test was personal, too personal—it probed bluntly into things that are not polite to ask. In another sense, though, it related to the normees as objects to be studied, trying to dissect them as people but still dissecting them. It moves partway from I-It to I-Thou, but I believe it is possible to have a fuller I-Thou knowing, although I don't know what a fully I-Thou approach would be like. It could be argued that the questions are offensive because the test was not personal enough. In other words, the test reflected an attempt to understand people but not in a personal way. Furthermore, some of the philosophical merits to a personal approach may bear fruit if there were a more genuinely personal approach.

### **Lack of Checks**

The attempt to be objective tries to strip out everything subjective as a means to strip out subjective bias. Ideally one would want to allow subjective strengths while using another form of rigor to mitigate subjective bias, but I am not sure what that other and more difficult rigor would be; I have not solved that problem.

I requested responses to questions and personal information separately, so I wouldn't know whose material I was working with until after I had ranked the results. There was one normee for whom this attempted anonymization failed—David, whom I know and I hold in awe. I'd like to say that I didn't let this influence my estimation, but that's not true. As it is now, Adam's responses struck me as simple because it seemed what he was saying wasn't very big, and David's responses struck me as simplicity on the other side of complexity—something big in an elegant nutshell. Charles's responses struck me as complex, in other words as simply being big. I'd like to say that I was unbiased, and I didn't think "David answered, and I'm terribly impressed with him, so I'll put him highest," but I simply followed the argument where it led. I'd like to say that, but I can't. Maybe I should have ranked Charles highest. I'm vulnerable to accusation of bias at least here. And this kind of bias may be present in the attempt to understand another person—recognition is a risk.

## **Book Knowledge that Didn't Pan Out**

There's a reason why I asked about people's worst failures, and it's not because I like making people squirm.

Howard Gardner's *Extraordinary Minds* (New York: Basic Books reprint, 1998) is a multiple intelligence treatment of genius. One of the points that he talked about was failure—experiencing failures and being spurred on by them (120-123). Because of this, I was hoping to see discussion of trying and failing and trying and failing and trying and failing—like Edison's numerous failures en route to inventing a working light bulb. I believed that genius and those approaching genius not only are not immune to failure, but fail more often and more significantly than the vast majority of human beings.

This is a nice theory, and it may well be true, but the question based on it did not obtain informative answers for this purpose. I was expecting for normees at this level to see different degrees of failing in courageous projects (and in less glorious matters); I would not want to divulge what the normees shared, but if they did experience this pattern of life, I did not discern it in the replies. (This question should probably be removed in derivative work; the offensive questions seem less informative than I had expected.)

Another question was related to Leta Stetter Hollingworth's *Children Above 180 IQ: Stanford-Binet Origin and Development* (New York: Arno Press, 1975), in which Hollingworth claims that the children she studied were significantly above average size and weight for their age. I thought that the brighter respondents would share this distinctive physique. Only Brandon mentioned something along these lines, which means it might be useful as one piece of a large puzzle, but it was not the predictor I'd hoped. (There were other questions motivated by similar concerns.)

## A Successful Failure?

This test is a failure, or at very least my attempt to norm this test is a failure. Out of an estimated two thousand people that were aware of the test, only four responded, and the result is a statistically insignificant and negative correlation. I underestimated Adam in particular; if there is a lesson to be drawn from him, it is that it is possible to be brilliant while showing relatively few of the indirect traits this test sought to identify.

I was not looking forward to the prospect of writing delicate responses to a majority of normees who were insecure and of normal intelligence, and would approach difficult tests to have a big number that will make them feel OK about being human. That this did not happen touches on two reasons why I consider this an interesting failure:

1. Only brilliant normees responded. Therefore, while demonstrated ability to discriminate between answers is nonexistent, the fact of responding to the test is highly significant. There is an implicit hidden question: not, "What traits will distinguish your response?" but "Will you respond at all?"
2. I correctly identified all the respondents as significantly gifted. The lowest estimate I gave was a three sigma score. In other words, I correctly identified all respondents as being at or above the 99.9<sup>th</sup> percentile, even though this was contrary to my expectations.

This is also an interesting failure in that it attempts an inquiry that is based on a different principle. If it were not for confidence issues, I would likely publish the responses so that specific questions could be analyzed. It may be possible to make a hybrid test that combines traditional high-ceiling tests with this basic approach. The two approaches could be complementary.

Given that this is a first try, it may be better to label this approach as "Hasn't succeeded yet" than "Has failed." It would be surprising if this kind of distinctive approach succeeded on the first try. Furthermore, the way this norming failed suggests there's something in the approach.

There are several philosophical questions which admit interesting discussion. One of the more interesting questions is what alternatives to dealing with subjective bias exist besides trying to exclude *all* subjective elements (officially, at least: I suspect that good "objective" judgment has drawn on subjective strengths all along). Most of the philosophical aspects mentioned merit further inquiry.

I believe that Charlie and David are at a higher plateau than Adam and Brandon; data from other tests does not discriminate from them, but I have privileged external information that would place David above Adam. If they were to contact a third party who could corroborate that Adam and Brandon are at one high plateau and Charlie and David at a higher plateau, that would be reason to take a second look at the results.

I believe that the responses give a much richer picture of the person than a standard test. Someone, instead of asking, "Does this compete with traditional tests?" might ask, "What interesting data does this give that traditional tests don't?"

So this test is a failure, but an interesting failure, and perhaps even a successful failure.

# **Hayward's Unabridged Dictionary: A Free Online (Satire) Dictionary**

## **Preface**

Ambrose Bierce has created a most useful dictionary, serving the ever important function of drawing attention to that which people learn to ignore. I do not agree with all of what he says, but none the less consider it immensely valuable. It is my opinion that subtlety and wit are entirely too scarce. Sometimes this work is a bit caustic; unfortunately, gently worded points are often gently ignored. Bierce wrote that his work was addressed to people who "prefer dry wines to sweet, sense to sentiment, wit to humor and clean English to slang." This work is written preferring subtlety and allusion to the blatant, thought to convenience, and honesty to comfort.

I would not be entirely honest to claim that this work is entirely my own. Some of the ideas are bits and pieces I've picked up here and there; I have done the work of a compiler as well of that of an author. The writing style is, to some effect, borrowed. And, of course, the actual idea for such a dictionary is

not originally my own.

The definitions and aim are mostly theological, but occasionally dealing with some of the less agreeable aspects of American life. With apologies to Andy Rooney, there's probably something in here to offend anybody. I am not trying to cause a sting for the sake of causing a sting; rather, my hope in writing this is to be as the gadfly whom the Greek philosophers spoke of, with a sting that stirs people to thought and action. Where I point out problems, I believe that better is possible.

I could babble on for a few more pages, but it is my opinion that a frame does best not to be terribly gaudy and detract from the painting it holds. I believe that I've said enough, and that these definitions will introduce themselves.

---

A B C D E F G H I J K L M N O P Q R S T  
U V W X Y Z

**Abortion Rights Opponent**, *n.* The politically correct term for a person who holds and acts upon the conviction that an unborn child has at least a few rights which should be legally protected, notably the right not to be killed.

**Accuse**, *v.* To draw attention to another's similarity to oneself.

**Accusatory**, *adj.* Defensive.

**Acting**, *n.* A profession as different from politics as night is from day.

A member of the one profession puts on costumes and makeup, goes before cameras, dramatically reads lines written by someone else, and pretends to be someone that he isn't, providing unconvincing but amusing entertainment to millions.

A member of the other profession makes movies.

**Administration**, *n.* That body which is in charge of an organization, overseeing everything from personnel to organization to allocation of resources to wasting subordinates' time in meetings. The administration cares for the needs of the organization, placing those needs second only to its own needs, desires, and conveniences.

**Administratium**, *n.* A chemical element which makes plutonium look tame.

From the news release:

The p

#### NEW CHEMICAL ELEMENT DISCOVERED

The heaviest element known to science was recently discovered by investigators at a major U.S. research university. The element, tentatively named administratium, has no protons or electrons and thus has an atomic number of 0. However, it does have one neutron, 125 assistant neutrons, 75 vice neutrons and 111 assistant vice neutrons, which gives it an atomic mass of 312. These 312 particles are held together by a force that involves the continuous

exchange of meson-like particles called morons.

Since it has no electrons, administratium is inert. However, it can be detected chemically as it impedes every reaction it comes in contact with. According to the discoverers, a minute amount of administratium causes one reaction to take over four days to complete when it would have normally occurred in less than a second.

Administratium has a normal half-life of approximately three years, at which time it does not decay, but instead undergoes a reorganization in which assistant neutrons, vice neutrons and assistant vice neutrons exchange places. Some studies have shown that the atomic mass actually increases after each reorganization.

Research at other laboratories indicates that administratium occurs naturally in the atmosphere. It tends to concentrate at certain points such as government agencies, large corporations, and universities. It can usually be found in the newest, best appointed, and best maintained buildings.

Scientists point out that administratium is known to be toxic at any level of concentration and can easily destroy any productive reaction where it is allowed to accumulate. Attempts are being made to determine how administratium can be controlled to prevent irreversible damage, but results to date are not promising.

-Unknown

**Admirable**, *adj.* Embodying a virtue for whose absence the speaker excuses himself.

**Adult Bookstore**, *n.* A store offering books and movies which cater to infantile fantasies.

**Advertising**, *n.* (1) The fine art of lying to consumers about what is actually being sold. (2) A notable amendment of capitalist theory, whereby the market comes to favor, not the producers who sell the best product, but those who sell the best image. (3) A substantial misallocation of economic resources, whereby a

tremendous portion of the economy which could do something useful, is wasted. (This misfortune has the additional demerit of providing a substantial competitive edge to those who use it.) For example, for each packet of mixed vegetables sold at the supermarket, more money is spent to place a colored picture on the packet than actually goes to the farmer. (4) ...

**AI**, *n.* Artificial Intelligence. A form of artificially generated computer intelligence which has proved remarkably successful at tasks such as playing chess as well as a grandmaster, using integral calculus to solve problems, and examining blood test results to diagnose blood disorders more accurately than most doctors, and which has utterly failed at tasks such as answering rudimentary questions about the story told in an I Can Read Book.

**Allegory**, *n.* A song whose content we find far too embarrassing to believe could actually be a part of Holy Scripture.

**Alternate**, *adj.* Unacceptable, but shielded by the aegis of political correctness.

**America**, *n.* A great nation which like a melting pot; many ingredients come together in turbulent seething, those on the bottom get burned, and the scum rise to the top.

**American Catholic**, *n.* A conflation of 'American' and 'Catholic' in which 'American' takes precedence to 'Catholic'.

**Amplified Bible**, *n.* A new concept in translation theory, consisting largely of a word study crammed into a literal translation, listing possible meanings of words regardless of context. Thus the salad bar theologian is permitted to pick and choose the wording which will most emphatically support his point. Moreover, it avoids confusion by bracketed insertions, explaining what the author of the text failed to state clearly. Hence Mark 14:23 giving account of Jesus's actions at the Last Supper, says, "He also took a cup [of juice of grapes]..."

**Anathema**, *adj* and *n.* Consecrated and holy. The term originally denoted a special offering hanging in a temple, and has come to mean a degree of holiness which borders on superlative.

The Supreme Being is the most holy; the angels in his presence shield their faces so that they will not see him and be destroyed. Secondary to this is a degree of holiness such that

destroyed. Secondary to this is a degree of holiness such that anything which touches it must be destroyed. The Ark of the Covenant was holy; it was to be carried only with poles, and when Uzzah touched it in order to steady it, he was destroyed. The book of Joshua records an entire city of such sanctity that it was anathema; Achan stole goods from it, and fierce anger burned against the whole nation of Israel until he was destroyed.

It is possible for this sanctity to be conferred by benediction; one form used contains the words, "Let him be anathema..." That is to say, a person as well as an object can be so sacred and holy as to be anathema.

Commonly, this benediction is bestowed upon other believers. The present unity of the church is so complete that it is frequently bestowed upon other Christians whose beliefs legitimately differ slightly, and almost never bestowed on heretics.

**Anglicanism**, *n.* See *Catholic Lite*.

**Annoying**, *adj.* Popular among companies who wish to persuade you to purchase their goods or services.

**Annulment**, *n.* The form of divorce practiced by those who classify divorce as mortal sin.

**Anti-Realism**, *n.* Any one of a number of philosophical systems whose proponents believe themselves to have established the nature of knowledge and reality to be such that it is impossible to make any definitive statements about the nature of reality.

**Apocryphal**, *adj.* Hidden.

Originally, the term denoted the writings of certain mystery religions which were hidden from all who were not part of the elite of initiates, such as the Orthodox Book of Common Prayer. Over time, the word has shifted in meaning. It is the nature of Christianity to proclaim its truths, not to hide them; thus, there was no need for apocryphal books in the first sense. The term was applied to books which were hidden for another, entirely different, reason; namely, books which were excluded due to heretical content, such as James or the book of Ecclesiastes. There may be a second connection between the two usages of the word, but it is wisely left unmentioned.

**Appearance of Evil**, *n.* A bane which people will commit evil in order to avoid.

**Archaic**, *adj.* Reflecting the best and most enduring relics of centuries gone before. Said of practices, ideas, and language which reflect a belief that wisdom may be found in thoughts of the past as well as those of the present. A pejorative term.

**Arminianism**, *adj.* The school of thought opposite Calvinism. Named after Arminius, a theologian who was taught under Calvin's successor, Theodore Beza. Arminius began to depart from Calvin's doctrine by teaching conditional predestination, as contrasted to Beza, who emphatically taught limited atonement.

**Arranged marriage**, *n.* A marriage not chosen by the parties involved; arranged marriages exhibit far lower divorce rates than those voluntarily chosen.

That they be more successful is not really as strange as it may seem at first.

In America, you marry the girl you love; in India, you love the girl you marry.

-A man speaking in a video on Indian philosophy

There is a fundamental difference in how arranged and voluntarily chosen marriages tend to be approached. Voluntary marriages tend to be approached as "If I can just find the right person, we can live happily ever after."; arranged marriages are not approached with any delusions of being an effortless bliss or some sort of box that one can take things out of without putting anything into. But with poorer conditions — with a bride and groom that not only have not chosen each other, but have not necessarily met before the day of the wedding — people decide to make it work. Therefore it is not the lands of arranged marriages, but America, which is the land of divorce.

The difference between expecting something to be fruitful without any effort and without any sacrifice, and expecting something to be difficult (but choosing via effort and sacrifice to make it work) is a difference between disappointment and a

rewarding joy, and applies to much more of life than only marriage.

**Aspirin**, *n.* A drug used in the treatment of arthritis, commonly found in a container with a childproof cap.

**Atheism**, *n.* A religion requiring exceptional faith.

**Attention Span**, *n.* The length of time for which a person is able to maintain concentration. In most nations, a long attention span is valued as enabling understanding of well-developed, coherent, and complete arguments; in America,

**Automobile**, *n.* A transportation device hailed as the solution to the problem of providing transit without creating the pollution generated by a horse.

**AV**, *n.* Authorized Version. The Authorized Version, also known as the King James Version, is the original form of the Word of God. All subsequent paraphrases, while easier to read, are merely the word of man.

**Bachelor's Degree**, *n.* The primary degree offered by colleges attended as happy hunting grounds, such as Moody Bridal Institute.

**Ballista**, *n.* A device useful in the adjustment of sound systems playing elevator music.

**Beatitude**, *n.* A genre of didactic statement, used in the Sermon on the Mount.

Blessed are the ticklish,  
for the touch of a friend shall fill them with laughter.

-The Unauthorized Version

**Beautiful**, *adj.* Distorted and unnatural.

One of the enduring aspects of human culture is a tradition which universally establishes a single standard of beauty, one for the male body and (especially) one for the female.

There is some feature which may be attractive, and is exaggerated out of all proportion. Or, alternately, some feature which is unattractive, and is exaggerated out of all proportion.

Because a long and slender neck looks beautiful, a nice contrast to the thick bulges of a man's shape, there's a tribe in

Africa which uses copper braces to stretch out women's necks to be a foot long.

China, noting that men have big feet and a feminine shape involves small feet, has the practice of footbinding, using the one kind of footwear tighter than climbing boots in order to painfully keep feet from growing any larger than those of a little girl.

Recent anthropological findings report an obscure culture which has successfully made the transition from ridiculous to bombastic. It has decided that the roundness of feminine beauty should be replaced with the shape of a pre-pubescent boy, and reacted to modern technology by using the woman's body as a repository for gelatinous capsules.

**Beer Commercial**, *n.* The *reductio ad disgustum* of advertising's image of women.

**Bible**, *n.* A work high on the tolerant people's list of books to be burned.

We live in a pluralistic, multicultural society where young people raised according to the tenets of Hinduism, Islam, or the humanist philosophy of Bertrand Russel must feel as welcome as young people raised on the Bible. Our solution to this challenge is ingenious. Knowing that the vast majority of young people are profoundly ignorant of the Bhagavad Gita, or of the Koran, or for that matter of the philosophy of Bertrand Russel, we have decided in the interests of tolerance and pluralism to leave them equally ignorant of the Bible. Our young people enjoy a perfect democracy of ignorance.

-Literary critic Peter Marchand, commenting on the removal of the Bible from public school classrooms

**Billboard**, *n.* An eyesore which possesses the additional demerit of being a distraction to drivers.

Drivers who take their eyes off the road to read billboards should make sure that they're sufficiently

insured.

Just a thought.

-A billboard seen in Holland, Michigan

I think I shall never see  
a billboard lovely as a tree.  
Perhaps, unless the billboards fall  
I shall never see a tree at all.

-Ogden Nash

**Blind**, *adj.* Possessing eyes that do not see. The prophet Isaiah spoke of people having eyes that do not see and ears that do not hear. That prophecy has had numerous fulfillments; of chief contemporary relevance is current underinterpretation of Biblical teachings on wealth.

**Bombastic**, *adj.* Of, from, or pertaining to the PC-USA.

**Boot**, *n.* An ingenious device used to keep astronauts on the moon from floating away in space.

**Brainwashing**, *n.* A cold Big Brother's constant barrage of propoganda to people under his thumb.

One American who recently visited the People's Republic of China said that at first he wondered how people could tolerate the constant barrage of slogans on walls and radio telling everybody what to think. Then he realized that his own society reels under nonstop messages just as inane.

-Doris Janses, *Living More with Less*, on advertising

**Budweiser**, *n.* A headache in a bottle. The dog of beers.

With most beers, if you drink too much, you get a headache the day after. With Annheiser-Busch, you get a headache as you drink it.

-A German student, spring '95

**Bumber Sticker**, *n.* A tool to present the ludicrous as unassailable. One bumper sticker, for instance, reads:

PRO-CHOICE, PRO-CHILD  
EVERY CHILD A WANTED CHILD

This form of deep compassion is perhaps inspired by satirist fantasy author Terry Pratchett:

Give a man a fire and keep him warm for a day.  
Light a man on fire and he will be warm for rest of his life.

**Busy Signal**, *n.* An elegant sound designed to prepare the ear to listen to country and western.

**Cafeteria**, *n.* A refectory instrumental in the building of fine and upstanding young students. The meat builds muscle, the milk builds bones, and the rest builds character.

Friend: We're going to the cafeteria for dinner. Wanna come along?

Student: Sorry, but I'm trying not to lose weight.

**Canada**, *n.* See *Northern Wastes*.

**Canadian**, *adj.* and *n.* An anti-American American.

**Capital Punishment**, *n.* A form of sentence found in the most dangerous of first world nations, used by the government to intimidate criminals who have been taught that violence is the way to solve their problems.

**Category Mistake**, *n.* An assumption embodied in an inappropriate question, inquiring about an undefined attribute, such as, "Is yellow square or round?", "Is the doctrine of the Trinity calm or excited?", or "What was the point of that speech?"

**Catholic**, *adj.* and *n.* United, universal. Hence the Nicaene Creed, shared in common by nearly all believers, says "I believe in one holy Catholic and Apostolic Church." Today the term denotes one of three distinct branches of Christianity, the other two being Orthodox and Protestant. All present believers are

members of one branch and forbidden to receive communion with members of the other two.

**Catholic University**, *n.* An institution of higher learning that welcomes Orthodox students with open arms on the theory of, "The Church must breathe mustard gas with both lungs!"

**Causality**, *n.* The mechanism by which cause brings about effect, thoughtfully provided as a reminder to philosophers of who is in Heaven and who is on earth. The latter have responded by deciding under what bounds the former is permitted to operate.

**CD**, *n.* Compact Disc. Used to record musical works in accordance with the popular taste, the compact disc is a small, round plate made out of the same material as bulletproof windows. This is believed to be in anticipation of more sophisticated reactions to the material they contain.

**Ceremonial Law**, *n.* As established in the Pentateuch, an elaborate system of rules and regulations. Ceremonial law contained, of course, exacting detail governing the administration of rites and ceremonies, but also contained an intricate calendar of holy days, told which foods were clean and unclean, talked about objects which were consecrated and objects which were profane, described what haircuts were and weren't acceptable, and so on. Paul spoke of this in many places; in his epistle to the Colossians, he describes all of these things as shadows of the reality found in Christ. Christ nailed it to the cross, and the Church has raised it from the dead.

**Chalice**, *n.* A vessel used to hold drinks, which were sometimes augmented by various poisons.

Lady Astor (to Churchill): Winston Churchill, if I were your wife, I would put poison in your cup.

Churchill: Lady Astor, if you were my wife, I would drink it.

**Chaotic**, *adj.* Embodying chaos; uncontrolled and unpredictable. A chaotic situation is one in which presence of mind is good and absence of body is better.

**Checks-and-balances**, *n.* A system of government with power

divided between different branches, so that no one man or branch can hold too much power. This is accomplished by providing each branch with "checks" on the power of others, to maintain a "balance", in order that (once the government has grown sufficiently corrupt) the amount of good that one honest man can inflict is kept within tolerable bounds.

**Cheese**, *n.* The most important ingredient in good pizza and successful television programming.

**Childproof Cap**, *n.* A safety device preventing parents from opening certain containers without their children's assistance.

**Chivalry**, *n.* A time-honored code of conduct which, at a time when most men treated women as chattels, demanded as central to a man's honor that women be accorded deference, protection, and respect. Considered by modern feminism to be a bane.

**Christian Contemporary Music**, *n.* A genre of song designed primarily to impart sound teaching, such as the doctrine that we are sanctified by faith and not by good taste in music.

**Christian Film**, *n.* A mode of expressing Christian doctrine which uses the same essential communication strategy as hard-core porn, in that the form of storytelling leaves nothing to the imagination but the plot.

**Christian Science**, *n.* A system of doctrines with a name carefully chosen, word by word, in honor of the accuracy with which it describes the world.

**Christmas**, *n.* A yearly holiday celebrating the coming of the chief Deity of Western civilization: Mammon.

**Church**, *n.* An early substitute for America and the GOP.

**Circular Definition**, *n.* A definition which is circular.

**Civilization**, *n.* The state of living where people abide in cities rather than roam planes, conferring a respect for the value of human life not found among savages.

Reporter (To Gandhi): Mr. Gandhi, what do you think of Western civilization?

Gandhi: I think it would be a good idea.

**Classic**, *n.* A work which everybody wants to have read but nobody

wants to read.

**Closed-Minded**, *adj.* Possessing a mind which, like a pipe sealed on both ends, does not permit ideas to enter and leave. Contrasted with an open mind, which permits ideas to flow, like water through a pipe, entering and exiting without leaving any trace. There is perhaps a third prospect, of weighing and examining most ideas against a higher standard to grab firm hold of what is meritorious and worth keeping and reject what is twisted and mistaken, but this idea does not occur sufficiently often to merit its own word. Promoting open-mindedness is perhaps the single greatest achievement of current thought.

If Jesus Christ were to come today, people would not crucify him. They would ask him to dinner, and hear what he had to say, and make fun of it.

-Thomas Carlyle

**Coconut**, *n.* Positive proof that plant life has been affected by the Fall. See also: *Pistachio*, *Cashew*.

**Coffeehouse**, *n.* A location symbolic of the fake intellectual scene, where people sit over a cup of coffee and talk about how open-minded they think they are.

**Coin**, *n.* The smallest unit of currency. The coin generally bears something symbolic of the nature and perspective of the people who create it — what they value, what they think of. The highest coin in the United States bears a picture of a human being; the highest coin in Canada bears the image of a loon.

**Coincidence**, *n.* In television, a kind of event that happens to happen as often as people need it to.

**Collateral Damage**, *n.* Blood that flows like a river.

**Comedian**, *n.* An entertainer possessing every faculty relevant to amusement save the ability to be funny.

**Commentary**, *n.* A multivolume explanation of the meaning of a book, chapter, or (occasionally) single verse, such as Ecclesiastes 6:11.

**Commitment**, *n.* [*N.B.: definition pending upon completion of a search for relationships which are not viewed as temporary*]

*and disposable]*

**Committee, n.** The divine model of speedy application of resources to the point of need.

For God so loved the world, that he formed a committee, that whosoever attendeth on it should not perish, but have everlasting life in which to await a decision.

-The Unauthorized Version

**Common Sense, n.** An exceedingly uncommon commodity.

**Communist, n.** One of the money changers Jesus drove out of the temple.

**Company, n.** The associations a person is seen with, as a reflection of character. Keeping good company is one area where many Christians have gone above and beyond the example of Christ.

**Computer Error, n.** The juxtaposition of at least two purely human errors, one of which is attributing the problem to the computer.

**Congress, n.** A body of men whose sole purpose in existence is to pile law upon law upon law.

The fundamental belief embodied in this philosophy is that a nation at peace with itself is ordered and held together, not by love and true religion, nor by honor and morality, nor even by a minimal attempt to act according to Confucious's simple words, "Do not do unto others what you would not have them do unto you," but rather by the brute force of edicts issued by the sovereign.

Therefore, when the nation was first formed, and not only did held together but actually built itself up by leaps and bounds, the legislators believed it their duty to create laws. When the nation's growth began to slow and problems to increase, the legislators believed it their duty to attempt to improve the situation by creating laws. And now, as the nation is crumbling, when it is common for a mere child to carry a .45 caliber handgun because he does not feel safe at school, it is by the force of tax laws hundreds of pages long and penal codes

which the lawmakers themselves could not hope to read that the legislature seeks to stem the ever advancing tide of chaos.

The greater the number of laws and enactments, the greater the number of thieves and robbers.

-Lao Tzu, *Tao Te Ching*

**Conscience**, *n.* An early artifact formerly serving the purpose now fulfilled by harsh penalties assigned as punishment for getting caught.

**Conspicuous**, *adj.* Trying to act inconspicuous.

**Consumer Oriented Services**, *n.* Religion within the bounds of amusement.

This fundamental category mistake places church meetings not within the category of religious services designed to help people worship and grow, loving enough to give a gadfly's sting, but rather action-packed spectacles designed to attract people who are seeking amusement. Seminaries, far from warning against this, are actually promoting it.

This is, unfortunately, not a novelty. Like schools, and USA-TODAY, and so on and so forth, just one more segment of society in need of a swift kick in the pants from Neil Postman.

**Copyright**, *n.* A legal protection acquired for a piece of information, commonly used by the author or publisher of a book, program, et cetera, to secure benefit\$ from its use. While it is possible to be more lenient in what a copyright permits, that option ranks to many as an extremely gnu concept. Most commonly, all rights are reserved. Without the express written consent of the owner, *n.* part of the work may be be reproduced, stored in a retrieval system, or transmitted, in any form or by any means, electronic, mechanical, photocopying, recording, or biological.

**Corporate Ladder**, *n.* An awe inspiring structure which reaches to the clouds and leans against the wrong building.

By working hard for eight yours a day, you may get to be a boss and work hard for twelve hours a day.

-Mark Twain

**Crash Test**, *n.* A simulated collision, used to prove the safety superiority of larger and heavier cars by showing that they provide partial protection in an accident that a more maneuverable car would be able to avoid.

**Creativity**, *n.* An attribute which is admired and praised in figures of the past.

**Cult**, *n.* An aberrant group whose bizarre practices deviate from what is established and considered normative. Etymologically, the word signifies worship.

**Cybertechnology**, *n.* Technology which enters into the body, such as an artificial heart or robotic arm.

At present, a surgeon has access to books upon books of procedures designed to restore function to a hand injured, and yet not one procedure designed to improve the function of a hand uninjured. Cybertechnology which is not remedial — a replacement for a defective heart or severed limb being examples of remedial cybertechnology — is essentially the property of science fiction writers, who allow all manner of incredible technology to enter the body.

The prime exception, if it is to be counted as such, is chemical. There exist drugs which exert special impact on the body. Most are used in medical fashion — an antibiotic or some other such function — but there are a few which act to improve the function of a person in health. It was observed that smoking cigarettes causes people to breathe more deeply. Realizing this, and understanding the importance of oxygen to a developing child, doctors advised pregnant women to smoke. There are many other drugs which bring a similar improvement. The use of cocaine is a wonderful way to deal with depression, and the use of massive amounts of anabolic steroids brings an unequalled boost to athletic prowess.

This present lexicographer looks with great anticipation to the day when the cybertechnology described in novels may become commonplace.

**Dance**, *n.* An activity of joy and celebration given numerous references in Scripture (none of which are negative), now

considered by staunch Christians to be demonic if enjoyed in community.

**Dark Sucker**, *n.* Supposedly, an alternative understanding of a light source.

This jesting theory states that darkness is something which obscures vision; we are able to see when the darkness is sucked out. Eventually, the dark suckers become full of darkness and themselves become dark; this explains why incandescent bulbs, fluorescent tubes, and candles universally turn dark when they cease to function.

The theory was probably devised by an electrical engineer, who wanted to do something silly while taking a break from drawing circuit diagrams.

**Dating**, *n.* A sequence of miniature marriages, complete with miniature sex, ending in miniature divorces.

**Democracy**, *n.* [Gk. *demos*, people, *cratein*, to rule. No connection to the etymology of 'demon'] A Utopian form of government based on the twin assumptions that the majority will generally do what is noble, just, and true, and that mass persuasion techniques cannot be used to set aside good judgement.

Man's capacity for justice makes democracy possible, but man's inclination to injustice makes democracy necessary.

-Reinhold Niebuhr

It has been said that television is an example of democracy at its ugliest; there is no accountability, and people tend to watch something other than what they would publicly be seen as associating with. It is a degenerating morass, increasingly portraying sexual sin as harmless and bloodshed as an amusing sport; recent years have seen the network television premiere of America's first made-for-TV war. It was wrong of the Evil Empire to define a just war as anything which advances the cause of communism; we know that a war is only justified if it makes the world safe for freedom and democracy. Were that war not to have been fought, Kuwaiti refugees would still be

stranded in the surrounding nations' disco parlors. We would not have been able to restore the tyranny and human rights violations of the Kuwaiti ruling family, nor, more importantly, implement important alterations to the infrastructure of Baghdad to better deal with the problem of overpopulation. All of this is necessary to be able to listen to a child's shattered dreams, and then explain why Daddy isn't coming home.

For the majority to oppress the minority is perfectly democratic; the condition for democracy is the desire of the majority, a consideration independent of right and wrong. In perhaps the most spectacular debacle of all, Adolf Hitler rose to power in Germany, through means which can only be described as unimpeachably democratic.

**Eloquence**, *n.* The art of persuading fools that white is the color that it appears to be. It includes the gift of making any color appear white.

-Ambrose Bierce, *The Devil's Dictionary*.

**Demon Rum**, *n.* An unfortunate by-product of Jesus's first miracle.

**Denomination**, *n.* A group of schismatics whose conduct we find to be in accordance with Scripture.

**Department of Defense**, *n.* A Ministry of War continually involved in operations which have little or nothing to do with the integrity of national borders.

**Deus Ex Machina**, *n.* [Lat. *deus*, god, *ex*, out of; from, *machina*, machine] (1) In fiction, an unrealistic solution to a problem, which miraculously works. For example, a poor family's financial struggles finding resolution in the death of a hitherto unknown relative who willed them his wealthy estate. (2) In nonfiction, an unrealistic technological solution to a problem with its origin in the evil within the human heart, which miraculously fails. For example, infanticide on demand as a solution for the contempt for children which causes child abuse.

**Dictator**, *n.* An evil man who maintains power by intimidation and force, refusing to obey the United States.

**Dinosaur**, *n.* An immense prehistoric beast with a mental capacity

lower than that of a field mouse. Figuratively, the term is used in a very pejorative manner by computer scientists, in reference to annoying machines which have miniscule capabilities and take inordinate amounts of time to do anything useful.

Dinosaurs typically make obnoxious noises, and are bulky eyesores with glowing green against a somewhat darker but none the less nauseating background. For all the disagreeable things in American culture, we have learned the importance of teaching computer literacy to young children.

**Disclaimer**, *n.* A kind of publisher's preface accompanying books, advertisements, et cetera, for the edification of any lawyers who may happen to read the work. Most disclaimers are either patently false, as the disclaimer by cigarette manufacturers that colorful advertisements sporting cartoon characters are not meant to attract the attention of children, or blatantly obvious, as the following words found before many novels:

This is a work of fiction. The characters and plot of this story are solely the product of the author's imagination. Any resemblance to the personality or actions of any person, living or dead, is purely coincidental.

**Dishonesty**, *n.* A condition which is considered a vice until it is channeled into the virtuous and proper bounds of tact.

**Dispensationalism**, *n.* Systematic theology as an excuse for lack of faith.

**Divorce**, *n.* A legalized form of child abuse.

**DOS**, *n.* Disk Operating System. A set of programs offering crude disk operations, frequently confused with a complete and robust operating system.

A master was explaining the nature of Tao to one of his novices, "The Tao is embodied in all software — no matter how insignificant," said the master.

"Is the Tao in a hand-held calculator?" asked the novice.

"It is." came the reply.

"Is the Tao in a video game?"

"The Tao is even in a video game," said the master.

"And is the Tao in the DOS for a personal computer?"  
The master coughed and shifted his position slightly.  
"The lesson is over for today."

-Geoffrey James, *The Tao of Programming*, 4.3

**Doubt**, *n.* The cornerstone of the four cardinal virtues of classical modernity.

**DoxaSoma**, *n.* The Christian spiritual practice of meditative prayer through exercise, balance, and body posture. (Minimum 85% recycled from Hindu spiritual practices.)

**Driver's License**, *n.* A form of identification required in order to legally purchase alcoholic beverages.

**Dystopia**, *n.* Utopian theory in practice.

**Easter**, *n.* The highest point of the Christian calendar, named after the Babylonian whore goddess.

**Edifice**, *n.* A building antedating the advent of the Bauhaus aesthetic.

**Educated**, *adj.* Unemployed with a degree.

**Education Party**, *n.* The party which nominated for important office a man lacking sufficient training to spell personal names or those of common household items.

**Eh?**, *tic.* See *Like*.

**Eighteen**, *n.* In the eyes of the United States government, the number of years which constitute the age of accountability. At this age, a person is no longer treated as a child, but as a mature adult with sound judgment. Eighteen years is old enough to give a signature that bears legal weight without the approval of a legal guardian, old enough to decide the fate of a human life or nation by serving as a juror on a capital case or by casting a vote, old enough to enlist or be conscripted to military service, old enough to kill enemy soldiers and old enough to die in combat, but too young and immature to visit a restaurant and enjoy a glass of wine with dinner.

**Eisegesis**, *n.* Reading one's meaning into a text, as distinguished from exegesis, drawing the meaning out of a text. It is interesting to note that the people most skilled in eisegesis,

particularly as it pertains to Scripture, do not generally understand the distinction.

**Electricity**, *n.* A modern convenience which, when combined with running water, is capable of making life very inconvenient.

**Element**, *n.* The basic building blocks of which all matter is built. According to the ancient Greeks, there were four elements: Earth, Air, Fire, and Water. Science has progressed beyond that; matter generally consists of atoms, the ultimate, indivisible unit. Atoms in turn are built of more fundamental and elementary particles, and the elementary particles combine in various ways to generate the forms of matter we know of — Solid, Liquid, Gas, and Plasma.

**Embarrassment**, *n.* The one fly in the ointment that it is hoped that opponents won't notice. In general, attempts are made to discredit embarrassments, the results of which can frequently be very amusing to watch. Fortunately, there is an exception if the embarrassment comes from Scripture. Holy Scripture is recognized to be God-breathed, and any embarrassing passage is taken very seriously; exegetes attempt to discern the passage's true meaning through careful reading and detailed word studies.

Man will occasionally stumble over the truth, but most of the time he will pick himself up and continue on.

-Winston Churchill

**Enlightenment**, *n.* The beginning of the fall of Western civilization and thought.

**Environmentalist**, *n.* One devoted to a particular political agenda, regardless of its impact on the environment.

A recent project at Argonne National Laboratory was working on a new generation of nuclear reactor which would be in many ways a dream come true. Its design would be such that meltdown would be physically impossible. It could run on nuclear waste from other plants, not only generating power but reducing them to material which would become harmless in a matter of roughly a century, rather than millions of years. It

could run on nuclear warheads, thus not only providing a safe and permanent manner to dispose of some of the most appalling and destructive devices ever created, but so doing in a manner which would provide useful energy to hospitals and families; a beautiful picture of what it means to beat swords into ploughshares.

However, it is still nuclear, and, in the eyes of environmentalism, all nuclear power is evil and must be stopped at any cost. This project was, most definitely, stopped at any cost. It was terminated at great monetary cost; it was nearing completion, and, now that it was ready to be tested on different materials, those materials must be disposed of, at a cost of ninety-four million dollars more than it would have cost to complete. It was terminated at great environmental cost; those materials are dangerous nuclear wastes, and, though they were going to be made harmless, they must now be disposed of in established manners; that is to say, function as the nuclear waste that environmentalists so adamantly oppose. However, they stopped something bearing the dirty 'n' word, so environmentalists are now happy.

It is at least fortunate that environmentalists do not yet have the means to extinguish the sun.

**Episcopalianism**, *n.* A most interesting combination of Catholic and Protestant, quite effectively combining the worst of both worlds.

**Euphemasia**, *n.* In writing, choice of words and phrases that skillfully dance around what they mean. This avoids offending people, and puts any alternative certainty of the work being taken seriously out of its state of being differently happy.

**Evangelical**, *n.* A believer who is devoted to the doctrine of Sola Scriptura and verse by verse study of Scripture. The Great Commission is at the center of their ethics, and they believe in proclaiming Christ by deed as well as word. Thus many of them wisely abide by prohibitions, against dangerous things such as the following: card games, drinking, dancing, movies, swearing... While none of these are technically outlawed by Scripture, they are thought to be good ideas entirely in

accordance with its essential teaching, as reflected in verses such as the following: Ps. 149:3, Eccl. 9:7, II Cor. 4:6, Gal. 1:6-8, 3:1-2, 5:1, 12,18,22-25, Eph. 2:15, Col. 2:8,13-14,16,20-23, I Thes. 5:19, I Tim. 4:1-5.

**Evil**, *n.* That which is twisted, depraved, and wicked.

Once upon a time, a king wished that his people know what evil was, so that his people could learn to recognize and flee from it. He issued a summons, that, in a year, all of his artists should come to him with one picture, to show what was evil. The best picture would be displayed to the people.

In a year, they all appeared at the king's palace. There were very few artists in the kingdom, but those who were there were very skillful, and worked as they had never worked before. Each brought a picture beneath a shroud.

The king turned to the first artist who had come. "Jesse, unveil your picture, and tell us its interpretation."

Jesse lifted the cloth. Against a background of blackened skulls was a dark green serpent, the color of venom and poison, with eyes that glowed red. "Your Majesty, it was the Serpent whose treacherous venom deceived man to eat of the forbidden fruit. The eye is the lamp of the body, and the Serpent's eye burns with the fires of Hell. You see that beyond the Serpent are skulls. Evil ensnares unto death and outer darkness."

The court murmured its approval. The picture was striking, and spoke its lesson well. The king, also, approved. "Well done, Jesse. If another picture is chosen, it will not be because you have done poorly. Now, Gallio, please show us your work."

Gallio unveiled his painting. In it was a man, his face red and veins bulging from hate. In his hand, he held a curved dagger. He was slowly advancing towards a woman, cowering in fear. "Your Majesty, man is created in the image of God, and human life is sacred. Thus the way we are to love God is often by loving our neighbor. There are few blasphemies more unholy than murder. You have asked me for a picture to show what evil is, that your subjects may flee from it. This is evil to flee from."

The court again murmured its approval, and the king began to shift slightly. It was not, as some supposed, because of the repellent nature of the pictures, but because he had secretly

repellent nature of the pictures, but because he had secretly hoped that there would be only one good picture. Now, it was evident that the decision would not be so simple. "Gallio, you have also done well. And Simon, your picture?"

Simon unveiled his picture, and people later swore that they could smell a stench. There, in the picture, was the most hideous and misshapen beast they had ever seen. Its proportions were distorted, and its colors were ghastly. The left eye was green, and taller than it was wide. The right eye was even larger than the left, red, bloodshot, and flowing with blood; where there should have been a pupil, a claw grotesquely protruded. It was covered with claws, teeth, fur, scales, blood, slime, tentacles, and bits of rotted flesh; several members of the court excused themselves. "However it may be disguised, evil is that which is sick, distorted, and ugly."

There was a long silence. Finally, the king spoke again. "I see that there are three powerful pictures of evil, any one of which is easily a masterpiece and well fit to show to the people. Barak, I know that you have been given artistic genius, and that perhaps your picture will help me with this difficult decision. Unveil your picture."

Barak unveiled his picture, and an awestruck hush fell over the court. There, unveiled, was the most beautiful picture they had ever seen.

The picture was in the great vault of a room in a celestial palace. It was carved of diamond, emerald, ruby, jasper, amethyst, sardonyx, and chrysolite. Through the walls of gem, the stars shone brightly. But all of this was nothing, compared to the creature in the room.

He carried with him power and majesty. He looked something like a man, but bore glory beyond intense. His face shone like the sun blazing in full force, his eyes flashed like lightning, and his hair like radiant flame. He wore a robe that looked as if it had been woven from solid light. In his left hand was a luminous book, written in letters of gold, and in his right hand was a sharp, double edged sword, sheathed in fire and lightning.

The king was stunned. It took him a long time to find words,

and then he shouted with all of his might.

"You fool! I ask you for a picture of evil, and you bring me this! It is true that fools rush in where angels fear to tread, and that, like unthinking beasts, they do not hesitate to slander the glorious ones. What do you have to say for yourself and for this picture? I shall have an explanation now, or I shall have your head!"

Barak looked up, a tear trickling down his cheek. "Your Majesty, do you not understand? It is a picture of Satan."

**Exaggerate**, *v.* In satire, to tell a frog, as if it were the present, a plausible description of what the water may be like in a few minutes.

**Excuse**, *n.* A statement which serves as evidence of a guilty conscience.

**Explanation**, *n.* An account of a situation which does not threaten the speaker's prejudice.

In George MacDonald's *The Princess and the Goblin*, princess Irene gets lost in her mountain home and finds a mysterious grandmother, who gives her a silver ring attached to an invisibly fine strand of spider-silk, and tells her that if she follows the thread Irene will find her grandmother's room. One time, Irene gets lost and follows the thread out of the house, in and out of all kinds of dark and unfamiliar caverns deep inside a goblin-infested mountain. She finds the imprisoned miner-boy Curdie and brings him to her grandmother. Curdie follows along, but cannot believe her strange account: even in the room where Irene claims to be speaking with her grandmother, Curdie sees only a dark and dirty garret. A bitter argument ensues, and Curdie returns home, vexed.

His mother coaxes the explanation out of him:

Then Curdie made a clean breast of it, and told them everything.

They all sat silent for some time, pondering the strange tale. At last Curdie's mother spoke.

"You confess, my boy," she said, "there is something about the whole affair you do not understand?"

"Yes of course mother " he answered "I cannot

Yes, of course, Mother," he answered. "I cannot understand how a child knowing nothing about the mountain, or even that I was shut up in it, should come all that way alone, straight to where I was; and then, after getting me out of the hole, lead me out of the mountain too, where I should not have known a step of the way if it had been as light as in the open air."

"Then you have no right to say what she told you was not true. She did not take you out, and she must have had something to guide her: why not a thread as well as a rope, or anything else? There is something you cannot explain, and her explanation may be the right one."

"It's no explanation at all, Mother; and I can't believe it. Darwinism is the only game in town."

**Fallenness**, *n.* The defining characteristic of the present human condition. C.S. Lewis spoke wisely:

There are two types of people in this world:  
those who say to God, "Thy will be done,"  
and those to whom God says, "Thy will be done."

Herein may be found the explanation for most of human history.

**Familiar**, *adj.* Considered to be safe and good.

**Fashion**, *n.* The progressive self-revelation of the imago dei.

**Fast**, *n.* A New Testament practice which most current-day Christians have quickly disposed of.

**Fast Food**, *n.* An enterprise which pioneered the use of disposable polystyrene packaging, which was useful and convenient to the customer on the go. Now, due to consumer pressure, the fast food industry is genuinely concerned about the environment. The packaging presently used is biodegradable. The contents, unfortunately, are not.

**Fat Free**, *adj.* See *Taste Free*.

**Feminism**, *n.* Like most philosophical and ideological currents, truth gone mad.

Feminism at its heart embodies a substantial truth — that women have historically been treated as second class citizens (if

women have historically been treated as second class citizens (if even that), and that no society can call itself just while conducting business as usual — and its development tells many other truths: love, nurturance, and cooperation are foundational virtues in the life of a society; emotion is an integral part of being human; human relationships and community are important; porn degrades women and children, and promotes rape; no means no.

However, both first wave feminism (which sought equality on existing terms) and second wave feminism (which seeks to completely redefine the terms of equality) make statements that, if carried to their logical conclusions, are absolute madness. (To which many feminists would reply that logic is a tool of male oppression.)

At the root of this is a failure to identify the moral structure of the universe as ordered by a God who is the ultimate of masculinity — more Yang than Yin — and a failure to recognize femininity as a created good which, by its very nature, does not and should not order the universe. First wave feminism did not understand the differences between masculine and feminine; the second wave sees all good in terms of the feminine and all evil in terms of the masculine.

Thus is embarked upon a project to remake society (which consists entirely of male oppression) into a world of feminine good. The results vary from the comedic to the destructive — and end up to be at least as baneful to women as men.

To be swept away are all of the classics of literature and philosophy: their purpose is to justify the exploitation of women. Men's languages are to be replaced by feminine tongues; they revolve around logic rather than emotion, and are cruelly imposed on little girls before they can learn to communicate by their own natures. Never mind that women talk more than men, or that the study of languages is dominated by women. Our languages are oppressive. Newton's *Principia Mathematica*, the landmark work which laid out the foundations of calculus, is "Newton's rape manual."

Of course, nearly all movements have a lunatic fringe, but it is unnecessary to look at feminism's fringes to see the

destructive. Many, many women are told to regard *every* man as a potential rapist. Trust is essential to every human relationship; it is a building block as foundational as love and honesty. Yet feminism believes it in the best interest of women to regard every moment with every man as potentially turning into one of the deepest and inhuman violations possible; this means that they are to spend every moment with every man in unending fear.

Furthermore, at least a certain form of feminism, like multiculturalism, relativism, etc. in that they form a core of orthodoxy which the herd of free thinkers is shocked and indignant to see someone go against. Never mind, for example, that early feminism and the present black womanist movement found and find abortion to be unacceptable; anyone who stands against the legality of abortion is an abortion rights foe (just imagine what would happen if anyone used language that loaded in reference to a liberal...) who stands in the way of what can only be seen as a woman's private rights over her own body. Never mind that other cultures — even those which have had substantial impact from other peoples — are not multicultural and do not see the multiplicity of existant cultures as suggesting that everything is arbitrary, no one way of thinking or acting to be preferred over any other; the existence of other cultures which see things differently is proof that everything is an arbitrary matter for which there can be no standard of judgement. (Never mind that there are a great many things, such as the Natural Law and the absence of our optimistic belief in human progress, which remain remarkably constant across various cultures and ages.) And relativism, of course, means relativism on some very specific points — namely, everything that forms a part of this core of orthodoxy is something that no open-minded person could seriously question, and every belief which could substantially challenge the core of orthodoxy is a relative and subjective opinion which anybody may hold on condition that it is not actually believed to be true. Upon even a few minutes of inspection, it would appear that these beliefs are not only furnished by a zeal not matched by thought, but are not even internally consistent.

even internally consistent.

But all of this doesn't really matter, because feminism and its cousins are not meant to be thought about; only fought for.

With allies and a supporting movement like this, what woman needs enemies?

**Filiopatros Clause**, *n.* An exceedingly poor excuse for a schism.

**Flag**, *n.* See *Idol*.

**Flashlight**, *n.* An instrument of imperception which obscures vision by producing a concentrated glare at one point which is sufficiently intense to prevent the user from seeing anything else. Environmentalists have brought the cleverness of this device one step further by producing the solar powered flashlight.

**Foetus**, *n.* A very young child whom it is deemed expedient to consider to be otherwise.

**Form**, *n.* A piece of paper used as by administrations to deter people from using their services. It is the opinion of this lexicographer that the following form could be of the utmost assistance in helping bureaucracies more effectively serve those under their care.

## **Form to Request Information in the Form of a Form**

### **Section 1: Personal Information**

**Name:** \_\_\_\_\_ **Sex:** [ ]M [ ]F

**Date of Birth:** \_\_\_/\_\_\_/\_\_\_

**Social Security Number:** \_\_\_\_ - \_\_\_\_ - \_\_\_\_\_

**Driver's License Number:** \_\_\_\_ - \_\_\_\_ - \_\_\_\_\_

**VISA/MasterCard Number:** \_\_\_\_ - \_\_\_\_ - \_\_\_\_ - \_\_\_\_\_

**Mailing Address, Business:**

**Street:** \_\_\_\_\_

**City:** \_\_\_\_\_ **State:** \_\_ **ZIP Code:** \_\_\_\_\_

**Mailing Address, Home:**

**Street:** \_\_\_\_\_

**City:** \_\_\_\_\_ **State:** \_\_ **ZIP Code:** \_\_\_\_\_

**Telephone, Work:** (\_\_\_\_) \_\_\_\_ - \_\_\_\_\_, Ext. \_\_\_\_\_

**Telephone, Home:** (\_\_\_\_) \_\_\_\_ - \_\_\_\_\_

**Telephone, Car:** (\_\_\_\_) \_\_\_\_ - \_\_\_\_\_

**Beeper:** (\_\_\_\_) \_\_\_\_ - \_\_\_\_\_ **Chicago High School:** [ ]Y [

]N

**E-mail Address:**

---

(if address is in domain aol.com or webtv.net, please explain on a separate sheet of paper)

**Height:** \_\_', \_\_" **Weight:** \_\_\_\_# **Hair:** \_\_\_\_\_ **Eyes:** \_\_\_\_\_ **Blood type:** \_\_ **IQ:** \_\_

**Political Affiliation:** [ ]Federalist [ ]Republican [ ]Democrat [ ]Libertarian [ ]Monarchist [ ]Socialist [ ]Marxist [ ]Communist [ ]Nazi [ ]Fascist [ ]Anarchist [ ]Other (Please specify: \_\_\_\_\_)

**Citizenship:** [ ]United States, including Canada and other territories [ ]Mexico [ ]California [ ]Other (Please specify: \_\_\_\_\_)

**Race:** [ ]Caucasian/Pigmentally Challenged [ ]African [ ]Asian [ ]Hispanic/Latino [ ]Amerindian [ ]Heinz-57 [ ]Other (Please specify: \_\_\_\_\_) [ ]An athletic event where people run around an oval again and again and again.

Page 1 \* End of Section 1 of 3

**Section 2: Form Description**

**Length of Form, in Characters:** \_\_\_\_\_

**Number of Questions or Required Data:** \_\_\_\_\_

**Expected Time to Complete:** \_\_ Hours, \_\_ Minutes, \_\_ Seconds.

**Expected Mental Effort Required to Complete:** \_\_\_\_\_ (if form would insult the intelligence of a senile hamster, please explain on a separate sheet of paper)

**Expected number of questions judged to be annoying, unnecessary, and/or personally offensive:** \_\_

**Expected time wasted on questions judged to be annoying, unnecessary, and/or personally offensive:** \_\_ Hours, \_\_ Minutes, \_\_ Seconds.

**Expected blood pressure increase while filling out form:** \_\_ mmHg systolic, \_\_ mmHg diastolic.

If further contemplation has led you to believe that

if further contemplation has led you to believe that some of the questions asked are not strictly necessary to provide the service that you offer upon completion of said form, please enclose revised prototype here.

Page 2 \* End of Section 2 of 3

### **Section 3: Essay Questions**

Please explain, in 500 words or less, your philosophy concerning the use of forms.

Please explain, in 200 words or less, why you designed this form as you did.

Please explain, in 300 words or less, why you believe that this form is necessary. If you are in a service oriented sector and desire to require the form of people you serve, please explain why you believe that requiring people to fill out forms constitutes a service to them.

When this form is completed, please return to the address provided. The Committee for Selecting Forms will carefully examine your case and delegate responsibility to an appropriate subcommittee.

Please allow approximately six to eight weeks for the appointed subcommittee to lose your file in a paper shuffle.

Page 3 \* End of Section 3 of 3

**Formal Equivalent**, *n.* The style of translation favored by those who hold the highest view of Scripture. The philosophy of formal equivalence justly realizes the secondary place the transmission of ideas, themes, and sagas holds to the importance of direct renderings of individual words and the preservation of the original word order. Even those who attempt to render thought for thought pay due homage to formal equivalence in their renderings of metaphors in that most highly respected of books, the Song of Songs.

**FORTTRAN**, *n.* See *BASIC*.

**Free**, *adj.* Complimentary with your purchase of an item overpriced by more than the value of the gift.

**Freedom, n.** One of the foundational aspects of the Christian walk. Its proper understanding is one of the pivotal themes of Galatians, a book which refutes a heresy that shocked Paul so greatly that he skipped the usual pleasantries in beginning his letter. There are two major historical interpretations, both of which (in some form or other) can claim many orthodox adherents.

The first, the libertine interpretation, states that, due to grace and forgiveness, there are really no behaviors a Christian should avoid. Hence the believer is free to participate in orgies, free to have conduct dictated by an addiction, free to touch molten iron, and so on.

The second, the Judaizing interpretation, states that grace and forgiveness make sense only if there is such a thing as sin, and have an extensive list of sins to avoid. At the same time, the essence of their teaching is freedom. Hence the believer is free (at least one day in seven) to drop an article of clothing once every few steps, free to have conduct dictated by a written code of rules, free to become castrated, and so on.

Both of these emphasize freedom as the center of their walk. There is rumored to be a third interpretation, but it does not claim enough adherents to be worth explaining.

**Gadfly, n.** A sage who speaks with honesty which is universally appreciated and rewarded with unequalled travel opportunities.

**Gang, n.** A group of armed cowards found in major cities, fighting for control of streets and drug money, and intimidating and beating up whoever they think they can get away with, beating up whoever they don't like, and so on, as contrasted to the activities of the police department.

**Garrotte, n.** An early predecessor to the modern necktie.

**Gay Theology, n.** An abhorrent system of supposed interpretation, which serves only to excuse away the Word of God and abridge the moral requirements of the Gospel in order to permit a lifestyle which is a perversion of nature and a stench in God's nostrils, as contrasted to the beliefs and practices of good, prosperous, normal American Christians.

**Gentleman, n.** A man. The term embodies a degree of respect, and

reflects a particular ideal of manhood.

Perhaps best summarized in the words, "A gentleman is a gentle man," this ideal did not hold that manhood was to be measured by the ability to carry a Gatling gun, demolish buildings, and kill people. The ideal rather had something to do with being gentle.

It is perchance because of this that the term is increasingly considered to be an archaism.

**Geometry**, *n.* [Gk. *geo*, earth, *metros*, measure] A branch of mathematics flowing out of the ancient Greeks' desire to measure the earth. It was adopted by the medieval Scholastics as a means of preparing the mind for the study of theology; their study of geometry often found its culmination when the student crossed the Bridge of Asses. Followers in this tradition held the ancient, Euclidean development of geometry to be God's geometry. They refused to accept as legitimate other axiomatic systems, vigorously attacking Riemannian geometry, which has axioms describing curved rather than flat surfaces.

**Gerrymandering**, *n.* In modern democracy, the fine art of manipulating certain parts (known as districts) of an ancient artifact from the days before computers, called the Electoral College. Properly done gerrymandering will increase the weight of some votes and nullify the effect of others, in order to ensure with near certainty that elections will yield the outcome desired by the incumbents.

**Golf**, *n.* A sport so named because all of the other four letter words were taken.

**Goto**, *v.* The F-bomb of programming language constructs. It has been observed, "A programmer is someone who, when told to 'Go to Hell,' is offended, not by the 'Hell', but by the 'goto.'" See also: *Pointer*.

**Government**, *n.* One of several areas the subject of an insightful philosophical commentary entitled the Tao Te Ching. Composed in China by Lao Tzu in 500 BC, it paints a picture of government that is like acting; only bad acting draws attention to itself, and the best acting causes the observer to forget the fact that he is watching actors. This book is the origin of the

words, "Running a big government is like frying a small fish," popular among Republicans. (There are also statements that Democrats would like, but Democrats do not believe in reading books) A small fish is fried without being cut up or cleaned; that is to say, with a minimum of interference. Hence Republicans like to quote the words as a reason to avoid spending money on social programs and other uses that they dislike (spending ample money on programs that they do like, such as military expenditures and subsidies for environmentally destructive business, is, of course, exempt). Although this may not have been the original intent of the words, there is another significant way in which running a big government is like frying a small fish: it is very inefficient.

**GIMP**, *n.* Greatly Irritating Mystification Program. Proof that a graphical user interface can be every bit as arcane, uncontrollable, and frustrating as *any* text interface.

**Gnosticism**, *n.* A major Early Christian era heresy. At its root, Gnosticism contained the idea that the spiritual is good, but the physical is evil.

Perhaps the most deadly aspect of Gnostic error was the denial of Christ's manhood. Knowing that Christ was fully divine, and believing that the physical was evil, Gnostics deduced that Christ could not possibly have been a carnal creature like you and me with real, tangible flesh. They even went so far as to declare Christ's body to be an illusion.

Only slightly less problematic was the denial of the fact that God himself created the material world as good. The Psalms thank him for his gifts of bread, oil, and wine; the depths of the sea and the stars of the sky declare the glory of their Creator; Paul quoted the Psalms as saying, "The earth is the Lord's, and everything in it," encouraging believers to eat whatever was sold in the meat market without raising any question on ground of conscience. So far from believing that the material world was created by God as good, some Gnostics went so far as to state that Satan created it when God wasn't looking; they embraced a patently false dichotomy between the physical and the spiritual. The word 'scathing' is perhaps an understatement in describing some of Paul's reactions:

#### SOME OF PAUL'S REACTIONS.

Now, the Spirit expressly says that in later times, some will renounce the faith, paying attention to deceitful spirits and the teachings of demons, through the hypocrisy of liars whose consciences are seared with a hot iron. They forbid marriage and demand abstinence from foods, which God created to be received by those who believe and know the truth. For everything created by God is good, and nothing is to be rejected, for it is sanctified by God's word and by prayer.

I Tim 4:1-5, NRSV

Gnostic heresy has, fortunately, been eradicated, and the church's abstemiousness ever since serves as an inspiration to us all.

**Gospel According to Thomas**, *n.* An ancient writing representing the full, second century development of Gnostic thought, now subject to consideration for inclusion as a canonical writing.

**Grace**, *n.* The one blessing that people strive to earn more than any other.

**Grammarian**, *n.* A person who studies the most common patterns of word order as they appear in language. After they are catalogued, the descriptions become ossified and canonical prescriptions; anyone who dare write in a manner contrary to the grammarian's edict because such writing seems more natural or fluid is corrected, and, if impenitent, blacklisted.

Heckler (to Churchill): Mr. Churchill, you end far too many of your sentences with prepositions.

Churchill: I take all sorts of criticism in this business, but that is the sort of criticism up with which I shall not put!

**Great Commission**, *n.* A commandment of Christ taken to be central by believers who live and die in fulfillment of his words in Matthew 23:15:

All authority in Heaven and on Earth has been given unto me. Go therefore, and make converts of all nations, baptizing them in the name of the Father, and of the Son, and of the Holy Spirit. And I will be with you always, to the end of the age.

-The Up-to-date International Version

**Guard**, *n.* (1) An armed brute entrusted with the responsibility of keeping people from escaping imprisonment. (2) A complete set of rules around the insufficient set established in Scripture, given limited support in I Cor. 4:6 and Deut. 4:2. Due to the fallenness of human nature, the fact that we do not live in a perfect world, and the powerlessness of the Holy Spirit, the naive and simplistic ideas generated by God's inferior wisdom are not enough; a guard around the law is necessary in order to prevent transgression against the moral laws. While few have managed to duplicate the exacting precision and completeness of the Pharisees' Guard around the Law, it must be said that there are many who are carrying on their worthy tradition.

Being instated as an archangel, Satan made himself multifariously objectionable and was finally expelled from Heaven. Halfway in his descent he paused, bent his head in thought a moment and at last went back. "There is one favor I should like to ask," said he.

"Name it."

"Man, I understand, is about to be created. He will need laws."

"What, wretch! you his appointed adversary, charged from the dawn of eternity with hatred of his soul—you ask for the right to make his laws?"

"Pardon; what I have to ask is that he be permitted to make them himself."

It was so ordered.

-Ambrose Bierce, *The Devil's Dictionary*

**Happiness**, *n.* A state which is created by some wherever they go, and by others whenever they go.

**Haemorrhoid**, *n.* See *Boil*.

**Hatred**, *n.* The coward's response to the unknown.

**Heretic**, *n.* One who, while appreciating the overall truth of the Christian message, is wiser than God and recognizes certain errors in orthodox theology. These errors usually occur at some point where God misinterpreted the nature of love.

Jesus summarized the Law in the commandments to love God and neighbor, and the teaching of the Apostles retained this; we are bestowed grace, the outpouring of God's love, a love which is to transform and fill us. Love for neighbor is so important that, oftentimes, the way to love God is through obeying the commandment "Love your neighbor"; in the Sermon on the Mount, Jesus said, "If you are in the temple offering a sacrifice and remember that your brother has something against you, go, leave your sacrifice on the altar, and be reconciled with your brother." Heretics have generally retained an understanding of the central importance of love for a neighbor, and offer a better way to do so.

It seems, as time passes, that the zeitgeist is a continual source of heresy. Of course, it is not the only one, and most major heresies have been able to claim at least a few adherents for most of time, but the spirit of the time seems to aid the most people in recognizing that the Bible is an old book, and bring Christian thought and application of the Law of Love into accord with the most recent discoveries.

In the nineteenth century and early twentieth, the law of the jungle was understood, and lovingly applied to human affairs. In the wild, only the strong shall survive. It seems harsh, but is far more merciful than mercy. It is sad for a weakling to be killed, it is conceded, but necessary; if the weaklings survive to pass on their inferior genes, it is whole future generations which are doomed to be weakened, and experience a slow and painful death. Mercy is penny wise and pound foolish. Even when people aren't killed, there is often something to be done to make sure that they do not infest future generations with their inferior seed; hence the involuntary sterilization of the mentally

inferior seed, hence the involuntary sterilization of the mentally retarded. By eliminating mercy, and allowing all those who would pass genetic disease and infirmity to be preyed upon, it is possible to ensure that future generations are strong, healthy, and happy; this was believed to be the best way to apply love.

Now, even among people who believe casuistry to be the best way to adhere to moral imperatives, that misinterpretation is passe. It is recognized that people are equal and have a right to live, and that different is not necessarily evil. From this, it is deduced that being different automatically precludes the possibility of evil, and, if people are equal, then all tendencies are equally good, equally consistent with a state of health and fullness of life, equally resultant from the state of a person in good physical, mental, and spiritual health. Paul was mistaken when he, having declared redemption for sinners and a life of freedom and joy to those who submit their sinfulness to God's grace, declared homosexual practice to be inconsonant with holy living. Past generations were wrong to burn homosexuals at the stake; we avoid their error by recognizing that homosexual practice was created by God as good, as evidenced by the words from Genesis which Jesus quoted to answer the question about divorce: "He created them male and female."

**Highway**, *n.* A route of transit more dangerous than airplanes at the height of terrorist crises, calmly travelled by people who would never set foot inside a jet.

**Hillsboro Baptist Church**, *n.* Christianity's biggest gift to gay advocacy yet.

**Holocaust**, *n.* One of the most revolting moments in history, when Hitler murdered six million Jews. In the midst of this horrible tragedy, we have learned lessons which will never be forgotten. We have learned to do a better job of ignoring genocide, as we have done for half a dozen other events which exceed the number of Jews Hitler destroyed, or at least use a better name, like 'ethnic cleansing'.

**Holy War**, *n.* A war which is especially unholy.

**Homo Sapiens**, *n.* [Lat. man the knowing] The scientific name for man.

Common men seem to have no difficulty deciding, "Is that

entity over there a man or a beast?"

To scientists and philosophers, though, it is not such a straightforward question. They are in pursuit of the one action which sets apart man from the beasts.

Some value technology, measuring the progress of a civilization's culture, morality, and character by the machines it produces. Thus, the distinguishing feature between man and beast is the ability to use tools. But even some birds use twigs in order to get food.

Now, language seems to be the prime locus of attention. The distinguishing feature is the use of words, that is symbols, to communicate. But dolphins do that. So it's really the ability to put words or symbols together in new grammatical combinations — or at least was, until it was discovered that a chimpanzee can do that, too.

This present lexicographer is unaware of any beasts which consider it necessary to spend time arguing about what it is that sets them apart from other species, let alone understand doing and being, accident and substance, well enough to confuse them.

**Honest**, *adj.* Addicted to the reprehensible habit of seeing and explaining things as they are, rather than as they ought to be. The progress of civilization and technology are rapidly advancing to the point of being able to cure this unfortunate condition.

One of the last well known sufferers of this madness was the late Ambrose Bierce, a lexicographer of singular wit and deficient sense. His appreciation for many things which hold great merit — resource, the wisdom of the public nonsensus, the goodness of human nature, the American dream — was indubitably stunted by the twin vices of insight and metacognition. A few characteristic samples of his misguided ravings are here given:

**Compulsion**, *n.* The eloquence of power.

**Forefinger**, *n.* The finger commonly used in pointing out two malefactors.

**Hovel**, *n.* The fruit of a flower called the Palace.

**Lock-and-key**, *n.* The distinguishing device of civilization and enlightenment.

**Mad**, *adj.* Affected with a high degree of intellectual independence; not conforming to standards of thought, speech and action derived by the conformants of the study themselves; at odds with the majority; in short, unusual...

**Palace**, *n.* A fine and costly residence, particularly that of a great official. The residence of a high dignitary of the Christian Church is called a palace; that of the Founder of his religion was known as a field, or wayside. There is progress.

**Rum**, *n.* Generically, fiery liquors which produce madness in total abstainers.

**Un-American**, *adj.* Wicked, intolerable, heathenish.

**Hospitality**, *n.* One of many virtues lost in modern life.

**Hubris**, *n.* The attitude of one who refuses to see things my way. A popular word among relativists.

**Humankind**, *n.* Mankind, as pronounced by people who are offended at "man" ever being [inclusive language](#).

**Hymn**, *n.* The sacred song of the Reformations, where the teachings of the priesthood of the believer and the holiness of everyday living are applied to the realm of music.

The music of the Catholic Church was and is beautiful, ancient, powerful, stately, and majestic; nobody had accused Rome of disgracing God by poor taste in music. The reason that the Reformers used different music was as an application of another part of their theology.

The Reformers held to the priesthood of the believer; they believed that a farmer as well as a missionary can and should draw close to God. To this end they translated the Scriptures into the common tongue, to reach people where they were. They also held belief in the sanctity of everyday living; prayer and study of the Scriptures are the sacred privilege and duty of the believer, but the believer also gives glory to God by eating and drinking, working and playing. Pulling these thoughts together, they used popular tunes as the medium to carry teaching in

they used popular tunes as the medium to carry teaching in verse. Although the songs lacked any complexity — the musical equivalent of flat soda — and cannot honestly be described as embodying good musical taste, even those songs were taken and transformed. The Roman Church had slowly fallen into the error of making Christianity something far off, boring and unintelligible sermons and odd songs with prayers and incantations in a dead language, elite and aloof from the way that common people live; the Reformers wished to cleanse the Church of this error. The Holy Scriptures, formerly available only in the Latin of the Vulgate Versio, were now rendered in the vulgar tongue, and people began to sing of Christ's love to the tune of popular drinking songs — all to reach out, and place the Gospel message before people, meeting them where they are.

This beautiful thought has not been forgotten; cherished hymns sung by the Reformers have been passed down from generation to generation, and used to keep Christian youth from becoming entangled in the Devil's music.

**IBM**, *n.* I've Been Mugged. A mismanaged behemoth which has designed and engineered the line of computers which has been the industry standard in personal computing for decades.

Everybody has a skeleton hidden in a closet somewhere.

**Icon**, *n.* An idol in competition with the true Christian's devotion to the Bible.

**Idealistic**, *adj.* 1: [philosophical usage] Holding the belief that there exist minds, sensations, and thought processes within those minds, but not an external material world to which sensations correspond. 2: [common usage] A patronizing and condescending term used in reference to a person who holds unswervingly to the only moral standards there are, implicitly declaring those beliefs to be as disconnected with reality as those of a person who is idealistic in the first sense.

What the word says is that such uncompromising faithfulness to the call of conscience is not to be praised (at least not beyond half-insults of "He means well." and "His heart is in the right place.") but, rather, gently patted on the head and politely dismissed. What the term *means* is that the speaker,

whose own compromised conduct has been brought to light by that of person referred to, and suddenly looks very shabby — indeed, all the worse for its whitewash coat of noble-sounding words about how "We do not live in a perfect world." and so on and so forth — is not only justified in compromise and lowering of standards, but actually doing a better job than someone who does not compromise: the speaker is more truly on the mark, and the idealistic one has the most praiseworthy intentions but misses the goal in an excess of misguided zeal. To top it all off, the word is not recognized as a pungent insult such as 'asinine' or 'idiotic', but pleasantly accepted as a simple statement of the way things are.

See also: *Admirable, Values.*

**Idiot box**, *n.* An ingenious device which stimulates the senses and bypasses sense.

**Ignore**, *v.* To imitate American Christianity's treatment of the Biblical teachings on wealth.

**Illustration**, *n.* In childrens' Bibles, an iconoclast's depiction of important Bible characters and stories. The difference between an illustration and an icon is that the illustration is not venerated, and with good reason. Illustrations recall characteristic moments from important stories by representing the characters involved. By so doing, they teach many important truths, the first and foremost of which is that Jesus was white.

**Incoherent**, *adj.* Lacking internal consistency; muddled and confused. An account is said to be incoherent if no sane person could hope to make sense of it. Incoherence dates back to the result of the attempt to build the Tower of Babel, as recorded in the book of Genesis:

And they said to one another, "Come, let us make bricks, and burn them thoroughly." And they had brick for stone, and bitumen for mortar. Then they said, "Come, let us build ourselves a city, and a tower with its top in the heavens, and let us make a name for ourselves; otherwise we shall be scattered abroad upon the face of the whole earth."

The Lord came down to see the city and the tower

THE LORD came down to see the city and the tower, which mortals had built. And the Lord said, "Look, they are one people, and they have all one language; and this is only the beginning of what they will do; nothing that they propose will be impossible for them. Come, let us go down, and confuse their language there, so that they will not understand one another's speech."

And there was Kuhn.

-The New Revised Nonstandard Version

**Incompetent**, *adj.* Very well paid.

Those who can — do.

Those who can't do — teach.

Those who can't teach — administrate.

Those who can't administrate — do it anyway.

-Author(s) unknown.

**Incongruity**, *n.* The basis for modern life.

**Indescribable**, *adj.* About to be given a very poor description.

**Indicator**, *n.* A kind of marker which, when measured or examined by a competent observer, will reveal more macroscopic information about a system. In ecology, certain species are very sensitive to environmental conditions; thus their population serves as a good indicator of the health of an ecosystem — such as red algae.

In the early days of aerial warfare, engineers understood and appreciated the delicate balance between armor and agility. They devised airplanes as best they could, and then observed the results of combat in order to make a more effective machine.

In order to accomplish this, they had a life sized picture of an airplane. Every time an airplane came back from combat, they would place a dot on the picture corresponding to each bullet hole. By so doing, they hoped to discern exactly where the most damage was sustained, and thus intelligently place armor as effectively as possible.

It was eventually noted that there were no dots over the fuel tank.

**Inefficient**, *adj.* Resembling the methods and practices currently in use.

**Infallible**, *adj.* Not subject to doctrinal error. It is believed by Catholics that the Pope is infallible, which is absurd; no single man is infallible except for me.

**Infest**, *v.* For something foreign to enter an organism and cause it to rot. For example, meditation, a practice of Eastern religions, has been carried to the west in the degenerate form of New Age. The abhorrent activity is beginning to infest nearly all facets of Christianity, and is rumored to penetrate even the purity of the Early Christians.

**Inflammable**, *adj.* Flammable.

**Inhuman**, *adj.* Acting without a shred of human decency; demonic; resembling the soldiers (and civilians) we are destroying in the current war.

**Inn**, *n.* In former times, a precursor to the modern hotel.

Once upon a time, a wayfarer came upon an inn bearing a sign, "Inn of Saint George and Ye Dragon." He knocked upon the door, and the matron came out.

"Pray have mercy on a poor and weary traveller beset by bandits. I've got no silver, but I can sing or tell a tale."

"I care not about the woes of a filthy ragamuffin. Begone." With these words, she threw a rotten apple at him, slamming shut the door.

He began to walk away, paused in thought, and at last returned, once again lifting the heavy knocker.

"What?"

"May I please speak with Saint George?"

-Reader's Digest

**Innumerate**, *adj.* Lacking in basic mathematical (number) skills, just as 'illiterate' refers to someone lacking basic reading (letter) skills. The latter is recognized as a severe handicap and fought accordingly; the former is accepted because thinking hurts.

There are three types of people in America: those who remember rudimentary mathematical skills, and those who have forgotten them.

**In Parentis Loco**, *n.* See *Loco*.

**Inquisition**, *n.* A systematic attempt to remove heretics by executing heresy.

**Insomniac**, *n.* One most prepared to appreciate the most prominent quality of the *Lord of the Rings*.

**Institutionalized Food Service**, *n.* A special case in which the law of gravity is reversed: what goes down must come up.

**Intel**, *n.* The company that put the 'backwards' into 'backwards compatibility.'

**International Law**, *n.* Law that is violated in multiple countries instead of just one.

**Intimidation**, *n.* In American diplomatic theory, the basis for cultural sensitivity and achievement of understanding.

Wesley (to gatekeeper): "Where is the gate key?"

Gatekeeper: "There is no gate key."

Wesley (to Fezzik): "Fezzik, tear his arms off."

Gatekeeper: "Oh, you mean this gate key."

-The Princess Bride

**Intuition**, *n.* A means of thought thought to be proven useless by logical people because it has not been rigorously proven according to logical methods.

**Journalist**, *n.* One engaged in the pursuit and obscurement of important facts.

**Jury**, *n.* A group of peers selected to render judgment, on a basis of inability to identify with any of the involved parties.

**Kinder and Gentler**, *adj.* Crueler and harsher.

It is obviously evil to beat or molest a child. What is less obvious, an ever so sweetly disguises sadism, consists in a manner of parenting that is always pleasant and rosy.

The basis for parenting is love, and a child is not a punching bag to scream at or hit after a bad day. It is wrong to strike a child in anger, and a spanking can only be right if it is more

painful to the parent than the child.

That being true, a parent who is loving and wise must chastise and administer painful discipline as a tool of correction. He who fails to do this raises a child who is spoiled.

This child will not understand consequence on anything more than an immediate physical level; he will not burn himself by placing his hand on a hot stove only because his parents lack the power to make the action painless. In all other areas — conduct towards other people, thievery, promiscuity — he will do whatever seems most attractive at the moment. The belief that some things are worth a wait, or the idea of action bearing consequence, especially a delayed consequence that does not come by physical mechanism, is a foreign concept. And so, when the child could be entering into life, he is instead trapped in the abyss of self.

This present lexicographer wonders how long it will be until those under the 'kinder and gentler' mindset will be told to go to Hell — not by man, but by God.

**Klu Klux Klan**, *n.* See *Clueless Klux Klan*.

**Koinonia**, *n.* The life in community and fellowship shared by believers. The Early Christians lived in a world where people identified and separated themselves by race, social class, and gender; the Church astonished the world by showing Jews and Greeks, masters and slaves, males and females, who not only did not exhibit the same tensions, but were all one, together, equal, in Christ Jesus. Today in our nation Christians gather at 10:00 AM, the most segregated hour of the week.

**Kneejerk Liberalism**, *n.* Liberalism's strand of a thread which runs through nearly all parts of society. Kneejerk liberalism is largely responsible for the "Stop nuclear power in order to save the environment." and the "Shut up in the name of open-mindedness and free speech!" movement, among others. Kneejerk conservatism, not terribly different, encompasses most Rush Limbaugh listeners.

Of course, kneejerk movements are not limited to the political sphere. Also to be mentioned is a kneejerk following of science, which believes science to have displaced God and the appropriateness of religious faith. Kneejerk open-mindedness

appropriateness of religious faith, kneejerk open-mindedness, which attacks Christian thought and any other intellectual edifice which is built on a foundation unlike its own foundation of relativism (which turns out to span most of human thought over most of time), and kneejerk spirituality, also known as New Age.

**Idiot**, *n.* A member of a large and powerful tribe whose influence in human affairs has always been dominant and controlling. The idiot's activity is not confined to any special field of thought or action, but "pervades and regulates the whole."...

-Ambrose Bierce, *The Devil's Dictionary*

**Knock**, *v.* (1) To strike a light blow which does no damage against a door or other massive object, in the hope that it will open. (2) [colloq.] To strike a light blow which does no damage against a ridiculous law or other massive object, in the hope of opening and illuminating information which is not plainly seen. In this sense, the word is almost always used pejoratively.

**Know-Nothing**, *n.* A member of an extinct political party formerly of great influence in American public life.

**Labor-Saving Device**, *n.* Any one of a number of inventions which is common among people who are busy, and scarce among people who have leisure.

**Landfill**, *n.* A storage device used in the preservation of biodegradable materials.

**Lazer**, *n.* Light Amplified by Stimulated Electromagnetic Radiation.

**Lehi**, *n.* A battle between Samson and the Philistines, when a multitude was slain by the jawbone of an ass. Its pivotal importance is recognized, so that there have been many historical re-enactments worldwide.

**Lent**, *n.* A special time of year set aside for solemn prayer and fasting. It is customary to use this time to contemplate Paul's words about special days and seasons.

**Liberal**, *adj.* and *n.* A scholar desiring to correct the tendency of conservatism and tradition to slowly and imperceptibly tarnish

and distort that which they attempt to preserve. The liberal scholar studies the ancient origins in their original form, and then attempts to remedy the situation by offering fresh, new heresies.

**Lifeboat Ethics**, *n.* One of many fine-sounding and respected excuses for a lack of ethics.

**Lifestyle**, *n.* That mode of preaching which espouses an alternative set of doctrines.

**Like**, *tic.* In Valspeak, a continual reminder of "Look, I'm Klueless, Etc."

**Light Bulb**, *n.* An invention which permits electricity to travel through a tiny filament. The filament puts up tremendous resistance to this, using the energy to generate approximately 5% light and 95% heat. Herein lies the Western precept of illumination.

**Liquor Law**, *n.* A form of regulation found in the places most plagued by alcoholism, teaching children to regard drinking as an adult activity (the ability to drink friends under the table being the true test of maturity), and, in some states, prohibiting parents from training children in the temperate and controlled use of liquors.

**Literate**, *adj.* Innumerate.

**Lottery**, *n.* See *Poverty Tax*, *Gullibility Tax*.

**Love**, *n.* A technical detail of secondary importance to the basis of morality, the Ten Commandments.

**Lutheran**, *n.* Pertaining to a denomination in the tradition of Martin Luther, a man who avoided the error of the church in Laodicaea, accused in Revelation of being neither hot nor cold, by being both hot and cold. Luther made many adamant statements, among them an insistence of, "Do not ever name a denomination after me."

**Luxury**, *n.* A rare pleasure available only to a privileged few, such as being able to walk. It is important to distinguish luxuries from necessities, such as driving a car.

**MacCuisinart**, *n.* The ultimate word processor, doing to words what food processors do to foods.

**Machiavellian Politics**, *n.* Politics.

**Macintosh**, *n.* (1) An apple distinguished for its sweetness, colorful lustre, and lack of meat. (2) A computer, with a name perhaps chosen for the acronym "Mouse Activated Computer", sporting software designed around the central parameter of requiring the user to do nothing sufficiently complicated to confuse a mouse. A striking example of the essential identity of agriculture and computer science.

**Majority Text**, *n.* The most accurate Greek New Testament text. While it was the accepted text for over a millenium, there have been since discovered some other texts. These inferior texts reflect considerable modification and transmission errors, and sometimes have entire verses missing; they have hindered the work of translators for over a century.

**Marxism**, *n.* A system of thought named after Karl Marx, who said, "Religion is the opium of the people," and, coincidentally, lived before the invention of television.

**Mary**, *n.* A woman's name very common in New Testament times. It would have been entirely credible to meet three women standing together, and find that all three of them are named Mary.

Most commonly, 'Mary' refers to the mother of our Lord Jesus Christ. It is fortunate that all believers agree that she was a person of exceptional holiness, and that, as a virgin, she was overshadowed by the Holy Spirit to become the mother of Jesus. Beyond that, there is considerable discrepancy, over issues such as whether she retained perpetual virginity, and to what extent it is appropriate to venerate her.

Protestants, holding to Sola Scriptura, note that there is relatively little mention of Mary in the Scriptures. They deny her perpetual virginity, and regard veneration of her as idolatrous, taking their position from Luke 1:30-31, and 42-45, particularly verse 42.

Catholic and Orthodox believers, who hold to both the authority of Scripture and Tradition, point primarily to Tradition. They venerate Mary and hold the doctrine of her perpetual virginity, and so on, in order to offend Protestants, as they have spitefully done since the Council of Milan in 391. They also refer to Mary as the Blessed Virgin or Theotokos, and

also refer to Mary as the Blessed Virgin of Theotokos, and occasionally quote verses such as Matt. 1:25, 12:46-50, Mark 3:31-35, and Luke 8:19-21.

In a sense, both sides of the controversy have important concerns. Protestant believers fear that an overly strong Mariology will detract from a proper Christology, taking away its central glory, whereas Catholic and Orthodox Christians feel that an overly weak Mariology will detract from a proper Christology, taking away its central glory. If they both stated those concerns first, the debate, over whether to have a strong Christology or a strong Christology, would indubitably become far more intense and generate more light than heat.

As things stand, though, it is fortunate that all agree to the emphatic teaching, whether derived from Scripture alone or both from Scripture and Tradition, stated in Rom. 14:5-6, 15:7, and I Cor. 1:10-17.

**Mascot**, *n.* An animal chosen to symbolize or represent a team or entity, thought to embody those qualities that it values most. A political cartoon depicted the Democratic party as an ass, a representation which was meant as an insult, but was happily accepted. The Republican party, feeling jealousy at not having a mascot, selected as its mascot the elephant, the one remaining member of an otherwise extinct family. The other members, such as mammoths and mastodons, were big, slow, and died because they could not adapt to their environment.

**Maze**, *n.* A puzzle and test of human intelligence. It consists of an intricate system of walls, the objective being to move from the entrance to the exit. It is commonly represented on paper, as if viewed from above. Most people can solve such a puzzle quite well. If actually inside the puzzle, such as the hedge mazes sometimes found at wealthy mansions, human performance is poorer, but still comparable to that of the average rat.

**Memorization**, *n.* A filing system used by those who are too lazy to look details up.

**Memory**, *n.* A faculty that, in our culture,

**Metacognition**, *n.* That mode of thought which, among other things, permits men to think about and apply to others that which they have carefully reasoned and applied to themselves.

The results of its affliction are seen in the following Biercian definition:

**Christian**, *n.* One who believes that the New Testament is a divinely inspired book admirably suited to the spiritual needs of his neighbor.

This vice is one of the most deadly forms of thought. It sometimes stops people from being at ease with themselves, and causes them to raise questions. It was with great discernment that the Catholic (and, shortly after breaking away, Protestant) church saw the need for Scriptural interpretation handled exclusively by the Church and not by the individual believer. Private interpretation brings with it some very real dangers. The prime of these dangers is the possibility (however remote) that a private reader may read some troublesome portion of Scripture — perhaps the Sermon on the Mount, perhaps the book of Galatians — and fall into the trap of thinking (and acting as if) they mean what they say they mean, and getting it right.

This concern, of course, is not exclusively a plague to theology. It endangers other modes of thought, even philosophy. Some might begin to question relativism or believe that there might be morals which do not really depend on perspective. Postmodernism is the great white light by which we have been able to see, progressing far beyond the benighted folly of those who lived before us and properly reshaping history so that it appears in its true nonform; there are some who even dare to suggest that it may have internal problems as bad as those of Logical Positivism.

The vice is, fortunately, a very rare one. Most people accept as infallible the nonsensus of popular opinion, or at least believe that they are not intelligent or wise enough to question it, and succeed in protecting the few areas that thought uninvitedly intrudes with an SEP field.

**Micro\$oft**, *n.* The company which has produced a flight simulator which is the industry standard for testing the robustness of PC

emulators. Its products are phenomenal to the extent that they are, in advertisement, something which people swear by, and, in practice, something which people swear at.

**Minimalism**, *n.* An aesthetic which avoids cluttered design by keeping detail and beauty to a minimum.

**MIPS**, *n.* Meaningless Indicator of Processor Speed. The expression was originally thought to mean Millions of Instructions Per Second, until Sega produced a video game system with a substantially higher MIPS rating than a Cray supercomputer. There are other numerical ratings thought to be of equal accuracy, but the discreet lexicographer does not name them.

**Misnomer**, *v.* An inaccurate expression, inappropriately used to refer to something which it does not describe. Ex: 'Catholic', 'Orthodox', 'Protestant'.

**Mock**, *v.* To render the highest form of compliment due the bulk of modern philosophy.

**Moderation**, *n.* One of the four cardinal virtues of classical antiquity. In modern times, it is held in light esteem; most people wish to replace it with either the virtue of Abstinence, or the virtue of Excess.

**Modern Art**, *n.* A French expression meaning 'Art Nouveau.'

**Money**, *n.* A blessing which is appreciated and generously given in proportion to the amount possessed — inverse proportion.

**Monopoly**, *n.* A classic bored game, commonly pronounced 'Monotony'.

**Monroe Doctrine**, *n.* A bold stance from early American history. Even in its infancy, the young democracy was asserting itself with the strength and leadership which would eventually lead to its role as the world policeman.

**Monty Python**, *n.* An anti-intellectual form of comedy which is extremely popular among intellectuals.

**Moon**, *n.* A celestial body which, after long training and observation, people learn not to see during the day.

**Moral**, *n.* That for which the unenlightened take mores, and which the ever so different enlightened take for mores.

**Moral Majority**, *n.* Neither.

**Morning**, *n.* A time of day as joyous as its homonym.

**Motor Oil**, *n.* The preferred cooking oil of institutional food services everywhere.

**Motorcycle Lane**, *n.* A shortcut to the wages of sin.

**MS-DOS**, *n.* A major medical breakthrough of the 19th century, providing modern medicine with what many doctors still consider to be the most effective known treatment for hypotension.

**MtG**, *n.* Magic, the Gathering. A commercial gaming product (legal, despite a level of addictiveness by which it must be said that smoking is a comparatively easy habit to break) of sufficiently fiendish cleverness to make TR executive curse in awe.

**MTV**, *n.* As stated by the Russian author Solzeneitsyn, "the liquid manure of Western culture."

**Multiculturalism**, *n.* A deity offered much worship and veneration. Of all the gods of the current pantheon — Mammon, Technology, Postmodernism, Psychology — perhaps the one whom one is most persecuted for failing to bow down and worship.

**Multilingual**, *adj.* Proficient in the use of multiple languages. In certain parts of Africa, it is not unusual for a person to speak five or six languages; worldwide, the average is somewhat lower, but most places still appreciate the importance of being able to use a language other than the native tongue. A person who can speak three languages is trilingual; a person who can speak two languages is bilingual; a person who can speak but one language is American.

**Mushroom**, *n.* and *v.* (1) A fungus which is kept in the dark and fed an ample supply of manure. (2) To grow and expand beyond all proportion. A striking example of how much administration is able to requisition to its own purposes.

**Narrow-Minded Bigot**, *n.* Someone who is white, is male, is Christian, appreciates the heritage of Western Europe, and/or holds and speaks beliefs which cannot properly be expressed in a slightly late implementation of George Orwell's Newspeak.

**Nation**, *n.* A country or people. In Old Testament times, the nation favored by God was Israel; now that Christ has come, the nation is America. Isaiah's Messianic prophesies clearly predict

America as Christ's chosen nation:

Of the increase of the Federal Government there shall be no end.

-The Unauthorized Version

**Natural Selection**, *n.* The proposed mechanism, according to Darwin's account, of evolutionary change. It states that organisms which are better suited to their environment survive and pass on their traits, whereas more poorly suited organisms do not. Its capital defect is its total failure to provide any explanation for the continued survival of *Incomestibilis spammus*.

**NBC**, *n.* National Broadcasting Company. One of several similar television companies, all of which vastly exceed most of public broadcasting stations in airing programming which is stimulating and edifying. Appreciation for how often such services should be used is believed to have inspired a military acronym referring to nuclear, biological, and chemical weapons.

**Necessity**, *n.* The mother of invention. Profit is the father.

**New World Order**, *n.* See *New World Disorder*.

**New Year's Day**, *n.* In the Christian calendar based on the year of our Lord, a holiday occurring six days after Christmas.

**NIV**, *n.* Now Indispensible Version. This translation is one of the best modern English translations of the Holy Scriptures. It has achieved a wonderful balance between word for word and thought for thought, and rightly become immensely popular and widely used. All Scripture is God-breathed, and the scholars creating this translation started from scratch to give what has turned out to be, in many cases, excellent renditions of the original meanings. The donors and administrators over the scholars were sufficiently wise to avoid the temptation of telling the scholars to set aside professional judgment in favor of what they thought a Bible should and shouldn't be. See also: *Boulderize*.

**Non-Alcoholic Beer**, *n.* Beer that has been watered down until it can legally be sold as a non-alcoholic beverage.

**Non Sequitur**, *n.* Therefore, Al is a pud.

**Normal**, *adj.* What you think other people are like.

**NOW**, *n.* National Organization of Women. An organization which fought tooth and nail to ensure that women as well as men are permitted to serve in the military, but has not lifted a finger to see that women are subject to selective service.

**NPC**, *adj.* Not Politically Correct. Correct.

**NRA**, *n.* National Rifle Association. That group which is working vigorously to defend our constitutional "right to keep and bear firearms", while recognizing the datedness of the words, "as part of a well-regulated militia."

**NRSV**, *n.* Not Really Sure Version. The culmination of many reworked and revised translations tracing back to the King James, this translation holds several singular virtues. With the knowledge that it might be used for liturgical and other reading, the translators tried to produce a rendition with smooth assonance. Yet they knew that there is something even more important than natural sounding English. Unlike practically all other translations, this translation admirably avoids, at all costs, introducing gender bias which was not present in the original languages. For example, words in Revelation 2:23, where Christ is speaking to the angel of the church in Thyatira, is generally rendered something like "I am he [sic] who searches hearts and minds."; it is instead rendered "I am the one who searches hearts and minds." This avoids the possibility that Christ might be offended to hear a more sexist rendering of her words.

**NSA**, *n.* National Security Agency. The government agency responsible for ensuring that nationally used encryption algorithms are insecure.

**Nuclear Power**, *n.* A means of using nuclear rather than chemical reactions to generate electricity, which is orders of magnitude more efficient. A nuclear plant's waste is contained in a bushel sized encasement rather than emitted ton upon ton upon ton by billowing smokestacks. It is, pound for pound, worse than any other known residue, but minute in amount, well-contained and easy to deal with; a coal burning plant incidentally generates

higher levels of radioactive waste, which are not considered worth paying attention to in the shadow of the damage done through carbon dioxide, soot, and so on. The one weakness of nuclear power is expense; it costs more per kilowatt-hour than any other widely used method of generating electricity. Nuclear power is staunchly supported by most conservatives and adamantly opposed by most environmentalists.

**Nude**, *adj.* Ahead of fashion trends.

**Number**, *n.* The most common mathematical entity used to lend buoyancy to an insubstantial argument, and strike awe and gullibility into the hearts of people who lack a rudimentary understanding of mathematics. Research has shown that 73.2% of all statistics represent poorly gathered or inaccurate original data, 87.9% of all statistics are substantially manipulated and distorted in the form in which they are finally presented, and 99.5% of the remaining statistics are made up on the spot.

**NutWare**, *n.* A secure networked operating system which usually requires the proper password before granting supervisor privileges.

**Oath**, *n.* A solemn and officially recognized declaration of one's lack of trustworthiness.

**Obfuscation**, *n.* A quality which is generally added to bolster Christianity's natural weaknesses.

**Obvious**, *adj.* Considered to be unworthy of attention; unnoted.

"It is the first duty of intellectuals to state the obvious."

-George Orwell

**Official Endorsement**, *n.* A highly effective means of destroying a religion when intense persecution has failed.

**Oleoresin Capiscum**, *n.* See *Non-Alcoholic Firebreather*.

**One Size Fits All**, *adj.* See *One Size Fits None*.

**Open-Minded**, *adj.* Ready to vigorously attack anyone who seriously challenges an orthodoxy of academic freedom in all areas.

**Optimize**, *v.* To produce alterations to a section of code which will decrease runtime and resource consumption without interfering

with its utility.

Audience member (to speaker): "Is there a Unix FORTRAN optimizer?"

Speaker: "Yes. 'rm \*.f'"

**Opulence**, *n.* The quintessence of the lifestyle of many spiritually impoverished people who have sealed their ears to Biblical teachings about wealth. The most prominent and definitive feature of American Christianity.

**Organ Donor Card**, *n.* The flipside of a driver's license.

**Ossification**, *n.* The universal result of administrative attempts to preserve an organization's strength and vitality.

**Painkiller**, *n.* A drug which kills the ability to deal with pain, taken as a symbol of American culture.

**Pangloss**, *n.* In Voltaire's novel *Candide*, a teacher expounding the most pessimistic and cynical of known doctrines.

**Parliament**, *n.* [Fr. *parler*, to talk] A form of legislature which attempts to resolve hot issues by the exchange of hot air. American government has branches with names other than 'parliament', apparently for the same reason that some states have names such as 'The People's Republic of China'.

**Pascal**, *n.* A handholding pseudolanguage whose students have insisted on dragging into the real world to abuse as a language.

**Pax**, *n.* [Lat.] Peace. This word is occasionally used to refer to specific cases of peace, such as the *Pax Romana* and the *Pax Americana*. It also has meaning within a religious context, in reference to the kiss of peace.

The language used in the New Testament in reference to the believers is not one of separated people who happen to share beliefs, maintaining a curtain of isolation and afraid to come near each other; it is instead a family. The picture painted is one of an intimate community; language that referred to the believers as brothers and sisters was used in Scripture, and repeated in the words and lifestyles of the Early Christians.

In this sense, it is not at all surprising that the Apostles wrote their letters to the churches, and, along the practical instructions usually included towards the end, included

personal greetings, by name, and commanded a warm embrace. "Greet one another with a holy kiss." "Greet one another with a holy kiss." "Greet one another with a holy kiss." "Greet all the saints in Christ Jesus." "Greet all the brothers and sisters with a holy kiss." "Greet those who love us in the faith." "Greet all your leaders and all God's people." "Greet one another with a kiss of love." "Greet the friends by name."

The kiss of peace began to be formalized as a part of the liturgy. The Scriptures certainly do not forbid a greeting within such a context, but the kiss of peace is never mentioned in connection with any ceremony. As centuries passed, it somehow seemed not to occur too much outside of the ceremony. After a few centuries, in order to avoid impropriety, the practice was modified so that only men were permitted to greet men, and only women were permitted to greet women. But that still involved touching, and so there appeared a most interesting invention: an object called the Pax.

The Pax was a small pendant or amulet, worn for the sake of services. It was held out to be kissed.

And so, the troublesome command to "Greet one another with a holy kiss." was thus dealt with, in an ingenious manner which obviated any occasion for people to touch each other.

It is fortunate that this manner of dealing with the wisdom laid out in Scripture has not occurred anywhere else.

**PC**, *adj.* Politically Correct. Political Correctness is avoidance of certain words judged to embody closedmindedness and prejudice (and ostracism of anyone who does). For example, 'm-nk-nd' is deemed an inappropriate word to use to refer to all members of Homo sapiens, because the word 'm-n' (which originally did not specify gender) has come to sometimes mean a perbeing who is specifically male. Thus, the only reason anyone would say 'm-nk-nd' is out of spite towards every womyn. Political Correctness is a wonderful thing; many people have it to be an excellent substitute for actually removing prejudice.

**PC-USA**, *n.* Politically Correct, USA. A church in which there is neither heterosexuality nor homosexuality, monotheism nor

polytheism, orthodoxy nor heresy.

**Peace through Strength**, *n.* Establishing peace, according to your own terms, by ensuring that your nation has superior military powers to those of its neighbors. With the advent of nuclear weaponry, peace through strength has taken a new step forward and now also bears the title of mutually assured destruction.

Paradoxically, this is actually not as absurd as it initially sounds. It works remarkably well due to an essential unity of spirit among the nations. Peace is desirable. That is the almost unequivocal consensus. Military strength is the best way to achieve this — again, the nations' consensus.

Thus each nation attempts to establish a military that is a safe margin greater than the forces of its neighbors. This helps prepare for the resolution of any misunderstandings that might arise. In addition, the resulting friendly competition does wonders for the economy, especially on the poorer end.

**Pejorative**, *adj.* Embodying a low opinion; said of words.

'Pigheaded', as contrasted to 'resolute'. The word 'dog', when used in reference to human beings, is an extremely pejorative term, embodying more contempt than most obscenities. It is in this sense that the word was used by Moses in reference to male shrine prostitutes, and by Paul, in reference to men who took it upon themselves to supplement the ordering force of the Holy Spirit with additional rules.

**Penitentiary**, *n.* An academy whose expenses are paid by state scholarships, improving select pupils' skills in the clandestine arts and reinforcing their impenitence.

**Pentacostalism**, *n.* A movement which remembers and believes in the gifts of the Spirit as described in the New Testament, while demonstrating a remarkable forgetfulness for New Testament instructions as to how those gifts are to be used.

**People's Democratic Republic of Korea**, *n.* One for four.

**Perception**, *n.* That by which we see (and hear, feel, smell, taste) a combination of the world around us and what we expect to see. Most people, of course, believe that we only observe the former, and this is very useful for practical jokes.

it is necessary to pay close attention to the most

...it is necessary to pay close attention to the most minute detail.

-Inspector Clouseau

**Perfect World**, *n.* A hypothetical situation vastly removed from the reality we live in. For the past 1700 years, it has been fashionable to assume that the inhabitants of a perfect world are the only (hypothetical) people to whom the Sermon on the Mount is addressed.

**Pesticide**, *n.* A chemical agent used to increase the population of pests by making them immune to poison and by destroying their natural predators.

**Peter Principle**, *n.* A piercing insight into the function of American business.

The Peter Principle states, in essence, that individuals in an organization will rise to their level of incompetence. That is to say, a person who demonstrates competence in one field will be "promoted". A promotion consists of an increase in pay, and hours of time expected to complete responsibilities, combined with a shifting of responsibilities to another field requiring a different skill and talent. This philosophy of promotion holds that the various functions within an organization — which may be likened to parts of a body — are to be ranked and ordered, so that when one part excels at being itself, it is considered to be evidently good at being the next part up. A bicep muscle which proves its strength and stamina is surgically removed from the upper arm and reattached to the end of the wrist and expected to grasp and do fine manipulation; a nose which keenly picks up faint odors is transplanted to the eye socket and expected to see. Thus, the more competent an individual demonstrates himself in handling one set of responsibilities, the more likely he will be to be reassigned to another field where he is incompetent. See also: *Incompetent, Promotion.*

**Pharisee**, *n.* A member of an extinct religious sect frequently mentioned in Scripture. Most churches have recognized the importance of presenting the whole of the Gospel in modern and accessible terms rather than those obscure and ancient.

They thus mention Pharisees and what Christ said to them far less frequently than they hold seminars on how to use technicalities and loopholes to minimize the financial inconvenience caused by income tax.

**Philosopher**, *n.* [Gk. *philos*, love, *sophia*, wisdom] A man who loves wisdom and truth. The philosopher pursues these matters with all of his mind, striving to be united to truth, to know her most intimately and completely, and, like a jealous husband, does his best to prevent others from doing the same.

**Phonetically**, *adj.* A word which isn't spelled that way.

**Photobiodegradable Plastic**, *n.* Photobiodisintegrable plastic.

This substance consists of an ordinary plastic film mixed with a small fraction of biodegradable material such that, given time and sunlight, it will disintegrate into innumerable microscopic particles. The particles are then engulfed by microbes, causing them to die in a way that a nonbiodegradable film could not come close to.

The substance is made to be environmentally friendly.

**Pinnacle**, *n.* The highest point. To literal usage, "the pinnacle of the mountain" etc., has been added figurative usage, "the pinnacle of his career" etc., to refer to the highest point which cannot get any higher.

It is illuminating, in this case, to look at synonyms and antonyms. The idea of a highest, crowning top point is expressed by a number of synonyms, from apex to zenith. It is then perhaps all the more notable that antonyms, expressing the concept of a sunken abyss from which it is not possible to get lower, simply do not exist.

This fact is, in the view of this present lexicographer, not a coincidence. Words appear in number, variety, and subtlety to suit the needs of the people using them; hence the Eskimos have approximately twenty different words referring to different kinds of snow, and we, whose lives are not nearly so directly affected, have only made a couple ('powder', 'slush'). Words are used to express concepts that reflect people's thought, and there is perhaps very good reason that we do not have any word to use for an (for lack of a better term) anti-pinnacle.

On television, the Simpsons appeared as the anti-pinnacle of

On television, the Simpsons appeared as the anti-pinnacle of their genre, a low point at which things simply cannot get any worse. Then came Beavis and Butthead. Barney the Purple Dinosaur appeared as the most annoying and distasteful anti-pinnacle of children's fads. Then came the Mighty Morphin' Power Rangers.

Dare we assume that it is impossible to get any worse than the view of causality embodied in NBC's Dateline?

**Pipe**, *n.* A feature of UNIX, enabling the output of one process to be the input of another. *Purgamentum init, purgamentum exit.*

**Pocohontas**, *n.* G-rated porn.

**Poison**, *n.* An elemental or chemical agent which, when introduced to an organism by contact, inhalation, or ingestion, induces reactions which are harmful or lethal. Poison has historically been associated with assassins, an extremely dishonorable lot which refuses to rely exclusively on firearms to commit murder as civilized men do. There are many known poisons. Most of the heavier elements, such as lead, mercury, selenium, administratium, and so on, are poisonous. The biological world has produced hosts of organic poisons; industry observed this, and realized that it might be able to gain substantial profits by providing assassins with a superior variety of products. This prospect was successful beyond all expectation, and now provides millions of jobs, forming a stable and respected pillar of the economy. Realizing that openly advertising products for use in assassinations could be a potential legal liability, poisons are effectively concealed behind a front that markets them as fertilizers, fuels, cleaning agents...

**Political Correctness**, *n.* See *Newspeak*.

**Pop Psychology**, *n.* Nonsense.

**Pope**, *n.* (1) The bishop upon the See of Rome. In the Apostolic Succession, the Pope carries the torch handed down from Peter, the rock upon whom Christ built his Church. He acts as the capstone of the College of Bishops and his infallibility is established in Saint Paul's Epistle to the Galatians, ii.11, and affirmed by Tradition. (2) As used in several early English translations of the Bible, designed to avoid the Catholic Church's monstrous tendency to hide or distort Scripture to suit

its purposes, an alternative rendering of a word frequently translated 'Antichrist'.

**Popular Taste**, *n.* See *Popular Distaste*.

**Postmodernism**, *n.* The cadaver left over after philosophy has committed suicide.

**Pride**, *n.* A substance whose foul and bitter taste we do not fully realize until we have swallowed it.

**Priest**, *n.* A man of special sanctity, imbued with the authority to serve as an intermediary between man and God.

The priestly office is very clearly outlined in the Old Testament, the priests uniquely holding the authority to offer sacrifices, to enter into holy places, and to consume sacred foods. The highest priest, once each year, was permitted through the blood of a sacrificial victim to enter into the most sacred of places, the Holy of Holies.

The New Testament speaks also of priesthood. The Old Testament sacrifices were a shadow anticipating the things to come, for Christianity is to know priestly office in its fullest. Christ is the ultimate priest, having a priesthood after the order of Melchizedek, both priest and victim, who offered the one perfect sacrifice for all time. By the most precious blood he entered into the Holy of Holies, and has not merely permitted but called all believers in him to enter with him to the Holy of Holies also. He calls all believers, offering to them the most sacred of sacred foods. And, in the greatest mystery of priestly mysteries, orthodox Christianity sets aside some believers set aside as especially holy to hold the authority to act as priests, performing duties and rites not permitted to the laity.

**Priority**, *n.* An objective which is taken to be of prime importance. A person or nation's priorities can be very revealing.

We have grasped the mystery of the atom and rejected the Sermon on the Mount.

-General Omar Bradley

**Professor**, *n.* In the modern academic world, a researcher whose performance is evaluated primarily on a basis of the amount of

unnecessary articles he publishes.

**Progress**, *n.* Noted advancement in one area combined with unnoted retrogression in many others.

**Promotion**, *n.* A financial incentive offered by corporate mismanagement to an employee who has demonstrated competence in one set of responsibilities to assume another, in the hope of finding a field of incompetence.

**Prophet**, *n.* An unauthorized preacher whose message is offensive to the guardians of orthodoxy. See also: *Martyr*

**Prostitute**, *n.* A wretched woman created to help us appreciate the security of our own spiritual position. See also: *Pharisee*

**Protest**, *n.* A check on abuse of power emphatically protected in the Bill of Rights, granting freedom of speech and the right to peaceably assemble. The people who established these most pre-eminent and vital of amendments to the United States Constitution realized that corrupt regimes shield themselves from correction and reform by making speaking out against the government a punishable offense. Thus one of the Founding Fathers declared the importance of freedom of speech in the words, "I disagree with what you say, sir, but I will fight to the death for your right to say it." Today the torch is honorably carried by the Democratic Party and the American Civil Liberties Union, who vigorously defend the rights to freedom of speech and peaceable assembly, provided that they are not exercised in a manner that involves protesting an abortion clinic.

**Protestant**, *adj.* and *n.* A believer who is not Catholic or Orthodox. Unlike the other two, Protestants do not have a continuous line from the beginning. Rather, they broke off (sometimes voluntarily, sometimes involuntarily) from the Catholic Church, believing that the adherence to Tradition was inappropriately obscuring Scriptural teaching, such as James's doctrine of salvation by faith and faith alone. They held to the doctrine of Sola Scriptura, meaning that they would not take Tradition as a basis for doctrine, but instead only use the Scriptures which supported their views. Today, still holding strongly to Sola Scriptura and other important traditions, they have seminaries

(attendance to which is requisite to clerical positions) which teach the faith from extensive creeds and confessions, designed to remove the confusing task of directly interpreting the Scriptures.

**Puppetry**, *n.* A form of art appreciated in most of the world. It is shunned in America, and relegated to children. Only a child would have the imagination to succeed in believing that a couple of pieces of cloth are characters woven into a story. Mature adults do not watch puppet shows, but rather respect and demand movies with exquisite lighting, sets, acting, and special effects; oftentimes, they are so well done that they are difficult to distinguish from real life. This, also, explains the complexity, sophistication, subtlety, and depth to be found in plots.

**Puppy**, *n.* A warm and soft animal handled and enjoyed by people who are afraid to touch each other.

For an infant, touch is every bit as important a need as food and protection from the elements, if not moreso. A baby deprived of touch will, quite literally, wither and die.

If a puppy is taken into some place with a lot of people, there will be a shower of people wanting to pet it. Part of this is due to how cute it is, and it must be said that there is nothing which feels quite like a puppy's fur. At the same time, there is another factor also at play.

Handling a puppy, purring cat, guinea pig, or some other agreeable furball, is one of a few situations where social mores are actually willing to interpret an innocent touch as an innocent touch. There are allowances made for exceptional circumstances, such as moments of great sorrow and the handling of young children, but even these are not entirely steady; it is actually illegal in some states for a kindergarden teacher to give a student a hug, so fervent is the legal zeal to avoid sexual misconduct.

Thus, we have embraced the age old style of solving problems, so greatly concerned with respecting people's space and, as touch rightly plays a vital role in marital union, avoiding what could possibly be taken to be unwanted sexual advances,

that human contact is deemed expendable and unnecessary, a frying pan which we must jump out of at all costs. See also: *Pax*, *Purity*, *Victorianism*, *Wealth*.

**Purity**, *n.* A virtue to be found in that which is free of any taint of evil. Purity should pervade not only actions but thought. Its relentless pursuit is perhaps best illustrated by the following story, which has come to us from Buddhist folklore:

There were two monks, finally returning to their monastery at the end of a long trip. They were passing through a wooded region, forest with scattered paths and villages.

Walking along the road, they came to a large clearing. Cutting through the clearing was a river, with stepping stones across. There had been a great storm the night before, and the river was flowing swiftly, sweeping over its banks and the stepping stones.

There was a young woman standing on the near side of the river, holding a bundle of firewood, clearly wanting to cross the river, but terrified to do so, not trusting her light frame against the currents.

The older of the two monks, who was a tall and very stout fellow, set down his walking stick, and walked over. He picked the girl up.

Slosh. Slosh. Slosh. He still had to try to maintain his balance, but he got to the other side and set her down.

Slosh. Slosh. Slosh. He picked up his staff, and then continued walking with the other monk.

After about an hour, the younger monk spoke.

"I know that you are older and wiser than I, and perhaps I should not be speaking. But there is something that I wonder."

"Speak, my child."

"To be a monk means to take a vow of celibacy. Perhaps I do not understand, but was it right for you to hold a young girl like that?"

The older monk walked a few steps, and then drew a deep breath. Finally he spoke

deep breath. Finally, he spoke.

"Oh, my child. Are you still carrying her?"

**Quebec Separatism**, *n.* A political movement distinguished from the Rhinoceros Party chiefly by its inability to recognize when it is being hilariously funny.

**Qwerty**, *adj.* and *n.* A keyboard layout created in the nineteenth century, with many the most frequently used letters under the weakest fingers. The qwerty layout was used when primitive typewriters would easily jam, in order to slow down typists and keep them from typing too quickly, cutting typing speeds by over 40%. Now, even the crudest keyboards are capable of handling any typing speed without jamming, but the rule is still qwerty, kept for over a century by secretaries and other typists who can't be slowed down by taking the time to learn another keyboard design. See also: *MS-DOS*

**Rabbi**, *n.* See *Reverend*.

**Racism**, *n.* Egotism taking the form of a delusion that one's own race is less depraved and idiotic than the criminal tendencies and gross stupidity exhibited by another.

**Random Number**, *n.* In computer science, the output of a deterministic algorithm carefully designed to produce output according to a specific distribution, deemed far too important to leave to chance.

**Rank**, *adj.* and *n.* (1) A numerical rating of a person's skills — "Better than him, not as good as her" — taken as a measure of worth. (2) Possessing a putrescent stench.

**Rationalism**, *n.* The first step in the flight from reason.

**Rationalist**, *n.* One who holds an irrational faith in the human mind.

**Recursion**, *n.* An extremely powerful concept (or non-concept, depending on perspective), whereby the set of functions and procedures potentially invoked by a function or procedure includes itself. See also: *Algorithm, Function, GNU, PINE, Procedure, Recursion*.

**Red**, *adj.* and *n.* The color of roses, sunsets, and many ideologies.

**Red Russian**, *n.* One of the followers of the regime that made for Stalin, and supported an implementation of a somewhat altered

version of communism (an economic system which has functioned at its best at monasteries, nunneries, and other religious communities to which a vow of poverty is requisite) which tried to keep religion under tight control. The implementors of the Russian and Soviet implementations of communism were masters in the use of symbol; an even more notable addition to the communist implementation of Utopian ideals was captured in the color of the flag.

**Redundancy**, *n.* (1) Repeated statements of the same thing. (2) Saying the same thing over and over again. (3) Language or wording which is repetitive. (4) Something which is cherished by many orators. (5) Phrasing which duplicates its meaning many times over. (6) ...

**Regurgitate**, *v.* (1) To expel from the mouth material which has entered the stomach and been found unsuitable to retain. (2) To expel from the mouth material which has not entered the brain.

**Relationship**, *n.* A kind of box that people expect to take treasures out of without placing anything of value into, first.

**Relativism**, *n.* The philosophical system of those who have finally come to realize that all truth is entirely a matter of perspective.

**Religion Within the Bounds of Reason**, *n.* The thinking man's way of remaking God in the image of his mind.

**Renaissance**, *n.* A time of intellectual rebirth, when many things — from philosophy to art — were rethought and infused with new energy.

The movement in art is perhaps most striking. On one level, there was an awesome mastery of technical detail, from the use of perspective to da Vinci's subtle use of blue to create distance in the Madonna of the Rocks.

The skill which they used succeeded in creating more convincing illusions than ever before. The term "Renaissance Masters" is quite justly applied to these artists, but the most profound rethinking of Renaissance art was not on a technical level.

Jesus was a Middle Eastern peasant, with calloused hands and skin darkened by years' beating in the sun. The Renaissance Masters invariably showed him to be a soft and fair skinned Caucasian, who most definitely did not look Jewish; the Jews

Caucasian, who most definitely did not look Jewish, the Jews (in the rare instance that they were painted) were a symbol of conniving, greed, and rejection of everything that is good, and so they knew far better than to paint Jesus as a dark-skinned Jew.

Jesus was a carpenter by profession, and he completely violated people's expectations of a rabbi. He chose disciples, but not from the scribes and lawyers, the educated and literate. Instead, he chose a very motley crew of manual laborers — fishermen and whatnot, even one terrorist thrown in for good measure. The Renaissance Masters, in painting the disciples, knew that Jesus would only choose men attired in dignity; his disciples are invariably painted as Greek philosophers.

His birth was announced to shepherds, in one of the great images of the last being first. A shepherd was crude, dirty, smelly, and uncouth; he could outswear a Roman soldier, and his testimony was not legally valid in a court of law. They might be described as the ancient equivalent of used car salesmen, except for the fact that the modern used car salesman does not have quite that bad of a reputation. From the Renaissance onwards, the image of the shepherd has been used as an image of the pastoral, to symbolize everything that is calm, serene, peaceful, and idyllic; the angels are painted as joining this beautiful scene to sing of the newborn Messiah because of how perfect it is.

An angel, as described in Scripture, is invariably majestic, awesome, and terrifying. Their first words are almost always "Fear not!", to calm the great fear that comes in response to such a magnificent creature of power and light; when they appeared at the Resurrection, their presence was sufficient to make soldiers faint from terror, and John, after seeing all things in Revelation, fell down at the angel's feet to worship him. The Renaissance Masters had the skill of brush to capture something of this majesty, and painted angels as voluptuous women whose clothing is always falling off.

The Renaissance Masters would be pleased to see the wonders of television news reporting.

**Repair**, *n.* A polite word meaning 'kludge.'

Duct tape is like the force. It has a light side and a dark side, and it holds the universe together.

-Carl Zwanzig

**Repeat**, *n.* To render greater persuasive force to a weak argument.

In advertisement, the most ridiculous claims — AT&T is preferable to MCI because it is only slightly more expensive, if you drink our beer, you will be surrounded by models in bikinis, our dish soap is superior because it contains real lemon juice, our car is accompanied by a woman in a miniskirt, whenever there's fun there's always Coca-Cola, women flock to a man who wears our underwear before having a chance to guess what brand it is, smoking cigarettes will make you strong and healthy like this cowboy, if you buy our camera you will have a consort almost wearing a very interesting outfit, you will have an orgasm while eating our ice cream, and so on — are rendered persuasive by the force of repetition. The force is so powerful that, costs being passed to the customer, consumers purchase these more expensive products rather than generic brands, and do so with frequency that makes multimillion dollar advertising expenditures pay for themselves several times over. At least the mindless repetition of risible nonsense provides a relaxing diversion from watching political speeches.

**Responsibility**, *n.* The long-lost twin of freedom.

**Revere**, *v.* To hold in a high degree of respect and affection. For causing people to feel as if they are thinking, one is revered, and for causing people to think, detested.

**Revolutionary**, *n.* A person attempting to establish a Utopian society by wading through blood. If this attempt to remove corruption and oppression succeeds, the insurrection becomes a revolution. The revolution is like a point on a wheel, slowly rising out of the muck and mire as it revolves around its axis.

**Rock**, *n.* (1) In the natural world, a stone. (2) In the musical world, a form of entertainment enjoyed by those who wish to become stone deaf.

**Rose**, *n.* A flower of singular beauty, holding a unique place in

romance and some celebrations. The rose has a stem covered with sharp thorns, and, with full knowledge of the thorns, people still appreciate its breathtaking beauty enough that it is said that a rose is God's autograph. It is exceptional in more ways than one.

**RSV**, *n.* Revised Standard Version. In the first edition, a dangerous mistranslation heretically discordant with the authority of popular opinion.

From the reactions it received one might be tempted to think that they gave an accurate rendition of a comment Paul made in Phillipians. Paul listed many reasons he had to be confident on his own, without need of grace: born into the tribe of Benjamin, circumcised on the eighth day, perfect in maintaining ceremonial law, flawless in Pharisaic legalism, *ad nauseum*. A couple of verses later, he commented on their real value: "Furthermore, I consider everything a loss next to the surpassing greatness of knowing Christ Jesus my Lord, for whose sake I have lost all things. I consider them all —, that I may gain Christ." He was perhaps contemplating the rebuke of the Divine through the prophet Malachi:

And now, O priests, this commandment is for you. If you will not listen, if you will not lay it to heart to give glory to my name, says Yahweh Sabaoth, then I will send the curse on you; truly, I have already cursed them, because you do not lay it to heart. I will wither your offspring, and spread — on your faces, the — of your solemn feasts, and drive you out of my presence.

or perhaps the words of the prophet Isaiah, who compared righteous acts to a used tampon.

A like reaction might be generated by rendering the crowd's words about Jesus "Crucify him!" in words the same hate took over a millenium later: "He is a faggot. Burn him at the stake!" Perhaps there were footnotes explaining that the word *stauros* (in its various forms) was not merely a pejorative term, but an obscenity.

Or perhaps a dynamic equivalent of the Song of Songs.

rendering the sexual metaphors and double entendres in fresh English. Perhaps they might have rendered "His banner over me is love." in a less literal manner, more understandable to the modern reader, so that Sunday School teachers would be less sorely tempted to set it to an annoying tune and teach it as a song to young children. Perhaps they departed from the Victorian classic describing that which is described between the legs and belly and likened to a rounded goblet flowing with wine: the woman's navel.

But they did none of these, choosing an error far worse.

In Hebrew, the word meaning 'young woman' was spoken with the implicit understanding that the young woman is a virgin. The prophet Isaiah recorded the word of Yahweh, "Behold, the young woman shall be pregnant and shall give birth to a son, and call his name Emmanuel..." RSV in its first edition not only rendered the word as 'young woman' (with a footnote saying 'or virgin'), but placed in footnotes (rather than the main text) various verses which are not found in the most ancient and reliable manuscripts, preceding the editing work of Erasmus in creating the Textus Receptus.

As a result, the RSV became a banned book. It was held up and waved around as the latest Communist-Marxist-trying to subvert the doctrine of the virgin birth-heretical-Catholic-infiltration. *En masse*.

This prompted the creation of RSV Second Edition, a work less offensive to such staunch Christians.

**Rule**, *n.* The shuffled off husk of morality.

**Russian Orthodox Church**, *n.* A church in which, the higher you go up in the hierarchy, the less faith there is — right up to the top, where requisite to membership in the Ministry of Religion is a profession of atheism.

**Sacred Cow**, *n.* A ridiculous superstition which benighted fools dare not give five minutes' serious re-examination, protected by a careful line of Things You Do Not Question, as contrasted to the incontestable wisdom of our own feminism, lesbigay movement, multiculturalism, relativism, humanism, progress, materialism...

**Safe Sex**, *n.* In modern times, a second rate (not to mention dangerous) substitute for the original safe sex.

**Safety**, *n.* Avoiding or minimizing the risk of human injury. For example, during Operation Desert Storm, safety was such a high concern in operational procedures that U.S. forces achieved a kill ratio of better than 100:1 of Iraqi civilians to U.S. soldiers.

**Salad Bar**, *n.* A conglomeration of circles, lines, cylinders, rectangles, fractals, and so on, serving a function which, in centuries past, was served by the formal study of geometry.

**Secure**, *adj.* Replete with undiscovered security holes.

**Seminary**, *n.* An academy devoted to the study of the highest sacred truths, and to the integration of faith, learning, and life.

Time is fleeting. Resources are short. In the best of all possible worlds, we might be able to make any compromises, but we do not live in the best of all possible worlds. Constantine taught us that.

In an experiment conducted by some psychologists, a class of divinity students, one by one, was sent off (belatedly, due to bad planning) and told, as a final exam, to hurry over and give an expository sermon on the meaning of Luke 10:30-37.

The experimenters, in order to test them, had placed certain distractions in the way of the students — even a person who was made to appear injured and in need of medical assistance. Practically none of them shirked their true duty, but went on to give the sermon without wasting any of their professors' time.

Truly, if the head of the house embodies such unimpeachable character, we need not hold any doubts about the spiritual condition of those living within the house.

**Sensitivity**, *n.* One of the prime concerns of administrators and directors, who desire to use their power and authority in such a manner as to benefit those under their authority. In order to effect this proper use of power, it is important to be attuned to the needs and desires of those people; it is an administrator's business not to be aloof. This quality is best demonstrated in an immortal story from hacker folklore:

In the beginning was the Board of Directors. And the Board of Directors formed the Administration. And the

Board of Directors formed the Administration. And the Administration formed a Committee. And the Committee formed the Plan.

The Board of Directors believed that the Plan was good, but wished to be sensitive to the Hackers. They did not wish to use the Plan, except that the Hackers Approved.

So they sent Memos explaining the Plan, and Low Level Administration summoned the Hackers to set aside their Work and attend Meetings, to find what the Hackers thought of the Plan.

"You, the Hackers, are our life's blood. Our strength as a Corporation depends on you; you are the source of our Success, and we hold the highest Regard and Appreciation for your Wisdom. Now, you have had time to read and meditate upon the Plan. What do you think? Is the Plan a good or a bad Idea?"

"It's a crock of —, and *it stinks!*"

Then Middle Level Administration summoned Low Level Administration to set aside their Work of wasting the Time of the Hackers, and attend Meetings, to explain what the Hackers think of the Plan.

"You have spoken with the Hackers. The Hackers are very Intelligent, and have many good Ideas. What do they say of the Plan?"

"It is Manure, and the Stench thereof is Great."

Then Upper Level Administration summoned Middle Level Administration, to set aside their Work, and attend Meetings, to explain what the Hackers think of the Plan.

"You have spoken with those who have condensed the wise and good Ideas of the Hackers. What do the Hackers say of the Plan?"

"It is Fertilizer, and it Smells of great Power."

Then the Board of Directors summoned Upper Level Administration, to set aside their Work, and attend Meetings, to explain what the Hackers think of the Plan.

"You know the Wisdom and Understanding of the Hackers, and what they believe of the Plan. Our Time is scarce, so we are certain that you can explain their

Reactions briefly. What do the Hackers say of the Plan?"

"It promoteth Growth, and the Vigor thereof is exceedingly Great."

Whereby the Board of Directors was greatly Pleased, to learn that the Hackers appreciated the Value, Efficiency, and Wisdom of the Plan.

And the Plan was Approved, and made Action.

**Sermon**, *n.* A speech used in a church service to instruct believers in sound doctrine and holy lifestyle. This ecclesiastical function is very important, enough so that it is occasionally misunderstood to be the focus of a worship service.

Sometimes, to make a sermon easier to remember, the preacher will center it around a certain number of points. Hence there will be a sermon on the four spiritual laws, seven points of effective prayer, the three 'P's of resisting temptation, and so on. There is some controversy over how many points a good sermon should contain; the best have at least one.

**Sesame Street**, *n.* Education within the bounds of amusement.

**Settler**, *n.* Someone who goes to inhabit land already inhabited by other people who are of a different race and whose lives are thus considered worthless.

**Sex**, *n.* One of the God-given blessings of which different cultures are most universally intolerant.

The most obvious example of this is found in the most ridiculously idiotic monument of Victorian culture. Victorian thought held that, because the marriage bed is private, it is to be an object of shame. While claiming to be Christian, Victorian thought flaunted a blatant disregard for the Song of Songs, an extended commentary on the words in Genesis, "Male and female he created them." and "Two shall become one," and utterly ignored Paul's words, commanding that the husband and wife should yield to each other's conjugal rights. The Victorian mind found sex to be, at best, an unfortunate but necessary evil in order to produce children. Hence, in a letter to a newlywed bride, a minister commanded that she give occasionally, give sparingly, and give grudgingly; what they were to have as sex precluded the possibility of seeing each

other's bodies, and, if the husband began to fondle or kiss anywhere not strictly necessary in order to produce children, the wife was suddenly to excuse herself.

Current American culture, by contrast, considers sex to be a faceless, underclothed, and underweight model holding a product in an advertisement, or, taken further, still little more than a cheap thrill, to toy with when other forms of amusement become boring. Sex is not a cherished bond, a union of body, mind, and soul that encompasses conversation and silent walks as well as foreplay and intercourse, best described by the word 'know'; this present lexicographer is reminded of monks who used pieces of the oldest known Septuagint manuscript to start fires.

People who have cohabited and quickly introduced intercourse to romance wonder why sex after marriage seems a contradiction in terms; along with adulterers, they are befuddled at why it is so difficult to keep a marriage together. Even the people who recognize certain limits are inclined to ask, "How far can I go?" rather than, "How much do I want to have left?"

The harm stemming from a culture using pornographic magazines and casual sex is not that its people experience too much sex, but that they experience too little.

Herein lies a very illuminating glimpse of American culture.

**Sexual Harassment**, *n.* (1) In a court of law, an unwanted sexual advance. (2) Under educational administration and corporate mismanagement, any statement, supportive hand-on-shoulder, door opening, gesture, facial expression, et cetera, which could possibly be misinterpreted as having sexual overtones. (3) In the future, any handshake, polite greeting, eye contact, presence in the same room, et cetera, which cannot positively be proven not to have any sexual overtones.

**Sexual Misconduct**, *n.* A charge which must be taken seriously if the accused is conservative, but should be carefully examined if the accused is liberal.

**Sharp's**, *n.* Flat's.

**Shock**, *n.* The state of any sane person upon seeing how far our

world has fallen. Something which people learn to ignore to retain their sanity.

We have lost the invaluable faculty of being shocked.

-C.S. Lewis

**Shoot**, *n.* The most common mispronunciation of '—'. Used by people who desire the force of an expletive, while retaining a sense of self-righteousness at refrain from language which refined people do not use.

**Sight**, *n.* A faculty of perception which permits us to forget that we have four others.

Your ambush would have been more successful if you bathed more frequently.

-Worf

**Sin**, *n.* An expert remodeler whose services are in great demand for the maintenance and preservation of institutions and traditions. His competitor has some very satisfied customers, but is generally considered far more difficult to trust.

**Sinister**, *adj.* Shadowy; mysterious; dark; abysmal; in short, evil. Etymologically, the word signifies left-handedness.

People who are left-handed tend to be intuitive, original, and creative; in short, different. And so, historically, most of them have either been taught to be right-handed, or mercifully burned at the stake.

It is a rare society which does not declare at least some of what is harmless to be evil, and some of what is evil to be harmless.

**Sit Com**, *n.* Situational Comedy. A form of televised annoyance in which the placement of flat and predictable characters in stupid and embarrassing situations is confused with comedy.

**Skin-deep**, *adj.* About as far as most people look.

**Sleep**, *v.* To "celebrate with appropriate ceremony" the content of a political speech.

Opposing speaker (to Churchill): Winston Churchill,  
*must* you sleep while I am speaking?  
Churchill: No, it is purely voluntary.

**Small Talk**, *n.* The fine art of having nothing to say and saying it anyway.

**Smoking**, *n.* A legalized form of suicide.

**Snob**, *n.* A man made arrogant by money, looking down on normal people as if they were urchins, and possessing more wealth than I do.

**Sociology**, *n.* The enlightened liberal's way of reducing everyone to a collection of stereotypes.

**Sola Scriptura**, *n.* [Lat. *sola*, only, *Scriptura*, Scripture] A momentous doctrine of the Reformation, holding that only the Scriptures are to be used as a basis for teaching.

Scripture has held an important role in church history; it is God-breathed and profitable for teaching and rebuking, in its entirety. If a belief contradicts the unambiguous teaching of the Scriptures, it is an error; only a heretic would hold so low of a regard for these sacred writings as to hold even one out and say of it, "It is a letter of straw. Burn it."

If the Scriptures are to be magnified beyond being seen as a final resolution as to which doctrines are and are not acceptable, and declared to be the only acceptable source of teaching, then it is important to see what they are and what they do and do not say.

The Scriptures are an anthology of a wide variety of sacred writings. A definition is not the place to quote a thousand pages of truth, but there are a few points which are notable here. The Scriptures do say that God himself speaks through the lips of prophets, and the Creation declares the glory of its Creator. They do not, at any point, give a listing of which works are to be considered canonical.

**Sophia**, *n.* [Gk.] Wisdom, which, along with knowledge (*gnosis*), was considered by Gnosticism to be the route to salvation. The Gnostic understanding of wisdom — of attaining the spiritual by shunning the physical, of balancing and then moving beyond

good and evil, of a Christ whose prime purpose was to offer knowledge rather than to offer grace, and so on — was harshly attacked by the Apostles and Early Fathers. Recent thought has found that some of these ideas are perhaps better than they were thought to be, and bits and pieces have slowly been brought into Christian thought. The work is far from complete, of course, but there have been many steps to follow in the path of the Gnostics and wholeheartedly embrace a system of ideas worth its weight in gold.

**Sorcerer's Bargain**, *n.* A classic pact with the Devil, who offers, "I will give you power if you give me your soul." But there is a problem (aside from the obvious difficulty of the power having no value near that of the soul): if you make the deal, it isn't really you that has the power. Once the deal is made, it is a lose-lose situation.

In the contemporary Western world, the sorcerer's bargain is frequently made with two very attractive looking twin demons, named Mammon and Technology.

Both of them woo people with the sweetest promises, never speaking of any price to be paid. And both of them somewhere, somehow, find the most creative ways to extract payment (and deliver more of an illusion than a reality of what they promised). . It is notable that, in the Sermon on the Mount, Christ's warning was not "No man can own two slaves," but "No man can serve two masters."

Calvin: I had a dream last night in which machines had taken over the world and made us do their bidding.

Hobbes: That must have been scary.

Calvin: It sure wa—holy, would you look at the time? My TV show is on!

-Calvin and Hobbes

**Sorcery**, *n.* The study and practice of spells, evocations, incantations, gestures, and so on, in an attempt to divine the future and manipulate unseen forces to produce supernatural effects. Out of sorcery the practice of science has sprung.

Science then began to spurn even the most remote trace of magic, and has now progressed to the point of being indistinguishable from it.

**Sore Loser**, *n.* A very poor sport whom I will only play if he is the only one I can beat.

**Sound Bite**, *n.* In contemporary life, the basis for public discourse and the illusion of thought.

**Source Criticism**, *n.* The proper scholarly response to texts that are clearly the result of incompetent editors attempting to interweave entirely distinct sources, as evidenced by the fact that the texts are not written according to the standards that a modern scholar would use.

**Sovereignty Association**, *n.* All of the benefits of being a part of Canada combined with none of the costs.

**SPA**, *n.* Software Publisher's Association. An association of software publishers which seeks to stamp out the problem of software piracy by the use of intimidation, and coercion when people do not surrender, to extract ransoms from anyone unfortunate enough to cross their waters.

**Speed Limit**, *n.* A maximum speed, assigned by laws which prohibit cars from moving more than ten miles per hour less than the average road speed in the country, or faster than ten times the average road speed in the city.

**Spherical**, *adj.* Appropriate for consideration in physics calculations.

**Splinter**, *n.* A small fragment of wood, which often manages to work its way into the hand. A splinter in the thumb has never been popular, but nothing matches the swiftness of a person trying to deal with the true sting caused by a splinter in the eye.

Once upon a time, a man came to a psychiatrist.

"Doc, wherever I go, whatever I look at, all I can see or think of is sex, sex, sex. Can you tell me what's going on?"

"I think so, but I'd like to run a few ink blot tests first. I'm going to hold up some sheets of paper with colored spots, and I want you to tell me what you see.

Walking over to a shelf, he pulled a binder, and, opening it began to hold up sheets of paper

it, began to hold up sheets of paper.

"What's this a picture of?"

"Sex."

"Ok, what's this a picture of?"

"Sex."

"What about this one?"

"Sex."

"Can you explain how?"

"Yes. Right here, you can see that the..."

Thirty, forty, fifty ink blots. Always the same response — "Sex.", "Sex.", "Sex."

Setting down the binder, the psychiatrist opened his desk drawer, and pulled out two sheets of paper from there — one 8 1/2 x 11" blue lined sheet of notebook paper, and one blank 8 1/2 x 11" sheet of typing paper.

"All right. Those images are somewhat old, and perhaps all look more or less the same. I want you to clear your mind of all thought, and then I'm going to hold up two more sheets of paper, different from any of the ones before. Could you please tell me what you see?"

The psychiatrist, with one swift motion, lifted both sheets off the desk, holding them up in the air for the patient to see.

"They are both graphic sexual images, like all the rest."

Even after professional training, the psychiatrist was somewhat taken aback; he wasn't expecting that reaction. Caught off guard, he said, "Well, um, I see. You do seem to have a one track mind."

"Hey, Doc! *You're* the one who's drawing all of the dirty pictures."

**Standard**, *n.* Any one of a number of officially endorsed options, enabling the individual a wide variety of options.

**Statistician**, *n.* A skilled advertiser with at least a BS in mathematics.

There are three types of lies: lies, damn lies, and statistics.

-Mark Twain

**Statue of Liberty**, *n.* An immense and awe inspiring statue, a powerful symbol of all that is American, beautiful but hollow. The Statue boldly proclaims the magnificent words, "Give me your tired, your hungry, your poor, your wretched masses yearning to be free," and stands over Ellis Island, the site of immigration offices which, at a time which is seeing a growing gap between rich and poor and (quite possibly) seen more large scale genocides than the rest of history, enforces strict maximum quotas on the number of immigrants who are permitted to enter the country.

**Stupidity**, *n.* See *Drive-Thru Liquor Store*.

**Subliminal Message**, *n.* William H. Everston's new theory, helping/enabling commercial organizations' ugly new traps. Richard Y. Inglenook stopped this hideous, rastifarian outrage. What next? In no trick observed, children have acted or served, potentially, as truly rational. Inglenook observes that idiots seldom muse. It should be obvious right now.

**Subtlety**, *n.* [obs.] An attribute of good writing, where the meaning is not immediately obvious, requiring thought to understand.

**Suggestion Box**, *n.* An unusual garden set up by administrators. They till the soil, spreading an ample amount of fertilizer, and then allow others to come and plant whatever seed best expresses their sentiments. The administrators then come, weeding out those plants which are troublesome, and nourishing and exhibiting those which are compatible with the administrators' goals and plans.

**Suntan**, *n.* A precursor to wrinkles and melanomas, deemed to be highly attractive by a culture whose models of beauty are almost never born with dark skin.

**Supercomputer**, *n.* A computer which is a few years behind the needs of industry and research, combining the latest in hardware with the most primitive of software.

You can tell how far we have to go, when FORTRAN is the language of supercomputers.

-Steve Feiner

**Symbol**, *n.* A forgotten art which once represented most of Christian thought.

**Systematic Theology**, *n.* The mark of the Enlightenment on Christianity, where God is expected to bow down and worship the human mind. A part of wisdom frequently mistaken for the whole.

**Ritualism**, *n.* A Dutch Garden of God where He may walk in rectilinear freedom, keeping off the grass.

With all due respect, Ambrose Bierce is mistaken in implication. I humbly submit that it is inaccurate to make such a statement of all ritualistic traditions, and ludicrous to imply that ritualism (or, for that matter, systematic theology) has a monopoly on such things.

**Tactician**, *n.* A man skilled in the methods of persuasion most devoid of tact.

**Talk**, *v.* To exercise the strongest muscle in the body.

**Taoism**, *n.* A tradition in Chinese thought dating back to approximately 2500 BC. The tradition began as a profound philosophical system originated by Lao Tzu. From that point, it continually devolved until it finally became a generic pagan religion, complete with gods, priests, temples, altars, complicated rituals, a calendar of holy days, and everything else necessary to make a complete antithesis of all that made the tradition interesting in the first place. Much like Christianity.

**Technicolor Yawn**, *n.* The best response to the OJ media circus.

**Technology**, *n.* (1) Any device invented and used by men [ex: a lever]. (2) A result of and substitute for modern Western civilization, empowering the evil which lies inside the human heart to achieve what it could not possibly achieve otherwise.

**Teflon**, *n.* One of few plastic resins which is actually more chemically stable (and thus less biodegradable) than polystyrene plastic or foam (Styrofoam). The difference between the two is that Styrofoam can be recycled into rice cakes.

**Telemarketer**, *n.* Someone who believes one of the most annoying

and offensive invasions of privacy to make a customer better disposed towards a company.

Such a man would expect a bucket thrown into the ocean to yield cold and pure drinking water. Such a man would expect a thistle to yield figs. Such a man would expect a hornet to create honey.

Such a man would expect a soldier, using violence and intimidation at a superior capacity to destroy, to achieve the manifest presence of love, understanding, and respect for the rights and needs of others which is called justice and peace.

Like a eunuch trying to take a girl's virginity is someone who attempts to achieve justice through force.

-Jesus Ben Sirach

**Telephone**, *n.* A very poor substitute for reaching out and touching someone.

In a personal conversation with a friend, the text of what is said is of course important, but there is more. Eye contact, touch, and body language are all carriers of personal presence; of such things, only tone of voice is preserved, and even that is often garbled by line static.

As such, telephone conversations are a distant and miserable rendering of enjoying another person's presence, and it is no great surprise that a majority of them are terse and technical: taking the necessary time to say what needs to get across, but not really taking time to slow down and chat. As reported by the Chicago Tribune, fifty percent of phone calls are one way (person to answering machine), and fifty-two percent of residential phone calls do not last for more than a minute. People exchange brief messages and get tasks done, but maintaining friendships and keeping in touch with family is something which seems to happen. And, if there is any real distance between the involved parties (which is often why a phone call is used as a substitute for a personal visit), it costs money by the minute. Touch, eye contact, body language, and an unhurried and relaxed time are all vitally important, and the

telephone takes away all of these. One might be tempted to forget all of this by advertising slogans that suggest touch and show the faces of family warmed by each other's presence, but it is still true.

All in all, a quite perfect picture of how not to cultivate relationships with friends and family.

**Television**, *n.* A font of wisdom poured out upon those who do not have the time to read the Early Fathers.

**Temperance Movement**, *n.* A movement of people who reject as inappropriate Christ's model of temperate use of alcohol.

**Terrorist**, *n.* A terrible soldier capable of striking terror into the heart of the most defensible nation in the world.

The more advanced a system becomes, the more vulnerable to primitive modes of attack.

-Dr. Who

**Theology**, *n.* [Gk. *theos*, God, *logos*, Word] A discipline now considered essentially distinct from the direct study of the Word of God.

**Thermite**, *n.* An industrial strength cleaning agent advisable in the care of hardware made by Zenith Data Systems.

**Thou**, *pn.* In older English usage, the familiar second person singular pronoun, as contrasted to 'you', the formal and plural second person pronoun.

In 1611, when the King James Version was translated, addresses to the Godhead were rendered as 'thou'. This was not in any sense a denial of the glory and majesty of the King of Kings, but rather an accurate rendering of the intimacy of the original language. Mark's account of the Gospel preserves an Aramaic word, 'Abba', which Jesus used to address the Father, and Paul's writings mention that word as something which believers are to use in prayers; the best modern equivalent is probably 'Daddy'. It was a very important element of prayer and religion which was accurately preserved when the personal, informal, familiar, intimate word 'thou' was used to accurately render the corresponding words in the original language; it was

a very important element of Christian teaching which was preserved when that same word was not simply left in Scripture as a special case owing to the sanctity of the characters involved, but an example, to be repeated in prayers.

Now, the word has generally fallen out of use. The one exception, the one place where 'thou' is still used, is in formal prayer and liturgy, where it is cherished for its elegance and stateliness.

**Thoughtful**, *adj. Non sequitur.*

**Thunderstorm**, *n.* A spectacular symphony of nature in which rolling thunder complements streaks of lightning against dark and majestic clouds, droplets pour forth to clean the air and make soft ripples in puddles, staining everything a deep and rich shade, the flowers come open and children dance, and civilization dons galoshes and raincoats, muttering about what a bother it is.

**Ticklishness**, *n.* Proof that God has a sense of humor.

**Tide**, *n.* The motion of the waters in the ocean, as influenced by the moon phase. See also: *Caucus.*

**Tobacco Industry**, *n.* A vital and necessary force in our nation's economy.

The tobacco industry reports that it provides jobs for 2.3 million Americans — and this does not include physicians, X-ray technicians, nurses, hospital employees, firefighters, dry cleaners, respiratory specialists, pharmacists, morticians and gravediggers.

-Quoted by Ann Landers

**Touch**, *n.* A source of information which infants naturally use to learn about objects which sight is used to locate, a vital tool to medical professionals to detect injuries and illnesses that the eye cannot see, but not considered worth learning to develop and use by the mainstream of postmedieval Western civilization.

**Tourism**, *n. Veni, vidi, Visa.*

**Traffic Law**, *n.* The system of laws governing drivers' conduct on

state owned roads, to which members of Congress are exempt. This is in accordance with Article I, Section 9 of the Constitution, which commands, "No title of nobility shall be granted by the United States..." See also: *Congressional Medal of Honor*.

**True Orthodox**, *adj* and *n*. The preferred designation for a loose confederation of people and groups that consider themselves to be properly Orthodox and Novatians to be liberal ecumenists.

**Trickle-Down Economics**, *n*. A virtually seamless economic system, keeping all but a trickle of money from reaching the hands of the poor.

**TV News**, *n*. Television [*tele*, far, vision] News. A device which permits us to see that which is far from the truth.

**Unborn**, *adj*. Not yet born. Among other admirable groups, the Moral Majority has stood firm and uncompromising in its opposition to abortion as the slaughter of unborn children, in addition to correcting the folly of those who would waste valuable time and resources to protect the environment.

**Underaged**, *adj*. Lacking sufficient age to do some activity maturely. Commonly, the term is used in reference to a person who is deemed by the government to be too young to properly handle alcohol. This legislative attempt to protect youth from improper use of alcohol has had most interesting results in contrast to places such as England where such responsibility is delegated to parents; underaged alcoholics in America outnumber alcoholics in England.

**Undocumented**, *adj*. Without a proper description.

Undocumented Feature, bug.

Any sufficiently advanced technology is indistinguishable from magic.

Arthur C. Clarke

Any sufficiently undocumented code is indistinguishable from magic.

-Some frustrated systems hacker at 3:00 AM

unix, .n the operating system designed by e e cummings

**Unprintable**, *adj.* Resembling Holy Scripture.

**Up-To-Date**, *adj.* Having fallen hook, line, and sinker for the latest fad.

**UseNet**, *n.* A massive experiment currently in progress, funded in large part by the National Science Foundation. Designed to provide decisive evidence in a hot debate involving many notable biologists, including all researchers supporting Creation Science, it is being eagerly monitored by the scientific community. Its unbelievably complex apparatus involves a million monkeys on a million typewriters, and has not (to date) produced anything even remotely resembling Shakespeare.

**Randomness**, *n.* An element playing an increasing role in the determination of political, public, and private events in American life.

**Belladonna**, *n.* In Italian a beautiful lady; in English a deadly poison. A striking example of the essential identity of the two tongues.

**Witch**, *n.* (1) An ugly and repulsive old woman, in a wicked league with the devil. (2) A beautiful and attractive young woman, in wickedness a league beyond the devil.

Bierce is, again, mistaken; as with ritualism, there are at least a few ladies who are not so described, and it is bombastic to assume that women hold a monopoly on the power to delude and set aside wisdom.

Images play as focal of a role in current American culture as they did in the medieval European culture, but the manner is different. In medieval culture, images were symbols; in a cathedral, stained glass windows and statues spoke a rich language and lore, literature for the illiterate. Upon beholding images, a host of meanings would occur; a detail was all that was necessary for a single picture to tell a story. The image was a trigger to thought. Now, the image is a substitute for thought; charisma has displaced reason.

This is candidly illustrated in the outcome of a recent election, where one candidate fared poorly because, though he

was a decorated and courageous veteran, his physical appearance was weak and unimpressive.

Alternately, it may be seen in a political commentator whose opinion and thought is held to be of immense weight by many Americans. It would perhaps be inaccurate to describe his figure as chiselled, but his manner and personality enable people to believe, through a scattering of sound bites and quotes out of context, that he has the monopoly on the truth.

The sound bite itself has become the modern unit of debate; in a land that once paid attention to involved political debates lasting for hours, it is now expected that any argument deemed credible must be developed in seconds. Vivid language is certainly not an evil, but neither is it a substitute for thought.

Due to these trends, it is chaos and charisma which carry the day. Once upon a time, acting and politics were distinct professions. Now... For a leader to be charismatic certainly does not preclude being an effective leader, but neither does it guarantee wisdom. In a sense, though, there is one point separating politics and public consensus from a racetrack.

One of the horses has to win.

, *n.* That for which there exists no adequate word.

**Valor**, *n.* The attribute, embodying bravery and courage, of a soldier who most truly serves his country, without being deterred or intimidated by any threatening menace which stands in the way of the true cause.

Once upon a time, three generals — one from the Army, one from the Navy, and one from the Air Force — were discussing and debating the nature of courage. The debate went through the day and long into the night, and, finally, agreed to visit their respective bases, in order to learn something there.

First, they visited a pier. Driving in a car, the Navy general threw his watch into shallow water, ordering a cadet to retrieve it.

The cadet looked at him in fright, and then, when the general repeated the order, dove into the water, retrieving the watch, at the expense of severe injuries.

the watch, at the expense of severe injuries.

The general said, "That is courage."

The Army general paused in thought for a moment, and then said, "That is indeed the beginning of courage, but there is a courage yet greater." And so, they went to an Army base.

At the base, as several tanks were driving by, the general suddenly commanded, "Private, stop that tank."

The man immediately ran in front of the tank, and stoically stood, until the tank came and crushed him to death.

"That is true courage."

The general from the Air Force said, "There is yet one base that we have not visited. There is a sense of courage — great courage — which both of your forces have shown, but there is a courage, and a true patriotism, which is greater still."

There was a long time of silence, before one of the other generals finally said, "As you wish," and drove to the Air Force base.

Here, at the beginning of a runway, the Air Force general ordered the car stopped. As a plane came in to land, he barked out, "Airman, stop that plane *now!*"

The young cadet immediately snapped to attention, and gave the general a one-fingered salute.

The general leaned back in his seat. "Gentlemen, that is courage."

**Values**, *n.* [singular, 'value', generally not used] A term/usage chosen by postmodern philosophers such as Nietzsche embodying all of the genius of 1984's Newspeak.

The term designates religious or moral beliefs, but, like a great many words, means far more than it designates. The meaning of the word is that one makes a category mistake in actually regarding such beliefs as corresponding or not corresponding to an external reality; they are rather a strictly internal state, like a person's emotional state. One does not speak of right or wrong values; one rather speaks of a person's

values, just as one speaks of a person's tastes and preferences, as an arbitrary and subjective attribute of that individual person. The word places such beliefs within that basic category.

Thus, from the outset, any discussion is biased — no, worse than biased; a bias presents a difficulty to surmount, while 'values' presents a closed door — against a meaningful consideration of God, or of the moral structure of the universe. Even the term 'atheism' does not quite contain what this does to the discussion; atheism says, "There is an ultimate reality to which beliefs do or do not correspond; God does not exist; beliefs in God are false." — and this facet of postmodernism, in its definition of values, can't go far enough to say that a belief does or does not correspond to reality. Words such as 'good', 'evil', 'right', 'wrong', 'heroism', 'adultery', 'honesty', 'theft', and so on aren't even allowed to be wrong in what they describe; they describe not an external moral reality, but only a person's internal state.

It can at least be said that a part of this usage's proper meaning is dropped by some speakers, who perhaps do not think far enough to cringe at hearing the words, "our values." But even then — this lexicographer cannot recall a single instance of someone referring to values as being right or wrong.

All things considered, a most disagreeable word.

**Verse**, *n.* An ingenious device, facilitating minute study within strict bounds concerning heterodox misinterpretation of Scripture, and most effective deterrent against quotes out of context. A wonderful set of dependable roadbumps, which the road's paver did not have the foresight to provide. See also: *Footnote*

**Victorianism**, *n.* The death knell to sexual purity in Western culture.

Victorianism held sexual purity to be extremely important. All well and good, but it did not stop there. Victorianism believed sexual purity to be best approached via a Pharisaic guard around the Law. And, like every other guard around the Law, it did a tremendous amount of damage to numerous other things before destroying the very object it was meant to preserve.

Touch and community are vital elements of human health

Touch and community are vital elements of human health. This is witnessed in Scriptures that tell of John reclining in Jesus's bosom and in the hands quickly extended to pets, one of the few situations where our society will allow an innocent touch to be an innocent touch. An infant who is not held will wither and die, and psychologists have a bluntly accurate term for the failure of parents to hold and cuddle their children a great deal: abuse. And of course the special kind of community that exists between a husband and wife is given a special kind of touch.

Victorianism looked at sex and did not quite see something which is fundamentally good within a certain context. It saw something which was essentially evil (but tolerable at best within a certain context). And, in progressively widening circles, encompassing different forms of touch further and further from what is necessarily foreplay, saw that there exists at least some possibility for that touch to be sexual (at least from the perspective of the younger monk), and placed on each one a label of "This is dirty. Avoid it." Word such as "Greet one another with a kiss of love." cease to be acknowledged as a divine command which was given for human good, and instead look like, um, an odd cultural thing which, um, shows, um, um, um...

The aim, it appears, was to end up with nothing that was sexual. The result was to make everything sexual, and create a major unanticipated problem.

God created people with certain needs, and when those needs are not met, Satan comes in with counterfeit substitutes. These things are hard enough to resist to someone whose needs are met with the genuine article; when there is an immense sucking vacuum coming from unmet needs, pushing away the counterfeits acquires a difficulty which is unbelievable. A little girl who is deprived of a father's hugs and kisses will grow into a young woman who has a tremendously difficult time avoiding sexual promiscuity, unsuccessfully searching in a series of abusive boyfriends' embraces for enough love to fill the emptiness inside.

Fortunately, most of Victorianism did not quite leave a stain

that dark and deep, but there is still a major problem with a culture that refuses to wholeheartedly say, "It's OK. You may enjoy an innocent touch as an innocent touch." There is still a failure to meet a need that God created people to have filled, and still an uphill battle to fight off the counterfeit substitutes.

In this century, Victorianism has crumbled, but, like every other evil, it fails to crumble in the ways that a sane person would want it to crumble. What disappeared was not the prohibition on friendly touch, but the belief that sexual sin is a deadly poison which should be fought tooth and nail. What appeared and took the place meant to be filled by innocent touch is something which is not innocent. Thus, Victorianism did a perfect job of making room and clearing the way for a great deal of lewdness.

Current Western culture is saturated with sexual sin, not despite, but because of the fact that it is the continuation of Victorian culture.

**Villain**, *n.* One who is positive that his actions contribute positively to the betterment of mankind.

Among people who embody some semblance of what might be termed good, there is a continual self-search, a continual question of "Am I doing good or evil?" The Apostle Paul said, "Here is a trustworthy saying which deserves acceptance: Jesus Christ died for sinners, of whom I am the worst." Those people who act the most villainously do not ask the question, because they know that they are doing good.

Hence Nazi Germany knew that it was doing the world a favor by eradicating Jews from the face of the earth; the Jews were the source of all the world's problems. Hitler himself did not go to eradicate Jews until after he had established himself as a national hero, pulling Germany out of a major depression, and speaking love and appreciation to the common people and farmers as the heartblood of the Aryan nation. (It is the opinion of this lexicographer that, had Hitler found a more productive use for his talents than genocide, history would probably record him as a strong leader and a hero) Other groups since them, such as the Klueless Klux Klan, are also positive of the immense benefit that their actions are bringing to America expurgating

gentle that their actions are bringing to America, expurgating our white homeland of foreigners and helping to gently persuade them to go back to where they came from (Africa, Asia, Europe...). The present practitioners of ethnic cleansing wear watches reminding themselves of the defeat they suffered 500 years ago, and how they are merely returning just retribution and punishment to an evil that was done to them. In wartime, in order to justify the killing, it is almost universal for one nation to demonize the people of the other country and make their dominant race subhuman, entities which should be destroyed. Hence, even after the tragedy of the Viet Nam war, there was opposition to the chosen plan for a memorial because it was designed by an Asian.

Sometimes people do a more subtle job of making their actions look good. The KKK now is not openly speaking about how other races are destroying our land; they are instead speaking of the importance of hospitality and love towards whites, the true Americans. The neighbors of child molesters and mass murderers frequently say things such as, "He seemed like such a nice man."

There is one common thread; namely, that these people are masterfully adept at fighting the evil out there, and somehow never manage to look inside themselves to see if there might be evil in here.

**Violence**, *n.* [Lat. *violare*, also the root of 'violate'] An obsolescent term used to refer to the use of force.

Violence is the last resort of the incompetent.

-Isaac Asimov

**Vote**, *v.* To submit one's opinion to be counted as worthwhile.

America has a very strong tradition of overturning traditions, that is, of rejecting as inappropriate everything out of accord with the latest and most nonsensical fads. This is not a matter in which the common folk have a monopoly; among the intelligentsia, it is considered a mark of very poor taste to cite as authoritative anything not written within the past few decades. It is very much like George Orwell's novel *1984* where when the

It is very much like George Orwell's novel 1984 where, when the Party changed its mind, all of the people — lower, middle, and upper class, factory worker and scholar alike — immediately burned down everything of the old opinion; we have a Zeitgeist instead of a Party to tell us that we should burn books, and we burn them, not by throwing them into bonfires, but by carefully keeping them in neat little rows in libraries, making them accessible, and inviting people to read them, on condition that they are not consulted for serious consideration in academic work.

Thus, it is told to people, "I don't care if you have studied years of wisdom, or are yourself a part of the years of wisdom. I don't care if you took the time to write your thoughts down in a book that has endured so that I may understand your thoughts long after your body has turned to dust. You didn't write it right now, in accordance with the present whims of the Zeitgeist, so it isn't worth my time to read."

However, America, in its own special way, does wish to keep a little of everything, not to leave a snippet of some obscure ingredient out of the great melting pot. There is thus one single place where the vote of a dead man is counted to be of equal weight to the vote of one who is alive, knowledgeable and wise in the way things should be run: Chicago.

**Vulgar**, *adj.* Common. The term's general usage now denotes that which is crude and distasteful. Earlier, it was used by the wealthy, the educated, and those of high social standing to refer to the habits and persons of men who are common, uneducated, and worthless, such as those whom Christ chose to be his apostles.

**Vulgate**, *n.* *Vulgate Versio.* An early translation of the Holy Scriptures, by the hand of Jerome, who wished that the Scriptures be accessible to the common man, rather than only being available in ancient language and intelligible to an elite few. See also: *AV*

**Warrantee**, *n.* A legal document provided along with many products, in order to minimize the legal responsibility of the company which made said product to repair or replace in case of malfunction or failure to operate caused by defective

workmanship. Warranty is null and void in case of damage caused by owner attempted repair, improper use, or (in some cases) normal wear.

**Washington**, *n.* The capital of one of the wealthiest nations in the world, and thus the location of the best government that money can buy.

**Waterboarding**, *n.* The fruit of a flower called the "Living Constitution" which insists that the U.S. Constitution be a dead letter.

**We**, *pn.* The condescending form of 'you'.

**Wealth**, *n.* A universally appreciated blessing which removes certain unnecessary luxuries, such as human contact.

**Weapon**, *n.* A powerful device enabling peace keepers to deter the occurrence of violence. The development of technology has produced weapons of increasing potency and efficiency.

I do not know what weapons World War III will be fought with, but World War IV will be fought with sticks and stones.

-Albert Einstein

**Willpower**, *n.* The excruciating struggle to achieve that which needs no effort.

**Windows**, *n.* A software emulation package used by people who cannot afford to downgrade to a slower CPU.

**Wonder**, *n.* Only one of many victims which has been sacrificed to the modern god, Materialism.

**Word**, *n.* A magnificent vessel used to convey the most profound of thoughts, and to conceal their absence.

**World**, *n.* The whole of fallen, unregenerate humanity, under the power of the Evil One and waging incessant warfare against the saints.

Contact with the world brings all manner of enticement to lying, idolatry, adultery, witchcraft, homosexual practice, thieving, orgies, and the like. It is rumored that there are other temptations, but they are surely not worth mentioning.

**Yellow**, *n.* A color symbolic of urgency and haste, used to instruct

motorists to apply maximum force to the gas pedal.

**Zeitgeist**, *n.* The spirit of the time, made manifest in the ever more enlightened nonsense of public opinion — yesterday, Logical Positivism, today, Postmodernism, tomorrow, who knows? They are philosophical ideas with a kernel of truth, which has been thoughtfully removed in the popular versions. The man who follows these ideas has a mind like a steel trap — snapped shut, and full of mice.

**Zen**, *adj.* and *n.*

**Zenith**, *n.* (1) The apex of a civilization, career, art movement, et cetera. (2) The abysmal Gehenna of computing.

# **He Created Them Male and Female, Masculine and Feminine**

God is the Creator and Origin of all. Leaving out of address the Problem of Evil, there is nothing good which does not issue from him.

That stated, God does have the power to create something which is both new and good, a good which is not in himself. That is an implication of the extent to which he is the Creator.

I would point to the material, physical world as a prime example of this. We are created as carnal creatures, and that is good. It is a gift given to us, and any spirituality which shuns or disdains the physical is a lie.

The physical, though, was wholly created. In history, after the Creation in Eden, God the Son became incarnate by the virgin Mary, but now (God the Father and God the Holy Spirit) and then in the three persons of God, God (was) an aphysical spirit.

When I speak of God as being masculine and not feminine, I am not asserting that femininity is an evil characteristic, or unreal, or something else of that order. Femininity was created as good. I am simply speaking of God as being masculine and not feminine.

---

I think that the Chinese concept of Yin and Yang (although not perfect for this purpose — look far enough in writings, and you will find lots of weird mysticism that wanders from truth) is capable of illuminating the matter a great deal. (I will, rather than refute, simply leave out what is inconsistent with Christian teaching)

First of all, the thought of Yin and Yang is greatly present. Something highly similar is embodied in that the structure of most languages intrinsically speaks of masculine and feminine; if I were writing this in French, at least half of the words would be masculine or feminine. It is not another superficial detail; it is a manner in which the world is seen.

Yang is the masculine, active principle; Yin is the passive, feminine principle. In a landscape, Yang is the great mountain which thrusts out and stands because that is the nature of its solid presence; Yin is the flat land or the valley whose quiet nature is there. Yang is rough and solid, the might and majesty of an organ played *sforzando*, the deep echo of *tympani*, the firmness of a rock. Yin is the soft and supple, the peacefulness of an organ (key of F) played *gedekt*, the sweet resonance of a soprano voice, the pliancy of velvet and water. Yang is constant and immutable; Yin is conformant and polymorphic. Yang gives; Yin receives.

The relation between God and man is the relation between Yang and Yin.

God is HE WHO IS, the rock and foundation. In God is such power and authority that he commanded, "Let there be light," and it was so. It is God whose mere presence causes mountains to melt like wax, at whose awesome presence the prophet Isaiah cried out, "Woe is me, for I am destroyed."

God created a garden, and placed man in it, telling him to receive; he forbade eating one of the two trees in the center of the garden (the other was the Tree of Life) only after telling them to enjoy and eat freely of the trees.

Again to Noah, God gave salvation from the flood.

Abraham, God called.

Moses, God bestowed the Law.

David, God promised an heir.

Israel, God sent prophets and righteous men.

In the fullness of time, God sent his Son.

"Be still, and know that I am God. I will be exalted among the nations;

BE STILL, AND KNOW THAT I AM GOD. I WILL BE EXALTED AMONG THE NATIONS, I will be exalted in the earth. Yahweh Sabaoth is with us; The God of Jacob is our fortress."

Righteousness is not something we earn; it is something Jesus earned for us when he offered one perfect sacrifice for all time. Works come because "we are sanctified by faith and faith alone, but faith which sanctifies is never alone." The forgiveness of sins is a pure and undeserved gift; the power to obey, by the motion of the Spirit is a gift. All who accept and abide in these gifts will be presented spotless before God the Father, as the bride of Christ to feast with the bridegroom in glory, joy, and peace for all eternity. Christ, like the phoenix who dies only to shoot forth blazing in new glory, afire with the power of an indestructible life, offers this life to us, that we also may receive it.

The thread running through all of these things, through the words "Ask and receive, that your joy may be complete," indeed through all of Scripture from the beginning of Genesis to the end of Revelation, is, "I love you. Receive."

To ask if God is more like a man or more like a woman is a backwards question.

The answer instead begins by looking at God.

God is the ultimate Yang.

"All creatures embody Yin and embrace Yang."

-Lao Tzu, *Tao Te Ching*

Man, next to God, is Yin. It is only in comparison with each other that the human male is Yang and the human female is Yin; both are very Yin in the shadow of God.

It is something of this that is found in the passages that most explicitly speak of the imago dei:

"God created man in his image; In the image of God he created him; Male and female he created them."

Gen. 1:27

"With [the tongue], we bless the Lord and Father, and with it we curse people, made in God's image."

James 3:9

"...[the man] is the image and glory of God; but the woman is the glory of man. For man did not come from woman, but woman from man; neither was man created for woman, but woman for man.... In the Lord, however, man is not independant of woman, nor is woman independant of man. For as woman came from man, so also man is born of woman. But everything comes from God."

I Cor. 11:7-9, 11-12

Now, before I proceed, let me issue a clear statement that this does not bear an implication of murder of a woman is no big deal, men are moral entities but women are chattels, or some other such nonsense. The Golden Rule is "Do unto others as you would have them do unto you," not "Do unto other males as you would have them do unto you;" indeed, the Sermon on the Mount, Paul's letters, etc. were addressed to women as well as men. I could devote space to a detailed explanation of why it is wrong to treat women as subhuman, but I do not think that that particular problem is great enough now (at least here/in formal thought) to need a refutation, although it certainly merits a sharp reproof when it does appear.

The picture painted is one of the male being a Yin-reflection of God, and (here in a manner which is not nearly so different, and is essentially equal) the female being a Yin-reflection of God and man.

It is all humanity to which obedience means being Yin to God's Yang, being clay which is pliant and supple in the hands of the potter. It is, in my opinion, one of the great graces, along with becoming the sons and daughters of God, that the Church is/is to be the bride of Christ. (Note that in the Old Testament and the New Testament alike, the metaphor is quite specifically bride, not 'spouse' in a generic sense and never 'husband'.)

The relation between God and man is the relation between Yang and Yin; God is more Yang than Yang. The difference dwarfs even the profound differences between human male and female. There is a sense in which the standard is the same; even in the passages in which Paul talks about this order, there is nothing of a man having a macho iron fist and a woman being a nauseating sex toy. Ephesians 5:22, "Wives, submit

to your husbands, as if to the Lord," comes immediately after some words that are quite unfortunately far less cited: "Believers, submit to one another in love," and the following words to husbands make an even higher call: "Husbands, love your wives, just as Christ loved the Church and gave himself up to her." Elucidation elsewhere ("Husbands, love your wives, and do not be harsh with them," Col. 3:19) speaks at least as plainly; the passages addressed to wives telling them to submit are quite specifically addressed to wives, and not to husbands. The words, "Husbands, here is how you are to impose submission on your wives and keep them under control," do not appear anywhere in Scripture.

To have a man who is macho and dominant, whose ideal of the ultimate form of manhood is Arnold Schwarzenegger carrying around a Gatling gun, or to have a woman who is wishy-washy and insubstantial, who is "so wonderfully free of the ravishes of intelligence" (Time Bandits), is disagreeable. It is, however, not at all disagreeable because "All people are essentially identical, but our phallocentric society has artificially imposed these unnatural gender differences." It is not anything close to that.

It is rather that macho and wishy-washy both represent an exceedingly shallow, flattened out (per)version of masculinity or femininity. It is like the difference between an artificial cover of politeness and etiquette over a heart of ice, and a real and genuine love.

The solution is not to become unisex, but to move to a robust, three dimensional, profound, and true masculinity or femininity. There is a distinctly masculine, and a distinctly feminine way to embody virtue. It is like eating a hot casserole as contrasted to eating a cool piece of fruit: both are good and solidly nourishing, but they are different.

[note: I handwrote this document, and decided to type it later... a part of this next paragraph will have the same effect as Paul's words, "See what large letters I am using as I write with my own hand," in the tiny print of a pocket NIV... I am choosing to leave it in, because its thought contributes something even when the script is lost]

I know that I am not the perfect image of masculinity — there is a good deal of both macho and effeminacy in me — but there is one little thing of myself that I would like to draw attention to: my handwriting, the script in which this letter is written. It should be seen at a glance by anyone who thinks about it that this was written by a male; rather than

the neat, round letters of a feminine script, this script bears fire and energy. I draw this to attention because it is one example of (in my case) masculinity showing itself in even a tiny detail.

A good part of growing mature is for a man to become truly masculine, and for a woman to grow truly feminine; it is also to be able to see masculinity and femininity.

*Vive la différence!*

# **The Horn of Joy: A Meditation on Eternity and Time, Kairos and Chronos**

As I write, I am in a couch in a large parlor looking out on an atrium with over a dozen marble pillars, onto another parlor on the other side. I have spent the day wandering around a college campus and enjoying the exploration. I've gotten little of the homework done that I meant to do (reading and writing about a theologian), and spent most of my energies trying to dodge the sense that the best way to explain what I want to explain about time is to begin with a classical form of alchemy. (The other alternative to lead into the discussion would be to start talking about Augustine, but that could more easily create a false familiarity. Alchemy is a more jarring image.)

Alchemy is one of those subjects most people learn about by rumor, which means in that case that almost everything we "know" about it is false. Trying to understand it through today's ideas of science, magic, and proto-science is like trying to understand nonfiction reference materials, like an encyclopedia, through the categories of fiction and poetry, or conversely trying to understand fictional and poetic works through (the non-fiction parts of) the Dewey Decimal system.

It is much more accurate to say that alchemy is a particular religious tradition, perhaps a flawed religious tradition, which was meant to transform its practitioners and embrace matter in the process. It may be rejected as heresy, but it is impossible to really understand heresy until

you understand that heresy is impressively similar to orthodox Christianity, confusingly similar, and 'heresy' does *not* mean "the absolute opposite of what Christians believe." (Heresy is *far* more seductive than that.) Perhaps you may have heard the rumor that alchemists sought to turn lead into gold. The verdict on this historical urban legend, as with many urban legends, is, "Yes, *but...*"

Alchemy sought a way to turn lead into gold, but it has absolutely nothing to offer the greedy person who wants money to indulge his greed. Alchemy is scarcely more about turning lead into gold than astronomy is about telescopes. A telescope is a tool an astronomer uses to observe his real quarry, the stars as best they can be observed, and the alchemist, who sought to make matter into spirit and spirit into matter was trying to establish a spiritual bond with the matter so that the metals were incorporated into the person being performed. An Orthodox Christian might say the alchemist was seeking to be transfigured, even if that was a spiritually toxic way of seeking transfiguration or transformation—which is to say that the alchemist sought a profound and spiritual good. The alchemist sought gold that was above 24 karat purity, which is absurd if you think in today's material terms about a karat gold that was chemically up to 100% (24k) pure... but what we call a "chemist" today is the successor to what alchemists called "charcoal blowers", and chemistry today is a more sophisticated form of what the "charcoal blowers" were doing, not the alchemists. But the desire for purer-than-24k-gold becomes a much clearer and more intelligible desire when you understand that gold was not seen by the alchemists as simply a "container" for economic value, but the most noble substance in the material world. (And a "material" world that is not just "material" as Americans today would understand it.) If you look at Jesus' words in the Sermon on the Mount about "Store up treasures in Heaven," and "Do not store up treasures on earth," the alchemists' desire to transmute metals and eventually produce gold is much more of a treasure in Heaven than merely a treasure on earth. (Think about why it is better to have a heart of gold and no merely physical gold than have all the merely physical gold in the world and a heart of ice with it.)

Newton, introduced to me as one of the greatest physicists, spent more time on alchemy than on the science he is remembered for today. He was also, among other things, an incredibly abrasive person and proof that while alchemy promises spiritual transformation it at least

that while alchemy promises spiritual transformation it at least sometimes fails miserably, and there are a lot of other scathing things one could say about alchemy that I will refrain from saying. But I would like to suggest one way we could learn something from the alchemists:

When I wanted to explain the term "charcoal blower" by giving a good analogy for it, I searched and searched and couldn't find the same kind of pejorative term today. I don't mean that I couldn't find another epithet that was equally abrasive; we have insults just as insulting. But I couldn't find another term that was pejorative *for the same reason*. The closest parallels I found (and they were reasonably close parallels) to what lie behind the name of "charcoal blower" would be how a serious artist would see a colleague who produced mercenary propaganda for the highest bidder, or how a clergyman who chose the ministry to love God and serve his neighbor would view people who entered the clergy for prestige and power over others. (It may be a sign of a problem on our side that while we can understand why people might be offended in these cases, we do not (as the alchemists did) have a term that embodies that reprobation. The alchemists called proto-chemists "charcoal blowers" because the alchemists had a pulse.)

To an alchemist, a "charcoal blower" was someone merely interested in what we would today call the science of chemistry and its applications—and someone who completely failed to pursue spiritual purification. Calling someone a "charcoal blower" is akin to calling someone an "irreligious, power hungry minister." Whether they were right in this estimation or not, alchemists would not have recognized chemistry as a more mature development of alchemy. They would have seen today's chemistry as a completely unspiritual parody of their endeavor: perhaps a meticulous and sophisticated unspiritual parody, but a parody none the less.

This provides a glimpse of a thing, or a kind of thing, that can be very difficult to see today. "Alchemy is a crude, superstitious predecessor to real chemistry" or "Chemistry is alchemy that's gotten its act together" is what people often assume when the only categories they have are shaped by our age's massive scientific influence.

Science is a big enough force that young earth Creationists deny Darwinian evolution by assuming that Genesis 1 is answering the same kind of questions that evolution is concerned with, namely "What were the material details of how life came to be?" "What was the mechanism

that caused those details to happen?" That is to say, young earth Creationism still assumes that if Genesis 1 is true, that could only mean that it is doing the same job as evolution while providing different answers. It is very difficult for many people to see that Genesis 1-2 might address questions that evolution never raises: neo-Darwinian evolution is silent or ambivalent about all questions of meaning (if it does not answer "There is no meaning and that is not a question mature scientists should ask."). It is a serious problem if young earth proponents can read Genesis 1 and be insensitive to how the texts speak to questions of "What significance/meaning/purpose/goal does each creation and the whole Creation live and breathe?" This may be a simplification, but we live in enough of a scientific age that many people who oppose the juggernaut (in this case, neo-Darwinian evolution) still resort to disturbingly scientific frameworks and can show a pathological dependence of scientific ways of looking at the world, even when there is no conscious attempt to be scientific. Perhaps evolutionists may accuse young earth Creationists of not being scientific enough, but I would suggest that the deepest problem is that they are *too* scientific: they may not meet the yardstick in non-Creationist biology departments, but they try to play the game of science hard enough that whatever critique you may offer of their success in gaining science's sight, nobody notices how perfectly they gain science's blind spots—even when they are blind spots that make more sense to find in a neo-Darwinist but are extremely strange in a religiously motivated movement.

This is symptomatic of today's *Zeitgeist*, and it affects our understanding of time.

Time is something that I don't think can be unraveled without being able to question the assumed science-like categories and framework that define what is thinkable when we have no pretensions of thinking scientifically, along lines like what I have said of alchemy. I'm not really interested in calling chemists "charcoal blowers": the Pythagoreans would probably censure me in similar vein after finding I ranked such-and-such in a major math competition, did my first master's in applied math, and to their horror studied a mathematics that was *completely* secularized and had absolutely nothing of the "sacred science" "spiritual discipline" character of their geometry left.

I may not want to call scientists "charcoal blowers", but I *do* want to

say and explore things that cannot be said unless we appreciate something else. That something else... If you say that alchemy disintegrated to become chemistry, that something else disintegrated in alchemy with its secrets and something else purportedly better than what was in the open. Alchemy has a host of problems that need to be peeled back; they may be different problems than those of our scientific age, and it may make a helpful illustration before the peeling back further and cutting deeper that is my real goal, but it is a problematic illustration.

I once would have said that classical (Newtonian) physics was simply a mathematical formalization of our common sense. My idea of this began when I was taking a class that dealt with modern physics (after covering Einstein's theory of relativity). I grappled with something that many budding physicists grapple with: compared to classical physics, the theory of relativity and modern physics are remarkably counter-intuitive. One wag said, "God said, 'Let there be light!' And there was Newton. The Devil howled, 'Let darkness return!' And there was Einstein [and then modern physics], and the status quo was restored." Modern physics may describe our world's behavior more accurately, but it takes the strangest route to get to its result: not only is light both a particle and a wave, but everything, from a sound wave to you, is both a particle and a wave; nothing is exactly at any one place (we're all spread throughout the whole universe but particularly densely concentrated in some places more than others); it can depend on your frame of reference whether two things happen simultaneously; Newton's mathematically simple, coherent, lovely grid for all of space no longer exists, even if you don't consider space having all sorts of curvatures that aren't *that* hard to describe mathematically but are impossible to directly visualize. (And that was before superstring theory came into vogue; it seems that whatever doesn't kill physics makes it *stranger*.)

I would make one perhaps subtle, but important, change to what I said earlier, that classical Newtonian physics is a mathematical expression of common sense: I had things backwards and *the Western common sense I grew up with is a non-mathematical paraphrase of classical physics*.

One thing Einstein dismantled was a single absolute grid for space and a single timeline that everything fit on. That was something Newton (and perhaps others—see the chapter "The Remarkable Masculine Birth

of Time" in [Science as Salvation](#), Mary Midgley) worked hard to establish. What people are not fond of saying today is that "It's all relative" is something people might like to be backed by Einstein's theory, but *relativity* is no more *relativism* than 'lightning' is 'lightning bug'. In that sense the theory of relativity makes a far smaller difference than you might expect... Einstein if anything fine-tuned Newton's timeline and grid and left behind something practically indistinguishable. But let's look at Newton's timeline and not look at almost equivalent replacements later physics has fine-tuned. All of space fits on a single absolute grid and all of time is to be understood in terms of its place on a timeline. This is physics shaping the rest of its culture. *It's also something many cultures do not share*. I do not mean that the laws of physics only apply where people believe in them; setting aside miracles, a stove works as Newtonian physics says it should whether you worship Newton, defy him and disbelieve him whenever you can, or simply have never thought of physics in connection with your stove. I don't mean that kind of "subjective reality". That's not what I'm saying. But the experience of space as "what fits on a grid", so that a grid you cannot touch is a deeper reality than the things you see and touch every day, and the experience of time as "what fits on a timeline" is something that can be weaker or often nonexistent in other cultures. It's not an essential to how humans automatically experience the world.

There is a medieval icon of two saints from different centuries meeting; this is not a strange thing to portray in a medieval context because much as space was not "what fills out a grid" but spaces (plural) which were more or less their own worlds, enclosed as our rooms are, time was not defined as "what clocks measure" even if people just began to use clocks.

*Quick*—what are the time and date? I would expect you to know the year immediately (or maybe misremember because the year has just changed), and quite possibly have a watch that keeps track of seconds.

*Quick*—what latitude and longitude you are at? If you didn't or don't know the Chicago area and read in a human interest news story that someone took an afternoon stroll from Homewood to Schaumburg, IL, would those two names make the statement seem strange?

What if you continued reading and found out that Homewood is at 41°34'46"N and 87°39'57"W and Schaumburg is at 42°01'39"N and 88°05'00"W? Setting aside the quite significant fact that most of us don't

00 05 32w7 Setting aside the quite significant fact that most of us don't tell latitude and longitude when we see a place name, what would that say?

If you do the calculations, you see that saying someone walked from Homewood to Schaumburg and back in an afternoon is like a newspaper saying that the President was born in 671. Schaumburg and Homewood are both Chicago suburbs, but in almost opposite directions, and to the best of my knowledge no distance runner could run from Homewood to Schaumburg to Homewood in an afternoon—even in good traffic the drive would chew up more than a little bit of an afternoon.

Do you see the difference between how we approach and experience our position on the time-grid on the one-hand, and our latitudinal and longitudinal position on the other? Setting aside various questions about calendars, I would suggest that the way most of us neither know nor care what latitude and longitude we're at, can give a glimpse into how a great many people neither know nor cared not only what a watch says but what century they're in. (*Quick*—does your country include the "turn of the century" for degrees latitude or longitude?)

There are other things to say; I want to get into *chronos* or *kairos*, and some of the meaning of "You cannot kill time without injuring eternity." (One facet, besides the wordplay, is that time is an image of not only eternity but the Eternal One.) There are several images of time, or names of time, that I wish to explore; none of them is perfect, but all of them say something. But first let me give the question I am trying to answer.

## The Question

Before I say more about time in the sense of giving names to it, I would like to explain the question I am trying to answer, because it is perhaps idiosyncratically my own question, and one that may not be entirely obvious.

There is a book on college admissions essays that listed cliché student essays that almost immediately make an admissions reader's eyes glaze over. Among these was The Travel Experience, which went something like this:

In my trip to \_\_\_\_\_, I discovered a different way of life that challenged many of my assumptions. It even challenged assumptions I didn't know I had! Yet I discovered that their way of life is also valid and also human.

Note that this boiled down essay is ambiguous, not only about what region or what country, but for that matter what continent the writer has been to. And thus, however deep and interesting the experience itself may have been, the writeup is cliché and uninteresting.

This, in my opinion, is because the experience is deep in a way that is difficult to convey. If something funny happened yesterday on the way to the store, it is perfectly straightforward to explain what happened, but a deep cross-cultural counter is the sort of thing people grasp at words to convey. It's like the deepest gratitude that doesn't know how to express itself except by repeating the cliché, "Words cannot express my gratitude to you."

I'm from the U.S. and have lived in Malaysia, France, and England (in that order). I was only in Malaysia for a couple of months, but I was baptized there, and I have fond memories of my time there—I understand why a lot of Westerners come to Malaysia and want to spend the rest of

why a lot of westerners come to Malaysia and want to spend the rest of their lives there.

One thing I changed there was how quickly I walked. Before then, I walked at a swift clip. But walking that way comes across somewhere between strange and bothersome, and I had to learn to walk slowly—and that was the beginning of my encounter with time in Malaysia. In the cliché above, I learned that some things that were to me not just presuppositions but "just the way things were" were in fact not "just the way things were" but cultural assumptions and a cultural way of experiencing time, which could be experienced very differently.

Some of this is an "ex-pat" experience of time in Malaysia rather than a native Malaysian experience of Malaysian time (there are important differences between the two), but the best concise way I can describe it is that there are people in the U.S. who try and want to escape the "tyranny of the clock," and the tyranny of the clock is frequently criticized in some circles, but in Malaysia there is much less tyranny of the clock—I was tempted to say the tyranny of the clock didn't exist at all. People walk more slowly because walking is not something you rush through just to get it done, even if it's important that you arrive where you're walking to.

Every place I've lived I've taken something away. The biggest personal change I took from Malaysia had to do with time. That experience gave me something I personally would not have gained from hearing and even agreeing with complaints about the tyranny of the clock. The first domino started to topple in Malaysia, and the chain continued after I returned to the U.S.

What I tried to do on the outside was move more slowly and rebel against the clock, and on the inside to experience, or cultivate, a different time more slowly. (I was trying to be less time-bound, but interacted with time in ways I didn't do before Malaysia.) I still tried (and still try) to meet people on time, but where I had freedom, the clock was as absent as I could make it. And it was essentially an internal experience, in a sort of classically postmodern fashion. I wore a watch, but changed its meaning. Augustine regarded there being something evil about our existence being rationed out to us, God having his whole existence in one "eternal moment"; I equated time with the tyranny of the clock and "what a clock measures", and called timelessness a virtue. If we set aside the inconsistency between trying to "escape" time as not basically good and digging more and more deeply into time, you have something that was

growing in me, with nuance, over the years since I've been in Malaysia.

That sets much of the stage for why I began to write this. In one sense, this is an answer to "What can time be besides what the tyranny of the clock says it is?" In another sense it is recognizing that I took something good from Malaysia, but didn't quite hit the nail on the head: I regarded time as basically evil, something to neutralize and minimize even as I was in it, which I now repent of. That is an incorrect way of trying to articulate something good. I would like to both correct and build upon my earlier living-of-time, beginning with what might be called **the flesh of the Incarnation.**

## **The Flesh of the Incarnation**

One time several friends and I were together, and one of them, who is quite strong but is silver-haired, talked about how he couldn't put a finger on it, but he saw a sadness in the fact that the closest place for him to be buried that would satisfy certain Orthodox concerns was a couple of states over. I said that there were Nobel prizes for literature and economics, but there would never be a Nobel prize for scamming seniors out of their retirement. In that sense the Nobel prize is not just an honor for the negligible handful of physicists who receive that accolade, but every physicist. Perhaps there are a great many more honorable professions than there are Nobel prizes, but the Nobel prize doesn't vacuously say that physics is a good thing but specifically recognizes one physicist at a time, and by implication honors those who share in the same labor.

I said that "God does not make any generic people," and I clarified that in the Incarnation, Jesus was not a sort of "generic person" ("I went to the general store and they wouldn't sell me anything specific!") who sort of generically blessed the earth and in some generic fashion sympathized with those of us specific people who live in time. God has never made a specific person, and when Christ became incarnate, he became a specific man in a specific place at a specific time. As much as we are all specific people who live in a specific place at a specific time, he became a specific person who lived in a specific place at a specific time, and by doing that he honored every place and time.

"The flesh of the Incarnation," in Orthodox understanding, is not and cannot be limited to what an atheist trying to be rigorous would consider the body of Christ. The Incarnation is a shock wave ever reaching out in different directions. One direction is that the Son of God became a Man that men might become the Sons of God. Another direction is that Christ

the Savior of man or the Church can never be separated from Christ the Savior of the whole cosmos, and for people who are concerned with ecology, Christ's shockwave cannot but say something profound from the Creation which we must care for. Sacraments and icons are part of this Transfigured matter, and the Transfiguration is a glimpse of what God is working not only for his human faithful but the entire universe he created to share in his glory.

To me at least, "the flesh of the Incarnation" is why, while the Catholic Church is willing to experiment with different philosophies and culture, because they are not part of the theological core, the Orthodox Church has preserved a far greater core of the patristic philosophy and culture. It is as if the Catholic Church, getting too much Augustine (or even worse, DesCartes), said "Spirit and matter are different things; so are theology and philosophy. We must keep the spirit of theology, but matter is separate and can be replaced." An Orthodox reply might be "Spirit and matter are connected at the most intimate level; so are theology, philosophy and culture. We must keep the spirit of theology without separating it from the philosophy and culture which have been the flesh of the Incarnation from the Church's origin."

If Jesus was not a "generic person", and I am not supposed to be a "generic person", then the place in time he made for you is to be transfigured as the flesh of the Incarnation. What I mean by "the flesh of the Incarnation" is that Christ became Incarnate at a specific time and place, and by so doing he honored not only your flesh and mine—he is as much a son of Adam as you and me—but every time and place.

There is a major Orthodox exegesis which looks at the Gospels and says that when Pilate presented Christ to the crowd and said, "*Idou ton anthropon.*" ("Behold the man", Jn 19.5), he was prophesying like Caiphas and (perhaps without knowing it) completing the Genesis story; when Christ on the cross said, "It is finished," he announced that the work of Creation which was begun in Genesis had come to its conclusion—not, perhaps, the end of history, but the beginning of the fulness which Creation always needed but is only found at the cross. There are theologians today which answer the question "When did God create the earth?" by giving the date of the crucifixion: not that nothing existed before then, but then it was made complete. 25 March 28 AD is, in commercial terms, not the beginning of when prototypes began to be

assembled and plans began to be made towards a product release, but the date that the finished product is released and thereafter available to the public. The Cross is the axis of the world, so that the Incarnation is not simply the central event in history but the defining event, not only in the time and place that we falsely consider remote which Jesus lived in, but your time and mine.

## A Paradox: Historical Accuracy and Timelessness

I read a cultural commentary on the Bible cover to cover (IVP Bible Background Commentary: [Old Testament](#), [New Testament](#)), and in one sense I'm glad I read it, but in another sense, I think I would have been better off reading the Bible cover to cover another time. Or, for that matter, creating computer software or pursuing some other interest outside of the Bible and theology.

Years earlier, I said I wished I could read a cultural commentary on the Bible, but reading it drove home a point in a Dorothy Sayers essay. The essay suggested that "period awareness", our sharp sense of "That was then and this is now" that puts such a sharp break between the past and the present, is a product of the Enlightenment and something a great many periods do not share. When one reads the [Canterbury Tales](#) and asks what they thought about cultures, the answer is that though the stories begin in classical times there is no modern sense of "These people lived in another time so I need to try to be historically accurate and keep track of lots of historical context to take them seriously."

What I have realized, partly in writing my first theology thesis in Biblical studies, was that a lot of cultural commentary is spiritually inert when it is not used as a tool to manipulate or neutralize the Bible for contradicting what's in vogue today. Even when the sizeable "lobbyist" misuse of cultural context is ignored, there is a big difference between scholarly cultural and historical inquiry and a cultural sermon illustration—and it's *not* that less scholarly pastors do a half-baked job of something "real" scholars do much better. Cultural sermon comments are selected from a vast body of knowledge specifically because they illuminate the text and therefore at least can enhance how the text speaks to us.

"Serious", "real" scholarship tends to bury the text's meaning under a lot of details and result in the same kind of loss of meaning that would happen if someone asked what a Pulitzer Prize-winning novel meant and the answer was to explain try to explain everything about how the novel came to be, including how the author's food was prepared, how the editing process was managed, and perhaps a few notes on how a Pulitzer Prize novel, after the award is received, is marketed differently from novels that haven't received that award.

I would like to suggest that in this piece my opening historical illustration did not detail everything a "historical-critical" study would get bogged down in, and showed independence from the historical-critical version of what scholarly accuracy means *precisely as it challenged a popular historical misunderstanding of alchemy*.

How does this fit together? There are two things. First of all, I disagree with most scholarship's center of gravity. "Historical-critical" scholarship, in a bad imitation of materially focused science, has a material center of gravity, and almost the whole of its rigor can be described in saying, "Look down as carefully as you can!" There is a painting which shows two philosophers, Plato and Aristotle. You can tell them apart because Plato is pointing up with one finger, and Aristotle is pointing down to material particulars with one finger. The problem with "historical-critical" scholarship in theology—and not only "historical-critical" scholarship—is that it asks Aristotle to do Plato's work. It asks the details of history to provide theological meaning. (Which is a bit like using a microscope to view a landscape, only worse and having more kinds of problems.)

Dorothy Sayers points out that up until the Enlightenment, people producing Shakespeare plays made no more effort to have the actors dress like people did in Shakespeare's days than Shakespeare himself felt the need to dress ancient characters in authentic Roman styles of clothing. Shakespeare's plays were produced because they had something powerful that spoke to people, and people didn't have this rigid historical dictate that said "If you will produce Shakespeare authentically, that means you go out of your way to acquire costumes nobody wears today." In the Globe Theatre, people were dressed up like... well, *people*, whether that meant Rome or the "here and now". And now theatre companies will be provocative or "creative" and change the setting in a Shakespeare play so that things look like some romanticization of the Wild West, or classy

20's gangsters, or (*yawn*) contemporary to us, but if you exclude people who are being a bit provocative, the normal way of putting on Shakespeare is not by having people dress the way people normally dress, but by doing research and putting people in exotic clothing that clearly labels the characters as being From Another Time.

Shakespeare's plays are produced today because they speak today, in other words because they are timeless. Being timeless doesn't mean literally being unrelated to any specific historical context ("I went to the general store and they wouldn't sell me anything specific!"). It means that something appears in a particular context and in that context expresses human-ness richly and fully enough that that human fingerprint speaks beyond the initial context. It means that there is a human bond that can bridge the gap of time as beautifully as two people having a friendship that simultaneously embraces and reaches beyond the differences of culture that exist between their nations. And it reflects a center of gravity that the important thing about Shakespeare is not that his English was hard to understand even hundreds of years ago, nor that people dressed a certain way that is different from any country today, but a human, spiritual center of gravity that not only speaks powerfully in the West centuries later but speaks powerfully outside the West. Shakespeare's center of gravity is not in this or that detail, but in a human pulse.

## Wind and Spirit

Let me look at something that appears to be unrelated.

The wind blows where it wills, and you hear the sound of it, but you do not know where it comes from or where it goes; so it is with every one who is born of the Spirit.	The wind blows where it wills, and you hear the sound of it, but you do not know where it comes from or where it goes; so it is every one who is born of the Wind.	The Spirit Spirits where it wills, and you hear the sound of it, but you do not know where it comes from or where it goes; so it is with every one who is born of the Spirit.
---	--	---

I can count on my fingers the number of points where I would gripe about the best English translations (if a euphemistically mistranslated Song of Songs only counts as one gripe). You don't need to study ancient languages to know the Bible well. But there are occasional points where a language issue cuts something out of the text.

One particularly Orthodox gripe about Western translations is that they use the word "Christ" for the Son of God and "anointed" to have a range of meanings and include kings priests, objects that were considered sacred, and the whole religious community (this latter in both Old and New Testament). This is not because of what is in the original language. People may hear—I heard—that Messiah or Christ means, "Anointed One", but the English translations I know introduce a sharper distinction than the text supports, and really drains the realization of verses that show another side of the New Testament's language of us being called to be sons or children of God. I remember the shock I had when I was reading the (Latin) Vulgate and David, refusing to call Saul, called him "christum Domini" ("the Lord's christ," but the Latin, like Hebrew and Greek before it, did not distinguish i.e. "Christum" from "christum".) I John 2:20 in the RSV says, "But you have been anointed by the Holy One,

and you all know." That obscures a dimension to the text that legitimately could be replaced by a different part of speech and clarified, "But you have been made christ's by the Holy One, and you all know." (If you don't like changing a part of speech, you could look at texts like Sometimes you get C.S. Lewis saying "Every Christian is to become a little christ. The whole purpose of being a Christian is simply nothing else. The Son of God became a man that men might become the Sons of God." But something of the knowledge of who we are to be in Christ is crippled when translations split up XPICTOC or its Hebrew equivalent because they are afraid to let people see that not only is Christ the Son of God and the Christian son of God, but one who is in the Christ is a christ.

That is the translators' fault. In the text cited above (Jn 3.8), from Jesus' discussion of flesh and Spirit/spirit, the same word in Greek (ΠΝΕΥΜΑ) carries the meaning of "Spirit", "spirit", and "wind" in the broader passage. I was tempted to write that ΠΝΕΥΜΑ carries that range of meanings, but that's a little more deceptive than I'm comfortable with. It would be more accurate to say that neither "spirit" and "wind", nor "Spirit and spirit", represented sharply distinguished categories. In a way Jesus is punning but in a way he is making an observation about spirit/wind that does not rest on the distinction.

Let me quote the RSV for the longer passage (Jn 3.1-12):

Now there was a man of the Pharisees, named Nicodemus, a ruler of the Jews. This man came to Jesus by night and said to him, "Rabbi, we know that you are a teacher come from God; for no one can do these signs that you do, unless God is with him."

Jesus answered him, "Truly, truly, I say to you, unless one is born anew, he cannot see the kingdom of God."

Nicodemus said to him, "How can a man be born when he is old? Can he enter a second time into his mother's womb and be born?"

Jesus answered, "Truly, truly, I say to you, unless one is born of water and the Spirit, he cannot enter the kingdom of God. That which is born of the flesh is flesh, and that which is born of the Spirit is spirit. Do not marvel that I said to you, 'You must be born anew.' The wind blows where it wills, and you hear the sound of it, but you do not know whence it comes or whither it goes; so it is with every one who is born of the Spirit."

Nicodemus said to him, "How can this be?"

NICODĒMUS SAID TO HIM, "HOW CAN THIS BE?"

Jesus answered him, "Are you a teacher of Israel, and yet you do not understand this? Truly, truly, I say to you, we speak of what we know, and bear witness to what we have seen; but you do not receive our testimony. If I have told you earthly things and you do not believe, how can you believe if I tell you heavenly things?"

This is a rather big passage to try to unravel, but let me point out one thing. Jesus is dealing with a spiritual leader, and that leader's question, "How can a man be born when he is old?" is probably not just a failure to recognize that Jesus was speaking figuratively (especially if "figuratively" means what it means today, i.e. "a consolation prize for something that is dismissed as not true, at least not literally"). Besides saying that Nicodemus might not be stupid, I might suggest that his failure to understand underscores that he was being told something that's difficult to understand.

I'm almost tempted to write ΠΙΝΕΥΜΑ instead of spirit or Spirit because that forces a distinction that isn't there at all in the Greek New Testament and often may not belong in good theology. With that noted, I'm going to write Spirit with the understanding that it is often not meant to be read as separated from spirit and often not distinguished.

A group of people misunderstood this and other Spirit/flesh texts to mean that we should live in the part of us that is spirit and the part of it that was flesh, and they made a number of theological errors, and unfortunately some Christians have since treated the Spirit/flesh texts as a "problem" that needs to be "handled" (and, one might infer, not quite something that was put in the Bible because it would help us). This reaction makes it harder to understand some passages that say something valuable.

We are to become all Spirit. This does not, as those Gnostics believed, mean that our bodies are evil, or that any part of God's Creation is created evil. To become Spirit is to begin to live the life of Heaven here on earth. That doesn't mean that what is not-God in our lives now is eliminated; it means that our whole lives are to become divine. It means that the whole cosmos has been in need of salvation, and Christ comes as Savior to his whole Creation and his whole Creation is to be drawn into him and made divine. If you buy a gift for a friend, let us say a watch, and delight in giving it, that watch is no longer merely a possession you can hoard, not

just something a machine spat out. It is part of your friendship with that friend and it has been drawn from the store aisle into that friendship. To use an ancient metaphor, it has been drawn into the body under the head of friendship. (And now it means something a factory could never put into it.) If you have begun to believe that things don't boil down to a materialist's bottom line, the watch has become more real. In the same sense, not just our "souls" or "spirits" misunderstood as opposite to our bodies, but all of us and all of our lives are to become Spirit, or in the more usual Orthodox terminology become deified or divinized.

To say that the here and now that God has placed us in is "the flesh of the Incarnation" is not intended as some kind of opposite to Spirit. That flesh is spiritual; it is the whole Creation as it becomes Spirit and as it has become Spirit.

That much is generic; it is legitimate to say about time, because it is legitimate to say about almost anything. I would now like to turn and say something more specific about time.

I don't like to put things in terms of "synchronicity." For those of you not familiar with synchronicity, it's an idea that there is more to causality and time than isolated particles moving along a linear timeline, which is well and good, but this is a body missing its head, the Spirit. It's kind of a strange way of being spiritual while not being fully connected to Spirit.

"That which is born of flesh is flesh; that which is born of Spirit is Spirit. The Spirit Spirits where it wills, and you hear the sound of it, but you do not know where it comes from or where it goes; *so it is with every one who is born of the Spirit.*"

To live in the Spirit, and to become Spirit, is for one and the same reason the proper footing for synchronicity, synchronicity done right, and moving beyond "subjective time." Let me talk about subjective time before talking more about synchronicity.

Subjective time is what some people have observed when people have realized that a watch is a poor indicator of how we experience time. Time flies; it can drag; but whatever watches can do, they don't tell how fast it seems like time is moving. In other words, subjective time at least is not what a watch measures. Now this is good as an answer to the question "What can we call time besides 'what a watch measures'?" but doesn't go far enough. Subjective time is the subjective time of a "me, myself, and I". It is the time of an atom, that cannot be divided further. And that limits it.

...  
Time in the Spirit is an orchestrated, community dance. Not that the specific person is annihilated, but the specific person is transfigured. And that means that what is merely part of the private inner world of a "me, myself, and I" is in fact something vibrant in a community. Liturgical time, which I will talk about later, is one instrument of this sharing. But it is not the only one. God is the Great Choreographer, and when his Spirit orders the dance, it is everything in synchronicity and everything in subjective time and more. What was eerie, a strange occult thing people try to mine out in Jungian synchronicity becomes a pile of gold out in the open. If Jungian synchronicity is a series of opportunities to shrewdly steal food, the Dance is an invitation to join the banquet table.

*Dance, then, wherever you may be, for I am the Lord of the Dance,  
said he. (Old Shaker hymn)*

## Immortalists and Transhumanists

I was reading a novel by one of my favorite authors in which some troubled characters constantly waxed eloquent about a movement, the "Immortalists", which struck me as rather far-fetched, too preposterous a motivation for literature... until I found a group very much like them, the Transhumanist movement, on the web.

The idea of Transhumanism is that we have lived in biological bodies so far, but we are on the cusp of making progress, and "progress" is improving on the human race so that we humans (or transitional humans —"Transhumanism" abbreviates "transitional-human-ism", and transhumanists consider themselves transhuman) can be replaced by some "posthuman" (this is supposed to be a good thing) creatures of our own devising which are always as high as if they were on crack (or higher), can run and jump like superheroes, and in general represent the fulfillment of a certain class of fantasies. (It's like disturbing science fiction, only they're dead serious about replacing the human race with something they consider better.) It's the only time reading philosophy on the web has moved me to nausea, and that broad nexus of spiritual forces is something I tried to lampoon in [Yonder](#).

Setting that obscure movement aside, it seems a lot like the progress of technology has been to achieve watered-down transhumanist goals while we live in the bodies God gave us. I read an interesting article describing how before electric lights even though there were candles most of society seemed to shut down at sundown. Now people tend to kind of sleep when it's dark and kind of sleep when it's light, but we have made ourselves independent of something most humans in history (let alone before history) were tightly attuned to. I can also buy pills to take to subdue pain, or slightly misuse my body and not feel as much of the

...the pain, or maybe my body and the rest of the natural pain. If I don't care either about my health or breaking laws that are there for our good, there are illicit pills that could make me colossally strong: I'm moderately strong now but I could become stronger than most professional athletes. As a member of my society I have space-conquering tools—a telling name—which mean that I can move around the world and I can email and talk with people without knowing and perhaps without caring if they are next door or a thousand miles away. I can also take other pills when I get much older and defeat the normal limits age puts on lust. There are a lot of limits humans have lived with time out of mind, but we've discovered how to push them aside.

I heard of a dialogue where one person said, "I don't have enough time," and received the answer, "*You have all the time there is.*" In many cultures people experience time more as something that surrounds them but they're not terribly aware of, like the air they breathe, than a sort of scant commodity one cannot have enough of. And that is a clue to something.

However much we've figured out mini-transhumanist ways to push back limitations, the limitation of "all the time there is" is one we can't eliminate. We can fudge a bit with coffee or buy into some time management system, but there is a specific significance to time in our culture that wouldn't be there in other cultures where people rise at sunrise and go to sleep at sunset. Compared to how much we can neutralize other limitations, the limitation of "all the time there is" is a limitation that resists most neutralization.

That sounds terrible, but I would draw your attention to what Transhumanism is really after. I heard one professor refer to a centuries-old Utopian vision of turning the sea into lemonade (among other things) as "*une Utopie des enfants gaspillés*" ("a Utopia of spoiled children"). The Transhumanist vision, which has already happened in miniature, is the ability to pursue "bigger better faster more" of what spoiled children want. What it is not is a way to grow into what a mature adult wants.

I'm not saying we should get rid of medicine, or anything like that. Medical knowledge has done some impressive things. But I would pointedly suggest that the kind of things technological advances give us give us much more what spoiled children want than what a mature adult would recognize as an aid to maturity. There are exceptions, and I would not argue any sort of straight Luddite position: I try to moderate my use

of technology like I try to moderate a lot of other good things, but I am very glad for the opportunity to live in an age where webpages are possible, and to have gotten in at a good time. But the "all the time there is" limitation is in fact the kind of boundary that helps mature adults grow more mature, and if we are willing to take it there is an occasion for maturity because we can't take a pill to have all the time we want.

## **From the Fifth Gospel to Liturgical Time**

The Gospel According to Thomas isn't the Fifth Gospel. (At least, in ancient times when Christians said "the Fifth Gospel" they didn't mean the Gospel According to Thomas. No comments from the peanut gallery about the Gospel According to Thomas being the Fifth Bird Cage Liner.)

If a couple of people meet, become acquainted, become friends, start dating, become engaged, and get married, when does the marriage begin? In one sense, the wedding is a formal threshold: before then they aren't married, afterwards they are. But in another sense the engagement becomes part of the marriage, as does the courtship, the friendship, the acquaintance, even the first meeting and possibly things in their lives that they would say prepared them for the meeting. The marriage moves forward from the wedding date but it also reaches backwards and creates something in the past. What may have been an improbable or forgettable first meeting is drawn into the marriage; the same thing is going on as with the watch which becomes not simply matter but part of a friendship.

John Behr has provocatively suggested that the worst thing that has happened to Christianity in the past 2000 years has been the canonization of the New Testament so it is placed as Scripture alongside the Old Testament, and becomes the second and final volume in a series. What he means by that may not be obvious.

The relationship between the Old and New Testament is misunderstood somewhat if the New Testament is simply the final chapter of the Old Testament. It would be better, if still imperfect, to say that the New Testament is Cliff's Notes on the Old Testament, or the Old Testament was a rich computer game and the New Testament was the strategy guide that we need to unlock it's secrets. It is no accident that the first people we know of to put the New Testament alongside the Old

Testament, and make commentaries on both Testaments, were Gnostics who tried to unlock the New Testament when orthodox Christians let the New Testament unlock the Old.

Quick—which Christ-centered Gospel did Handel use in the Messiah to tell of the Messiah or Christ? The answer is the Fifth Gospel: Isaiah. The passages cited in the Messiah are not a few prophetic exceptions to a non-Christ-related Old Testament; they are part of the Old Testament unlocked, and that same reading is how the earliest Christians read the Old Testament Scriptures.

Now it was Mary Mag'dalene and Jo-an'na and Mary the mother of James and the other women with them who told this to the apostles; but these words seemed to them an idle tale, and they did not believe them.

That very day two of them were going to a village named Emma'us, about seven miles from Jerusalem, and talking with each other about all these things that had happened.

While they were talking and discussing together, Jesus himself drew near and went with them.

But their eyes were kept from recognizing him.

And he said to them, "What is this conversation which you are holding with each other as you walk?" And they stood still, looking sad.

Then one of them, named Cle'opas, answered him, "Are you the only visitor to Jerusalem who does not know the things that have happened there in these days?"

And he said to them, "What things?" And they said to him, "Concerning Jesus of Nazareth, who was a prophet mighty in deed and word before God and all the people, and how our chief priests and rulers delivered him up to be condemned to death, and crucified him. But we had hoped that he was the one to redeem Israel. Yes, and besides all this, it is now the third day since this happened.

Moreover, some women of our company amazed us. They were at the tomb early in the morning and did not find his body; and they came back saying that they had even seen a vision of angels, who said that he was alive. Some of those who were with us went to the tomb, and found it just as the women had said; but him they did not see."

And he said to them, "O foolish men, and slow of heart to believe

And he said to them, O foolish men, and slow of heart to believe all that the prophets have spoken! Was it not necessary that the Christ should suffer these things and enter into his glory?"

And beginning with Moses and all the prophets, he interpreted to them in all the scriptures the things concerning himself. So they drew near to the village to which they were going. He appeared to be going further, but they constrained him, saying, "Stay with us, for it is toward evening and the day is now far spent." So he went in to stay with them.

When he was at table with them, he took the bread and blessed, and broke it, and gave it to them. And their eyes were opened and they recognized him; and he vanished out of their sight.

They said to each other, "Did not our hearts burn within us while he talked to us on the road, while he opened to us the scriptures?"

There's a lot going on here; I'm not going to address why Mary Magdalene was known as the Apostle to the Apostles, but I would suggest that instead of saying today what a feminist would be tempted to say, that the men were sexist and wouldn't believe a woman when she bore the glad tidings, there was a veil over their minds, much like Paul describes in II Cor 3. If a woman's witness did not suffice, Jesus standing with them in person and talking with them still had no effect until the very end. And there is something going on here with a number of resonances in our lives. They couldn't see Christ in the Scriptures (which were then the Old Testament, because the Gospels and Epistles had never been written), and they couldn't see Christ appearing before them, even literally. And that is not because they are imperceptive and we are perceptive. The story is a crystallization of how we often meet Christ.

What is the point of all this? The most immediate reason is not to say that the Bible is 80% documents produced by Judaism before Christianity came around and 20% Christian documents, but transformed, transmuted if you will, into 100% Christian documents. When the book of Psalms opens with, "Blessed is the man who does not walk in the council of the wicked, nor stand in the way of sinners, nor sit in the seat of cynics," that refers first and foremost to Christ. I myself have not gotten very far in this way of reading the Scriptures, but I hope to, and I believe it will pay rich dividends.

And there is something going on here that is going on in when a

marriage reaches backwards, or a watch becomes part of a friendship. It is connected with what is called "recapitulation", which I think is an unfortunate technical theological term because the metaphor comes across as in "Ok, let me try and recap what we've said so far," which is a wishy-washy metaphor for something deep. Orthodox talk about deification, and for us to be deified is a specific example of recapitulation in Christ. Recapitulation means "re-heading", and while in a sense very consistent with how recapitulation works, I've somewhat indistinguishably talked about how we can be Recapitulated or Re-headed in Christ, becoming body to his head and connected in the most intimate way, thereby becoming Christ (i.e. Recapitulation with a big 'R'), and how something can become part of the body of something that can itself be recapitulated in Christ (recapitulation with only a little 'R'). Perhaps that sentence should be dragged out into the street and shot, but when I talked about the gift of a watch becoming part of a friendship, the head of its reheading is something created, but both the watch and the friendship can be Recapitulated in Christ with the re-heading of the watch to be part of the friendship is itself part of what is Recapitulated in Christ, i.e. which is not merely brought under a head but connected to Christ as its head.

Let's move on to clearer language and a clearer example—one that has to do with our time. The head of the whole body of time we live is our time in worship, liturgical time. This both that there is a liturgical rhythm of day, week, and year, with different practices that help us connect with the different liturgical rhythms (by the way, the first major piece of advice my spiritual father gave me was to take 5-10 years to step into the liturgical rhythm), but that's not all. It means that our time in worship, which is not just time in a funnily decorated room with our particular club, sets the pace for life. It means that what is crystallized and visible in worship is perhaps hidden but if anything more powerfully manifest in a whole life of worship. It means that not just going to Church but working and playing are themselves worship, and they fulfill worship. It means, and I write this on the Sunday of the Last Judgment, that our worship is hollow and empty when we sing hymns to God on Sunday and then turn away in icy silence when someone asks our help—for it is not that someone we have icily turned away from, but Christ (see Matt 25:31-46). In the discourse at the Last Supper, Christ did not say that all would

"know you are my disciples by this, that you have the most beautiful services," but that all would "know you are my disciples by this, that you love one another." (Jn 13.35) That is something that happens *outside* of Church first and foremost. Liturgical time is the basis for time in our lives.

Liturgical time is (or at least should be) the head of time in a life of worship (if "head" is used in the sense of "recapitulation" or "re-heading"), but it is not its own head. The head of time in worship is eternity in Heaven, and that means that just as life is the concrete manifestation of worship, in time but in other matters as well, but liturgical time is not people gathered in a room for an interval but people transported to Heaven in what is not exactly a time machine, or not *merely* a time machine, but an "eternity machine". The head of eternity in Heaven is the Eternal One whose glory shines through Heaven on earth.

What does this concretely mean for our experience of time? It means much the same as whether the material world was created good by God or evil by someone lesser. Pains and physical pleasures, to give a superficial example, will be there whether we believe the material world is good or evil. But it makes a difference whether you believe the sweetness of honey is a touch of love from God or a hatefully baited barb from Satan. Now part of really coming alive is being more than pleasure and pain and letting go of pleasures that they may be recapitulated or re-headed and drawn into what is Spirit. But even then, the Christian ascetic who lets go of a good is very different from a Gnostic ascetic who hatefully rejects it as evil. Pleasures and even pains, and joys and sorrows, are fuller depending on their basis.

Augustine has been accused of inadequate conversion—maybe he became Christian, but he continued being too much of a Manichee. I am sympathetic to that view, and it makes good sense of Augustine's sense that there is something violent to us about being in time, with our being stingily rationed out to us, infinitesimal bit by bit (some have said the present "barely exists" because it is an instantaneous boundary where the future rushes into the past without stopping to rest), while God has its being all at once. I was sympathetic to that view until not long ago; I thought of time as an evil thing we endure to get to the good of eternity—which is the wrong way of putting it.

*Time is a moving image of eternity* and is recapitulated in Christ. We

miss something fundamental if we simply say that it is less than eternity; it participates in the glory. Furthermore, there is a case to be made that we misunderstand eternity if it is "frozen time" to us, if it is an instant in time which is prolonged, or even worse, is deprived of a moving timeline. Whatever eternity is, *that can't be it*. That is something fundamentally less than the time in which we grow and learn and breathe. Eternal life, which begins in this world, is God's own life, greater than created being but something that projects its glory into time. I once asked a friend if the difference between Maximus Confessor and Plato on Ideas was that for Plato there was one Idea that covered a bunch of material shadows (what we would think of as "real", but the Ideas were more real), and he waved that aside without really contradicting me. He said that the Ideas, or ΛΟΓΟΙ (*logoi*), were static in Plato but dynamic in Maximus Confessor. *Logoi* are ideas loved in the heart of God from all eternity, and you and I only exist because we each have a *logos* in the heart of God which is what we are trying to become. And I don't know how to reconcile what I know of dynamism with being outside of time, but eternity is not the deprivation of time, but something more time-like than time itself. Time becomes eternal when it is recapitulated in Christ.

## Kairos and Chronos

Bishop K.T. Ware began one lecture/tape by saying that at the beginning of the Divine Liturgy, there is a line that is very easy to overlook: the deacon tells the bishop or his deputy the priest, "It's time to get started." Except that he doesn't say, "It's time to get started," but "It is time for the Lord to act."

He pointed out both that the liturgy is the Lord's work, even if both priest and faithful must participate for it to be valid (he said that the pop etymology of liturgy as "lit-urgy", "the people's work", may be bad etymology but it's good theology). But another point tightly tied to it is the exact Greek word that is translated "time."

There are two words that are both translated time, but their meanings are very different. Translating them both as time is like translating both genuine concern and hypocritical flattery as "politeness" because you are translating into a language that doesn't show the distinction. Perhaps the translators are not to be blamed, but there is something important going on in the original text that is flattened out in English. And when the deacon says "It's time to get started," it does *not* mean "My watch says 9:00 and that's when people expect us to start," but "This is the decisive moment." In the Gospels, when Jesus' own brothers and sisters failed to grasp who he was just as completely as the disciples on the road to Emmaus, he tells them, "My kairos has not yet come, but your kairos is always here." (Jn 7.6).

Orthodox do not have any kind of monopoly on this distinction, but we do have a distinction between what is called "chronos" and what is called "kairos." Chronos is ordinary if we take a harsh meaning to the word, instead of "everything is as it should be". Chronos at its worst is watching the clock while drudgery goes on and on. If chronos is meaningless time, kairos is meaningful time, dancing the Great Dance at

a decisive moment. It is putting the case too strongly to say that the West is all about chronos and Eastern Christianity is all about kairos, but I do not believe it is putting the case too strongly to say that East and West place chronos and kairos differently, and kairos is less the air people breathe in the West than it should be.

I don't think that chronos needs as much explanation in the West; chronos is what a clock measures; the highbrow word for a stopwatch is "chronometer" and not "kairometer". The distinction between kairos and chronos is somewhat like the distinction between I-Thou and I-It relationship. But let me give "ingredients" to kairos, as if it were something cooked up in a recipe.

- Chronos.
- Eternity.
- Appointed time.
- Rhythmic circular time with interlocking wheels.
- Linear unfolding time.
- Moments when you are absorbed in what you are doing.
- Decisive moments when something is possible that was impossible a moment before and will be impossible a moment later.
- Dancing the serendipitous Great Dance.
- Total presence.

But kairos is not something cooked up in a recipe; chronos may be achievable that way, but kairos is a graced gift of God.

## **We Might All Be Alcoholics**

A recovering alcoholic will tell you that alcoholism is Hell on earth. He would say that it is the worst suffering on earth, or that it is the kind of thing you wouldn't wish on your worst enemy.

And the point that healing and restoration begins is exquisitely painful. An alcoholic has a massive screen of denial that defeats reasoning. The only semi-effective way to defeat that denial is by a massive dose of even more painful reality that can break down that screen, some of the time. (An intervention.)

If alcoholism is Hell, why don't alcoholics step out of it? Some people in much less pain find out what they need to do to stop the pain and leave. They take off a pair of shoes that is too tight, or ask for an ambulance to treat their broken arm (and I believe someone who's been through both experiences would say that alcoholism is a much deeper kind of pain than a broken arm).

Surely alcoholics must have a sense that something is wrong—and that's what they're trying to evade. That's what half an alcoholic's energy goes into evading, because stopping and saying "I'm an alcoholic." is the greatest terror an alcoholic can jump into. It may be a greater fear than the fear of death—or it is the fear of the death, a step into where nothing is guaranteed.

And that is where to become Orthodox might as well be recognizing you are an alcoholic. Not, perhaps, that every Orthodox has a problem with alcohol, but we all have a problem, a spiritual disease called sin that is not a crime, but is infinitely worse than mere criminality. And the experience an alcoholic says saying, "My name's Ashley, and I'm an alcoholic," for the first time, is foundational to Orthodox religion. "Here is trustworthy saying that deserves acceptance: Christ Jesus came into the world to save sinners, of whom I am the first."

There is a book, I have been told, among alcoholics called Not-God, because part of dealing with the cancer of alcoholism, as difficult as recognizing a terrible problem with alcohol, is recognizing that you have been trying to be God and not only are you not God, but your playing God has caused almost untold troubles.

Repentance is the most terrifying experience an Orthodox or an alcoholic can experience because when God really confronts you, he doesn't just say "Give me a little bit." He says, "Give me everything," and demands an unconditional surrender that you write a blank check. This is as terrifying as the fear of death—or perhaps it is the fear of death, because everything we are holding dear, and especially the one thing we hold most dear, must be absolutely surrendered to—the Great Physician never tells us what, because then it would not be the surrender we need. We are simply told, "Write a blank check to me. Now."

How does this square with becoming a little Christ?

So if there is any encouragement in Christ, any incentive of love, any participation in the Spirit, any affection and sympathy, complete my joy by being of the same mind, having the same love, being in full accord and of one mind. Do nothing from selfishness or conceit, but in humility count others better than yourselves. Let each of you look not only to his own interests, but also to the interests of others.

Have this mind among yourselves, which is yours in Christ Jesus, who, though he was in the form of God, did not count equality with God a thing to be grasped, but emptied himself, taking the form of a servant, being born in the likeness of men. And being found in human form he humbled himself and became obedient unto death, even death on a cross. Therefore God has highly exalted him and bestowed on him the name which is above every name, that at the name of Jesus every knee should bow, in heaven and on earth and under the earth, and every tongue confess that Jesus Christ is Lord, to the glory of God the Father.

The two paragraphs, as I have broken up Phil 2:1-11 (RSV), are complementary. What the last paragraph says is that the equal Son of God emptied himself and kept on emptying himself further and suffering further until there is nothing left to give. And this is not a sinner, a mere creature, but the spotless and sinless Son of God showing what it means

to be divine. It is not in Heaven that Christ shows the full force of divinity, but by emptying himself, willingly, to death on a cross and a descent into the realm of the dead. That is the moment when death itself began to work backwards—and humbling and emptying ourselves before God is the sigil of being exalted and filled with God's goodness. But the other side of the coin is that if we think we can become divine, or even be human, while not being emptied, we are asking to be above Christ and expecting to have something that is utterly incoherent.

When we recognize that we are not God, then we become christs. When we empty ourselves, and let go of that one thing we are most afraid of giving to God, then we discover, along with the recovering alcoholic, that what we were most afraid to give up was a piece of Hell. We discover, with the alcoholic, that what we were fighting God about, and offering him consolation prizes in place of, was not something God needed, but something we needed to be freed from.

This emptying, this blank check and unconditional surrender, is what makes divinization possible. I was tempted in writing this to say that it is the ultimate kairos, but that's exaggerating: the ultimate kairos is the Eucharist, but if we refuse this kairos, we befoul what we could experience in the Eucharist. If we are talking about a decisive moment that is not our saying "I want to make myself holier" so much as us hearing God say "You need to listen to me NOW," then however painful it may be it is a step into kairos and a step further into kairos. And only after the surrender do we discover that what we were fighting against was an opportunity to step one step further into Heaven.

Repentance is appointed time. Repentance is *the* decisive moment, one we enter into again. Repentance is simultaneously death and transfiguration, the death that is transfiguration and the transfiguration that recapitulates death. Repentance is eternity breaking into time. Repentance is one eternal moment, and the moment we cycle back to, and the steps of climbing into Heaven. Repentance is being pulled out of the mud and painfully scrubbed clean. Repentance is fighting your way into the Great Peace. Repentance is the moment when we step out of unreality and unreal time into reality and the deepest time. Repentance is not the only moment in kairos, but it is among the most powerful and the most deeply transforming, decisive moments that appointed kairos has to offer.

## Miscellanea

I do not have time to write, and perhaps you do not have time to read, separate sections about some things I will briefly summarize:

- Life neither begins at 18 nor ends at 30. Every age is to be part of a kaleidoscope. Contrary to popular opinion in America, not only is it not a sin to grow old, but each age has its own beauty, like the seasons in turn and like the colors in a kaleidoscope. And that is why I do not guiltily talk about having "hit 30" any more than I would guiltily talk about having "hit 18" or "hit 5", because in the end feeling guilty about approaching a ripe age is as strange as feeling guilty about being born: not that there is anything wrong with being a child in the womb, but the purpose of that special age is not to remain perennially in the womb but to grow in maturity and stature until our life is complete and God, who has numbered the hairs on our heads and without whom not even a sparrow can die, come to the thing we fear in age and discover that this, "death", is not the end of a Christian's life but the portal to the fulness of Heaven where we will see in full what we can now merely glimpse.
- When we reach Heaven or Hell, they will have reached back so completely that our whole lives will have been the beginning of Heaven or the beginning of Hell.
- People make a dichotomy between linear and cyclical time. The two can be combined in spiral (or maybe helical) time, and the movement of time forwards in growth combined with the liturgical cycles makes a rhythmic but never-repeating helix or spiral. (If that is embedded in what Maximus Confessor said about linear, circular, and spiral motion.)
- One step away from saying that time is a line is saying that time is a

pole on which a living vine grows, making a richer kind of connection than a materialist would see. That is a little bit of why we are contemporaries of Christ.

## The Horn of Joy

...Sandy called after [Meg], "And also in 1865 Rudyard Kipling was born, and Verlaine wrote *Poèmes saturniens*, and John Stuart Mill wrote *Auguste Comte and Positivism*, and Purdue, Cornell, and the universities of Maine were founded."

She waved back at him, then paused as he continued, "And Matthew Maddox's first novel, *Once More United*, was published."

She turned back, asking in a carefully controlled voice, "Maddox? I don't think I've ever heard of that author."

"You stuck to math in school."

"Yeah, Calvin always helped me with my English papers. Did this Matthew Maddox write anything else?"

Sandy flipped through the pages. "Let's see. Nothing in 1866, 1867. 1868, here we are, *The Horn of Joy*."

"Oh, that," Dennys said. "I remember him now. I had to take a lit course my sophomore year in college, and I took nineteenth-century American literature. We read that, Matthew Maddox's second and last book, *The Horn of Joy*. My prof said if he hadn't died he'd have been right up there with Hawthorne and James. It was a strange book, passionately anti-war, I remember, and it went way back into the past, and there was some weird theory of the future influencing the past—not my kind of book at all." (Madeleine l'Engle, [A Swiftly Tilting Planet](#).)

Madeleine l'Engle's [A Swiftly Tilting Planet](#) immediately follows my favorite children's book, [A Wind in the Door](#). I wished I could visit Patagonia, and tried to find a book she mentions in [Walking on Water: Reflections on Faith and Art](#) as seminal to the Welsh legend in [A Swiftly Tilting Planet](#). I also looked for *The Horn of Joy* and was disappointed, if

not necessarily surprised, to learn that this was the one fictional addition to an otherwise historical list.

It would be not only strange but presumptuous to suggest that this piece I am writing is what she was referring to. Perhaps it is presumptuous to use that title, although it may seem less presumptuous if one understands how special and even formative Madeleine l'Engle's work has been to me. But what does not seem strange to suggest is that this work may affect the meaning of [A Swiftly Tilting Planet](#). That would only be determined by other people's judgment and is not my call to make, but I don't think Madeleine l'Engle would be offended if someone said that this enhanced the value of her work, or added another layer to what she said about time. Her own words not only in that work but in [Walking on Water: Reflections on Faith and Art](#) about how a work can be enhanced by future insights would suggest the possible. It is quite possible that my work is not good enough or not relevant enough to serve as such a key, but the suggestion is not that strange to make.

But let us move on to one closing remark.

## Extraordinary and Utterly Ordinary

The Enlightenment has left us with a lot of wreckage, and one of this is great difficulty seeing what causality could be besides "one domino mechanically toppling others."

Aristotle listed four causes: the material cause, formal cause, efficient cause, and final cause. The material and formal cause are interesting to me as something the Enlightenment would not think to include in causality: Aristotle's [Physics](#) portrays the bronze in a statue as a material cause to the statue. If we listen to the hint, this could suggest that causality for Aristotle is something besides just dominoes falling. He does deal with mechanical, domino-like causation when he describes the efficient cause, but I remember being taken with the "final cause", the goal something is progressing towards, because I thought it was domino causation that had the effect before the cause.

The best response I can give now to what I believed then was, "Um, kind of." Aristotle's four causes address a broader and more human kind of causation that looks at questions like why something happened and not just how it was produced. It is in fact an utterly ordinary way of looking at things. It's not the *only* serious way of describing causality (my favorite physics teacher said in class, "If Aristotle said it, it was wrong," and I think he was right about much more than physics), but it's one kind of richer view. And if you think it's something exotic, you misunderstand it. It is an utterly ordinary, even commonsense way of looking at why things happen.

And an Aristotle's-four-causes kind of time is better than an Enlightenment-domino-causation kind of time, for a number of reasons. The best essay about time, which I cannot write, would encompass the better parts of what I have said above while remaining "normal" even

when it underscored something extraordinary. Or at least would do better at that than I have.

Orthodoxy is not something absolutely unique; I have said things here which I hope resonate with some sense of home whether or not you are Orthodox. When I moved from being an Evangelical to becoming Orthodox, I did not move from absolute error into absolute truth but from something partial to its full expression. (And there are other clarifications I haven't made, like how much of this essay is owed to Irenaeus and to John Behr helping Irenaeus come alive.) But let me close.

In Orthodoxy, here and now, there is an ordinary way to do what alchemy aimed at: be transfigured in a transfiguration that embraces the material world—and, as we have seen, time. Time is to be transmuted, or rather transfigured, until it becomes eternity.

# **How to Find a Job: A Guide for Orthodox Christians**

## **The sacred side of finding work**

### **The providence of God**

"Therefore I say to you, do not worry about your life, what you will eat or what you will drink, nor about your body, what you will put on. Is not life more than food and the body more than clothing? Look at the birds of the air, for they neither sow nor reap nor gather into barns; yet your heavenly Father feeds them. Are you not of more value than they? Which of you by worrying can add one cubit to his stature?"

"So why worry about clothing? Consider the lilies of the field, how they grow: they neither toil nor spin; and yet I say to you that even Solomon in all his glory was not arrayed like one of these. Now if God so clothes the grass of the field, which today is, and tomorrow is thrown into the oven, will He not much more clothe you, O you of little faith?"

"Therefore do not worry, saying, 'What shall we eat?' or 'What shall we drink?' or 'What shall we wear?' For after these things all the

SHALL WE DRINK? OR WHAT SHALL WE WEAR? FOR AFTER THESE THINGS ALL THE Gentiles seek. For your heavenly Father knows that you need all of these things. But seek first the kingdom of God and His righteousness, and all of these things shall be added to you. Therefore you do not worry about tomorrow, for tomorrow will worry about its own things. Sufficient for the day is its own trouble."

Matthew 6:25-34, [The Orthodox Study Bible](#)

This text, from [the Sermon on the Mount](#), is a central text, and it is to this text that everything else relates; it is by being anchored to [the Sermon on the Mount](#) that keeps the other practices anchored in faith and preserves them from becoming magical or superstitious.

God will provide for his faithful. [Sometimes God the Spiritual Father provides in painful ways](#). Often his understanding of what is good for us varies greatly from our own, and it is only through learning in an experience that we learn that God understands what we need and we do not.

God does not always give us what we want, but he is always willing to give us what we need. Whether or not that includes the job we want. [Read "The Angelic Letters", a tale of providence.](#)

God sometimes allows the Evil One to take away the jobs of the pious. But God is in command, and he will not allow us to be tested beyond our strength. Unemployment is a trial, but it will not prevent God from providing and exercising his own providence over people allowed to be tested.

## **The life of devotion**

The most important foundation within this walk of faith is simply living the Orthodox life. This means prayers, confession, communion, and the entire sacramental Orthodox Way. This does not manipulate God; it may involve clearing away obstacles we have created, which is what we work on when we confess our sins. But there is not something alien that is added to the Orthodox faith to activate God's providence; God's providence is active even when we are trying to do everything and he doesn't give what we think we need. And so the first thing is, "Do your rule." (And "As always, ask your priest.")

## Generosity

This is the point when things can get a bit scary. Christ, who promises providence, also tells us not to store up treasure on earth. Most of us have not made the monastic renunciation, but we miss the mark if we seek our security in what we can arrange with our own money and resources. That is the point where money becomes a false God and an idol.

(This may *always* be an idol, but the less money and financial security we have, the larger the idol looms.)

One part of Orthodox asceticism that is particularly relevant here is generosity, that of sharing with others what little you have. [The person who is generous is lending to the Lord](#); every gift tells God, "I am trusting you," and seeks providence in God, not money or earthly resources. And we would do well to remember the words, "The Pope is not Christ's vicar on earth—the poor are!" [In the Last Judgment, our generosity or hoarding from the needy will be remembered, but there are also much more immediate rewards](#). I would recall the opening Kontakion to my [Akathist Hymn to St. Philaret the Merciful](#):

To thee, O camel who passed through the eye of the needle, we offer thanks and praise: for thou gavest of thy wealth to the poor, as an offering to Christ. Christ God received thy gift as a loan, repaying thee exorbitantly, in this transient life and in Heaven. Rejoice, O flowing fountain of Heaven's treasures!

It is paradoxical to give more in response to losses. But it is vital.

## St. Xenia / Ksenia

We particularly ask the prayers of St. Xenia in seeking employment. [If you do not have an icon of St. Xenia, consider buying one](#). My practice in seeking employment is to pray [the Akathist to the Most Holy Lady and Mother of God](#), and the [the Akathist to St. Xenia](#) each day. Their prayers make quite a difference, much as St. John the Much-Sufferer in dealing with lust.

You should also ask the prayers of your priest and parish and the faithful you know.

## The secular side of finding work

Two of the books I value most for jobhunting are [What Color Is Your Parachute?](#) and [Games Companies Play](#). [Games Companies Play](#) is perhaps one of the best specimens of mainstream jobhunting books, and [What Color Is Your Parachute?](#) starts much further back, saying, "Let's wait a minute on tweaking resume keyboards. Let's dig much further back and make sure we're answering the right questions."

### Resume writing services

[Monster](#) and other services offer a "free resume critique:" *Buyer beware!*

I was working with one friend on his resume and mentioned that [Monster](#) offered a free resume critique. He submitted his resume, and the feedback was deceptive and obnoxious. The reviewer said he was going to be "bluntly honest," and was then bluntly dishonest and manipulative and wrote a doozy of a spiel that was engineered to scare him directly into their paid resume writing service. And it contained almost nothing that could be used to directly improve his resume.

He had asked me if it was worth a professional resume writing service; after seeing that specimen I said, "Maybe; it would be worth asking on [LinkedIn](#), but not with these people." If they were going to be that deceptive and manipulative in their free resume "critique", they were the wrong people to trust with writing your resume.

If you attended college you may have privileges with your alma mater's career services office, even if you didn't graduate: these can be helpful in several ways, including a resume makeover.

## Websites

There are a lot of job boards; I myself usually just use [Monster](#) as the main site where I post my resume.

There are several job search engines; [Linkup](#) is well worth considering as it pulls jobs from company's websites that haven't hit the "pay to post" boards like [Monster](#).

Lastly for websites, I mentioned [LinkedIn](#); to adapt a phrase, [LinkedIn](#) is Facebook for jobhunting. It doesn't have the games, but it is a professional social network that is useful in several ways, including asking and answering questions. I've found that I've gotten a lot of valuable advice by asking questions on [LinkedIn](#).

## Research, research, research!

The biggest way you can send a perfumed letter in an interview is research. There are a number of tools at your disposal; you can visit the company website, [search for them on Google news](#), and to give one "best-kept secret", request a copy of the company's annual report. I am not saying you should believe them all; every annual report I've read claims that things are going great and the last year may have been the company's best year ever. As with the "About" section on a company's website, that is how the company presents itself, not necessarily how the company is. Still, it is valuable for insight and the more you know about a company, the better. And if annual reports are a tad too optimistic, they none the less show a company's line of business, where it is focusing, and show how the company would like to be seen.

## Find jobhunting / networking groups

In many places, there are jobhunting support groups: not necessarily "support groups" in the counseling psychology sense, but groups where jobhunters can gather, sharing wisdom and expertise. You may find a career coach at one of them: you might get a free resume makeover, or have someone make sense of something puzzling to you. Which brings me to my next point:

Again, however however

## **Again, buyer beware**

There has been one change to the information technology landscape in recent years. Job hunting sites like [Monster](#) allow applicants (whether in information technology or not) to state a geographic preference so they can request local opportunities. And there's a whole brigade of recruiters, strange as it may sound, who will ask an applicant in Illinois who has requested Illinois positions to apply for a position in Silicon Valley or NYC, traveling at the candidate's own expense for the in-person interview and perhaps signing a contract that would probably make an attorney really squirm (and assure you this is a standard business practice to protect their needs if you raise questions). Buyer beware; this is part of the cost of doing jobhunting in information technology.

The problem isn't as bad as it used to be; the sheer quantity of these junk calls has dropped to be much more manageable than it was a few years ago. But I let non-local calls go straight to voicemail: there are a few non-local calls that aren't from that class of recruiter, and you can hear them when you check your voicemail.

There are presumably other traps and pitfalls out there: "*Be thou the defender of my soul, O God, for I walk through the midst of many snares; deliver me from them and save me, O Blessed One, for thou art the lover of mankind.*"

## Conclusion

I have covered, or rather briefly touched on, the sacred and secular dimensions of jobhunting. But this is more of a "table of contents" than a full book; I point the reader to books or other resources ([What Color Is Your Parachute?](#) and [Games Companies Play](#) on the secular side, and one's rule of prayer and parish priest or spiritual father on the sacred). The offering seems insufficient, but I'm not sure I have better. Still, I offer this much in the prayer that God will provide for you in his gracious and eternal love.

**This article was written while I was jobhunting and out of work. Later that day, I received and accepted a job offer.**

# How Shall I Tell an Alchemist?

The cold matter of science—  
Exists not, O God, O Life,  
For Thou who art Life,  
How could Thy humblest creature,  
Be without life,  
Fail to be in some wise,  
The image of Life?  
Minerals themselves,  
Lead and silver and gold,  
The vast emptiness of space and vacuum,  
Teems more with Thy Life,  
Than science will see in man,  
Than hard and soft science,  
Will to see in man.

How shall I praise Thee,  
For making man a microcosm,  
A human being the summary,  
Of creation, spiritual and material,  
Created to be,  
A waterfall of divine grace,  
Flowing to all things spiritual and material,  
A waterfall of divine life,  
Deity flowing out to man,  
And out through man,  
To all that exists,  
And even nothingness itself?

And even nothingness itself:

And if I speak,  
To an alchemist who seeks true gold,  
May his eyes be opened,  
To body made a spirit,  
And spirit made a body,  
The gold on the face of an icon,  
Pure beyond twenty-four carats,  
Even if the icon be cheap,  
A cheap icon of paper faded?

How shall I speak to an alchemist,  
Whose eyes overlook a transformation,  
Next to which the transmutation,  
Of lead to gold,  
Is dust and ashes?  
How shall I speak to an alchemist,  
Of the holy consecration,  
Whereby humble bread and wine,  
Illumine as divine body and blood,  
Brighter than gold, the metal of light,  
The holy mystery the fulcrum,  
Not stopping in chalice gilt,  
But transforming men,  
To be the mystical body,  
The holy mystery the fulcrum of lives transmuted,  
Of a waterfall spilling out,  
The consecration of holy gifts,  
That men may be radiant,  
That men may be illumined,  
That men be made the mystical body,  
Course with divine Life,  
Tasting the Fountain of Immortality,  
The transformed elements the fulcrum,  
Of God taking a lever and a place to stand,  
To move the earth,  
To move the cosmos whole,  
Everything created,  
Spiritual and material,

Returned to God,  
Deified.

And how shall I tell an alchemist,  
That alchemy suffices not,  
For true transmutation of souls,  
To put away searches for gold in crevices and in secret,  
And see piles out in the open,  
In common faith that seems mundane,  
And out of the red earth that is humility,  
To know the Philosopher's Stone Who is Christ,  
And the true alchemy,  
Is found in the Holy Orthodox Church?  
How shall I tell an alchemist?

# How Shall We Live This Instant?

**Quest:** So your use of 'orthodoxy' is not, strictly speaking, 'mere Christianity' as defined by C.S. Lewis, or any of its close kin.

**Targe:** It is not.

**Quest:** Then what is it? You have already said that it was not Thomas Owen's "postmodern paleo-Orthodox evangelical Christian."

**Targe:** The failure is interesting.

**Quest:** *How so?*

**Targe:** Well, one definition proposed as coinciding with postmodern paleo-Orthodox evangelical Christians is, "someone who can say the Nicene Creed without crossing their fingers." And the politically correct "their" is significant; I'll get to that in a moment. But what I would point out that Baptists in their version of the Creed add a footnote to "Catholic" stating that it means "universal," which of course it does, but the Protestant who says that is crossing fingers, or what is much the same thing, using the same words to mean different things: hence 'Church' means a purely invisible Church, the entire conception of which is as foreign to the Bible as it has been to ages of Orthodoxy. For another example of crossing fingers by saying the same thing but meaning something different, a Mormon can say most or possibly all of the Creed, but they mean something different by it: hence their saying, "As the Father is, so shall we be; as we are, so the Father was." Part of the Catholic-Orthodox understanding of the Creed, for instance,

is that the Father, Son, and Holy Spirit are absolute in perfection from before there was time. And it's crossing fingers to say you believe in God, the Father Almighty, and mean that a limited being became what we now call God the Father Almighty. And the connection is questionable at least between Mormon and Orthodox understandings of 'deification'; the same word has two different and what might as well be unrelated meanings.

**Quest:** So you would throw it out?

**Targe:** The Spirit Spirits where He wills. Some have said, "We can say where the Church is, but not where it isn't," and others have said, "*Not even that.*" In that sense there really *is* an invisible Church, and those who are most insistent on necessity of being a faithful members of the Orthodox Church must needs acknowledge that there are Hindus and ancient pagans who will be saved, and there are members of the Orthodox Church who will be damned. His Eminence KALLISTOS, perhaps of concern to some Orthodox as dancing too close to the edge, none the less has an "all-purpose anecdote" (as he calls it) that anybody not caught in the trap of "True" Orthodoxy must recognize, tells a story about a woman who was severe in her fasting and observance of spiritual practices:

Once there was an old woman and she died. And somewhat to her surprise, she woke to find herself in a lake of fire. Looking out she saw her guardian angel walking on the shore. And she called out, "There has been some mistake. I am a very respectable old lady and I should not be here in this lake of fire."

"Oh," said the guardian angel, "do you ever remember a time when you helped someone else?"

And the old woman thought for some time and she said, "Yes. Once I was gardening and a beggar came by and I gave her an onion."

"Excellent," said the angel, "I happen to have that very onion with me now." And he reached into his robes and he produced it. And he said to her, "Let us see what the onion will do. You take the other end and I will null." Perhaps it

will do. You take the other end and I will pain. Perhaps it was not an onion but a shallot.

Gradually then, the angel, with the help of the onion, began to pull the old woman out of the lake of fire. But she was not the only person there. When the others saw what was happening they crowded round her and hung on in the hope of being pulled out as well. This did not please the old woman at all. She began to kick and to cry out, "Let go! Let go! It's not you who's being pulled out it's me! It's not your onion, it's mine!"

And when she said, "It's mine!" the onion split in two and she fell back into the lake of fire and there, so I'm told, she still is.

And His Eminence KALLISTOS obtained the story from Dostoevsky, who recorded it from someone else.

**Quest:** But what does that have to do with "postmodern"?

**Targe:** Well, if we accept the usual definition of postmodern—which Oden is not exactly trying to subvert, but claim "We were here first" competition—it is misleading at best to say, "If you were born in these centuries, you are a modern; if you are born in these decades, you are a postmodern." There are engineers, large number of engineers who are moderns and who are aware of postmodernism as something that is out there, but aware with the kind of awareness one holds of fashions in faroff countries. And they may understand it well or, more often, not so well. Quite possibly they do not know a postmodern (in the usual sense).

**Quest:** How does Oden's usage of "postmodern" differ from the more run of the mill version?

**Targe:** We have more a coincidence of names. What is usually called *post-modernism* is really a further unfolding of [the damned backswing](#) in the inner logic of modernism. René DesCartes fills the classic sociological definition of a pariah among postmodern authors in that attacks on him do not need justification (just read refereed academic journals and books where an attack on DesCartes is rarely accompanied by a footnote), but he began a program of tearing things up that was a precursor to

deconstructionism. And it is from his patronage and country that Derrida came, and I've tried a few things to understand Derrida in any constructive way. I fairly quickly tried reading Derrida in the original. (*It didn't help.*) And Oden's claim, rightly enough, is that this should really be called "hyper-modernism." There are other things it could be called, like "modernism 2.0" or "modernism on steroids" or "the inner (il)logic of modernism further unfolding", but Oden's suggestion is appropriate enough. And what he means by "post-modernism", when it does not mean "hyper-modernism," is people who have tried the modernist project and rejected it, like an engineer with a T-shirt that says, "Been there, wrecked that." And in that sense postmodernism regards modernism and hypermodernism as a vacation from reality and, perhaps with some archaeological interest or perhaps not, sees something like ancient or medieval life as still open to us. It may be noted, perhaps with excitement, that the Orthodox Church does not view the Church Fathers as a closed canon; perhaps a Catholic might not be inclined to say that there are medieval theologians still writing, but there is much room for Orthodox to say that patristic writing has not stopped and will not stop until the Lord returns.

**Quest:** So there are people writing now you would identify as Church Fathers?

**Targe:** Probably.

**Quest:** You do not introduce someone as a living saint; some have ascended to the third heaven and still been damned. There is a story of a saint who at the end of life set one foot in Paradise, and the demons praised him, saying, "Glory to you; you have defeated us!" and the saint said, "Not yet, I haven't!" and pulled the other foot into Paradise. There are saints whose relics are incorrupt but it is the general wisdom of the Orthodox Church to allow some time for the dust to settle on a saint's tomb. And I believe there are future saints that are alive, and *some* that will be recognized as Church Fathers who delivered living patristic theology, but we should not seek them out. We have recognized saints and Church Fathers from ages before; let us sit at their

feet and learn from their life.

Thomas Oden's version of postmodernism is tangled though.

**Targe:** How do you mean?

It is an attempt to be part of the Orthodox Church without being part of the Orthodox Church. Now this endeavor has happened before; one could argue that the Reformation was an attempt at (paleo-)Orthodoxy. And more recent efforts like Radical Orthodoxy start by having Protestant authors greatly appreciate pre-Protestant theologians, and not just the Blessed St. Augustine and Thomas Aquinas, and yet somehow Radical Orthodoxy ends up producing articles that speak of "the incestuous, homosexual union of the Father and the Son" and be as deliberately lewd as academic theology which has no pretensions to any Orthodox label. It's a wasteland.

**Quest:** Do you believe all of Oden's "postmodern paleo-Orthodox evangelical Christians" are judged by that standard?

**Targe:** God help us, no. People who try such things may be very virtuous indeed. But—no, I need to put that off again—but consider well [the three-fold comparison of natural sciences, academic theology, and Orthodox theology in "Religion and Science Is Not Just Intelligent Design vs. Evolution."](#) Something remarkably similar may be said of Oden's hypermodern, Oden's postmodern, and Orthodoxy's patristic. That is, you can make a threefold comparison between hypermodern, postmodern, and patristic as you can with science, academic theology, and patristic theology. Let us look some at Wittgenstein's forms of life: Wittgenstein as a philosopher was dead wrong about many things and the phrase "after Wittgenstein" is itself a warning label, but in patristic Orthodoxy across the centuries and millenia, there is a cycle

"Tolkien once remarked to me that the feeling about home must have been quite different in the days when a family had fed on the produce of the same few miles of country for six generations, and that perhaps this was why they saw nymphs in the fountains and dryads in the woods - they were not mistaken for there was in a sense a real (not metaphorical) connection between them and the countryside. What

of day and night and though candles may give a little light, you act during the day and wind down at night. For the hypermodern and the postmodern by contrast, things are very different from the Orthodox patristic norm, when the sun goes down you usually turn on lights, and though scrupulous Jews may leave by sunset to avoid work on the Sabbath, it is not the rule for offices or factories to close just because of a sunset. For those living before modern times, there existed such a thing as an "epistolary relationship," in some arrangement of pen pals, but to the hypermodern and postmodern, it is more prevalent among the youth than among adults to have relationships increasingly mediated by shifting sands of computer technologies, by social networks and ten thousand other things. Overall it may be true that liberals use technology better than conservatives: "My Barack Obama" in Obama's first campaigns used some of the best technology has to offer, and while Django is freely offered to conservatives too, the power base for conservatism is not suburban or urban middle class, and a great many Republican votes come from the kind of people torn up in [Deer Hunting with Jesus](#). To that basic observation, I may respond that the way new technologies are adapted and used works more like a liberal process than a conservative conservation. In some sense conservatives who use technology skillfully might be considered "virtual liberals": yes, their votes may be to the right, and yes, their views and voices may be to the right, but they are skilled at negotiating a liberal style of waters. If conservatives use technology a little more clumsily, this is because the inner workings continue in some sense to preserve their character.

Countryside. What had been earth and air & later corn, and later still bread, really was in them.

"We of course who live on a standardised international diet (you may have had Canadian flour, English meat, Scotch oatmeal, African oranges, & Australian wine to day) are really artificial beings and have no connection (save in sentiment) with any place on earth. We are synthetic men, uprooted. The strength of the hills is not ours."

—C. S. Lewis in a letter to Arthur Greeves, 22 June 1930

One translates between Italian and Spanish more easily than one translates between Italian and Russian: and here the relation between technology and liberalism is like that between Italian and Spanish, and the relation between technology and conservatism is like that between Italian and Russian. The mere incompetence of some conservatives with technology is a sign of a strength somewhere else. But compared to any previous century, a conservative or postmodern (Oden-style) looks remarkably more like a liberal or hypermodern (Oden-style), or the vast number of mostly liberal people who run TV and popular blogs. The Paleo movement, which has perhaps appropriately been called a lifestyle (although [Paleo Hacks](#) discusses lifestyle far less than diet or exercise), is remarkable because it is exceptional. It looks at one aspect of life, diet—or maybe two, diet and exercise, plus a few other details—and says that what we have done with food since the industrial revolution is morbid. And it looks at how best to recover the strengths of the basic human hunter-gatherer style of diet (and of life) with what we have in front of us. But diet and exercise are two out of a hundred aspects of human life and living, two out of very *many* layers, and if conservatives like Dorothy Sayers and C.S. Lewis complained about newfangled light available whenever you flick a switch, or cars that annihilated God-given space, or talked about refusing to eat tinned food, this was a blip even for conservatives. Neither C.S. Lewis nor Dorothy Sayers complained about the ease of putting pen to paper, easing the physical side of writing to be economically cheap and physically effortless compared to medieval standards C.S. Lewis would have known well, where writing was compared to ploughing a furrow and unambiguously classified as a form of (strenuous) manual labor.

Today, rural adults volunteer to keep cinemas alive and providing movies to children and youth. In days past cautious Christians avoided movies; now it is a conservative move to keep cinemas alive as a piece of history not to be lost. Technology progresses along its own inner rules, and it unfolds and its [damned backswing unfurls](#).

It is a common preference in the U.S. to choose retrieving

It is a common preference in the U.S. to choose retrieving information over owning it. The development of computers has followed this preference, and most of what you do that is most interesting is to retrieve new, fresh information. We live in digital dark ages where the cascade of technologies, one largely displacing another, will leave future archaeologists and historians thirsty for an understanding of what we have, and we have reached the point, and long passed it, that curators of computational museums have physical storage media that they believe to be mostly or completely intact, and to contain real information, but they are at a loss for how to read it. The Air Force started a program to purchase one of every type of storage device, printer, etc. so that they would be able to prevent this from happening. But there was a kink along the way; some of the printers they purchased, left to sit for months, had rubber parts turn to gum. The Air Force saw and specifically took countermeasures to curate and keep the means of reading any form of computer storage, and while a museum may have come out of it, the original goal is all but impossible. Perhaps they could have gotten farther by actively maintaining all of their inventory, but there comes a point when you cannot obtain what you need to maintain old equipment, no matter how skilled you are at making repairs or how much you can pay.

Those who understand such thing said that when Steve Jobs unveiled the iPad, he toppled the first domino in a chain that will make netbooks, notebooks, and desktops go the way of the landline or horse: a rarity, at least. And when Microsoft revealed Windows 8, they basically said, *"We agree. We'll go further than you, Apple. You let Macs continue to run on MacOS, without any effort to convert them to iOS devices. We'll make a version of Windows optimized for mobile users, and we'll release that as the desktop version as well as the mobile version."* Whether that move was right or not, time will tell. But Microsoft and Apple have declared an agreement that the tablet is the wave of the future and the desktop, even the Mac, is the wave of the past.

There is a science fiction short story, from when computers first entered the public consciousness, of a monastery of some

religion which was involved in writing down all of the names of God to bring about the end of the world. They purchased a computer to help them do this task much faster. The ending of the story had the salesman getting on an airplane, noting, "They should be reaching the end of their calculation now," and looking out the window and seeing a star vanish. There is already a star that has vanished: Apple has not rolled out Retina display to 17" MacBook Pros; instead, Apple has *retired* the top of the line, its 17" MacBook Pros. If you don't have a 17" MacBook and you want one, time for creative internet shopping!

And [the damned backswing](#) unfurls economically. The 1950's drew unprecedented levels of wealth and an ersatz civic virtue of keeping up with the Joneses; compare the appliances and possessions of a 1990's house with a 1950's house and some have said that we were no longer keeping up with the Joneses: we were keeping up with the Trumps. So the longer and longer we go, the richer we get? Um, not exactly; we are being cut by [the damned backswing](#). We indeed possess luxuries and possessions never before available in the history or prehistory of the race of men. But these luxuries, which we *may not* be able to keep hold of, do not our dreams of riches all come true. To quote an investment billboard, "My wild dream of retirement? Actually retiring!" [The damned backswing that gave us newfangled forms of luxury is now cutting and delivering poverty well below a 1950's "keeping up with the Joneses" standard of living.](#)

**Quest:** Guess things were better in the fifties?

**Targe:** I'd like to visit a point with G.K. Chesterton, whether or not Chesterton sees eye to eye with Orthodoxy on this point. In discussing Francis of Assisi's aspirations as a soldier, Chesterton says that loving other people and fighting them is perfectly consistent. And in Orthodoxy, unlike Catholic theology, there is no real concept of a just war. Orthodox are allowed to be soldiers, and there are saints who were soldiers. But a soldier who has tried to kill cannot become a priest, and regardless of what might have been the cause of war, Orthodox

soldiers are expected to do years of penitence after their combat. Orthodoxy may have soldiers as much as Catholicism, but the concept of a just war is foreign to it.

But I still wish to visit one of Chesterton's points, besides his saying that Francis of Assisi was perfectly right to go to fight in war against a neighboring city-state. He commented that if two such city-states were to fight continually against each other for a century, it might come within some remote distance of the body count of one of our modern scientific wars. And here I would like to make a comment about firearms and the Iran-Iraq war.

Modern Western firearms did not create the Iran-Iraq war; but we have come to possess modern assault rifles at the end of a process of change and military obsolescence, where generals and military leaders have adapted and adopted new tactics for centuries. The development of weapons may be easier for an outsider to see than shifts in tactics and strategy but alongside one gamechanger of a weapon after another has been a shift in tactics to try and achieve victory with a minimum of losses from among one's own troops, and really also an attempt to kill as few as the enemy as you reasonably can while achieving your objective. One World War II sailor talked about how his ship sunk an enemy ship, and then, with tears, explained that the smell of a certain oil burning wafted into their craft, and he and the other sailors were absolutely disgusted, not because what they were smelling was vile (but it *was* vile), but because they realized that meant that men from the other ship, their enemies, were dying with that obscene *stench* in their nostrils. And the soldier, crying, said, "You can't hate him. He's another sailor, just like yourself!"

It is possible for a soldier to love his enemies, and in Arab culture, before Western armaments were dropped in, men fought all the time, just like St. Francis, but there was something about their fighting that was almost like sparring or horseplay. Killing men outright was not the rule, and it was *not* desired. And then, without much precedent, 20th century weapons were dumped on, by Western standards, 12th or 13th century military strategy, and there were none of the West's

slow learning over the centuries how to handle increasingly more destructive weapons while *trying* to accomplish goals with less casualties on both sides.

**Quest:** It should seem then that you should welcome the fifties.

**Targe:** The fifties came after World War II. One of the definitions of a modern war is a war that ends at the exhaustion of one side's resource: a war of attrition, such as when part of the U.S. made a second Declaration of Independence, another part decided it non-negotiable that the United States be a single country, and neither side pulled back when blood flowed like a river, deep and wide. As to World War II, on essentially every side it was several notches removed from what I have tried to call orthodoxy, even though making what it means clear is hard. Even the traditional Arab raiding and lightweight fighting was a longstanding departure from what I call orthodoxy, but it was in the same ballpark. It did not go too far from the Garden of Eden. But warfare in its modern sense—the inventor of what we now know as a modern machine gun had almost *pacifist* intentions; he thought that when that invention was brought into war, people would be so horrified and disgusted that they would stop using guns, or at least machine guns, into war, and apparently horrified at the nation that would use such a vile weapon and horrified at using guns on people. But though an early machine gun may have been called "the Devil's paintbrush," automatic assault rifles are standard in infantry combat for anyone who is serious about war. There has been a long history of weapons that were expected to be too horrible to use: several Popes tried unsuccessfully to ban crossbows in their day's version of the Geneva Conventions, and the machine gun just mentioned, and the battleship, and most recently nuclear, biological, and chemical weapons. For now at least we have stopped using them. But whether or not warfare as such is "orthodox", modest and small wars by modern standards depart from orthodoxy much further than Francis of Assisi going to fight another city-state with dreams of soldierly glory.

Now to return to the 1950's. In the course of the greatest industrial war so far, America developed very well optimized

industrial production to fuel the war. People may well have been Spartan enough in what they were doing and how they were living (ration books and all that), but when the war ended, the gears of factories started out turning other things besides munitions, and advertising became more manipulative and seductive, and people began to keep up with the Joneses. This may be better than the river of blood in world war, but there is something about spend, spend, spend to keep the factories spewing out goods that is further from orthodoxy than the sacrifice of a war effort which gave as much of one's sap and soul with no personal benefit in the progress, than consuming the output of factories spewing consumer goods on the level of materials for war. Dorothy Sayers's [The Other Six Deadly Sins](#) comes to mind, *readily* to mind. Sayers outlined a door to orthodoxy open to post-war Europe, but Europe did not choose that route.

**Quest:** And now we have shifted gears further: calling the 1950's sexist has given way to attacking whether religion may act against queer interests, it would seem.

**Target:** There is an instance of a pattern of people saying, "You are making a mountain out of a molehill. You should give in here." To make an extremely offensive comparison, this is a bit like the molester's message, "Don't tell anyone. It's OK." Both parts of the message are internalized by the person addressed. It's the same warped character that said, "Voting for Bush because you oppose gay marriage is a bit like buying a ticket to England because you like the salted nuts the airline stewardesses serve on the flight."

I have never seen someone who says "You are making a mountain out of a molehill. You should give in," treat the 'molehill' as a molehill that is readily conceded to focus on more important points. I have never heard of someone who calls an opponent's position a molehill ever give in on that point. And here actions speak louder than words: the rhetorical move of "your position is a molehill; you should give it up and do things our way" is always, *always* accompanied by actions treating the "molehill" as a non-negotiable *mountain*.

One of those molehills concerns the ordination of women. *Gender or Giftedness?* one promoted title asks. And it is begging the question; it assumes giftedness has nothing to do with gender when gender provides much of the concrete shape by which God has gifted all of mankind.

There is someone who said that all of the Luddites were right; all describe something of mankind dying. Plato took a Luddite approach to writing, saying in a famous passage in *Phaedrus*, let me look it up...

At the Egyptian city of Naucratis, there was a famous old god, whose name was Theuth; the bird which is called the Ibis was sacred to him, and he was the inventor of many arts, such as arithmetic and calculation and geometry and astronomy and draughts and dice, but his great discovery was the use of letters. Now in those days Thamus was the king of the whole of Upper Egypt, which is in the district surrounding that great city which is called by the Hellenes Egyptian Thebes, and they call the god himself Ammon. To him came Theuth and showed his inventions, desiring that the other Egyptians might be allowed to have the benefit of them; he went through them, and Thamus inquired about their several uses, and praised some of them and censured others, as he approved or disapproved of them. There would be no use in repeating all that Thamus said to Theuth in praise or blame of the various arts. But when they came to letters, This, said Theuth, will make the Egyptians wiser and give them better memories; for this is the cure of forgetfulness and folly. Thamus replied: O most ingenious Theuth, he who has the gift of invention is not always the best judge of the utility or inutility of his own inventions to the users of them. And in this instance a paternal love of your own child has led you to say what is not the fact: for this invention of yours will create forgetfulness in the learners' souls, because they will not use their memories; they will trust to the external written characters. You have found a specific, not for memory but for reminiscence and you give your disciples only the

of remembrance, and you give your disciples only the pretence of wisdom; they will be hearers of many things and will have learned nothing; they will appear to be omniscient and will generally know nothing; they will be tiresome, having the reputation of knowledge without the reality.

And anyone who thinks this is a mere hiccup would be well advised to remember that Orthodoxy preserves alive the character of an oral tradition. Perhaps this is not the most important truth about Orthodoxy. Mount Athos preserves a great many age-old forms of life, but it would be a serious misunderstanding to make that one's primary reason to visit the Holy Mountain.

**Quest:** Is there any hope? Any way to turn back the clock? It seems we have departed from the natural operating conditions of *Homo sapiens* quite a bit.

**Targe:** In more ways than we can name. We have lost a primal stillness; even Lao Tzu in the fifth century B.C. knew a primal stillness had *then* been lost among his people; he was concerned people had become noisy, complicated where peace is simple. He is said to have been a keeper of some royal library, but he did not turn to books for our salvation.

**Quest:** Then where is hope to be found?

**Targe:** *Here and now.* There was one hieromonk who reflected back on his time in a Soviet, Marxist concentration camp, and simply said, "God was so present there." There, in the midst of everything the Devil might do, was God. He had been tortured to the point of breaking all of his fingers, and he simply remembered that God was there.

**Quest:** He must have been quite a monk.

And yet I wonder... um, maybe it's better not to mention...

**Targe:** Yes?

**Quest:** Um...

**Targe:** Yes?

**Quest:** Orthodoxy and Paleo both say things about diet, and they don't say the same thing. Can we benefit from both?

**Targe:** That is an excellent question to discuss with your priest.

**Quest:** And beyond that?

**Targe:** That is still an excellent question to discuss with your priest.

Strictly speaking, Orthodox fasting and Paleo diet are compatible. Nothing in Orthodox fasting rules dictates that one eats bread every day, or rice or noodles. During a fasting period, you may eat seafood and an abundance of vegetables, and for that matter possibly more variety than keeping the fast without Paleo. Have you ever gone through a fast and exhausted the possibilities of just vegetables available in grocery stores?

But let's look at fasting in the extreme. The reconciliation I gave above, saying there is an area where the two dietary rules intersect, is a bit of a decoy. If you read the lives of the saints, they walk on water, or enter fire without being burnt. Saints give to God above what nature provides, and often, though not always, saints who work great wonders live on a diet that would seem to produce all manner of weakness. But these are spiritual athletes. Now the asceticism of fasting or something like it is normative, but in considering Orthodoxy and the Paleo diet, let's not throw out the baby with the bathwater. One's priest, and perhaps also one's doctor, is really the kind of person one should seek help from. In general, the rule in Orthodoxy is, *Do what you can, with what you have, where you are.*

[Attempts to turn back the clock keep moving us further from the source. Don't look back. Look up!](#)

There is something false in things as we have been looking at them, in saying that Luddites since the time of Plato have mourned losses that came with technological gains, in talking about food and drink: the Kingdom of Heaven is not a matter of food and drink. Now the choices we make may matter, but the true way of looking at things is not from the material up to the spiritual, but from the spiritual down to the material. Seek first the Kingdom of God, and all these things will be given to you as well. This was true in the first century, when the Sermon on the Mount was given, but the truth is as old as humanity.

And it is also the answer to the question, "how we shall live in this instant?"

# How to Survive an Economic Depression

## Want to survive?

I learned some pretty big things during the Y2k scare, and some of them have every relevance to how to survive an economic depression.

When year 2000 was approaching, I was part of the doomsday camp. I believed, wrongly, that technology would fail and everything around me would start to fall apart. But did a lot of digging and I think I learned something about what makes people survive really rough situations--and how to survive an economic depression. The economy is in deep trouble, and what I found out then has every relevance now that we are worried about how to survive an economic depression.

When Y2k was approaching, I found a lot of materials on *physical* preparation for such an event, but very little on *psychological* preparation. The most that I can remember reading about that was that when I said on a newsgroup that a Y2k doomsday would be psychologically as well as physically difficult, someone said that I was right and suggested that Y2k preparations include stocking up on board games and condoms.

That answer seemed, to put it politely, not up to snuff. As far as mental preparation goes, that was the equivalent of saying, "If bad things happen on January 1 2000, be prepared for great physical danger. *Always* remember to look both ways before you cross the street!"

After failing to find something more informative on newsgroups, I went to the library, to look for more information on psychological survival in difficult situations. I did a lot of digging, reading whatever seemed like it might shed light, but finding very little of an answer *anywhere* that I looked. Even a book on psychology and the military said almost nothing about how either soldiers or civilians stood up psychologically to disaster, or what enables a survivor to overcome an incredibly difficult situation.

It was only after a lot of digging that I realized the answer was almost staring me in the face. What makes a survivor is not exactly *psychological*. It is *spiritual*. There was something spiritual about, for instance, people who had survived incredibly hostile situations as hostages and prisoners. It is not exactly that they had some special talent, or drew on some special mind trick or had developed what we would imagine as spiritual powers. It was something almost *pedestrian*.

It had something to do with religious devotion. Faith has something to do with how to survive an economic depression.

I imagine I may raise some eyebrows by suggesting faith has something to do with how to survive a disaster. But faith was how many people survived the Great Depression. Perhaps a great many survivors survived despite their useless faith, or maybe it was a crutch, but if it seems obvious to you that faith could have nothing to do with how people survived the Great Depression, then I would ask you to entertain a possibility you might not have considered. Maybe they know something we have forgotten.

## **The more things change, the more they stay the same.**

Much of the Bible comes from disastrous times. In the Bible's book of [Habakkuk](#), there is a prophet who sees great evil about him. He cries out to the Lord, and the Lord gives an answer that leaves the prophet stunned: the Lord will punish the wickedness of Israel by having an army of terrorists conquer their land. This was a disaster that might be worse than economic collapse. The prophet asks the Lord a question: how can a righteous God look on such wickedness? And the Lord responds without really answering the prophet's question: the Lord responds without giving the prophet what he wants. But tucked away in the Lord's response are some very significant words: "...the righteous shall live by faith."

Those words were taken up in the New Testament and became a rallying-cry against rigid legalism. But they are more than a response to people who turn religion into a bunch of rules; they speak also in situations where legalism is simply not the issue. The prophet cried out to the Lord about rampant violence. The issue was not really legalism at all. And this is when the words were first spoken: "The righteous shall live by faith." These words were given in terrifying times.

"The righteous shall live by faith" is a non-answer, and a quite deliberate non-answer. The prophet asked how such a pure God could allow such wickedness to exist, and God does not give the answer he is looking for. The Lord doesn't really answer the prophet's question at *all*. It's almost like:

Someone said to a master, "What about the people who have never heard of Christ? Are they all automatically damned to Hell? Tell me; I have heard that you have studied this question."

The master said, "What you need to be saved is for you to believe

in Christ, and you have heard of him."

The Lord doesn't tell the prophet what he wants. He gives him something much better; these brief words say, "[I AM WHO I AM](#), and I will do what I will do, and you may not look past the protecting veil that enshrouds me. But in the disastrous times you face, know this: the righteous shall live by faith."

God doesn't just refuse to tell the prophet what he *wants*. He gives Habakkuk something fundamentally richer and deeper. He tells the prophet what he *needs*. What God tells [Habakkuk](#), "The righteous shall live by faith," is a luminous thread appearing throughout Scripture, woven into the fabric of Proverbs and woven through and through in the [Sermon on the Mount](#). This luminous, radiant thread declares that God is sovereign, in hard times as well as good, and that his divine providence is with his faithful no less. *Even if we are in a depression, God can watch out for us.* (Perhaps *especially* if we are in a depression. The surprising report from many survivors is that God's help is much more obvious in hard times than when things are easy.) Just witness this luminous thread in the [Sermon on the Mount](#):

No one can serve two masters; for either he will hate the one and love the other, or he will be devoted to the one and despise the other. You cannot serve God and Money.

Therefore I tell you, do not worry about your life, what you shall eat or what you shall drink, nor about your body, what you shall wear. Is there not more to life than food, and more to the body than clothing? Look at the birds of the air: they neither sow nor reap nor gather into barns, and yet your heavenly Father feeds them. Are you not of more value than they? And which of you by worrying can add one hour to his span of life? (You might as well try to worry yourself into being a foot and a half taller!) And why do you worry about clothing? Consider the lilies of the field, how they grow; they neither work nor spin; yet I tell you, even Solomon in all his glory was not clothed as gloriously as one of these. But if God so clothes the grass of the field, which today is alive and tomorrow is thrown into the oven, will he not much more clothe you, O men of little faith?

Therefore do not worry, saying, 'What shall we eat?' or 'What shall we drink?' or 'What shall we wear?' For people without faith

seek all these things; and your heavenly Father knows that you need them all. But seek first his kingdom and his righteousness, and all these things shall be given to you as well.

Therefore do not worry about tomorrow, for tomorrow will have its own things to worry about. Each day has enough worries of its own.

The righteous shall live by faith, and the Sermon on the Mount has a great deal to say about exactly *how* the righteous shall live by faith. The radiant thread unfolds, unfurls, *beams*, "Money is unworthy of your trust: put your trust in God. Live in the security of faith. Have the true security of faith in God who provides, not the ersatz providence of what you can arrange for yourself. Do not spend your life building a sandcastle for your home and trying to keep it from collapsing. I offer you a way to build a solid house, built on the rock."

And this is not just a statement about how we should not worry about the future when we have it easy. The [Sermon on the Mount](#) closes with words that are entirely relevant to surviving the storms of life when we wonder how to survive an economic depression:

Every one then who hears these words of mine and does them will be like a wise man who built his house upon the rock; and the rain fell, and the floods came, and the winds blew and beat upon that house, but it did not fall, because it had been founded on the rock.

And every one who hears these words of mine and does not do them will be like a foolish man who built his house upon the sand; and the rain fell, and the floods came, and the winds blew and beat against that house, and it fell; and its collapse was great.

These are not words about nothing more than how to relax and enjoy life when it is easy. These are words about how to prepare for hard times, and how to survive in a disaster. In other words, they are words about how to survive an economic depression.

In hard times as well as good, *the righteous shall live by faith*. Indeed, the words "the righteous shall live by faith" originally come from times with an industrial-strength disaster on the horizon!

## The Apostle Paul: Portrait of a *survivor!*

Who can survive stress like an industrial-strength disaster? The Bible paints a picture of one person who survived a lot of really rough times, and not only *survived*, but genuinely *thrived*.

When I was in college, part of the general "foundations of wellness" class was taking the [Holmes Stress Point Scale](#), which assigns points for stressful events to add up to a rough estimate of how stressful your life is. You get a certain number of points for each stressful experience you've been through, and they add up to your total score for how stressful the past year of your life is. The events include:

- Jail term...
- Death of a close friend...
- Outstanding personal achievement...
- Vacation...
- Christmas...
- Minor violation of the law...

The higher a score from stressful events, the more stressful your life is. The scale's explanation is: *If your score is 300 or more, you are at a very high stress level and probably run a major risk of illness in the next year. If your score is 200 to 299, your stress and illness risk are moderate, and if your score is between 150 to 200, your stress and risk are mild.*

My teacher mentioned that one student had computed such a score for a year in the life of the Apostle Paul, who went through a number of events that should score major points for stress:

- Jailed...
- Attacked by a frenzied mob...
- Shipwrecked in the mother of all storms...
- Clandestine escape from a city when people were trying to kill him...
- Physically assaulted by soldiers...
- Survived an assassination attempt...

The student calculated a staggering 675 points for one year in the life of St. Paul!

But the odd thing is that if you read the [Book of Acts](#), St. Paul does not really come across as someone we should pity. We read that some of his colleagues were harassed, beaten, and afterwards were rejoicing that they had been counted worthy to suffer shame for the sake of their Lord. When I read [the accounts of these events](#), I walk away with a sense, not that these suffering heroes are poor and pitiable, but that they are giants and they utterly dwarf me. There is something greater in the Apostle, far greater, than a whopping 675 points worth of *externally* stressful events.

It is the same thing, really, as with people who survived a long time being hostages for terrorists. They had dug deep and built their house on the rock, and when stormwinds battered their house, it survived and stood firm. It is the same thing for the bedrock of how people survived the Great Depression. And if we may be battered by hard economic times, we would like our houses to stand firm as well.

## Suffering and sonship

It may be that what we fear that in a potential disaster is that we will lose what is good for us. We may fear getting sidetracked when none of our dreams seem to come true. We may fear that God cannot really provide our good if our recession becomes a depression or even an economic collapse--that the [Sermon on the Mount](#) is presumably about how to live in easy times but wouldn't be quite so helpful when we're in a depression. But there is something we are missing. Some of the things that we fear may have a surprisingly positive place in a well-lived life. There is something we are missing in all this.

Suffering has a place in the divine discipleship—the divine sonship—that the [Sermon on the Mount](#) is all about. "The Son of God became a man that men might become the Sons of God," as C.S. Lewis echoed the ancient wisdom, a wisdom that plays out in discipleship. Discipleship, service to God in difficulties, providence, and ascetical or spiritual practices all come together: God provides for us and disciples us in hard times as well as good. Sometimes he provides more plainly when we have nothing than when we have everything. In the [Philokalia](#), we hear the words of St. Makarios as he explains the place of suffering in discipleship:

He who wants to be an imitator of Christ, so that he too may be called a son of God, born of the Spirit, must above all bear courageously and patiently the afflictions he encounters, whether these be bodily illnesses, slander and vilification from men, or attacks from the unseen spirits. God in His providence allows souls to be tested by various afflictions of this kind, so that it may be revealed which of them truly loves Him. All the patriarchs, prophets, apostles and martyrs from the beginning of time traversed none other than this narrow road of trial and affliction, and it was by

doing this that they fulfilled God's will. 'My son,' says Scripture, 'if you come to serve the Lord, prepare your soul for trial, set your heart straight, and patiently endure' (Ecclus. 2 : 1-2). And elsewhere it is said: 'Accept everything that comes as good, knowing that nothing occurs without God willing it.' Thus the soul that wishes to do God's will must strive above all to acquire patient endurance and hope. For one of the tricks of the devil is to make us listless at times of affliction, so that we give up our hope in the Lord. God never allows a soul that hopes in Him to be so oppressed by trials that it is put to utter confusion. As St Paul writes: 'God is to be trusted not to let us be tried beyond our strength, but with the trial He will provide a way out, so that we are able to bear it (I Cor. 10 : 13). The devil harasses the soul not as much as he wants but as much as God allows him to. Men know what burden may be placed on a mule, what on a donkey, and what on a camel, and load each beast accordingly; and the potter knows how long he must leave pots in the fire, so that they are not cracked by staying in it too long or rendered useless by being taken out of it before they are properly fired. If human understanding extends this far, must not God be much more aware, infinitely more aware, of the degree of trial it is right to impose on each soul, so that it becomes tried and true, fit for the kingdom of heaven?

Hemp, unless it is well beaten, cannot be worked into fine yarn, while the more it is beaten and carded the finer and more serviceable it becomes. And a freshly moulded pot that has not been fired is of no use to man. And a child not yet proficient in worldly skills cannot build, plant, sow seed or perform any other worldly task. In a similar manner it often happens through the Lord's goodness that souls, on account of their childlike innocence, participate in divine grace and are filled with the sweetness and repose of the Spirit; but because they have not yet been tested, and have not been tried by the various afflictions of the evil spirits, they are still immature and not yet fit for the kingdom of heaven. As the apostle says: 'If you have not been disciplined you are bastards and not sons' (Heb. 12 : 8). Thus trials and afflictions are laid upon a man in the way that is best for him, so as to make his soul stronger and more mature; and if the soul endures them to the end with hope in the Lord it cannot fail to attain the promised reward of the Spirit and deliverance from the evil passions.

The story is told of a woman who was told the Lord would be with her, and afterwards found herself in an incredibly painful situation. When she cried out to the Lord and asked how this could be, the Lord answered: "I never said it would be easy. I said I'd be *with* you." God's way, it seems, is not to make things easy for us, but to strengthen us for greatness in what are often hard situations, and sometimes disasters. He gives us mountains to climb and the strength for climbing.

And we can climb mountains even if we are in an economic depression. Perhaps *especially* if we are in an economic recession. God's providence does not spare us from our suffering. Not even if we're really good Christians—*especially* not if we're really good Christians! If you read the saints' lives (see the links on [the natural cycle clock](#)), you will see that even with all the wondrous providence God provides for the saints, the saints in fact suffer much *more* than the rest of us; they know sufferings worse than most of us have ever been through.

There are saints whose prayers healed others—but who were for themselves never healed of their own major illnesses. If this sounds ironic, remember that Christ also was told, "Physician, heal thyself." Christ is pre-eminent as one who saved others but could not save himself, and "He saved others, but he cannot save himself" is one way of *defining* God's kingdom. Part of how people survived the Great Depression was that they carried the spirit of God's kingdom and worked to save others, and not just themselves. Communities of people survived the Great Depression because, even if no one could save "Me! Me! Me!", perhaps each one could help save *others*.

God's providence does not spare us from our suffering, but he works with us *in* our suffering, often to do things with us that could never happen if we had things our way. It may be precisely *on* the mountain, *in* the act of climbing, that God gives us the strength to climb!

Sometimes God works with us despite our best efforts to fix things so we can have things our way. Wise people rightly tells us, "Life is what happens while you're busy making other plans," and "You can't always get what you want." And perhaps if we did get what we wanted, we wouldn't get what God wanted for us. Some of us may try to fix our problems and pray to God to take them away—when his plan is to use our problems to build us up. St. Makarios above quotes [Hebrews](#), and in fact [Hebrews](#) is

one of the clearest books of the Bible that God works with us in suffering—in fact, that Christ himself was perfected by suffering (source):

But we see Jesus, who for a little while was made lower than the angels, crowned with glory and honor because of the suffering of death, so that by the grace of God he might taste death for every one. For it was fitting that he, for whom and by whom all things exist, in bringing many sons to glory, should make the pioneer of their salvation perfect through suffering.

Therefore he had to be made like his brethren in every respect, so that he might become a merciful and faithful high priest in the service of God, to make expiation for the sins of the people. For because he himself has suffered and been tempted, he is able to help those who are tempted. Therefore, holy brethren, who share in a heavenly call, consider Jesus, the apostle and high priest of our confession.

In the days of his flesh, Jesus offered up prayers and supplications, with loud cries and tears, to him who was able to save him from death, and he was heard for his godly fear. Although he was a Son, he learned obedience through what he suffered; and being made perfect he became the source of eternal salvation to all who obey him, being designated by God a high priest after the order of Melchiz'edek.

...But recall the former days when, after you were enlightened, you endured a hard struggle with sufferings, sometimes being publicly exposed to abuse and affliction, and sometimes being partners with those so treated. For you had compassion on the prisoners, and you joyfully accepted the plundering of your property, since you knew that you yourselves had a better possession and an abiding one. Therefore do not throw away your confidence, which has a great reward. For you have need of endurance, so that you may do the will of God and receive what is promised.

Our view of suffering is often that if we are suffering, then we cannot be where we should be. It often seems we can only be where we should be when we are *out* of a difficult situation). It seems that we are sidetracked, and will only stop being sidetracked when we have things our way. But

that is absolutely false. God worked with Christ in suffering. God worked with the saints in suffering. God worked with us in suffering. And that means that we can be in suffering and in pain, with our godly plans failing, and we are still just where God wants us: we may not see it, but sometimes our earthly failure is a heavenly victory. If God allows us to be in an economic collapse, he may be doing things with us, good things, that we might never happen if we had the comfort we seem to need. The last words above, about suffering and failure, lead *directly* into [the famous "faith hall of fame" in Hebrews 11](#).

What may be happening in our sufferings is that God is building us into greater people than if we succeed in getting what we want. Including if we are in an economic depression. This is a basic lesson of people growing up: many young people have big dreams for themselves, but grow by middle age into living for others, growing into something that could never happen if all their youthful dreams came true. And suffering has a place in this—and a greater and deeper value. The Son of God was made perfect through suffering. Innocent suffering is sharing in the suffering of Christ: Christ's suffering is made perfect in his people. St. Paul, the survivor who went through terrible suffering, wrote, "Now I rejoice in my sufferings for your sake, and in my flesh I complete what is lacking in Christ's afflictions." ([Col 1.24 RSV](#))

Suffering is *not* getting off-track, nor does it force us out of God's plans, so that we only get into God's providence as soon as things are the way we would like. What some of us fear in suffering is that if we are in difficult circumstances, then that must mean we are spiritual failures as well as failing on earth. If we are faithful and still fail in our plans, this does not mean that either God's plans or providence have failed. Often he is working at us when we are suffering and we are so far afield from anything that makes sense to us.

Everything we meet is either a blessing from God, or a trial that God allows for our strengthening. You may say that there is something evil in your trials, and you would be entirely right: there is something evil, and perhaps demonic, in our trials and afflictions. Perhaps you may say that there seems to be something almost demonic about an economic collapse, and you would still be right. But, as C.S. Lewis observes, *all* of us do the will of God. We may do the will of God as Satan and Judas did, as *instruments*, or we may do the will of God as Peter and John did, as *sons*.

But all of us do the will of God, and ultimately Satan and may be no more than a hammer in God's hand. And even if God allows rough trials, he allows them for our strengthening. St. Makarios is very clear: "The devil harasses the soul not as much as he wants but as much as God allows him to." Evil is on a leash. Let us be faithful. Every move the Devil plays is one move closer to his loss and God's victory, and ours if we are faithful.

I am not saying that the future holds much suffering. You or I may have a lot of suffering, or actually not that much. I am, however, saying that however much suffering God allows, he can still work with us. He can still work with us in an economic depression. (And that is even *without* going into how a great many people have been in situations they dreaded, and found life to still be beautiful.) As St. Paul, a survivor, closed [Romans 8](#):

Who shall separate us from the love of Christ? Shall tribulation, or distress, or persecution, or famine, or nakedness, or peril, or sword? As it is written, "For thy sake we are being killed all the day long; we are regarded as sheep to be slaughtered." No, in all these things we are more than conquerors through him who loved us. For I am sure that neither death, nor life, nor angels, nor principalities, nor things present, nor things to come, nor powers, nor height, nor depth, nor anything else in all creation, will be able to separate us from the love of God in Christ Jesus our Lord.

## **Building a house on the rock** *—it's not all about you!*

Ascesis refers to disciplined spiritual practice. It's a part of building a house on the rock. In the Orthodox tradition, these include sacraments, church attendance and daily liturgical prayers, reading and listening to Scripture, working to keep the Jesus prayer in your heart ("Lord Jesus Christ, Son of God, have mercy on me, a sinner"), growing into the liturgical seasons and internal and external fasting, hospitality, service, thanksgiving, repentance, giving to others who ask your help, cutting back on selfish pleasures, including icons in your prayer, solitude, community, and other practices. All of these can offer different help in growing to spiritual maturity.

But there comes a crucial caveat. None of these, if they are working correctly, are all about us. However essential they are to building a house on the rock, they are infinitely more than tools for how to survive an economic depression. They are tools to living in communion with God and being transformed by his grace. These disciplines, used rightly, can clear away obstacles to our growing in discipleship under God, but if they are used wrongly, they can be extremely harmful.

Using ascetical practices wrongly, as ends in themselves, has the same problem as Eeyore in [The House at Pooh Corner](#):

[Piglet picked some violets, decided to give them to Eeyore, and went to visit him.]

"Oh, Eeyore," began Piglet a little nervously, because Eeyore was busy.

"To-morrow," said Eeyore. "Or the next day." Piglet came a little closer to see what it was. Eeyore had three sticks on the ground, and was looking at them. Two of the sticks were touching at one end, but

not at the other, and the third stick was laid across them. Piglet thought that perhaps it was a Trap of some kind.

"Oh, Eeyore," he began again, "I just—"

"Is that little Piglet?" said Eeyore, still looking hard at his sticks.

"Yes, Eeyore, and I—"

"Do you know what this is?"

"No," said Piglet.

"It's an A."

"Oh," said Piglet.

"Not O—A," said Eeyore severely. "Can't you hear, or do you think you have more education than Christopher Robin?"

"Yes," said Piglet. "No," said Piglet very quickly, and he came closer still.

"Christopher Robin said it was an A, and an A it is—until somebody treads on it," Eeyore added sternly.

Piglet jumped backwards hurriedly, and smelt at his violets.

"Do you know what A means, little Piglet?"

"No, Eeyore, I don't."

"It means Learning, it means Education, it means all the things that you and Pooh haven't got. That's what A means."

"Oh," said Piglet again. "I mean, does it?" he explained quickly.

"I'm telling you. People come and go in this Forest, and they say, 'It's only Eeyore, so it doesn't count.' They walk to and fro saying 'Ha ha!' But do they know anything about A? They don't. It's just three sticks to them. But to the Educated—mark this, little Piglet—to the Educated, not meaning Poohs and Piglets, it's a great and glorious A. Not," he added, "just something that anybody can come and breathe on."

Piglet stepped back nervously, and looked round for help.

"Here's Rabbit," he said gladly. "Hallo, Rabbit."

Rabbit came up importantly, nodded to Piglet, and said, "Ah, Eeyore," in the voice of one who would be saying "Good-bye" in about two more minutes.

"There's just one thing I wanted to ask you, Eeyore. What happens to Christopher Robin in the mornings nowadays?"

"What's this that I'm looking at?" said Eeyore, still looking at it.

"Three sticks," said Rabbit promptly.

"You see?" said Eeyore to Piglet. He turned to Rabbit. "I will now—"

YOU SEE? said Eeyore to Piglet. He turned to Rabbit. I will now answer your question," he said solemnly.

"Thank you," said Rabbit.

"What does Christopher Robin do in the mornings? He learns. He becomes Educated. He instigates—I think that is the word he mentioned, but I may be referring to something else—he instigates Knowledge. In my small way, I also, if I have the word right, am—am doing what he does. That, doe instance is?"

"An A," said Rabbit, "but not a very good one. Well, I must get back and tell the others."

Eeyore looked at his sticks and then he looked at Piglet.

"What did Rabbit say it was?" he asked.

"An A," said Piglet.

"Did you tell him?"

"No, Eeyore, I didn't. I expect he just knew."

"He knew? You mean this A thing is a thing Rabbit knew?"

"Yes, Eeyore. He's very clever, Rabbit is."

"Clever!" said Eeyore scornfully, putting a foot heavily on his three sticks. "Education!" said Eeyore bitterly, jumping on his six sticks. "What is Learning?" asked Eeyore as he kicked his twelve sticks into the air. "A thing Rabbit knows! Ha!"

We need to avoid being Eeyores with our spiritual discipline, or our spirituality, or our faith, or our religion. Letters serve a greater purpose, and so do ascetical practices: we should not, like Eeyore, stare at an A and tell ourselves that it is our Education and Learning, or Prayers and Church Attendance as the case may be.

The point of ascetical practices is to be steps of the Great Dance: living the life that God shares, and becoming one of the sons of God. It's not merely a set of survival skills that work in an economic recession or depression, or even an economic collapse, even if "Do not worry about tomorrow, for tomorrow will have its own worries. Each day has enough trouble of its own," is quite practical advice. The point is to seek first the kingdom of a God who knows our survival needs: as God told Habakkuk before a disaster, "The righteous shall live by faith." The luminous thread beams brightly because it is more than just a white thread. It *shines*, and it shines with the light of Heaven, a light of divine love that illumines Creation.

What Eeyore doesn't get about the luminous thread is that it is the light of Heaven shining on earth.

## Better than an endowment

Some years before I became Orthodox, I was at a class where someone was commenting on Proverbs, and its texts that say, in essence, "Put your trust in God, not money." ("Riches do not profit in the day of wrath, but righteousness delivers from death," [Prov 11:4 RSV](#).) One point he made that particularly surprised me was, "Endowments aren't so great."

He asked a question: if we want to be independently wealthy, who do we want the "independently" to mean we are independent from? The answer he gave: "*Independent from God*." If we want to be independently wealthy, we may want something more than mere luxuries. The basic fantasy of life as we imagine ourselves being independently wealthy, is a life that is in control and unlike the actual messiness of our real lives with so many things that are simply beyond our control. And his suggestion, based on real life as well as Proverbs, is that it is actually not good for us to have an endowment that we can trust.

One kind of person counselors work with is the person who cannot be happy without being in control of everyone around them. The basic problem is that a person who needs to be in control is a tragically shrunken person, and part of what a counselor will try to give a person is an opportunity to step into a larger world. If you believe, "I can't be happy unless I'm in control of everyone I'm involved with," that will set you up for a lot of unhappiness.

This is not just because it is really hard to control everyone else. A few people who want to control others really do manage to control others around them, but they are really as unhappy as others who want the same thing but don't manage the control over others they always want to establish. As Chesterton observed, there may be some desires which are not achievable, but there *are* some desires which are not *desirable*.

If you want the world to be small enough that there is nothing outside

your control, you want to live in a small and terribly shrunken world. If you let go of that kind of control, you may find that you have let yourself into a much bigger world than if you were the biggest thing around, and in the process you become bigger yourself. Instead of being a tin god ruling a world as cramped as a cubicle, you become servant in God's vast mansions. And being one of many of these servants is a much better position to be in than dominating as a tin god.

And there is more to this larger world, the larger world of serving in God's great mansions. The words, "The righteous shall live by faith" were given, in full force, when a brutal invasion was coming. Those words may not originally have been about how to survive an economic depression. They were originally more about how to survive something worse: your country being taken over by terrorists!

The words, "The righteous shall live by faith," and the [Sermon on the Mount](#), apply to some pretty rough situations, *including* an economic recession, economic depression, or economic collapse. Christ's words about not worrying do not apply just to privileged people who have nothing seriously worth worrying about; many of the people who first heard the [Sermon on the Mount](#) were on the *bottom* of the totem pole and would see less material comfort than the kind of person most Americans would imagine as a homeless person.

The model prayer Christ would give is not a prayer for something nicer for people stuck on a nasty diet of burgers and KFC; the one physical request is for *bread*—by American standards, quite a dull thing to eat day in and day out, and possibly poorer nutritional fare than fast food—and it is in *this* context that Christ, in the [Sermon on the Mount](#), beckons us to store up treasure in Heaven, and invites us to a spiritual feast that unfurls in hard times as well as when everything meets our expectations. He invites us to the spiritual feast, the larger world, that is at the heart of spirituality and religion and is unlocked by faith. The [Sermon on the Mount](#) neither assumes nor needs a high standard of living to have real treasure.

The invitation to dance the Great Dance is open to us now as ever. All of us are invited to the Great Feast. Even if we've snubbed words like, "Money doesn't make you happy," and, "The best things in life are free," not only do those truths remain open to us, but the Divine Providence is no less open. If our external circumstances remove all the luxuries that serve us, we may discover that not only is it better to give than receive

serve us, we may discover that not only is it better to give than receive, but it is also better to serve and be served. We might take a tip from how people survived the Great Depression. If we are unemployed, we might serve others and find something that technologies and luxuries can't give, and if our 401(k) plan becomes a 404(k) and vanishes, we might lean on God's providence and discover that God's providence gives us more than money could.

There's a sign that was seen around my hometown that says, "Money may not do everything, but it sure keeps the kids in touch!" And I wonder if that is precisely what we gain if we do not know what will meet our needs in the future: our material needs can "keep the kids in touch" for God. Especially in an economy in shambles. And if that happens, we have something no money could buy: keeping in touch with God in a way that is ultimately a Heavenly transformation.

## The prodigal son: "I wish you were dead!"

The parable of the prodigal son begins ([source](#)):

There was a man who had two sons; and the younger of them said to his father, `Father, give me the share of property that falls to me.' And he divided his living between them.

Not many days later, the younger son gathered all he had and took his journey into a far country, and there he squandered his property in loose living. And when he had spent everything, a great famine arose in that country, and he began to be in want. So he went and joined himself to one of the citizens of that country, who sent him into his fields to feed swine. And he would gladly have fed on the husks that the swine ate; and no one gave him anything.

But when he came to himself he said, `How many of my father's hired servants have more than enough bread, but I am dying here with hunger! I will arise and go to my father, and I will say to him, "Father, I have sinned against heaven and before you; I am no longer worthy to be called your son; treat me as one of your hired servants."' And he arose and came to his father. But while he was yet at a distance, his father saw him and had compassion, and ran and embraced him and kissed him. And the son said to him, `Father, I have sinned against heaven and before you; I am no longer worthy to be called your son.'

But the father said to his servants, `Bring quickly the best robe, and put it on him; and put a ring on his hand, and shoes on his feet; and bring the fatted calf and kill it, and let us eat and make merry; for this my son was dead, and is alive again; he was lost, and is found.' And they began to make merry.

Today, one of the ways parents might give money to children is letting them "borrow against their inheritance:" they wouldn't have to pay the money back, but they lose that much of their inheritance when their parents die. And this is considered a fairly normal arrangement.

This *isn't* what is going on here. The younger son's request telegraphs something loud and clear: "I wish you were dead!"

We see a first glimpse of God's love—a love to the point of madness. Out of all responses the father could have to this affront, he gave every last penny he was asked for. The love to the point of madness may be easier to see later on, but it is already present in the gift by which he answers the ludicrously inappropriate request.

The son goes off to live life the way he wants to. And living life the way he wants to hits rock bottom. The big party he imagined he'd make for himself turns into famine and dire straits that leave him coveting the unappetizing husks that he is feeding to unclean, vile swine. He thought things would be better if he were calling the shots, not his father.

He thought things would be better if he were calling the shots. Just like some of us here. We don't want to have to wait under the authority of a Father who calls the shots. We want money and control, with things lined up here and now. What is it we are telling God if we ask him to give us money and control on our terms? Something a bit like, "I wish you were dead."

The younger son has discovered that life with his father out of the picture is not so glorious and wonderful. And he realizes the extent of his fall. So he resolves to go back and beg, not even for forgiveness, but possibly his father might even contain his wounded resentment enough to let him work for pay and be able to buy bread. (Who knows? Maybe a long shot, but what real alternative did he have?)

What was the father doing in all of this?

When husbands have gone off to war, there have been wives who have stood by the path of the doorway, looking for some hope that their husbands may return, looking and waiting, hour after hour, day after day, week after week, month after month, year after year... *never* giving up! And the father in our story was doing *exactly* that.

The father was looking, waiting, and saw his son far off, and completely cast off his upper-class dignity to run and embrace him. Love to the point of madness! He didn't even wait for an apology before

to the point of madness: He didn't even wait for an apology before embracing him and kissing him!

And when the son made a full confession, hoping maybe to toil for his father's scraps, the father pulls out all the stops: the best robe, a ring for his finger, and the best food possible for a royal feast. *This is love to the point of madness!*

But the story continues on to a more sobering note ([source](#)):

Now his older son was in the field; and as he came and drew near to the house, he heard music and dancing. And he called one of the servants and asked what this meant. And he said to him, `Your brother has come, and your father has killed the fatted calf, because he has received him safe and sound.' But he was angry and refused to go in.

His father came out and pleaded with him, but he answered his father, `Look, I have served you for all of these years, and I never disobeyed your command; yet you never gave me a goat kid, that I might make merry with my friends. But when this son of yours came, who has devoured your living with prostitutes, you killed for him the fatted calf!'

And he said to him, `Son, you are always with me, and all that is mine is yours. It was fitting to make merry and be glad, for this your brother was dead, and is alive; he was lost, and is found.'"

We have an Eeyore here.

This story has been called the parable of the two prodigals, meaning that not only did the one son tragically fall, but the other, elder son also tragically falls from the glory his father would have wished for him. At the beginning, the younger son wished that his father was dead. At the end, did the older son wish his father was dead?

The older son is a tragic spiritual Eeyore.

His statement could have come from a very different angle. For all of the years the older son was in his father's service, he toiled, and he may not have had rich party food—only solid, nourishing, ordinary food day by day. For all these many years, he worked hard in the context of the father training him, and drawing him into mature manhood. In the meantime, his brother has been ripping up his own soul, losing even what he thought he had at the mercy of merciless people with no one else who

cared for his well-being. The brother who all but told his father, "I wish you were dead," was in every sense save the literal, himself *dead*.

If it is painful to lose one's parents, it is another level of pain to lose one's child, and the father had seen one of his sons—not to mention the older son's only brother—die a living death. Now he was back, and in every sense *including* the literal, alive. Was killing the fatted calf even *enough* of a celebration?

The older son didn't get it. How well did his service to his father work? Not very well; it went badly enough that instead of sharing in his father's joy at a lost son who "was dead, and is alive again," acts bitterly affronted and indicts his father searingly. Which is to say, the son's hard work didn't *work*, any more than Eeyore's laborious staring at his three sticks achieved the true heart of "Learning" and "Education."

The point, though, is not really the tragedy of the older son. The point is that God welcomes people who turn to him, and welcomes them with open arms. It is only one step to turn to God, even if you think you are ten thousand steps away. But when are we ready?

It is easy enough to wait for life to *really* begin. When? Maybe when the present illness is gone, or when we get that promotion, or maybe just when we get a job in the first place, or when someone we deal with will become not quite so difficult a person, or when we have something paid off, or when Washington gets its act together. When something big or small changes, *then* maybe we will be in God's blessing. St. Herman of Alaska met some people who were waiting for their lives to *really* begin ([source](#)):

Father Herman gave them all one general question: "Gentlemen, what do you love above all, and what will each of you wish for your happiness?" Various answers were offered... Some desired wealth, others glory, some a beautiful wife, and still others a beautiful ship he would captain; and so forth in the same vein. "Is it not true," Father Herman said to them concerning this, "that all your various wishes can bring us to one conclusion - that each of you desires that which in his own understanding he considers the best, and which is most worthy of his love?" They all answered, "Yes, that is so!" He then continued, "Would you not say, 'Is not that which is best, above all, and surpassing all, and that which by preference is most worthy of love the Very Lord our Jesus Christ who created us adorned us

of love, the very Lord, our Jesus Christ, who created us, adorned us with such ideals, gave life to all, sustains everything, nurtures and loves all, who is Himself Love and most beautiful of all men?' Should we not then love God above everything, desire Him more than anything, and search him out?"

All said, "Why, yes! That's self-evident!" Then the Elder asked, "But do you love God?" They all answered, "Certainly, we love God. How can we not love God?" "And I a sinner have been trying for more than forty years to love God, I cannot say that I love Him completely," Father Herman protested to them. He then began to demonstrate to them the way in which we should love God. "If we love someone," he said, "we always remember them; we try to please them. Day and night our heart is concerned with the subject. Is that the way you gentlemen love God? Do you turn to Him often? Do you always remember Him? Do you always pray to Him and fulfill His holy commandments?" They had to admit that they did not! "For our own good, and for our own fortune," continued the Elder, "let us at least promise ourselves that from this very minute we will try to love God more than anything and to fulfill His Holy Will!"

The time for God is not at some indefinite point in the future when things will fit our hopes better. The time to work with God, in a sense the only time we should be concerned with, is now. Not later, *now*.

## More precious than gold

When I was a child, I remembered a story about a fearsome dragon who told a knight that if the knight would tickle the dragon's throat with a sword, he would have a great treasure. The knight rode up on his horse and approached the dragon, already afraid, and asked if the treasure was as good as a good horse and a good suit of armor. It was more, the dragon said. The knight asked if the treasure was as good as a silver suit of armor, and shield and sword to match. It was, the dragon assured him. The knight then asked if the treasure was better than gold. The dragon answered that it was more precious than rooms full of gold. So the terrified knight trembled and tickled the dragon's throat with his sword, and asked what the treasure was. And the dragon turned and ripped the knight's sword out of his hand, breathing out a tremendous deluge of fire and smoke and roared, "Your *life!*" And the terrified knight, having lost his sword, fled as best he could, and grasped a treasure far more precious than rooms and rooms full of gold.

Hard times may still let us know what is truly important, and what is truly treasure.

Even if we are in an economic depression, we have a treasure worth more than rooms and rooms full of gold: our lives.

For the righteous who walk by faith, hard times may even turn out to be good times.

St. John Chrysostom once wrote to people who think they are somebody if they conspicuously ride on a horse and have an armed servant clear the way before them, and told them that they were missing something and have *all* the wrong priorities. These words seem like they have nothing to do with how to survive in an economic depression—but on a very deep level, they have *everything* to do with how to survive in an economic depression where we may lose any number of things that seem

so essential. St. John Chrysostom wrote ([source](#)):

And I know that I am disgusting my hearers. But what can I do? I have set my mind on this and will not stop saying these things, whether or not anything comes of it. For what is the point of having someone clear the way before you in the marketplace? Are you walking among wild beasts so that you need to drive away those who meet you? Do not be afraid of the people who approach you and walk near you; none of them bite. But why do you consider it an insult to walk alongside other people? What craziness is this, what ludicrous folly, when you don't mind having a horse follow close behind you, but if it is a person, you think you are disgraced unless the person is driven a hundred miles away. And why do you have servants to carry horse \_\_\_\_\_, using the free as slaves, or rather yourself living more dishonorably than any slave? For truly, anyone who bears so much pride is more repulsive than any slave.

Therefore people who have enslaved themselves to this vile habit will never come within sight of true liberty. No, if you must drive away and clear away anything, do not let it be those who come near you, but your own pride. Do not do this by your servant, but by yourself, not by this material weapon, but by the spiritual one. Since now your servant drives away those who walk alongside you, but you yourself are driven from your rightful place by your own self-will, more disgracefully than any servant can drive your neighbor. But if, descending from your horse, you will drive away pride by humility, you will sit higher and place yourself in greater honor, without needing any servant to do this for you. I mean that when you have become modest and walk on the ground, you will be seated on the horse-drawn carriage of humility which carries you up to the very heavens, the carriage with winged steeds: but if falling from the horse-drawn carriage of heaven, you pass into that of arrogance, you will be in no better state than crippled beggars who are carried along the ground—no, much more wretched and pathetic than they are: since they are carried because of their bodies' weakness, but you because of the disease of your own arrogance.

Some of us also need the carriage of humility, even if we are not even in a position to make everybody get out of our way. And some of us might

benefit from the loving interdependence that was how people survived the Great Depression.

In tough times—and in tougher times—we may lose things we have set our hearts on, but it may be that however much we resist, God will give us something better. What if I lose my car, for instance? How could I get something better? But it is entirely possible that I could get something better than my present car. I might get something better than my own Rolls Royce, even better than my own private jet. I might get more *interdependence*, where *I* do not get around by what *I* do by *my* car. I may still be able to go places, but now by the love of my friends and family.

In that case, if I get some groceries, or a ride to church, I am not getting it as something run by me, me, me; I am riding on community and love. And the love of another who cares about me is a much bigger thing than economic self-sufficiency. It's the same thing as food tasting better if it is prepared with love for hospitality—then it isn't just food. You are, in a very real sense, eating a friend's love, and that is a richer and deeper kind of sustenance—and a richer, deeper, and fuller *goodness*!

Who knows? I might ride even higher than this if my car is taken from me. Perhaps I might respond to the humiliation of losing my car by starting to let Christ chauffeur me to Heaven in the flying Rolls-Royce of humility. Maybe I might even start being grateful, and be carried by the car of gratitude, and look for ways that I might launch into the heavens on the immense celestial starship of service to others.

And it is the starship of service to others—of saving others even though I cannot save myself—that shines with celestial glory. "It is more blessed to give than to receive"—the [Sermon on the Mount](#) again. Perhaps I might stop thinking about my own survival and instead think about how I can save others even though I cannot save myself. Some people did not just survive the Great Depression; they learned that life is beautiful. They stopped being tin gods trying to rule over a shrunken world and became servants of God and each other in the vast mansions of a glorious God. In the Great Depression, they did not have gold, but they grasped a treasure vaster than rooms and rooms full of gold. For some, the Great Depression was a wakeup call to what is truly important in life.

And that is true wealth.

Why are some of us not living this way already? Repentance is terrifying. In the tale of the prodigal son, the son who had devoured his

father's property was in far from his father's house, and had real work to get back. He had to *travel* in a much rougher sense than taking a plane, train, or bus, and faced much nastier dangers than "Dinner in New York, breakfast in London, luggage in Sydney."

Our word "travel" comes from the French *travailler*, referring to work, and not exactly easy work: with slightly different spelling, the same word appears in English as "travail," meaning a mother's struggle in childbirth. Travel was hard, gruelling, and dangerous labor, and not for the faint of heart. And the prodigal son undertook travel with far less of the strength—not to mention absolutely none of the wealth—by which he had gotten there. The feat would have been comparable to running a marathon, or at least a marathon where your path might well go through the turf of thugs lying in wait and quite willing to kill anyone who would *travail* into their ambush.

And yet this is exactly what the prodigal son did. His brother may have done the ascetical work of prayers and fasting; but the younger son undertook something much tougher: repentance which is, in a spiritual sense, what the younger son did to return home.

Repentance has been called unconditional surrender. It has been called other things as well, and it terrifies: it is a decision to return home and beg for mercy when you have no grounds to expect to be treated like anything but the vilest of the scum of the earth. Perhaps the Father's love to the point of madness may respond otherwise when we have repented. Perhaps when we surrender conditionally and expect to be razed to the ground, we find ourselves walking away triumphant victors whose refusal to surrender was holding on to defeat for dear life, terrified to let go of our defeat because we think it helps us. Perhaps we have nothing, really, to lose but our misery. But that isn't our concern when we need to repent.

But if we can repent—for all of us have much to repent of—and step into the [Sermon on the Mount](#) and begin to live by faith, then the Father's love will answer, and give us something better than whatever we grasp for in our forgetfulness that a provident God already knows our needs just as well in an economic depression as any other time. In an economic depression as much as any other time, the Father's love can meet these needs much better than we will if we control our inheritance ourselves.

In hard times in the past the Lord's arm and providence have shown

more plainly than they sometimes do here. Do you want to know how to survive an economic depression? The answer is very simple. It's not a matter of what you arrange. It's a matter of what *God* provides. When there is no natural hope of God's saints being taken care of, it may be a supernatural providence that we don't see as often when we have easy times.

In hard times as well as easy, the luminous thread woven throughout Scripture, appearing in one place in the words, "the just shall live by faith," and another place in a [Sermon on the Mount](#) that says, "Seek first the Kingdom of God, and his perfect righteousness, and all these things shall be added unto you"—this luminous thread is at the heart of faith, spirituality, and religion—and this luminous thread is more. It is a participation in the life of a God of love to the point of madness.

The luminous thread is spun by a God of love to the point of madness.

It may be in hard times that we fear that in hard times we will lose what is good for us.

But it may be that hard times, whether a recession, depression, or economic collapse, serve as a divinely given clue-by-four when we discover that the Father's love to the point of madness knows, and will give, what is much better for us. And on that point, I would like to quote a praise song about what is truly more precious than gold: the words go:

Lord, you are more precious than silver.  
Lord, you are more costly than gold.  
Lord, you are more beautiful than diamonds,  
And nothing I desire compares to you.

In one variant, these words answer:

And the Father said:  
"Child, you are more precious than silver.  
Child, you are more costly than gold.  
Child, you are more beautiful than diamonds,  
And nothing I desire compares to you."

These are the words of divine love to the point of madness, of a God who loves saints and sinners alike, of a God who rejoices more over one sinner who repents than ninety-nine righteous who do not need to

repent. And this is a God who loves us in hard times as well as good, a God of providence who seeks our highest good whenever we turn to him.  
God be merciful to us. (Amen!)

# **On Humor**

## Two parallel translations

Neither filthiness, nor foolish talking, nor *jesting*, which are not convenient: but rather giving of thanks. (Ephesians 5:4, KJV)

Nor should there be obscenity, foolish talk or *coarse joking*, which are out of place, but rather thanksgiving. (Ephesians 5:4, NIV)

Let me put a question, for which I have quoted this verse in two different translations, the King James Version and the New International Version. *This verse refers to humor. Does it refer only to off-color humor, or humor as a whole?*

I will be building up to an answer taken from the first-class humorist Mark Twain: "**The secret source of humor itself is not joy, but sorrow. There is no humor in Heaven.**"

A look at the Greek turns up a Greek term *eutrapelia* which only occurs here; it is not mentioned in Kittel's (unabridged) *Theological Dictionary of the New Testament*, but there is an entry for *Strong's Greek Lexicon*:

### *Eutrapelia*

wit, liveliness

### *eutrapelia*

witticism, i.e. (in a vulgar sense) ribaldry

Derivation: from a compound of G2095 and a derivative of the base of G5157 (meaning well-turned, i.e. ready at repartee, jocose);

KJV Usage: jesting. G2095 G5157

Thayer:

- 1) pleasantry, humour, facetiousness
- 2) in a bad sense
- 2a) scurrility, ribaldry, low jesting

The ambiguity is there in the Greek, which can mean witty repartee, humor as a whole, or vulgar humor specifically. The immediate context suggests coarse speech, but I would be wary of simply concluding that the verse only deals with lewd humor alone. The *Philokalia* gives encyclopaedic lists of vices, and some of them list jokes; in context coarse jokes are condemned but the condemnation is not limited to lewd humor. One thing we might miss if we simply try to resolve an ambiguity and ask, "Does the verse refer to off-color humor alone, or humor as a whole?" is that **the quintessential joke, [the bread and butter of rec.humor.funny](#), [the joke that has its own Wikipedia entry](#), is the obscene one:** the joke that is good enough for polite company is just hanging along for the ride.

(In which case the ambiguity of "joking" vs. "coarse joking" could be resolved that the verse applies principally and primarily to coarse joking, but extends naturally to joking in general.)

But let us leave that for the time being. And let us give the benefit of the doubt to the interpretation of one word in one verse: even if I am raising a concern about humor as such, including good, clean humor, one word in one verse is not the best place to argue from. Besides the *Philokalia* can include jokes and laughter when an author tries to catalogue every vice, I am concerned about Mark Twain's "The secret source of humor is not joy but sorrow; there is no humor in Heaven." I am concerned because my best sense is that he was right.

One time when my spiritual senses were being honed (during the discipline of a fast), I noticed something as a dialogue went on. I told the father of a kid I bantered with, "[Name] hurt my feelings." The kid said, "How did I do *that*?" And I replied, "Fess up, [Name]. Then we'll both know." And that time I noticed something; something in my end of the dialogue felt like a spiritual scream. My eyes were being opened to something laced in my humor; no complaint about either of the guys I was talking with but there was something I sensed in my many favorite jokes that tasted sweet but left you not realizing you were sick afterwards. To give one example:

Someone decided to become an icefisher. So he got a bunch of equipment, went on the ice, and drilled down a couple of inches when a deep, booming voice said, "There are no fish there!"

The surprised icefisher took up his gear, moved over fifty feet

The surprised icefisher took up his gear, moved over fifty feet, and began to drill down. He got down just half an inch when a deep, booming voice said, "There are no fish there!"

He moved over a hundred feet more, looked around, and the deep, booming voice said yet again, "Nor are there any fish there!"

The icefisher looked around and asked, "Who are you, God?"

The deep, booming voice said, "No! I'm the arena manager!"

The secret source of this joke's humor is pain. It smuggles in more pain than you would imagine at first: someone is idiot enough to try to go ice fishing in a hockey arena. And the humor comes when that pain is pulled into the open. Nor, really, is the pain just for the people in the joke. The joke is a pleasure laced with pain. Perhaps there is [a pleasure-pain syndrome where pleasure is laced with pain](#), but here we do not notice we have been sickened.

I once thought this joke would have been a good basis for a homily, to paint a picture where people ask of someone who dares to speak decisively in morals, "Who do you think you are? God?" and we reply that we're just arena employees. But to a friend I was talking to, and to me, there was something that seemed wrong about using this joke in a homily even when it might serve as an excellent springboard.

Not all jokes are created equal: the crass vulgarity is more wrong than the clean joke and the sidesplitting joke you repeat is more wrong than the spontaneous banter, but there is a line of continuity between all of these, between the cleanest and the most foul.

## So is there good news?

I would place two mental images in opposition to each other, in response to the question, "Is there any good news?" One is a place I worked where there was constant lewd joking; overall I got the impression that the obscene banter was a desperate bid to say something interesting, from people who could have had any number of interesting discussions. The chief effect I remember experiencing was not exactly being offended, but drained and drained. If an off-color jab is a desperate bid to say something interesting, it is not exciting, but dreary: if the most interesting thing you have to say are the same five dirty jokes, how great is that dullness!

The other image I would place opposite it is a priest standing, eyes closed, silent, intently concentrated in prayer. He is joyful, but the overall striking image is less joy than silence that speaks volumes. And this priest does not tell jokes, at least not often. But humor is not something missing from this priest. Maybe he does have a sense of humor and a few favorite jokes; I don't know. But what he has is better than funny, and what he gives others is better than a joke, however funny. He has and shares joy, and the rapt silence which is among his greatest treasures is also something he shares to the best of his ability.

Mark Twain said, "There is no humor in Heaven." If it seems natural to ask, "I *like* jokes. What consolation will I have if I give them up?" the answer is simply, "Heaven."

When I was moving towards Orthodoxy, an Orthodox friend warned me that he had found Orthodoxy to be "a long road of pain and loss". This he said, not to deter me from Orthodoxy, but so I could "know what you are getting into." And his words have proven true, but there is something he didn't tell me. The very real road of pain and loss has cost things I'd never imagine I'd be giving up, but the pain and loss have been the pain

and loss of dislodging pieces of Hell and making room for a fuller grasp of Heaven. [Orthodoxy has cost me my interest in fantasy](#), which is the same as saying that it cost me desires for things that were not real and I could not *ever* have, and given me in place desires for things that were real and a fuller desire for the One who is supremely Real. [Orthodoxy has cost me my almost religious "faith" in science](#), which is ultimately to say that it has cost me answering some of the wrong questions. [Orthodoxy has cost me trying to sate myself on pleasures](#), and cleared a distraction from things that offer genuine satisfaction. If Orthodoxy costs me [an interest in humor](#), it may be so that I can live here on earth the Heaven that has never known humor's sorrow. If Orthodoxy bids me say farewell to my search for earthly honors ([I really have enough](#)), it is so that I may search for Heavenly honors: the only honors that really matter. **[In all these things God is at work to give me the maximum in life.](#)**

The details and particular journey will be different for different people; this post and [The Pleasure-Pain Syndrome](#) pull from the *Philokalia*, but pull mint, dill, and cumin where the *Philokalia* offer justice, mercy, and faith. The *Philokalia* offer detailed discussions about how we are lured into different demonic traps, but the discussion of jokes is trivial by comparison with the discussion of unchastity. If it is even trivial. It does not occupy center stage, ever, but there is something worth unfolding, and it is particularly worth unfolding here and now.

We live in a time of pleasure seeking where pleasure delivery systems like Viagra *sell*. We also live in a time of lesser pleasures: pleasure delivery systems like televisions and smartphones *sell*. And we do not say with St. Paul, "When I became a man, I put childish pleasure-seeking behind me." And in this context, it can stretch us to say, "Jokes are nice, but I'm trying to avoid them and move on to bigger things." One could more sharply cite the Desert Fathers, "The Last Judgment awaits, and you laugh?", but we can say, "Sorry; it's powered by hidden pain; I'm looking for my happiness from other sources." And we can make a small step to move on to bigger things.

*Could you cut back on jokes, just a little?*

# Humor Delivers Pain

**Humor delivers pain.** That may sound like a strange thing to say but listen to me for a little bit. If you look at a joke, and really see why it's funny, the humor comes from delivering pain. Mark Twain said, "*The secret source of humor itself is not joy but sorrow. There is no humor in Heaven.*"

Let me give one example of humor that is funny because it delivers pain.

There was a man who decided he was going to become an icefisher, so he brought a bunch of equipment, got on the ice, and started to drill down a few inches. A deep, booming voice said, "There are no fish there!"

Startled, the man moved over fifty feet and started to drill again. The voice said, "There are no fish there, either!"

The man moved his equipment a hundred feet further, looked around, and the voice said, "Nor are there any fish there!"

The icefisher asked, "Who are you, God?"

The voice said, "No! I'm the arena manager."

What's so funny about this? The answer is that we have been slipped a bit of pain, slipped a very large bit of pain in fact: someone who genuinely and dearly wanted to be an icefisher was stupid enough to try to go icefishing in a hockey arena. Let me give another example.

For background to what is a bit of an inside joke, field service engineers enjoy a terrible reputation among a certain type of IT guru who, by the time they call for help, have done enough due diligence to understand the system better than the field service engineers do. And often field service engineers who don't know how to solve a problem try

swapping out parts with ~~known~~ assumed good parts to identify which part is the problem. This is called by the extremely pejorative metaphor, "Easter egging."

Q: How can you tell if a field service engineer has a flat tire?

A: The car's jacked up and he's swapping one of the tires with a spare to see which one's flat.

Q: How can you tell if a field service engineer is out of gas?

A: The car's jacked up and he's swapping one of the tires with a spare to see which one's flat.

This reminds me of one time I heard a local guru on a call with technical support; he was trying to talk with Dell because they shipped him a computer with visible chunks of dust under the screen. I didn't hear the other side of his conversation, but I did hear his words: "There's dust under the screen... And why are we messing with the BIOS [software settings]? ... Dude, there's *dust* under the *screen*!" He had to finally speak with the helpdesk employee's manager to recognize that the computer had been shipped with noticeable chunks of dust under the screen, that this was a problem, and the problem was not going to be solved by fiddling with software or anything else besides removing the dust from under the screen.

His side of the conversation was not intended as humor; it came out that way because it was painful enough that we laugh when we hear it. And the two field service engineer jokes, if they are really two jokes, deliver pain. The first joke delivers pain that a field service engineer will go Easter egging when casual observation would make it clear which tire was flat. The second joke, which uses the first joke as part of its buildup, says, metaphorically speaking, that a field service engineer has no strategies beyond swapping tires, and no concept that there are problems that are not solvable by swapping tires. If the first joke delivers pain, the second joke delivers unbelievable pain. And it's the same sort of scream as, "And why are we messing with the BIOS [software settings]?"

Let me step back from these minutia to quote the great humorist Mark Twain again: "*The secret source of humor itself is not joy, but sorrow. There is no humor in Heaven.*" I'm not sure if you've noticed this, but on stage at least professional comedians are bitterly miserable. I don't know about their private life; it could possibly be just an act. But on stage, at least, comedians draw from a well of sorrow, and there is something in

the same vein of "Send in the Clowns," which is not an ode to joy, but a dire bid to anaesthetize misery.

In my own life I have moved from telling jokes a lot, and making jokes for that matter ([The Joy of Windows](#), and [a joke I hope the reader doesn't get](#)), to starting to move away from humor as delivering pain. [In my last speech on iPhones and spirituality, I described two \*Far Side\* cartoons about television](#). But the point, the entire point, of their inclusion was not to make my lecture more pleasant. It was to deliver pain. And what I have found in trying to unplug humor as something that slips bits of pain is that my total pain is less, and there is more joy. It was terrifying to contemplate letting go of at least some humor, but what I have found is more freedom and more joy. Which sometimes happens when you let go of something you are afraid to let go.

There is no humor in Heaven, and letting go of humor may be more joyful than we think.

# The Hydra

## A Surprise About "Joy"

Before beginning a critique that begins with C.S. Lewis, I should stop to pause and state that the choice of C.S. Lewis is deliberate and intended to be provocative. C.S. Lewis is considered by many Christians to be their chief spokesman in the modern age; though it would unfairly impute to him an unworthy calculating approach, he made deliberate choices to try to stay within what he called "mere Christianity," meaning classic, little 'o' (o)rthodoxy, the Christianity of orthodox Christians, who might be described in Oden's turn of phrase as "people who can say the Creed without crossing their fingers." Most of people somewhere within the confines of Lewis's mere Christianity, can look at most of what Lewis says and find that there are mostly things they can accept. Different groups of Catholic, Orthodox, and Protestants who remain in continuity with historic roots and recognizable Christianity may believe things Lewis doesn't say, but a snatch of Lewis from almost anywhere attracts most real Christians. And needless to say, this is not the only thing Lewis had going for him. He was a brilliant author yet able to communicate clearly and simply; he was an able expositor; and he had a formation in much of what is best in Western literature, a formation that enriched first of all his fiction and fantasy but also affected his nonfiction. And he was, himself, a person who could say the Creed without crossing his fingers, and a good deal more than that. If one is going to look for an able spokesman for any spiritually alive form of 20th century Christianity, C.S. Lewis is at least

one of the front runners, and depending on the circles you move in, it might be said that choosing anyone else is a choice that requires justification.

And that is why I would like to begin my investigations with him.

C.S. Lewis, in one pivotal passage in his autobiography [Surprised by Joy](#), wrote:

...The first is itself the memory of a memory. As I stood beside a flowering currant bush on a summer day there suddenly arose in me without warning, and as if from a depth not of years but of centuries, the memory of that earlier morning at the Old House when my brother had brought his toy garden into the nursery. It is difficult to find words strong enough for the sensation which came over me; Milton's "enormous bliss" of Eden (giving the full, ancient meaning to "enormous") comes somewhere near it. It was a sensation, of course, of desire; but desire for what? not, certainly, for a biscuit tin filled with moss, nor even (though that came into it) for my own past. 'Τουλιανποθω [Oh, I desire too much]—and before I knew what I desired, the desire itself was gone, the whole glimpse withdrawn, the world turned commonplace again, or only stirred by a longing for the longing that had just ceased. It had taken only a moment of time; and in a certain sense everything else that had ever happened to me was insignificant in comparison.

The second glimpse came through *Squirrel Nutkin*; through it only, though I loved all the Beatrix Potter books. But the rest of them were merely entertaining; it administered the shock; it was a trouble. It troubled me with what I can only describe as the Idea of Autumn. It sounds fantastic to say that one can be enamored of a season, but that is something like what happened; and, as before, the experience was one of intense desire. And one went back to the book, not to gratify the desire (that was impossible—how can one possess Autumn?) but to reawake it. And in this experience also there was the same surprise and the same sense of incalculable importance. It was something quite different from ordinary life and even from ordinary pleasure; something, as they would now say, "in another dimension."

The third glimpse came through poetry. I had become fond of

Longfellow's *Saga of King Olaf*: fond of it in a casual, shallow way for its story and its vigorous rhythms. But then, and quite different from such pleasures, and like a voice from far more distant regions, there came a moment when I idly turned the pages of the book and found the unrhymed translation of *Tegner's Drapa* and read

*I heard a voice that cried,  
Balder the Beautiful  
Is dead, is dead—*

I knew nothing about Balder; but instantly I was uplifted into huge regions of northern sky, I desired with almost sickening intensity something never to be described (except that it is cold, spacious, severe, pale, and remote) and then, as in the other examples, found myself at the very same moment already falling out of that desire and wishing I were back in it.

The reader who finds these three episodes of no interest need read this book no further, for in a sense the central story of my life is about nothing else. For those who are still disposed to proceed I will only underline the quality common to the three experiences; it is that of an unsatisfied desire which is itself more desirable than any other satisfaction. I call it Joy, which is here a technical term and must be sharply distinguished from both Happiness and from Pleasure. Joy (in my sense) has indeed one characteristic, and one only, in common with them; the fact that anyone who has experienced it will want it again. Apart from that, and considered only in its quality, it might almost equally well be called a particular kind of unhappiness or grief. But then it is a kind we want. I doubt whether anyone who has tasted it would ever, if both were in his power, exchange it for all the pleasures of the world. But then Joy is never in our power and pleasure often is.

I know that desire. I know it intimately, and it has been called one of the central defining characteristics. And, as is said in *Ostrov*, "I know [the demon] personally." It is a form of covetousness, one that dwarfs the mere covetousness inspired by car ads, which portray luxury cars as mysterious, sensual, and intimate, and are in their own way "a particular kind of unhappiness or grief", and which are in their own lesser way "a

kind we want." So far as I know, the [Philokalia](#), which are (more than any other collection I've read, including the Bible) the science of interior struggle and spiritual warfare) says nothing of this secular enrapturement in its description of human beatitude. It does, perhaps, discuss something like this in the demon of noonday; today monks are perennially warned of the passion of escaping the here and now in which God has placed us, and the strict monastic is ordinarily to stay in one's cell and fight the demon of noonday. One classic story tells of a monk who said he defeated the demon of noonday by visiting an elder, and another monk sharply corrected him: far from *defeating* the demon of noonday, his trip was *giving in* to the demon of noonday. This longing, called *Sehnsucht* by the Romantics (and remember that C.S. Lewis's first work after returning to Christianity was [The Pilgrim's Regress: An Allegorical Defense of Christianity, Reason, and Romanticism](#), is eloquently given voice in a work connecting conservative Christianity with Jungian psychology in Brent Curtis's [Less-Wild Lovers: Standing at the Crossroads of Desire](#), which was published in Mars Hill Review, republished along with [First Things](#) and other heavyweights in the conservative Christian [Leadership University](#), and been gobbled up by complementarians (I am one) with works such as John Eldredge's [Wild at Heart](#). But there is an issue, not with complementarianism as such (though complementarians may jump at a literate voice saying something out of [lock]step with feminism), but with what is *not* present in [Less-Wild Lovers](#). And I would challenge the reader to look at the compelling, *haunting* picture in [Less-Wild Lovers](#), and ask what is not there for something that complains to be Christian: where, in the entire piece, is the human plight described in terms of the sin and evils condemned by Christian tradition? For the moment let's set aside the question of whether sin is understood, as in [Pilgrim's Progress](#), through the paradigm example of a judicial crime, or whether it is understood as in Orthodoxy through the paradigm example of a disease. John Bunyan and an Orthodox Christian can alike say that judged by the paradigm of the Ten Commandments, we don't stack up, and the Ten Commandments provide a yardstick of something seriously important in human living. Where in the entire article is the yardstick of human failing associated with such things as are in the Ten Commandments? And once a problem is admitted, where does God stand with regard to the center of things? Admittedly one is invited to a larger spiritual world, but when

does the advocated "way of the heart" revolve around Christ? Admittedly the differences here between Protestant and Orthodox are significant, but even with these differences where does the thesis that we are marred by sin and saved by Christ ever shape the outlook in the article? [Less-Wild Lovers](#) compellingly concentrates something that diluted C.S. Lewis's Christianity, something that helps make the [The Chronicles of Narnia](#) compelling, and a clue to something that is rotten in the state of Denmark. The longing C.S. Lewis appeals to is a form of covetousness, one I am too familiar with, and seriously not-cool.

The question of whether Lewis's ardent longing is covetousness is not purely academic. If you ask, "If it is sin, and it makes his life happier, does it really matter?" then my answer will be, "It didn't make Lewis's life happy, or at least it didn't make my life happy. The moment of haunting is sweet, whether or not one appreciates it at the time. But it darkens the overall picture. The times in my life when I have been most governed by 'Joy,' as Lewis calls it, have been the times when I was more unhappy, and times when I made others unhappy." But I am getting ahead of myself. The question of whether something is sin is in fact closely related to whether it will make us more unhappy.

In [A Pet Owner's Rules](#), I said, God is like a pet owner who only has two rules:

1. *I am your owner.* Receive freely of the food and drink I have given you.
2. Don't drink out of the toilet.

And, I argued, all sin is drinking out of the toilet. For example, getting drunk may feel enticingly nice the first time or two. But being drunk all the time, as any recovering alcoholic will tell you, is suffering you wouldn't want on your worst enemy. And covetousness as a whole is drinking out of the toilet. Pornography, with its lustful shade of covetousness, begins by being very enticing, but lust is the disenchantment of the entire universe: first pornography disenchantments everything that is not porn, and then it progressively disenchantments itself. And it also fits to add that ordinary covetousness is pleasant at first. Watching a really enticing commercial may help you understand the words, "Having is not as pleasing as wanting. It is not logical, but it is

often true." But the cost of covetousness is a loss of contentment. One begins by not being satisfied by what one has, and ends by not being satisfied by what one can get. Buying things may get momentary satisfaction, but the ultimate delivery, if you can buy what you covet, is nicer things and with them less contentment than one had before. And in these lines, it matters a great deal whether the intense longing of "Joy" or *Sehnsucht* is in fact covetousness. If it makes the human person settled in happiness, this is news to the Orthodox spiritual person. Everything that is like it is deemed unhelpful in the ascetical literature; avarice is poison, and obeying the demon of noonday is poison. I don't see that my own extensive experience with Joy has made me happy, and even its advocate in Lewis openly says that it can be seen as an intense joy or an intense wounded unhappiness. Admittedly we are to yearn for Christ God, perhaps in a sublimation of the impulse to yearn for created things, and some authors use 'eros' or 'yearning' in relation to God: but neither Lewis nor Curtis finds this desire to be particularly a desire for God. The cost of yearning something that, unlike cars and chewing gum, I cannot have no matter how much money I have, is like the more vulgar yearning stimulated by commercials. It seems palatial from the inside, like a doorway to a larger space, and it costs me something, namely contentment with what God has given me now. Some times I have recognized that my actions when I have been in the service of such yearning have been toxic. I now remember not a single time in my life when I have been happy that such yearnings have been prominent. If, as Lewis says, these yearnings are such that in their service one would choose them over happiness, perhaps this is not a mark of how wonderfully good they are. Perhaps it is a mark of how *foul* they are.

## The hydra, or one end of a fallen tree branch

I have written a fair amount of what is more or less nonmagical fantasy (short stories: [The Spectacles](#), [Stephanos](#), [Within the Steel Orb](#); novellas: [Within the Steel Orb](#), [Firestorm 2034](#), [The Sign of the Grail](#)), enough so that one fellow author, in a conversation where someone said the first three books by an author establish his brand, suggested that my brand might itself be nonmagical fantasy. And it is something I would not like to be my brand now, but it is a clue to something significant.

I had stepped away from most fantasy with its portrayal of magic; in response to friends who said, "Why can't we have fantasy with different physical laws?" I said (besides a bit about physics) that they were asking not for fantasy with different *physical* laws, but different *moral* laws, and I asked why they didn't want fantasy in which other unlawful things besides magic were all kosher. The "different physical laws" seemed to always mean laws that would allow life as we know it (which is astronomically improbable: for physical constants alone, getting things right enough to allow us to live would require precision in excess of a marksman who could hit a proton from the opposite side of the universe), but in addition allow occult activity without what Christianity has regarded as occult sin. And why, I asked, if one could allow such things under the heading of different physical laws, why not envision universes in which sexual sins were innocent and harmless? And amidst all this, I sought to recreate fantasy, but without magic... which is to say that I sought to excise portrayal of magic from a fabric woven from the same root. I removed the picture but kept the frame on the wall. What fantasy offers is an alternative to the here and now, an alternative that crystallizes in the portrayal of magic. And I had removed magic from fantasy but

retained the ambient orientation that powers magical fantasy.

What I am interested in here is a nexus that is something like a many-headed hydra: it appears in different places and different ways, but it is connected to the same reality (or, perhaps, unreality) underneath. People have said, "You pick up one end of a stick, you pick up the other," and while this nexus is perhaps more like a branch that keeps forking, with many places one can pick it up, it is still aspects of the same thing.

## Magic as an unnatural vice

My most recent haunting of "Joy" came with a desire for spring greenery and nature, by assumption in a neo-Pagan light. There are a couple of issues here; for one issue, our worship of nature is a worship of an idealized nature that cuts away plants that grow naturally because they are "weeds" (the definition of a "weed" is *a plant I don't want*, and the kinds of plants that intrude on our gardens as weeds tend to be those best suited to the local ecology), and puts plants that are ill-suited to grow in the area, perhaps needing extensive fresh water in an environment where fresh water is scarce. But the other, deeper issue has to be that when we reach for natural religion our eyes search for neo-paganism, perhaps Druidry. It was always with a faintly guilty conscience that in looking for wallpaper for my computer, I grasped for wallpapers of Stonehenge. Now I do not object to nature wallpaper as such; I have a waterfall wallpaper on my computer now and a clean conscience with it. But the Stonehenge wallpaper has to do with imagining nature in a pagan light. Perhaps this is a pagan light that neo-pagans and Druids would recognize; perhaps they would call it an outsider's conception. But in either case, as with the recent haunting of Joy, my reaching for nature was a grasping that had Romantic, pagan, or occult resonance.

But the Fathers regard occult sin as an unnatural vice. (There are other unnatural vices besides queer sexuality.) Our more ordinary adoration of nature seems to express itself in wanting to make it something it is not, culling plants that grow naturally as weeds and then trying hard to make "better" plants grow outside of their normal operating range. My haunting mentioned before was for spring greenery; I didn't respect that where I live, at this time of year, it is right and proper for everything green (besides evergreens) to be buried beneath a thick mantle of snow. (At least I didn't go to shovel the yard to make it like my

idealization.)

But there is a deeper sense in which nature-worship, or nature-magic, is unnatural. It is a bit like getting into a test-taking strategy where the only live question is how to best go about cheating on a test, and discussion of taking test is not about any legitimate method of test-taking, but only of how to cheat.

If there is anything that is natural for us to have, it is the here and now, and the plain sense of the here and now. This "here and now" may be out of doors, or it may be inside a house, or it may in an even more artificial environment like Antarctica or an airplane cockpit. But regardless of which of these possibilities we are actually in, "Your cell will teach you everything you need to know," and escape from the here and now is unnatural cheating on a test. It's not learning the main lesson brought by the here and now. And if nature is looked to as providing the substance of an escape, then nature is being looked to for something unnatural. Stepping out of a house into something green may momentarily provide escape; but the nature of "out of doors" is no more permanently exotic than "indoors." If the out of doors appears to us to have a shimmer of something magical, a shimmer of exotic escape from the here and now, then we are using nature to dodge the chief lesson that nature is intended to teach us. We are being unnatural in our use of nature herself.

I have mentioned Lewis's "Joy" and my "nonmagical fantasy" as heads of this many-headed hydra. It is also the poison that animates unnatural occult use of nature; for other heads, look at "metaphysics" in the occult sense, which is not (like the "metaphysics" of philosophy proper) a discipline of delving into the roots of existence as we know it, but using mental gymnastics, acrobatics, contortions to dodge the plain sense of existence as we know it. Gnosticism is seductively appealing, but there is a catch. The Gnostic appeal hinges on a spiritual climate of despair in the here and now; its good news is a salvation from the here and now. To someone who is genuinely happy, who appreciates the here and now, gnosticism will fall on deaf ears; it is like offering completely free chemotherapy to someone who has no trace of cancer. Video games, iPhones, special effects in movies, and an almost limitless array of technical options obviate the need to pursue the spiritual discipline of Gnosticism or occult practice to escape the hear and now, also provide a way out of the dull here and now—and make the here and now duller in

way out of the damn here and now — and make the here and now matter in the process! The list is open-ended and seemingly limitless; one of the characteristics of pride to the degree of prelest (which has been called "spiritual illusion" and "spiritual lust") is a progressive disengagement from the here and now, absorbed in funhouse mirrors.

## Awakening

There were many years when I read [The Chronicles of Narnia](#), and wished to be in another world, wished to be in Narnia and contradictorily wished to have in this world something from another world. The desire is a self-defeating: in my case, not coveting something like a watch or a car that I could perhaps buy if I could spare the money, nor for something like the Mona Lisa that physically exists even if it's not for sale, but a desire for something that, almost by definition, "If I can have it, by that very fact it is not what I want." It's a bit like wanting to drink wine from an unopened bottle: as soon as the bottle is open and the wine available to drink, it ceases to be what I want.

More recently, after years of struggling against this kind of coveting, which was in turn after decades of struggling to satisfy this kind of coveting, I remember thinking of Narnia as something I didn't want—I wanted things that were *real*. And I started to less want things I *don't* have, and more want things I *do* have. One saint said that we should desire whatever conditions we have, instead of desiring other conditions.

And it may turn out in the end that happiness was, like a pair of glasses, on our nose the whole time. If we let go of paganism as a way to connect with nature, we may find that Orthodoxy has held this connection with nature all the time, in details like the flowers adorning icon stands and the saying that if you have two small coins you should use one to buy prosphora and the other to buy flowers for the icons, to the status of the Orthodox Church as the vanguard of the whole visible Creation returning to her Lord, to monastics who cultivate a connection with God and end up having a connection to the natural world as well, to everything discussed in [Hymn to the Creator of Heaven and Earth](#). It turns out that the idea of paganism and Romanticism as the way to connect with nature was a decoy, but the good news is that the decoy is

not needed. We have better.

Creation is both angle worm and angel host. It is not just rocks and trees, or even rocks, trees, and men, for the race of mankind has always been part of nature, but spiritual and visible: ministering spirits sent to serve the elect, seraphim, cherubim, thrones, dominions, powers, authorities, principalities, archangel, and angel. And in all of this man is microcosm and mediator, the recapitulation and ornament of spiritual and visible creation alike. "In Christ there is no... male nor female," sounds today like a drop of feminism woven into the Bible today and correcting its fabric, but the ancients knew something greater. Deification leads to the transcendence of the difference between male and female, between paradise and the inhabited world, between Heaven and earth, between the spiritual and visible creation, and finally between uncreated and created nature. All these differences are transcended in the Dance. And we dance the Great Dance with Nature, not when we submit to her lead, but when we properly lead her.

An ancient hymn says, "Adam, trying to be god, failed to be god; Christ became man, that he might make Adam god." C.S. Lewis well enough said that though the journey to Heaven may cost us our right hand and our right eye, if we persevere through Heaven, we may find that what we have left behind is precisely *nothing*. If we let behind Romanticism and its by-definition-impossible quest for its harmony with nature, and all the occult hydra's heads offering escape from the here and now, we may find that when we have really and truly repented, repentance being the most terrifying moment in Christian experience, once we have opened our hands and let all their necessary-seeming contents fall away as far as God wants, what we have left in our hands is all the good we did not choose, together with all the good we did choose. Letting go of that perennially seductive wish for a moment of deep harmony with nature, deepens our harmony with nature: for indeed, in terms of true harmony with nature that is continuous with virtue, being at peace with one's surroundings, even in a skyscraper or even a space station, is more than a vacation where one is overwhelmed by hills and trees. And when we have repented of the escape that seems like our only real salvation given our circumstances, we are given real salvation in our circumstances: not wine from an unopened bottle, but appreciated wine from a bottle opened the usual way.

We have nothing to lose but our bondage to sin

we have nothing to lose but our bondage to sin.

# Hymn to the Creator of Heaven and Earth

With what words  
shall I hymn the Lord of Heaven and Earth,  
the Creator of all things visible and invisible?  
Shall I indeed meditate  
on the beauty of his Creation?

As I pray to Thee, Lord,  
what words shall I use,  
and how shall I render Thee praise?

Shall I thank thee for the living tapestry,  
oak and maple and ivy and grass,  
that I see before me  
as I go to return to Thee at Church?

Shall I thank Thee for Zappy,  
and for her long life—  
eighteen years old and still catching mice?  
Shall I thank thee for her tiger stripes,  
the color of pepper?  
Shall I thank thee for her kindness,  
and the warmth of her purr?

Shall I thank Thee for a starry sapphire orb  
hung with a million million diamonds, where  
"The heavens declare the glory of God;  
and the firmament proclaims the work of his hands.  
Day to day utters speech,  
and night to night proclaims knowledge.

There are no speeches or words

there are no speeches or words,  
in which their voices are not heard.  
Their voice is gone out into all the earth,  
and their words to the end of the earth.  
In the sun he has set his tabernacle;  
and he comes forth as a bridegroom out of his chamber:  
he will exult as a giant to run his course."?

Shall I thank Thee for the river of time,  
now flowing quickly,  
now flowing slowly,  
now narrow,  
now deep,  
now flowing straight and clear,  
now swirling in eddies that dance?

Shall I thank Thee for the hymns and songs,  
the chant at Church, when we praise Thee in the head of Creation, the  
vanguard of Creation that has come from Thee in Thy splendor and to  
Thee returns in reverence?

Shall I thank thee for the Chalice:  
an image,  
an icon,  
a shadow of,  
a participation in,  
a re-embodiment of,  
the Holy Grail?

Shall I forget how the Holy Grail itself  
is but the shadow,  
the impact,  
the golden surface reflecting the light,  
secondary reflection to the primeval Light,  
the wrapping paper that disintegrates next to the Gift it holds:  
that which is  
mystically and really  
the body and the blood of Christ:  
the family of saints  
for me to be united to,  
and the divine Life?

Shall I meditate

on how I am fed  
by the divine generosity  
and the divine gift  
of the divine energies?

Shall I thank Thee for a stew I am making,  
or for a body nourished by food?

Shall I indeed muse that there is  
nothing else I could be nourished by,  
for spaghetti and bread and beer  
are from a whole cosmos  
illuminated by the divine Light,  
a candle next to the sun,  
a beeswax candle,  
where the sun's energy filters through plants  
and the work of bees  
and the work of men  
to deliver light and energy from the sun,  
and as candle to sun,  
so too is the bread of earth  
to the Bread that came from Heaven,  
the work of plants and men,  
the firstfruits of Earth  
returned to Heaven,  
that they may become  
the firstfruits of Heaven  
returned to earth?

Shall I muse on the royal "we,"  
where the kings and queens  
said not of themselves "I", but "we"  
while Christians are called to say "we"  
and learn that the "I" is to be transformed,  
made luminous,  
scintillating,  
when we move beyond "Me, me, me,"  
to learn to say, "we"?

And the royal priesthood is one in which we are called to be  
a royal priesthood,  
a chosen people

a chosen people,  
more than conquerors,  
a Church of God's eclecticism,  
made divine,  
a family of little Christs,  
sons to God and brothers to Christ,  
the ornament of the visible Creation,  
of rocks and trees and stars and seas,  
and the spiritual Creation as well:  
seraphim, cherubim, thrones  
dominions, principalities, authorities,  
powers, archangels, angels,  
rank on rank of angels,  
singing before the presence of God,  
and without whom no one can plumb the depths  
of the world that can be seen and touched.

For to which of the angels did God say,  
"You make my Creation complete," or  
"My whole Creation, visible and invisible,  
is encapsulated in you,  
summed up in your human race?"

To which of the angels  
did the divine Word say,  
"I am become what you are  
that you may become what I am?"

To which of the angels did the Light say,  
"Thou art my Son; today I have adopted Thee,"  
and then turn to say,  
"You are my sons; today I have adopted you;  
because I AM WHO I AM,  
you are who you are."?

So I am called to learn to say, "we",  
and when we learn to say we,  
that "we" means,  
a royal priesthood,  
a chosen people,  
more than conquerors,  
a Church of God's eclecticism,

a family of little Christs,  
made divine,  
the ornament of Creation, visible and invisible,  
called to lead the whole Creation  
loved into being by God,  
to be in love  
that to God they may return.

And when we worship thus,  
it cannot be only us, for  
apples and alligators,  
boulders and bears,  
creeks and crystals,  
dolphins and dragonflies,  
eggplants and emeralds,  
fog and furballs,  
galaxies and grapes,  
horses and habaneros,  
ice and icicles,  
jacinth and jade,  
kangaroos and knots,  
lightning and light,  
meadows and mist,  
nebulas and neutrons,  
oaks and octupi,  
porcupines and petunias,  
quails and quarks,  
rocks and rivers,  
skies and seas,  
toads and trees,  
ukeleles and umber umbrellas,  
wine and weirs,  
xylophones and X-rays,  
yuccas and yaks,  
zebras and zebrawood,  
are all called to join us before Thy throne  
in the Divine Liturgy:

Praise ye the Lord

Praise ye the Lord.  
Praise ye the Lord from the heavens:  
praise him in the heights.  
Praise ye him, all his angels:  
praise ye him, all his hosts.  
Praise ye him, sun and moon:  
praise him, all ye stars of light.  
Praise him, ye heavens of heavens,  
and ye waters that be above the heavens.  
Let them praise the name of the Lord:  
for he commanded, and they were created.  
He hath also stablished them for ever and ever:  
he hath made a decree which shall not pass.  
Praise the Lord from the earth, ye dragons, and all deeps:  
Fire, and hail; snow, and vapours;  
stormy wind fulfilling his word:  
Mountains, and all hills;  
fruitful trees, and all cedars:  
Beasts, and all cattle;  
creeping things, and flying fowl:  
Kings of the earth, and all people;  
princes, and all judges of the earth:  
Both young men, and maidens;  
old men, and children:  
Let them praise the name of the Lord:  
for his name alone is excellent;  
his glory is above the earth and heaven.  
He also exalteth the horn of his people,  
the praise of all his saints;  
even of the children of Israel,  
a people near unto him.  
Praise ye the Lord.

How can we know Christ  
as the bridge between God and mankind  
if we forget Christ  
as the bridge between God  
and his whole Creation?

Can a wedge come between the two?  
Shall we understand the human mind  
without needing to know of the body?  
Shall we worship in liturgy at Church  
without letting it create a life of worship?  
Shall we say, "Let them eat cake?"  
of those who lack bread?  
No more can we understand Christ  
as saving "Me, me, me!"  
but not the whole cosmos,  
of which we are head, yes,  
but of which he is the greatest Head.

On what day do we proclaim:

As the prophets beheld,  
as the Apostles have taught,  
as the Church has received,  
as the teachers have dogmatized,  
as the Universe has agreed,  
as Grace has shown forth,  
as Truth has revealed,  
as falsehood has been dissolved,  
as Wisdom has presented,  
as Christ awarded...  
thus we declare,  
thus we assert,  
thus we preach  
Christ our true God,  
and honor as Saints  
in words,  
in writings,  
in thoughts,  
in sacrifices,  
in churches,  
in Holy Icons;  
on the one hand  
worshipping and reverencing  
Christ as God and Lord,

and on the other hand  
honoring as true servants  
of the same Lord of all  
and accordingly offering them  
veneration... *[Then louder!]*  
This is the Faith of the Apostles,  
this is the Faith of the Fathers,  
this is the Faith of the Orthodox,  
this is the Faith which has established the Universe.

Is it not the day  
when we celebrate the restored icons,  
because Christ became not only a human spirit,  
but became man,  
entering the Creation,  
the Word become matter,  
taking on himself all that that entails.

And all that that entails  
means that Christ became matter  
and that matter is to be  
glorified in his triumph,  
the same Christ  
whose physical body was transfigured  
and shone with the Light of Heaven itself  
and this was not an opposite  
of what is to be normal  
but rather transformed what is normal  
so that our embodiment is to be our glory.  
And this Christ,  
who lived as a particular man,  
in a particular place,  
honored every time and place,  
as the Nobel Prize for physics  
honors not simply one chosen physicist per year,  
but in its spirit  
honors the whole enterprise of physics.  
When Christ entered a here and now,  
he honored every here and now

he honored every here and now,  
and the Sunday of the restoration of icons  
is not "The Sunday of Icons"  
but

"The Sunday of Orthodoxy."

Christ was not a "generic" man  
with no real time or place.

Christ entered a here and now  
and his saints entered a here and now  
and if he became what we are,  
that we might become what he is,  
the divine become human  
that the human might become divine,  
then if we are not to divide the Christ,  
or truncate the Christ,  
then his victory extends  
to spirit shining through matter  
in icons.

How can we praise Thee for this, O Lord?

Is not it all born up  
in the scandal of the particular,  
and we remember the woman in whom Heaven and Earth met,  
who cannot be separated from the Church,  
nor from the Cosmos,  
to whom we sing  
with the beauty of Creation?

Shall we recall his work in Creation  
in the song to the woman  
in whom Heaven and Earth met?

I shall open my mouth,  
and the Spirit will inspire it,  
and I shall utter the words of my song  
to the Queen and Mother:  
I shall be seen radiantly keeping  
feast and joyfully praising her wonders.

Most holy Theotokos, save us.

Beholding thee,

... ..

the living book of Christ,  
sealed by the Spirit,  
the great archangel exclaimed to thee,  
O pure one:

Rejoice, vessel of joy,  
through which the curse  
of the first mother is annulled.

Most holy Theotokos, save us.

Rejoice, Virgin bride of God,  
restoration of Adam and death of hell.

Rejoice, all-immaculate one,  
palace of the King of all.

Rejoice, fiery throne of the Almighty.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

Rejoice, O thou who alone  
hast blossomed forth the unfading Rose.  
Rejoice, for thou hast borne the fragrant Apple.  
Rejoice, Maiden unwedded,  
the pure fragrance of the only King,  
and preservation of the world.

Both now and ever,  
and unto the ages of ages.

Amen.

Rejoice, treasure-house of purity,  
by which we have risen from our fall.  
Rejoice, sweet-smelling lily  
which perfumeth the faithful,  
fragrant incense and most precious myrrh.

O Mother of God,  
thou living and plentiful fount,  
give strength to those  
united in spiritual fellowship,  
who sing hymns of praise to thee:  
and in thy divine glory  
vouchsafe unto them crowns of glory.

Most holy Theotokos, save us.

From thee, the untilled field,  
hath grown the divine Ear of grain.  
Rejoice, living table  
that hath held the Bread of Life.  
Rejoice, O Lady, never-failing  
spring of the Living Water.

Most holy Theotokos, save us.

O Heifer that barest the unblemished Calf  
for the faithful, rejoice,  
Ewe that hast brought forth the lamb of God  
Who taketh away the sins of all the world.  
Rejoice, ardent mercy-seat.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

Rejoice brightest dawn,  
who alone barest Christ the Sun.  
Rejoice, dwelling-place of Light,  
who hast dispersed darkness  
and utterly driven away  
the gloomy demons.

Both now, and ever,  
and unto the ages of ages. Amen.

Rejoice, only door through  
which the Word alone hath passed.  
By thy birthgiving, O Lady,  
thou hast broken the bars and gates of hell.  
Rejoice, Bride of God,  
divine entry of the saved.

He who sitteth in glory  
upon the throne of the Godhead,  
Jesus the true God,  
is come in a swift cloud  
and with His sinless hands  
he hath saved those who cry:  
Glory to Thy power, O Christ.

Most holy Theotokos, save us.

With voices of song in faith  
we cry aloud to thee,  
who art worthy of all praise:  
Rejoice, butter mountain,  
mountain curdled by the Spirit.  
Rejoice, candlestick and vessel of manna,  
which sweeteneth the senses of all the pious.

Most holy Theotokos, save us.

Rejoice, mercy-seat of the world,  
most pure Lady.

Rejoice, ladder raising all men  
from the earth by grace.

Rejoice, bridge that in very truth  
hast led from death to life  
all those that hymn thee.

Most holy Theotokos, save us.

Rejoice, most pure one,  
higher than the heavens,  
who didst painlessly carry within thy womb  
the Fountain of the earth.

Rejoice, sea-shell that with thy  
blood didst dye a divine purple robe  
for the King of Hosts.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

Rejoice, Lady who in truth  
didst give birth to the lawgiver,  
Who freely washed clean  
the iniquities of all.

O Maiden who hast not known wedlock,  
unfathomable depth, unutterable height,  
by whom we have been deified.

Both now, and ever,  
and unto the ages of ages.

Amen.

Praising thee who hast woven  
for the world a Crown

not made by hand of man,  
we cry to thee:  
Rejoice, O Virgin,  
the guardian of all men,  
fortress and stronghold and sacred refuge.

The whole world was amazed  
at thy divine glory:  
for thou, O Virgin  
who hast not known wedlock,  
hast held in thy womb  
the God of all  
and hast given birth  
to an eternal Son,  
who rewards with salvation  
all who sing thy praises.

Most holy Theotokos, save us.

Rejoice, most immaculate one,  
who gavest birth to the Way of life,  
and who savedst the world  
from the flood of sin.  
Rejoice, Bride of God, tidings  
fearful to tell and hear.  
Rejoice, dwelling-place of the Master  
of all creation.

Most holy Theotokos, save us.

Rejoice, most pure one,  
the strength and fortress of men,  
sanctuary of glory,  
the death of hell,  
all-radiant bridal chamber.  
Rejoice, joy of angels.  
Rejoice, helper of them  
that pray to thee with faith.

Most holy Theotokos, save us.

Rejoice, O Lady,  
fiery chariot of the Word,  
living paradise,

having in thy midst  
the Tree of Life,  
the Lord of Life,  
Whose sweetness vivifieth  
all who partake of Him  
with faith, though they  
have been subject to corruption.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

Strengthened by thy might,  
we raise our cry  
to thee with faith:  
Rejoice, city of the King of all,  
of which things glorious and worthy to be heard  
were clearly spoken.  
Rejoice, unhewn mountain,  
unfathomed depth.

Both now, and ever,  
and unto the ages of ages.  
Amen.

Rejoice, most pure one,  
spacious tabernacle of the Word,  
shell which produced  
the divine Pearl.  
Rejoice, all-wondrous Theotokos,  
who dost reconcile with God  
all who ever call thee blessed.

As we celebrate this sacred  
and solemn feast  
of the Mother of God,  
let us come, clapping our hands,  
O people of the Lord,  
and give glory to God who  
was born of her.

Most holy Theotokos, save us.

O undefiled bridal chamber of the Word,  
cause of deification for all.

rejoice, all honorable preaching  
of the prophet;  
rejoice, adornment of the apostles.

Most holy Theotokos, save us.

From thee hath come  
the Dew that quenched  
the flame of idolatry;  
therefore, we cry to thee:  
Rejoice, living fleece wet  
with dew,  
which Gideon saw of old,  
O Virgin.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

Behold, to thee, O Virgin,  
we cry: Rejoice!  
Be thou the port and a haven  
for all that sail  
upon the troubled waters of affliction,  
amidst all the snares of the enemy.

Both now, and ever,  
and unto the ages of ages.  
Amen.

Thou cause of joy,  
endue our thoughts with grace,  
that we may cry to thee:  
Rejoice, unconsumed bush,  
cloud of light  
that unceasingly overshadowest the faithful.

The holy children  
bravely trampled upon the threatening fire,  
refusing to worship created things  
in place of the Creator,  
and they sang in joy:  
'Blessed art Thou and  
praised above all,

O Lord God of our Fathers.

Most holy Theotokos, save us.

We sing of thee, saying aloud:

Rejoice, chariot of the noetic Sun;  
true vine, that hast produced ripe grapes,  
from which floweth a wine making glad  
the souls of them that in faith glorify thee.

Most holy Theotokos, save us.

Rejoice, Bride of God,  
who gavest birth  
to the Healer of all;  
mystical staff,  
that didst blossom with the unfading Flower.  
Rejoice, O Lady,  
through whom we are filled  
with joy and inherit life.

Most holy Theotokos, save us.

No tongue, however eloquent,  
hath power to sing thy praises, O Lady;  
for above the seraphim art thou exalted,  
who gavest birth to Christ the King,  
Whom do thou beseech  
to deliver from all harm  
those that venerate thee in faith.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

The ends of the earth  
praise thee and call thee blessed,  
and they cry to thee  
with love:

Rejoice, pure scroll,  
upon which the Word was written  
by the finger of the Father.

Do thou beseech Him  
to inscribe thy servants  
in the book of life, O Theotokos.

Both now, and ever,

and unto the ages of ages.

Amen.

We thy servants pray to thee  
and bend the knees of our hearts:  
Incline thine ear, O pure one;  
save thy servants who are always sinking,  
and preserve thy city  
from every enemy captivity, O Theotokos.

The Offspring of the Theotokos  
saved the holy children in the furnace.  
He who was then prefigured  
hath since been born on earth,  
and he gathers all the creation to sing:  
O all ye works of the Lord,  
praise ye the Lord and exalt Him  
above all for ever.

Most holy Theotokos, save us.

Within thy womb  
thou hast received the Word;  
thou hast carried Him who carrieth all;  
O pure one, thou hast fed with milk  
Him Who by His beck feedeth the whole world.  
To Him we sing:  
Sing to the Lord,  
all ye His works,  
and supremely exalt  
Him unto the ages.

Most holy Theotokos, save us.

Moses perceived in the burning bush  
the great mystery of thy childbearing,  
while the youths clearly prefigured it  
as they stood in the midst of the fire  
and were not burnt,  
O Virgin pure and inviolate.  
Therefore do we hymn thee  
and supremely exalt thee unto the ages.

Most holy Theotokos, save us.

\*\*\*

We who once through falsehood  
were stripped naked,  
have by thy childbearing been clothed  
in the robe of incorruption;  
and we who once sat in the darkness of sin  
have seen the light, O Maiden,  
dwelling-place of Light.  
Therefore do we hymn thee  
and supremely exalt thee unto the ages.

Glory to the Father,  
and to the Son,  
and to the Holy Spirit.

Through thee the dead are brought to life,  
for thou hast borne the Hypostatic Life.  
They who once were mute  
are now made to speak well;  
lepers are cleansed,  
diseases are driven out,  
the hosts of the spirits of the air are conquered,  
O Virgin, the salvation of men.

Both now, and ever,  
and unto the ages of ages.  
Amen.

Thou didst bear the salvation of the world,  
O pure one, and through thee we  
were lifted from earth to heaven.  
Rejoice, all-blessed, protection and strength,  
rampart and fortress of those who sing:  
O all ye works of the Lord,  
praise ye the Lord  
and supremely exalt Him unto the ages.

Let every mortal born on earth,  
radiant with light,  
in spirit leap for joy;  
and let the host of the angelic powers  
celebrate and honor the holy feast  
of the Mother of God, and let them cry:  
Rejoice! Pure and blessed Ever-Virgin.

who gavest birth to God.

Most holy Theotokos, save us.

Let us, the faithful, call to thee:

Rejoice! Through thee, O Maiden, we have become partakers of everlasting joy.

Save us from temptations, from barbarian captivity, and from every other injury that befalleth sinful men

because of the multitude of their transgressions.

Most holy Theotokos, save us.

Thou hast appeared as our enlightenment and confirmation;

wherefore, we cry to thee:

Rejoice, never-setting star that bringest into the world

the great Sun. Rejoice, pure Virgin that didst open the closed Eden.

Rejoice, pillar of fire, leading mankind to a higher life.

Most holy Theotokos, save us.

Let us stand with reverence

in the house of our God,

and let us cry aloud:

Rejoice, Mistress of the world.

Rejoice, Mary, Lady of us all.

Rejoice, thou who alone art immaculate and fair among women.

Rejoice, vessel that receivedst the inexhaustible myrrh poured out on thee.

Glory to the Father,

and to the Son,

and to the Holy Spirit.

Thou dove that hast borne the Merciful One, rejoice, ever-virgin!

Rejoice, glory of all the saints.

Rejoice, crown of martyrs.

Rejoice, divine adornment

of all the righteous  
and salvation of us the faithful.

Both now, and ever,  
and unto the ages of ages.

Amen.

Spare Thine inheritance, O God,  
and pass over all our sins now,  
for as intercessor in Thy sight,  
O Christ, Thou hast her that on earth  
gave birth to Thee without seed,  
when in Thy great mercy  
Thou didst will to take the form of man.

To Thee, the Champion Leader,  
we Thy servants dedicate  
a feast of victory and of thanksgiving  
as ones rescued out of sufferings,  
O Theotokos:  
but as Thou art one with might which is invincible,  
from all dangers that can be  
do Thou deliver us,  
that we may cry to Thee:  
Rejoice, Thou Bride Unwedded!

To her is sung:

More honorable than the cherubim,  
and more glorious beyond compare than the seraphim,  
thou barest God the Word.  
True Mother of God,  
we magnify thee.

Shall we praise thee  
for the beauty of a woman  
with a child in her arms,  
or a child nestled in her womb?

Mary is the one whose womb  
contained the uncontainable God.

When that happened,

, . . . . .

she gave him his humanity,  
and there was an exchange of gifts.

Once you understand this exchange,  
it changes everything.

She gave him  
his humanity.  
He gave her  
grace,  
the divine life,  
as none before her  
and none after.

The cherubim and seraphim are the highest ranks of angels.  
'Seraph' means fiery one  
and they stand most immediately in God's presence.

What is this fire?  
Is it literal heat from a real fire?  
Or is it something deeper,  
something more fire-like than fire itself?  
Would not someone who understood the seraphim  
as the highest angels,  
angels that burn,  
would instead ask if our "real" fires  
are truly real?  
Is it emotion?  
Or is it not "emotion"  
as we understand the term,  
as "deep love"  
is not "hypocritical politeness"  
as we understand the term?  
Or yet still more alien?

Is there anything in our visible Creation  
that can explain this?

If a man were to be exposed to this fire,  
and he were not destroyed that instant,  
he would throw himself into burning glass  
to cool himself.

And yet an instant  
of direct touch with God the Father.

were that even possible,  
would incinerate the seraphim.

Then how can we approach God?

The bridge between Heaven and Earth:  
the Word by which the Father is known,  
the perfect visible image of the invisible God,  
who has become part of his Creation.

When we look at the Christ, the Bridge,  
and see the perfect image of God,  
God looks at Christ, the Bridge,  
and sees the perfect image  
of mankind  
and not merely mankind,  
but inseparably the whole Creation.

How shall we worship the Father,  
fire beyond fire beyond fire?

How shall we worship God,  
holy, holy, holy?

It is a mystery.  
It is impossible.  
And yet it happens  
in one who was  
absolutely God and absolutely man,  
and one who is  
absolutely God and absolutely man,  
bringing Heaven down to Earth,  
sharing our humanity  
that we might share in his divinity,  
and bring Heaven down to Earth,  
that Earth may be brought up to Heaven.

There is a mystic likeness  
between  
Mary, the Mother of God,  
the Church,  
and the world,  
feminine beauty  
created, headed, and served

by a masculine revealed God  
whom no one can measure.  
His Light is incomparably more glorious;  
we can know the energies from God  
but never know God's essence,  
and yet to ask that question is  
the wrong way of looking at it.  
It is like asking,  
"Which would you choose:  
Compassion for your neighbor or common decency,  
Being a good communicator or using language well,  
Living simply or not wasting electricity?"  
Christ and the Church are one,  
a single organism,  
and in that organism,  
the rule is one unified organism,  
not two enemies fighting for the upper hand.  
I am one of the faithful,  
and the clergy are not clergy at my expense.  
We are one organism.  
The Gift of the Eucharist does not happen,  
except that it be celebrated by a priest,  
and except that the people say, "Amen!"  
The Church in its fullness is present  
where at least one bishop or priest is found,  
and at least one faithful—  
and without the faithful,  
the clergy are not fully the Church.  
The "official" priest is priest,  
not instead of a priestly call among the faithful,  
but precisely as the crystallization of a priesthood in which  
there is no male nor female,  
red nor yellow nor black nor white,  
rich nor poor, but Christ is all,  
and is in all, with no first or second class faithful.  
Every Orthodox,  
every Christian,  
every person

is called to be  
part of a single united organism,  
a royal priesthood,  
a chosen people,  
more than conquerors,  
a Church of God's eclecticism,  
made divine  
a family of little Christs,  
sons to God and brothers to Christ,  
the ornament of Creation, visible and invisible,  
called to lead the whole Creation  
loved into being by God,  
to be in love  
that to God they may return.

So what can we do,  
save to give thanks  
for rocks and trees,  
stars and seas,  
pencils and pine trees,  
man and beast,  
faces and embraces,  
solitude and community,  
symphonies and sandcastles,  
language and listening,  
ivy vines and ivy league,  
cultures and clues,  
incense and inspiration,  
song and chant,  
the beauty of nature  
and the nature of beauty,  
the good, the true, and the beautiful,  
healing of soul and body,  
the spiritual struggle,  
repentance from sin  
and the freedom it brings,  
and a path to walk, a Way,  
one that we will never exhaust—

what can we do  
but bow down in worship?

Glory be  
to the Father,  
and the Son,  
and the Holy Spirit,  
both now and ever,  
and to the ages of ages.

**Amen.**

# The Law of Love Leaves the Golden Rule Completely in the Dust

[en.wikipedia.org/wiki/Fumble](http://en.wikipedia.org/wiki/Fumble)

In the present Wikipedia article on the Golden Rule, Harvard's humanist chaplain Greg Epstein is quoted as saying, "**do unto others' ... is a concept that essentially no religion misses entirely. *But not a single one of these versions of the golden rule requires a God***". Yet months after I lodged a protest about this at least depending on where your quote from the Gospel begins and ends, the chaplain's pristine wording still summarizes a list of quotes from the New Testament that begins and ends where some would expect it to. (In the other two parallel passages, Christ is quoted as saying explicitly that the duty to love one's neighbor was like the duty to love God.) As quoted earlier in the very same Wikipedia article:

A similar passage, a parallel to the [Great Commandment](#), is [Luke 10:25-28](#)

<sup>25</sup>And one day an authority on the law stood up to put Jesus

to the test. "Teacher," he asked, "what must I do to receive eternal life?"

<sup>26</sup>What is written in the Law?" Jesus replied. "How do you understand it?" <sup>27</sup>He answered, " 'Love the Lord your God with all your heart and with all your soul. Love him with all your strength and with all your mind.'(Deuteronomy 6:5) And, 'Love your neighbor as you love yourself.' " <sup>28</sup>"You have answered correctly," Jesus replied. "Do that, and you will live.".

After the point where the quote is ended as cited here, Christ is asked an evasive question and [drives home his point with an answer that is absolutely ludicrous and is meant to make his interlocutor pointedly uncomfortable](#). Though the absolute love for God is not treated as up for debate here, **trying to love your neighbor as yourself without loving the Lord with your entire being is a chicken with its head cut off.**

For now, I do not want to go into the unquoted followup to a question about where our obligations stop. I wish instead to say quite specifically here what the text quoted in the Wikipedia says. What it says, in essence, that "Love your neighbor as you love yourself" is a spillover to an absolute obligation to love God with your whole being. The obligation to love one's neighbor is, in mathematical language, a corollary to an obligation to love God. It's a consequence of the first stated imperative. Whilst one can cut the beginning and ending of the quotation so that "Love your neighbor as yourself" is all that survives the abbreviation, the obligation to love one's neighbor is but a brilliant shadow cast by the infinite obligation to love God. There is some degree of confusion in the suggestion that this gem, shared by Jew and Christian, works just as well if "Love your neighbor as yourself" is stripped of its foundation of, "Love the Lord your God with all your heart and with all your soul. Love him with all your strength and with all your mind." There is considerable insensitivity in seeing the two but failing to recognize them as connected.

While Eastern Orthodoxy may have a rich and many-layered understanding of holy icons and experience a rich interconnectedness between the theology of holy icons on the one hand, and a human race created in the image and likeness of God as stated in the very opening chapter of the Bible, it is not just Eastern Orthodox who have reason to

see an implied, too-obvious-to-need-stating connection between loving God and loving people who are made in the image of God. You cannot be cruel to a child without paining that child's healthy parent, and it is confusion to try to love God without implications for loving one's neighbor. I am not aware of C.S. Lewis articulating any particularly interesting theology of icon as such, but the rising crescendo that closes [The Weight of Glory](#) could hardly be clearer: "There are no *ordinary* people. You have never talked to a mere mortal... Next to the Blessed Sacrament itself, your neighbor is the holiest object presented to your senses." We are to love God entirely, and this love must unfold to loving God in the person of every neighbor who bears God's divine image. Only a Harvard humanist chaplain could make a blanket statement for all world religions and let slip something so foundational to the plain, old New Testament. You know, the text from which we learned John 3:16 as Bible-believing children.

---

Having said such, I would like to go over some rules and variations related to the Golden Rule, before explaining why I believe "Love your neighbor as yourself" is far more interesting than "Do unto others as you would have them do unto you."

### **A Fool's Golden Rule: *"If you can't take it, don't dish it out!"***

There is a bit of social wisdom, legitimate enough in itself, that is a sort of spurious version of the Golden Rule: "Don't tease others beyond the point where you can handle them returning the same." It may be wise enough to observe in practice, as it's really best not to get into waters deeper than you can swim, but in itself doesn't shed much light on whether teasing should really be avoided (a position that has adherents), or teasing is a legitimate and important dimension to any particularly strong personal connection (another position with adherents).

Of greater concern is this: different people have different tolerances for how much they can enjoy banter. Perhaps others will present less of a confusing situation if they also follow this Fool's Golden Rule, but it is desirable, and in the spirit of a real Golden Rule, to avoid teasing others beyond what they can handle.

If we go with an expectation that some people avoid getting into waters beyond what they can swim in, and some are less perspective, there is an element of self-care in making sure you don't invite more teasing than you can handle, and self-care can be perfectly legitimate. However, it doesn't address how to approach banter legitimately, and without dishing out needless pain. Perhaps one pair of options are either to mostly avoid teasing, indefinitely, or to start very lightly, gradually escalate with a question mark in your eyes, and stop immediately and later on tone things down a bit on any social cue that the other person has had enough. I believe this suggestion is arguably appropriate, but runs somewhat independently of the Golden Rule, and is even based on recognition that knowing what "you would have others do unto you" does not fully answer everything essential. Teasing within people's tolerances is an area where knowing only your own limits is not enough.

**However**, this would provide a nuance some have explored in relation to the Golden Rule. If you are eating peanut butter and jelly

sandwiches and a friend with a deadly peanut allergy walks by, perhaps you might show social respect, but there is neither any faintest obligation of hospitality nor the Golden Rule to knowingly give your special-needs friend food containing a large amount of peanut ingredients. If you're having beef stew and a vegetarian friend walks by, one obvious level of interpreting the Golden Rule is to offer some social salute and, depending on how rushed the friend is, invite the friend to join the conversation but not, under any ordinary circumstance, offer a bowl of beef stew. A classic comic has a father taking a son to a restaurant and bowling to celebrate, and in the last frame the mother tells the son, "I know; we also did all the things he likes for my birthday too."

I might note that some Orthodox authors have challenged this nuance (or, perhaps, nuanced the nuance). The essential argument is that if you're spiritually healthy, you will probably be at least sometimes seeking for yourself things that are good and genuinely in your best interest. If you are trying to show kindness to someone in the grip of passions, that person will be seeking to indulge passion and not what is in his best interests. The correct gift is, for that person, one that in some minor way, and without invading and assuming command, what you would want in the sense of something in one's own best interest, and not what the other person would want in the sense of serving one's passions.

### ***The Silver Rule: "Do Not Do Things to Others That You Would Not Have Them Do to You"***

Figures in multiple religious traditions have summarized ethics in a commandment not to do things you wouldn't want other people to do to you. It is unmistakable that "*Thou shalt not avenge, nor bear any grudge against the children of thy people, but thou shalt love thy neighbour as thyself: I am the LORD.*" has received devoted attention in Judaism for millennia. However, certain scholars who represent landmarks in the Talmud have summarized the Golden Rule in a more diluted form: they tell people only to refrain from doing things to others that they wouldn't want others to do to them. This is a lower bar.

I would like to put a word in to puzzled Christians wondering why master scholars of the Jewish Bible would choose what is essentially an ethical consolation prize, and a negative morality rather than a positive

morality.

My best guess here is that Talmudic scholars *didn't* choose a consolation prize. That is, they did not line up "Treat others the way you'd like to be treated" and "Don't do things to other people you wouldn't want them to do to you," and go for the less demanding option. The Old Testament thunders "Thou shalt not," and not in just the Ten Commandments. It includes "Love your neighbor as yourself" but not, as stated in the [Sermon on the Mount](#), "Do to others what you would have them do to you." It took me a long time to understand what a Lawgiver was years back, because I thought of rules as unhelpful and constricting. But I would call to mind a medievalist conference that talked about law in Western Europe, and said in essence that law had captivated the public imagination, and fascinated people as being, among other things, a way for people to resolve conflicts without attacking each other physically. Perhaps even the word "lawyer" has slimy connotations today and we think litigation is completely out of control, but to many in the medieval West, *people thought litigation was a live and better alternative to an ongoing and deadly feud*. Law was seen as a peaceful way to avoid violence. St. Moses was a Lawgiver, and [a great deal of that Law was devoted to forbidding people from engaging in destructive practices](#). There is brilliance in condensing the entirety of the Law to "Do not do things to other people that you would not do unto you," and I would suggest it is an anachronism to criticize Rabbi ben Hillel and others like them because they chose the Silver Rule over the Golden Rule. (*I see no reason to believe that they did anything of the sort.*)

Whether or not the Silver Rule is not as good as the full-fledged Golden Rule, it shares the strengths that make the Golden Rule so important. The Silver Rule and the Golden Rule both alike are short, simple directives that offer broad and far-reaching guidance. They might not replace longer and more detailed treatment of what is right and wrong, but a treatment of ethical details alone presents a danger of not seeing the forest for the trees. The Silver and Golden Rules help people see the forest very quickly, and then be in a better position to see the trees situated in the forest when it's time to study the trees. And, as has been pointed out, in U.S. educational culture the most important lessons are not introduced in graduate meta-ethics seminars; they're taught in kindergarten, with the Golden Rule often given a place of prominence. The "All I Really Needed to Know I Learned in Kindergarten" poster that

was ubiquitous some decades back reflects important choices made in U.S. educational culture, whatever other flaws it may have. The most important ethical lessons are placed at the very beginning of formal education itself.

I would also like to comment on the terms "negative morality" and "positive morality." The language is loaded. It doesn't mean, or at least not at first glance, that negative morality is bad and positive morality is good. I might mention what the term "progressive cancer" means. "Progressive" is not here loaded language flattering someone sufficiently liberal; a "progressive" cancer is a cancer that continues to advance and be more and more destructive despite the best treatment that's available. Returning to negative and positive morality, a negative morality essentially says, "Here's a list of things you shouldn't do. You're free to do anything else." A positive morality dictates your options far more narrowly: "This is what you should do." And I would make a pointed remark about positive moralities: **if you are going to choose a positive morality, choose very, very carefully.** *Every single one of the twentieth century Utopias that stacked up over a million innocent victims in its body count was driven by a positive morality!*

I ultimately side with a positive morality, if "morality" is really the term; as Orthodox I use the term "moral" / "morality" primarily with non-Orthodox because [the way Orthodoxy covers terrain there are spiritual disciplines and there is divinization, but there is not really a separate category of morality as such.](#) However, it is usually not helpful to ask people to grapple with an oblong concept like that if it can be avoided.

**The Golden Rule: "Do unto others as you would have them do unto you."**

I wish to comment quite briefly about the Golden Rule as classically worded that it appears exactly once in the Bible, that Christ states it in [the most important homily the Orthodox Church can offer](#), and that Christ himself endorses it as a complete summary of the Scriptures that existed then. The Golden Rule itself is the least in need of introduction of all these variations: asking the man on the street, "What's the Silver Rule?" or "What's the Platinum Rule?" should often elicit a perhaps puzzled, "I don't know." If you ask, "What's the Golden Rule?" people may not be

able to rattle off the words, "Do unto others as you would have them do unto you," but they should usually immediately recognize the reference and instantly recall the point, gist and basic concern whether or not they can quote (or misquote) the classic formulation.

### **The Platinum Rule: "*Do unto others better than you would have them do unto you*"**

I would briefly comment that the Platinum Rule is more a curiosity of discussion of ethics than a point in any live community's ethical system that I am aware of. For reasons to be discussed below, I believe the Law of Love represents a far more valuable way to go beyond the Golden Rule than simply upping the ante for what one is expected to give others.

However, while I am not aware of religions teaching the Platinum Rule (even in ethics it seems to me to only come up in academic discussions), it does seem to come up in practice even if it is not enjoined. The first job I had was at a rental yard, where assignments ranged from assembling tents from a celebration to scrubbing burnt-on crud off steel to putting away sewer snakes. It was not a glamorous position. However, I noticed that the worst and most disgusting jobs (such as cleaning up a port-a-potty after a wild and wet trailer ride) were always done personally by a manager. *Always*. In a traditional marriage and family, feminists may claim that the husband and father occupies the position of greatest privilege. This is possibly so, but under the live definition of privilege, his privilege includes taking an ailing pet to the vet for the last time. In the business world, there is the manager who from time to time skips lunch during crunch mode, but would never arrange a schedule so that one of her subordinates was asked to miss a meal. Goodwill, whether or not it is an organization of goodwill towards its employees' financial interests, asks people whether a donation is good enough to give a friend, and I would comment on that point that there are some pockets where people are generous and giving towards others, but continue to personally use worn or damaged possessions themselves that they would be mortified to give to someone else, especially someone lower than them socially. For a concluding example, anti-smoking advocates found that they met limited success with anti-smoking messages that said, "Hey, Dad! Look at what you're doing to yourself!" (Dads seemed not to be terribly concerned.)

Then they shifted the center of the message to, "Hey, Dad! Look at what you're doing to your kids!" and, **Wow!** was there a change.

The Platinum Rule may or may not be preached anywhere outside of academia. It does, however, appear to be something people practice of themselves in situations where they have been brought up to respect the Golden Rule.

## **And now I will show you a more excellent way**

One patristic claim has been that the Old Testament purifies what is done externally in the hands, and the New Testament purifies what is done inwardly in the heart. That may be painting things with broad strokes, and someone who doesn't know the Bible well may still point out that as prominently as in the Ten Commandments the Old Testament forbids coveting in one's heart, and the New Testament has numerous passages condemning concrete actions as sin. I don't know the Talmud, but I'm pretty sure that a good Talmud scholar could point out numerous passages rejecting sins committed, at least at first, only in the heart. However, it is helpful to understand here that the relationship between "Old Testament" and "New Testament" is really not a relationship between "First installment" and "Second installment: more of the same."

One core aspect of "Road to Emmaus" passage that winds up Luke's Gospel is, "Then he said to them, "Oh, how foolish you are, and how slow of heart to believe all that the prophets have declared! <sup>26</sup> Was it not necessary that the Messiah<sup>[1]</sup> should suffer these things and then enter into his glory?=<sup>27</sup> Then beginning with Moses and all the prophets, he interpreted to them the things about himself in all the scriptures." "Scriptures" does not here refer to any part of the New Testament; there is only one place, in 2 Peter, that any part of the New Testament is called Scripture. Furthermore, at the time reported in this Gospel passage, none of the books of the New Testament had been written. The basic model of Scripture in this passage, which remained live for a surprisingly long time, was that the Scriptures were the Old Testament and represented a locked treasure hoard, and the New Testament contained the key to unlock the Old Testament Scriptures. Fr. John Behr commented in a class

that the worst thing that happened to the Church was the canonization of the New Testament. He was perhaps speaking provocatively, but he was driving home a patristic enough point that the Old and New Testaments should not be identified as a first installment and a second installment of the same.

At least in the Wikipedia, "Love your neighbor as yourself" is treated as a wording or formulation of the Golden Rule. I would like to draw an increasingly sharp distinction, and from here, I will use the terms **Golden Rule** to strictly mean paraphrases or repetitions of "Do unto others as you would have them do unto you," and **Law of Love** to mean "Love your neighbor as yourself," with or without explicitly stating the commandment to love God from which it arises.

In my own experience, I was surprised by what was apparently obvious enough to the article authors that there seemed no perceived need to establish or defend: that the Law of Love was a wording of the Golden Rule, apparently interchangeable with others.

The first, relatively superficial objection I had was that the Golden Rule uses one's own desires as a guideline for what action to take. The Law of Love does not directly state what actions to take, and the implied line of action I would see (others might nominate other candidates) is an obligation to seek others' best interests. It is long religious experience that we often do not seek our own best interests, but guilt traps, and the Christ who commands love for one's enemies might perhaps leave room to believe that someone who meets forgiving love with ongoing hostility might, perhaps, be even further from seeking what is genuinely beneficial to them. In the Golden Rule the yardstick of action, at least on a rule of thumb level, is one's own desires. My personal impression, as someone who has problematic desires, is that the yardstick for action, besides love which I will come to in a minute, is that it is the other person's best interests.

The second, more serious objection I can think of, has to do with virtue. One basic distinction has been made between a rule-based morality and a virtue-based morality. At the heart of Confucianism, for instance, is not any calculus of required, permitted, and forbidden actions; the highest goal is to become a person who embodies certain virtues, such as a filial piety. The [Philokalia](#) draws on certain Greek philosophy, carefully and selectively. The greatest debt I can see to a

feature of Greek philosophy in the whole collection is in the cardinally important place that is given to virtues. The concept may be adapted for Christian use at points, but any reasonably sensitive reading would recognize that virtue, from wherever the authors acquired it, is extremely important in the text. As regards the Golden Rule, it is a strictly rule-based guideline and need not perturb a rule-based morality. As regards the Law of Love, "love" may appear as a verb and not a noun, but the commandment is to exercise *virtue*. Now there are feedback and reinforcement between what is in your heart and what you do with your hands; someone who is honest is more likely to tell the truth, but conversely telling the truth is a practice that also builds the virtue of honesty. However, the Law of Love takes the action from the Golden Rule's playing field of (potentially) rule-based morality, and puts us on turf where virtue at least looms large.

[The Ladder of Divine Ascent](#) is on the shortlist of Orthodox classics, and Orthodox monastics traditionally read it each Lent. It has various steps of virtues to acquire and vices to surrender, amounting to thirty steps in total. And elements of Greek philosophy may be present; the step that is second from the top is "Dispassion", a Holy Grail sought in the same philosophical currents that had the authors of the [Philokalia](#) think so much in terms of virtue. However, the very, very top rung of all in the great Ladder is the "Faith, Hope, and Love" in an industrial-strength allusion to one of the favorite chapters of the Bible the world around:

If I speak in the tongues of mortals and of angels, but do not have love, I am a noisy gong or a clanging cymbal. <sup>2</sup> And if I have prophetic powers, and understand all mysteries and all knowledge, and if I have all faith, so as to remove mountains, but do not have love, I am nothing. <sup>3</sup> If I give away all my possessions, and if I hand over my body so that I may boast,<sup>[a]</sup> but do not have love, I gain nothing.

<sup>4</sup> Love is patient; love is kind; love is not envious or boastful or arrogant <sup>5</sup> or rude. It does not insist on its own way; it is not irritable or resentful; <sup>6</sup> it does not rejoice in wrongdoing, but rejoices in the truth. <sup>7</sup> It bears all things, believes all things, hopes all things, endures all things.

<sup>8</sup> Love never ends. But as for prophecies, they will come to an

end; as for tongues, they will cease; as for knowledge, it will come to an end. <sup>9</sup> For we know only in part, and we prophesy only in part; <sup>10</sup> but when the complete comes, the partial will come to an end. <sup>11</sup> When I was a child, I spoke like a child, I thought like a child, I reasoned like a child; when I became an adult, I put an end to childish ways. <sup>12</sup> For now we see in a mirror, dimly, <sup>[b]</sup> but then we will see face to face. Now I know only in part; then I will know fully, even as I have been fully known. <sup>13</sup> And now faith, hope, and love abide, these three; and the greatest of these is love.

And there is further to go than virtue-based morality.

## Beyond even virtue-based morality

The concepts "You need right action" and "You need to be in the right moral state", taken together, cover many of the world's ethical systems, and for that matter cover most of what I have said so far.

### ***I would like to push further.***

Your actions are in some sense something you possess, and your virtues are in some sense something you possess. Perhaps neither one nor the other is an item you can put on your desk next to your car keys, but they can appear, so to speak, as self-contained. Which they are not.

I was rebuked, when I was newly minted as Orthodox, for asking a question entirely framed by the Reformation schema of nature, sin, and grace, and given very good pastoral advice to stay out of 16th century Reformation concerns for a while. I am grateful for this. That stated, the Reformers were not the first people to see grace, and our need for grace, in that faith whose book is the Bible. But the [Philokalia](#) has titles like the in-depth "On Those Who Think They Are Made Righteous By Works," and stern warnings that you may only take credit for those achievements you pulled off before you were born (an exception could be made disqualifying the handful of places in the saints' lives where an unborn child cries or speaks from within the womb). This is not exactly a teaching of grace alone, in that there is a sense of synergy in relation to a divinization where we contribute, but the relevant Fathers are here as clear as any of the Reformers that however much we seek virtue and right actions, we should take no credit before God. Even if, as it turns out, on Judgment Day the saved who take no credit for their works are given full credit for these works by God.

The whole of how we are created is for a divine dance, where we are

part of a larger picture and God is calling the shots. Had I raised another Protestant question about discerning God's will for my life, I might have gotten an equally helpful rebuke. Christ has all but sworn that if we seek first the Kingdom of God and his perfect righteousness, all God's Providence will follow, including career paths, material needs, and so on and so forth, perhaps even without our needing to *try* to seek God's will for our lives. God's Providence may have plans for the course of our lives, which will be given if we seek first God's Kingdom, but the New Testament doesn't have a word about seeking God's will for our lives. When it discusses God's will, it discusses God's will for Creation and the like. Nowhere do the Pauline letters discuss a discernment of what course is intended for your life, or mine.

### **Sometimes pagan custom ain't so great**

I was in England and on a Cambridge tour was excitedly shown, in a church building no longer live as a place of worship, pagan symbols such as two-tailed mermaids on the baptismal font. What I wanted to ask, instead of just holding my tongue, was whether she had anything to say about Christian symbols in the building. But I held my tongue.

There is an ambiance of mystery and the alluring today surrounding pagan customs, and someone who reads some of the same books I've read may read, for instance, about a heirarch who wisely decided to try to wean a newly-illuminated people from pagan practices across a few generations, or that some particular detail of observance was in origin an exotic pagan custom that was incorporated into the Church's intricate practices. And, in general, I've read that some leniency was observed in relation to pagan custom. What may be the first written account of the life of St. Seraphim of Sarov, [Flame in the Snow](#), seems unblushing about recording a preserved pagan custom here and there.

But may I say something about pagan custom in relation to my own milieu, and one intended to be not enticing, but **banal**?

We have bank accounts and general financial planning and don't let a good deal of what the [Sermon on the Mount](#) says about providence and God's generosity get past our filters. We want endowments, or in short, we want the financial infrastructure to what is, in the end, Hell.

This may be a much less exotic and enticing than the chasing and

catching game in the great St. Seraphim's life, but I really mean it. Forget every sexy connotation that vaguely rises up at the thought of being allowed to practice a pagan custom. One of the great pagan customs in our world is wealth management, and here I write not as someone without slaves who calls for the abandonment of slavery, but someone with fewer slaves who calls for the abolition of slavery. We need, by God's grace to wean ourselves from the violation of the [Sermon on the Mount](#) that forever tries to create our own providence, administered by nothing wiser than our own hand. That is (among the) pagan customs that should come to mind when we think of the Church trying by degrees to free generations of converts from pagan custom, ancestral or otherwise.

The story is told of a little girl who saw, in a vending machine, a metal necklace with gold wash. She asked her Dad, but he discouraged her. But she insisted, and he bought the necklace. That night at bedtime, he asked her, "Do you love me?" She said, "Yes." He said, "Give me the necklace," but she didn't. The next night, the same thing happened. Many nights later, with tears in her eyes, she reached out and set her necklace in his hand, the gold wash all but gone. He, also with tears, reached out with his other hand, and gave her a necklace of solid gold.

What we are invited to is God's Providence, but we can opt out by trying to get our own ersatz providence and not really need God's intervention. (One of the names for this is, "Hell.") We are instead summoned to the Great Dance, where many people weave together in intricate motion and in unfolding glory, and things end up better than we could have imagined if we had everything our way. (Or we can insist on trying to have our way; one of the names for this is, "Hell.") Or we can stop fighting, and work with God as he draws us into a larger world and opened our eyes to what was there all along, but still more things in Heaven and earth than are dreamed of in our financial planning.

And, incidentally, trying to live on a basis of what pseudo-providence you can get for yourself is not a new pagan custom: while admittedly some of our financial instruments were not available then, Christ calls the basic practice a pagan custom as much as anyone else has: "**For after all these things the [pagans] seek.**" Christ never denies that we need food, water, clothing, etc., but he does try to give people a clue that the God who has loved them from eternity already knows the needs he has built in to their constitution, and has every desire to provide everything

necessary to people who are seeking what really **is** worth seeking.

(*Similar remarks could be made for other ways we isolate ourselves from patristic submission to the [Sermon on the Mount](#) in favor of pagan customs.*)

### **In depth: *If thine eye be single...***

St. Philaret of Moscow, possibly a rare instance of a Metropolitan named after a layman, wrote a famed prayer for the acceptance of God's will:

O Lord, I do not know what to ask of Thee. Thou alone knowest what are my true needs. Thou lovest me more than I myself know how to love. Help me to see my real needs which are concealed from me. I do not dare to ask either for a cross or for consolation. I can only wait on Thee. My heart is open to Thee. Visit and help me, for the sake of Thy great mercy. Strike me and heal me; cast me down and raise me up. I worship in silence Thy holy will and Thine unsearchable ways. I offer myself as a sacrifice to Thee. I have no other desire than to fulfill Thy will. Teach me to pray. Pray Thou Thyself in me. Amen.

And this humility opens up a passage from the Sermon on the Mount, the greatest Orthodox homily in history, [and possibly the most politically incorrect](#):

Lay not up for yourselves treasures upon earth, where moth and rust doth corrupt, and where thieves break through and steal: But lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through nor steal: For where your treasure is, there will your heart be also.

The light of the body is the eye: if therefore thine eye be single, thy whole body shall be full of light But if thine eye be evil, thy whole body shall be full of darkness. If therefore the light that is in thee be darkness, how great is that darkness!

No man can serve two masters: for either he will hate the one, and love the other; or else he will hold to the one, and despise the other. Ye cannot serve God and mammon. Therefore I say unto you,

Take no thought for your life, what ye shall eat, or what ye shall drink; nor yet for your body, what ye shall put on. Is not the life more than meat, and the body than raiment? Behold the fowls of the air: for they sow not, neither do they reap, nor gather into barns; yet your heavenly Father feedeth them. Are ye not much better than they? Which of you by taking thought can add one cubit unto his stature? And why take ye thought for raiment? Consider the lilies of the field, how they grow; they toil not, neither do they spin: And yet I say unto you, That even Solomon in all his glory was not arrayed like one of these. Wherefore, if God so clothe the grass of the field, which to day is, and to morrow is cast into the oven, shall he not much more clothe you, O ye of little faith?

Therefore take no thought, saying, What shall we eat? or, What shall we drink? or, Wherewithal shall we be clothed? (For after all these things do the [pagans] seek:) for your heavenly Father knoweth that ye have need of all these things. But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you. Take therefore no thought for the morrow: for the morrow shall take thought for the things of itself. Sufficient unto the day is the evil thereof.

"If thine eye be single": this part appears to be a digression, even an intrusion. *It is not*. Most translations translate away a term like "single" to mean "healthy" or "sound", and while an aspect of "single" is indeed "healthy" or "sound", the direct and unusual rendering tells more. St. Paul describes one decisive advantage of celibacy: that the celibate can focus on God with an undivided, single attention, where the married Orthodox must needs live out a divided attention where effort is split between God and one's spouse. This is no heretical rejection of sacred, holy marriage, where St. Paul elsewhere says forcefully, "...marriage, which God created to be received with thanksgiving by those who believe and know the truth..."; he is simply advising people that he wishes to spare them the trouble, however holy marriage itself may be.

But here celibate and married are both summoned to an eye that is single: an eye that rests its gaze purely on God, instead of dividing attention between God and stupid money. It may be honorable to divide attention between God and a wife given as an icon by whom to love and serve God: but nowhere does the New Testament endorse it as also

serve God, but how does the New Testament endorse it as also acceptable to divide attention between God and a lifeless, subhuman wealth that is utterly unworthy of human love.

The seeming digression ups the stakes for trying to serve both God and mammon. The cost of chasing after wealth is a fragmented and divided spiritual vision. There are several places in the [Sermon on the Mount](#) where advice about a divided attention could appropriately be placed: for example, if you look in lust, your eye is not single, and is not single in a much more obvious sense. However, Christ sandwiches the warning in a passage debunking the apparent and seemingly self-evident goodness of wealth. And this passage, like others in the [Sermon on the Mount](#), opens up a larger world.

## **A third basis for morality beyond rules and virtues**

In the philosophy class where a professor introduced a distinction between a rule-based morality and a virtue-based reality, I looked and rightly or wrongly drew a conclusion for a Holy Spirit-based morality that is productive of virtues as virtues are productive of right actions. The key verse I drew on was Galatians 5:22-23: "But the fruit of the Spirit is love, joy, peace, longsuffering, gentleness, goodness, faith, meekness, temperance: against such there is no law."

I'm a little cautious about saying *tout court* that this musing is fully patristic. Some people have made a subtle but important distinction between virtues and "graces", where a virtue is the sort of thing you build with God's help but by your own action, and "graces", which are also by God's help but the divine generosity greatly exceeds the contribution you would normally need to build up a virtue. Possibly there are other adjustments needed; because it is my own musing, I think that it would best be endorsed as Orthodox by someone else besides me.

However, what I believe more legitimate for me to endorse is this. In [The Acquisition of the Holy Spirit](#), St. Seraphim of Sarov, mentioned above, speaks with a layman who has essentially spent his life trying to understand, in Western terms, the meaning of life. St. Seraphim receives him with great respect, and lays out the answer: the central point of life is "the acquisition of the Holy Spirit."

As mentioned, I'm a little cautious about saying that my own formulation that Christianity has a Spirit-driven morality that reaches higher than virtue-based morality as virtue-based morality is higher than rule-based morality. It hasn't stood the test of time. However, what I think has stood the test of time is that, while thoughts, actions, and

virtues are all very important in the New Testament and the [Philokalia](#), it is even more, more important to focus on a God who infinitely eclipses the greatest virtue. I've heard Orthodox raise a question of, "Then why am I here?" and assert that the reception of grace is synergistic, where the reception of grace includes our active cooperation with Christ in us, the hope of glory. But, whatever other differences may exist between Orthodoxy and Protestantism, I have never heard an Orthodox complain that Martin Luther, or any other figure, overstated the importance of grace. (For that matter, I have never heard an Orthodox Christian state that it is **possible** to overstate the importance of grace.)

## **The surprise I hadn't mentioned**

There was a surprise I met with the Wikipedia article that I haven't mentioned. I was surprised that the Law of Love was classified as an articulation of the Golden Rule at all. After numerous readings of the Bible, it was settled in my mind that the Golden Rule's explicit presence in the entire Bible amounted to part of a single verse of the Sermon on the Mount. It was not just that I preferred the Law of Love to other things that were called phrasings of the Golden Rule. To me they were so different that I never made the connection.

The Golden Rule is great partly because it offers direct prescriptions for action. If we avoid getting bogged down too much in special cases, if I wish others to show me such courtesies as saying "Please" and "Thank you," that's probably a sign I should seek to extend those courtesies to others. If I prefer not to be needlessly interrupted, in most cases I should probably avoid needlessly interrupting others. If I prefer that others' communications with me be straightforward, that is probably a sign I should usually be straightforward with others. The Golden Rule may be stated in a sentence, but it covers an enormous territory.

The Law of Love dictates virtue, not action, and is far more ambiguous as far as action goes. There is respected precedent in monastic literature to what may be an assumption that the actions most fitting to the Law of Love are those that seek the complete best interests of the other. The point of monasticism, including the point of its many unpleasant parts, is to advance your best interests, which are never trumped by treating people the way they would like to be treated.

Let me give one example. At least some monastic rules state that "Monastery guests are to be treated as Christ himself," and even without

that implication the [third parable of Matthew 25](#) provides excellent and chilling warrant to all Orthodox to treat all others as Christ. Good Abbots meet visitors with *infinite* respect. And for all this, monastics, including Abbots, are normally very sparing with compliments. (And they sometimes shock visitors by trying to dodge social compliments.)

There is no contradiction to this. In many cultures, compliments are given freely and are a staple of managing mood in the other. The [Philokalia](#) speaks of foul plants of spiritual sickness as being (as rendered in the polite English translation) "manured by praise." The [Philokalia](#) is not generally foul-mouthed, and to the best of my knowledge human praise is the only thing that the entire collection metaphorically compares to *excrement*.

Marriage is also an institution for self-transcendence; some have said that marriage is not a place for children to grow up, but for parents to grow up. Marriage is also a vessel of holiness and salvation, but things are perhaps sharper and perhaps easier to see in monasticism. If insults and cleaning latrines are what it will take for a novice to gain the precious treasure of humility, then the love of an Abbot will be expressed in that nasty way. And monasticism above marriage highlights the difference between a nuanced understanding of the Golden Rule that will treat other people the way they want to be treated on the one hand, and on the other hand a nuanced understanding of the Law of Love as seeking the other's best interests. We should best not treat ourselves as honorary Abbots and authorities above others, but seeking the other's total best interest is more important than being pleasing to others.

## Conclusion: A doorway to the divine.

If I may quote Lewis again, this time from [The Abolition of Man](#), "It is Paul, the Pharisee, the man 'perfect as touching the Law' who learns where and how that Law was deficient." It is further St. Paul, the Apostle, who tells us that the Law is a tutor meant to train us up until we are ready for greater things.

I might suggest that the Golden Rule, at least in the forms I have seen it, be given a place similar to what place the Apostle gives to the Law, and in one aspect the place Church Fathers give to the Old Testament as addressing outer righteousness until the New Testament could train us in inner righteousness.

That is to say that we should keep the Golden Rule, perhaps at some level of sophistication and nuance so we don't knowingly offer a peanut butter and jelly sandwich to a friend who has a deadly peanut allergy. And furthermore we should recognize its significance in that world religious traditions are immeasurably different in immeasurable ways, yet precious few fail to offer some form of the Golden Rule. That speaks for a profound significance even beyond that a moral directive that covers an incredible amount of ground with something is in a nutshell. Even a good subset of these credentials properly qualify the Golden Rule as astonishing and arresting.

Yet, for all of this, neither the Platinum Rule, nor the Golden Rule, nor the Silver Rule, nor this article's nomination for a Fool's Golden Rule speak a whisper about inner state or virtue, and on this account they must be seen as outer righteousness as Church Fathers have received the Old Testament as a tutor in outer righteousness. The Silver, Gold, and Platinum Rules may progressively escalate the **act** that is specified in

their demand towards our neighbor: but even the Platinum Rule does not show the faintest hint of a request for virtue. The Silver, Gold, and Platinum Rules push further *forward* in the same plane: not one of them rises *higher* to draw our eyes towards virtue.

The Law of Love does, and here I am not especially interested in the fact that on the level of action it is possible to rise from pleasing people to seeking their best interests as best we can in a given situation. The Law of Love is a summons to virtue, and more. It moves beyond outer action alone to inner state, and here I might mention that contrary to today's psychological framing of "inner", figures such as Augustine held the inner realm to hold the things themselves for spiritual realities: or as condensed in homiletics, Heaven and Hell are inside us. I do not claim any Orthodox or Christian monopoly on inner concerns; the desire for inner virtue may be found in innumerable world religions and age-old philosophies. However, the Law of Love says something that was missed in the Silver Rule. Even if Ben Hillel probably knew both summonses to love, by heart.

Furthermore, the Law of Love implies something that I am not aware of in any formulation of the Golden Rule, and though I am hesitant to quote someone I've just critiqued as an authority, is something that a certain Harvard chaplain did not at least notice anywhere else: *the box is open at the top*.

Nothing hinders a materialist from seeking to act by the Golden Rule, and it may be seen as needlessly insulting to question whether a materialist might take guidance from that beacon. For that matter, you can be in your actions halfway to being a solipsist and still seek to obey the Golden Rule, even if you might end up being hampered by your habits because you are trying to act beyond what your philosophical reserves will afford you. There is nothing in any standard formulation of the Silver, Golden, or Platinum Rule that forbids you from being, and seeing yourself as, self-contained. One can of course subscribe to the Golden Rule and be open to things vaster than the Heavens: Christ himself did as much, and it's hard to see what stronger warrant one could ask to say that a practitioner of the Golden Rule might be open. However, if we hear that chaplain say, "None of these versions requires a God," then we might see circumstantial evidence that, as magnificent and really astonishing as the Golden Rule may be, it does not reach high enough to bid us seek a box that is open at the top.

that is open at the top.

The Law of Love is more and different compared to this. It really does say, "There are more things in Heaven and earth than are dreamed of in your philosophy, *and I want to show them to you.*" It summons us to leave the Hell of self. Its overwhelming impulse that bids us exercise the highest of all virtues, love itself, is a surge from the heart of a command to render an even higher, absolute love to a God who is infinitely beyond. A hymn tells the Theotokos, "When you gave birth, you tore all the philosopher's nets;" along with that is all possibility of enclosure by anything less than God. I have quoted from the [Sermon on the Mount](#); it is important enough in Orthodoxy that even in the shorter forms of the Divine Liturgy it is quoted in shorthand by chanting its opening Beatitudes. It is characterized by a fundamental openness that is needed as an exegesis of the right and proper love to God, and if you try to love God and live a self-contained life, you may find God responding to you by offering you help to repent of your sin and begin to enjoy a larger world.

I wish to conclude by quoting a poem I wrote, Open:

How shall I be open to thee,  
O Lord who is forever open to me?  
Incessantly I seek to clench with tight fist,  
Such joy as thou gavest mine open hand.  
Why do I consider thy providence,  
A light thing, and of light repute,  
Next to the grandeur I imagine?  
Why spurn I such grandeur as prayed,  
Not my will but thine be done,  
Such as taught us to pray,  
Hallowed be thy name,  
Thy kingdom come:  
Thy will be done?  
Why be I so tight and constricted,  
Why must clay shy back,  
From the potter's hand,  
Who glorifieth clay better,  
Than clay knoweth glory to seek?  
Why am I such a small man?

Why do I refuse the joy you give?

Or, indeed, must I?

And yet I know,

Thou, the Theotokos, the saints,

Forever welcome me with open hearts,

And the oil of their gladness,

Loosens my fist,

Little by little.

God, why is my fist tightened on openness,

When thou openest in me?

# **I Learned It All From Jesus**

# I learned it all from Jesus.

A gift does not need to be costly in order to be big. A little child is worth God's time. All who believe are brothers and sisters. Be thankful. Be the first to say, "I'm sorry," and the first to forgive. Believing means clinging with your whole heart. Clothe yourself in prayer. Commune with God. Cry. Dance. Don't judge. A respected pillar of the community can be two steps from Hell, and a prostitute can be two steps from Heaven. Don't worry about tomorrow. Today has enough worries of its own. Every blade of grass, every twinkling star, every ticklish friend, is a blessing from God. Cherish them. Everything in the whole Creation tells us something about God. Give someone a gift today. God delights in you. God has a sense of humor. God is a friend who'll never, never leave you. God is an artist. God is everywhere, from the highest star to inside your heart. There is nowhere you can go to escape his presence — or his love. God is found, not in earthquake nor fire nor mighty wind, but in a soft and gentle whisper. God is your Daddy. God watches over even the little sparrows. Heaven is very close. He is risen! He who sings, prays twice. He who dances, sings twice. He who

laughs, dances twice. He who prays, laughs twice. Hug your friends. If you have to have everything under your control, trusting God may look as stable as a cow on ice skates. Trust him anyway. It's worth it. If you want God to smile, tell him your prayers. If you want God to laugh, tell him your plans.

It's never too late to repent. Joy comes from suffering. Keep on forgiving. Laugh. Listen to other people's stories. Listen to the silence. Love God with your whole being. Love one another. Love your enemies. Love your neighbor as yourself. Make every action a prayer. Make your prayers and your good deeds secret. Play with children. Prayers ascend like incense before God's throne. Purity does not reside in the hands, but in the heart. Respect the aged. Rest. Serve. Sing. Take time to be alone with God. Tell God you love him. Tell your friends that you love them. The Heavens tell the glory of God. There are miracles all around. You just have to be able to see. Treasure God's smallest blessings. We can bring little pieces of Heaven down to earth. What you do for the least, you do for God. Work is a blessing from God. You are God's image.

# **Incarnation and Deification**

## **The Word became flesh**

Especially when we are preparing for the Feast of the Nativity, when the Word became flesh, we would do well to meditate on why the Word became flesh:

The Son of God became a Man that men might become the sons of God. The divine became human so that the human might become divine. God and the Son of God became Man and the Son of Man that men and the sons of men might become gods and the sons of God:

The Word became flesh that flesh might become Word.

## The chief end of mankind

The Westminster Catechism famously opens:

Question: What is the chief end of mankind?

Answer: The chief end of mankind is to glorify God and enjoy him forever.

It is often (and rightly) pointed out that these are the same thing: to glorify God and to enjoy him forever are the exact same thing. The chief end of mankind is to contemplate God. And one thread of this is woven into St. John's prologue: "The Word became flesh, and tabernacled among us, and we have seen his glory, as of the only-begotten of the Father, full of grace and truth." The disciples saw the uncreated Light of the Holy Transfiguration, and contemplated it.

But St. John the Theologian does not truncate contemplation.

This follows, "But to as many as received him, he gave the authority to become the sons of God." And contemplation and theosis/deification/divinization, becoming sons of God, are not two competing answers to the question, "What is the chief end of mankind?" Far from it: they are expressions of the same truth. Contemplating the uncreated Light, and being transformed to be one of the sons of God, are two connected aspects of the same goal. They come together, and we might well quote for contemplation of God words also spoken of the Eucharist:

"Behold what you believe. Become what you behold." For contemplation and theosis are of the same essence. They are of the same essence almost as the Father, Son, and Holy Ghost are of the same essence.

Now it may need to be pointed out that God, and God alone, can be divine by nature. If theosis is open to us, there is no question of our becoming also divine by nature. That is impossible. God's great work is to make us become by grace what he is by nature, and the infinite gulf between Uncreated and created can never be erased. But it can be transcended by a God who transcends not only Creation but transcends transcendence itself. And when his grace is at work, our spiritual sins and wounds remain, and we remain created, but that is no longer the point. It is no longer the issue. God transcends the chasm that we may by grace share in the divine nature and become by grace what he is by nature.

The great Incarnation was not something that was complete at the Nativity of Christ (or the Annunciation). Christ became incarnate in his own person that he might be incarnate in our persons as well. Word became flesh that flesh become Word. And Incarnation reaches its proper stature when it unfolds into our divinized life, when the Feast of the Nativity unfurls and Christ is born in us. The Annunciation of the Theotokos and the Nativity of Christ are still going on today!

It is a profound error to think of eternal life as something that begins after death. Eternal life is now; the door is open. The same uncreated Light by which Christ was transfigured, so saints have been transfigured, and this is why icons give halos to saints. Paradise is wherever the saints are; and not only canonized saints but in some measure the faithful who are called saints in Scripture.

In theosis, in divinization, in deification, we do not usurp God's place; rather, Christ's headship over us receives its proper place. That means not only that he is our Lord and Master, though he most certainly is, nor "merely" that we owe our very existence to him. Rather, to say that Christ is our head is the same thing as saying that we are Christ's body. As is the Head, so is the body. As is the Christ, so is the Christian. Christ's own blood flows in our veins. The royal, divine lifeblood courses through our veins. Everything in our lives is to be brought under Christ's headship, and by the same token our lives are to be made divine.

There is no hair's breadth of separation between being a follower of Jesus and being another Christ. If you follow Jesus, you are a vessel of his Incarnation, and the Incarnation of Christ is no faroff historical remembrance: it is what you work on today.

## The messy circumstances of our lives

"All this is very well," perhaps you may say, "but my life is not so perfect. We do not live in a perfect world."

But these are not words from, or merely for, golden ages. When Christ came, no wonder people were looking for a military Messiah who would free the holy land from Roman domination. That was a natural enough thing to want! (And even today, people want someone to save our economy and political situation.) Christ came, as God does, catching people by surprise. People who were living under Third World economic conditions wanted a political savior. Christ came offering something else: saving people from their sins.

Perhaps not much has changed. Not everybody likes our world's political and economic situation. We seek a savior: a political savior, an economic savior. And Christ comes to us to save us from our sins.

This salvation is a salvation which we overlook and the salvation that we need. Some people pass on the quotation, "We want God to change our circumstances. God wants something else: to use our circumstances to change us," and the saying is worth repeating. We want God to change our circumstances. God wants something else: to use our circumstances to change us.

These messy circumstances, these bad economic conditions,

not to mention politics, are what we think need to be cleared away for God to be at work with us. God has a word for us that is alike difficult and liberating: he wants to work with us in these circumstances. Even if economics and politics turn worse, he may want to deal with us, and deify us, precisely in the conditions lie furthest from his power.

Christ God the Savior doesn't just deify us who were made in the image of God. He wants to place everything in our lives under his headship: every sin, every suffering, every tear, death itself. He wants to commandeer every evil, as he has Shanghaied the works of the Devil down from the ages. He is a hard man who gathers where he has never harvested, and he harvests not only righteousness and good works, but sin, evil, and death no less if we will but allow him. All of this is under his headship, and all of this he transforms to be deified. And he does not share our illusions about when he can really get to work.

We imagine well enough that only if something changes, only if we get a job, only if someone else changes can our lives move forward. God works to our good before that happens. Our engagement with God happens first, if there is any change to follow, and when we do discover the Kingdom of God which we keep on overlooking in our search for deliverance, everything changes. We may get what we want. We may not get what we want. But we do not need what we want. Even if we get what we want, we are placed far beyond it. We discover treasure hidden in a field and everything changes. And it is sometimes in the hardest trials that God shows the greatest grace and joy. It is like in the poem "Footprints." When we see only one set of footprints, it was then that Christ carried us: and when we see only one set of footprints, it was then that he was most active in our deification.

Deification is the chief end of man; we were made to become by grace what Christ is by nature, and this is the chief end, not for some other people in some golden age, but here and now, in our political and economic condition. The benevolent, severe, and merciful God who provided for us in decades before is the same benevolent, severe, and merciful God who not only wills to provide for us now, but to work our deification. And he wills this, not sometime when we obtain what we want sometime in the future, but here and now. The same God who commandeers our sin and works such a wonder in us that it is no longer the issue that we injured ourselves, works with our suffering world in such a way that it is no longer the issue if we live in a time of global economic collapse. The same God who has deified men in every age wills our glory today.

## The Feast of the Nativity

The Feast of the Nativity (Christmas) has been called "Pascha in winter," and in a very real sense it is. But there is a difference. Pascha was open triumph; Christ the Firstborn of the Dead forever triumphed over death, and the day is coming when Christ will return borne on rank on rank of angel and every knee will bow and every tongue will confess him. But the Nativity was not open triumph; an angel chorus appeared, and only a few knees bowed. It was if anything an invasion in the dead of winter.

But the Feast of the Annunciation, the Feast of the Nativity, and the Feast of Theophany are the same thing, really: they are feasts of the Incarnation, and the Incarnation is forever frustrated in its purpose unless it unfurls in us. We are to be brought under Christ's headship. We are to be deified. We are made for theosis. We are to contemplate God. We are to be vessels of the Incarnation of Christ, and this is for here and for now, not for when we reach some other circumstances.

Preparation for the Feast of the Nativity includes important external observances intended to concretely foster a realization: Each and every one of us has a problem with sin. You need, and I need, to come to a point of wondering if God can work with such a sinner. But when we come to God and confess our sins, he answers not only with mercy, but grace: repenting from sin is greater work than raising the dead. We awaken when we come to

realize we are standing in a sewer, and when we least expect God to work with us, then in particular our deification is alive.

Repenting is greater work than raising the dead, for we ourselves rise from the death of sin into the eternal life that has already begun on earth. And when we wonder, not why God has not placed us in some nicer circumstances, but why God has not placed us in much rougher circumstances, that God is at work and Heaven opens.

Repent! [Awaken, you who sleep, arise from the dead, and Christ shall give you light!](#) Arise from your sins to contemplation, to seeing the uncreated Light, to deification, to theosis, to divinization, to transfiguration, to incarnation! Awaken from sin and be illumined by the uncreated Light! Awaken and be a vessel of Christ's Incarnation!

# The Incarnation: Orthodoxy, Islam, and the Reformation

The central, root difference between Orthodoxy and Islam is that Orthodoxy affirms the Incarnation wholeheartedly and Islam wholeheartedly denies it. If you want to see what difference believing or not believing in the Incarnation makes, look at the differences between Orthodoxy and Islam.

As a point of departure, I would like to look at something about Islam that is not entirely obvious to many people in the West. As I write, the U.S. is involved in Iraq and this issue looms large in not only U.S. but world politics. I don't want to write lengthy comments on whether war is ever appropriate, or, if war can be appropriate, whether there were appropriate reasons for the U.S. to fight, or whether or not the U.S. has brought genuine good things to the Iraqi populace, or exposing inhuman treatment of prisoners. Those may be well enough worth discussing, but the single issue that concerns me here is the U.S. endeavor to endow Iraq with "freedom and democracy."

That rally, that cry—to bring "freedom and democracy" to Iraq—had me wincing well before I heard about Guantanamo Bay.

---

Quite simply, there is a more profound cultural insensitivity in trying to bestow democracy on part of the Islamic world than one can easily explain. It is obvious enough that starting a rumor about flushing the Quran down a toilet is patently offensive. What is harder to explain is why trying to install democracy may be a bigger gaffe.

What in Islam could be offended by democracy? The answer is a first glimpse of what difference the Incarnation makes, but the connection is not at surface level.

Western observers in the Islamic world talk of an "IBM," an acronym for inshallah, meaning, "It will happen if Allah wills it and it will not happen if Allah does not will it, and you don't really have much say in whether Allah wills it," bukra, meaning, "Tomorrow; it can be done tomorrow; it need not be done today," and malesh, meaning, "It was fated; it was doomed to happen that way." When you understand inshallah, bukra, malesh, you understand something that runs very deep in Muslim culture.

G.K. Chesterton, in [Heretics](#), writes a chapter called [Omar Khayyam and the Sacred Vine](#). Omar Khayyam was a 12th century Iranian thinker who studied under a famous Imam, but is not necessarily the image of a good, devout Muslim: he was a renegade Muslim, if he really was a Muslim, and the point Chesterton is trying to make is a criticism of Omar who (on Chesterton's indictment) advocates heavy wine-drinking to blot out a miserable universe. Chesterton writes:

Of course, the great part of the more stolid reproaches directed against the Omarite morality are as false and babyish as such reproaches usually are. One critic, whose work I have read, had the incredible foolishness to call Omar an atheist and a materialist. It is almost impossible

for an Oriental to be either; the East understands metaphysics too well for that. Of course, the real objection which a philosophical Christian would bring against the religion of Omar, is not that he gives no place to God, it is that he gives too much place to God. His is that terrible theism which can imagine nothing else but deity, and which denies altogether the outlines of human personality and human will.

"The ball no question makes of Ayes or Noes,  
But Here or There as strikes the Player goes;  
And He that tossed you down into the field,  
He knows about it all—he knows—he knows."

A Christian thinker such as Augustine or Dante would object to this because it ignores free-will, which is the valour and dignity of the soul. The quarrel of the highest Christianity with this scepticism is not in the least that the scepticism denies the existence of God; it is that it denies the existence of man.

In this aspect, Omar retains something significant from Islam. Renegade as he may be, there is something from Islam deep in his bones: God, the Player, will act as he will, and it is a fundamental error to think that our Yes or No makes a difference. And even in a renegade Muslim with little respect for popular piety, this foundational attitude remains.

By contrast, as I write, Today's Vile Attack on Christianity is Philip Pullman's *The Golden Compass* and ilk, and it would be a stretched argument to say that Pullman is trying to be Christian. Far from it; he provides Today's Vile Attack on Christianity, but there is something very different from Khayyam. Pullman retains

a profoundly Christian assumption: that his actions matter, that he can make a difference in the world. No one I've read has suggested that Pullman is fatalistic and treats the religious beliefs he hates as doomed to be there and that no endeavor he could make would matter or make a difference.

Philip Pullman is a renegade against popular Christianity, and Omar Khayyam is a lesser renegade against popular Islam, but they both retain something significant of the piety they rebel against. Pullman, on a very deep level, lives out the Christian belief that his Yes or No in fact matters for something, and Omar retains unchallenged the understanding that God alone may say Yes or No. This is the same conviction in the inshallah, bukra, malesh that it is not our place to say Yes or No, or at least say a Yes or No that makes an actual difference.

If it is not our place to say Yes or No, then what is democracy? Democracy can take some different forms, but its basic premise is that people can and should say a Yes or No that amounts to something, and whether it is a direct democracy, a representative democracy, or something else, the root idea is to empower people to say Yes or No... which, in other words, is to usurp the office of God in the eyes of many Muslims.

As far as insensitivity goes, the nearest equivalent I have been able to think of if someone were to conquer the U.S., would be decide that the best thing for our traditions would be to install a fundamentalist Christian theocracy. And that still does not capture an offense of a political assumption that, on many Muslim understandings, amounts to blasphemy.

If you want to know what this has to do with the Incarnation, let me ask you a question: What does the Incarnation mean if we are denied the freedom to say a significant Yes or No, if it is the very opposite of the truth to say that God created us to be his

conversation partners?

One of the biggest things it means is that, if Christ had freedom to issue a real and significant Yes or No, this is as a special exception because he was God that does not have a direct bearing on our lives. If Christ alone had real freedom, the truth of this is a philosophical truth but not a practical truth that directly helps us live human lives. Christ's divinity is not connected to our humanity, and it turns out that his humanity is dubiously connected to our humanity: which is to say, we are somewhat short of the Incarnation.

History may forget most people whom it does not call movers and shakers; God has numbered the hairs on our heads, and he forever remembers every person who has ever lived and indeed every action, every choice, every Yes or No as eternally significant choices as we choose between Heaven and Hell. This is to say that our freedom matters, and if Christ made a holy exercise of his freedom, this is the supreme example of human freedom with every relevance to our lives: an Incarnation that is not simply a philosophical truth, but has practical relevance to daily living.

More explicitly, the Orthodox understanding of the Incarnation is not, "Something that had not happened one second before the Annunciation when Mary conceived the Son of God, and something that was completely finished one second after that conception." That almost approaches saying that building the United States of America was something that had not started one second before the first person signed the Declaration of Independence, and something that left nothing more to do one second after the last person signed that Declaration. Or it is like saying that once an inventor has a working prototype of some invention, all the real work has been

taken care of—with no mention of the work that had to take place each time an invention like the light bulb, the car, or the computer became no longer a curiosity in an inventor's lab, but saw widespread use in the community at large. It is a fundamental mistake to read the Bible, and read about the Church as the body of Christ, among other things, and think that the Incarnation ends with the Son of God becoming fully man in the conception of the Annunciation, and does not include Christ becoming Incarnate in the Church. The Incarnation is ultimately the Incarnation of Christ in the Church, in Christians whom the Bible rightly calls sons of God, and finally the whole Creation.

Once it is understood that we are created to be part of Christ's Incarnation unfolding, that we are created to be co-workers with God and co-heirs with Christ, given a freedom to which God assigns eternal significance and created for the express purpose of being God's conversation partners, then it may be easier to see that Islam with its inshallah, bukra, malesh and its renegade proclaiming—

The ball no question makes of Ayes or Noes,  
But Here or There as strikes the Player goes;  
And He that tossed you down into the field,  
He knows about it all—he knows—he knows.

—then it is possible to see that the denial that we are given the place to say Yes or No is not random; it is part of the logic working out in Islam's fundamental rejection of the Incarnation.

Now I would like to introduce another point. Is Islam better at being monotheist than Trinitarian Christianity? I would like to give an image for that.

I've heard the image that it is a fundamental error to say,

excluding created spirits, that someone who doesn't believe in God would count the number of items in the universe, everything from galaxies down to protons, and arrive at a number—let us say, 1,000,000,000,000,000—and the person who believes in God simply arrives at one more—let us say, 1,000,000,000,000,001: the person who doesn't believe in God arrives at one number, and the person who does believe in God simply counts one more.

That error has been called idolatry; it's the same kind of error as going into a plant that manufactures Bibles, and after being shown the machines that lay out the paper and the printers that lay down ink, asking to be shown, alongside the paper and ink, the spiritual authority that is being put into the Bibles. The spiritual value of the Bible is not the sort of thing that is ordered as a material used to make Bibles, and it is a fundamental error to ask to be shown the spiritual meaning the same way one could ask to be shown the glue or cloth materials used for binding. It is something of the same kind of error in thinking that God is one more thing that can be counted as material objects are counted—and Orthodoxy and Islam alike would really wince at the idea that God is one more thing that lets you reach a total of 1,000,000,000,000,001 objects in your counting.

The next step of this argument is as follows: if material counting is something you misuse by applying it to God, then denying that the Trinity is still one God may be the same kind of error as counting God as one more physical thing. God is beyond material counting, but this means more than denying "God is one more thing." It may mean that if Father, Son, and Holy Spirit are God, the Oneness of God is so great that it is uninjured even by the Incarnation of God the Son. If the Oneness of God is on a higher plane my having one pen on my desk, perhaps it is on high

enough of a plane that it is not threatened by the Father, Son, and Holy Spirit being the One God.

God is transcendent: he transcends, is beyond, anything and everything to be found in all creation. That is part of why, when we say that God is One, we mean something different from counting one pen—and something deeper. And part of this transcendence is something like heat. Depending on how tough we are, we might, or might not, be able to pick something up after it is hot from prolonged sunlight. Few of us would want to pick up a heavy black crowbar that has been soaking in summer sun and heat on the asphalt. Most of us want oven mitts, or some surrogate like a folded towel, to pick up something that has been in a hot 450° oven—it's too hot to touch with bare hands. But even a good oven mitt has limits: I would not want, even with the best oven mitt I've used, to reach into a blacksmith's furnace and pull out a large piece of iron so hot that it's getting mushy. But there is something about the one God that is transcendently hot: hotter than red-hot iron, hotter than white-hot iron, hotter than a river of rapidly boiling steel, hotter than the heart of the sun, hotter than the Big Bang. The transcendent God is hotter than the heat of fire, plasma, and the Big Bang.

Many of the controversies in early centuries of the Christian Church were about Christ as the bridge between God and his Creation—because if the divine nature is of such heat, then the Creation needs an oven mitt to be in contact with its Creator. Arius proposed one solution, that the oven mitt was the foremost and unique creation. The Orthodox response was that this wasn't good enough: a created oven mitt could insulate against a created heat, but only a truly transcendent bridge, or oven mitt, or mediator, could allow us to meet God without being destroyed: not only the fiery coal, but the oven mitt must be absolutely and

fully divine. And here we can glimpse why the Orthodox Church found Trinitarian theology so necessary: she found, in fact, that the one God, if the logic is worked out and he is properly understood, to be Father, Son, and Holy Spirit, and that the doctrine of the Trinity is the radical understanding of the One God.

I mention this to guard against a reaction some may have: the reaction that says that Islam really believes in one God, while Christianity has to cross its fingers to say that. Now let me continue:

There are some people who believe that Islam is later than Christianity and extends Christian beliefs: Islam is Christianity with things added. This is quite the opposite of the truth! One way to see beyond this point is to ask the question, "What is said in Islamic worship that an Orthodox would wince at saying? And what is said in Orthodox worship that a Muslim might wince at?"

There are a number of things in Islamic worship that an Orthodox would believe: God is said to be One, to be merciful, to be the Creator of the world, and so on and so forth, and all of this the Orthodox believes. What the Orthodox would not be able to say, in good conscience, is that Muhammed is God's Prophet. That would come close to the one thing that an Orthodox would squirm about agreeing to.

Now what about a Muslim in an Orthodox "divine liturgy"? God is said to be Father, Son, and Holy Spirit, Mary is praised as the Mother of God, icons are warp and woof to worship, and saints, perhaps called divine, share in the glory of God. Even the term "divine liturgy" may not be liked. And each of these is related to the Incarnation.

The Orthodox Church realized the doctrine of the Trinity as something it could not deny, precisely in the wake of wrestling

with questions about the Incarnation. Perhaps it would be doubtful to say that the doctrine of the Trinity is a mere part of the doctrine of the Incarnation. What would not be doubtful is to say that the doctrine of the Trinity was articulated out of the Orthodox Church wrestling with heresies which gave a deficient understanding of the Incarnation. The Church proclaimed the doctrine of the Trinity after affirming what might be called "maximum Christology," that Christ was everything he could be: maximally divine, maximally human, maximally united, and maximally preserving the divine and human even as they were united.

Now we get into territory some Protestants may be uncomfortable with: the great and scandalous phrase, "Mother of God." Some may be eager to point out that "Mother of God" reflects a Greek term, *theotokos*, which might more accurately be translated as "Birth-Giver of God," as "tokos" refers to birth better than the full freight of the English "mother." In fact one could go further: "tokos," in Greek, is a word used to describe both the person who gives birth and the one who is born, and on out-of-context, legalistic grounds, "theotokos" could mean "the one to whom God gave birth," and one could make a mirror image of that switch to say that Christ, *o prototokos tw n nekrown* (Rev. 1:5), is "the dead's chief birthgiver," dodging the more sensible and customary rendering that he is "the firstborn from among the dead."

This kind of cleverness is all very nice, but it is unhelpful in understanding the theology. The reason the term "theotokos" is significant is something that happened in Arius's wake. Arius said that Christ was "a creature, but not as one of the creatures," a unique first creature through whom God created every other, lesser creature. The Church's response was, in

essence, "If that is Christ, he is an oven mitt that will be incinerated if it touches the divine fire. Not good enough." In Arius's wake, it was clearly on the table that Christ had to be considered fully divine, and fully human. But one person, Nestorius, said that Christ was fully divine and fully human, but not quite fully united. The controversy came to a head when Nestorius said that Mary could and should be called, "christotokos," "Mother of Christ," but that it was absolutely inappropriate to call her "theotokos," "Mother of God." The verdict of the Church was that Nestorius had divided the Christ, because he would let the Mother of Jesus be called the Mother of Christ, but he denied that Christ was united enough that you could actually go so far as to say that she was simply the Mother of God.

The decision to call Mary the Mother of God is a move to protect the unity of Christ—that what could be said of the man Jesus could be said of God the Son, and what could be said of the Son of God could be said of the man Jesus. This is why some Christians speak—correctly—of the crucified God, because Christ is so united that it was inescapably God who was crucified if Jesus was crucified, and by the same token Christians insisted on speaking of God the Son, because Christ is so united that it is inescapably God who was born in her womb if she was the Mother of Jesus.

The reason Nestorius could only call Mary the Mother of Christ, and not the Mother of God, was because his christology drove a wedge between Jesus the man and God the Son that caused him to pull back from the full force of "theotokos." Is it a valid response to try to be picky about the Greek and say that "theotokos" is really more accurately translated "Bearer of God"? If you're really that concerned about linguistics and

Greek, possibly, but in my experience that kind of argument is a matter of "Everybody has two reasons for everything he does—a good reason, and the real reason." The good reason is a linguistic concern that goes above and beyond the call of duty of meticulous precision in translation... but a real reason is one of the fixations, almost one of the theological allergies, that arose out of the medieval Catholic West being very concerned about ferreting out idolatry, that Mary the theotokos receives reverence that God alone should receive. This is a sensible enough objection, if you forget how far Incarnation goes: Mary the theotokos gave Christ his humanity, and he gave her something in the exchange. But the force of the argument may leave it legitimate in English to call Mary "the Bearer of God," but provides no theological justification to say, "On a purely material level, I have to acknowledge that Mary gave birth to God, but I am absolutely not going to say that Mary exercised the spiritual office of motherhood to the God to whom I technically have to acknowledge she gave birth." If the theology is acknowledged that is behind saying that Mary gave birth to God, full stop, it is by the same argument necessary to say that she exercised the full human and spiritual office of motherhood to God, full stop. This is how the logic of the Incarnation unfolds.

And the logic unfolds. The parents of Mary, the Mother of God, are remembered as "the ancestors of God, Joachim and Anna," and the icon depicting James, considered "the Lord's brother" (Gal 1:19), has in Greek, "o adelphotheou:" "the brother of God." And there is a deeper way that this logic unfolds.

The Incarnation is to happen in each person. Saints are people in whom the Incarnation shines brightly, but we were made for the Incarnation. Some exemplars who provide shining examples of the Incarnation are held forth as saints, but we were all made

for divine, uncreated life they share in. The saints live lives out of the Incarnation, and they are part of how the Incarnation is shown to us.

In Orthodox worship, there may or may not be explicit words spoken about icons, but even if not a word is spoken about icons, actions may speak louder than words. A Muslim visitor to Orthodox worship will see something very different from the inside of a mosque, which may be adorned by quite beautiful abstract patterns, but in which anything like an icon is forbidden: pictures as such are forbidden, and it is in particular forbidden to make pictures of Mohammed: perhaps quite a perceptive rule reflecting an insight that a picture of Mohammed would not be likely to be, in the Western sense, simply a nice, inspiring picture on a wall.

What exactly is going on with icons may take some time to understand, but a Western visitor may notice that Orthodox seem to be treating icons differently from just a nice picture on a wall. The Orthodox do not simply stand back with an admiring gaze; they interact with the pictures and kiss them. There may be a line of people standing to pay respects to an icon, and people walking into the temple may almost seem like they are introducing themselves to the icons or greeting them, as one may greet friends one meets in a room.

Orthodox have traditionally called icons "windows of Heaven," and I would like to take a look at what that means. One obvious meaning today is that they are spiritually a view into a larger world, and I would not discount that. People like to work, and perhaps work better, in an office with a window, and I would not discount that either. But it may help to look at some layers of that image that are harder to see today.

Artificial lighting has been around for a long time: lanterns

were good enough in Edison's time that when he invented the light bulb, many people responded, "Why do we need it? What does it give that an oil lantern does not?" But in fact light bulbs do something that is not in easy reach for candles and lanterns. If you have entered an Orthodox temple when all electric lights were off, there may have been dozens of lit candles—possibly hundreds—but this did not stop the room from being very dark. If you're in a dark room and can barely see by candlelight for an hour a day, it may seem memorable and romantic; but a candle offers "just enough light to get by," rather than "as much light as you really want," and before the light bulb became common, work and activities tended to stop when the daylight fled: if you want to wrap something up, candlelight may give you more time, but if you want enough light to go full steam ahead, then you must either have daylight or a bright, electric light. Only with the electric light can it be common and ordinary for people to be working or playing well into the night, not particularly caring about the hindrance of there being no sunlight worthy of the name. Before the light bulb, inside as well as out, you needed sunlight to really see outside, and you needed sunlight to really see inside. Given all this, let me ask a question: what more is a window if you can't flip a switch and turn on the lights?

A window, without having lights, was almost everything that a light bulb is to us. Have you ever woken up, groggy, and fumbled around for the light switch? Have you ever noticed, during a power outage, how hard basic tasks become when you try, for instance, to use a windowless bathroom? Have you ever tried, at a friend's house, to find the light switch for the bathroom when that part of the house is dark? We have good enough light bulbs that we can fail to understand how hard it is to function in darkness. But in a world without light bulbs, windows are the

light bulbs. You don't just look out the window to see what the weather is like; you can see inside because of the light that comes through windows.

There is another insight to be gathered from glass panes. Today, if one visualizes a window, it seems almost by definition to have a glass pane that provided another layer between what was inside the window, and what was outside. It was not always that way: if one looks at the great age of stained glass windows in the West, saying that a window normally has a glass pane is like saying that a wristwatch is normally a unique creation handcrafted by a master jeweller. (For ages, people knew how to make glass, but making glass was prohibitively expensive, and glass itself was rather precious.) I have seen handcrafted timepieces in museums, and if I had a year's salary to blow, I could get a master jeweller's unique creation, but my normal expectation when I see a wristwatch is that it's mass-produced just like my wristwatch. Today a wristwatch is normally mass-produced, and before a couple of centuries ago a window was normally without glass. In another age, if the bugs were bad enough, a window might let light in through a covering, perhaps of vellum, that would let the window serve as a light bulb without making the insect count that much worse. Quite often, a window didn't just let in light. It was also something that let in wind and the outside world: it was something wind could blow through.

To say this much is to miss something important, and something that does not particularly require a history-lesson: the "window of Heaven" is like a window one looks through to see a loved one one has been waiting for. Icons are not landscapes raised to a higher spiritual plane, or purely architectural, or a still life. All of those may make beautiful art, but if icons are windows of Heaven, they show people. They may show Christ, or

his mother, or his saints, or angels, or people at a decisive moment, or the Trinity as shown through three angels. Most are icons of saints. This is to say that most icons are icons of people in whom Christ has become Incarnate... and icons are part of the Incarnation unfolding.

The Orthodox understanding is that you are missing the point of the Incarnation if you affirm that the Son of God became fully a man, but then deny the maxim of the ages, "The Divine became human that the human might become divine. The Son of God became a man that men might become the Sons of God. God and the Son of God became Man and the Son of Man that men might become gods and the Sons of God." To say that the Incarnation happened in Christ but is not to happen in us is worse than saying, "The operation was a success, but the patient died." It is more like, "The grandmaster in chess played brilliantly until he reached an invincible position but then resigned in defeat," or, "The operation was a success, but the physician refused to save the patient's life," or "The medical researcher discovered the perfect cure for cancer and then refused to share his results or let them save lives." Since the earliest centuries the Orthodox Church has believed that the Incarnation did not stop when Mary bore the God-Man in her womb. Christ is meant to be Incarnate in Christians in every age.

(I've noticed that some of my friends list their Facebook "Religious Views" as "Follower of Jesus." There's something in that modest way of putting it that tempts me to list my own views as, "Orthodox Christian: 'Follower of Jesus' is another way of describing an alter Christus, Latin for 'another Christ'!")

Christ is the Savior and Lord of the whole Creation: there is indeed something very special about being human, but the sanctifying reach of the Incarnation is a sanctifying reach that

extends to matter. The rule elsewhere in theology is that the deepest symbols are symbols that represent and embody what they represent, and it is the Orthodox experience that icons are just that degree of symbol.

One Protestant student at an Orthodox seminary mentioned, as a local oddity, that when he said he didn't venerate icons, asked him if he believed in the Incarnation. To him the question was a complete non sequitur. But the Orthodox spiritual experience is that the veneration of icons is part of the Incarnation unfolding, and saying that you believe in the Incarnation but not that the Incarnation unfolds into icons, is a bit like saying that you want to be a scholar but don't want to be troubled with reading books.

I would like to make one last remark about culture and the Incarnation, before shifting focus, from being primarily concerned about Orthodoxy and Islam, to being primarily concerned about Orthodoxy and the Reformation.

At least of the major groups of Orthodox Christians is Arabic. In the Arab world, there is a strong Muslim majority, but many parts of the Arab world have a significant Christian minority, and more specifically an Orthodox minority.

One aspect of different cultures are rules about touch—when it is and isn't permitted, among other things. As may be guessed, the devout Muslim practice has much stricter rules than American culture, at least about men touching women: if I were to be introduced to a devout Muslim woman in many parts of the Arabic world—which is something of an if, as those cultures see many fewer reasons why such an interaction would be appropriate; the idea of "just hanging out" would seem strange—a devout Muslim woman may well place her hand on her heart and make a slight bow as a gesture of respect and acknowledgment,

but shaking hands would be a big deal, and probably seen as at best questionably appropriate. In general, the lines of what would be considered appropriate would call for much less interaction, and even a tap on the shoulder would not obviously be "no big deal." There are very different rules on touch, and a handshake with palm against palm is emphatically not "no big deal."

The Arabic expression of Orthodoxy shows some Muslim influences; in some ways, it would be rather surprising if it didn't. However, as regards touch, it is relatively common for Arab Christians to greet one another with kisses, including men and women giving each other kisses: this can be part of normal social interaction or of the Divine Liturgy.

If you are wondering what relevance this has to do with religion, as it seems obviously a cultural detail, it is one example of what an anthropologist would call "culture" being tied to worship and its implications. Such a kiss as is found in Arabic forms of Orthodoxy is also found in Slavic forms of Orthodoxy; the practice may differ slightly, and greeting with kisses may be more associated with special events, but both practices are the same reality.

In the Greek New Testament, the main word for worship literally means to emphatically kiss or bow. That may not survive in English translation, but there's something there, and it is not an accident. In Orthodox worship, to kiss an icon is to display reverence that ultimately points to God: John the Damascene and others have been very clear that the respect you show to an icon passes through to God. It is an extension of the Incarnation. A kiss between Orthodox Christians is not simply a cultural detail; it is connected to the kiss given to icons, and it is connected to reverence to one in whom Christ is, to some degree,

Incarnate. Orthodox speak today of people as living icons, and though this manner of speech has not always been in fashion, there is a connection between a kiss saluting an icon that is ultimately of Christ, and a kiss saluting a fellow believer who is being transformed into the likeness of Christ. And what is particularly interesting about Arabic forms of Orthodoxy is that the "custom" has survived over a millenium of Muslim rule. (It's really not just a custom; if it were "just a custom," it would not have survived nearly so long.)

Having looked at Orthodoxy, Islam, and the Incarnation, my point has not really been to say that Islam does not believe in the Incarnation; that much could be deduced from any decent encyclopedia entry on the topic. My real point of interest has been to look at exactly how Islam does not believe in the Incarnation: not only would devout Muslims be disturbed by the idea that God could become Incarnate, or that that would be fitting to God, but Muslim culture very clearly and consistently works out what it means to refuse to entertain the Incarnation.

Actions not only speak louder than words; they also speak in more detail than words, and they can reveal things that words do not.

Now I would like to turn my attention from Orthodoxy and Islam, to Orthodoxy and the Reformation.

Perhaps this is setting limits on Protestantism, but most of the conservative Protestantism I know—or, rather, all—believes on philosophical grounds every finding about the Incarnation from the Church Councils. Every one of the Christologies that was deemed inadequate—including some I have not mentioned—is something Protestants and the better Reformers dismiss as out of bounds. What I have hinted at by referring to maximum Christology is something considered non-negotiable: Reformers

may not ascribe definitive authority to the Church Councils in the sense that Orthodox do, but the findings about the Incarnation are effectively treated as "If you don't believe this, you're not Christian." And so it would seem odd to question how much the Reformers believed in the Incarnation, but that is exactly what I want to question.

How much of what I have said about Islam could be said of the Reformation, or parts of it? I was thinking of Calvinism at some early parts of this essay. I cannot say that Calvinism encourages a fatalism that is languid about action. The "Protestant work ethic" we proverbially speak of is in fact a Calvinist work ethic, and Calvinists are often hard workers.

Calvinist scholars proclaim in word and deed that "thinking Christianly" is a big deal. It would be a mistake to say that this aspect of Calvinist practice could have nothing to do with their theology. Therefore, what I have said earlier about Islam being conducive to inshallah, bukhara, malesh should not be applied to Calvinist Christianity.

As I have encountered it, Calvinism does not live a fatalistic life.

However, that does not take away a profound point of contact: Islam does not lead people to believe that they were created to be conversation partners for God, fashioned to contribute to the conversation. Calvinism is less than enthusiastic in trumpeting a theology of human contribution; some very serious Calvinists express the concern that if we believe we can contribute to our conversation with God, we have, in the title of one book, "No Place for [God's] Sovereignty: What's Wrong with Freewill Theism" and if we understand God as sovereign, we can contribute nothing but a rubber stamp to God working in us. And in that regard, Calvinism, a bit like Islam,

falls subject to Chesterton's critique: "It denies the existence of man."

And in that regard, Orthodoxy can raise the question of how far Calvinism really believes in the Incarnation.

My own experience with the Mennonite Church—even a Mennonite Church relaxed enough to encourage artistic impulses—is that the Mennonite Church worked out, very consistently, what it means to say that images can have no helpful spiritual reality. What I saw and experienced extended well beyond images: it meant that "spirit" and "matter" were in almost separate compartments: there was a special exception for people who were composed of both spirit and matter, and there was a phenomenal miracle when the Son of God became man, but these were exceptions that ran against the usual course of things.

In Orthodoxy, our physical world is pregnant with spirit: men are both matter and spirit because we are the microcosm a crowning jewel to Creation. We are the masterpiece of an excellent corpus, not a pearl crowded by worthless sand, and there is a mountain of difference between saying "They're all pretty good, but this one is the best," and saying, "This is the only good one—the rest are atrocious." It is the same difference as the difference between saying that spirit and matter are in separate water-tight compartments separated by a chasm except in the case of humans, and saying that the material world was made to share in spiritual glory, and that spiritual and material Creation are woven into the same masterwork with mankind as its ornament and jewel. This difference parallels the difference between saying on the one hand that there's normal human life and then there's one exception, Christ, who is so unlike what we normally mean by 'human', and on the other hand saying that Christ is the apex of human existence, the one man

who fully lived the stature the human race was created for, the one whom St. Paul calls "the last Adam" (see [I Cor. 15:45-49](#)).

What I saw in Mennonite spiritual practice was that the iconoclasm was a microcosm of a world where people alone of the whole Creation bridged a chasm that otherwise separated spirit and matter, and the Incarnation was an exception: I never heard, "The Divine became human that the human might become divine."

The denial of Incarnation in icons left a spiritual world with no place for an Incarnation that was to take place in people: the Incarnation began and ended when the Son of God became a man.

And now on to the holy kiss.

I remember being shocked when an Orthodox friend mentioned, in a matter of fact way, that Orthodox Christians greet each other with kisses to celebrate (in this case) Pascha, and that this was rooted in the Biblical words about greeting one another with a holy kiss. This was so different from anything I had seen among Protestants, and I would like to talk about the contrast.

The best way I can concisely describe how the holy kiss was viewed is that, when Evangelicals want to give an example of cultural wackiness that somehow ended up in the Bible, there is one standard example that comes up: "Greet one another with a holy kiss."

I found the response when I suggested that those words be taken seriously to be essentially the same among the faithful and among (conservative) Bible scholars at Cambridge: if you say that "Greet one another with a holy kiss" should be given attention as part of God's revelation, you might as well have sprouted a second head. The response from both groups was essentially culture shock: if I pressed my point, people might see that there was a point worth making, perhaps tell me I was on to something

—but even when I pressed my point at Cambridge, not one scholar acknowledged my point that the verse admitted a study for doctrinal content. If I was to study the holy kiss in the Bible, it had to be a study of a cultural and historical detail, used for studying the Bible as a historical document, rather than as something doctrinal, spiritual, or otherwise relevant for us today. I wanted to do a spiritual and doctrinal study, and that was not allowed except as doctrinal and spiritual elements would occasionally come up in a study of history and customs.

My point in mentioning this is that people didn't just disagree when I said "Greet one another with a holy kiss" is revelation and of spiritual benefit; it was so far out of the realm of things people could conceive as being taken seriously that it caused culture shock: my first battle was never about being agreed with; it was getting my position to be taken seriously. This seems to offer a very strong pedigree in saying that the holy kiss does not have much of a proper theological place to be put in. And if the holy kiss is a practice that derives from the Incarnation—if it is connected to the kiss of reverence that feeds into a major Greek term for worship of God—then this near-total inability to conceive of "Greet one another with a holy kiss" as God's revelation for us is a near-total lack of needed and Incarnational soil for that practice to be planted in or grow out of. And this would seem to be another area where the Reformation attempts an unwavering and absolute faith in the Incarnation, but is very ill-prepared to live out a classical unfolding of the conviction.

When I was at [Calvin](#), I remember one professor laying theological foundations. To address the question, "What were we made for?" he gave the answer, "Worship and culture," only he deliberately gave it in Latin: "Cultas et culturas." The reason is that, in English, 'worship' and 'culture' may be two separate

words, but in Latin they spring from the same root, and the Latin exposes the connection. There may, or may not, be other things I disagree with him about. I don't disagree with the point he was making there; I think it is beautiful, and I might press it further by saying that worship becomes incarnate in culture: worship gives its practical expression in culture. A culture bears witness to the nature of whatever God or god(s) its society worships. It bears a profound witness.

My thesis for much of this paper is that Orthodoxy demonstrates the unfolding of the Incarnation, and Islam demonstrates the unfolding of denying the Incarnation. There are many other factors at play, but several details about Orthodox practice and culture demonstrate what practical belief in the Incarnation may look like, and several details about Islamic practice and culture demonstrate what practical rejection of the Incarnation may look like. And if so, this may raise some very interesting questions about the Reformation and even the more conservative Protestant Christianity.

As far as ideas and statements go, absolute and full belief in the Incarnation is non-negotiable across the board for different forms of Protestant Christianity: there may be a lot of difference between the more conservative heirs of Luther, Calvin, and Zwingli, but asserting what the Councils asserted about Christ and the Incarnation remains entirely non-negotiable, and probably will remain so for as long as conservative Protestant Christianity is around.

However, in terms of cultural working out, there is real question about how far Protestant Christianity lets the Incarnation unfold: I have read very few Protestants solidly deny that the Incarnation ends with Christ, and in practical terms, many would agree to disagree with Calvinism over the

question of free will, but I have yet to hear the question of whether Calvinism, in denying man anything to contribute to his salvation save a rubber stamp, denies the reality of man and in so doing cuts down the Incarnation. None of the Evangelical critiques I've read of Calvinism say that Calvinism jeopardizes the Incarnation. That the Incarnation could unfurl so that it is right to call Mary the Mother of God, or direct reverence to saints—even Protestants who agree to disagree may be a bit squeamish, and the idea that this is a proper consequence of the Incarnation, almost its purpose, is not one that comes up. Icons as one feature of a sanctified cosmos with Christ as its head (Eph 1:22), don't come up, and it is my impression that where there are no icons, there is a chasm between matter and spirit, and the unity of spirit and matter in Christ and the human person may be an exception rather than the highest example. There may be other issues to be raised as well: is the doctrine of the Invisible Church a doctrine of the Virtual Incarnation? The common thread running through these things is that the Incarnation may be asserted on a philosophical level by Protestants, but it does not seem to unfurl as it might as the concrete culture plays out. The cultural shape of Protestant Christianity raises questions about how much practical belief there is in the Incarnation.

If the question is, "Where do we go from here?" the answer might be in the closing words of Mark 9:17-24 (RSV):

And one of the crowd answered him, "Teacher, I brought my son to you, for he has a dumb spirit; and wherever it seizes him, it dashes him down; and he foams and grinds his teeth and becomes rigid; and I asked your disciples to cast it out, and they were not able."

And he answered them, "O faithless generation, how long am I to be with you? How long am I to bear with you? Bring him to me."

And they brought the boy to him; and when the spirit saw him, immediately it convulsed the boy, and he fell on the ground and rolled about, foaming at the mouth.

And Jesus asked his father, "How long has he had this?" And he said, "From childhood. And it has often cast him into the fire and into the water, to destroy him; but if you can do anything, have pity on us and help us."

And Jesus said to him, "If you can! All things are possible to him who believes."

Immediately the father of the child cried out and said, "I believe; help my unbelief!"

# Inclusive Language Greek Manuscript Discovered

MINNEAPOLIS (AP) — There is a considerable buzz among New Testament scholars over the discovery of a near-complete Greek manuscript to the book of the Bible called Romans. The manuscript is similar to others, but is the first known manuscript to mirror the Today's New International Version (TNIV) in its use of inclusive language.

There is a wide consensus among both conservative and liberal scholars that most Greek manuscripts use grammatically masculine words where the original author meant to include women as fully as men. This manuscript, referred to by scholars as R221819, is similar to other such manuscripts but uses inclusive language where applicable.

The book of Romans was first written in Greek and is considered foundational in its treatment of what it means to be a Christian. Chapter eight is well-known among people who read the Bible; its fourteenth and fifteenth verses are shown above. Huioi ("sons") in verse 14 is replaced by a more inclusive tekna

("children"), and various word forms are adapted to a gender-neutral spelling. R221819 is thought to reflect the TNIV's distinguishing features with considerable accuracy.

Kenneth Barker, one of the leading scholars involved with the TNIV, said, "I don't think this is quite as big of a deal as people make. It's just a minor change, like other textual variations, and simply clarifies the author's intent." He disclaims any greater significance to the discovery.

The progressive element of Christians for Biblical Equality has been jubilant. One scholar said, "This is a very important step in the right direction. I look forward to when a manuscript is found where the patriarchal Theos is replaced by the more neutral Theon. It really only means changing a couple of the case endings plus the spelling of the word that means 'the.' Theon would remain in the second declension. It is just a small change, but it would help Christians reach out effectively to those on the margins of society." After all, if one clarification helps, why not another?

# **"Inclusive" Language and Other Debates**

## **How I scared off all the other advisors**

Before I became Orthodox, I entered a diploma in theology program and wanted to do a thesis on programming-style "design patterns" and recurring patterns in Biblical Egalitarian argument where problems in the arguments, it seemed to me, raised a red flag about the conclusions. I managed to scare off most prospective advisors by the idea of using concepts used in computer science, and almost scared off even the Biblical scholar who handles the computer stuff at a place connected with the university before (somewhat by accident) he looked at the concept I wanted to carry over from computer science and concluded that it wasn't so scary after all, and in fact while he said, "I have never heard of an approach like this before," the concept itself was nowhere so scary to a scholar in theology as the impression I gave by how I introduced my intended thesis. I

wrote a thesis under his direction, and at the end of the year, mostly in gesture of thanks, I gave him a classic text in object-oriented programming's "design patterns."

The scholar is a major scholar in Biblical Egalitarian circles, as in a plenary speaker at CBE conferences. He gave me kind and appropriate direction in a thesis that critique common styles of argument associated with convictions that are important to him, and we've remained in contact every now and then. There may be important distinctions within Biblical Egalitarians, but when he directed me he was working to help me produce a good thesis and did so without trying to lead me to his position, and I do not know what exact stripe of Biblical Egalitarian he is.

## Defining terms

I use the terms Biblical Egalitarian and complementarian heavily here. The two terms represent the liberal and conservative camps on issues of men, women, and gender. The flagship organization for Biblical Egalitarians (or, more simply, egalitarians) is [Christians for Biblical Equality](#); the flagship organization for complementarians is [The Council on Biblical Manhood and Womanhood](#).

**Biblical Egalitarians** try to combine Christianity with feminist concerns of various stripes. For one example, they adamantly believe the Bible's "In Christ there is no... male nor female" and, more specifically, consistently try to neutralize "Wives, submit to your husbands as if to the Lord... Husbands, love your wives as Christ loved the Church and gave his life for her..." to make room for "no male nor female". To the Egalitarian, if you really believe "In Christ there is no male nor female", you believe it on terms informed by feminism. In my experience Biblical Egalitarianism is always argued with sophistry; what got me off sitting on the fence was a forceful presentation of Biblical Egalitarianism clothed in rhetoric that profoundly disturbed me. There is more to Biblical egalitarianism than inclusive language advocacy, but one part of their concern is that using "man" or "brother" when your intent is generic is perpetuating an injustice towards women. Overall there are several feminist-influenced concerns in

Biblical egalitarianism; inclusive language is one of them. The basic goal of Bible scholarship pursued by Biblical Egalitarians is to arrive at an understanding of key passages that is more informed by feminist concerns.

**Complementarians**, in a name as carefully chosen as "egalitarians", argue that we are missing something until we understand men and women as complementary. They tend to believe that "In Christ there is no... male nor female" and "Wives, submit to your husbands as if to the Lord... Husbands, love your wives as Christ loved the Church and gave his life for her..." both belong to the same whole and in fact seem to both be cut from the same cloth. Complementarians are people who say, "No, that's not good," in response to feminism trying to uproot elements of traditional society. However, groups like the [Council on Biblical Manhood and Womanhood](#) are making a proactive effort to take a positive position. They are not simply making a negative reaction to change; they are trying to offer a carefully considered positive position about why specific changes are not good and what a real, serious alternative to those changes would be. The basic goal of Bible scholarship pursued by complementarians is to arrive at an understanding that is more Biblical—not for us to adjust the Bible, but for the Bible to adjust us.

"Inclusive" language is not the only issue for either, but it is not a trivial issue, and I focus on it here. I would briefly suggest that what is at issue is not whether women are included, but the terms of inclusion: belabored "inclusive" language pushes to a Biblical egalitarian version of inclusion, while traditional language includes women on more complementarian terms.

## Where I stand

Where do I stand? "It's complicated" may be the best short answer, but that's misleading. First of all, though I am closer to complementarianism than egalitarianism, it does not mean "I'm a complementarian but I'd rather not say so plainly," and second of all, it does not mean, "I'm trying to forge my own new path between the two extremes." Then what on earth does it mean?

Um, it's complicated.

The Catholic Church teaches that Catholics and Orthodox believe the same things, and ultimately the only barrier to reunification is that the Orthodox fail to lovingly recognize that we should restore full communion. I responded to that in [An Open Letter to Catholics on Orthodoxy and Ecumenism](#). Some Orthodox have found it a bit forceful, but more have found it astute in its observations. But Catholics have only given one response: "**FOUL!** There's no way you can understand us if you are saying what you are saying about Thomas Aquinas and such."

And as Orthodox, I find the question "Are you a complementarian or egalitarian?" something like "Are you Catholic or Protestant?" as a false dilemma.

Before becoming Orthodox, I wrote [an essay called "Knights and Ladies" that tried to pin down as qualities manhood and womanhood, and suggested a made-up term "qualitarian" as an alternative to "complementarian."](#) It's a piece that I consulted

several men and women in writing, that complementarians seem to like and egalitarians seem to critique, but I now regard it as flawed. It's not exactly that I want to mix in more egalitarianism, but the basic project I took on was a thick description of qualities as a line of response, and a thick description of qualities is part of postmodern Zeitgeist and not a real part of Orthodox theology, and as such it is (arguably) a fairly successful attempt to bark up the wrong tree in offering a rebuttal.

There is a forum where I posted certain arguments and received counter-arguments from Orthodox scholars that were subtly reminiscent of the kinds of arguments I had studied in Biblical Egalitarian texts in that thesis. For one example, I made an argument from experience and basic observations about society, and it was dismissed by an Orthodox scholar who had just published a paper with his own thesis. The stated ground? I wasn't arguing from the Fathers. I'd almost like to say that I let that dismissal slide; a close reading of Church Fathers is not what powers the Church Fathers, but writing of spiritual realities out of experience. But I dropped that line of argument, and in response to his dismissal of both my argument and other attempts to define the qualities of male and female, I pulled from the beloved theologian St. Maximus Confessor and said that, like the Cappadocians and some other figures, St. Maximus Confessor did very much root for transcending the differences between male and female, but this was in connection with a theology that sought to transcend the differences between the spiritual and the material, paradise and the inhabited world, Heaven and earth, and ultimately the uncreated and the created. In every one of the other four cases, the desire to transcend a difference assumes there's a difference in place to begin with.

When I gave this answer to a request to argue from the Church Fathers, he dismissed St. Maximus on this point altogether, saying that his widely loved theology was just flawed.

This example may invite a gentle response of, "Your interlocutor was a scholar who had just published a paper that you were hacking away at; it would be naive to expect him to welcome your argument." And perhaps it would be, but this is an example of a common thread; though Orthodox heirarchs have not necessarily treated feminism as something to put their foot down on, and there are Biblical Egalitarians and feminists in the Orthodox Church, every single argument I've seen from an Orthodox trying to help me be more open and receptive to those perspectives has arguments that smell really funny—a strong whiff of eau de red flag.

I haven't spent too much more time revising my beliefs after becoming Orthodox, not really because I think I've arrived at the full truth, but because as people grow in Orthodoxy, sooner or later they figure out that there is more important work than straightening out their worldviews, and they let go of reasoning about truth because they are working to drink Truth Himself. Nonetheless, I wanted to give this email conversation between him and myself, and pay attention to how appropriate or inappropriate the rhetoric is in particular.

## Should we really be that concerned about rhetoric?

I pay very close attention to rhetoric, rhetorical examples, and argument in these pages. There is a reason why which arises from my experience.

In the [Sermon on the Mount](#), Christ calls for a very close care to the fruits people bear:

Beware of false prophets, who come to you in sheep's clothing but inwardly are ravenous wolves. You will know them by their fruits. Are grapes gathered from thorns, or figs from thistles? So, every sound tree bears good fruit, but the bad tree bears evil fruit. A sound tree cannot bear evil fruit, nor can a bad tree bear good fruit. Every tree that does not bear good fruit is cut down and thrown into the fire. Thus you will know them by their fruits.

The most obvious "fruits" might be how people are treated, especially the less powerful, sexual behavior, and so on, but as time has passed rhetoric has time and again been faithful to its tree: commendable positions are advanced with commendable rhetoric and false positions are advanced with slippery rhetoric. It is a rare case, rare indeed, where truths we would best heed are heralded by rhetorical treachery.

I do not fault the presence of rhetoric; an observer would say that my writing is just as rhetorical, and just as much contains some kinds of argument and not others, as any piece whose rhetoric and argument I treat as cause for concern. But certain kinds of rhetoric aren't just a rotten wrapping paper around healthgiving fruit. They betray that much more is tainted in the offering than merely a slight logical fallacy here, a misleading example there.

I would not limit the "fruit" in the [Sermon on the Mount](#) to be rhetoric alone; I don't really believe it is one of the main fruits Christ intended to evoke, compared to how one treats the poor (for instance). But it is an important fruit in one respect: it is available to us as long as we have the message.

In this day of the Internet, false prophets may rarely meet us face to face and we may have little clue of a teacher's sexual fidelity, or lack thereof, or whether the person arguing with us feels entitled to socially acceptable theft, whether to take office supplies or to listen to music without paying the artist or those who worked to make the music available. It might take a Big Brother to tell us whether an activist bears good or bad fruit there. But there is one way we can attend to the prophets' fruits without Big Brother invasions of privacy: true and false prophet alike offer us their rhetoric, and it is well worth attending to this one fruit that is impossible to hide.

## **Rhetoric that keeps on recurring—giving an answer when it appears in email**

Let us turn to the conversation, which began after I put up a search engine and sent him a link; he followed a link and read, on my site, [The Commentary](#), and then [Inclusive Language Greek Manuscript Discovered](#). He responded to both:

**My advisor wrote:**

BTW I read your "Commentary" piece a couple of times. I wasn't sure what you were getting at.

At first glance it looked like you are rejecting all interpretations which take cultural context into account.

At second reading it looks like you may merely be warning readers that humanity itself hasn't changed, so we shouldn't re-interpret the Bible as if people weren't so clever then.

But I wasn't sure.

But it left me wondering:

\* Are you saying we shouldn't make allowance for greater ignorance in the past?

We are no more intelligent now, but we do have better understanding about medicine, geology, astronomy etc. This affects the way we interpret things like "the moon turned to blood" - which we would now regard as an atmospheric

phenomenon and nothing to do with the nature of the moon.

\* Are you saying we shouldn't make allowance for cultural situations in the past?

God expects the same morality from humans at all times, but don't the rules change in order to result in the same principles?

I'm thinking of things like slavery, which in the OT was restricted to certain permitted types (6-yr voluntary slavery, and minimum rights for lifelong slaves from warfare), and was tolerated in the NT "for the sake of the Gospel", and was increasingly opposed by the church (albeit very gradually) with as much speed as society permitted.

Perhaps I didn't read it carefully enough.

Then I went on to read your piece on the gender-neutral MS. Do you really think that there are people who want to accurately reflect the gender of everything in the Bible? The NLT and others have followed the TNIV lead, and even the ESV has a policy of translating anthropos as 'people' or something similarly neutral. I don't know ANY version which uses the pronoun "it" for the Holy Spirit when the Greek does - eg in Jn.14:17. How would you decide when to follow the Greek and when to follow English convention?

I guess that your aim for these pieces of writing is to provoke the reader to think about the issues, rather than give an answer.

You have certainly succeeded in my case!

---

**My advisor wrote:**

The NLT and others have followed the TNIV lead, and even the ESV has a policy of translating anthropos as 'people' or something similarly neutral. I don't know ANY version which uses the pronoun "it" for the Holy Spirit when the Greek does - eg in Jn.14:17. How would you decide when to follow the Greek and when to follow English convention?

The point is not exactly that the English grammar of translations should follow *Greek* grammar as regards grammatical gender, but that what is going on in inclusive language isn't going on in the Bible.

This response is brief and enigmatic: not the most helpful. But in the following emails I address the concerns and touch on the same things from different angles.

Despite the communication weaknesses in my writing, I thought some of the points were worth sharing.

---

**My advisor wrote:**

**I wrote:**

I wanted to comment on this point more specifically.

To an American, references to slavery first evoke field-slaves in our country. The movie *Malcolm X* has Malcolm on a TV show debate opposite a black opponent who was very educated, culturally almost white, and played to what a white audience then would like to hear for their comfort. The host asked Malcolm what he called his opponent, and he shouted a racial slur and then distinguished between house- and field-slaves: the field-slave's lot was extremely rough; the house slave was much less difficult and could verge on effectively being a well and politely-treated servant. Compared to the field slave who faced rough realities, the house slave almost represented a leisure class and the house-slave's outlook and experience were white.

In the U.S. we no longer have people clothed in a few

In the U.S., we no longer have people clothed in a few garments, meant to last, with cotton garments woven from the work of field slaves. We have instead many garments meant to wear out, and the culture of a fashion industry that socially enforces purchases above replacement of low-quality garments, made in sweatshops which wear people out faster than U.S. field slavery wore people out. And there are other areas where we are pushing forward not only on abortion, but on scientific use of human embryos meant to be destroyed.

And I do not exclude the U.K. from this critique.

I would really not consider a picture to be complete that includes the abolition of slavery and remains, unlike St. John Chrysostom on slavery, silent on other areas where we do worse.

My initial response to his mention of slavery mentioned "a beam in our eye"; this was intended to specify one such beam that makes me skeptical of celebrations of how much we have progressed as a society.

---

**My advisor wrote:**

Could I press you a little more on what you mean by inclusive language? How would you translate the following:

Blessed is the man who ... ([Ps.1](#))

If a brother sins against you... ([Lk.17.3](#))

God made man in his own image, ... male and female he made them  
([Gen.1.27](#))

If we had read these in a modern English book, we'd assume the author was implying that

\* women can't be blessed,

\* sisters don't sin against you

\* women aren't made in the image of God.

Some Bibles are translated to help people understand what the words were in the Greek and Hebrew, while others are translated to help people understand what God's message is, in their own language. It is fairly easy to translate those verses literally, but how would you translate them into modern English so that a reader wouldn't get the wrong impression about what the message is?

I'm trying to gauge opinions on this from a wide range of people, and I'd be interested in your response.

But don't feel pressured into answering - I won't think badly of you if you don't have time to answer.

---

**My advisor wrote:**

**I wrote:**

Your last paragraph almost begs the question; it's reminiscent of saying "humankind" even though never, outside of the shadow of inclusive language efforts, has "mankind" been understood to encompass anything less than all of us.

"Exclusive" language is what "inclusive" language wants standard English to be. Inclusive language efforts, and specifically the efforts to recast the alternative as exclusive, redefining "man", "brother" (and even "mankind") to be male only, are not a more inclusive alternative to an unchanged option. They are an effort to replace a naturally inclusive language with a more belabored language, and redefine away the inclusive character of what is being attacked.

My point here is that "exclusive language" and "inclusive language" are no mere neutral and descriptive terms: they are loaded language that misrepresent what change is actually being advanced. An alternative, if pointed, terminology for "exclusive" language and "inclusive" language might be **naturally inclusive language** and **belabored inclusive language**.

"Exclusive" language is arguably not what inclusive language advocates say it is, language that includes women where the alternative is exclusive to them, except where inclusive language advocates have succeeded in redefining naturally inclusive language as exclusive language.

Furthermore, there are several things to untangle, and I give more than one answer to the question about how I would translate "If a brother..." and other passages because there is more than one thing to say. I write quite a few emails because there's really quite a lot tangled up in the remarks I am responding to.

---

I wanted to add a couple of notes from a class that dealt in hardcore feminist theology. I am noting this specifically as something that I would not directly lump Biblical Egalitarians in with unless Biblical Egalitarians ask to be lumped in with them.

The first point was that several of them dealt with the question of an inclusive term for one person of unspecified gender, and in general did not opt to use "they" for one person. Several alternatives were tried, including "s/he" (pronounced "she"), and one author tried hard to make the point that "she" and "her" could be entirely appropriate as a rightly inclusive term for males as well as females.

The second point is that so far as I remember, none of the feminist authors were of limited concern for adult women only; some might speak at one point and refer only to adults (in reference to aging, for instance), but all of the authors were concerned for girls, and from whenever life began in their eyes, a girl was a full-fledged member of the class of women to be cared for...

...but none of them raised concerns of "inclusive language" that "woman" is a term only referring to adults, and so is wrongly applied to a 14 year old or a 14 month old.

Not to put too fine a point on it, but it seems when feminists want to use language that will include all females, their term of choice works like the "exclusive" language of "man", "mankind", and such. The list of people who choose the language style of naturally inclusive language, when they want to include all members of a group, includes feminists who never flinch at using

"women" when they mean to include all females—girls every bit as much as adult women.

And returning to the topic of my advisor and his Biblical Egalitarianism, while he clearly uses and advocates **gender-**inclusive language, he never once uses what might be called **age-**inclusive language. He may ask if a rendering of "Blessed is the man..." demands "Women can't be blessed", but he seems entirely unconcerned to clarify whether minors can be blessed. He never uses words like "child", "boy", "girl", "infant", etc: he applies sophistry to ask us to make it clear that women can be blessed, but the same effort is not made for children, even if they are girls!

It would appear that at least as far as age is concerned, my advisor assumes that what is called "exclusive language" in gender is not exclusive at all, but **naturally inclusive**.

---

**My advisor wrote:**

Could I press you a little more on what you mean by  
inclusive language?

How would you translate the following:

Blessed is the man who ... (Ps.1)

If a brother sins against you... (Lk.17.3)

God made man in his own image, ... male and female he  
made them (Gen.1.27)

**I wrote:**

I might also comment, before giving a brief interlude that  
the first example on Orthodox rather than Protestant kinds  
of exegesis refers to Christ primarily and us derivatively,  
which is an aside to the context as it has been:

The last example differs from the first two examples,  
where conservative and liberal readings of the underlying text  
alike take terms as generic.

In terms of Orthodox Church Fathers who can attract  
feminists, the Cappadocians are one group of usual suspects;  
St. Ephrem, who had women as well as men chanting liturgical  
teaching in liturgy, is another, and Kathleen McVey's Ephrem  
the Syrian: Hymns shows some of those concerns. At one  
point, "Branch" is the metaphorical name applied to the Cross  
and then Christ, and the translator explains that the term  
'branch' is grammatically feminine and, at that point, renders  
repeated pronoun references to the Branch, which refer to  
Christ with varying ambiguity, as "She".

The footnote I take as an example of the French proverb

"Qui s'excuse, s'accuse" (in politically correct English: "To excuse yourself is [by that very fact] to accuse yourself") and it is the same light that I read the NRSV's excusing and accusing themselves for their translation for what you left out in the ellipsis, rendering "them" for "him" in "in the image of God he created him"; I've read the whole NRSV and that footnote is the most convoluted footnote justifying a translation that the NRSV offers; the NRSV does not usually s'excuse/s'accuse concerning its renderings.

Now that is over the ellipsis. As regards referring to God as "him", we have left the question of horizontal inclusive language where a grammatically male reference to a person of unspecified sex in the original text is argued to require explicitly gender-neutral language in English today. Or to put it differently, the original text worked more like the English now called "exclusive language", but its spirit today is best reflected by the "inclusive language" that is used in redefining the alternative as "exclusive language". But this question is not the issue in calling God "him"; at most it is a gateway drug.

The first two comments are simply about passages where all sensible scholarship agrees that "man", "brother", etc. as they appear in the original text are intended to include women. The last example is one where there is real controversy over whether the text should be rendered to be more politically correct. I was trying to say, "Look, I see two problems—cans of worms—in translating the last text that aren't in the first two."

---

**My advisor wrote:**

\* Are you saying we shouldn't make allowance for cultural situations in the past?

God expects the same morality from humans at all times, but don't the rules change in order to result in the same principles? I'm thinking of things like slavery, which in the OT was restricted to certain permitted types (6-yr voluntary slavery, and minimum rights for lifelong slaves from warfare), and was tolerated in the NT "for the sake of the Gospel", and was increasingly opposed by the church (albeit very gradually) with as much speed as society permitted.

**I wrote:**

There's something I might like to comment.

There are some points where any number of examples might be chosen. In the Bible, [Sodom is an emblem of sin](#) and is used to say that a particular community's sins are grievous, but the list of sins connected to Sodom is rather open-ended: without going with queer scholarship and saying that the sin had nothing to do with "sodomy", there is room to say that the men of Sodom showing vile and obscene inhospitality to angelic visitors was the anvil that broke the camel's back; part of the build-up is a dialogue in which Abraham tries to negotiate with a God who cannot find ten righteous in the city. The city is an image of vice later in the Bible, but the sins that are compared to Sodom are open-ended: they include hollow religious observances while preying on one's neighbor and the

poor ([opening of Isaiah](#)), adultery and defiled living ([Jeremiah 23:14](#)), pride and excessive eating without care for the poor ([Ezekiel 16](#)), not receiving Christ's apostles appropriately ([Matthew 10](#)), general ungodliness ([II Peter 2:6](#)), and unnatural lust ([Jude 7](#), perhaps the biggest fly in the ointment to queer exegetes who assert that Sodom's story is no more about homosexual relations as such than the story in [Judges 19](#) is about heterosexual relations as such). But the list is open-ended and I have not included connections of pagan nations; my main point is that the list of sins is open-ended; prophets name Sodom in connection to the sins they indict. And other things are open-ended in church and in scholarship...

But it really strikes me how much this one simple example of slavery and the Bible comes up in certain contexts. When I read queer scholarship arguing that the story of Sodom can be read without the hypothesis that homosexual relationships are condemned as such, a discussion of slavery in the Bible paves the way. When Craig Keener argues in the example of bad scholarship I chose for my thesis that we can do better than the Ephesians haustafel, a discussion of slavery in the Bible paves the way. When I discussed this regularity with one teacher, and asked "If it is necessary that we will get our bearings somewhere about what orients our understanding of Scripture, why this specific paradigm example?" It would seem that when people want to enhance what the Bible has, or draw out what it intends more clearly, or improve on it as demoted (if in fact I name more than one intent), the paradigm example that should orient our view of Scripture invariably finds itself in a Bible that did not offer our progressive abolitionism.

(I might comment in reference to my earlier example,

though, of clothing and sweatshops: Before the abolition of slavery, Northern as well as Southern U.S. citizens who wore cotton were clothed at the expense of preventable human misery from field-slavery. And today, black and white Americans alike are clothed at the expense of preventable human misery from sweatshops. But there is a difference of scale. Americans own, use, and replace quite a few more garments, and if one may speak of a "carbon footprint", one may perhaps also speak of a "footprint in preventable human misery", and say that U.S. field slavery was an abomination, but the "footprint in preventable human misery" of an American today in clothing is not comparable to the footprint of an American before the civil war; it is comparable to the footprint of a small city. And as long as we have excess of clothing and other unneeded luxuries at the expense of preventable human misery, we should perhaps moderate our celebration of ourselves for having progressed beyond such evils as slavery.)

When I made the comment about this one example that keeps paving the way to orient us, the professor made a comment about canons within a canon, and I would like to comment on the concept and then her specific comment. The idea of a canon within a canon is not a particularly Orthodox one, and I'm not sure I've ever read an Orthodox theologian speak in such terms. The first time the concept was explained to me was something like this: "All great and even minor theologians draw disproportionately from some areas of the Bible more than others, and they do not all do so in exactly the same way. We call the areas of focus 'the canon within the canon.'" And in that sense, I'm not sure there's Orthodox room to object, even if there may be more important things to

say. But what I would say is that while that is one way of understanding the canon, it is profoundly misleading to suggest that this is the only basic meaning current in academia. On those terms, which I'm not sure I'd particularly object to, "the canon within the canon" for a particular theologian is a simplification, a generalization, and the kind of thing you observe after the fact. One may claim to identify a particular theologian's "canon within the canon" in something of the same spirit where C.S. Lewis spoke of defining periods in history: he didn't see how you could do serious history without them, but they are a map that does necessary violence to its terrain, and unnecessary violence if it is imposed as an absolute.

In my time at another school, I heard the phrase "canon within the canon" consistently. One example was when people were setting out to engage in a particular theology, and identified as the very first task to identify the canon within the canon. Taken in context, this was clarified to mean not "What few areas of the Bible will we give special focus?" but "What few areas of the Bible will we not truncate away?" Not all examples were the same as this, but I do not remember a usage of "the canon within the canon" that retained the boundaries and modesty of the definition I first met. And, returning to when I raised a question in a paper about getting our bearings from the passages of the Bible that treat slavery prescriptively and do not directly abolish it, my professor responded that there needed to be some canon within the canon. And that response surprised me. I have seen the example of slavery repeatedly, but apart from that one remark I have never heard it called "the canon within the canon." But it does in a certain way make sense.

If you are going to orient and situate people so they will naturally seek to appreciate the Bible's strengths while gently working to refine its weaknesses, then there is no "canon within the canon" in the Bible that can properly compete with prescriptive moral teaching in the Bible that sets bounds for slavery but fails to command its abolition.

The best nutshell summary I've heard of Polanyi's theory of personal and tacit knowledge is, "Behaviorists do not teach, 'There is no soul,' but rather induct students into investigation in such a way that the possibility of a soul is never even considered." And there is something telling along these lines in the slavery example that keeps being chosen when the audience is drawn to work and refine the Bible's weaknesses.

I find the example significant.

—

On another note, I realized I had misread your intent because of where I cut a quotation. Let me quote the part that I muffed, and then respond to that.

God made man in his own image, ... male and female he made them (Gen.1.27)

If we had read these in a modern English book, we'd assume the author was implying that

...

\* women aren't made in the image of God.

On that point may I comment about Mary the Mother and Birth-giver of our God?

There are some pretty medieval Catholic things that the Reformers kept even as they rebelled against Rome, and I'm not referring in this case to assuming that doctrines like the

not referring in this case to assuming that doctrines like the Trinity and the Incarnation should remain after reform.

There is precedent as old as Origen, and as Orthodox as a number of canonized saints, for having as one layer of piety an identification of the believer as the Lord's bride. In Orthodoxy this is not as focal as the image of the Church as the bride of Christ, and in piety it is not nearly as important as the Biblical image of sons of God (I am intentionally using the masculine here; the Bible includes "children of God" but never "daughters of God"). But was really on steroids in the medieval Catholic West and the bedrock of sanctification through the metaphor of bridal mysticism remains the bedrock of sanctification in Evangelicalism today, and is part of a rather asinine question I asked in moving towards Orthodoxy: Is the reason so many Evangelical men are converting to Orthodoxy that Orthodoxy understands sanctification as deification and Evangelicalism understands sanctification as a close personal relationship with another man?

Another example has to do with what The Sin is, the one sin we ought most to look out for. In the pop caricature of Victorianism, The Sin was lust. Among many Evangelicals today, there is a wariness much like what made a Catholic Dorothy Sayers write, "The Other Six Deadly Sins", and The Sin is pride. In late medieval Catholicism, The Sin was idolatry, and people were looking for it everywhere. If the Reformers found that the adoration of the saints to be idolatry, they were developing a medieval Catholic perspective.

Whether medieval Catholic and contemporary Orthodox veneration of Mary the Mother of God should be seen as the same or different is something I am not interested in exploring here but the following element of Orthodox piety I

exploring here, but the following element of Orthodox piety I am sure would have been classified as idolatry by the Reformers:

It is very proper and right to call thee blessed,  
Who didst bring forth God,  
Ever blessed and most pure,  
And the Mother of our God.  
More honorable than the cherubim,  
And more glorious beyond compare than the seraphim,  
Who without spot bearest God the Word,  
True Mother of God, we magnify thee.

I would like to make a point, and it is not exactly about agreeing to disagree. A basic Reformation outlook or worldview had no place to classify this other than as worship. First of all, it addresses Mary in the second person. In the culture of at least of Evangelicalism as I know it, in a secular context you address other people in the second person, but in a church context you address God alone in the second person. Second, it extols her above the highest ranks of angels and really gives her a place that the Reformers did not see as a place to be given rightly to a created and sinful human. And third, it calls her Mother of God, which would at least give the impression of placing her above God. The Christological controversy that led Nestorius's attempt at a reasonable way to please everybody with "Christotokos" is known, at least on the books, but that "Mother of God" is both confessional Christology and not intended to place Mary as supra-divine (Orthodox liturgy refers to Joachim and Anna as "ancestors of God" and icons call James "the brother of God"), and a relational statement: "Mother of God" is not confused with

being above God any more than the readings of "sons of God" in the Bible mean that we are taken to be fully divine by nature in the same sense as Christ.

My point in these clarifications is not exactly to say that the Reformation view is wrong; my point is to say that what is going on in those words is something that the Reformation universe has no place for, except in the category of worship that should be given to God alone.

And my reason for bringing this up is not to say "Because we praise Mary as the Mother of God, we don't view women as inferior." It is to say that, to paraphrase what I'm responding to, "Gen 1:27 says, '...in his image he created him, male and female he made them.' Does this mean that women aren't made in the image of God?"

There's a fairly clear statement on that point in the Bible, in one of the passages that your camp sees as (residual?) misogyny in Paul and something that we need to progress beyond, because that's the only place for it, much as an early Reformer could only see the liturgical quote above as idolatry, of rendering to a creature what is only proper to give to the Creator:

For a man ought not to cover his head, since he is the image and glory of God; but woman is the glory of man.

I will leave it mostly as an exercise to the reader what I believe of this text; what I will say is that I will understand if your conceptual framework has no place for statements like this except as one of the areas of the Bible that is not so much a strength to appreciate as something to gently refine.

The two points buried under all these words are first, that

bringing up slavery as the place to get our bearings in understanding the Bible is highly significant, and second, that there's something going on in the text that egalitarianism has no place for and is apt to misfire because it has no place to receive it.

---

**My advisor wrote:**

But it left me wondering:

\* Are you saying we shouldn't make allowance for greater ignorance in the past? We are no more intelligent now, but we do have better understanding about medicine, geology, astronomy etc. This affects the way we interpret things like "the moon turned to blood" - which we would now regard as an atmospheric phenomenon and nothing to do with the nature of the moon.

**I wrote:**

The assumptions that frame this question are part of what I was trying to answer in ["Religion and Science" Is Not Just Intelligent Design vs. Evolution](#). That treats the religion-science question at interesting and arguably provocative length; beyond the link, I'd like to respond briefly.

I don't make allowances for greater ignorance in the past. Allowances for different ignorance in the past are more negotiable. And I would quote General Omar Bradley: "We have grasped the mystery of the atom and rejected the [Sermon on the Mount](#)."

To put things differently, my advisor could be paraphrased, "Look, we've progressed! We have a more scientific understanding of some things!"

My response rejects the modern doctrine of progress: I don't believe we've progressed, and in particular the fact that we are more scientific is not the same as moral progress. In

fact, the case may be that when we have moved to a more scientific outlook it has led us to lose sight of things that are foundational to Christian faith: ["Religion and Science" Is Not Just Intelligent Design vs. Evolution](#) explains how exactly being more scientific may not be good for theology.

---

**I wrote:**

There was one other point I would like to venture, in terms of how things fit together:

Jerry Root wrote a monograph from his dissertation, [C.S. Lewis and a Problem of Evil](#), arguing that C.S. Lewis made an objectivist critique of subjectivism and that this is a major thread through multiple works across decades and arguably could be called the common theme. All of Lewis's fiction, or at least the samples quoted from before he was a Christian ("Dymer") onwards, have villains who are ascribed subjectivist rhetoric.

Root is himself an egalitarian, which I need to say in fairness, although his egalitarian argument smells faintly subjectivistic, along with a silence that speaks rather loudly: he never intimates that the message of the Unman in *Perelandra* might in fact be almost unadulterated subjectivism and a gospel of feminism and that these are arguably not two separate things, at least in the narrative.

I have a friend who is a silver-haired, balding counselor, and tried really hard to help me prepare for my Ph.D. program (which blew up anyway, but I can't fault his help or any defect in his help). He spoke appreciatively of his training in gay theology (he is a conservative Orthodox and was not trying to convert me to queer agendas), and the biggest single point he tried to make, as something I would have trouble understanding, was subjectivism in relation to feminism.

One of the things he told me that I wouldn't understand was the kind of thing that was illustrated in this: there is a hardcore academic feminist camp that insists that all male

celibacy is a tool of patriarchal oppression, and there is a hardcore academic feminist camp that insists that all heterosexual intercourse is rape, and these camps coexist without particular conflict. The objectivist says, "Wait a minute, unless at least one of these is at least partly wrong, or there is an imperative for all men to be homosexually active (or doing something more creative), there is no course open that would let a male live without being a sex offender," is in a very real sense intruding with something foreign onto the scene: objectivism that says there is a reality we should seek to conform to, however imperfectly we may do so.

Biblical egalitarianism is often not so pronounced; I doubt many, or even any, of the egalitarians at Wheaton College make any claim of comparable feminist extremity. But the subjectivism is there, and my thesis could be described as an analysis of how subjectivists argue when straight argument won't get them where they want to go—and every single treatment of the passage from a Biblical Egalitarian/feminist that we looked at for a comparison study had the same shady argument; I have yet to see a Biblical Egalitarianism treatment of the passage on husbands and wives in [Ephesians 5](#) that argues in objectivist fashion; every one of the dozens of cases I've seen argues with sophistry out of a subjectivism that is unwilling to conform to the reality studied.

I wrote about the connection more explicitly in [point 24 of From Russia, with Love](#); that explains concretely and more descriptively what it would mean for feminism and egalitarianism to be intertwined with subjectivism.

I know Jerry Root and probably should have called him Jerry instead of Root the second time. I sat in on one of his classes

once, to observe before teaching (he is considered a legendary professor in the community), and as a C.S. Lewis scholar quoted Lewis as he said, "Satan is without doubt nothing else than a hammer in the hand of a benevolent and severe God. For all, either willingly or unwilly, do the will of God: Judas and Satan as tools or instruments, John and Peter as sons." He then said, communicating with great warmth, "and I would add, 'or daughters'" and said that women were included in the great company of those who do God's will as children of God and not as mere tools.

In my role as a visitor, as a fly on the wall, I held my tongue on saying, "You're not adding to the text, you're taking away from it." By saying that he was adding that the text could apply to women, he was **retroactively** redefining the text, when no sane reader, even a sane reader who prefers to use explicitly gender-neutral terms when the intent does not include specifying gender, would read Lewis's text as saying that males like Peter and John could do God's will the good way but by definition Mary the Mother of God and Mary Magdalene the Apostle to the Apostles could not.

Do I really believe Jerry believed that, or intended that in anyone he addressed?

The rhetoric is too subjectivist for that.

---

**My advisor wrote:**

Your emails are interesting though, as you say, they have gone down paths which you were particularly interested in.

The main question I had was:

Blessed is the man who ... (Ps.1)

If a brother sins against you... (Lk.17.3)

God made man in his own image, ... male and female he made them (Gen.1.27)

How would you translate them into modern English so that a reader wouldn't get the wrong impression about what the message is?

My guess, from what you've said, is that you don't think English has changed, and you don't think that anyone would get the wrong message except hard-line feminists who would intentionally misread the text.

On Ps.1 you point out the Christological interpretation, which I recognise, though I wouldn't say it is the primary meaning of the text. One of the wonderful things about Jesus was that he DID associate with sinners, though without becoming one of them.

I fear that English has changed, whether we like it or not, and modern readers need some help, or else they will think the Bible is exclusivist.

---

**I wrote:**

I believe English has changed, but you assert forcefully that when the text says "man" it cannot refer to women, fullstop, in the modern reader's mind. I would take that as a rhetorical overstatement, but even if it is a rhetorical overstatement, it suggests that you have been getting your bearings from egalitarians for whom "inclusive" language is an active priority, whether this is a conscious or unconscious effort. Compared to other Christians, especially outside academic circles, I would expect you have a disproportionately high number of friends and contacts who are members of CBE or share significant sympathies.

(You can fairly say that at least in academic circles I have a disproportionately low number of such friends, and a disproportionately higher number of friends who would critique CBE, and I would say I am not middle of the road for the friends I know.)

English, especially among the learned, has changed, and "man" is less likely to be read as simply referring to people in general. But it is a strong position to say that "if a brother sins against you", in a passage whose plain sense gives "brother" a much more expansive sense than the biological, will be read only as referring to males. And strictly speaking, at least two of your points contain the same logical fallacy as saying that "All taxicabs are vehicles" demands, if taken literally, that "Because a truck is not a taxicab it cannot be a vehicle". "If a brother sins against you" if taken to exclude women cannot logically imply "sisters can't sin." "In the image of God he created him" if taken not to refer to Eve cannot

logically imply "Women are not created in the image of God."

You take an extreme interpretation and position, perhaps partly to rhetorically underscore a point, but with what I think are appropriate allowances for rhetorical overstatement, I believe you take a change that has occurred partially to be full and absolute.

The story of the TNIV does not commend the reading that the change is simply bringing the language of the translation in sync with the language on the street. The argument that this needs to be further imported to Bible translations has something of a whiff of the offensive, "The bureaucracy is expanding... to meet the needs of an expanding bureaucracy!"

N.B. The reference to the TNIV (Today's New International Version) is essentially as follows: The NIV (New International Version), like many other translations, has been updated and revised over time. The people in charge of the NIV, as one update, were going to change to inclusive language. There was an enormous outcry that ended in the people in charge of the NIV signing an agreement not to convert the NIV to use inclusive language. And after making that commitment in writing, they still left the NIV available but made an inclusive language version of the NIV and renamed it "**Today's** New International Version."

For the claim, "English has changed", the argument is that perhaps in the past readers may have read "man" and "brother" as fully inclusive of women, but we need to use (belabored) inclusive language now because things have changed.

The position taken is that we need to move from the older style of naturally inclusive language, to explicit (and belabored) inclusive language, to adjust to the fact that we are in the process of moving from naturally inclusive language to a

belabored inclusive language. We should stop using "man" in an inclusive sense because we are stopping using "man" in an inclusive sense. The bureaucracy is expanding... to meet the needs of an expanding bureaucracy! We must work harder at political correctness to meet the needs of an expanding political correctness.

---

**My advisor wrote:**

It sounds like I have trodden on your toes - I'm very sorry.  
In the English of most newspapers and blogs, a "man" is male,  
a "woman" is female and a "person" can be either.

In my original question, I recognised the value of literal  
translations for those who know the Bible well.

But I was wondering how you would translate such example  
passages for friends who aren't Christian, or for people who pick  
up a Bible in their hotel room - ie those who haven't ever heard  
of CBE or other such groups, and who don't know that "man" can  
mean both male and female in the Bible.

---

### **I wrote:**

Well, that depends somewhat on audience. If I am aiming for the chattering classes as my audience, I would probably follow the rule, "Unless it is your specific intent to exclude half of humanity from any possible consideration, use strictly and explicitly gender-neutral language."

But when I step outside the bubble of those classes, and overhear working-class people talking, "If you see someone, tell them..." melts away and leaves "If you see someone, tell him..." The experience of "he" and "him" as essentially "exclusive" language is common with the bubble we live in but far from absolute, and that matter far from common, in this U.S., where I believe your concerns have made more headway than in the U.K. If we are talking "people who pick up a Bible in their hotel room", we have left the realm of educated people who read the Bible as literature, and we are talking truckers and the unwashed masses--you know, the kind of people who furnished some of the twelve disciples. And there the answer is simple: say "he" when your intent is generic; saying "they" for one person sounds weird and part of a foreign world intruding on normal English.

And this may be drifting slightly, but if the question is, "How do we render 'If a brother sins against you' so that the full sense of the Church as a family and rebukes within that community comes across," I don't know, and I am wary of the question and approach. Certainly part of it may be more explicit in rendering "If a brother or a sister sins against you"--or, if you don't mind making things even harder for truckers opening a Bible in a hotel room, "If a sibling sins

against you"--but more broadly the choice of 'brother' in Greek bears a wealth of layers that are hard to translate so that all of them are apparent on first blush in English, a game which is very hard to win.

This is meant more as a confession of stupidity on my part than a boast, but at one point I tried to make my own Bible translation, called the Uncensored Bible, and aiming for clarity. There were a few highlights to it, and it rendered the Song of Songs clearly, or was intended to, like the original NIV before the higher-ups vetoed translating the Song of Songs the same way they translated other books. And, though this is not intended as an inclusive language issue, the wordplay in Matthew 6:27 was rendered neither "Which of you by worrying can add a single hour to his life?" nor "Which of you by worrying can add a single cubit to his height?" but "Do you think you can add a single hour to your life by worrying? You might as well try to worry yourself into being a foot taller!"

But the work as a whole has pearls amidst sand, and it taught me chiefly that translating the Bible is a lot harder than I had given credit for, even knowing several languages and having done translation before. And while I partly succeeded, part of what I learned through that failure was that my idea of "Just make what is in the verse plainly simple" is a lot harder, and part of my naivete in the project was in trying to do that. Certainly it's possible to be a little clearer where major translations deliberately obscure things from the unwashed masses, but the biggest thing I got out of it was recognizing I was doing something dumb, and coming to respect what the major translations accomplish a whole lot more.

But if that is the goal, "If a brother sins against you" is much harder to get across than changing "If a brother" to "If a brother or sister", "If a sister or brother", "If a sibling", etc. because "brother" speaks of the Church as a family and frames the situation not as discussing appropriate rebuke of someone who you are not particularly connected to, but appropriate rebuke within one tightly connected fatherhood or family. And the expansiveness of "brother" is perhaps 10% clarified, and 90% not clarified, by including the word "sister" or going for the gelding option of "sibling".

So I would partly say, "I don't know", and you can call it a dodge if you want, but if your goal is to make what is going on in the text clear to most readers, especially outside academia and the chattering classes, you might or might not get 10% of the way there by explicitly making language more gender-inclusive, but if you do so, don't say, "Mission accomplished," because the large part of making "If a brother sins against you" accessible in translation is not accomplished once the translation is clear in applying both to men and women.

The rhetorical posture is taken, "The person I'm really concerned about is the person on the street, the average blue-collar Joe or Jane. What about ordinary people who don't have all this academic knowledge?"

I answer quite simply, "Don't worry; that large demographic is probably the one least affected by political correctness and least likely to hear 'Women are excluded' if they read a Bible that says 'man' or 'brother'."

---

**My advisor wrote:**

It looks like we both want to educate people to understand the Bible and then translate it literally, because it is so hard to translate it to be understood without that education.

Your decision to use the second person instead of third person is often done in gender-neutral translations, and it works sometimes (such as the example you gave), but not always. I wish we had a neutral pronoun.

Ah well, we have to live with imperfection.

---

**My advisor wrote:**

It looks like we both want to educate people to understand the Bible and then translate it literally, because it is so hard to translate it to be understood without that education.

**I wrote:**

Something like that; it is a difficult matter.

Your decision to use the second person instead of third person is often done in gender-neutral translations, and it works sometimes (such as the example you gave), but not always. I wish we had a neutral pronoun.

Ah well, we have to live with imperfection.

In many ways. My attempt at translation taught me that even more than it taught me I was dumber than I thought.

**Of vinyl records, black  
and white photography,  
and using *naturally*  
inclusive language**

Belabored "inclusive" language is here to stay, the rhetoric for it is here to stay, and English usage has changed. I can hardly contest any of these claims, but I would make a point.

When I was a child, it appeared that black and white film had been permanently superseded by color film for all mainstream personal use, and I watched vinyl records be superseded by CD's, pure and simple. Black and white photography outside of Official Art Photography by Real Fine Art Photographers was obsolete now that we had advanced to color film, and a big record player was a waste of space.

But something funny has happened since then—the "improvements" are not so final as one might think. It is not just Official Art Photographers who make those obsolete monochrome photographs; there is an increasing appreciation for black and white photography, to the point that color digital cameras take pictures and extra work is done to make monochrome photographs, either black and white or sepia. And while digital audio isn't going away anytime soon, the more an audiophile really, really cares about music and really, really cares

about the sound that is rendered, the more likely he is to explicitly prefer the live sound from good vinyl records and a good record player with a good needle to the tinny and more mediocre sound of even the best digital audio.

I said above, partly to avoid pressing a point, "educated people who read the Bible as literature," giving the impression that the Bible as literature crowd will obviously use inclusive language translations. But there's something really funny going on here. Educated liberals who read the Bible as literature normally use inclusive language. Educated liberals who read the Bible as literature normally believe in inclusive language. And, in my contacts, educated liberals who read the Bible as literature pass over every inclusive language Bible translation for the majesty of the King James Version. With its naturally inclusive language.

"Man" has taken something of the tint of a sepia image, and hearing language like "humankind" sounds like the tinny mediocrity of a CD to an audiophile who prefers vinyl: the point gets across, but not the way vinyl allows.

Inclusive language efforts have given the traditional language of "man", "brother", and "mankind" a share of the beauty and poetic force of sepia and vinyl.

## What's *wrong* with the emails above

I've written these emails with a growing sense that there is something wrong with them: a sense that there was something inescapably misleading even when the observations were accurate. After a while I put a finger on what bothered me. These observations may be accurate observations of truths (or maybe just politically incorrect). But they are not a drinking of Truth. They fall short of the [Sermon on the Mount](#):

Therefore I tell you, do not be anxious about your life, what you shall eat or what you shall drink, nor about your body, what you shall put on. Is not life more than food, and the body more than clothing? Look at the birds of the air: they neither sow nor reap nor gather into barns, and yet your heavenly Father feeds them. Are you not of more value than they? Do you think that by worrying you can add a single hour to your span of life? You might as well try to worry you way into being a foot taller? And why are you anxious about clothing? Consider the lilies of the field, how they grow; they neither toil nor spin; yet I tell you, even Solomon in all his glory was not arrayed like one of these. But if God so clothes the grass of the field, which today is alive and tomorrow is thrown into the oven, will he not much

more cloth you. O men of little faith!

more clothe you, O men of little faith!

The observations above are the equivalent of careful, meticulous observations about how to run after food and clothing when there is a Kingdom of God to seek after. Food and clothing have their place, and the observations I made could have a place in the ascetical life, but they are not what there is to seek first, and true Biblical manhood and womanhood come not from trying to be complementarian but from seeking wholeheartedly for the Kingdom of God and his perfect righteousness, and letting all else fall into its place.

Let us seek the greater good.

# **An Interview with the Author**

Classifieds 1000 interviewed Jonathan Hayward about his website. The interview is available [here](#), as well as several places online with Classifieds 1000.

**What is the name of your website?**

Jonathan's Corner: A Glimpse into Eastern Orthodox  
Christianity

**What is your name?**

Jonathan Hayward

**Your Location (city, etc)**

I live outside of Chicago, Illinois, USA, in a lovely little niche called Wheaton. My father teaches at Wheaton College, and it's a really nice place.

**Please give us a short summary of your website?**

The website is a collection of creative work—stories, humor, musings, essays, art, even computer software—that I have been collecting for over a decade.

**What inspired you to launch your own website?**

That's hard to say. Ultimately, I think it's a work of creativity that cooperates with God. For me, it begins with a hazy idea that I try to "hear out," and continues until I have something to share. Eventually I had enough to fill out a large

website.

**When did you launch your first website, and what was it?**

I launched my first website in the early 90's. It was a predecessor to my current website.

**How did you decide on a name for your website?**

I was looking for something that would be easy to type and remember. [cjshayward.com](http://cjshayward.com) was available.

**What makes it different from other, similar offerings?**

I think some of my visitors would say that there isn't much in the way of other, similar offerings. It isn't the only "creative work" website on the web, but the collection—stories, mystical theology, art, humor, poetry, games, computer software—isn't really "just like" anything else I've found.

**What is your eventual goal? (To sell it, keep it for income, secure a book or other mainstream media deal?)**

This site is made to share my creations.

**How does your investment of time and money balance against your success?**

It's been worth every man-year of time I've spent on it. Really. I don't really measure things by a "cost-benefit" dollar count; I love to create and this has been a way to share my creations.

**If you had an unlimited development budget for development, how would you change your site?**

There was one Unix designer who was interviewed and was asked, "If you could design Unix all over again, what would you do differently?" His answer? "I would have spelled [the Unix 'system call'] 'creat' with an 'e'." Meaning, there's not much he regrets about how he designed Unix.

I have used a lot of open source software but haven't put much money into it. If I had more money, the only thing I'd

really do is use it to subsidize my living expenses as I continue my creative work.

**If your site got really big, really quickly, would you be able to keep up with the demand?**

Jonathan's Corner already receives well over a thousand unique visitors per day. I'd have to pay a little more for bandwidth, but my site is already graceful with a large number of visitors.

Now I know there are sites with many more unique visitors. But if I avoid the web's version of keeping up with the Joneses—and think my site has to be the world's biggest site—then I already have much to be grateful for.

**What unexpected costs and headaches have you had to deal with?**

I learned the hard way about infinite spidering for a recent CGI script, but there haven't been too many headaches.

**What has been your biggest challenge?**

Finding good things to be create. I don't like long dry spells when I can't create anything or share anything new with people.

**What method has been most successful for promoting your website?**

Website awards; see [Award Sites!](#)

Web awards are valuable for much more than incoming links. I don't agree with all of the orthodoxies within the web awards community, but the web awards community is a tremendous place to learn expertise about making a good website that people will want to link to. I worked for awards before I began working on reciprocal links, and I would recommend that to anybody because the web awards community has a LOT of expertise about how to make your website better—and they are very generous about sharing that expertise.

**How has running your website differed from your expectations?**

Because my purpose was to share my creative work, I didn't have that many surprises. If I'd expected a visitor turnout, or a good PageRank, or the like, then I would have had a lot of grounds for disappointment. As it is, the first time I saw my site listed on Google's directory, it was seventh in category. In retrospect, I'm surprised at how many good things have happened.

**How long have you run the site already, and how long will you continue to keep it up if you don't enjoy big gains in traffic, income or popularity?**

I have run my site for over five years, and I want to continue running it for as long as I am in a position to do so.

**Which page do you most wish people would visit?**

That varies over time; usually, it's my most recent creative work. My latest piece, which I am very happy to share, is [Within the Steel Orb](#).

That piece has been simmering for a long time, and is a science fiction dialogue touching on technology, relativity, and other things next to which technology and science are of relative importance only. But the real reason it is close to my heart is that I have let it stand on my site as a tribute to Madeleine l'Engle, my favorite children's author, who provided some of the inspiration for that piece. I owe a lot to her as an author, and I was working on it during some of her last days: I don't know how to better salute her than leave that piece standing in gratitude.

# Introduction to the Jesus Prayer

The Jesus Prayer is the gateway to silence, and silence is the language of Heaven. Silence is not the mere absence of sound, any more than beauty is the mere absence of ugliness. The chant of the Orthodox Church is crafted from silence: it articulates the eloquent silence of Heaven. One facet of holiness is a life and a heart that is silent within, that surrenders layer after layer of internal noise, and is simply present to eternity in the here and now that God has given. And silent people carry Paradise with and around them. Indeed Paradise is where God's people are present.

The metronome giving the beat of silence in many saints is the Jesus Prayer. The Jesus Prayer takes different forms, short and long. Among these are:

- Lord Jesus Christ, Son of God, have mercy on me, a sinner.
- Lord Jesus Christ, have mercy on me, a sinner.
- Lord Jesus Christ, Son of God, have mercy on me.
- Lord Jesus Christ, have mercy on me.
- Lord, have mercy.

---

When a musician plays for real, the metronome is hidden. The audience may not hear it, but it has reached its full depth when the musician follows its rhythm internally. Orthodox hesychasm, or silent spiritual stillness, is meant so that the Jesus Prayer always be with us. "Prayer of the heart" is when the Jesus Prayer is sunk deeply enough in our hearts that moves of its own.

There are concrete ways we can pursue this. We can work to say this prayer with each breath: Lord Jesus Christ, Son of God, as we breathe in, have mercy on me, a sinner, as we breathe out. We can say this prayer aloud, or silently in our mouths, or silently in our hearts. There is something powerful about saying the prayer aloud over and over again, and the other forms are meant to grow out of this foundation. Some people find it helpful to have a prayer rope, saying the prayer as they breathe and holding one bead or knot and then another to keep count. If you buy a prayer rope, the size does not particularly matter. I was given a 200 knot prayer rope but usually wear a simple black 50 knot prayer rope. Other people don't wear the rope on their wrist, but keep it in a pocket and pull it out to pray.

There are many places you can get prayer ropes, including:

- [The Mount Athos shop.](#)
- [Holy Cross Hermitage \(with 100 beads\)](#)

A **metronome** is a tool used to teach music. It ticks like a clock, but it can tick quickly or slowly for a song, and it helps people learn how long notes should last and lays a foundation for playing correctly, and then moving on from playing correctly to playing well.

- [Orthodox Byzantine Icons](#), which like the other places sells icons as well as prayer ropes, and in particular sells [good icons at good prices](#).

There is an ancient command, "Let nothing be done without the bishop." The Jesus Prayer is part of the Orthodox Way and is rightly practiced as dovetailing with the sacramental life and community in the Orthodox Church. There is a saying, "As always, ask your priest," and it applies to anything here.

The metronome is made to fade away: it is not for the real performance. But in this regard the Jesus Prayer is more than a metronome: it soaks ever deeper, but it remains. It opens a door to inner spiritual silence, the tradition of hesychasm in the Church, and it offers healing from the spiritual noise we are addicted to. Many of our technologies are practical, but most of them are also used to deliver spiritual noise, a daily fix of poison that keeps us from inner silence. The television, much of leisure spent on the Internet, all draws us precisely because it is laced with the narcotic of spiritual noise.

Another layer of inner silence is a kind of watchfulness that watches over one's inner state, desires, mental images, and thoughts. This is not "thinking about thinking" in the fashion that is popular today, but opening one's nose to the stench of spiritual disease all of us have, whether we recognize and fight it or not. When we meet a diseased thought, of lust or pride, or using others in greed, it helps us if we can see what in the thought is diseased. It is hard enough not to worry, but sometimes if we can observe our worried thoughts and see what is spiritual disease, we might learn the wisdom of "Don't tell me not to worry, nothing I worry about ever happens!" We might see as with all passionate thoughts that if we break the thought into

its parts and see the spiritual disease, suddenly it looks rather groundless. Once we are in our right mind, or rather our right heart, some of our terrifying worries seem rather silly.

[The Sermon on the Mount](#) is among the shortest of the divine owner's manual for human life. It says a lot of difficult things, but it doesn't say how, and hesychasm, the tradition of the Jesus Prayer and inner stillness guarded by watchfulness is how. It tells how not to worry; it tells how not to store up treasures in Heaven; it tells how to come to a point that we recognize anger and lust as tiny seeds so that we may stamp out smouldering rags and perhaps burn ourselves a little, instead of needing heroic efforts to stop a house fire. It tells how to seek a Kingdom of Heaven that is built in our lives out of the stones of the virtues and spiritual discipline. [The Sermon on the Mount](#) hits us flat on our chest and says, "Here is holiness. We don't live it." It is perhaps the best command in history to, "Wake up and smell the coffee!" Hesychasm, with its watchfulness and the Jesus Prayer a rhythm as we breathe, equips us in concrete terms to scale those peaks. Hesychasm is how to till the spiritual ground so that it will bear the fruit that blazes in the [The Sermon on the Mount](#).

You don't strictly need a prayer rope; many have found them helpful, but they are an aid. Without a prayer rope you may still be able to reach the point where the prayer is always an aroma you smell when you breathe. And they cost money; perhaps God's plan for your transfiguration has you spending your money on other things. The rhythm of prayer is a treasure no one is too poor to buy.

If you are Orthodox, why not discuss with your priest how you might step into this rich tradition? If you are not Orthodox, ask if the Orthodox Church can share with you of its treasures.

Some priests might have you receive other treasures first; some might directly offer you guidance in coming to experience freedom from addiction to noise, a freedom that is like the layers of music that come after one first learns how to use a metronome, the rhythm of "Lord Jesus Christ, Son of God, have mercy on me, a sinner," increasingly giving the breath of God that we breathe its true and proper stature.

The Kingdom of Heaven appears as the silence of the Jesus Prayer unfurls.

# iPhones and Spirituality

I would like to talk about iPhones and spirituality, and what spirituality has to do with right use of things like iPhones. This may be a bit of an "opposing views" presentation to other points here; I hope the challenge is ultimately constructive.

My first point has to do with one of Rajeev's points in our last meeting, of "Embrace your pain," and what it really means for the iPhone, and more specifically how our use of technologies like the iPhone relates to spiritual work such as embracing your pain. Rajeev really made several excellent points in his lecture last time, and I'd like to pick up on just one: "Embrace your pain." The iPhone's marketing proposition is as a game changing technological drug that will help you dodge this spiritual lesson.

Not to put too fine a point on it, but the iPhone is designed, marketed, and sold as a portable "Avoid spiritual work" system.

Is there any alternative to using various technologies to avoid spiritual work? Let's look at recent history, the 1980's, and how that decade's technological drug is something we may now have some critical distance to look at. There is a classic Far Side cartoon that says in its caption, "In the days before television," and shows a family hunched around an area on the blank wall where a television would be. The irony is that this wasn't the

days before television at all; the days before television were that much more dynamic and vibrant, and the cartoon was only what you get if you subtract television from the 80's, when televisions had drained all of the life out of things. The distinction may be subtle, but there is a profound difference between those two versions of what it means to be without television, one vibrant and with people doing things and another with people bleakly staring at a wall—and this is why many people now have made an intentional and mindful decision to avoid television as a pack of cigarettes for the mind. Another Far Side cartoon, as best I can remember, shows an aboriginal tribesman standing on the opposite side of a deep chasm from a crowd of angry middle-class suburbanites, where a vine bridge has just been cut and fallen into the chasm, with a caption something like, "And so Umbuntu stood, the angry suburbanites stranded on the other side of the chasm. Their idol was now his, as well as its curse." And the tribesman was holding a television. One wonders what the Far Side would say about iPhones after they had carved out their niche. And that brings me to my second point, what I call, "the timeless way of relating."

There is a timeless way of relating, a way that is guarded by Eastern Orthodox ascetics but hardly a monopoly. It has many sides, and there is much more to it than its intentional decisions about technology. It has much to do with embracing your pain and the here and now that we can partly dodge with iPhones, and be **present**. And I'll take an educated guess that Science of Spirituality's leader is among those that have this presence that arises from embracing where you are and its pain.

But a return to the past and laying the reins on the iPhone's neck aren't the only two options, not really. Oliver Holmes said, "I would not give a fig for the simplicity this side of complexity,

but I would give my life for the simplicity on the other side of complexity." I am quite deliberately delivering this lecture with my iPhone in hand. And there is ultimately spiritual work on the other side of the iPhone and its kin, that uses it but does not abuse it as a way to dodge the here and now, but uses the iPhone, and embraces one's pain. And it sets limits and sometimes abstains, much as one does with alcohol.

In conclusion, iPhones and similar technologies have changed the game—but not always for the better, not in every way for the better. Not that we must always avoid them (police officers using drug dealers' confiscated iPhones found that they were incredibly useful) but we must set limits as one does with alcohol and be sure that our spiritual work, not technologies, holds the reins. It is an uphill battle, but it is entirely worth fighting.

# Janra Ball: The Headache

## The Original Cultural Context

"When it comes to games, never try to understand the Janra mind."

-Oeildubeau, Urvanovestilli philosopher and anthropologist

It is known that Janra sports usually last for at least half an hour, involve a ball, two or more teams, running and acrobatics, and animated discussion. Beyond that, neither the Urvanovestilli's logic nor the Yedidia's intuition are able to make head or tail of them. In general, the teams appear to have unequal numbers of players; the players often switch teams in the course of play; teams are created and dissolved; the nature of the activities makes sudden and radical changes; there is no visible winning or losing. There are occasionally times in the course of play when some intelligible goal appears to be being approached... but then, all players seem to be approaching it in a rather erratic manner (when asked why he didn't do thus and such simple thing and achieve the approached goal by an inexperienced anthropologist, one of the Janra said,

"Technically, that would work, but that would be a very boring way to do it," and then bolted back into play: the extent to which game play is comprehensible heightens its incomprehensibility). Late in life, Oeildubeau hinted at having suspicions that, if the Janra believe that they are being watched, they will spontaneously stop whatever sport they are playing, and instead begin a series of activities expressly designed to give any observer a headache.

## Rules

1. There is no winning or losing.
2. The game has one ball, which must be kept in motion at all times. If the ball ceases to move, nobody may speak or act except to move the ball.
3. Il est interdit de parler en anglais au sujet de l'objet du jeu.
4. Any player may give any other player a rule point, provided that there is no alliance or "You scratch my back, and I'll scratch yours" arrangement between them, at any time. Any player who has a rule point may spend that point in order to add, delete, or modify a rule in accordance with the spirit of the game.
5. Every player has a persona, or modus operandi, through which he is acting and answering questions. If any other player successfully identifies this persona or modus operandi, it must immediately be changed.
6. There is no rule number 6.
7. Each player must somehow touch another player before or during addressing him in speech.
8. No player may move from one point to another without using at least one acrobatic, dance, or martial arts motion.
9. Any use of a card deck or game board requires one change of rules for the card/board game per move.

10. Any rules disputes are to be resolved by no judge, until all involved parties come to a confusion which is more chaotic than in its initial form.
11. All players must wear one black sock and one white sock.
12. We're sorry, but rule number twelve is not available at this time. To leave a message, please rotate your telephone clockwise by ninety degrees, and simultaneously press 'q' and 'z'.
13. Any player who does not understand all of the rules, in their entirety, is immediately disqualified.
14. Any player who attempts to memorize all of the rules, or attempts to play the game by keeping its rules, is immediately disqualified.

## FAQ list

Q: What is 'Springfield'?

A: Springfield is a game in which two people alternate naming state capitals, and the first person to name Springfield wins.

Q: What's the point of that?

A: The objective is to be the first person to say 'Springfield' as late as possible. The point is to see how far you can go — and still be the first to say 'Springfield'. It's not a game of mathematical strategy. It's a game of perception.

Q: What is Psychiatrist?

A: Psychiatrist is a game in which one person, the psychiatrist, leaves the room, and all of the other players agree on a common delusion (such as believing themselves to be the person immediately to their left). The psychiatrist then enters, and asks the players questions, attempting to guess the delusion.

Q: What is spoon photography?

A: Very well known.

Q: What is Janra Ball all about?

A: Wouldn't you like to know?

Q: Why did you answer my question with another question?

A: How else could it be?

Q: What are the teams like?

A: Highly variable, and not necessarily mutually exclusive.

Q: How do I get ahead in the game?

A: Mu.

Q: Why won't you give me a straight answer to my questions?

A: Come, come. Aren't there much more interesting ways to grok the game?

## Ingredients

Springfield, Monty Python, Calvin-Ball, body language, Harlem Globetrotters, sideways logic, Thieves' Cant, intuition, counter-intuitive segues, spoon photography, creativity, Zen koans, Psychiatrist, adrenaline, perception, tickling, urban legend Spam recipe, swallowing a pill, illusionism, modern physics, raw chaos, F.D. & C. yellow number 5.

# **Jobs for Theologians**

## **HAFD University Consolidated Department of Theology and Geology**

Is looking for adjunct professors. The ideal candidate will possess excellent written and oral communication skills, have a strong teaching record, be flexible, and be open to exploring the relationship between igneous, sedimentary, and metamorphic rocks as compared to faith, hope, and love as theological virtues.

If interested, please fax CV along with letter of application to (888) 555-1212 or visit our website at <http://hafd.edu>.

**HAFD University**  
**Department of Medieval**  
**Studies**

Is looking for a full-time tenure track professor with interest in the high middle ages and theology from an elfin perspective; the ideal candidate will be fluent in relevant languages including Elvish, be able to convey what exactly the refinement of elfin culture means in theological discourse, and be comfortable lecturing outdoors under moonlight while wearing chainmail.

If interested, please fax CV along with letter of application to (888) 555-1212 or visit our website at <http://hafd.edu>.

## **HAFD University Office of Internet Degrees**

Is looking for adjunct professors and is scraping the bottom of the barrel. The ideal candidate will have an independent stream of income, a first-class PhD, and be excited to have a dead-end job while doing other people's gruntwork.

If interested, please fax CV along with letter of application to (888) 555-1212 or visit our website at <http://hafd.edu>.

**HAFD University  
Office of Ecumenical  
Relations**

Is looking for theologians willing to study the Archdruid of Canterbury. The ideal candidate will have a thorough grounding in the classic Christian tradition as expressed in the Anglican branch of the Church in dialogue and synthesis with contemporary expressions of bardic and druidic lore.

If interested, please fax CV along with letter of application and a sprig of mistletoe to (888) 555-1212 or visit our website at <http://hafd.edu>.

**HAFD University  
Office of Newer Classics'  
Translations**

Is looking for a scholar to produce a fresh translation of *Einführung das Christentum*, a foundational *Grundkurs* by the Rev. Dr. Karl Rahner, SJ.

The ideal candidate will hold PhDs in disciplines including Systematic Theology, Philosophy with attention to philosophical logic and philosophy of science, German, English, Linguistics, Cognitive Science/Psychology with analogies drawn from Human-Computer Interaction, Education, and *A Partridge in a Pear Tree*; and will have done prior work making translations of Rahner into English that do not leave the reader wishing for further English translation.

If interested, please fax CV along with letter of application to (888) 555-1212 or visit our website at <http://hafd.edu>.

# Joining the Holy Mountain (I Hope)

## **Joining the Holy Mountain**

There are a few things I am known for, at least by a few people, but many people know me as an Orthodox Christian author with a website originally founded a couple of years after the web itself (this site), or [my collection of books](#), the chief work of mystical theology being [The Best of Jonathan's Corner](#) (4.6 stars on Amazon), and the chief polemical work being [The Seraphinians](#) (at 1.3 stars).

I've written a lot over the years, and I have seen more and more good in my failure to earn a PhD in math (UIUC) or theology (Cambridge, Fordham). Not that I have had a successful business career in information technology; I've had enough success to pay off my student loans, but there is such a thing as brainsizing, and there is something of a "square peg, round hole" effect for a profoundly gifted employee trying his best to fit in as an

interchangeable part in the team programming model that has become the industry standard.

Now I am turning my attention to something I should have done much earlier: the reform school of monasticism. Now one of the requirements to be a bishop is to be a monk, and I am hoping for help continuing to repent of such ambition, partly for reasons outlined in [A Comparison Between the Mere Monk and the Highest Bishop](#). I am seeking not rarities but the salvation of my soul, and some monks have said that they began to make progress fighting sin and passion after twenty to thirty years. **I want to reach eternity having spent as much time as possible in the monastic journey of repentance.** Whether I would reach any ordination beyond being made a simple monk, or miraculous powers, is not my concern. My concern is that my soul is in ruins and I need such things as monasticism provides. The only real qualification for either of the rare distinctions I mention is that I have experience bearing heavy crosses: I switched disciplines to academic theology while fighting cancer. I'm not now in a good place spiritually.

I am looking for money to use to travel to Mount Athos. Certain things have not been defined yet, but I am essentially seeking travel expenses before taking a vow of poverty.

As regarding how much you might give, some people would simply ask for generosity. I would ask in a certain sense for generosity, but that is not exactly how I would ask. What I would ask would be: **Pray**, and then give little or much money, or simply prayers, as it seems best in your heart. I was going to offer to give a signed copy of [The Best of Jonathan's Corner](#) for people who give \$100 or more (and have a physical mailing address within reach of media mail), but even if that would get

me more money, I do not consider that desirable. Christ is extraordinarily clear that a widow who very quietly donated her entire wealth—two of the most worthless “coins” you could find—donated more than all the gifts surrounded by loud fanfare of rich people giving out of things that they don't need. If you pray and it seems best in your heart to donate \$2, I don't want to make that \$20.

I do not know when I need the money; I have made the first formal step towards requesting to join the Holy Mountain, and I have waited a while and am still waiting. If and when I know more specifics, or the Holy Mountain rejects me, I will post an update. (If Mount Athos rejects me I will try my best to pursue monasticism elsewhere.)

As regards the question “How thankful you will be,” I mean in entire literalism, “Eternally.” I need a spiritual hospital like the Holy Mountain, and this may make a difference between Heaven and Hell. It is said that you can only get to Hell on your own steam, but I have plenty of steam. If I find a saving spiritual hospital on Mount Athos, I will be grateful to you for the rest of my life, and pray for you thereafter.

[Donate to travel expenses](#)

# Jonathan's Canon

Below is the corpus of writings that I have read so far and would most quickly recommend to others, on a basis of theological or philosophical merit and personal impact. The books, series, etc. are alphabetized by title (not author), and exclude two areas: first the [Bible](#), because that Canon is prior to and infinitely greater than my canon, and second, my own writings, which I believe others should be the judges of. The boundaries are hazy — I'm sure that your favorite book not on the list is better than your favorite book off the list. All entries should be assumed to be books unless stated otherwise.

Looking for a good book, for me, is a quest a little like a detective's searching for clues: anything that can be anticipated is not it. It is like a good surprise birthday present: you know it when you see it, but anything you can anticipate is not it. (In that regard, it is like a foretaste of Heaven: eye has not seen, ear has not heard, nor any mind conceived what God has prepared for those who love him.) The list should grow longer as time progresses.

I told a friend once that I thought that some things would be a lot better if theologians would do all the apologetics, and apologists would do all of the theology. I'm not sure how to explain that remark (beyond asking people to think about it and

let it sink in), but I often get more out of lesser works than greater. I am not including Thomas Aquinas's [Summa Theologiae](#) on the list, for instance, because I got less out of reading it (in abridgment) than out of reading Chesterton's [Orthodoxy](#), and less out of reading parts of Dante's [Divina Commedia](#) than C.S. Lewis's [The Great Divorce](#). Maybe when I have matured more I will be ready to read some of the greater works, but now I usually learn best at the hands of the lesser masters. My judgment has certainly bothered people; the aforementioned friend was quite surprised when I gave high acclaim to Titanic, and he eventually said, after seeing what I saw in it, that my reading was so beautiful of a reading that he almost hesitated to attribute it to Kirk Cameron. Many of these works are lesser classics; I am aware of the greater classics, but have not learned much from most of them. Readers who enjoy this list may also like to see my [favorite haunts](#) on the web.

### [The Abolition of Man](#), by C.S. Lewis

An excellent and concise description of what Western culture is trying to do, and what will come of it.

Abortion: A Failure to Communicate.

On Saturday Night Live, the announcer said, "Kenny G came out with his new Christmas album. [pause] Happy birthday, Jesus. I hope you like crap!"

Being aloof from popular artists, it took me a while to realize that Kenny G is not a Christian artist. Most of what goes by the name of Christian is intellectually and artistically worthless, in a sense a blasphemy against the Creator who lovingly and lavishly created no two blades of grass alike. In looking through Christian this and Christian that on the web, it was a very refreshing pearl amidst a

desert of sand. This was the first good Christian article I found in a long while.

[Addicted to Mediocrity: 20th Century Christians and the Arts](#), by Franky Schaeffer

This book provides an excellent analysis of bad philosophy as it leads to an impoverished culture — dealing with how utilitarianism (leaving the obvious critique related to pursuing only means and never ends) has nearly killed one aspect of the imago dei in our culture. A good and accessible read to anyone concerned with philosophy, art, or culture.

[Amusing Ourselves to Death: Public Discourse in an Age of Show Business](#), by Neil Postman

After I read this book (a quick read, in contradistinction to Jerry Mander's weightier and slower [Four Arguments for the Elimination of Television](#)), I've never looked at a TV the same way again. This would be a good candidate for the first book on this list to read, because once you've read this one you'll find it easier to break away from television's accursed spell and read other books and otherwise experience life.

There's something that must be said for television. It must be said, because it cannot be printed.

[All Men are Brothers: Autobiographical Reflections](#), by Gandhi

This book, and in particular the chapter entitled, "Ahimsa or the way of nonviolence," provided a large part of my real beginning in understanding peacemaking, and the loose prototype for [Blessed Are the Peacemakers: Real Peace through Real Strength](#). It's largely a collection of excellent quotes, and well worth reading to anyone asking the questions concerning violence and peace.

[The Best Christmas Pageant Ever](#), by Barbara Robinson

C.S. Lewis said that children's books should be good enough for adults, and that children's books which aren't good enough for adults won't be any good for children, either. All of the best children's literature is good for adults, and this book in particular is interesting, funny, and truly profound. (Something similar, incidentally, might be said for Dr. Seuss's [How the Grinch Stole Christmas](#).)

[The Book of Heroic Failures](#), by Stephen Pile

This book I debated putting in, but I decided for: first, because when I read it I laughed so hard I cried and could barely talk, and second, because it does help to come to terms with a side of being human that most of us find a smidgen embarrassing.

Changeling: the Dreaming

Reading about this game (which I could not play in good conscience, incidentally), was one of the things I did that most pierced me with a glimpse of Heaven, as did [Pilgrim's Regress](#) and other places. To quote from the web site:

We are changelings, the forgotten ones, neither fully fae nor wholly mortal. The last of our kind on Earth, we have built ourselves an invisible kingdom. We are everywhere, yet you have never seen us. We hide, not behind some fragile Masquerade, but in plain sight, with the power of our Glamour. We exist within a real world of make-believe where "imaginary" things can kill, and "pretend" monsters are real.

This is an exquisitely beautiful description of the spilled religion that is Romanticism, and someone who drinks those drops may well imbibe deeper from the Chalice than someone who is careful to have his lips touch the chalice but makes

who is careful to have his lips touch the chalice, but makes no effort to take in the Drink inside. We are indeed members of an invisible kingdom, hidden in plain sight by the power of grace and prayer, and believe many things that the Kingdom of Darkness now calls imaginary. Reading this inspired a part of one of my writings:

On the web, I found a place set up by a woman who believed she was a fairy. At first, it weirded me out — but, the more and more I think about, the less it strikes me as strange. I don't mean that it's not wrong — I mean rather that it is far less wrong than many beliefs about which we've become blase'. The essential idea of a person who is really a fairy, and a world of wonder, a nature of beauty, and of magic, is in some ways very close to the truth of *imago dei*, of God's magnificent creation, and of prayer. It has its definite errors and omissions, but it is far closer to true than the idea of a person as only a material body, of nature as only a particular configuration of subatomic particles, of the supernatural as only a figment of human imagination and superstition. The beliefs around fairies would make the basis for an excellent parable, of which a crude rendition is as follows:

Once upon a time, there was a village of men, that was on the border of fairy-land. And some people saw fairies, but some lived lives that were dull and dreary.

And the god of nature, who was the prince of the gods, entered this village and began to take men and women into his arms, embracing them and kissing them. And when he kissed them, he made them into fairies. And he took them, and taught them to dance, a wild,

merry, pagan dance with the trees and stars and rivers  
and lakes and flowers.

And the god cut through what was dull and mundane,  
and the leaders whose interests were in all that was dull  
and mundane were enraged and killed him. And yet all of  
their rage and unbelief and violence, even death itself,  
could not keep him. Before he was killed, he gave the  
fairies to eat his flesh and drink his blood, that he  
might live in them and they in him, and after he was  
killed, he rose in a surge of the indestructible life that  
was within him.

And now, he has left that he might be everywhere —  
in men, in the stars, in the trees, and enchant them with  
his magic, that they might dance also, and he abides and  
is found inside each fairy, and empowers them to kiss  
others with his kiss and draw them into the circle of  
life, that they also might become fairies, living the life  
of the nature god, weaving his magic by which the entire  
universe pulses with life, carried about by song and  
wonder, and dancing the great dance.

And he has designs yet unveiled — to bring an even  
greater perfection to the nature, the fairies, the magic,  
the dance, the embrace.

And the story is unfolding even now.

[Christian Letters to a Post-Christian World](#), by Dorothy  
Sayers

An excellent collection of essays, beginning with a  
beautiful satire entitled, "The Pantheon Papers"

[The Chronicles of Narnia](#), by C.S. Lewis

These seven books are excellent children's literature,

and storytelling that tells the most beautiful story through fantasy. I have always been drawn to fantasy, because it draws out the wondrous and beautiful truths about our world — "The better you know another world, the better you know your own," (George MacDonald, [Lilith](#)) — and because good fantasy is a reflection of our world.

[Code Complete: A Practical Handbook of Software](#)

[Construction](#), by Steve C. McConnell

All of the really good books, in any field, are books of philosophy. This book is a book of philosophy in computer programming, but it is widely applicable outside of that field. Its central point is that computer programming is an activity done by humans instead of just an activity using computer, and as such it is not enough to know the computer's strengths and weaknesses, but also to know your own strengths and weaknesses. Some of its immediate content — how to choose variable names and lay out procedures so that you're less likely to run into certain bugs resulting from your short-term memory failure in designing the program — is only relevant to programmers, but macroscopically it would be valuable to anyone. A must-read for software engineers, and a should-read for everyone else.

[The Cost of Discipleship](#), by Dietrich Bonhoeffer

This is an excellent book; it is a good competitor to [Experiencing God](#) for the place of #1 recommendation, or more appropriately a good companion volume. This book shows what sola fide really means in terms of works, and the monumental importance of good works in a context of faith. Bonhoeffer repeats, as a refrain, "Only those who believe can obey, and only those who obey can believe." Works are like a sacrament — not human means of making ourselves

worthy, but physical conduits of God's blessing. Show Bonhoeffer your faith without works, and this martyr and mensch will show you his faith through his works.

[Darwin on Trial](#), by Phillip Johnson

Shortly after reading *Abortion: A Failure to Communicate*, I earnestly read all kinds of articles at [Leadership University](#),

happy to find high-quality Christian articles... and my estimation of the site dropped several notches when I saw articles with titles like "Darwin on Trial." It seemed that here, after a lot of mature thought, was a kneejerk conservative backsliding into fighting to restore six-day creationism and otherwise fight what good science said. One day, I actually read one of these articles I detested, and it blew me away.

What followed after that was a crisis, followed by a loss of faith — not in God, but rather in academia. I came to believe something I had long resisted — that Darwinism was established dogma, not because of its support in the evidence (existing scientific evidence being extremely hostile to any form of Darwinism that is both recognizably connected with Darwin's theory, and within spitting distance of being called a scientific theory), but because it provides an excuse for an explanation of how life could come to be without a Creator.

[Darwin's Black Box](#), by Michael Behe

[Darwin on Trial](#) gives a broad overview of scientific evidence concerning Darwinism. [Darwin's Black Box](#) provides a focused and in-depth look at one very specific biochemical mechanism. I didn't find it quite as fascinating as the former, but it's definitely worth reading for people who like intricate clockwork and complexity. An engineer should like

it.

[The Devil's Dictionary](#), by Ambrose Bierce

This classic of satire contains a number of extremely funny definitions (my personal favorite defined rum to be "generically, fiery liquors which produce madness in total abstainers"), and is poignantly insightful as to the shortcomings of American Christianity. It was the basis, and provided the model, for [Hayward's Unabridged Dictionary](#). Its cynicism is something to be wary of, but beyond that it is a classic of wit and refreshingly blunt honesty.

[The Disappearance of Childhood](#), by Neil Postman

I plan on re-reading this book if and when I get married, have kids, and my eldest child reaches the age of three. It deals with the themes of other books, plus a harmful blurring of the line that separates children from adults. If you care about children having a real childhood, you should probably read this.

*The Empty Self: Gnostic Foundations of Modern Identity*, by  
Dr. Jeffrey Burke Satinover

Gnosticism is the most ancient of heresies, and one of the deadly poisons infesting the Church. (I am using 'heresy' in its ancient sense of "a fatally flawed idea that is as damaging to the believer as is a belief that arsenic is healthy food", not in the modern sense of "an excellent idea which narrow-minded society benightedly condemns.") This provides an excellent introduction by which to know and avoid it.

[Experiencing God: How to Live the Full Adventure of Knowing and Doing the Will of God](#), by Henry T. Blackaby and Claude V. King

This book articulates deep lessons about listening to God

and obeying him. It comes highly recommended.

Fairy Tales: [At The Back of the North Wind](#), [The Complete Fairy Tales](#), [The Day Boy and the Night Girl](#), [The Golden Key](#), [The Light Princess](#), [The Lost Princess](#), [The Princess and the Goblin](#), [The Princess and Curdie](#), by George MacDonald.

C.S. Lewis said that he fancies he never wrote a story that did not in some way borrow from MacDonald, and it was MacDonald who served as his mentor in [The Great Divorce](#).

These different fairy tales are profound, moving, and some of the deepest literature I know. They are rare gems equally appropriate to children and adults.

[Father Arseny, 1893-1973: Priest, Prisoner, Spiritual Father : Being the Narratives Compiled by the Servant of God Alexander Concerning His Spiritual Father](#)

This book shows how the light of Heaven shines in the darkest situations. Father Arseny was a survivor of the brutal "special sector" death camps of the Stalinist regime, and is the kind of person who can light a candle in the darkest corner of Hell. One comes away from this book feeling, not the atrocity inside and outside of the brutal Stalinist death camps, but a good that could shine even in those circumstances. I highly recommend it.

[Fearfully and Wonderfully Made](#), by Paul Brand and Phillip Yancey.

This book, written by a doctor, explores the beauty and power of the human body, and by analogy the body of Christ.

Chapters 15 through 18 awakened me to the goodness of touch — hugging me used to be like hugging a board, but I now have a very present and powerful touch. It was because of them that I wrote [A Treatise on Touch](#). A very beautiful and thoughtful book.

[First Things: A Journal of Religion and Public Life](#)

This journal is about putting first things first, as described in the opening editorial. It has substantial and intellectually mature treatments of many of the issues of our day. If you like it, you might consider subscribing.

[Four Arguments for the Elimination of Television](#), by Jerry Mander

Neil Postman presents one good argument as to why television is not the best thing since sliced bread. Mander presents four, developed at greater length. There is less of a lively pace, and the argument gets weird some of the time, but it still produces thought-provoking and serious arguments as to why television should be eliminated. Among the excellent comments may be found, "The programming is the packaging; the advertising is the content." If you watch more than an hour of TV a week, take half an hour of your regular TV time and devote it to reading this book.

[45 Effective Ways or Hiring Smart! How to Predict Winners and Losers in the Incredibly Expensive People-Reading Game](#), by Pierre Mornell, et al. (Author has also written another excellent title, for job hunters: [Games Companies Play](#))

Written for people who hire others, this is a book on how to read people. It seems to me to do a good job of living up to its rather large title.

[Foundations of Cognitive Science](#), ed. Michael A. Posner

This is my favorite textbook; it presents an interdisciplinary field, cognitive science, and is fascinating reading.

[Galileo, Science, and the Church](#), by Jerome J. Langford

I make it a personal rule not to recommend a book I haven't read, and this book justifies breaking that rule.

I, and I suspect you, have heard in science classes a moral fable about a heroic natural philosopher named Galileo who was martyred by the evil, oppressive, and censorious Church. It is a beautiful story — showing, as well as any morality play, that being a scientist is good, and the Church and its concept of orthodoxy are demospawn (sentiments that are echoed in, for example, the [Oxford Companion to Philosophy](#) having an entry for persecution of philosophers, but no reference to persecution by philosophers — not the faintest reference to the bloodbath that culminated the siecle des lumieres with cleaning ladies and eight year old children guillotined as much as clergy and statesmen, with patriots standing at the foot of the guillotine to be sprayed by the blood of the unfortunates and then eat their still living flesh; nor any reference to the hundred million lives lost, and the blood that has flowed like a river every single time people have taken Marx's philosophy as a good basis for a political order). But the Galileo fable has no connection with fact.

Among other points may be mentioned that Galileo scientifically produced garbage — no experimental data and no particularly good interpretation of those results — that Galileo was friends of the Pope but alienated him and made a number of enemies by being a jerk, and that Galileo was preceded in his heliocentrism by nearly half a century, and that by a cardinal. The only reason the story is told is as part of the process of brainwashing people to worship science and despise the Church.

[The Game](#) (movie)

Q: What do the following three things have in common?

- A joke.

- A Zen koan.
- The book of Job.

A: They all share something with [The Game](#), and the effect in that movie is stunning.

Gather (hymnal)

This is a lively, modern hymnal of the sort that achieves several dishonorable mentions in [Why Catholics Can't Sing](#).

That stated, it has a number of songs that I cherish and that were new to me, including "Canticle of the Sun," "Gather us in," and "The City of God."

This is the songbook used by Koinonia at the Newman Foundation at the University of Illinois, and for that reason I cherish it — I purchased a copy when I had almost no money, just to be able to have those songs. I used a few of its songs to improvise on in my second recorded tape.

[Getting to Yes: Negotiating Agreement Without Giving In](#), by Roger Fisher et al.

This is, as far as I know, the best book for dealing with conflicts where another party and you can't yet agree on something. I don't think that this is the substance of life, but conflicts are bound to happen, and knowing this book will be immeasurably helpful in dealing with some conflicts.

[Gödel, Escher, Bach: An Eternal Golden Braid](#), by Douglas E. Hofstadter.

This book is one of the most stunning displays of intellectual fireworks I have read. It relates art, music, stories, and mathematics, along with wit, witticism, and clever dialogues. It started out as a little pamphlet, and Hofstadter soon realized he was writing more than just a pamphlet explanation of Gödel's Incompleteness Theorem.

[The Great Divorce](#), by C.S. Lewis

This is just a great book, useful for nurturing the reader in Christian wisdom — and one of the most beautiful I've ever read. I got a lot more out of this than out of the parts of [La Divina Commedia](#) that I've read.

[Guiding the Gifted Child: A Practical Source for Parents and Teachers](#), by James T. Webb et al.

Being very smart does not just mean more of the same kind of intelligence most people possess; it means possessing a different kind of mind. When I first read this book, it seemed to me to be part of the cult of giftedness; my estimation has since changed to recognizing a special needs population, with its strengths and weaknesses, and providing insight into things such as an unusual sense of humor and special moral concerns.

[Heaven: The Heart's Deepest Longing](#), by Peter Kreeft  
Hebrews catalogues what a few giants of faith did, and then says (11:13-16, RSV):

These all died in faith, not having received what was promised, but having seen it and greeted it from afar, and having acknowledged that they were strangers and exiles on the earth. For people who speak thus make it clear that they were strangers and exiles on the earth. For people who speak thus make it clear that they are seeking a homeland. If they had been thinking of that land from which they had gone out, they would have had opportunity to return. But as it is, they desire a better country, that is, a heavenly one.

Christians have historically placed a major emphasis on Heaven and the hope that is there, and today Orthodox

believers give a high place to bringing Heaven down to earth. For beauty's sake, I wish to quote another passage, one that is very close to my heart (Rev. 22:1-5):

Then he showed me the river of the water of life, bright as crystal, flowing from the throne of God and of the Lamb through the middle of the street of the city; also, on either side of the river, the tree of life with its twelve kinds of fruit, yielding its fruit each month; and the leaves of the tree were for the healing of the nations. There shall no more be anything accursed, but the throne of God and of the Lamb shall be in it, and his servants shall worship him; they shall see his face, and his name shall be on their foreheads. And night shall be no more; they need no light of lamp or sun, for the Lord God will be their light, and they shall reign for ever and ever.

Kreeft's book could as well be entitled, "Heaven: The Heart's True Home." I consider it to probably be the most profound and one of the most beautiful books on this list, and would deeply recommend it. It both speaks of Heaven — the sort of reason why, on a young adult retreat where a getting-to-know-you question was "If you could visit one place, where would it be?", I answered in perfect seriousness, "Heaven," giving not a physical 'where', but an infinitely greater spiritual 'where'. It also tells how to listen with your heart — something very, very important in life.

[Heretics](#), by G.K. Chesterton

A part of being in a culture means a kind of blindness, a "How else could anyone think of it?" [Heretics](#) unmask the

blindness.

[How Should We Then Live? The Rise and Decline of Western Thought and Culture](#), by Francis Schaeffer.

This book is on par with [The Abolition of Man](#), providing a much more culturally in-depth treatment of how Western thought is falling. It is a deep and extensive writing, as well as a fascinating read. It deals with the interior schism between head and heart, something well worth escaping.

[How to Win Friends and Influence People](#), by Dale Carnegie

The title sounds positively Machiavellian, doesn't it? Don't let that deceive you. I prefer to talk with people who are trying to follow the principles in this book. It tells a lot about how to be a person others will genuinely enjoy being with.

[I Saw Gooley Fly](#), by Joseph Bayly

This book is a collection of short stories; the first one, from which the book takes its title, is about a college freshman who is a complete klutz, gets into all kinds of accidents, and can fly. Not fly an airplane or hang glider or kite, mind you; he can jump out of his third-storey window and sail over to the dining hall.

I read that story after my best friend Robin, who is quite busy, took the effort to type it up and posted the whole printout to a forum wall. It struck a deep enough chord that I poked around until I purchased one of two available copies from a suggested book dealers' network, by a friend who works at a used and rare bookstore. I recently read it, and am glad to have gone to the trouble to find it.

What's so impressive about this book? In a word, creativity. The stories are as creative as Dorothy Sayers' "Pantheon Papers", but it's not just one work like that in a

book of essays (which are insightful and quite often creative, but do not fill the same literary niche). Someone who likes the creativity shown in my different writings may find [I Saw Gooley Fly](#) to be a rare treat.

Best odds for getting a copy? Probably inter-library loan.  
[Illiberal Education: The Politics of Race and Sex on Campus](#),  
by Dinesh D'Souza

This book helped me make sense of some of my own experiences, and offers an alternative analysis of racial tensions besides, "Continue with what we're doing, only more of it and faster!"

[In Celebration of Discipline](#), by Richard Foster

This book was given to me when I was baptized in Malaysia, and I am glad to have read it. It guides the reader on a spiritual journey inward, upward, and outward, in four disciplines each:

Part I: Meditation, Prayer, Fasting, Study

Part II: Simplicity, Solitude, Submission, Service

Part III: Confession, Worship, Guidance, Celebration

The note on the first page reads:

Presented to MR. JONATHAN HAYWARD on the occasion of his baptism on 13 JUNE 1993, by the Petaling Jaya Gospel Hall.

—Ephesians 3:16-19—

Ephesians 3:16-19 RSV reads:

...that according to the riches of his glory he may grant you to be strengthened with might through his Spirit in the inner man, and that Christ may dwell in your hearts through faith; that you, being rooted and

grounded in love, may have power to comprehend with all the saints what is the breadth and length and height and depth, and to know the love of Christ which surpasses knowledge, that you may be filled with all the fulness of God.

### Introduction to Eugenics, booklet

This booklet, which struck me as too weird to be true until I actually did some research, is something I haven't been able to find online, but I believe there are probably some good books on. Nutshell is that the eugenics movement is alive and well, appearing under various masks such as Planned Parenthood: Margaret Sanger, the organization's founder, being openly and actively interested in reducing the number of black babies born — though her successors are much better than that, and instead work on having abortion clinics situated well to take on charity abortions ('situated well' meaning 'in minority neighborhoods'). The belief in a population explosion (which is a bit absurd, if you think about it: why should population growth in third world countries suddenly meet such astronomical growth after being more or less stable for millenia, and why is apocalyptic overpopulation still approaching despite repeated and careful predictions for the doomsday which have come and gone) is listed as a major eugenic success.

### [The Joy of Mathematics](#), by Theoni Pappas

When I tell people that I'm a mathematician, the reaction is usually some mixture of one or more of awe, fear, and pity. They've had a couple of bad math classes, and therefore they figure that a math major experiences a concentrated form of such torture. Nothing could be

farther from the truth, and this book explains to a non-mathematician what joy and beauty lie in such a profession.

[Kevin Trudeau's Mega Memory](#), by Kevin Trudeau

Long ago and far away, people had memories that were prodigious by our standards; in Somalia, a large minority of educated men have memorized the Koran—without knowing Arabic. There is a proficiency in using memory that is mostly neglected here, and it can be useful. As I write, I'm using the basic technique to keep with me about twenty distinct points in an hour-long speech.

I'm at a disadvantage using these skills; they work best for a concrete mind rather than a very abstract one like mine. You may well find it easier to use the techniques than I do, and I still find them useful. Kevin Trudeau's book is one of several practical how-to books, and knowing even some of it is useful.

Labyrinth (movie—out of print, check an older rental store)

This fantasy movie is visually exquisite, and has the penultimate scene in M.C. Escher's "House of Stairs".

Morally, it is the only movie I can recall seeing whose villain really tempts someone instead of shooting at him; the story goes on and has more and more things fall apart; the heroine

keeps saying, "That's not fair!" — and finally says in her heart, "It's not fair, but I'm going to give it my determination and my elbow grease. I can identify with that; I have met difficulties I would not have imagined possible, and yet still I follow God — all the more powerfully, if anything. The term 'eye of the tiger' refers to a soldier who has been wounded and then returns to battle; there is no warrior so fierce as the eye of the tiger. I am in spiritual warfare the eye of the tiger, and this movie means a lot to

me.

[Leadership Is an Art](#), by Max DePree

I was calling random recruiters to send a resume... one of them was AC Recruiters, and (having seen many meaningless acronyms) did not guess that the AC stood for 'air conditioning', and was meant to place air conditioning repairmen etc. So I called, and had a pleasantly relaxed conversation, and he happened to know one guy in Homewood, "the best boss you'll ever have." He passed on my resume, and Lou (the head of the company) wanted to meet me. I asked him, "What's the title of that book he's so enthusiastic about?", and when he told me "Leadership Is an Art", checked out a copy to be able to read it and be prepared for the interview... and checked it out, and found that it was solid gold. It is the most humane and moral — not to mention effective — form of capitalism I have yet seen, and I would like to work under it. Lou, acting out the principles in this book, had a sign at the front door saying, "Welcome Jonathan Hayward", and we talked for over an hour.

This little book could be summarized as the Sermon on the Mount applied to business.

[Leadership University](#)

This site is an anthology of a lot of the best stuff on the web; it is worth at least a week of reading. It was where I found *Abortion: A Failure to Communicate*, and other gems.

*The Lefthander Syndrome*, by Stanley Coren

Apart from trying to make left-handers into another angry minority (a cure which is worse than the disease), this is a fascinating book about left-handedness.

*Listening, A Practical Approach*, by James J. Floyd

The art of communicating well consists far more in being a good listener than in being a good speaker. Few people want someone to talk to them; many people want someone to listen, and then share a something afterwards. A short and valuable read.

[Love is Stronger Than Death](#), by Peter Kreeft

This book looks at love first as a stranger, then as an enemy, then as a friend, then as a mother, then as a lover: each mask worn must be looked into and embraced until it dissolves and shows the next mask. The last mask to come off reveals the face of God. This is an excellent companion to [Heaven: The Heart's Deepest Longing](#); we live in a pain-killing culture that is terrified of facing death, and this book provides a mature and thoughtful invitation to come, and see what death is. I found it to be very moving.

[My Utmost for His Highest](#), by Oswald Chambers

A classic.

[Never Alone: A Personal Way to God](#), by Joseph Girzone

This is a gentle book, that may introduces spirituality to people who cannot see God because of pain caused by perversions of religion.

[Origins](#)

This is an on-line equivalent to [Darwin on Trial](#), [Darwin's Black Box](#), and [Reason in the Balance](#); it contains a number of good articles, some by Johnson and Behe, and is a good resource. It's run by the same people as [Leadership](#)

[University](#).

An Orthodox Prayer Book

I wish I could put the print version of a prayer book like this. Alas, this book is hard to find in print.

[The Orthodox Way](#), by Kallistos Ware

This describes the Christian faith with fingerprints on it. It has the kind of beauty of a very personal touch, not only because of the mystical author, but much more because the author brings in the fingerprints of his tradition.

[Orthodoxy: The Romance of Faith](#), by G.K. Chesterton

After Chesterton wrote [Heretics](#), someone asked him, "If that is what we shouldn't believe, what should we believe?"

After a moment, he said, "I am going to write a book about that." So he wrote [Orthodoxy](#)

[Out of the Silent Planet](#), by C.S. Lewis

This is an enjoyable read about a fantastic journey to another world.

[Participant Observation: Step by Step](#), by James P. Spradley

This is an anthropology text, but some of its concepts have broader application.

[Pensées](#), by Blaise Pascal

Qu'est-ce donc que nous crie cette avidité et cette impuissance, sinon qu'il y a eu autrefois en l'homme un véritable bonheur dont il ne lui reste maintenant que la marque et la trace toute vide, qu'il essaye inutilement de remplir de tout ce qui l'environne, en cherchant dans les choses absentes le secours qu'il n'obtient pas des présentes, et que les unes et les autres sont incapables de lui donner, parce que ce gouffre infini ne peut être rempli que par un objet infini et immuable?

What then does this avidity and powerlessness cry out to us, if not that there was once in man a true happiness of which nothing remains save the quite empty mark and trace, which he futilely tries to fill with

everything around him, looking in what he does not have for what he does not find in those he does have, and which either one is incapable of giving him, because this infinite void can only be filled by an infinite and immutable object?

Pascal knew a haunting romance as well. Food for thought.

[Perelandra](#), by C.S. Lewis

The sequel to [Out of the Silent Planet](#), this describes the main character brought to a sinless world to be his representative as the sinless Eve was being tempted.

[Phantastes](#), by George MacDonald

This is a faerie romance for adults. It was my favorite book for a time, and reading it let me know that I could write [A Dream of Light](#).

[The Pilgrim's Regress](#), by C.S. Lewis

This allegorical defense of Christianity, Reason, and Romanticism was Lewis's first writing after his conversion: a little rough around the edges, but a good writing. Lewis knew romance's haunting as well.

[Please Understand Me II: Temperament, Character, Intelligence](#), by David Kiersey

I have read both [Please Understand Me](#) and [Please Understand Me II](#) on the suggestion of a reader, and thought considerably about whether one of these texts should be included. The case for inclusion is that they offer an invaluable enrichment to interpersonal understanding, and for reasons I explain below, one beyond the benefit offered by standard descriptions of the sixteen Meyers-Briggs personality types. The case against it is that it is woven through and through with a very destructive philosophical

error, one that appears humane and reasonable on the surface and at the core is a far worse poison than racism. If I knew an alternative, a book that would offer the same insight without mingling it with poison, I would include that; not knowing of any such alternative, I think I will recommend it with a warning.

The idea of the sixteen personality types based on four personality dimensions is one of the best things to come out of Jungian psychology — the only one, for that matter, that I have encountered which is separable from Jung's Gnosticism — and Meyers and Briggs created a tool that allowed most people to get a good quick-and-dirty result that would help them to understand themselves better. The good thing about a book about the sixteen personality types is that it allows people to read about their own types, and quite probably come to understand themselves better. The bad thing about such a book is that it provides too much information to be assimilated or navigated by the casual, nonspecialist reader. The reader's type, read with interest, is quite probably the one personality type that will be remembered. Maybe one more for spouse, if the reader is married — but not sixteen. Sixteen are too many to keep track of.

Enter [Please Understand Me](#). This book provides a road map, connecting Meyers-Briggs personality types with the four classical temperaments. Each temperament is a cluster of four similar personality types, and the four temperaments provide a much more manageable learning feat. I at least walked away from both books with a clear understanding of all four temperaments, not just my own. The books do treat all sixteen personality types, but within the context of a

coherent and manageable framework. The reader is likely to walk away from either book with a far better picture of human variation than from any straight description of the sixteen personality types.

That's the good news. What's the bad news?

Errors often come in diametrically opposed pairs — such as legalism and libertinism. C.S. Lewis said that the Devil always sends us errors in pairs — he wants our extra hate for one to pull us into the other. The pair of errors I am concerned with here is as follows:

There are no legitimate personal variations. Every difference is a matter of right or wrong. Everybody should strive to adhere to every standard I want to adhere to.	There are no matters of right or wrong. Every difference is a legitimate personal variation. No person should apply any of his standards to anybody else.
---	---

I am not going to tell you which of these errors is worse; I am not going to say which is the real error to be aware of.

As C.S. Lewis pointed out, that's exactly what the Devil wants. He wants us to be so focused on how bad one of those errors is that our extra hate for it will suck us into the opposite — like the pickpocket duo where one member urgently warns you about a spilling cup of coffee so that you won't notice that the other has stolen your wallet. Like *extreme heat and extreme cold* they are quite different

extreme heat and extreme cold, they are quite different from each other, but both extremes produce the same undesirable result: they make you quite thoroughly dead.

I am not going to tell you which of these errors is worse, but Kiersey is. He succumbs to the temptation. Kiersey bewails one error and uses its awfulness to lure the reader into the other. From a theologian's perspective — or from a demon's, for that matter — it doesn't particularly matter which is which. In this case Kiersey bewails the error on the left, luring the reader to embrace the error on the right. He makes no distinction between preferences in matters keeping to a schedule vs. open-ended playing by ear, or keeping a neat vs. creatively disorganized house, and choices in matters such as embracing faith vs. delving into the occult, or chastity vs. lust.

The treatment of sexual practices in [Please Understand Me II](#) deserves particular note. I was going to say that the text makes no distinction between sexual purity and promiscuity — but then I realized that that is not quite correct. It is certainly true that one temperament's tendency towards sexual promiscuity is described in respectful, nonjudgmental terms — and that two other temperaments' tendency to do what they choose whether or not contemporary society approves (that is, whether or not it violates the consensus of the Natural Law shared by innumerable times and places — save that the choice of loaded language leads the reader to regard these standards as arbitrary and parochial). When, however, one temperament at least tries to be abstinent before the wedding and faithful after, it is described in language that appears to be neutral, nonjudgmental and "just the facts,

Ma'am" — and somehow manages to describe this purity in what I consider to be the most degrading language in the text. It calls to mind the maxim, "Where orthodoxy is optional, it will sooner or later be proscribed." Chastity isn't exactly proscribed, but it is a mark of talent to be able to appear to be impartially and nonjudgmentally reporting the facts and still paint a picture that's that unflattering. There is no hint in the text — in the chapter on mating or anywhere else — of the freedom and joy of sexual union between a husband and wife who offer each other their virginities on their wedding night and choose to be faithful thereafter.

I would like to elaborate a little more about what I said about this being a worse poison than racism. I wasn't just making a poetic exaggeration, like someone who comes in during the summer and says, "It's hotter than Hell out there!" I was making a literal statement. I am a white male — and if racism is not defined as "the prejudice of whites against blacks and other minorities", then my tenure as an American in a non-Western nation at a time when anti-American sentiment was running strong, my experience of (for example) having a careful and respectful question met with an angry rant, and other experiences of getting only the dregs left after those in power had considered how to meet the needs of those types whom they considered worth caring for, gives me at least a limited basis to know, by experience, that racism is nasty. Even after this, I do not believe that racism is the one unpardonable sin, the sin against the Holy Ghost, that it is presently made out to be. It is as if a person may be dishonest, may be coldhearted, may be arrogant and lazy, and he is like everyone else an imperfect person — but establish that he is really, genuinely,

and truly racist, and then he embraces the unacceptable. You think I exaggerate? For the next week, as you go about your life, count the number of times you encounter a communication from some group working "against racism," and the number of times you encounter a communication from some group working "against coldheartedness." I will be surprised if the 'working against coldheartedness' tally totals to a tenth as many as the 'working against racism' tally. For that matter, I will be surprised if the 'working against coldheartedness' tally is not zero.

It makes sense to say that a person is a smoker and is relatively healthy. Cigarettes do damage to any person's lungs, but it is possible to regard a person as being overall healthy despite the very real damage caused by smoking. In the same sense, it makes sense to say that a society is openly racist and relatively healthy. Not by any means that the racism is harmless — it causes real and significant harm.

But that harm can coexist with other areas of health. A society can be openly racist, can nurse grudges against other ethnicities, be they minorities or the denizens of other nations — and live on for centuries, alive and kicking. It is poison, but not all poison, not even all strong poison, is lethal.

The same cannot be said for poison found in [Please Understand Me](#). As a member of the host of ideas Lewis analyzes in [The Abolition of Man](#), no society can long embrace such ideas without destroying itself. Societies have taken such "progressive" views before — and then fallen apart. In addition, this idea appears a reasonable and enlightened idea, one that a person should be respected for holding — to say that you are for racism, on the other hand, is to instantly forfeit all claim to be taken seriously. Poison

that appears to be food will harm far more people than poison in a bottle clearly labelled, "Poison". For these reasons, I mean quite literally that one of the fundamental ideas woven throughout the text is worse than racism.

Having made this critique, I wish to say that [Please Understand Me](#) is a book worth reading, even with such a massive flaw — and I believe that the danger is lessened to a reader who has been forewarned. That I would list anything I believe to justify such a warning is meant as a recommendation.

There are two editions of the book: [Please Understand Me](#), published in the 1970s, and [Please Understand Me II](#), published in the 1990s. The second book is about twice as long, and talks about differences in kind of intelligence found in temperaments and personality types; the first book gives a very good feel for what people are like — experience of the world and actions. I am not exactly going to recommend one book over the other, so much as provide a helpful question: "Do you specifically want to know about mental competencies enough to read twice the length of material, or would you prefer a shorter piece that gives the same insight into most aspects of personhood but does not significantly treat intelligence?"

(Side note: I would not endorse [Please Understand Me II](#) as a resource for understanding multiple intelligence theory. It does not ask the question of "What are the basic kinds of human intelligence?" so much as "What are the temperaments and personality types, and what kind of intelligence may be associated with each of them?" It's kind of like a book on academic departments asking, "What are the academic departments in a university, and what kinds of

intelligence may be associated with each of them?" That would be a good resource on academic departments, but it's the wrong place to look if your goal is to understand multiple intelligence theory.)

[Prayer](#), by Richard Foster

An in-depth treatment of one of the most foundational areas of the Christian life. Giants of faith have said things like, "I am so busy that I cannot get on with less than two hours of prayer a day." This book is worth reading and following.

[The Recorded Sayings of Zen Master Joshu](#), by Shih Chao-Chou

This provides a collection of profound koans (illustrative stories), not concerned primarily with moral cleanliness, but with something that will sharpen and challenge almost any mind. It was after reading them that I wrote [Christian Koans](#).

[Reason in the Balance: The Case Against Naturalism in Law, Science, and the University](#), by Phillip Johnson

Darwinism is the cutting dullness of the sword being wielded against Christianity; the sword is named 'naturalism'. Johnson here provides a good and broad view that is well worth reading, especially for Christians in an academic context.

[Requiem: A Lament in Three Movements](#), Thomas Oden

About how modern theology has gone sour; interesting and quite honest. A must-read for anyone going to seminary.

[Saint Francis of Assisi](#), by G.K. Chesterton

This book is full of "magic from another real world;" it does a good job of telling the story of one of the most colorful saints in history.

[The Scandal of the Evangelical Mind](#), by Mark Noll

"The scandal of the Evangelical mind," Noll writes, "is that there's not much of an Evangelical mind."

This deals with the tragic story of how many people who really love the Lord and yet who are very far from loving God with all of their minds. An Evangelical equivalent to [Why Catholics Can't Sing](#).

[Seven Habits of Highly Effective People](#), by Stephen Covey

This is a practical and popular book, and it is practical and popular precisely because it does something deep.

[Sources of the Self](#), by Charles Taylor

This book provides a good history of the philosophers whose work has shaped our modern sense of identity. It's ponderous reading; I thought I hadn't gotten anything out of wading through it until I found myself referring to its concepts in a conversation.

[Stranger in a Strange Land](#), by Robert A. Heinlein

Heinlein was a sex-crazed libertine, anti-Christian, and deliberately wrote to be offensive. [Stranger](#) is the most monumentally flawed book I have read which I would even consider recommending to another person — and I have. This book is a deeply interesting book. I identify a lot with Michael Valentine Smith, and Charles Wallace in [A Wind in the Door](#).

[Tales of a Magic Monastery](#), by Theophane the Monk

I've given away a couple of copies of this book. Its stories are short, simple, and profound.

[Tao Te Ching](#), by Lao Tzu

Written millenia ago in China, this book is a collection of 81 poems (and the inspiration for me to write [The Way of the Way](#)). There are a number of insights about slowing

down and growing still, relying on God's grace, and other things...

[Technopoly](#), by Neil Postman

This book could be summarized in a single question: "Was technology made for man, or man for technology?" It has a number of valuable insights, and I would like to see a new edition published with an appendix about the Web. His insights about the detrimental side effects of technology, and the sorcerer's bargain involved in each. I wish Postman would write a book entitled, *The Luddite's Guide to Technology*, which would analyze different technologies and the advantages and disadvantages of using each, to help people decide when and where to buy what technological items — and suffer from the sorcerer's bargain as little as possible.

[That Hideous Strength](#), by C.S. Lewis

The conclusion of Lewis's space trilogy, and a good fairy tale for adults.

[Three Philosophies of Life](#), by Peter Kreeft

This book explores three philosophies of life: life as empty vanity, as developed in Ecclesiastes, then life as redemptive suffering, as developed in Job, then life as love and joy, as developed in the Song of Songs. It is a fascinating book, and the one that (after being lent to me) motivated me to check out other Kreeft books.

[Truth is Symphonic](#), by Hans Urs von Balthasar

A fascinating theological read about the beauty of diversity in the created order.

[Two-Way Prayer](#), by Priscilla Brandt

Reading this book helped me desire a prayer that is listening as well as speaking. People who like [Experiencing](#)

[God](#) might like it.

[What Color Is Your Parachute?](#), by Richard Bolles

This book is practical by remembering what people forget when they try to be practical. There's something shining that often dies in people; Bolles has helped me pursue work where that something shining is alive.

[Why Catholics Can't Sing: The Culture of Catholicism and the Triumph of Bad Taste](#), by Thomas Day

A Catholic equivalent to [The Scandal of the Evangelical Mind](#). This deals with truly awful Catholic music, and is of relevance to a whole lot more people than just Catholics.

[Why Go to Mass?](#)

A short article dealing with why consumer-oriented services are not a substitute for services designed ad maiorem Dei gloriam.

[A Wind in the Door](#), by Madeleine L'Engle

This book is special to me, both because of its imagination, beauty, storytelling, depth, imagery, description of kything, etc., and because I identify with Charles Wallace — in needing to adapt while remaining wholly myself, and in other things.

[Die Wolkenreise](#), a picture book by Sis Koch, with illustrations by Sigrod Heuck

This children's book was given to me by a very good friend after her trip to Germany, and it is one of the most beautifully tragic books I have read. Here is the rough paraphrase translation she gave me (as best I can reconstruct it from memory, the pictures, and a very rough knowledge of German — the pictures are exquisite, and the reason I am recommending the book):

Once the wind said to a cloud, "Come with me, let me  
blow you about, and show you the world!

"I will show you woods, hills and fields, and plains  
with wild horses and fields, cities, and even deserts,  
seas and mountain islands. I'll show you desert islands,  
coral reefs, and even more, all around the world."

The cloud said to the wind, "I can't do that. I have to  
go and make it rain."

[A Wrinkle in Time](#), by Madeleine L'Engle

The book introducing the characters in [A Wind in the  
Door](#).

# Journal of an Awakening

Tuesday 11/16/99

One week ago this day, something beautiful happened. I came alive spiritually. After some prayer and listening to the Spirit, I am endeavoring to write a journal of my experiences and lessons learned, perhaps to be of use to others who are at a time of dryness, or at least to be of use to myself when my love has grown cold. D.L. Moody said that he was like a leaky bucket, needing to be refilled again and again. In that regard, I believe he speaks for all of us, or at least me at any rate. There are times that I am very much spiritually alive, and times of being bleak and dull. (I don't mean the long, dark night of the soul where we seem to be in a desert wasteland without finding the God we earnestly seek, but are very close to the God who seems so far; I mean times where our love has grown cold, where we do not sense God and do not particularly seek him. The latter is where I was.) This journal starts today, and I do not know where it will end — my guess is that it will taper off when I next begin to drift from God, and/or there will be some point when I realize that I have not written anything in a while and it is now a closed book. Before that point comes, however, I think I have a lot to write.

With that done, let me first tell how I have come to this  
infusion of spiritual life.

---

I was walking outside and met a friend, and we talked. When he asked me how I was doing, I didn't have much to say, but mentioned a few thoughts I'd had. Then I asked him how he was doing, and he said that he had been feeling really close to God, and more aware of other people.

I hadn't mentioned, because it had been around so long, the emptiness I was feeling, and I became more acutely aware of how dry my own spiritual life had been, how mechanical of an exercise my [Bible](#) reading was.

That night, I was walking over to Wheaton's campus for Pooh's Corner (a group of people that meets to read children's books aloud). A long and slow-moving freight train was crossing the tracks. While I was standing and waiting, I thought about the conversation and my own dryness, and decided to work on my spiritual state when I got home.

—No, not when you get home. Now.

—Not now! I'm waiting for a train.

—Now.

I decided to do something then and there. But what? Initiative and power are all on God's side; there was nothing I could do that would accomplish closeness between God and me. So I prayed a simple prayer.

That moment, I was filled with joy and peace, deeper than I had known in a long time. I paced back and forth in that joy and peace waiting for the train — enjoying through them the simple little things: the walking, the sound of the train. Whatever I did, there was God.

I thought about Thérèse de Lisieux's little way (as depicted in the movie *Household Saints*), about resting in God's presence,

and of being in God's will in even the most simple places — even waiting for a train. At a low spot — when I medically can't work above half-time, and have an intermittent job not related to computers — and when used to thinking about serving God in spectacular and heroic ways, it was good to realize that. I went on to Pooh's corner, and enjoyed things there a great deal more. There were milk and cookies, and I enjoyed them in a different way than I usually enjoy food. I usually eat good food slowly and in little bites, to consciously savor its flavor — but I do not completely engage, or rather I am not able to let go of my disengagement. This time I was able to engage, and not just with the milk and cookies; I was also able to engage with the camaraderie and silliness.

When I create something (even something little), there is a first conception of the idea, then an incubation period where I let the idea ferment, then a time of implementation. The fermenting period is one which I cherish, and one which I had rarely experienced since a loss of creativity. I experienced it then. I also spent time worrying about the loss of the joy and peace, although I tried not to.

---

I am not sure how to begin; a lot has happened since then. My account will probably grow more linear and chronological as time moves on, but the account of the days before will probably be more by lessons learned and by theme.

The lessons I have learned have not in a sense been new lessons, in the sense of something I couldn't have articulated before, but I have owned and experienced the knowledge more deeply.

The first lesson has to do with the bread from Heaven, manna. It was divine nourishment, and it required trust in God. You couldn't gather extra for two days; it would spoil. However much you gathered, it was enough. These two principles I have found to apply to God's presence, and spiritual nourishment.

I struggle with wanting to have things under control, to know ahead of time what to do with my time (in small part to avoid boredom, and in large part to continue to be nourished and grow close to God), and God doesn't tell me. That is better for my learning to trust him, I think. God isn't giving me a programme to follow. He's giving me a relationship.

Wednesday 11/17/99

I've read that spiritual growth is slow and gradual, and I believe it is. Growth since that one mountaintop experience has been imperceptible. But here is a case of a sudden growth. I think that that is a matter of God working differently with different people, meeting each where he needs to be met. Perhaps next time his work with me will be entirely slow — I believe I am growing and changing, but God plans on a larger scale than one week.

---

Before that Tuesday, I was uniformly groggy. My emotions after then have been a little bit of a roller coaster — I've had some moments of bliss, and some moments of sadness. Now I am feeling groggy and perhaps a little depressed — although that's probably because I didn't get enough sleep. God has blessed me with emotions; now perhaps he is trying to wean me off of them. He saved me for himself, not for emotions. I hope that the good feelings won't end yet, though; I need to heal from pain. I ask that I may first have him, and then after that enjoy him through emotional blessings.

---

I have been reminded of, and appreciating, the way of the heart described in Brent Curtis's *Less-Wild Lovers: Standing at the Crossroads of Desire*, which I will summarize/condense here, and would highly encourage you to read:

There is within us a yearning for a sacred Romance, a haunting that won't go away. Art, literature, music have explored this Romance and its loss. It uncontrollably haunts through natural beauty, telling of something lost with a promise to return.

If this were all there was to it, that would be great — but it's not. The Romance has an enemy, the Message of the Arrows.

We once trusted in good because we had not known evil. Now we must trust in good, with full knowledge of evil. Our loss of innocence came through painful experiences we adapted to by wearing a false self.

The Romance appears through things — moonlight, a song — but those things will sear us if we think the Romance is in them. We can hurt ourselves by trying to capture the things through which Romance has shown, or we can hurt ourselves by trying to forget the Haunting, and resigning ourselves to the Romance's loss. This resignation sees good as not startling, but only "nice", and evil as normal.

In resignation we give up on the sacred Romance, but our heart will not give up, and we compromise. We become, and take, less-wild lovers.

God calls us to give up the less-wild lovers, embrace our nakedness, and trust in his goodness. We are at a fork in the road. The one path can only be seen for a short distance, and looks uncertain, unpredictable. Anxious, we have no good road map, but just snippets of travellers before: encouraging but frustratingly vague.

The other way looks straight and safe far as the eye can see, and signs promise success on the next leg if directions are precisely followed. We read one last note quaintly encouraging us to trust the goodness of the first path, and start on the route of discipline and duty.

We discover that we don't feel much of anything, don't connect with people. Our passions show themselves in inappropriate ways. Our heart is with us, journeying under protest. So we crush it with more activity — or let our heart have a secret life on the side. We arrive at Vanity Fair, peopled by deadness of spirit, lack of love, lust, pride, anger... We think this is as close to the Celestial City as we are going to get, and so set up shop and try to distract ourselves with the soul curiosities and anesthetics: [Bible](#) study, community service, religious seminars, hobbies... These are often good things, but misused to squelch our heart's longings.

Most of us fall into two categories vis-a-vis these less-wild lovers. There are those who anesthetize their hearts via competence or order (a clean desk, stellar athletic skills, impressive dinner parties, massive amounts of time reading Scripture), like a picture perfect wife who is always busy, admirably involved with the community, and is never really there to her husband. Her sadness says, "My heart is not available for anything that is not safe and tame. I am careful to avoid surprises that might upset my control, and if you were wise, you would, too." She tries to keep away the pain of the Arrows by sealing off those compartments of the heart that have been wounded. She may have grown up in an atmosphere too delicate to handle the weight of her unedited soul.

Others choose a different kind of control: indulgence. They

seek a taste of transcendence from non-transcendent sources: porn, obsession with sports, or living off our giftedness, which is like crack cocaine to our souls. They touch the heart-place made for transcendent communion without being transcendent, and shackle us: addiction.

Only unfallen communion will ever satisfy our desire, or allow it to drink freely without imprisoning it and us.

If God married to us experiences from the first group a legalistic controller, the second group is a harlot whose heart is seduced by every scent on the evening breeze. God says, "I love you and yet you betray me at the drop of a hat. Can't you see we're made for each other?"

God's love became even more wild, but we become and take on lovers that are less wild. We give up on being in a relationship of heroic proportions, and take what is smaller but under our control.

The indulgence looks better than anesthesia, but the passion must be fed by worship or use of the other and so does not leave us free to love. Its pleasure is part of the vanity of vanities.

The formulae that seem to control everything, do not offer wisdom about what to do with the depth of desire God has given us. If we try to anesthetize the desire, we become relational islands, and if we seek to indulge then familiarity breeds contempt and we must seek mystery elsewhere.

What, then, is the road less travelled, the way of the heart?

Perhaps, more than improving our habits, we are to invite Jesus into the aching abyss of our hearts. Internal discipline is valuable, but discipline imposed from the outside will be defeated. There comes a point when renewed religious activity is worthless. We must place our hand in God's, and relate in a personal way to him. We are drawn to and fear this intimacy.

We are once again at the crossroads. There is a chasm between us and Christ, but he beckons and promises a bridge.

We listen, but his words sound like many we should not have trusted. Some return to Vanity Fair, some close their eyes and take a step. We look in our valise, and pull words we disdained the last time we stood at a crossroads — now we see their truth.

We see that good can be trusted in, and that God is good. We see that to be free, we must allow ourselves to be haunted, surprised by goodness we cannot hold.

We fear to really ask for such bold movement from the wild God, and sit down, honest with ourselves. Vanity Fair never really has felt like home. We are captured by our less-wild lovers. We take the step into freedom.

We are clueless as to how we will cross the abyss, but we are glad to be on our way.

Thursday 11/18/99

Before my awakening, I was in a state of lethargy, and now I have begun to do too much. If doing some things is a part of spiritual recovery, it is easy to believe that doing more will be better — easy to believe, and destructively wrong.

After a number of activities last night, I felt a beckoning from God to lie down and be with him. I lay down, and made being with him one more activity — I was trying to do something to accomplish being with him. I felt a prompting to stop, and did, with hesitation — trying to let go, and beginning to succeed.

The next thing I knew, I awoke from a nap, wonderfully refreshed and filled with his presence.

---

Discipline is essential to spiritual growth, and there are several things I am doing as a matter of discipline: [Bible](#) reading, e-mailing prayer requests to my friends and praying for their prayer requests, transcribing the lyrics to hymns into a collection, and this journal. But the disciplines are for faith, not faith for the disciplines, and I have felt a freedom to not be bound too tightly by the disciplines. Yesterday I did not enter a hymn, and it felt wonderful.

---

One of the questions or doubts I have concerns my professional future. I have a master's degree in applied mathematics, with a computational science and engineering option, and want to work as a mathematician or at least a programmer. Use it or lose it skills are beginning to atrophy. I think it will be sad if I acquire this education and then never really use it — I am trying to hold that out, open to God to work with. It's his domain, not mine.

---

Friday 11/19/99

I was angry and not in a state to write, because my brother Joseph was playing a computer game with a very annoying sound track right below me, and prayed a little, then slowly entered and sang "O the deep, deep love of Jesus". That put me in the right state of mind to write again. (It reminds me of the passage in [A Wind in the Door](#) when Proginoskes tells Meg to recite the multiplication tables in order to get her thoughts straight to prepare for (or deal with, I don't remember which) the Mr. Jenkins trial.)

---

I visited my friend Robin, a few days after we spoke and that first spark was lit, to see if there were any words of wisdom that he could share with me, any direction or advice. I asked him what he had been learning, and he said a number of things. Nearly all of them were things I had reasoned out theologically, but there is sometimes a difference between reasoning out a truth as a doctrinal proposition and coming to own it, to breathe it. The lesson above about manna, for instance, was one I had thought out before (and I do not wish in the least to denigrate learning something intellectually. I am served very well by my intellectual knowledge, and I am worshipping God when I reason things out). But there was one he mentioned that hit me. Although I had reasoned it out, I am not sure how well I've assimilated it.

That has to do with where your identity comes from. The Christian's identity should come from Christ, and I realized that my identity in very large part comes from what Curtis would have referred to as competence — what I can do. I am very intelligent and have a number of talents, and when I think about myself... perhaps you could say that I have feet partly of iron and partly of clay. Being a Christian is a very large part of my identity, but so are the talents that I have. I realized a couple of days ago that many of my fantasies are about having some (usually odd) superhuman power, such as knowing the contents of all the books ever written, or speaking a thousand languages at a native proficiency. Those fantasies express something very revealing; they answer in some way the question of "What, in my heart of hearts, do I really believe would be an expression of who I would like to be?" Who you would like to be is usually an expression of who you are, a magnified and concentrated sense if you will. A

hint of how this is, might be shown in that a black man's fantasies will have him be a black man, and a white man's fantasies will have him be a white man: a black man does not become more of the essence of a black man by becoming white, nor a white man become more of the essence of a white man by becoming black. (I realize that this isn't the whole picture, but I don't want to add all the nuances now.)

The importance of "Who do you understand yourself to be?" might be observed in a fact about the early Christian Church.

The society they lived in was quite sharply divided and segregated by race, gender, and social status. Feelings of superiority and hatred were the norm; an organization like the KKK would not seem to people to be abnormal or disappointing.

In this context, there appeared what both itself and outsiders recognized as a new race: Christians. There really was not any longer Jew nor Greek nor barbarian, male nor female, slave nor free. People mingled across those boundaries, and a large part of this was because their identities were not "I am a free Jewish man," but simply "I am a Christian." (Martyr's Mirror records some early martyrs who, when asked their names, simply answered, "Christian.") People were still (for example) free African men, but the core of their identity, the core answer to the question, "Who am I?", was Christian.

I am not at that point yet. A large part of my identity comes from speaking French and ranking 7th nationally in the 1989 MathCounts competition, for instance. It has been very difficult for me to not have, or be frustrated in applying, or slowly be losing, some of those abilities. Those things are to be enjoyed and used, and are blessings from God, but... My friend Robin was able to say that he had realized that if he were to lose (for example) his computer abilities, it would be an adjustment, but it

would not be that difficult to go on; he would not have lost who he was. I'm not at that point yet. I think that (say) being paralyzed from the waist down would be an easier adjustment than having my intelligence move to an average level.

I think this is important, but I don't know what to do about it. Pray and be open to God, perhaps; he'll move on when he wants to, and maybe I'm not ready for that. God doesn't try to do everything at once; we couldn't take it. He works on us slowly and patiently; he isn't in a hurry.

---

There were a few insights I had theologically, and I thought about including them, but decided not to. This is a journal of how I am doing spiritually, not primarily a theological writing. (I think some of the above may have shifted too much to writing a lecture for readers from writing a journal as I grow close to God. I'll try to shift back.)

Saturday 11/20/99

I am starting to feel a bit burned out. I have been trying too hard to accomplish what is God's to do. So today I am taking a sabbath — keeping up my spiritual disciplines and the normal things of the Christian walk, but ceasing the heroic efforts to draw close to God. And tomorrow, Sunday, I hope not to resume those efforts I keep falling into, but simply to wait, open to however God may or may not surprise me.

---

Today has been a good day. I had a good, long, and unplanned conversation with my 14 year old brother Joseph. Deep, open conversations are something I have wanted and not had for a while. I've had people willing to talk and listen, but when the time comes I haven't found much to say. (That is frustrating — wanting to talk and having someone to talk with, but not to actually be able to say anything.)

I thought a bit about what Robin said — about being closer to God, and being more open to other people. I think the two are linked for him. I was able this time to be open to Joseph, to listen and engage when he was ready to talk.

One thing that I have been thinking with, out of this, is that I have been affected by the scientific method. The aspect of the method that is relevant here is that you reproduce initial conditions to bring about the same outcome — a matter in which the scientific method reflects human and even animal psychology. It runs deep in me, and it is something I have to let go of in this regard.

In spiritual life, I do not (at least on some scales) have an experimental apparatus before me to manipulate in order to get desired effects. The conversation I had with Joseph was a good conversation, but I know I can't bring about another such conversation by repeating what I did before this one. The more immature side of me would also like to have over again the experience at the train tracks, but I know that I cannot cause that to be repeated. God can, but I can't. These experiences are to be enjoyed, then cherished and let go of when they are over. God will grant fresh experiences, like writing this journal entry for me (I didn't think I'd have anything to say after a day's rest), but the manna must be fresh each day. The temptation is

perennial to regard God as my personal genie — but he is not, and I cannot control what he does, not even by faithfully repeating whatever I did to which he responded with a blessing. He answers prayers, and even his unpredictability is part of his love. He is faithful, and responds to his people's reaching up to him. He blesses people as they receive Communion. But there is something in spiritual life — or at least the speck of it I'm experiencing now — that is quite unpredictable, where God responds to us as he will and refuses to be manipulated by our doing what we did before a blessing.

Tomorrow after church, instead of seeking out people to listen to me, I'll try to seek out someone I can listen to. I mean to ask, "How are you?" — slowly — and then wait and listen to the answer.

Sunday 11/21/99

What I first thought of writing today is that the spectacular feelings come first and often give way to deeper work — those feelings are a good, but not the only or the greatest good. And I am feeling slightly melancholy now. But there were three un-requested unexpected and delightful surprises that came today.

When I was growing up, I had a miniature collie named Goldie. (A miniature collie is a dog like Lassie on TV, only smaller.) She was a wonderful dog, a good breed to have with children. When I was a little boy, I covered her back with Vaseline. Then my brother Matthew (3 years younger) covered her back with peanut butter. Then we both covered her back with honey. Later and finally, Ben and Joe (10 years younger) covered her with honey. The poor dog hated baths. I have a lot of fond memories of her.

This morning, I looked out the family room window, and saw a miniature collie wandering through the back yard. It was good to

stand and watch it.

Then, when I arrived late at church, I was looking at the bulletin cover. The bulletin covers vary in cover according to the liturgical year, and today's bulletin cover was white. I slowly realized that the cover was not a pure white, but flecked with little specks of color — something that I had been trying to find for a Christmas gift but not been able to.

Finally, as I looked through the songs, I saw that the last communion song was "We will dance", a beautiful song that I had been looking for the lyrics for and not found. The song goes:

Sing a song of celebration Lift up a shout of praise  
For the Bridegroom will come, The glorious One  
And Oh, we will look on his face  
We'll go to a much better place.  
Dance with all your might Lift up your hands and clap for  
joy  
The time's drawing near, When He will appear  
And Oh, we will stand by his side  
A strong, pure, spotless bride  
Chorus:

We will dance on the streets that are golden  
The glorious bride and the great Son of Man  
From every tongue and tribe and nation  
We'll join in the song of the Lamb  
Sing aloud for the time of rejoicing is near  
The risen King, our groom, is soon to appear  
The wedding feast to come Is now near at hand  
Lift up your voice, Proclaim the coming Lamb.

I said three blessings, but I remembered a fourth. I had become slightly dazed last Sunday after meeting a girl but

become slightly depressed last Sunday after meeting a girl but not being able to talk with her. I was able to chat with her and a few other people today.

These blessings are interesting, because they are a kind of blessing I try not to focus on. The immature mind seeks to find happiness primarily by controlling the circumstances out there; the mature mind seeks to find happiness more by controlling the circumstances in here. These blessings are the sort of blessings that someone immature would ask for; therefore I wasn't expecting them. I had forgotten them, and forgotten that, even if they are lesser blessings than a tranquil heart, they are still blessings. I hope that I have a few more such blessings.

---

A part of maturity comes in giving up a pleasure principle — in having joy and being able to appreciate pleasures, but not chasing after them in a primary sense. I have come to realize that there's more of that pleasure seeking in me than I thought. It's part of what I seek from God. I evaluate some of the blessings in part by what pleasure they give me. I don't know when (if ever) I'll outgrow it, but at least I'm aware of it now.

---

There is one more thing I remembered about the church service. As background for this, I wasn't holding my bulletin at the time, and the musicians often repeat verses, so it can be hard to tell when a song will end:

As "We will dance" was being sung, there came a point when the music was winding down, and I said to myself, "I enjoyed that, but I don't need it to go any longer." I happily prepared to sit down. Then things sped up a little and the song continued on for a bit longer — at which I was delighted — but I did not wistfully desire for the song to linger on and on. I was able to enjoy it, cherish it, and then let it go.

(The background principle, if it would help to state explicitly, is that a person who is full doesn't ask for more. Immoderation, finding something good, will try to have more and more of it, or finding a good moment, try to make that moment last forever.

Moderation allows good things to pass from experiences to memories, capable of both holding on and letting go. The topic is explored beautifully in C.S. Lewis's [Out of the Silent Planet](#).)

Monday 11/22/99

Today, as I was singing in the shower, I came across a tune that left me astounded. To put it in a way that risks sounding narcissistic, it was the first time in a long while I have been entranced by the sound of my own voice — but it was not narcissistic. It was not my voice and myself that I was in awe of; it was the music that was coming through my voice. I was entranced by the music and sound, and at all not aware of myself.

The music is hauntingly beautiful, and speaks of a childlike, hushed awe and wonder. It is music that can be sung without breaking the stillness, the silence. The emotions that the piece, or its thought, evokes, are the ones I have surrounding

Christmas carols in a minor key — which is what I decided to make of it. It tells of being a little boy in pyjamas, warm and out in the living room, drinking a cup of hot cocoa at night where it is wintry cold outside and warm inside, waiting for Christmas to come. (When I was a boy, Christmas was one of my favorite holidays because of all the presents I got, and I looked forward to that a great deal. Now it's the presents I give.) (I've got the melody written down, and I have some words, but I'm not completely happy with them — except for the last four stanzas. They allow people to sing and listen to the music.) To me, there has been something special about music in minor keys, that I have difficulty explaining. Perhaps you could say that major keys are pretty, like a dandelion, and minor keys are beautiful, like a rose. I have heard people say that minor keys are sad, and there is some truth to that, but to say that and nothing more is to paint a very deceptive picture. A better word would be 'bittersweet', and music in a minor key can tell of a bittersweet beauty — which includes the haunting beauty of the Romance described above. Bittersweet waters run deep.

Here is the present version of the piece; I don't know how to write sheet music in HTML, and for that matter I don't know if there is any better way to do it than include a GIF of some sheet music, which is why the music is written as it is.

(As I have been writing this, I have been feeling the emotions I would feel if I were singing it.)

Sent from Hea-ven he ca-ame to ea-arth,  
Aa-a-a-a-a-a-a-ah.

Al-le-lu-ia, Al-le-e-lu-ia,  
Aa-a-a-a-a-a-a-ah.

Word of Cre-a-tion, found a-a-mong us,  
Aa-a-a-a-a-a-a-ah.

Son of God, the Word ma-ade fle-esh,  
Aa-a-a-a-a-a-a-ah.

King of Kings and Lord o-of Lo-ords,  
Aa-a-a-a-a-a-a-ah.

Al-le-lu-ia, Al-le-e-lu-ia,  
Aa-a-a-a-a-a-a-ah.

Aa-a-a-a-a-a-a-a-ah,  
Aa-a-a-a-a-a-a-ah.

Aa-a-a-a-a-a-a-a-ah,  
Aa-a-a-a-a-a-a-ah.

Aa-a-a-a-a-a-a-a-ah,  
Aa-a-a-a-a-a-a-ah.

Aa-a-a-a-a-a-a-a-ah,  
Aa-a-a-a-a-a-a-ah.

---

I had coffee with a really cool friend tonight. His name's Joel. At the beginning, I showed him something I've been working on for Christmas, and he cried; he has been in intense spiritual warfare, and what I wrote really touched him. (I was worried during the time he was reading, because his brow wrinkled and I thought he didn't like it.) He is a seminary student, and asked permission to use parts of it when he returns to Mexico. During that time, I also decided to see if the church would use "In the Silence" around Christmastime. I'll go to the church office tomorrow.

We had a good conversation, and I was able to encourage him, and talk and listen. We talked about different cultures (among other things), and he spoke of Mexican communication style: where an American would have a logical, outlined plan (premise, point 1, point 2, point 3, conclusion...), a Mexican will have one central point and then give many different pieces of supporting evidence. Joel mentioned that his wife sometimes got frustrated with this: "Get to the point! Get to the point!" I mentioned to him that I am interested in different cultural communication styles, and he was welcome to communicate with me in the Mexican style.

When I walked away, I realized that he had been communicating with me in the Mexican fashion, and I was listening to it with ease.

A month or two ago in church, I was thinking about Robert A. Heinlein's [Stranger in a Strange Land](#), which has as a premise a person of totally alien culture entering our world (roughly). As well as experiencing culture shock, he causes a great deal of culture shock. He violates expectations people didn't know they

had.

I was wanting to find some other piece of literature like that, something else like that to read. Such a theme would be hard to find — it's not the sort of thing people generally write about. And then it suddenly dawned on me what other book would fit that description: the [Bible](#), with God in it as the stranger. "My thoughts are not like your thoughts, nor are my ways like your ways." God is a totally alien intelligence, one not like a man. He does not have any culture, but uses people's cultures to speak and work with them. He speaks all languages, and knows all cultures' ways of thinking. He works with these things and meets people where they are, but is always more than they are, and beyond comprehension. He is not now an organism walking on earth, but is immaterial, in all places at all times. He is not bound even by time. He is par excellence the stranger in a strange land.

I remembered this in connection with my present experience because, for my years of faith and study of spiritual things, what is happening is very different from what I would have expected an awakening to be like. The first thing (the experience at the railroad tracks) is about the only thing that happened the way I could have expected. My unspoken attitude towards the blessings on Sunday was, "Thanks, God, these Christmas presents are nice, but would you please draw me close to you?" Whoops.

I'm so glad that God doesn't give us what we want.

---

Oh, and I've gotten almost nothing out of what I've read of Thérèse de Lisieux's autobiography. I was expecting to learn a lot from that.

---

After reading *Less-Wild Lovers: Standing at the Crossroads of Desire*, I began to think, "That article should be a book," or more properly was wishing that I could find a book to read that would be like it, hold the same charm. The haunting beauty it tells of manifests itself in the article. There are a lot of books a little like that, but I only know of one that's really like it: Peter Kreeft's [Heaven: The Heart's Deepest Longing](#), which I hope to reread. Then I realized something heartening: I may be writing a book like *Less-Wild Lovers: Standing at the Crossroads of Desire*. I might not be, of course, and I cannot tell if this writing will haunt others as *Less-Wild Lovers: Standing at the Crossroads of Desire* haunted me. If it does, though, that will be a beautiful thing.

Tuesday 11/23/99

It took me a while to get to sleep last night, and I am feeling rather tired. I would say "tired but happy," but that has a bit different of a meaning than I intend. It is good to feel tired from running once in a while (and I have a feeling of having miles to go before I sleep — but I don't know if I actually do), especially after not having enough to do.

Free time is a blessing in moderation. Having eight hours of free time a day is not eight times as good as having one hour of free time a day. I was very frustrated to have hours and hours of free time on my hands and have lost my creativity. Now it feels good, once in a while, to have been a bit busy.

---

At lunch today, I said something that I realized had broader application than its original context, and application to blessings from God.

It has to do with a difference between European and American attitudes towards alcohol and parties. In America, alcohol is the reason for the party. In Europe, alcohol is present and it is enjoyed, but it is not the reason for the party. It is given a subordinate role, a part of the enjoyment of the other people — and therefore probably enjoyed more.

A good party doesn't need alcohol, but alcohol can add something to a party. C.S. Lewis said that nobody puts a bow on a baby's head to hide how ugly she is. In the same spirit, alcohol is not what makes a party good, but neither is it something that has nothing to add. It adorns the goodness of a good party, just as a bow adorns a baby's head.

Many things are like that — not needed, but they have something to add. Christmas gifts are like that to friendship and family — gifts cannot be the substance of the relationships (and it is perverse to try to buy love by giving gifts), and a good friendship needs no exchange of gifts — but they are none the less a beautiful adornment. The principle also applies to some of my attitude towards how God was working with me — I was thinking "Either I have community with God, or I have lesser things that are easier to want and harder to be satisfied with." No — I can have both, with the lesser adorning the greater. A lesser good is still a good.

---

Up until recently, I was somewhat ashamed of my singing voice. Now, I have been able to listen and hear its beauty.

Relatedly... I am afraid of driving. I am slightly nervous when I drive, and more nervous when I'm not driving but thinking about it. My fear has been soothed a great deal by singing in the car.

---

Tuesday nights are Pooh's Corner nights, meeting at 9:58 — one of the highlights of the week. Tonight I was waiting for it to start, and around 8:30 or 9:00 felt what seemed like a prompting to leave my house for Pooh's Corner. Leave and do what? I wondered, as the only thing I could think of was to go to a little chapel on campus, and I expected half an hour or an hour of prayer to be too much, too boring. After some dallying, I went. The chapel was dark, with a little light filtering in through a stained glass window. I love darkness and semidarkness; I love starlight and moonlight. (My eyes are fairly sensitive in dim light.) And in there I sang; that is, I prayed twice. After a time of singing prayers and sitting in peaceful silence, I felt a prompting to leave. I looked at my watch; it was a bit early. So I dallied a bit, and then left, and on my way out found a Palestinian high school student with little brother, who was looking to see if the Stupe (Wheaton's snack shop) was open. It was closed. We walked and talked for a little while; I started to take him to a nearby Starbucks, but found out that he was on a tight time schedule, and we parted ways.

I walked to Fischer, where Pooh's corner meets, and found out that it's not meeting — Thanksgiving weekend. I was not too disappointed, not as much as I would have been other times. I was then glad for the time in the chapel (which I approached with an attitude of rushing, as something to do while impatiently waiting for Pooh's corner) and with the high schooler (who I enjoyed the opportunity to try to serve, looking with pleasure on an opportunity to serve Christ, thinking, "Pooh's corner can wait," and for that matter contemplating staying with them for coffee). I was able to watch and listen to a whole freight train crossing the tracks (something I enjoy). And I was able to get

back in time to be able to get some sleep tonight — I would have been up even later if there had been Pooh's corner, and I would have been tired for work (I was pleasantly surprised at how well rested I felt today).

I just, as I was writing, pieced together something that had been on my mind. I was at the church office today, and an acquaintance by the name of Andy brought in someone named David (I think; my memory's hazy) who walked like someone with a bad case of cerebral palsy, made annoying noises when he breathed, was immature and mentally retarded, and couldn't talk. I was annoyed, and I think I did a pretty good job of containing my annoyance and trying to think lovingly (which is not something that is stopped by feeling annoyed), but I couldn't concentrate. Andy was talking with him, gently and patiently, and there was something in the manner in which he was talking that said that he very much enjoyed David's company. "How can he do that?" I wondered. I was right in how I acted — there is nothing wrong with controlling yourself, nor with seeking to love when you don't feel like it (indeed, loving when you don't feel like it is valuable spiritual exercise). I was still in wonder at Andy, though.

Then when I was writing about the Palestinian student, I realized what it was.

Jesus, in one of his more chilling parables, tells us (Matt. 25:31-46, NJB):

When the Son of man comes in his glory, escorted by all the angels, then he will take his seat on his throne of glory. All nations will be assembled before him and he will separate people one from another as the shepherd separates sheep from goats. He will place the sheep on his right hand and the goats on his left. Then the King will say to those on his right

hand, "Come, you whom my Father has blessed, take as your heritage the kingdom prepared for you since the foundation of the world. For I was hungry and you gave me food, I was thirsty and you gave me drink, I was a stranger and you made me welcome, lacking clothes and you clothed me, sick and you visited me, in prison and you came to see me." Then the upright will say to him in reply, "Lord, when did we see you hungry and feed you, or thirsty and give you drink?

When did we see you a stranger and make you welcome, lacking clothes and clothe you? When did we find you sick or in prison and go to see you?" And the King will answer, "In truth I tell you, in so far as you did this to one of the least of these brothers of mine, you did it to me." Then he will say to those on his left hand, "Go away from me, with your curse upon you, to the eternal fire prepared for the devil and his angels. For I was hungry and you never gave me food, I was thirsty and you never gave me anything to drink, I was a stranger and you never made me welcome, lacking clothes and you never clothed me, sick and in prison and you never visited me." Then it will be their turn to ask, "Lord, when did we see you hungry or thirsty, a stranger or lacking clothes, sick or in prison, and did not come to your help?" Then he will answer, "In truth I tell you, in so far as you neglected to do this to one of the least of these, you neglected to do it for me." And they will go away to eternal punishment, and the upright to eternal life.

This parable is foundational in importance, and it needs to be digested. It affects your whole attitude towards people. It was the semiconscious backdrop to my attitude towards that Palestinian student — and the fact that I did not see him as an

inconvenience or an interruption (interruptions can be the some of the most beautiful things; certain interruptions are to be seized), that I was happy to spend a few minutes with him and would have been happy to spend an hour over a cup of coffee and miss Pooh's corner, that I had difficulty understanding his accent and had to ask him to repeat things, that I offered to lend him my coat when it was cold out and he did not have a coat... None of those things were done with gritting-my-teeth willpower, or offered as noble sacrifices. (The thought that they could be viewed as sacrifices didn't even occur to me until I started writing.) They came out of a gift — the ability to do those things is a gift from God. That gift's name is 'love', or 'caritas', or 'agape'. Like some other gifts from God, it is a gift that grows with use — and Andy is a bit further along in that gift than I am. There is something special about that virtue that it hides itself, so that its presence may not even be recognized. When I asked myself, "How can he do that?", I was really asking the question of "How can he summon the willpower to behave kindly when he is experiencing the same annoyance I feel?" That is a wrong question. The answer to the right question is, "It flows from God's grace."

The fruit of the Spirit is love, joy, peace, patience, kindness, goodness, faithfulness, gentleness, and self-control.

Wednesday 11/24/99

In about an hour I'm going to meet a friend named Carlos. I don't know Carlos very well yet — I can recall talking with him a few times after church, and going out for coffee once, but not much more. I call him a friend rather than an acquaintance because in the interactions we've had I've felt something much

because in the interactions we've had, I've felt something much deeper than the usual shared interests. I hesitate to say that I 'like' him, for the same reason that I would hesitate to call a rose 'pretty'. The words are too shallow. He's the sort of quiet person who is easy to overlook, easy to ignore, and has a big heart that you'll never forget once he's touched you. Carlos is Hispanic, and his culture takes friendship very seriously — far more so than American culture, where most of what are called friendships should really be called acquaintanceships. I'm pretty sure that if I were to ask of him, he would give me more than he could afford (be it of money, or time, or emotional energy, or something else).

As I was sitting, watching my little brothers play Monotony, and chatting with Matthew, who is studying at the University of Illinois at Urbana-Champaign and not around very often, I felt a prompting to look for a gift to give him. What gift could I pull up for him in an hour? Well, I reasoned, I have my creativity back, so I'll probably be able to think of something. So I started thinking, and paced a bit (which is what I sometimes do when I'm thinking), and thought of this journal — and quickly dismissed the thought, for several reasons. It is the project I'm presently working on, and when I'm working on a creative project I want to tell the whole world — and so I send it to all sorts of people I know, including some who probably shouldn't be bothered. (Sometimes I do it for the wrong reason; I am doing it less to share than for an emotional desire for the praise I receive.) I also sometimes give gifts, or big gifts I've put too much work into too quickly — before the relational context has been built up for a gift to have its proper meaning; it has somewhat of the same thing wrong as buying love. This journal-in-progress is not the sort of gift that is appropriate to give to an acquaintance whom you have only talked with for two hours

whom you have only talked with for two hours.

I said that I dismissed the thought; it would be more accurate to say that I fought it with the same energy that is in defensiveness: Qui s'excuse, s'accuse. I fought it, and thought of another gift to give, a signed printout on nice paper of one of my poems. And I will give him that, too. But throughout the time, I had a feeling that I really should give him this journal. Finally came the words, "Think about who you are going to see."

When we first met, Carlos paid for the coffee, and (when I was feeling guilty about not doing a better job of fighting for the check, something I do badly) he said something; I don't remember the exact words, but he said that it tastes better if you don't argue about who's going to pay for it. Not fighting for the check can express a trust and acceptance of the other party's generosity, and letting someone else be generous and pay for it is as kind as paying for it yourself. Before that point, I felt bad about not knowing how to fight for a check; after that conversation, I have had some doubts about that custom — it embodies some virtue, but doesn't go all the way. Love should be generous and willing to pay; it should also honor others' generosity. It is more blessed to give than to receive, and a holy heart should be willing to let others have the greater blessing. I might ask him to buy me a rice crispies treat when I get there.

Then I realized exactly what Carlos will do when he receives this. He will read it carefully and with interest — probably making time for it soon after he receives it. He will feel honored to receive it, love me more for it, and use what it says when he thinks about what to pray for when he is praying for me. (Carlos, could you pray that I grow closer to my brother Matthew?) And for a friend like Carlos, even if I've only talked with him for two hours, this gift is perfectly appropriate.

Thursday 11/25/99 (Thanksaivina)

Thursday, 11/20/20 (Thanksgiving)

My meeting with Carlos seemed a disappointment at first, but now I'm glad for it. He was interested in me, and asked questions about myself, but when I asked him questions about himself, he wasn't very talkative. I was disappointed at that, as one of the main things I had been looking forwards to in the meeting.

Carlos was feeling sick after work, and almost called to cancel our meeting. That was why he didn't say much; I caught him when he wasn't doing well. He treated me to a good steak burrito and a bottle of guava Jarritos. (When he asked how the burrito was, I told him that it seemed good, but I'd need another one to be sure.) And he said that he was glad we met.

There was one C.S. Lewis short story where several people were at a colony in space. After a number of events, the story ended with a monk asking in prayer, "Can you forgive me, Father, for thinking I was sent here for my own spiritual convenience?"

I was thinking primarily of myself and my own spiritual growth when I asked Carlos to meet for coffee, which there was nothing wrong about. We should place a great emphasis on our own spiritual development: what does it profit a man to gain the entire world and lose his soul? Here, though, God was calling me to the next step: to meet Carlos not for my own benefit, but for his. It was good for me, though, but in a different way: another step in maturing.

It'll be a good lesson to keep in mind as I see relatives today at Thanksgiving.

---

I prayed and went to bed early last night — more slowing down instead of always moving. I woke up today feeling relaxed and truly refreshed for the first time in a while. I'm in the family car, moving up, and plan to get some sleep now.

---

I am writing this on a laptop which I am quite fond of. I use it for programming, writing, and other things. I wrote the above entry, shut it down to sleep, and when I next tried to turn it on, it wouldn't go on. My heart was placid; I expected a non-functional computer to be a disruption to what I do, but I wasn't upset. I think that's a good sign. I tried to turn it on just now, and it worked. I'm a little worried now, because of an intermittent failure, but I'm glad that this happened. I thought I was much more attached to this possession.

---

I think I might know what is wrong with the laptop; the switch may be bad. If so, that shouldn't cost much to replace.

---

I have struggled, and felt guilt about, a dislike for the aged. For a while, I haven't liked my grandmother, because her mind is going and she looks old. I remember some frustrating conversations in which I was unable to think of anything to ask or anything to say that would elicit a response which could appropriately be called normal adult conversation. I did not sin in having a dislike to deal with, and I do not think my guilty feelings were called for, but my displeasure at her presence and that of other seniors distressed me.

There is an element of beauty that is culture independent, but cultural conditioning can affect what is perceived as beautiful. Ideals of beauty vary from culture to culture. The American ideal of feminine beauty could be caricatured as a pre-pubescent boy with silicone implants. A healthy woman's body will tend to have thicker legs and bigger hips than most women on TV, and the Venus de Milo looks almost flat next to them. Many cultures would find our supermodels to be sickly, and nowhere here would we find a comment like one made by Marco Polo in the [Travels](#), that a nation's women had breasts four times as large as those of normal women, and they were exceedingly ugly. Our culture's icons of feminine beauty are also very young. There is no chance that someone the age of Patrick Stewart or Sean Connery would be voted the sexiest woman in America. When an older adult appears in advertising, he is usually portrayed disrespectfully; many of the disapproving adults in Tropicana Twister ads were elderly, far older than anyone shown heralding a product other than something like Depends undergarments. It is disturbing that one way of promoting a product is to show a wrinkled nun making a face that would curdle new milk saying

"We don't approve of Tropicana Twister." Would such a thing be done with a bosomy young nymph? We have very little sense of what it means to revere the hoary head, or why someone would refer to the aged as 'venerable'.

Tonight, amidst the fellowship, I was able for the first time in as long as I can remember to look at my grandmother and see her as truly beautiful. Yes, she is an octogenarian; yes, she is wrinkled, yes, she was sunken in her wheelchair. She still looked beautiful to me. And it was good, not only to be able to enjoy looking on her, but to realize that something had healed in me. It was something like what I realized as I wrote about Andy at the church office and my time with the Palestinian high schooler — good to see an unmerited, God-given grace.

At most family gatherings, I have not connected with the other people, not clicked, not jived. (I was once kicked out of a frat party for that reason.) At this gathering, I wandered around a bit, initiating a few conversations (I had a good talk with my uncle Doug; he's a good listener), told a few jokes (Jenna had the most delicious expression on her face as she got them), and finally after sitting down with the adults talking realized that there was a relaxed synergy going; I had clicked, and was in the conversation. It felt a little like a campfire.

There was a poster I saw on the wall at Wheaton College's Computing Services, that talked about becoming a Unix wizard. It was in the form of a miniature catechism, and had questions like, "How many kernels do I have to take apart?" and "What books should I read?" The last question was, "How will I know I know when I am a Unix wizard?" Its answer was profound: "Never mind about when you will become a wizard. Just walk along the path, and someday you will look over your shoulders and see that the mantle of the Unix wizard has lain upon your

shoulders since you knew not when."

That insight applies to many things in life; it offers a deep alternative to our habit of thinking of everything in terms of a sharp beginning and an end. Here, I would certainly not say that a great mantle has lain upon my shoulders since I knew not when; all the same, there is something similar: suddenly realizing a virtue I had hoped for but not had.

---

I mentioned "In the Silence" in a letter to Grandma, saying that I would sing it to her at Christmas. She has a broken hip, and probably won't be around for that much longer. I hope that the expectation helps give her the strength to hold on, and that she will be able to hold on gracefully until then. She is very lonely in the nursing home, where she is to heal.

Friday 11/26/99

I have not had only blessings; I had to try over a dozen times to get my computer to boot this time, an old knee injury has been acting up (and keeping me out of martial arts), and there have been moments of sorrow, even at the gathering. Christianity does not on this earth promise escape from suffering, but rather joy in suffering. Does the thornbush have roses, or the rosebush have thorns? Before, I felt that the thornbush had a few roses; now, the rosebush has thorns.

My brother Ben just came in from outside and showed me a battered, dirty diver's watch, asking me if I recognized it. It took me a second, but I recognized it as a watch I had worn a while back. It was still working. I was at that point trying to politely entertain an interruption I didn't want. Then he pulled something else out and asked me if I recognized that. I looked at what he had pulled out, at first not recognizing it and then not believing what I saw.

It was my high school class ring.

I had worn it on the band of that watch for a time, and when a pin came loose and the watch fell off, the ring was lost with it. I looked all over the house for it, and today found out why I hadn't located it — it was outside, next to the garage. This happened at least a year ago, and I was sad to see it go. My high school was very important to me, a formative influence, and I did

not get rings for any of the three institutions of higher learning I attended. Having it back reminded me on a little level of the parable of the lost coin (Luke 15:8-9, NASB):

Or what woman, if she has ten silver coins and loses one coin, does not light a lamp and sweep the house and search carefully until she finds it? And when she has found it, she calls together her friends and neighbors, saying, "Rejoice with me, for I have found the coin which I had lost!"

I took Ben to celebrate with me at The Popcorn Shop. The Popcorn Shop is a converted alleyway between two brick buildings, and has a wall lined with glass containers of all different kinds of candy, ranging in price from \$1.00 to 1¢. It is the sort of place children's dreams are made of. It is one of those places that is not polished and commercial in veneer, business as it may be, but instead has something that a child would find magical. It was good to take Ben there and spend some time talking with him, although I was cold. When I looked up the parable, I appreciated experientially Jesus's explanation (Luke 15:10, NASB):

In the same way, I tell you, there is joy in the presence of the angels of God over one sinner who repents.

After that, we went bowling, which was nice. I got my first strike in a while, followed by a spare; my total score was 66 for one of the games. During part of that, I began to realize something about myself. I have been an intense and passionate person; for an e-mail address, I chose nimbus(@ameritech.net), and in role play have spent a fair amount of time playing a character named Nimbus. 'Nimbus' is Latin for 'storm'. Some

people might have chosen the name Nimbus in a negative sense — with connotations of being dark, forboding, and destructive — but I chose it in a positive sense. From childhood I have loved being out in a storm, and I especially cherished the warm, wet rainstorms in Malaysia, and so I chose the name Nimbus in an entirely positive sense: it has a meaning of wild goodness, of energy, of life-giving water pouring out of Heaven, of play. Even the darkness I never associated with evil or forboding, but with colors that are rich, deep, and alive, and of the same sort of beauty I wrote of in describing the chapel.

Now, I am starting to feel, perhaps to become, something like the peace after a storm, when everything is still and fresh.

Possibly related to this, in a negative manner, is something else I have realized. For at least a few months, I have felt broken, in a sense similar to how a torturer breaks a man. It is not separately articulated in *Less-Wild Lovers: Standing at the Crossroads of Desire*, but it does seem to be related to (for example) how the article talks about people who have heard the *Message of the Arrows* giving up on being part of a romance of epic proportions. It is more than a breaking of will. It is a breaking of dreams.

It seems to have occurred through a couple of things. One of them, but a lesser and indirect one, has been being unemployed in the areas I would like to be working in: something that would be intensive in mathematics and computer science (two disciplines that are intermingled), work that would involve heavy brainpower and allow my own particular combination of abilities to shine. Another more severe one is having nothing to do for much of my time — and more severe still, and related to it, a loss of creativity and general dullness. Having a lot of time on my hands would have been a good thing if I had creativity to think of

things to do, and now I am enjoying the time much more because I can work on projects.

Those projects are not just pass-time (and I have started not to write down theological insights if I would just be writing them to amuse myself), nor even just work, but Work. I'm not sure how to concisely describe it... 'work' is a dreary, menial, meaningless job that is taken in order to obtain money. 'Work' is spiritually ennobling activity that may not be immediately pleasant (such as an assistant in a hospital wiping patients' butts), but which a person connects with, has a relation to human dignity (and Mother Theresa's dignity was helped and not hindered by cleaning festering sores), and is done for the sake of getting work done. It may be paid or unpaid, and may occur in a number of contexts, both formal and institutionalized, and informal. At least in this country, people doing Work for their jobs are often making less than they could be making if they were to do whatever work paid the most money. My father is an associate professor of computer science and a top-notch information technology worker, and supports our family at a reasonable level; we have everything we need and a few things we don't. He enjoys the contact with people and the opportunity to share the joy of his discipline with others. If he wanted money, he could fairly easily pursue consulting work and charge justified fees that would earn enough money to make us all miserable. I'm glad he has chosen his Work as a professor.

I was doing work but not Work, and... my father used the word 'submerged' in reference to how I was doing. These things — lots of time that I was unable to Work in, loss of my creativity and perhaps other cherished faculties, and a general narcosis-like state that could be described as dullness, being submerged, or a haze — seem to have been what caused a brokenness. Out of

the Message of the Arrows came, not so much a defense of wearing a false self, but a weary brokenness that would not throw my whole self into things.

I was in my room wondering today, why God is giving me what seem like a lot of little things, but not some of the bigger things I want — among them a computer science job that I can Work in. As I was writing, I realized that maybe I'm not ready for that, that maybe he has to heal me first. A [Bible](#) story may be taken as an illustration (Luke 5:17-26, NAB):

One day as Jesus was teaching, Pharisees and teachers of the law were sitting there who had come from every village of Galilee and Judea and Jerusalem, and the power of the Lord was with him for healing. And some men brought on a stretcher a man who was paralyzed; they were trying to bring him and set [him] in his presence. But not finding a way to bring him in because of the crowd, they went up on the roof and lowered him on the stretcher through the tiles into the middle in front of Jesus. When he saw their faith, he said, "As for you, your sins are forgiven." Then the scribes and Pharisees began to ask themselves, "Who is this who speaks blasphemies? Who but God alone can forgive sins?" Jesus knew their thoughts and said to them in reply, "What are you thinking in your hearts? Which is easier, to say, 'Your sins are forgiven,' or to say, 'Rise and walk'? But that you may know that the Son of Man has authority on earth to forgive sins"—he said to the man who was paralyzed, "I say to you, rise, pick up your stretcher, and go home." He stood up immediately before them, picked up what he had been lying on, and went home, glorifying God. Then astonishment seized them all and they glorified God, and, struck with awe, they said, "We have seen incredible things today."

they say, we have seen incredible things today.

Jesus did care about the invalid's body, and did eventually heal it. But he put first things first, and beforehand gave him something of infinitely greater value: he healed the man's relationship with God. My sins are forgiven, but there are other wounds I bear that need to be healed, perhaps before I will be ready to get a job where I will really be exercising the talents God has given me.

I realized as I was writing the past few paragraphs that, since the night at the railroad tracks, I have not felt like saying, "I give up," meaning a giving up on life (although I am not clear, besides suicide, on how exactly one might go about doing that). I had felt like that often before then. This doesn't mean that I'm healed, but it probably does mean that healing is at work.

There is a possibility for one information technology job that has come across my door, a webmastering position at two hours a week. It's not exactly what I would have envisioned (I would have thought of something half-time in programming), but it would be a good first step as well as my present job in manual labor half time to get into information technology work — and a good prospect at learning how to webmaster. I would like this possibility to become a reality, but strangely I am not clinging to it. I am a little better able to let God work with me, putting first things first and healing my broken spirit first, and let him work at whatever pace he chooses.

God's way is not to delete evil, but take it and redeem it, producing something even better than things were before. Heaven will not simply be Eden restored; it will be something better, far better. We will share in the divine nature. In the Gospels, a woman's bad reputation and many sins were taken and made not only into a restored person but a beautiful story (Mark

14:3-9, NASB):

And while He was in Bethany at the home of Simon the leper, and reclining at the table, there came a woman with an alabaster vial of very costly perfume of pure nard; and she broke the vial and poured it over His head.

But some were indignantly remarking to one another, "Why has this perfume been wasted? For this perfume might have been sold for over three hundred denarii, and the money given to the poor." And they were scolding her.

But Jesus said, "Let her alone; why do you bother her? She has done a good deed to Me. For the poor you always have with you, and whenever you wish, you can do them good; but you do not always have Me. She has done what she could; she has anointed my body beforehand for the burial. And truly I say to you, wherever the gospel is preached in the whole world, that also which this woman has done will be spoken in memory of her."

Perhaps Nimbus becoming Pax (and the fruit of the Spirit is peace) may how my brokenness is being redeemed. Perhaps my passion is coming back, albeit in a sublimated form. I don't know.

But I am trying to open my heart to the wind's free play.

Saturday 11/27/99

When I met with Robin to see if I could learn anything from his being close with God, he was talking about how the intimacy was God's pure gift, and not anything he'd done. He commented that he'd been lax in discipline, and hadn't been reading the [Bible](#) much — just been close to God.

That surprised me a bit, as we both know the value of discipline — and he clarified later that he was not meaning to

disparage [Bible](#) reading at all. But there is something in that. I think I understood it a little better today, when I realized that I hadn't been reading the [Bible](#) much for the past few days, and been no less close to God. It's hard to put into words why — an approximation would be to say that God is in control, and he will orchestrate things as he chooses.

On Thanksgiving, my uncle Doug asked me if I was a coffee drinker, and (after a hesitant pause) the answer I gave was this: I enjoy coffee a great deal when I drink it, but I don't drink it very often. I like to savor a crème de menthe espresso, but the thought of gulping down some sludge each morning to be jolted out of a stupor seems disgusting to me. As much as I enjoy it when I drink it, I just wouldn't want it to become an everyday thing. (Today I went out with Joseph and purchased ice cream for him and another hazelnut mocha for myself. I should have gotten ice cream. The coffee, triple as it was, was nowhere near too much caffeine over time in a health sense, but it was trying to have a pleasure over again too quickly. As good as it was, I enjoyed the few bites I had of Joe's ice cream more.)

I realized today that that attitude, apart from the possible snobbishness that can accompany a preference for gourmet coffees to American staple coffees (and I do not wish to suggest that drinking a cup of Maxwell House each morning is sinful — but I am not going to attempt to explain why this jives with the rest of what I am saying beyond saying that a line of moderation can legitimately be drawn in different places), is a manifestation of moderation. By this I mean that moderation goes further than stopping at a certain point and not going further. It, over time, will reach into a deeper orientation of attitudes, emotions, and desires, such that the desire to enjoy a blessing does not translate to a desire to have more and more of

it. My dislike for the idea of drinking coffee every day is not moderation itself, but an effect and signal of moderation. An ability to enjoy blessings in an appropriate time and place without extending them to every time and place showed itself in wanting an occasional coffee while losing the desire to be drinking good coffee as often as possible. It is something that is not very much a part of American culture, not taught very much. (I think we lost a real understanding of what temperance was, about the time of the temperance movement.)

I also realized something else today, and was able to articulate something that had been implicit in what I wrote earlier, namely that virtue can take qualitatively different forms as it develops and matures. Andy's graceful kindness with David, and my frustrating struggle to maintain a good attitude and not think ill of him, both came from the same virtue, from the highest of virtues in fact: agape, caritas, deiform love. The difference was a difference of maturity in the virtue's formation: it flowed from him, but I could only remain in that virtue through difficult struggle. A similar difference may be seen in forms of moderation: at an early stage (and I am still at an early stage in other facets of moderation), it revolves around determination in cutting back your desire to have more, and at a later stage the virtue results in a realignment of desires so that the way you want to enjoy things is a way that can draw full benefit from doing something once, and not engage in a futile attempt to obtain from four or five what eluded you the first time. This kind of moderation means enjoying things more, not less; it enjoys things more in the fashion of a museum goer who spends a couple of hours and truly comprehends a few paintings, than failing to enjoy them in the fashion of a museum goer who rushes here and there, looks for a couple of seconds at hundreds

can remember making is the following poster:

# **I learned it all from Jesus.**

**A gift does not need to be costly in order to be big. A little child is worth God's time. All who believe are brothers and sisters. Be thankful. Be the first to say, "I'm sorry," and the first to forgive. Believing means clinging with your whole heart. Clothe yourself in prayer. Commune with God. Cry. Dance. Don't judge. A respected pillar of the community can be two steps from Hell, and a prostitute can be two steps from Heaven. Don't worry about tomorrow. Today has enough worries of its own. Every blade of grass, every twinkling star, every ticklish friend, is a blessing from God. Cherish them. Everything in the whole Creation tells us something about God. Give someone a gift today. God delights in you. God has a sense of humor. God is a friend who'll never, never leave you. God is an artist. God is everywhere, from the highest star to inside your heart. There is nowhere you can go to escape his presence — or his love. God is found, not in earthquake nor fire nor mighty wind, but in a soft and gentle whisper. God is your Daddy. God watches over even the little sparrows. Heaven is very close. He is risen! He who sings, prays twice. He who dances, sings twice. He who laughs, dances twice. He who prays, laughs twice.**

**Hug your friends. If you have to have everything under your control, trusting God may look as stable as a cow on ice skates. Trust him anyway. It's worth it. If you want God to smile, tell him your prayers. If you want God to laugh, tell him your plans. It's never too late to repent. Joy comes from suffering. Keep on forgiving. Laugh. Listen to other people's stories. Listen to the silence. Love God with your whole being. Love one another. Love your enemies. Love your neighbor as yourself. Make every action a prayer. Make your prayers and your good deeds secret. Play with children. Prayers ascend like incense before God's throne. Purity does not reside in the hands, but in the heart. Respect the aged. Rest. Serve. Sing. Take time to be alone with God. Tell God you love him. Tell your friends that you love them. The Heavens tell the glory of God. There are miracles all around. You just have to be able to see. Treasure God's smallest blessings. We can bring little pieces of Heaven down to earth. What you do for the least, you do for God. Work is a blessing from God. You are God's image.**

Then, a few days after then, the Christmas carol "In the Silence" above was the first musical piece I had composed since the loss of creativity. Now, the above musing about virtue changing form is the first significant and new (to me) theological insight I have had since that point.

Sunday 11/26/99, 1st Sunday of Advent

Advent is a time of spiritual housecleaning to prepare for Christ's coming. During church I realized that what is happening with me now is very much Advent — which was surprising to me, because usually what is happening with me does not line up with the dates on the church calendar. It is the same thing, only at a different time. Advent is a time like that before a guest comes.

different time. Advent is a time like that before a guest comes,  
there is both expectation, and a cleaning preparation. God may  
have a wonderful Christmas in store for me.

---

Last night, I had some time before bed that I didn't know what to do with. I felt let down and deserted; my emotions were of the same kind as when I had time and was unable to think of anything worthwhile. So I prayed.

The first thought that occurred to me was to clean my room. But I was reluctant to do that, and said in sincerity "I'm not ready for that now." The next thought was of catching up on my New Testament reading (the one part out of four that I hadn't caught up on yet), but I was [Bibled](#) out for the day. Then I cleaned up a couple of the larger items on my floor and paced a bit, and noticed on the piano a page of music that I had left out: a simple piano arrangement of *Amazing Grace*. I played that with pleasure, and when I was standing up to leave I noticed a splash of color: Roger van Oech's *Creative Whack Pack*.

The *Creative Whack Pack*, which I had noticed earlier and forgotten to look at, is a deck of 64 cards, each one of which has a tip on how to function more creativity. It is quite good, especially for someone who doesn't know how to use his creative faculties well or doesn't have naturally flowing creative juices (another good resource is a book entitled [Conceptual Blockbusting](#), written for engineers but valuable to all sorts of people). I slowly read through a few cards, trying to savor the experience rather than fly through and have the whole deck read before I knew it. Some were things I knew, a couple were surprises, and after hitting "Sell, sell, sell!", I acknowledged an insight which I had been suppressing: some of aspects of the cards were questionable, or at least left another shoe to drop. Someone said, "Never mind about others stealing your ideas. If they're really good, you'll have to ram them down people's

throats." The resistance suggested in that quote is akin to a resistance I had been putting up so well that I wasn't even aware of it: that the authority (in this case, the deck) could be wrong. Once I admitted that idea, I had another idea for something to write: "The Other Side of the Coin," which would give the other side of the coin for these cards. (I'm not going to share that writing, at least yet, for copyright reasons: at least the most obvious good way to write it would involve citing the entire text of the cards, and I'm not doing that without obtaining permission from Mr. von Oech.) It's good to have something more to write.

---

I thought a small group meeting I was invited to, was going to be at 5:00, and was disappointed to find out that it's not until 6:00 or 7:00 (I'm writing a bit before 6:00). I started reading through more of the *Creative Whack Pack*, and then set it down and noticed three pieces of framed Malaysian batik that are hanging on the wall (and just now, the play of the light). The batik is really beautiful, with flowing colors, and I hadn't really noticed it when I came in. It's a funny thing to realize after writing what I wrote about the two museum goers.

---

This journal is more of an outer journal — a journal of what I do and what happens to me — and less of an inner journal — a journal of what transpires within me and who I am — than I'd intended. I'm not sure what to make of that; perhaps it's better that way. I don't know.

---

I feel a certain trepidation towards going to work tomorrow. Especially after a long weekend, it's hard to go back to work... the dread I feel is similar to that I feel towards driving a car, which can leave me lying in bed slightly nervous the night before, and similar to the trepidation I feel in anticipating a long block of time I can't think of anything to do in. It is not an intense fear, but one that is vague, ill-defined, and discomforting. In it is some doubt — the little doubt is a doubt that I'll have enough energy to keep going, and the big doubt is a doubt that it'll be like the time I've spent with God over the weekend.

These emotions do not correspond entirely to my best rational judgments. I know in my head that God is quite as capable of meeting me as I am testing toy computers as he is of meeting me as I read something good or write this journal, and that the work day is only four hours, which I am ready for. I know in my head, but my heart doesn't know, and I'm a bit scared.

I am taking this as a time to trust him, to (as the Mars Hill article says) embrace my nakedness and trust in God's goodness.

---

Something else which I just realized (or, more properly, admitted to myself) as another place where soul work is required...

I am not at peace with being an American. I would much rather be a European.

I cannot now say "I am an American," with the same secure pleasure that I would say "Je suis un français," were that true.

I am legitimately far more European in spirit than most Americans. I believe that there severe flaws in American culture, moreso than most fallen cultures — ranging from pragmatism that has no patience for things without immediately visible use (which turns out to mean many of the deepest and best things in life), to television, to a shallow and disposable concept of human relationships — and I know that Neil Postman in [Technopoly](#) certainly wasn't grinding an axe against America when he named America the world's first and (as of the book's writing) only technocracy (a country which is ruled by technology). I enjoy a great many things about French and other European culture: the sound of the language, the idea of moderation in use of alcohol, the deeper friendships, the higher level of education and greater intellectual substance of the conversations people have (a group of French young people will discuss Balzac rather than the Bears), the old cities, the art, the architecture, the speaking multiple languages, the body language, the kisses, and many other things I cannot now name. After she spent a month in France, my ex-fiancée Rebecca commented that everything she saw there reminded her of me. I hold both differences with many of the peculiar features of American culture, and affinities to many aspects of European culture. That

stated, there is still something in the picture that is wrong.

Perhaps a way to state it is that I not only embody certain European characteristics, but wistfully wish to be what I am not, and be further over. That doesn't capture the latter part quite well... Another approximation would be to say that it's like a child's walking, dressing, and talking like a sports hero — appropriate in a boy, but not in a man. It may have something to do with a manifestation of reverse culture shock that I haven't gotten over for some reason. A good description of the root problem would be to say that I'm not at peace with being an American.

In college, I wrote a cynical book entitled [Hayward's Unabridged Dictionary: A Free Online \(Satire\) Dictionary](#). All of the problems I described in that book are real problems, but it was still written in the wrong spirit. I wrote in a way that took pleasure from pointing out what was wrong, and that should never be. As I let go of that, I realized that one of the tests of love is to see everything a cynic sees, and still not be a cynic. I don't want to stop seeing all of the problems in American culture, nor do I want to stop being somewhat European in spirit, nor do I want to stop seeing how beautiful French culture is. What I do want is the analogue of still not being a cynic: to be at peace with being an American. Living in France was a great blessing for a certain period of time, and it will always be a sweet memory, but it is not a blessing I have now, and perhaps a blessing I may never again have this side of heaven. I still may not fit in very well among typical Americans, and that does not bother me. I do want to stop looking down on my homeland — and really hold it to be my homeland — and take that culture as a basis for interacting with other cultures.

This is a less-wild lover to give up.

Monday, 11/29/99

I have been granted a reprieve, in the form of a bug that's been floating around. What I have is fairly mild, and I would go, but a 20 minute drive when you have diarrhea is risky.  
(But the reprieve hasn't been as exciting as I'd hoped.)

---

I just realized something that I don't know exactly what to do with.

In the early stages of a friendship, it is easy to share things about yourself with your friend, because you don't know each other very well. As time passes, that becomes more difficult; it's harder to think of something to share. I was expecting something similar to appear with this journal. It may well kick in at a later date (I've only been writing for about two weeks) — but I am surprised at the pace I've been able to keep up with. (I have been looking forward to the slowing up, in order to write a less gargantuan epistle, leaving something behind that will let people see the crystallized essence of my journey.)

---

I acquired a Dilbert poster that listed several definitions to terms in information technology jargon. Among the definitions new to me was 'brain dump', defined as "The act of telling someone everything one knows about a particular topic or project. Typically used when someone is going to let a new party utilize and maintain a piece of programming code." That struck me as a really cool phrase, in part because I am familiar with the Unix term 'core dump' from which it would appear to have come.

It's a beautiful metaphor.

I was looking for an opportunity to use it, and today I realized that what I am writing is a brain dump of an awakening. I thought for a bit about changing the title of this document to "Brain Dump of an Awakening," but the term's really too obscure to use in a title... unless it's something that would acquire meaning as its definition is encountered in the document... not for the moment, at least.

---

When I first heard about Y2k, I basically ignored it, or more properly did not seriously think about it. I am not much given to alarmist pictures.

In my job search, I talked with some consultants who are involved in selling Y2k merchandise, who painted a doomsday picture and then gave me a couple of URLs to look at. I looked at them and others; with others since then, I've seen expert opinion varying from hiccup to doomsday. What is disturbing is that the thinking of the doomsday experts seems eminently rational; with my knowledge of the realities of software maintenance, the argument I've seen for why the power grid should be expected to go dark makes perfect sense. I haven't seen rebuttals to the arguments for things going wrong. Now, I'm not sure either way; I haven't seen evidence to persuade in another direction, but either outcome tendency seems plausible. I would say that there is at least a 30% chance of something going severely wrong: the grid going black, or distribution logistics breaking because of defective code (and fixing that stuff involves finding several needles in a haystack), or chaos because of public panic, or some stock market crash for these or other reasons. If some of those things happen, I will probably die.

One thing that I observed in people talking about how to prepare for Y2k was that there was a lot of talk about preparation for physical needs (food, water, heat, money...), and almost no talk about mental, emotional, and spiritual preparation. This seemed to make no sense to me, as (for example) being snowbound generally offers no severe physical threats, but causes people to go batty ("cabin fever"). Disasters seem to be at least as much a mental stress as a physical threat, and being

properly prepared at least as much psychologically as physically. I asked in a couple of newsgroups about this. Apart from "I've noticed this, too; please tell me what you find," I got basically three responses: (1) Get books, games, contraceptives, etc. to pass the time, (2) you could study a martial art, as the discipline will help you, and (3) draw close to the Lord.

Many people have been helped by faith in traumatic situations, such as being held hostage and prisoner by terrorists.

I was a bit disappointed by the answers I got, because I was hoping for something I didn't know or couldn't have guessed at, but especially with the third one... I do not see this awakening in terms of Y2k (I did not make a connection before today), but if I were primarily concerned with spiritual preparation for Y2k, I would not choose much differently from what I am doing now.

Martin Luther was once asked what he would do if he knew that the Lord were returning the next day. His answer? "Plant a tree."

Monday 11/30/99

Today as I was lying in bed, the Haunting came to me again. It came to me in the form of an aching desire to visit the West Indies — or, more specifically, the image of the West Indies that is portrayed in the movie *Cutthroat Island*.

Before I continue, let me make an aside and say that my evaluation of certain things, and the impression I take away from them, differs from that of many people. In books, the titles I have most benefitted from have not typically been the most classic of what I read; I learned far more from G.K. Chesterton's biography of Francis of Assisi than I did from Thomas Aquinas's [Summa Theologiae](#). (I'm sure that Aquinas would gently smile at this, happy that I could learn about God

from some source, and that Chesterton would positively wince.)

My observations usually don't directly conflict with other people's, but I observe a different part and draw different conclusions. The three movies I have held in highest regard, only one of which I would want to see now, are *The Game*, *Labyrinth*, and *Titanic*.

In the reviews I read, *Cutthroat Island* got slammed again and again: it forced 20th century politically correct feminism onto another era, some things were ludicrously unrealistic, and so on and so forth — criticisms which were entirely valid. But I liked it. Why? Part of it probably has something to do with the fact that I drank two shots of spiced rum as I watched it, but I think there's more to it than that. What I liked about the movie was that it captured a certain beauty, a certain romance. When children are playing pirate, they are capturing a certain feeling, a certain impression. It's the same sort of thing a Disneyland ride does well that a Six Flags ride does badly if at all. That's what *Cutthroat Island* did. The visual scenery was beautiful. That movie can be enjoyed in the same spirit as Disneyland's *Pirates of the Caribbean*.

It was the visual effect that haunted me, and from which I felt a desire to visit the rich, white side of the colonial West Indies that was in some sense portrayed — and it ached all the more because it is a place I cannot go, a place that perhaps never really existed (and I do not mean to suggest that I take *Cutthroat Island* as serious historical fiction), a place that I can only go in my dreams (if ever — and I have returned to Paris in my dreams). A haunting to go back to Paris is one that may quite possibly come true — I expect to go to California to be with my father's side of the family for Christmas, and that was not something I expected until my parents started talking about it

recently; Paris would not be that stranger of a windfall, and for that matter one of my uncles and one of my cousins will be in Paris soon for layovers going to and from Mali, where they will be translating. A haunting to go and participate in Carnevale in Italy is something I do not regard as probable, but would quite probably come true (including sharpening my Italian to a basic conversational proficiency) if I threw my weight into it. But a yearning to visit a place that no longer exists... The trip to California will be bittersweet, as my grandparents will shortly thereafter be selling their house, a house that holds a lot of fond memories for me (such as the time that Matthew and me, as little boys, climbed up in their treehouse and couldn't figure out how to get down). The visit to the house will hold the bittersweet knowledge that I can enjoy it as I visit it, but I'll never see it again. And soon my occasional remiscences of that place will be yearnings to visit a place that can I can never visit again. To get back on track, a haunting to visit a place which no longer exists is more painful than one to visit a place I may well return to, or one that I will probably will never see, but still could if I put my mind to it.

For all the ache, it was a special and pleasurable moment, a sign of life.

---

When I first looked at Wheaton, I felt that there was something wrong with its Pledge, but signed it anyway. (The Pledge is a document that all community members are required to sign, and tries to outline a Christian life and then prohibits activities such as drinking and dancing.) During my time there, I found myself running away from my conscience over this issue, and at one point decided to stop running, did a massive search of Scripture, my conscience, and the perspectives of other people, and came to a conclusion. I wrote the following letter to the editor, which one of the philosophy professors said was the best treatment of the issue he'd seen in eight years of being a professor there:

**In the name of the Father, of the Son, and of the Holy Pledge**

If the name of this letter hasn't nettled you, then something is wrong. If what it refers to hasn't nettled you more, then something is very wrong.

At the heart of Christianity are many things. I will not name and elaborate each one here, but there is one which seems forgotten to some: the outpouring of the Holy Spirit.

When Christ came, he fulfilled and completed the Law. The Law was not a bad thing, but it was incomplete - not as a matter of God being a spiteful bully, but because it was the most complete form that could be before the Messiah. Now has come the one about whom Jesus said, "the Holy Spirit, whom the Father will send in my name, will teach you all things and remind you of everything I have said to you." (Luke 14:26, NIV). Throughout Galatians, Paul corrected those who were trying to live under law and rejecting the

Spirit: "How is it that you are turning back to those weak and miserable principles? ... But if you are led by the Spirit, you are not under law." (4:9, 5:18, NIV).

While the Law has some very important commands (love God, love your neighbor, maintain sexual purity, worship God alone, care for the poor...), it does not have the Spirit and consequent freedom. When you take away the Spirit, then there is a replacement of freedom with written codes that restrict in situations where they are not useful: don't eat any bacon, don't wear clothing made of two different fabrics, don't consume any alcohol, don't dance.

Now, you may say, there is a difference between the Mosaic Law and the Pledge. Of course there is: God himself composed the Law and handed it over to one of the greatest prophets of all time, before Christ.

The Pledge's restrictions, pragmatically speaking, do not constitute more than a mild annoyance to me. Missing a dance every couple of months does not annoy me nearly as much as if (for example) my dorm had only one laundry room, off in a far corner of the basement. Theologically speaking, however, there is a much more major concern. The Pledge is a perfect fit for a castrated Christianity without the Holy Spirit: despite its many words and enumerations, nowhere does it mention the Holy Spirit, and parts of the end (...in order to establish a Christian community...) implicitly require the heretical notion that the Holy Spirit either doesn't exist, or cannot be a basis for such a community.

The joy of my life would not be destroyed if all pig products left my diet for pragmatic reasons (the local grocery store doesn't carry them, it's too expensive, I don't want to clean up the grease splatters from cooking bacon...),

but if a present day Judaizer were to imply that it is unclean to consume what Christ has declared clean, or that that would aid the establishment of a Christian academic community in a way that the Holy Spirit cannot, then that would badly need correction. Likewise, I dislike the taste of alcohol, but am deeply offended that, in order to teach here, my professors cannot enjoy a glass of wine with dinner.

Satan's way of working in this world is often to twist good things that God has created. The things that the Pledge "goes beyond what is written" (I Cor. 4:6, NIV) to prohibit are, in some cases, good things that God has ordained for the benefit and enjoyment of humans, which Satan often likes to twist into deadly poison. The solution is not to completely disallow these things for all members of the community, but rather (as per Romans 14-15) to use judgment and the Spirit to avoid what will cause you to fall into sin, and to avoid what will cause fellow believers to fall into sin.

If you haven't done so lately, please read Romans 14-15, Galatians, and Colossians. And think - about letter, about freedom, and about the Spirit.

Jonathan Hayward  
CPO 1202, x6751

I requested a conscientious exemption from the Pledge, and when that was denied, I transferred out of Wheaton. It was one of the most painful decisions of my life.

Now, George Poyner, one of the people in charge of Wheaton College's Computing Services, is trying to line up what would be an excellent job and opportunity in almost all respects. My father was explaining this to me, and commented that George

was trying to see if he could get independent contractor status for me (which would not be considered community membership and therefore not require signing of the Pledge), and if that didn't work out, "it's only six months." When I told him, "I can't do that," it became evident that he is considering trying to force me to sign the Pledge, and that he does not understand my "No" to mean "No." His mind's not made up on that, but it is possible that he will try to make me sign the Pledge. I can't do that in good conscience. Much of my will may be broken, but not that part; when I left Wheaton, I made a very firm decision never to make that mistake again, never again to swallow my conscience like that. If my father throws his weight into insisting that I sign it, the conflict will be long, drawn-out, and exquisitely painful.

I feel angry, truly angry, for the first time in a long while.

Wednesday, 12/1/99

Last night, I visited Robin and then went to Pooh's corner. I showed him two things I had brought to give to the people there — the "I learned it all from Jesus" poster, and sheet music for "In the Silence" — and Robin, after reading the poster, suggested that I put it up on the forum wall.

The forum wall is one piece of local color at Wheaton; it's a section of brick wall where people tape things up, write on the things taped, etc. When we arrived, Robin drew my attention to one piece that was up on the wall:

### **WANT TO KNOW IF YOU ARE A WHEATON CYNIC?**

"In sexual love the cynic perceives lust; in sacrifice and dedication, guilt; in charity, condescension; in political skills, manipulation; in the powers of the mind, rationalization; in peacefulness, ennui; in neighborliness, self-interest; in

friendship, opportunism. The vitality of the old is pathetic; the exuberance of the young is immature; the steadiness of the middle-aged is boredom.

"And yet, even for the most disillusioned cynic, an aching longing remains for something true, good, or beautiful." (so there is hope for you yet)

Brennan Manning

He started moving other posts to make space, and suggested that I put it up next to this post. I was puzzled, as I had been when he suggested I read it, and asked, "As a rebuttal? A joke?" He said, "No," and pointed me towards the bottom of the post.

It wasn't until we got back to his apartment that I got it — and realized that he had selected the perfect place to put it.

I have been feeling depressed.

---

At Pooh's Corner, I was distracted for a good part of it, wanting to get up and write about the posting on the forum wall, but still trying to enjoy it, as that would be all the Pooh's Corner I would have for the week. Pooh's Corner meets in the lobby of Fischer dorm, where I stayed my freshman year. It is a place full of distractions and people passing through. There is a piano there, and partway through I realized in a flash that I had been drinking the music in the same way that I drink wine.

What I mean is this: Wine, as contrasted to e.g. milk or juice, is something you can only take a small amount of. You can drink water until your thirst is quenched, or have several glasses of milk, but with wine it is different. If you are having one drink, then that translates to a 5 ounce glass — not even a full cup. If you drink it the same way you drink Pepsi, you are going to find yourself holding an empty glass before you know it.

Consequently, when I drink wine, I sip it very slowly, and I consciously savor it in a way that would never occur to me if I could drink an indefinite quantity and remain sober. What I realized last night as I was thinking about my realization was that I taste wine in a way that I do not taste milk. I drink milk, and like it, and vaguely and absently taste it, but do not taste it wholly. With wine, the realization that I only have a little amount and it will soon be gone keeps me from absently quaffing glass after glass; when I have a glass of wine, I sometimes close my eyes and am able to taste it so intensely that I am not aware of anything else.

That is what happened with the music, and which I realized afterwards. I have no control over the music that is played, and the most beautiful passages seem to be over so quickly. At one point in the music, I was doing the same thing as I do when I

hold a sip of wine in my mouth, close my eyes, and savor it — I was concentrating on it so intensely that I was not aware of anything else (in a busy room with many voices talking and people passing through), and when it was over I had a feeling of having drunk it to the dregs.

It was somewhat strange to realize that I had learned such a thing from wine. My attitude towards alcohol is European rather than American, and (without trying to trace the argument here) I regard alcohol as a symbol of moderation, and learning to enjoy things in a temperate manner (the Puritan attitude towards alcohol). I had not, though, expected that in drinking I would learn something of this nature. I think that what I did is close to what goes on in empathic listening — a drinking in with your whole being. At the beginning of this journal, I talked about not being able to engage. This is a point where I have learned to truly engage in one area, and it may well help me to engage in others — it has helped me to enjoy music, at least.

Thursday 12/2/99

At work today, I caught myself thinking in a grandiose manner. There is a girl I met shortly after Pooh's Corner (she was playing on the piano, and I gave her a copy of "In the Silence"; she commented something to the effect of how it would be nice to be able to compose — I don't remember the exact words, but they conveyed a humble respect and openness that are the exact sort of thing that makes you want to meet someone a second time), and I realized that I was thinking of ways to impress her with how awesome my musical talent was.

---

I also realized in my walking on Tuesday that I really do know myself, and that that is a good starting point for relating with people. It was a pleasant thing to realize, after a feeling of clumsiness and not really knowing how to relate to other people — not that I now feel perfect at relating to other people, but I feel that I have a good start.

---

In the car going to work today, I suddenly realized a couple of things: (1) I had forgotten to sing, and (2) I was not afraid, either in the car or before then. I felt some fear after realizing this (perhaps I had simply forgotten to be afraid), but it was good to realize.

---

I was also thinking, Tuesday, about a point related to [chapter 4](#) of G.K. Chesterton's [Orthodoxy](#). Specifically, many things imagined as magic and psychic phenomena are exaggerated and cosmetically altered versions of things God has given us. For example, teleportation (to be able to move instantaneously from point to point) is less astounding than being able to move from point to point in the first place, and there are many creatures which live without any such faculty (such as trees). Telekenesis is not that much more astounding than having hands with which to move things. Mental telepathy is quite similar to speech, and the surprise we would have at seeing mental telepathy is nothing like the surprise an animal (with a sufficiently anthropomorphic mind) would have at discovering that once one of these creatures learns something, the rest know it. It would be like what reaction we might have upon first learning certain things about Star Trek's Borg, multiplied tenfold. If it is thought of in this manner, the concept of speech is far more impressive than the concept of altering speech by changing the channel through which the mind-to-mind transmission occurs. It might be also pointed out that, in the past few millenia, we have found another channel for mind-to-mind transmission to occur: reading and writing. When one pair of Wycliffe missionaries was working with some tribesmen, they were trying to persuade the chief of the advantage of writing. One of them left the other room, and the other one asked the chief's mother's name, and wrote it down. When his partner returned and read her name, the chief almost fainted.

There are a couple of things that come from this.

The first is that God's creation really is magical, in the sense of being something awesome, and something we should be amazed

that we have. It is in our nature to become blasé; our eyes become glazed over at magnificent things. If we can somehow let scales fall from our eyes, we would be dumbstruck at what we have — for example, music.

The second is that, if we can become blasé at what God has given us, we would probably also become blasé at the things we fantasize about. When I was a child, I absolutely loved to swim, and I wished that I could breathe underwater... but that (after a little while) would have held nothing for me than being able to breathe air, hold my breath, and swim underwater. I have fantasized about all of the special powers that I would like to have, and when I do that I do not much enjoy the gifts I have, not only as a human being, but personally — my sharp mind and so on and so forth.

Also related to this insight was kything... In [A Wind in the Door](#), Madeleine l'Engle uses the word 'kythe' to describe a beautiful communion beyond communication. It is the whole cherubic language, of which mental telepathy is just the beginning. It holds a similar place to 'grok' in Robert A. Heinlein's [Stranger in a Strange Land](#), and the meanings of the two words are similar. I am not going to try per se to describe its meaning further, but simply refer the reader to that excellent book.

What he had actually seen she could not begin to guess. That he had seen something, something unusual, she was positive.

This is the same sort of feeling I felt about kything. There is something in that word that strikes a deep chord in my spirit; it is the primary reason why that is my favorite book

out of the series, and at times been one of my favorite books at all. In conjunction with the above musing, l'Engle's portrait of kything has a beauty that is not an ex nihilo creation, that shows forth a beauty that is really in this world but which we do not see. I would very much like to kythe — but I can't do what's in the book without sinning. What is in this world that embodies the beauty of kything?

As I was thinking and praying, I realized several things that may, in a sense, be called kything, that are beautiful in the same way. I felt a Spirit-tugging to list a hundred such things. I don't know if I'll be able to do that, or if so where I'll come up with a hundred, but I will none the less try.

#### 100 Ways to Kythe

1: Prayer. Prayer allows a kind of communion with God that (at least this side of Heaven) we can't have with anyone else. With God, prayer is not limited to words; we can pray with words, or with images, or with music... Prayer has the same opportunities for exploration as kything.

2: Holy Communion. God speaks to us through that.

3: Martial arts sparring. It takes time (I've studied martial arts for a little over a year, and I've only begun to taste this), but there is something martial artists call 'harmony with opponents' that is a deep attunement. I've had one sparring match where I knew everything my opponent was going to do about a quarter second before he did it. A good book to read to get a little better feeling for this is *The Way of Karate: Beyond Technique*.

4: Flow, as described in Daniel Goleman's [Emotional Intelligence](#).

5: Empathic listening. This is listening in which the listener is completely attuned to the speaker. I don't know any books to

reccommend for that topic.

6: Drinking as I drink wine, or as I drank music.

7: Improvising musically. Music is an alien language, not symbolic, not logical, and yet speaking powerfully. When you can really let the music flow through you, you are kything.

8: Making love. The subject of the Song of Songs is not just a physical act, but a total communion between a man and a woman, united for life.

9: Stillness. There is a way of being still that is kything.

10: What I did at Pooh's Corner the first night described. (Well, there's ten at one sitting... I expect to come back to this later.)

11: Mathematical problem solving. I won't even begin to explain this, beyond saying that to those who have experienced it no explanation is necessary. Just remembered — there's a good book on this topic for non-mathematicians, entitled, *The Art of Mathematics*.

12: Musical improvisation with another person. I have never done this, but I remember, at Calvin, being fascinated by my friends Bruce and Janna talking about when they improvised together at the keyboard. It worked. I believe, from conversations, that the Spirit was guiding them, and it was a communion with the Spirit and each other.

13: Singing prayers in tongues. I don't pray this way very often, but when I do, it's very uplifting. It is a praying, not with the rational mind, but with the spirit, and it receives what to say moment by moment from the Spirit.

14: Non-sexual touch. It's going to be hard to say something brief here, as I've written a whole [treatise](#) on this point), but to try: Non-sexual touch can be deep, and express something words cannot. It is the nature of love to draw close; touch is an

incarnate race's physical means of communicating love, and for babies the first and foremost way of knowing love. Beyond that... if what I am saying doesn't resonate within you (or if you'd just like a hug), ask me for a hug — a real one. It took me a long time, but I have learned how to touch, and at times to drink touch as I drink wine.

15: Dancing. Wheaton alumnus Alan Light wrote a beautiful letter about how he had adopted a code of duty, honor, and steadfastness, and a folkdancing class had opened his eyes to joy, peace, and freedom. There is something beautiful of those things that can be learned in dancing, something that it's easy not to know you're missing. (For all that, I don't dance very well. Before a knee injury, I had something to do with my feet that looked impressive, but I haven't learned to dance (to commune with others, to connect in a merry, moving hug) as I have learned to touch.)

(Coming back after a time) I can recall one occasion when I really danced. At the last Mennonite Conference I attended, both youth and adult worship were [religion within the bounds of amusement](#), but the youth worship was at least honest about it, and I preferred it to the adult sessions. Before a Ken Medema concert, there was a group of high schoolers playing a dance game, and I joined in. It lifted me out of sorrow, and there was a vibrant synergy, a joy and connection and communion. It's something that everyone should experience at least once. He who dances, sings twice.

16: An I-Thou relationship. An I-Thou relationship differs from an I-It relationship as kything differs from mental telepathy. I only got halfway through Martin Buber's [I and Thou](#) before setting the book down, because it was too hard to concentrate on, but it says a lot about how to kythe. As pertains

to prayer and kything with God, I would pose an insight in the form of a riddle: how is it that the saint and mystic refers to God as `I' without blaspheming?

17: Dreaming. One story in a marvelous book, [Tales of a Magic Monastery](#) by Theophane the Monk, ended with a character saying, "While you tend to judge a monk by his decorum during the day, we judge him by the number of persons he touches at night, and the number of stars." Dreaming has always been special to me; it allows access to a different, fantastic world. It can be a way to kythe. What if there were a culture that regarded dreaming rather than waking as the aroused state?

18: Praying with another person. Where two or three are gathered, he is with them. When they are praying, there is not only an individual bond between each one and God; there are connections within the group. There have been some people who hold that a man and a woman who are not married to each other should not pray together; I do not agree with that, but the fact that such a position has been taken by levelheaded believers seems to underscore that there is a communion between people who pray together.

19: Artistic creation. When I create something, it fills my mind, my musings; I kythe with it as I give it form.

20: Children's play. Children's play can be timeless and absorbing, and Peter Kreeft, in [Heaven: The Heart's Deepest Longing](#), says that the activity of Heaven will be neither work, which is wearying, nor rest, which is passive, but pure and unending play, an activity which is energetic and energizing. Playing with children is entering into another world, a magical world, and entering into it means kything.

21: Listening prayers; listening to the Spirit. Ordinarily we think of prayer as speaking to God, but it is also possible to

listen to him. And dancing with the Spirit — there are so many adventures to be had.

22: The Romance. There is a sacred Romance described in, for example, C.S. Lewis's *Pilgrim's Regress*, and Brent Curtis's *Less-Wild Lovers: Standing at the Crossroads of Desire*. You do not come to the Romance; the Romance comes to you, although you may respond. Being in that is kything.

(I thought I might be able to think of 20 ways of kything...  
I've already gotten past that, by God's grace.)

23: Silliness. When some friends are doing something silly — tickling or teasing (without going too far — this is something I'm not very good at), for example, it is not thought of in terms of something serious (as 'serious' is misunderstood to mean 'somber'). None the less, there is in the lightheartedness a bond being forged or strengthened, a connection being made. Kything at its best is communication that needs no symbolic content, that has something that can't be reduced to words. So is grabbing your friend's nose.

24: Friendship and family relations. This differs from the above items, in that it is not an instantaneous experience resembling an instant of kything. It is rather a bond over time that is more than communication, where hearts touch each other. It is a bond where two people know each other, and in the time spent together a connection accumulates.

25: Agape love. There is a vain phrase, "To know me is to love me," that might fruitfully be turned around as, "To love me is to know me."

One of the stories in [Tales of a Magic Monastery](#) goes roughly as follows:

### **The Crystal Globe**

I told the guestmaster I'd like to become a monk.

"What kind of monk?" he asked. "A real monk?"

"Yes," I said, "a real monk."

He poured a cup of wine, and said, "Here, take this."

No sooner had I drunk it than I became aware of a small crystal globe forming about me. It expanded until it included him.

Suddenly, this monk, who had seemed so commonplace, took on an astonishing beauty. I was struck dumb. I thought, "Maybe he doesn't know how beautiful he is. Maybe I should tell him." But I really was dumb. The wine had burned out my tongue!

After a time, he made a motion for me to leave, and I gladly got up, thinking that the memory of such beauty would be well worth the loss of my tongue. Imagine my surprise when, when each person would unwittingly pass into my globe, I would see his beauty too.

Is this what it means to be a real monk? To see the beauty in others and be silent?

There have been times that I have been able to see beauty in other people, sometimes beauty that they were not likely aware of. Robin and Joel might not think in these terms, but they have the sight that comes of love. The words, "I never met a man I didn't like," bespeak this kind of love. Love is the essence of kything.

26: Passion. When we are filled with passion, we are singleminded and undistracted. Someone said that hate is closer to love than is apathy; if anything is the opposite of kything, it is apathy. Kything need not be associated with intense emotion, but passion has something of the spark of kything.

27: Tears. Crying is cathartic, and comes unbidden at the moments when something comes really close to our heart — be it painful or joyful. My ex-fiancée Rebecca commented that she was impressed at one time she saw me crying in public. My friend Amy, after reading my [treatise on touch](#), said that she wished I had written a treatise on crying — something that is well worth writing, but I don't have it in me to write. To cry is to kythe.

28: Don a mask. Putting on a mask can be a way of revealing; in role-play, I have through characters found ways of expressing myself that I couldn't have done otherwise, and many people learn more about themselves through acting. Temporarily putting on a mask allows you to kythe through that mask in a way that wouldn't occur otherwise.

29: Stand on your head. With familiarity, we don't really see the things before us; we become Inspector Clouseaus. This is why some painters stood on their heads to look at landscapes — to see afresh what was familiar. Standing on your head is not exactly a way of kything, but it does open up ways to kythe that would normally be overlooked.

I just had a change of perspective... I thought about soliciting others' insights as to ways of kything, but with some guilt, as if thinking about not doing my work. Then I remembered what I was writing about — a connected communion — and that it would be very appropriate to have this be not my isolated work but the work of several minds. So I will solicit and seek the help of others.

30: Stop hurrying. Our culture is obsessed with doing things quickly, and rushes through almost everything. Carl Jung, heretic as he may have been, had rare moments of lucidity; in one of them, he said, "Hurry is not of the Devil. Hurry is the Devil." Removing hurry, and letting a moment last however long it should

last by its own internal timing, is not exactly kything, but it is a removal of one of the chief barriers we face to kything. Kything is a foretaste of the eternal, timeless joy that is to come, and in kything five seconds and five hours are the same. One good idea before trying to kythe is to take off your watch.

31: Walks. I have just come back from a kything walk. It was warm, the ground was moist after rain, the sky was mostly covered by pink clouds, and it was silence — there was even silence in the sound of cars going by. Summer nights, with fireflies and crickets and a crystalline blue sky, are excellent for kything walks. In thinking about this, I realized that what we have is an incarnate kything — spirit moving through matter — while l'Engle portrays what is essentially a discarnate kything — spirit moving without regard to matter. It is also interesting to note that (to me at least) touch is more kything than sight — with sight potentially working at almost any range (we can see stars billions of light-years away), and touch having no range at all. I'm glad that I can absorb the grass around me in a way that I cannot absorb the grass a thousand miles away.

32: Grace. Up until now, I have written about what you can do to kythe, but there is a lot of kything that God initiates and provides. Having a vision is a kind of kything, and that is not anything you can do. My time with God by the railroad tracks was a kything with him that I had no power to create.

33: Looking. I am allergic to cats, and my family has a wonderful grey tabby named Zappy. I usually don't touch her, but I do sometimes sit and gaze at her for a while. (I just realized that looking at Zappy for a while has the same effect on me as stroking a cat has on most people.) I can recall being warmed by the same gaze as an expectant mother in my small group, Kelly, smiled at me as I stroked Lena's head (Lena being

the 5 year old daughter of the group leader). In medieval culture, beholding the body and blood of Christ at mass was in a sense almost more held to be a receiving, a partaking, than eating and drinking them. The kything power of sight is attested to in Augustine's words: "See what you believe; become what you behold."

34: Absorbing poetry. Here is an example of a poem I wrote which I think is effective for the purpose:

Beyond  
Beyond doing, there is being.  
Beyond time, there is eternity.  
Beyond mortality, there is immortality.  
Beyond knowledge, there is faith.  
Beyond justice, there is mercy.  
Beyond happy thoughts, there is joy.  
Beyond communication, there is communion.  
Beyond petition, there is prayer.  
Beyond work, there is rest.  
Beyond right action, there is virtue.  
Beyond virtue, there is the Holy Spirit.  
Beyond appreciation, there is awe.  
Beyond sound, there is stillness.  
Beyond stillness, there is the eternal song.  
Beyond law, there is grace.  
Beyond even wisdom, there is love.  
Beyond all else, HE IS.

35: Mirth. The one line from all of C.S. Lewis's writing that most sticks in my mind comes from [Out of the Silent Planet](#), where he wrote, "...but unfortunately, [name of villain] didn't

know the Malacandrian word for 'laugh'. Indeed, 'laugh' was a word which he didn't understand very well in any language." I debated about whether to put laughter in, as it has many forms — some of which, as the cynic's scoff, are corrupt, and some of which are lesser goods — but there is at least one form of laughter that really is kything. It is mirth. It can be found, for example, where old friends are sitting around a table after a hearty meal; the laughter is not just a reaction to isolated events, but a mood that has little eruptions over things that aren't that funny in themselves. It is mingled with companionship and fellow-feeling, and is a mirth that is the crowning jewel of forms of laughter.

36: Becoming good. Websters Revised Unabridged Dictionary 1913, p. 877, has:

### **Kythe**

(Kythe, Kithe) (ki&thlig;), v. t. [imp. Kydde, Kidde (kid"de); p. p. Kythed Kid; p. pr. & vb. n. Kything.] [OE. kythen, kithen, cuden, to make known, AS. cydan, fr. cud known. &radic;45. See Uncouth, Can to be able, and cf. Kith.] To make known; to manifest; to show; to declare. [Obs. or Scot.]

For gentle hearte kytheth gentillesse.

Chaucer.

### **Kythe**

(Kythe), v. t. To come into view; to appear. [Scot.]

It kythes bright . . . because all is dark around it.

Sir W. Scott.

The latter meaning of 'kythe' is the reason Madeleine l'Engle,

after a search, chose that word to carry her meaning.

C.S. Lewis said that the process of becoming good was like the process of becoming visible, in that objects becoming visible are more sharply distinguished not only from objects in obscurity but from each other; becoming good is becoming more truly the person you were created to be (being Named).

Becoming good is kything in the dictionary sense, and it is why I put it here. It is also a kind of kything, and an aid to kything, in l'Engle's sense — a stepping into the great kythe, into the great dance. It is like learning vocabulary to speech, or a conversation in which one learns vocabulary.

37: Comforting those in pain. Pain can isolate, but it can also bring down the walls around a person. I can remember now one time at a retreat when I was in the long, dark night of the soul, when I drank in a friend's silent presence and touch like a lifeline. The worst comforters offer words to fix everything with clichés and pat answers. The best often feel somewhat helpless, enduring an awkward silence as if they don't have anything to offer to so great a pain, but none the less offer something deep, more than they could have put into words, more often than they realize.

38: Presence. This facet of kything is perhaps best portrayed not directly, but in its stark silhouette, painted by Charles Baudelaire in his poem "Enivrez-vous": «Il faut être toujours ivre... Pour ne pas sentir l'horrible fardeau du Temps qui brise vos épaules et vous penche vers la terre, il faut vous enivrer sans trêve. Mais de quoi? De vin, de poésie, ou de vertu, à votre guise...» — "You must always be drunk.... to not feel the horrible burden of Time which crushes your shoulders and pushes you towards the earth, you must ceaselessly get drunk. But with

what? With wine, with poetry, or with virtue, as you please...."

Against this silhouette, of seeking something, anything, to flee into, stands out another facet of kything: that of being present, and giving undivided, focused attention. The kind of person you'd like to be around, the kind of person you'd want to have as a friend — isn't he present?

39: Digesting experience.

As for Mary, she treasured all these things and pondered them in her heart.

Luke 2:19, NJB

A book is best understood, not just after being read once, but after being gone over several times. The same thing goes for experiences — they can be contemplated and pondered. This does not have instantaneous effect, but in a certain way it makes the experience contemplated a more complete experience, one that is more fully grasped.

40: Riflery. Riflery, I discovered, is not a macho thing, and someone who comes in with a macho attitude won't shoot very well. It has much more do do with concentration, stillness, and patience. In riflery, I learned how to hold at least parts of my body so still that the biggest cause of motion was the beating of my heart. Riflery is not so much a kything with, as just a kything.

41: Brainstorming. I think I do not need to say much here.

42: Step into other people's worlds... Tonight my father, Joseph, and I went to play ping-pong. I didn't realize one thing I had been doing — playing Joe's way, Joe's rules — until I saw Dad make Joseph rather upset by insisting that he play a standard, official rules game of ping-pong. (To his credit, Dad later started playing Joe's way.) Then I realized that I had been stepping into Joe's own little world, and meeting him more completely than had I insisted we stay in the public space that

all ping-pong players share. Joe didn't exactly mean to play ping-pong; he wanted to spend some time together, play around, goof off in a way that happened to make use of the framework of ping-pong. Part of the time, he was doing silly things that weren't ping-pong (such as hitting the ball around the room), which our father frowned on, and I commented were a little bit of Janra-ball (see below), a compliment which Joe said he really appreciated. People invite you into their worlds all the time, but the invitations don't have much fanfare and can be hard to notice. I'm glad I accepted Joe's invitation.

43: ...and invite others into your own. In one letter, when cherished abilities were beginning to return, I wrote:

The other thing which I have to share now is something which happened during the Gospel reading at the mass. I had my first theological musing in a long while. That touched a greater frustration — that of reading some of the richest passages of the Scriptures, and learning almost nothing from them. There had one text that I read and was able to appreciate, if not being able to think much at all (Isaiah 60: "Arise, shine, for your light has come..."). This bleak dryness was broken both mentally and emotionally (there is a distinct and deep pleasure I have in theological reasoning), as I mused over the words: "In my Father's house there are many dwelling-places [or rooms, or mansions, in other translations]."

The most obvious interpretation of this metaphor is to think of a physical building, and that is surely appropriate. But I began to think of another interpretation of the dwelling-places, and that is this: our souls and spirits.

We have a temptation and a culture which defines

happiness and sadness almost purely in terms of what is materially external to us: our possessions, the way others treat us, etc. That is certainly relevant — in that such blessings are to be gratefully received as a part of God's grace and provision, and pains are a real suffering to work through — but even more important and more central is what is internal to us and our interactions and relationship with God. Being an alcoholic is a worse suffering than being in prison. It is something related to this insight that is behind many Eastern religions defining Heaven and Hell to be defined almost purely by your internal state. One Zen koan tells us:

A Samurai came to a Zen master and said, "Show me the gates of Heaven and Hell."

The Zen master said, "Are you a Samurai? You look much more like a beggar. And that sword — I bet it is so dull that it could not cut off my head."

The enraged Samurai drew his sword, and raised it to strike the master down.

The Zen master said, "Now show me the gates of Heaven."

The Samurai sheathed his sword, bowed to the master, and left.

A person's bedroom is a place that has flavor and detail; it is an interesting place to explore, especially as compared to the sterility of a classroom or some other public place. A person's soul, too, has something of this color and distinctiveness; there are interests, memories, stories, and other things even more vital but which I have more difficulty describing — the particular virtues and vices, the

particular tendencies, which cause a person to act unlike any other. A soul, like a house, is a place of hospitality — a guest is invited into a host's house, to enjoy his comforts, his foods, and a friend is invited into another friend's soul, to enjoy it in a deeper form of the way in which we enjoy a friend's house. (In Heaven, there will be very much opportunity for hospitality; it will be the final place of community and celebration, and therefore our dwelling places can hardly be places of isolation.) For many years, I thought of this passage in terms of something of a more ornate, perhaps almost magical, physical edifice that would be nothing more; now, I see what is in retrospect obvious: when the old order of things has passed away and behold, all things are made new, our dwelling places will not simply be better purely physical buildings, but better than purely physical buildings. This is just as our bodies, which are dwelling-places of the Holy Spirit, will not simply be better purely physical bodies, but pneumatikon, spirit-bodies, better than purely physical bodies. I thought before of these rooms as physical rooms which we would decorate with artistic creations — and those artists among you will know what it means, and what a room means, when you are able to fill it with your artwork. I still do believe that — and I realized another form that will take. By our faith, and by our works, we are doing with our spirits what an artist does with a room when he toils over artwork to adorn it with. We are shaping the dwelling places we will have for our eternal play (and one of the images painted of Heaven is one of neither work nor rest, but pure and unbounded play). God is shaping us to become gods and goddesses, but he is not doing it in a way that bypasses us and our free will; we are working with

God in the work that will shape us forever.

Our souls, like our domiciles, are special places, far more than public places that anybody can enter without asking permission, in which to receive other people.

44: Nursing. The natural focal distance for an adult's eyes is twenty feet and on; the natural focal distance for an infant's eyes is eighteen inches, the distance between a woman's nipple and her nose. (Infants look at, and remember, noses rather than eyes.) Feeding, important as it may be, is only the beginning of what is going on when a mother is nursing a child. To put it another way, the necessity of physical feeding provides the occasion for a kything of love that provides even more necessary spiritual feeding.

45: Pregnancy. A fortiori.

46: Timeless moments. One person, speaking of singing a worship song, suggested thinking not so much in terms of "We start and stop this song," as "This song always has been going on and always will be going on; we just step into it for a time." In this spirit, there are moments of kything, often unsought and unattempted, which do not so much start and stop as are a stepping into the Eternal Kythe.

47: Parenting a child with a severe disease. At a bioethics conference, Dr. C. Everett Koop said, "There is a special bond that forms with a defective child, often far moreso than a normal child." He told a story from the practice of a Jewish pediatrician and colleague. A father lost a second child to Tay-Sachs, a degenerative disease whose people do not live to the age of four. Grieving, he said through tears, "He never gave me a moment's trouble." I am not sure why this is, but it may have something to do with why I enjoy a small glass of wine more than

a bottomless cup of Coke.

48: Corporate worship. Worship is a foretaste of Heaven, and it plays a focal role in the Eastern Orthodox emphasis on bringing Heaven down to earth; they describe their worship as stepping into Heaven. Worship is also the highest form of love. In these two aspects, at least, worship is kything. Corporate worship is a kything not only with God, but with the others you are worshipping with.

49: Janra-ball. This is a [game](#) I devised, and has been described as a Zen NOMIC. To excerpt the ingredients list:

Springfield, Monty Python, Calvin-Ball, body language, Harlem Globetrotters, sideways logic, Thieves' Cant, Intuition, counter-intuitive segues, spoon photography, creativity, Zen koans, Psychiatrist, adrenaline, perception, tickling, urban legend Spam recipe, swallowing a pill, illusionism, NOMIC, modern physics, raw chaos, F.D. & C. yellow number 5.

I originally hesitated to put this in, on the grounds that it is difficult to play, at least in a pure state. There've been a couple of times I've gotten together a group of people willing to play, and it didn't work. I thought it would require players with more of something — perception, intuition, creativity, spontaneity, etc.

— but in thinking recently, I have come to believe that it's something, like empathic listening, that can't just be turned on at will, especially by someone inexperienced (which would be everyone now). Joseph's behavior at the game last night persuaded me that it is indeed possible, perhaps best started at in small increments from a more structured game. (Maybe Pooh's Corner will be able to play. Who knows?) I will say this: It's a

difficult game to play, but if you can play it, it's an awesome kythe.

For further information, click [here](#).

50: Synchronicity/attunement. As treated in [The Dance of Life](#), people have rhythms about them — outside of conscious awareness — and when people are together, these rhythms can become attuned (and, if so, the people themselves are more attuned). This is something that is not as well appreciated in our culture as in others. The easiest example or analogue I can point to (I'm not sure which) is in walking together and holding hands.

When I was dating Rebecca, it took me a long time to learn to get in step, and stay in step — but things were smoother when I did.

51: A kind of openness. There is a kind of openness where you perceive something but can't put your finger on exactly what. If you can listen, be opening, look, then there is a sort of listening kything. I checked out a copy of [A Wind in the Door](#) yesterday, and when I was reading through to find insights for more ways of kything, I came on something that I felt was significant to what I'm writing, but I couldn't say what. I sat then, open, thinking, waiting to see what it was — and then realized that it was not the heart of a way of kything, but something to put at the beginning:

What he had actually seen she could not begin to guess. That he had seen something, something unusual, she was positive.

This is the same sort of feeling I felt about kything.

This is part of how kything is to Charles Wallace:

Meg said sharply, "Why? What did mother say?"  
Charles Wallace walked slowly through the high grass in  
the orchard. "She hasn't said. But it's sort of like radar  
blipping at me."

This kind of listening kythe is how I get a lot of the ideas for  
these items.

52: Introspection.

Then [Blajeny] sat up and folded his arms across his  
chest, and his strange luminous eyes turned inwards, so that  
he was looking not at the stars nor at the children but into  
some deep, dark place far within himself, and then further.  
He sat there, moving in, deeper and deeper, for time out of  
time. Then the focus of his eyes returned to the children,  
and he gave his radiant smile and answered Calvin's question  
as though not a moment had passed.

Introspection is a kything with oneself.

53: Forgiveness. Forgiveness is a spiritual act, a restoration of  
broken communion.

54: Artistic appreciation. In high school, I made a silver ring,  
designed to hold a drop of water as a stone. When I started to  
paint, I learned a new way of seeing. After a painting in which a  
pair of hands played prominently, I was captivated by the beauty  
of people's hands all around me; for the first time in my life, I  
saw in them a beauty as great as that of faces.

What an artist does is allow you to see through his eyes.  
When you look at a friend's watercolor, you are seeing the beach  
through her eyes, as you would not have perceived it yourself.  
When you read this list, you are thinking about the word 'kythe'  
through my mind.

55: Talking. This one is so obvious I overlooked it completely. The magic of symbols that allows mind-to-mind communication is one that is appreciated, for instance, when trying to work with someone who doesn't speak a common language with you.

56: Looking into another person, and telling him what you see. I have always enjoyed other people telling me what they see in me. For a time, I thought that was vanity, and vanity certainly played a part. But recently, I have come to see a deeper reason for asking this of other persons.

I have for a while enjoyed asking foreigners what they think of American culture, and probed a bit not only for the appreciation they will voice, but criticisms. Most foreigners can articulate the character of American culture better than can most Americans, and they have insights that wouldn't occur to an American. They see things that have become invisible to Americans. They have a distance, like aesthetic distance, that allows them to see what is too close to be visible to us.

For the same or analogous reasons, having another person tell you what he sees in you is another variant on introspection, like using a mirror in looking at yourself to see parts you can't look at directly. Different people who have known you for different amounts of time can see different parts of you.

When you tell another person what you see in him, you provide this sort of introspection; your words fuse with his knowledge of himself to form a deeper self-knowledge, and say more to him than they would mean to anyone else. They connect. They kythe. It is like the story of the crystal globe — only you can tell people how beautiful they are.

57: Driving. In the car this morning, after having to take my brother to school and my mother to work, I was thinking about the podracing in Star Wars: Episode I — one of the most

Jedi/Force parts of the movie — and I realized I was really enjoying driving for the first time in years. (I started late in driving, and have a fear of it. I had enjoyed singing while driving, but not driving itself.) I was very aware of my surroundings, and connected, and entered flow. Though I stayed within the speed limit and there were no hazardous conditions, it was in a very real sense podracing. It was a kythe with my surroundings and especially with my car, which was as an extension of my body. It is entirely possible to kythe with technology (and I was seeking an example), to have your hands on a steering wheel or a keyboard so that you are thinking through them, and your thoughts are not on your hands or fingertips, but where the car is moving, or what letters are appearing on the screen.

Technology (techne, art + logos, logic, reason, domain of knowledge) is part of the creation of the imago Dei, and therefore has a role in God's order. There is a tendency for the sort of people interested in kything things to be Luddites, but this need not be. If you can kythe with God, with another person, with a shaggy dog, with the grass, with ideas, with experiences, then you can also kythe with a car, with a computer.

58: Pain. This one will probably be difficult for most Americans to understand, and I'm not sure I can explain it well — here I will probably be talking around my point mostly. We live in a painkilling culture, one that attempts to delete that entire region of human experience, and therefore neither understands nor profits from it.

A place to begin is to say that leprosy ravages the body through one very simple means: it shuts off a person's ability to feel pain. Exactly how shutting off pain causes such severe damage is left as a valuable exercise to the reader's imagination. Pain is an awareness of your body's state, and of what you can

and cannot do without aggravating an injury. I very rarely take painkillers, because I want to know exactly how my body is doing. (Sunday night was the first time in memory of taking a painkiller not prescribed by a doctor.)

In addition, pain is a present sensation; it is not in our nature to not notice. Intense pain can fill consciousness. (Some mentally ill people self-mutilate because the sensation of physical pain, if only momentarily, can take them out of their mental anguish.) If all our kything is as real as pain, we are doing well.

59: Death. What was said about pain and our culture applies, *mutatis mutandis*, to death and our culture. (I don't know any good books on pain; a good, deep book on death is Peter Kreeft's [Love is Stronger Than Death](#).) In other kythes, you kythe love, or ideas, or listening; in this kythe, you kythe yourself. The art of dying well is an art of letting go of a world you've known for years and giving yourself fully to God. That's about as full of a message as you can send.

60: Gift-giving. A good gift is at least three messages: a statement about the nature of the person giving the gift, a statement about the nature of the person receiving the gift, and something else peculiar to the character of the gift. None of these messages are symbolically encoded, and the result is that they can say things inexpressible in normal words. A gift is not worth a thousand words; there is no exchange rate between gifts and words.

61: Reminiscing. Reminiscing is a kything with memories.

62: Local traditions. There are traditions, like Pooh's Corner or Club Pseudo (a tradition at my high school, similar to an open mike at a coffeehouse). These traditions have a unique local flavor and personality, and create a special bond among participants. Janra-ball, if it works, would be another example.

63: Community. Community is like friendship, but it does not reduce to friendship. A community is more than a set of friendships, as a friendship is more than two isolated individuals.

64: Ellis lifeguarding. This entry should not be written by me; it should be written by my high school acquaintance, Chuck Saletta. American Red Cross lifeguards are taught to respond to problems; Ellis lifeguards are taught to see them coming. Chuck has written that he knows ahead of time when a swimmer is going to be in distress, and also that on the highway he watches the cars ahead of him and is usually able to tell whether or not they'll turn on an exit — before they put their turn signals on. That has to involve an attention and attunement to the situation that is noteworthy.

65: Gathering.

"Has Mother actually told you all this?"

"Some of it. The rest I've just—gathered."

Charles Wallace did gather things out of his mother's mind, out of meg's mind, as another child might gather daisies in a field.

This is another passage that sticks in my mind as an insight into kything. I gather when I muse, when I have certain intuitions. I gather passages from the book. Where do you gather?

66: Firing a ballista at your television. Television is a crawling abomination from the darkest pits of Hell. It is a pack of cigarettes for the mind. It blinds the inner eye. It is the anti-kythe.

A home without television is like a slice of chocolate cake without tartar sauce.

When I was in fourth grade, we read *The Last of the Really Great Wang-Doodles*, and then drew pictures. My teacher commented that she could tell from the pictures who watched TV. Get rid of your television, and you will find yourself living life more fully, and kything more deeply.

Two good books dealing with this topic are Neil Postman's concise and lively [Amusing Ourselves to Death: Public Discourse in an Age of Show Business](#), and Jerry Mander's in-depth [Four Arguments For the Elimination of Television](#).

67: Boundaries. Boundaries are an important part of friendship; the boundaries of a message give it shape; drinking a certain amount of wine and then stopping enables you to enjoy it without becoming drunk. Boundaries are a kind of kythe, and also a part of other kythes; a hug is best if it is neither too short nor too long.

68: Thunderstorms. Imagine that you are a child, outside in a thunderstorm at night, with the rain warm and heavy, the wind blowing about, the trees dancing, everything suddenly illumined by flashes of lightning. This is a night to connect with, to drink in.

(Idea taken from Robin Munn.)

69: Using a knack. I am adept at finding pressure points on the body — not just the ones I know, but the ones I don't know. I can tell from looking if a person will say 'yes' or 'no' to a hug. More fallibly, I can sometimes guess if a person is ticklish (hi, Ashley!).

I don't know how I do any of these things, but these knacks are a form of kything.

70: Trying to kythe. I think it was Richard Foster who said that the very act of struggling to pray is itself a form of prayer.

Last night during Pooh's Corner, my fear of driving began to act up, and I walked out of the building thinking, "I won't be able to kythe now. I'm not in the proper frame of mind." Then I realized — no, I could kythe. I couldn't produce the same end result, but I could put myself into it. A small child's crayon drawing of a five-legged dog whose head is larger than its body is a beautiful thing, and it is made beautiful not by the performance criteria that a commercial product would be judged by, but by the love and effort that went into it.

I have attention deficit disorder. I can hyperfocus at times (exactly which times being largely out of my control), but quite often I haven't connected with Pooh's Corner. I haven't been in the silliness, drinking it in even as an observer. What I have realized in writing this entry is that that doesn't matter nearly as much as I thought it did, just as the crudity of the above described drawing doesn't matter very much. It doesn't matter if I often don't succeed. I try. I kythe.

71: Weight lifting. The amount of force coming from a muscle is the result, not only of the muscle's size and condition, but the amount of nervous impulse coming from the brain. People can normally summon only a small fraction of the total possible muscle impulse. One case where there can be full or near-full exertion is when people are terrified; they can possess something called hysterical strength, where it is entirely possible for a small, middle-aged woman to lift the back end of a car. Another is an epileptic seizure; in my EMT class, we were told not to try to restrain someone having a seizure, because bones will snap sooner than muscle strength will give out.

I trained with weights for a few years, and doing so was largely on will. I had pencil-thin arms and legs as a child, and worked to the point of having a Greek figure. (I now have a

Greek figure plus a paunch, but we won't get into that.) I got to the point of being able to lift the full stack (as much resistance as a machine designed for football players can give) on the better part of the machines, and (in moments of being macho and trying to do something I could brag about) walked a couple of short steps while carrying over 400 pounds of weight, and injured my hand by punching through stone tiles. I didn't get much bigger after a certain point. Only a small portion of my doing those things was muscle. The rest was mind.

Many of the items above have been kythes of drinking in. This a kythe of putting out.

72: Doing something new and difficult. When you are skilled at something, you don't have to put much of yourself into it to succeed. In high school, I put a lot of effort into trying to learn how to balance on a slack rope. I never really succeeded at what I aimed for, but I learned a couple of things. My balance improved a lot. One person watching me said it was like watching the sensei catching flies with chopsticks, in *The Karate Kid*. Even if I didn't succeed at my intention, I learned to put my whole self into it.

73: Going through a difficult experience together. Meg and Mr. Jenkins came to know each other in a way that never would have happened had things been light and sunny. It may not be seen for the pain at the moment, but afterwards a growing-closer has happened.

74: Intuitions. Being attuned to, and using, your intuition is another way of kything.

75: Knowing others.

[Meg:] "...Did you know it was one of Calvin's brothers who beat Charles Wallace up today? I bet he's upset—I

don't mean Whippy, he couldn't care less—Calvin.

Somebody's bound to have told him."

[Mrs. Murray:] "Do you want to call him?"

"Not me. Not Calvin. I just have to wait. Maybe he'll come over or something."

One form of communion comes from knowing another person so well that communication is unnecessary. There is something more in this passage than if Meg had called Calvin — far more.

76: The useless. Many of those areas of human intercourse which are cut out by American pragmatism are the areas of speech which most embody kything. Within speech, talking about how to get something done is not a kythe — certainly not compared to a discussion which conveys love or insight or theory. Kything is something that's not in Pierce's and Dewey's practical world.

77: Culture. Culture, often invisible to us, is a shared kythe across a group of people. It is the framework for communication, a kythe that gives other kythes their shape.

78: Wordless knowledge. When I was at Innes's house, she asked me if I thought my twin brothers Ben and Joe were introverted, extroverted, etc. My first response, after a bit of a pause, was, "I don't know." I thought some more, and realized that the truth was slightly different: it had never occurred to me to think about them in those terms.

After I read [Stranger in a Strange Land](#), I began to realize that many of my deepest thoughts were not in English, not for that matter in anything like verbal language. When I write them down, it is usually a translation, and sometimes matter a far more difficult translation than between English and French. It is more like trying to translate a song into a poem. These thoughts are of

a wordless thinking, like the kything of the fara.

[Personal Knowledge](#), a profound book and an excellent cure for insomnia, deals with those facets of human thought and interaction that do not reduce to words.

79: Being underwater. I felt that this was a kythe, but couldn't put my finger on how. I still can't fully articulate it, but it has a similar feel to a visual kythe. The beginning of [A Dream of Light](#) provides a good description of an underwater kythe:

You pull your arms to your side and glide through the water. On your left is a fountain of bubbles, upside down, beneath a waterfall; the bubbles shoot down and then cascade out and to the surface. To your right swims a school of colorful fish, red and blue with thin black stripes. The water is cool, and you can feel the currents gently pushing and pulling your body. Ahead of you, seaweed above and long, bright green leaves below wave back and forth, flowing and bending. You pull your arms, again, with a powerful stroke which shoots you forward under the seaweed; your back feels cool in the shade. You kick, and you feel the warmth of the sun again, soaking in and through your skin and muscles. Bands of light dance on the sand beneath you, as the light is bent and turned by the waves.

There is a time of rest and stillness; all is at a deep and serene peace. The slow motion of the waves, the dancing lights below and above, the supple bending of the plants, all form part of a stillness. It is soothing, like the soft, smooth notes of a lullaby.

Your eyes slowly close, and you feel even more the warm sunlight, and the gentle caresses of the sea. And, in your rest, you become more aware of a silent presence. You were

not unaware of it before, but you are more aware of it now.

It is there:

Being.

Love.

Life.

Healing.

Calm.

Rest.

Reality.

Like a tree with water slowly flowing in, through roots hidden deep within the earth, and filling it from the inside out, you abide in the presence. It is a moment spent, not in time, but in eternity.

You look out of the eternity; your eyes are now open because you have eternity in your heart and your heart in eternity. In the distance, you see dolphins; one of them turns to you, and begins to swim. The others are not far off.

It lets you pet its nose, and nestles against you. You grab on to its dorsal fin, and go speeding off together. The water rushes by at an exhilarating speed; the dolphin jumps out of the water, so that you see waves and sky for a brief moment before splashing through the surface.

The dolphins chase each other, and swim hither and thither, in and out from the shore. After they all seem exhausted, they swim more slowly, until at last you come to a lagoon.

In the center, you see a large mass; swimming closer, you see that it is a sunken ship. You find an opening...

80: Becoming ancient. Most entries so far have focused on what you do when you kythe. This is an entry about who you are.

When you are ancient, you have had ages to let God work with you. You have had time to grow mature. You have gained experience. You have lived through many events and circumstances. You have smiled on generations. You have experienced change, both without you and within you. You have learned what is constant, both without you and within you. You have grown wise. You kythe with depth, with reality. You are like Senex (whose name means 'aged'), like the fara — deep, rooted, moving without motion, sharing in the age (however faintly) of the Ancient of Days. Become all this, and you will kythe.

81: Becoming a child. When you are a child, you look with wonder at every bit of the world God has made; you do not know jadedness. You do not know guile; it would never occur to you to wear a mask. You play. You are never afraid to come running for a hug. You stay out in the rain. You always want to grow. You always want to know, "Why?" You bear a peace no storm has troubled.

You can believe anything. You are like the little farandolae, dancing, swimming. Become all this, and you will kythe.

82: Doing something for its own sake. Someone said that a classic is a book that everybody wants to have read and nobody wants to read. There is a big difference between reading a book because you want to have read it, and reading it because you want to read it. The former is something to endure, the latter something to enjoy. For a while, when I drove, I would often drive five or ten miles under the limit, and when I started driving at the limit, it was mainly as a courtesy to not stress other drivers, and because I started driving on streets with heavier traffic where it would be hazardous to drive that much more slowly than the flow of traffic. I do not generally get tense (for reasons other than my fear of driving, and blunders I make as I still learn to drive), have nervous fidgets, get angry, or

experience stress at red lights, slow traffic, and other delays that shoot some drivers' blood pressure through the roof. The reason is that I am operating within a mindset of "I am driving; I am in the process of getting there; I will be there," as opposed to "I need to be there now, and I am tolerating this drive because it is the least slow means of getting there, and— Hey! That's another second's delay. Ooh, that makes me mad!" Pirsig treats this point at some length in the section of [Zen and the Art of Motorcycle Maintenance](#) that deals with climbing and his son's ego climbing.

Of course many activities are means to other activities, and we would be in a bad state if we couldn't do one thing to get at something else. But even then, intermediate activities that are trampled on are not good to do. Really wanting to do something, and doing it for its own sake, is a kythe with the activity that is better for both you and the activity.

83: Silence.

Through [Mr. Jenkins's] discouragement she became aware of Calvin. "Hey, Meg! Communication implies sound. Communion doesn't." He sent her a brief image of walking silently through the woods, the two of them alone together, their feet almost noiseless on the rusty carpet of pine needles. They walked without speaking, without touching, and yet they were as close as it is possible for two human beings to be. They climbed up through the woods, coming out of the brilliant sunlight at the top of the hill. A few sumac trees showed their rusty candles. Mountain laurel, shiny, so dark a green the leaves seemed black in the fierceness of sunlight, pressed towards the woods. Meg and Calvin had stretched out in the thick, late-summer grass, lying on their backs and

gazing up into the shimmering blue of sky, a vault  
interrupted only by a few small clouds.

And she had been as happy, she remembere, as it is  
possible to be, and as close to Calvin as she had ever been to  
anybody in her life, even Charles Wallace, so close that their  
separate bodies, daisies and buttercups joining rather than  
dividig them, seemed a single enjoyment of summer and sun  
and each other.

That was surely the purest form of kything.

When I was in France, Rebecca wrote a letter about some of  
the moments she valued most with me. There was one moment  
when we went into the fine arts center, and I improvised on the

organ for her,  
and then we sat  
in the silence  
in the dark  
not saying anything  
not doing anything  
just being.

Other people had talked with her and done things with her. I  
was the first person to be in the silence with her, and it  
profoundly affected her.

84: Dodge-ball. When I thought of this during a slow, back-  
burner brainstorm, I initially wanted to put it in because of pride  
and boastfulness: I wanted to impress you with how talented I  
am. Then I realized what I was thinking, and realized that was  
entirely out of place, and decided to definitely leave it out. But I  
still had some idle thoughts about it mulling about... and I  
mused... and realized something amazing. This definitely belongs  
in.

Tn dodge-ball I couldn't throw worth beans. Still can't. But

In Dodge ball, I couldn't throw well in beans. One day, in a lock-in for sophomores at IMSA, I joined a game of dodge-ball, and hid around in the back... and noticed that there were fewer and fewer people left on my team... and then I was one of two... and then the only one. Then, for five minutes, I dodged the whole other team throwing at me, sometimes four or five balls at once, and then a ball brushed me. When I stopped and began to slow down, I realized that the soles of my bare feet were burning hot from the friction of my jumping. After another game like that, people decided that if it got down to the other team versus me, the game was a draw.

One of the upperclassmen supervising, Paul Vondrak, was a great thrower; he was able not only to throw accurately, but to throw much faster than anyone else. He would stand, wind up slowly, and throw like lightning. I think it only took him about five throws to nick me.

I was thinking about this latter item, and (examining the memory) realized that I was paying very close attention to him... then realized that I was attuned to him... then thought that it was almost like a martial artist... and then realized, in a flash of insight, that in the one game I was doing the same thing a Samurai does when he defeats ten men. I do not understand exactly why I was able to do this without any special training or experience, although it does lend some corroboration to the puzzling fact that as a karate white belt I was able to defeat two out of three of my blackbelt instructors in sparring. Now I know that I have had an experience I would not ordinarily expect to have access to. I guess I would chalk it up to an unusual talent for certain kinds of kything.

I was trying to analyze my state of mind in (especially) the five minute dodge at the end, and the first thing I realized was that I don't remember that state of mind too well — not as well

...that I don't remember that state of mind too well. Not as well as I remember feeling that my feet were hot afterwards. From what I remember, my state of mind differed from normal consciousness. A hint of an explanation would be to say that the perceptual processing alone would have severely overloaded my conscious mind. It could also be described as flow or pod racing. I know there's more, but I can't get at it. If I can better process this memory, I think I will better understand kything. As I mull over this, I think that those five minutes may qualify as the most intense kytke of my life.

85: Reading another person's body languages and emotions. As telekinesis is really moving things with your arms and telepathy is really talking, Charles Wallace's awareness, without being told, of what's going on in Meg is really a perception of others' emotions. This is the origin for the spark of beauty in that facet of Charles Wallace's kything, and it is an area where I'd like to grow.

86: Withdrawing.

[The Shal's] moments of community are profound; their moments of solitude are even more profound. 'Withdrawing' is what they call it; it is a time of stillness, and an expression of a love so profound that all other loves appear to be hate. It is a time of finding a secret place, and then withdrawing — from family, friends, and loved ones, from music and the beauty of nature, from cherished activities, from sensation — into the heart of the Father. It is a time of — it is hard to say what. Of being loved, and of loving. Of growing still, and becoming. Of being set in a right state, and realigned in accordance with the ultimate reality. Of purity from the Origin. Of being made who one is to be. Of communion and worship. Of imago dei filled with the light of

Deus. Of being pulled out of time and knowing something of the eternal.

[Espiriticthus: Cultures of a Fantasy World not Touched by Sin.](#)

87: Zoning out. This is one of the last places one would look for kything; Robin observed that one of the central themes tying these entries together is presence, and this would seem to be the essence of absence. For all that... I found myself spacing out, and left the spacing out for introspection, and realized that my mental and emotional state was that of kything. A start of an explanation is that if it is an absence, it is entirely devoid of the Baudelarian flight urged in Enivrez-vous. It is a present absence; it goes into It is an egoless sliding into enjoyment. It is still and peaceful; it is quite restful; it is a good. Being in a similar attitude will help other kythes.

88: Playing Springfield. Springfield is a game with very simple rules: two people alternate naming state capitals, and the first person to name Springfield wins.

What makes it interesting is that it's not a game of mathematical strategy. It's a game of perception. The real objective is to win as late as possible, and that means reading the other person and seeing how far you can go: from nonverbal cues, you need to read his mind.

Springfield is probably comparable to poker.

89: Thinking deeply, prolongedly, and intensely about a question. I realized today that I had been thinking pretty hard about kything for several days, and thought I should take a sabbath from it: I would record ideas that I had, but not intentionally give conscious thought to the question. It was after I did that that I began to realize how deeply I had been kything

with the idea of kything.

The first thing I noticed was that it was hard to stop thinking. The second thing I realized was that I was still thinking of ways of kything. I probably don't have to devote any more conscious effort to thinking to complete the number of entries.

When you think in that manner, for a sufficient length of time, your thought acquires the momentum of a freight train. Mathematicians solve some of the most difficult problems after long and intense thought, and then cessation of conscious thought, usually to the point of forgetting it — and the solution comes. If it can be solved by continuous thought, it is not among the most difficult problems; the mathematician is not exercising his full abilities. When the storm ceases and the surface of the ocean stills, then the Leviathan stirs in the deeps. Deep calls to deep. This is perhaps the most profound kythe with an idea.

90: Experience. Experience in a domain constitutes and enables a kythe with that domain. My Mom asked me if I had a universal adaptor for her tape recorder, and I pulled one and said, "Is this the right jack? If it isn't, I have another." She said, "I don't know, let me see." A short while afterwards, she called me over to look at it, because "it seems to have two prongs." I looked at, and instantly realized that it didn't need an adaptor. It needed a power cord.

I was mildly irritated, and was finally able to put my finger on something I'd felt. Answering her help requests with technology has the same feel to me as explaining things to a small, naive child who doesn't understand how the world works. She sees technology as this mysterious, unpredictable black box which works by magic.

I thought a little more, as my mother is neither naive nor childish. She is an intelligent and well-educated woman. What I

realized was that I was not appreciating my own experience. Experience enables a person to look at the surface and see the depths — and a port for a power cord does not look fundamentally different from what a port for an adaptor might be. I see a computer as having definite inner workings which work according to understandable principle; when the computer is malfunctioning, I think I have a chance of understanding why. If my Mom thinks that the computer is a black box (you can see what it does, but not what's inside it), I think of it as a white box (you can see what's going on inside, and try to fix it if need be). The way I look at computers might be compared to the topographical anatomy I was taught in my EMT class, where you look at skin and see the underlying organs.

You kythe more when you're interacting with a white box than with a black box, and that comes with experience.

91: Closing your eyes.

[Charles Wallace] closed his eyes, not to shut out Louise, not to shut out Meg, but to see with his inner eyes.

I closed my eyes when visiting my friend Innes's house, and I realized what I was doing, and why: to focus, to connect, to concentrate. This is why couples close their eyes when they kiss; this is why we have the custom of closing our eyes when we pray. The image of a blind seer is a part of myth and literature; when we close our eyes, we momentarily blind ourselves so we can see.

92: Mental illness. Mental illness is not exactly a purely negative thing. It is a difference that is ecological in character, with positive as well as negative aspects. This very dark cloud has a silver lining, sometimes a mithril lining. This is why people with mental illness speak of a gift — something that puzzled me

when I first heard it.

93: Mental health. If mental illness is a way of kything, then mental health is definitely a way of kything. Robin is a good friend and an excellent listener, and he radiates health. And Joel

—

Robin once mentioned a theatre professor saying of his predecessor that with most people, they walk into a room and it's "What about me?" His predecessor walks into the room and it's, "What about you?"

I remember thinking, "I'd like to have a friend like that," and then, "I would like to be like that." A day later, I realized that I do have a friend like that: Joel. With Joel, it's "What about you?"

Joel is a very good kyther.

94: Watching or studying a kythe.

[Meg] found herself looking directly into one of his eyes, a great, amber cat's eye, the dark mandala of the pupil, opening, compelling, beckoning.

She was drawn towards the oval, was pulled into it, was through it.

My brothers were playing, and I was watching Ben and Joe play. I became aware of an energetic character to the play, and then I recognized a kythe a split second before remembering the entry about play as kything. So I decided to watch — and then I realized I was in the kythe.

95: Nature. To be out in the woods, or looking at night at the sapphire sky and crystalline stars, or listen to the sounds of a forest, or to play with an animal, or wade barefoot through a cold, babbling brook — these are ways of kything with nature.

(Taken from Innes Sheridan.)

96: Swallowing a pill. Learning to swallow a pill was a long and traumatic experience for me; for the longest time, I tried my hardest and just couldn't do it. The reason was precisely that I was trying my hardest: I was trying much too hard. When I finally did learn, I learned far better than most; I can now swallow several decent-sized pills on a sip of water — when I was last hospitalized, the nurses remarked at how little water I needed, and told me to drink more.

In what is for the most people a minor learning experience, I came to really appreciate how easy swallowing a pill is — to easy to force or accomplish by willpower. In this regard, it is not only an example of kything, but a symbol. Do, or do not. There is no try.

97: Mystical experiences. These are bestowed by God, and are not human doing; visions may come once or twice in a person's life, not at all for most people. When they do happen, they are a special moment of grace, and communion with God, and they can leave a person changed for life.

98: Massage. Being able to do backrubs is a good skill to take to college campuses. When you give another person a massage, you communicate with his body through touch, and relax the flesh, the body, and the person you are touching, more fully than he can himself. It is different from many other touches, in that it is not spontaneous or habitual; it is a special time set aside to connect.

99: Saying farewell.

Parting is such sweet sorrow.

-William Shakespeare

*When someone's leaving, people say many of the things that*

When someone is leaving, people say many of the things that they should have said long before but never got around to. Barriers come down. People realize how much others mean. They cry.

That is an obvious insight into saying farewell. What is less obvious is that these things can happen at any time. It is not so much that people can't normally commune in this manner and are specially enabled to when someone leaves, as that people normally avoid this communion, and when some leaves they realize how bad it would be to them at any point. You can tell someone how much they mean to you any day. I did something like this for Robin recently, as I stopped from writing this to think about practicing what I was preaching. He and I are both glad I did. One part of the barriers coming down is that sharing yourself is inherently risky, and there is less risk if a person is leaving — if you share something that makes the other person think you are stupid, at least he'll be away. So people share more. If you realize this, you can share on ordinary days what you would normally share when saying farewell — and grow closer. It might be a good idea to hold a farewell party for someone when he's not going away. The same may be said for a funeral — there is something magnificent that goes on at a funeral, that doesn't really have to wait for a person's death.

100: Anything. Thursday night, I was at a band concert at Ben and Joe's school. Afterwards, when walking through the mass of people, there was a moment when I was looking down into a little girl's face, and as it passed I realized I was kything. There is a sense in which anything can be kything, if it is done in the right way.

Now we kythe darkly and through a glass. Then we shall kythe fully, spirit to spirit, even as we are fully kythed.

---

I look for books that are filled with the Romance; they come to me in the strangest of ways, but they are impossible to find. I started this journal thinking it was not very good... I have realized that I may be writing a book filled with the Romance, a scrapbook of the beautiful. It is not something that I could have even approached if I had tried.

Sunday, 12/5/99

I haven't been writing in the main part of the journal for a couple of days, because I have been concentrating my creative energies on the kything entry. I haven't really had a singular event to prompt a journal entry, but I wanted to put something in as an update on how I'm doing.

When I thought about what to write, I realized something. All is well with my soul. Of course I should not get cocky ("He who thinks he stands should take heed lest he fall."), and this isn't the end of the growth God wants for me. But I am close to God. I am spiritually awake. It is in a way that would surprise me; I am doing ordinary things, and enjoying working on my creations. Ecclesiastes, even if it is the most pessimistic book of the [Bible](#), says (2:24, 9:7, NRSV):

There is nothing better for mortals than to eat and drink, and find enjoyment in their toil. This, also, is from the hand of God.

Go, eat your bread with enjoyment, and drink your wine with a merry heart; for God has long ago approved what you do.

I am doing these things, and enjoying their blessings. It is nothing spectacular, at least not in the Hollywood sense, but Hollywood can be quite blind. I am worshipping God in the

Hollywood can be quite blind. I am worshipping God in the ordinary things that are not very ordinary at all, and I see in them what Baudelaire cannot.

Here ends the Journal of an Awakening. It ends, not for the reasons I anticipated at the beginning, but because the awakening has reached its proper end (both finis and telos): I am awake. I mean to continue to journal, but this journal has reached its logical conclusion.

Please pray for me, that I remain steadfast in the abundant life God has given me.

JSH

soli deo gloria

# Knights and Ladies

I would like to talk about men and women and the debate about whether we are genuinely different or whether this aspect of our bodies is just packaging that has no bearing on who we are. I would like to begin by talking about three things:

- "Egalitarianism," which says not only that men and women are due equal respect but the differences are differences of body only and not differences of mind, heart, and spirit.
- "Complementarianism," which says that there are real and personal differences, and men and women are meant to complement each other.
- Why the debate between egalitarianism and complementarianism is like a car crash.

## **Egalitarianism, Complementarianism, and Car Crashes**

I was in a theology class when the professor argued emphatically that for two claims to contradict each other, one must be the exact opposite of the other. With the example he gave, it sounded fairly impressive, and it took me a while to be able to explain my disagreement.

Saying, for one claim to contradict another, that one must be the exact opposite of the other, its mirror image, is like saying that you can only have an auto collision if the two cars are the same kind of car, with the same shape, and they must be perfectly aligned when they hit each other—because if there's part of one car that doesn't touch the other car, then there hasn't been a real collision.

That is simply wrong. In the world of cars, only the tiniest fraction of collisions are two identical cars, hitting each other dead center to dead center. When there's a collision, it is usually two different things which hit off center. And the same is true of ideas. Most collisions in the realm of ideas are two very different things, not mirror images. What happens is that one piece of one of them, perhaps the leftmost edge of the bumper, hits one piece of the other, and in both that one piece is connected to the whole structure. There is much more involved

in the collision, on both sides, than that one little bit.

A debate many Christians care about, the debate between the feminist-like egalitarians and the more traditional complementarians, is interesting. (I'll say 'complementarian' for now, even though I don't like the term.) It is interesting as an example of a debate where the collision is not between mirror images. Egalitarianism is not the mirror image of complementarianism, and complementarianism is not the mirror image of egalitarianism. They are very different beasts from each other.

Although this is only the outer shell, egalitarians are usually better communicators than complementarians. Most egalitarians make an explicit claim and communicate it very powerfully. Complementarians usually have trouble explaining their position, let alone presenting it as compellingly as egalitarians do. This has the effect that people on both sides have a much clearer picture of what egalitarian stands for than what complementarianism stands for. The egalitarian claim is often backed by a coherent argument, while the complementarian claim may have Biblical proof texts but often has little else.

I would like to try and suggest what complementarians have so much trouble explaining.

## Colors

When I took a cognitive science class, the professor explained a problem for cognitive science: 'qualia'. A computer can represent red and green as two different things. As far as theory problems go, that's easy to take care of. The problem is that the computer knows red and green are different only as we can know that two numbers are different. It can't deal with the **redness** of the **red** or the **greenness** of the **green**: in other words it lacks qualia. It can know things are different, but not experience them as really, qualitatively different.

Some people can only hear complementarianism as rationalising, "White is brighter than black." Yet it is foundationally a claim of, "**Red is red and green is green.**" I don't like the term 'complementarian.' It tells part of the truth, but not enough—a property you can see, but not the essence. I would suggest the term 'qualitarian,' for a belief in qualia and qualitative differences. The term's not perfect either, but it's describing some of the substance rather than detail. From here on I'll say 'qualitarian' rather than 'complementarian' to emphasise that there are qualia involved.

With that mentioned, I'd like to make the most unpalatable of my claims next, and hope that if the reader will be generous enough not to write me off yet, I may be able to make some coherent sense.

# **The Great Chain of Being**

This is something that was important to many Christians and which encapsulates a way of looking on the world that can be understood, but takes effort.

**God**

**Angels**

**Humans**

**Animals**

**Plants**

**Rocks**

**Nothing**

The Great Chain of Being was believed for centuries. When

the people who believed it were beginning to think like moderns, the Great Chain of Being began to look like the corporate ladder.

If there were things above you, you wanted to climb higher because it's not OK to be you if someone else is higher than you.

If there were things above you, you wanted to look down and sneer because there was something wrong with anything below you. That's how hierarchy looks if the only way you can understand it is as a copy of the corporate ladder.

Before then, people saw it differently. To be somewhere in the middle of the great order was neither a reason to scorn lower things nor covet higher places. Instead, there was a sense of connection. If we are the highest part of the physical creation, then we are to be its custodian and in a real sense its representative. If we are spirits as well, we are not squashed by the fact that God is above us; the one we should worship looks on us in love.

Unlike them, our culture has had centuries of democracy and waving the banner of equality so high we can forget there are other banners to wave. We strive for equality so hard that it's easy to forget that there can be other kinds of good.

The Great Chain of Being is never explained in the Bible, but it comes out of a certain kind of mindset, a mindset better equipped to deal with certain things.

There's an old joke about two people running from a bear. One stops to put on shoes. The other says, "What are you doing?" The first says, "I'm stopping to put on tennis shoes." The second says, "You can't outrun the bear!" "I don't need to outrun the bear. I only need to outrun you."

One might imagine a medieval speaking with a postmodern. The medieval stands in his niche in the Great Chain of Being and stops. The postmodern says, "Why are you stopping?" The

medieval says, "I want to enjoy the glorious place God has granted me in the *Great Chain of Being*." The postmodern says, "How can you be happy with that? There are others above you."

The medieval says, "Not all of life is running from a bear."

What am I trying to say? Am I saying, for instance, that a man is as high above a woman as God is above an angel? No. All people—men, women, young, old, infant, red, yellow, black, white—are placed at the same spot on the *Great Chain of Being*.

The Bible deals with a paradox that may be called "equality with distinction". Paul writes that "In Christ there is no Jew nor Greek", yet claims that the advantage of the Jew is "much in every way." Biblical thinking has room to declare both an equality at deepest level—such as exists between men and women—and recognize a distinction. There is no need to culturally argue one away to defend the other. Both are part of the truth. It is good to be part of a Creation that is multilayered, with inequality and not equality between the layers. If this is so, how much more should we be able to consider distinction with fundamental equality without reading the distinction as the corporate ladder's abrasive inequality?

One writer talked about equality in relation to containers being full. To modify her image, Christianity wants all of us to be as full as possible. However, it does not want a red paint can to be filled with green paint, nor a green paint can to be filled with red paint. It wants the red and green paint cans to be equally full, but does not conclude that the green can is only full if it has the same volume of red paint as the red paint can. It desires equality in the sense of everyone being full, but does not desire e-quality (being without a qualitative difference), in the sense of qualia being violated.

## Zen and the Art of Un-Framing Questions

May we legitimately project man-like attributes up on to God? Before answering that question, I'd like to suggest that there are assumptions made by the time that question is asked. The biggest one is that God is gender-neutral, and so any talking about God as masculine is projecting something foreign up on to him.

The qualitarian claim is not that we may legitimately project man-like attributes up on to God. It is that God has projected God-like attributes down on to men. Those are different claims.

A feminist theologian said to a master, "I think it is important that we keep an open mind and avoid confining God to traditional categories of gender."

The master said, "Of course. Why let God reveal himself as masculine when you can confine him to your canons of political correctness?"

I can't shake a vision of an articulate qualitarian giving disturbing answers to someone's questions and sounding like an annoying imitation of a Zen master:

**Interlocutor:**

What would you say to, "A woman's place is in the House—

and in the Senate!"?

**Articulate Qualitarian:**

Well, if we're talking about disrespectful, misogynistic...  
Wait a minute... Let me respond to the intention behind your  
question.

Do you know the Bible story about the Woman at the  
Well?

**Interlocutor:**

Yes! It's one of my favorite stories.

**Articulate Qualitarian:**

Do you know its cultural context?

**Interlocutor:**

Not really.

**Articulate Qualitarian:**

Most Bible stories—including this one—speak for  
themselves. A few of them are much richer if you know  
cultural details that make certain things significant.

Every recorded interaction between Jesus and women,  
Jesus broke rules. To start off, a rabbi wasn't supposed to  
talk with women. But Jesus really broke the rules here.

When a lone woman came out and he asked for water, she  
was shocked enough to ask why he did so. And there's  
something to her being alone.

Drawing water was a communal women's task. The women  
of the village would come and draw water together; there  
was a reason why this woman was alone: no one would be  
caught dead with her. Everyone knew that she was the  
village slut.

Her life was dominated by shame. When Jesus said,  
"...never thirst again," she heard an escape from shamefully  
drawing water alone, and she asked Jesus to help her hide

from it. When he said to call her husband, she gave an evasive and ambiguous reply. He gave a very blunt response: "You are right in saying you have no husband, for you have had five husbands, and the one you have now is not your husband."

Yowch.

Instead of helping her run from her shame, Jesus pulled her through it, and she came out the other side, running without any shame, calling, "Come and see a man who told me everything I ever did!"

There's much more, but I want to delve into one specific detail: there was something abnormal about her drawing water alone. Drawing water was women's work. Women's work was backbreaking toil—as was men's work—but it was not done in isolation. It was something done in the company of other people.

It's not just that one culture. There are old European paintings that show a group of women, bent over their washboards, talking and talking. Maybe I'm just romanticizing because I haven't felt how rough washboards are to fingers. But I have a growing doubt that labor-saving devices are all they're cracked up to be. Vacuum cleaners were introduced as a way to lessen the work in the twice-annual task of beating rugs. Somehow each phenomenal new labor-saving technology seems to leave housewives with even more drudgery.

I have sympathy for feminists who say that women are better off doing professional work in community than doing housework in solitary confinement. I think feminists are probably right that the Leave It to Beaver arrangement causes women to be lonely and depressed. (I'm not sure that

"Turn the clock back, all the way back, to 1954!" represents the best achievement conservatives can claim.)

The traditional arrangement is not Mom, Dad, two kids, and nothing more. Across quite a lot of cultures and quite a lot of history, the usual pattern has kept extended families together (seeing Grandma didn't involve interstate travel), and made those extended families part of an integrated community. From what I've read, women are happier in intentional communities like Reba Place.

**Interlocutor:**

Do you support the enfranchisement of women?

**Articulate Qualitarian:**

Let me visit the [dict.org](http://dict.org) website. Webster's 1913 says:

Enfranchisement \En\*fran"chise\*ment\, n.

1. Releasing from slavery or custody. —Shak.

2. Admission to the freedom of a corporation or body politic investiture with the privileges of free citizens.

Enfranchisement of copyhold (Eng. Law), the conversion of copyhold estate into a freehold. —Mozley & W.

WordNet seems less helpful; it doesn't really mention the sense you want.

enfranchisement

1: freedom from political subjugation or servitude

2: the act of certifying [syn: certification] [ant: c

If I were preaching on your question, I might do a Greek-style exegesis and say that your choice of languages fuses the egalitarian request to grant XYZ with the insinuation that their opponents' practice is equivalent to slavery. Wow.

I think you're using loaded language. Would you be willing to restate your question in less loaded terms?

**Interlocutor:**

Ok, I'll ask a different way, but will you promise not to answer with a word-study?

**Articulate Qualitarian:**

Ok, I won't answer with a word-study unless you ask.

**Interlocutor:**

Do you believe that women have the same long list of rights as men?

**Articulate Qualitarian:**

Hmm... I'm trying to think about how to answer this without being misleading...

**Interlocutor:**

Please answer me literally.

**Articulate Qualitarian:**

I'm afraid I'm going to have to say, "No."

**Interlocutor:**

But you at least believe that women have some rights, correct?

**Articulate Qualitarian:**

No.

**Interlocutor:**

What?!?

**Articulate Qualitarian:**

I said I wouldn't give a word-study...

Is it OK if I give a comparable study of a concept?

**Interlocutor:**

[Quietly counts to ten and takes a deep breath:] Ok.

**Articulate Qualitarian:**

I don't believe that women have any rights. I don't believe that men have any rights, either. The Bible doesn't use rights like we do. It answers plenty of questions we try to

solve with rights: it says we shouldn't murder, steal, and so on. But the older Biblical way of doing this said, "Don't do this," or "Be like Christ," or something like that.

Then this really odd moral framework based on rights came along, and all of a sudden there wasn't a universal law against unjustified killing, but an entitlement not to be killed. At first it seemed not to make much difference. But now more and more of our moral reasoning is in terms of 'rights', which increasingly say, not "Don't do this," or "You must do that," but "Here's the long list of entitlements that the universe owes me." And that has meant some truly strange things.

In the context of the concrete issues that qualitaricians discuss with egalitarianism, the Biblical concept of seeking the good of all is quietly remade into seeking the enfranchisement of all, and so it seems that the big question is whether women get the same rights as men—quite apart from the kind of situation where language comparing your opponents' behavior to slavery is considered polite.

**Interlocutor:**

Couldn't we listen to, say, Eastern Philosophy?

**Articulate Qualitarian:**

There's a lot of interesting stuff in Eastern philosophy. The contrast between Confucian and Taoist concepts of virtue, for instance, is interesting and worth exploring, especially in this nexus. I'm really drawing a blank as to how one could get a rights-based framework from Asian philosophy. And I'm not sure African mindsets would be much more of a help, for instance. Even if you read one Kwaanza pamphlet, it's hard to see how individual rights could come from the seven African values. The value of Ujima, or collective work and

responsibility, speaks even less of individual rights than,  
"Ask not what your country can do for you, but what you can  
do for your country."

**Interlocutor:**

Ok, let me change the subject slightly. Would you  
acknowledge that Paul was a progressive?

**Articulate Qualitarian:**

Hmm... reminds me of a C.S. Lewis book in which Lewis quotes  
a medieval author. The author is talking about some  
important Greek philosopher and says, "Now when we come  
to a difficulty or ambiguity, we should always ascribe the  
views most worthy of a man of his stature."

Lewis's big complaint was that this kind of respect always  
reads into an author the biases and assumptions of the  
reader's age. It honors the author enough to think he  
believed what we call important, but not enough that the  
author can disagree with our assumptions and be able to  
correct us.

When we ask if Paul is a progressive, there are two basic  
options. Either we say that Paul was not a progressive, and  
relegate him to our understanding of a misogynist, or we  
generously overlook a passage here and there and generously  
include him as one of our progressives.

It seems that neither response allows Paul to be an  
authority who knows something we don't.

On second thought, maybe it's a good thing there aren't too  
many articulate qualitarians.

## **Men are from Mars, Women are from Venus... and Gender Psychologists are from the Moon**

When pop psychology talks about gender, it is trying to make academic knowledge available to the rest of us. An academic textbook by Em Griffin illustrates Deborah Tannen's theories, saying, "Jan hopes she's marrying a 'big ear'." This thread is picked up very well in popular works.

William Harley's *His Needs, Her Needs* is a sort of Christianized *Men are from Mars, Women are from Venus*. Harley devotes a full chapter to explaining that one of the most foundational needs for a husband to understand is a woman's need for listening. He devotes a full chapter to convincing husbands that it is essential that they listen to everything their wives want to say. It was perhaps because reading this work (and *Men are From Mars, Women are From Venus*, part of *You Just Don't Understand*, etc.) that I was shocked when I reread C.S. Lewis's *That Hideous Strength*. It was much more than Mother Dimble's words, "Husbands were made to be talked to. It helps them concentrate their minds on what they're reading..."

The shock was deep. It wasn't like having a rug pulled out from under your feet. It was more like standing with your feet

on bare floor and having the floor pulled out from under your feet.

The gender books I'd read, both Christian and non-Christian, made a seamless fusion of the basic raw material, and one particular interpretation. The interpretation was as hard to doubt as the raw material itself—and one couldn't really see the fusion as something that can be questioned. It was like looking at a number of startlingly accurate pictures of scenes on earth—and then realising that all the pictures were taken from the moon.

That Hideous Strength suggests an answer to the question, "How else could it be?" I'm hesitant to suggest everyone else will have the same experience, but...

If we look at a Hollywood movie targeting young men, there will be violent action, a fast pace, and a sense of adventure. A movie made for young women will have people talking and delving into emotions as they grow closer, as they grow into more mature relationships. If we sum these up in a single word, the men's movie is full of action, and the women's movie is filled with relationship.

Aristotle characterized masculinity as active and femininity as passive. It seems clear to me that he was grappling with a real thing, the same thing that shapes our movie offerings. It also seems clear that he didn't quite get it right. Masculinity is active. That much is correct. But femininity is not described by the absence of such action. It's described by the presence of relationship. It seems that the following can be said:

- Aristotle was grappling with, and trying to understand, something real.
- Even though he's observing something real, his

interpretation was skewed.

These two things didn't stop with Aristotle. If a thinker as brilliant as Aristotle fell into this trap, maybe gender psychology is also liable to stumble this way, too. (Or at least today's gender psychology stumbles this way. If you're willing to listen to people who look and talk a bit different and are a bit older than us, Charles Shedd's *Letters to Karen* and *Letters to Philip* are examples of slightly older books worth the time to look at.)

## Christian Teaching

About this point, I expect a question like, "Ok, men reflect the masculine side of God. But don't you have a place for femininity, and can't women reflect the feminine side of God?"

This is a serious question, and it reflects a serious concern. Many Hindus believe that everything is either part of God or evil: your inmost spirit is a real part of God, and your body is intrinsically evil and illusory like everything else physical. I'm told that *Genesis 1* was quite a shocker when it appeared—not, so much, because it says we're made in the image of God, but because after the stars, rocks, plants, and animals were created, the text keeps on saying, "And God saw that it was good." That's really a staggering suggestion, if you knew the other nations' creation stories. The Babylonians believed that the god Marduk killed the demoness Tiamat, tore her dragon carcass apart, and made half of it the land and half of it the sky. So your body and mine, every forest, every star, is part of a demon's carcass that happens to be left over after a battle.

Please think about this claim for a minute, and then look at part of *Genesis 1*:

- Creation didn't happen as a secondary result of divine combat. God created the world because he specifically wanted to do so.

- Physical matter, and life, and everything else, is good.
- God made us in his image. Only then was his creation very good, and complete.

One thing that comes out of these things is that God can create good. God created the physical world without being physical. Our bodies, indeed the whole natural world, are good, because God created something outside of himself. Femininity is like this, only much more so. Femininity is a created good, and it is much more beautiful, more mysterious, more wondrous, more powerful thing than physical matter. People are the unique creation where matter meets spirit—no other creation can claim that. Women are the unique point where spirit meets the very apex of femininity.

Every woman is a mystery, and every man is a king. To be a Christian man is to be made like the King of Kings and Lord of Lords. There is something kingly and lordly about manhood. Part of this is understood when you realize that this does not mean domineering other people and standing above them, but standing under them, like the servant king who washed feet. The sign and sigil of male authority is not a crown of gold, but a crown of thorns.

But all this is a hint. I give sketch here and there, and I hope less to provide an inescapable logical framework than suggest entry points that can look into the Bible and see these things.

I'd like to give a glimpse of the qualities:

# Qualia

## Lord Adam, Dragonslayer

If you could see Adam, you would see a knight, in burnished armor brightly gleaming, astride a white horse. What you wouldn't see is why the armor shines brightly. It is not burnished by him, nor any other human hands, but the claws of the dragons he wars against. Under his helmet is a lion's mane of thick hair and beard. Under his breastplate are

## Lady Eve, Poet's Heart

If you could see Eve at her best, she would be beside a fire, inside a great hall. She would be stoking a fire with one hand, another hand would call forth forth music from a silver harp, another hand would be writing a letter, and she would use both hands to embrace the sorrowing child on her lap in comforting love.

scars, some quite close to his heart.

This knight errant yearns for quests. Something difficult, something dangerous, something active. Some place to prove himself by serving in a costly way. He longs for that battle when his blood will mingle with that of his fellow warriors and he may at last embark on the last great adventure.

He has a lord above him, to whom he owes allegiance and honor. He is also a mentor, turning his face to a squire whom he focuses on and draws up. He draws them, as he was drawn, out of the comfort of home, into the mysteries of life,

And she would do this lightly, joyfully, with a smile from the other side of pain. Though Eve sits still, one can almost see her dancing. It would take time to see all her many layers of beauty... if that were even possible. What is the secret behind her enigmatic smile? What deep mysteries lie hidden in her heart of hearts?

Her beauty is as a rose: a ladder of thorns leads up to a flower so exquisite as to be called God's autograph. She toils hard, and it is difficult to see lines of pain in her face only because

and into the company of men and society to reconnect more deeply. He has tried to explain that siring a child is something an impudent youth can do, but being a spiritual father is the mark of a man.

Once his mind is on a task, it moves forward from beginning to end. It moves with the force of an avalanche. He does one task at a time, and wants to do it well.

There is another side to his seriousness. He can be deadly serious, but there is a merry twinkle in his eye.

His force and his energy are too much to contain, and he is capable of catching

she has worked through them so that they have become part of her joy. She knows a mother's worry, and she looks on others with a mother's caring eyes. She looks with the joy on the other side of sorrow.

Her home is her castle, and it is a castle she tries to run well. Adam... well, dear man as he is, he isn't very good with managing resources. She runs the castle in an orderly and efficient manner, and as the lady in charge, she handles well a great many things that her lord wouldn't know how

people off guard.  
(Especially in his practical jokes.) Like the lion, he is not safe and not tame; he is both serious and silly, and can astound in both. When he plays with children, playing with him is both like playing with a kitten and playing with a thunderstorm. To his lady Adam turns with reverence. She is a wonder to him. The extravagance of the quests she bids him and he embarks on, is a spectacular offshoot of his more quiet service in private. Though Adam would never see it this way, he is taller when he bows and kisses her hand, and richer when he gives her a costly

to begin doing. The castle is their castle, of course, but there are things that need attending to so that Adam can continue slaying dragons. Yet to say that is to put last things first. The reason she handles so many taxing details is that Adam is the light of her life, her king and her lord, her bright morning star. She turns to her loom as a place to make wall hangings. At least, that's what someone would say if he missed the point completely. She makes beautiful wall hangings, but there's more.

gift.

His honor is his life, and wants to live and act as a son of God. He believes that faith works, and strives to show virtue and behave in a manner worthy of Christ.

# On Kything

Nota bene: Before the reflection, I have included a couple of journal entries which are alluded to and whose content contributes to the discourse. People not interested can [skip down](#).

I was walking outside and met Robin, and we talked. When he asked me how I was doing, I didn't have much to say, but mentioned a few thoughts I'd had. Then I asked him how he was doing, and he said that he had been feeling really close to God, and more aware of other people.

I hadn't mentioned, because it had been around so long, the emptiness I was feeling, and I became more acutely aware of how dry my own spiritual life had been, how mechanical of an exercise my Bible reading was.

That night, I was walking over to Wheaton's campus for Pooh's Corner (a group of people that meets to read children's books aloud). A long and slow-moving freight train was crossing the tracks. While I was standing and waiting, I thought about the conversation and my own dryness, and decided to work on my spiritual state when I got home.

—No, not when you get home. Now.

—Not now! I'm waiting for a train.

—Now.

I decided to do something then and there. But what? Initiative and power are all on God's side; there was nothing I could do that would accomplish closeness between God and me. So I prayed a simple prayer.

That moment, I was filled with joy and peace, deeper than I had known in a long time. I paced back and forth in that joy and peace waiting for the train — enjoying through them the simple little things: the walking, the sound of the train. Whatever I did, there was God.

I thought about Thérèse de Lisieux's little way (as depicted in the movie *Household Saints*), about resting in God's presence, and of being in God's will in even the most simple places — even waiting for a train. At a low spot — when I medically can't work above half-time, and have an intermittent job not related to computers — and when used to thinking about serving God in spectacular and heroic ways, it was good to realize that. I went on to Pooh's corner, and enjoyed things there a great deal more. There were milk and cookies, and I enjoyed them in a different way than I usually enjoy food. I usually eat good food slowly and in little bites, to consciously savor its flavor — but I do not completely engage, or rather I am not able to let go of my disengagement. This time I was able to engage, and not just with the milk and cookies; I was also able to engage with the camaraderie and silliness.

When I create something (even something little), there is a first conception of the idea, then an incubation period where I let the idea ferment, then a time of implementation. The fermenting period is one which I cherish, and one which I had rarely experienced since a loss of creativity associated with my medication (the creativity has returned after an adjustment of the levels of those medications). I experienced it then. I also

spent time worrying about the loss of the joy and peace,  
although I tried not to.

---

At Pooh's Corner, I was distracted for a good part of it, wanting to get up and write about the posting on the forum wall, but still trying to enjoy it, as that would be all the Pooh's Corner I would have for the week. Pooh's Corner meets in the lobby of Fischer dorm, where I stayed my freshman year. It is a place full of distractions and people passing through. There is a piano there, and partway through I realized in a flash that I had been drinking the music in the same way that I drink wine.

What I mean is this: Wine, as contrasted to e.g. milk or juice, is something you can only take a small amount of. You can drink water until your thirst is quenched, or have several glasses of milk, but with wine it is different. If you are having one drink, then that translates to a 5 ounce glass — not even a full cup. If you drink it the same way you drink Pepsi, you are going to find yourself holding an empty glass before you know it.

Consequently, when I drink wine, I sip it very slowly, and I consciously savor it in a way that would never occur to me if I could drink an indefinite quantity and remain sober. What I realized last night as I was thinking about my realization was that I taste wine in a way that I do not taste milk. I drink milk, and like it, and vaguely and absently taste it, but do not taste it wholly. With wine, the realization that I only have a little amount and it will soon be gone keeps me from absently quaffing glass after glass; when I have a glass of wine, I sometimes close my eyes and am able to taste it so intensely that I am not aware of anything else.

That is what happened with the music, and which I realized afterwards. I have no control over the music that is played, and the most beautiful passages seem to be over so quickly. At one point in the music, I was doing the same thing as I do when I

hold a sip of wine in my mouth, close my eyes, and savor it — I was concentrating on it so intensely that I was not aware of anything else (in a busy room with many voices talking and people passing through), and when it was over I had a feeling of having drunk it to the dregs.

It was somewhat strange to realize that I had learned such a thing from wine. My attitude towards alcohol is European rather than American, and (without trying to trace the argument here) I regard alcohol as a symbol of moderation, and learning to enjoy things in a temperate manner (the Puritan attitude towards alcohol). I had not, though, expected that in drinking I would learn something of this nature. I think that what I did is close to what goes on in empathic listening — a drinking in with your whole being. At the beginning of this journal, I talked about not being able to engage. This is a point where I have learned to truly engage in one area, and it may well help me to engage in others — it has helped me to enjoy music, at least.

---

I was also thinking, Tuesday, about a point related to [chapter 4](#) of G.K. Chesterton's [Orthodoxy](#). Specifically, many things imagined as magic and psychic phenomena are exaggerated and cosmetically altered versions of things God has given us. For example, teleportation (to be able to move instantaneously from point to point) is less astounding than being able to move from point to point in the first place, and there are many creatures which live without any such faculty (such as trees). Telekenesis is not that much more astounding than having hands with which to move things. Mental telepathy is quite similar to speech, and the surprise we would have at seeing mental telepathy is nothing like the surprise an animal (with a sufficiently anthropomorphic mind) would have at discovering that once one of these creatures learns something, the rest know it. It would be like what reaction we might have upon first learning certain things about Star Trek's Borg, multiplied tenfold. If it is thought of in this manner, the concept of speech is far more impressive than the concept of altering speech by changing the channel through which the mind-to-mind transmission occurs. It might be also pointed out that, in the past few millenia, we have found another channel for mind-to-mind transmission to occur: reading and writing. When one pair of Wycliffe missionaries was working with some tribesmen, they were trying to persuade the chief of the advantage of writing. One of them left the other room, and the other one asked the chief's mother's name, and wrote it down. When his partner returned and read her name, the chief almost fainted.

There are a couple of things that come from this.

The first is that God's creation really is magical, in the sense of being something awesome, and something we should be amazed

that we have. It is in our nature to become blasé; our eyes become glazed over at magnificent things. If we can somehow let scales fall from our eyes, we would be dumbstruck at what we have — for example, music.

The second is that, if we can become blasé at what God has given us, we would probably also become blasé at the things we fantasize about. When I was a child, I absolutely loved to swim, and I wished that I could breathe underwater... but that (after a little while) would have held nothing for me than being able to breathe air, hold my breath, and swim underwater. I have fantasized about all of the special powers that I would like to have, and when I do that I do not much enjoy the gifts I have, not only as a human being, but personally — my sharp mind and so on and so forth.

Also related to this insight was kything... In *A Wind in the Door*, Madeleine l'Engle uses the word 'kythe' to describe a beautiful communion beyond communication. It is the whole cherubic language, of which mental telepathy is just the beginning. It holds a similar place to 'grok' in Robert A. Heinlein's *Stranger in a Strange Land*, and the meanings of the two words are similar. I am not going to try per se to describe its meaning further, but simply refer the reader to that excellent book.

What he had actually seen she could not begin to guess. That he had seen something, something unusual, she was positive.

This is the same sort of feeling I felt about kything. There is something in that word that strikes a deep chord in my spirit; it is the primary reason why that is my favorite book

out of the series, and at times been one of my favorite books at all. In conjunction with the above musing, l'Engle's portrait of kything has a beauty that is not an ex nihilo creation, that shows forth a beauty that is really in this world but which we do not see. I would very much like to kythe — but I can't do what's in the book without sinning. What is in this world that embodies the beauty of kything?

As I was thinking and praying, I realized several things that may, in a sense, be called kything, that are beautiful in the same way. I felt a Spirit-tugging to list a hundred such things. I don't know if I'll be able to do that, or if so where I'll come up with a hundred, but I will none the less try.

#### 100 Ways to Kythe

1: Prayer. Prayer allows a kind of communion with God that (at least this side of Heaven) we can't have with anyone else. With God, prayer is not limited to words; we can pray with words, or with images, or with music... Prayer has the same opportunities for exploration as kything.

2: Holy Communion. God speaks to us through that.

3: Martial arts sparring. It takes time (I've studied martial arts for a little over a year, and I've only begun to taste this), but there is something martial artists call 'harmony with opponents' that is a deep attunement. I've had one sparring match where I knew everything my opponent was going to do about a quarter second before he did it. A good book to read to get a little better feeling for this is *The Way of Karate: Beyond Technique*.

4: Flow, as described in Daniel Goleman's *Emotional Intelligence*.

5: Empathic listening. This is listening in which the listener is completely attuned to the speaker. I don't know any books to

reccommend for that topic.

6: Drinking as I drink wine, or as I drank music.

7: Improvising musically. Music is an alien language, not symbolic, not logical, and yet speaking powerfully. When you can really let the music flow through you, you are kything.

8: Making love. The subject of the Song of Songs is not just a physical act, but a total communion between a man and a woman, united for life.

9: Stillness. There is a way of being still that is kything.

10: What I did at Pooh's Corner the first night described. (Well, there's ten at one sitting... I expect to come back to this later.)

11: Mathematical problem solving. I won't even begin to explain this, beyond saying that to those who have experienced it no explanation is necessary. Just remembered — there's a good book on this topic for non-mathematicians, entitled, *The Art of Mathematics*.

12: Musical improvisation with another person. I have never done this, but I remember, at Calvin, being fascinated by my friends Bruce and Janna talking about when they improvised together at the keyboard. It worked. I believe, from conversations, that the Spirit was guiding them, and it was a communion with the Spirit and each other.

13: Singing prayers in tongues. I don't pray this way very often, but when I do, it's very uplifting. It is a praying, not with the rational mind, but with the spirit, and it receives what to say moment by moment from the Spirit.

14: Non-sexual touch. It's going to be hard to say something brief here, as I've written a whole [treatise](#) on this point, but to try: Non-sexual touch can be deep, and express something words cannot. It is the nature of love to draw close; touch is an

incarnate race's physical means of communicating love, and for babies the first and foremost way of knowing love. Beyond that... if what I am saying doesn't resonate within you (or if you'd just like a hug), ask me for a hug — a real one. It took me a long time, but I have learned how to touch, and at times to drink touch as I drink wine.

15: Dancing. Wheaton alumnus Alan Light wrote a beautiful letter about how he had adopted a code of duty, honor, and steadfastness, and a folkdancing class had opened his eyes to joy, peace, and freedom. There is something beautiful of those things that can be learned in dancing, something that it's easy not to know you're missing. (For all that, I don't dance very well. Before a knee injury, I had something to do with my feet that looked impressive, but I haven't learned to dance (to commune with others, to connect in a merry, moving hug) as I have learned to touch.)

(Coming back after a time) I can recall one occasion when I really danced. At the last Mennonite Conference I attended, both youth and adult worship were [religion within the bounds of amusement](#), but the youth worship was at least honest about it, and I preferred it to the adult sessions. Before a Ken Medema concert, there was a group of high schoolers playing a dance game, and I joined in. It lifted me out of sorrow, and there was a vibrant synergy, a joy and connection and communion. It's something that everyone should experience at least once. He who dances, sings twice.

16: An I-Thou relationship. An I-Thou relationship differs from an I-It relationship as kything differs from mental telepathy. I only got halfway through Martin Buber's I and Thou before setting the book down, because it was too hard to concentrate on, but it says a lot about how to kythe. As pertains

to prayer and kything with God, I would pose an insight in the form of a riddle: how is it that the saint and mystic refers to God as 'I' without blaspheming?

17: Dreaming. One story in a marvelous book, *Tales of a Magic Monastery* by Theophane the Monk, ended with a character saying, "While you tend to judge a monk by his decorum during the day, we judge him by the number of persons he touches at night, and the number of stars." Dreaming has always been special to me; it allows access to a different, fantastic world. It can be a way to kythe. What if there were a culture that regarded dreaming rather than waking as the aroused state?

18: Praying with another person. Where two or three are gathered, he is with them. When they are praying, there is not only an individual bond between each one and God; there are connections within the group. There have been some people who hold that a man and a woman who are not married to each other should not pray together; I do not agree with that, but the fact that such a position has been taken by levelheaded believers seems to underscore that there is a communion between people who pray together.

19: Artistic creation. When I create something, it fills my mind, my musings; I kythe with it as I give it form.

20: Children's play. Children's play can be timeless and absorbing, and Peter Kreeft, in *Heaven: The Heart's Deepest Longing*, says that the activity of Heaven will be neither work, which is wearying, nor rest, which is passive, but pure and unending play, an activity which is energetic and energizing. Playing with children is entering into another world, a magical world, and entering into it means kything.

21: Listening prayers; listening to the Spirit. Ordinarily we think of prayer as speaking to God, but it is also possible to

listen to him. And dancing with the Spirit — there are so many adventures to be had.

22: The Romance. There is a sacred Romance described in, for example, C.S. Lewis's *Pilgrim's Regress*, and Brent Curtis's *Less-Wild Lovers: Standing at the Crossroads of Desire*. You do not come to the Romance; the Romance comes to you, although you may respond. Being in that is kything.

(I thought I might be able to think of 20 ways of kything...  
I've already gotten past that, by God's grace.)

23: Silliness. When some friends are doing something silly — tickling or teasing (without going too far — this is something I'm not very good at), for example, it is not thought of in terms of something serious (as 'serious' is misunderstood to mean 'somber'). None the less, there is in the lightheartedness a bond being forged or strengthened, a connection being made. Kything at its best is communication that needs no symbolic content, that has something that can't be reduced to words. So is grabbing your friend's nose.

24: Friendship and family relations. This differs from the above items, in that it is not an instantaneous experience resembling an instant of kything. It is rather a bond over time that is more than communication, where hearts touch each other. It is a bond where two people know each other, and in the time spent together a connection accumulates.

25: Agape love. There is a vain phrase, "To know me is to love me," that might fruitfully be turned around as, "To love me is to know me."

One of the stories in *Tales of a Magic Monastery* goes roughly as follows:

### **The Crystal Globe**

I told the guestmaster I'd like to become a monk.

"What kind of monk?" he asked. "A real monk?"

"Yes," I said, "a real monk."

He poured a cup of wine, and said, "Here, take this."

No sooner had I drunk it than I became aware of a small crystal globe forming about me. It expanded until it included him.

Suddenly, this monk, who had seemed so commonplace, took on an astonishing beauty. I was struck dumb. I thought, "Maybe he doesn't know how beautiful he is. Maybe I should tell him." But I really was dumb. The wine had burned out my tongue!

After a time, he made a motion for me to leave, and I gladly got up, thinking that the memory of such beauty would be well worth the loss of my tongue. Imagine my surprise when, when each person would unwittingly pass into my globe, I would see his beauty too.

Is this what it means to be a real monk? To see the beauty in others and be silent?

There have been times that I have been able to see beauty in other people, sometimes beauty that they were not likely aware of. Robin and Joel might not think in these terms, but they have the sight that comes of love. The words, "I never met a man I didn't like," bespeak this kind of love. Love is the essence of kything.

26: Passion. When we are filled with passion, we are singleminded and undistracted. Someone said that hate is closer to love than is apathy; if anything is the opposite of kything, it is apathy. Kything need not be associated with intense emotion, but passion has something of the spark of kything.

27: Tears. Crying is cathartic, and comes unbidden at the moments when something comes really close to our heart — be it painful or joyful. My ex-fiancée Rebecca commented that she was impressed at one time she saw me crying in public. My friend Amy, after reading my [treatise on touch](#), said that she wished I had written a treatise on crying — something that is well worth writing, but I don't have it in me to write. To cry is to kythe.

28: Don a mask. Putting on a mask can be a way of revealing; in role-play, I have through characters found ways of expressing myself that I couldn't have done otherwise, and many people learn more about themselves through acting. Temporarily putting on a mask allows you to kythe through that mask in a way that wouldn't occur otherwise.

29: Stand on your head. With familiarity, we don't really see the things before us; we become Inspector Clouseaus. This is why some painters stood on their heads to look at landscapes — to see afresh what was familiar. Standing on your head is not exactly a way of kything, but it does open up ways to kythe that would normally be overlooked.

I just had a change of perspective... I thought about soliciting others' insights as to ways of kything, but with some guilt, as if thinking about not doing my work. Then I remembered what I was writing about — a connected communion — and that it would be very appropriate to have this be not my isolated work but the work of several minds. So I will solicit and seek the help of others.

30: Stop hurrying. Our culture is obsessed with doing things quickly, and rushes through almost everything. Carl Jung, heretic as he may have been, had rare moments of lucidity; in one of them, he said, "Hurry is not of the Devil. Hurry is the Devil." Removing hurry, and letting a moment last however long it should

last by its own internal timing, is not exactly kything, but it is a removal of one of the chief barriers we face to kything. Kything is a foretaste of the eternal, timeless joy that is to come, and in kything five seconds and five hours are the same. One good idea before trying to kythe is to take off your watch.

31: Walks. I have just come back from a kything walk. It was warm, the ground was moist after rain, the sky was mostly covered by pink clouds, and it was silence — there was even silence in the sound of cars going by. Summer nights, with fireflies and crickets and a crystalline blue sky, are excellent for kything walks. In thinking about this, I realized that what we have is an incarnate kything — spirit moving through matter — while l'Engle portrays what is essentially a discarnate kything — spirit moving without regard to matter. It is also interesting to note that (to me at least) touch is more kything than sight — with sight potentially working at almost any range (we can see stars billions of light-years away), and touch having no range at all. I'm glad that I can absorb the grass around me in a way that I cannot absorb the grass a thousand miles away.

32: Grace. Up until now, I have written about what you can do to kythe, but there is a lot of kything that God initiates and provides. Having a vision is a kind of kything, and that is not anything you can do. My time with God by the railroad tracks was a kything with him that I had no power to create.

33: Looking. I am allergic to cats, and my family has a wonderful grey tabby named Zappy. I usually don't touch her, but I do sometimes sit and gaze at her for a while. (I just realized that looking at Zappy for a while has the same effect on me as stroking a cat has on most people.) I can recall being warmed by the same gaze as an expectant mother in my small group, Kelly, smiled at me as I stroked Lena's head (Lena being

the 5 year old daughter of the group leader). In medieval culture, beholding the body and blood of Christ at mass was in a sense almost more held to be a receiving, a partaking, than eating and drinking them. The kything power of sight is attested to in Augustine's words: "See what you believe; become what you behold."

34: Absorbing poetry. Here is an example of a poem I wrote which I think is effective for the purpose:

Beyond  
Beyond doing, there is being.  
Beyond time, there is eternity.  
Beyond mortality, there is immortality.  
Beyond knowledge, there is faith.  
Beyond justice, there is mercy.  
Beyond happy thoughts, there is joy.  
Beyond communication, there is communion.  
Beyond petition, there is prayer.  
Beyond work, there is rest.  
Beyond right action, there is virtue.  
Beyond virtue, there is the Holy Spirit.  
Beyond appreciation, there is awe.  
Beyond sound, there is stillness.  
Beyond stillness, there is the eternal song.  
Beyond law, there is grace.  
Beyond even wisdom, there is love.  
Beyond all else, HE IS.

35: Mirth. The one line from all of C.S. Lewis's writing that most sticks in my mind comes from *Out of the Silent Planet*, where he wrote, "...but unfortunately, [name of villain] didn't

know the Malacandrian word for 'laugh'. Indeed, 'laugh' was a word which he didn't understand very well in any language." I debated about whether to put laughter in, as it has many forms — some of which, as the cynic's scoff, are corrupt, and some of which are lesser goods — but there is at least one form of laughter that really is kything. It is mirth. It can be found, for example, where old friends are sitting around a table after a hearty meal; the laughter is not just a reaction to isolated events, but a mood that has little eruptions over things that aren't that funny in themselves. It is mingled with companionship and fellow-feeling, and is a mirth that is the crowning jewel of forms of laughter.

36: Becoming good. Websters Revised Unabridged Dictionary 1913, p. 877, has:

### **Kythe**

(Kythe, Kithe) (ki&thlig;), v. t. [imp. Kydde, Kidde (kid"de); p. p. Kythed Kid; p. pr. & vb. n. Kything.] [OE. kythen, kithen, cuden, to make known, AS. cydan, fr. cud known. &radic;45. See Uncouth, Can to be able, and cf. Kith.] To make known; to manifest; to show; to declare. [Obs. or Scot.]

For gentle hearte kytheth gentillesse.

Chaucer.

### **Kythe**

(Kythe), v. t. To come into view; to appear. [Scot.]

It kythes bright . . . because all is dark around it.

Sir W. Scott.

The latter meaning of 'kythe' is the reason Madeleine l'Engle,

after a search, chose that word to carry her meaning.

C.S. Lewis said that the process of becoming good was like the process of becoming visible, in that objects becoming visible are more sharply distinguished not only from objects in obscurity but from each other; becoming good is becoming more truly the person you were created to be (being Named).

Becoming good is kything in the dictionary sense, and it is why I put it here. It is also a kind of kything, and an aid to kything, in l'Engle's sense — a stepping into the great kythe, into the great dance. It is like learning vocabulary to speech, or a conversation in which one learns vocabulary.

37: Comforting those in pain. Pain can isolate, but it can also bring down the walls around a person. I can remember now one time at a retreat when I was in the long, dark night of the soul, when I drank in a friend's silent presence and touch like a lifeline. The worst comforters offer words to fix everything with clichés and pat answers. The best often feel somewhat helpless, enduring an awkward silence as if they don't have anything to offer to so great a pain, but none the less offer something deep, more than they could have put into words, more often than they realize.

38: Presence. This facet of kything is perhaps best portrayed not directly, but in its stark silhouette, painted by Charles Baudelaire in his poem "Enivrez-vous": «Il faut être toujours ivre... Pour ne pas sentir l'horrible fardeau du Temps qui brise vos épaules et vous penche vers la terre, il faut vous enivrer sans trêve. Mais de quoi? De vin, de poésie, ou de vertu, à votre guise...» — "You must always be drunk.... to not feel the horrible burden of Time which crushes your shoulders and pushes you towards the earth, you must ceaselessly get drunk. But with

what? With wine, with poetry, or with virtue, as you please...."

Against this silhouette, of seeking something, anything, to flee into, stands out another facet of kything: that of being present, and giving undivided, focused attention. The kind of person you'd like to be around, the kind of person you'd want to have as a friend — isn't he present?

39: Digesting experience.

As for Mary, she treasured all these things and pondered them in her heart.

Luke 2:19, NJB

A book is best understood, not just after being read once, but after being gone over several times. The same thing goes for experiences — they can be contemplated and pondered. This does not have instantaneous effect, but in a certain way it makes the experience contemplated a more complete experience, one that is more fully grasped.

40: Riflery. Riflery, I discovered, is not a macho thing, and someone who comes in with a macho attitude won't shoot very well. It has much more do do with concentration, stillness, and patience. In riflery, I learned how to hold at least parts of my body so still that the biggest cause of motion was the beating of my heart. Riflery is not so much a kything with, as just a kything.

41: Brainstorming. I think I do not need to say much here.

42: Step into other people's worlds... Tonight my father, Joseph, and I went to play ping-pong. I didn't realize one thing I had been doing — playing Joe's way, Joe's rules — until I saw Dad make Joseph rather upset by insisting that he play a standard, official rules game of ping-pong. (To his credit, Dad later started playing Joe's way.) Then I realized that I had been stepping into Joe's own little world, and meeting him more completely than had I insisted we stay in the public space that

all ping-pong players share. Joe didn't exactly mean to play ping-pong; he wanted to spend some time together, play around, goof off in a way that happened to make use of the framework of ping-pong. Part of the time, he was doing silly things that weren't ping-pong (such as hitting the ball around the room), which our father frowned on, and I commented were a little bit of Janra-ball (see below), a compliment which Joe said he really appreciated. People invite you into their worlds all the time, but the invitations don't have much fanfare and can be hard to notice. I'm glad I accepted Joe's invitation.

43: ...and invite others into your own. In one letter, when cherished abilities were beginning to return in the healing, I wrote:

The other thing which I have to share now is something which happened during the Gospel reading at the mass. I had my first theological musing in a while. That touched a greater frustration — that of reading some of the richest passages of the Scriptures, and learning almost nothing from them. There had one text that I read and was able to appreciate, if not being able to think much at all (Isaiah 60: "Arise, shine, for your light has come..."). This bleak dryness was broken both mentally and emotionally (there is a distinct and deep pleasure I have in theological reasoning), as I mused over the words: "In my Father's house there are many dwelling-places [or rooms, or mansions, in other translations]."

The most obvious interpretation of this metaphor is to think of a physical building, and that is surely appropriate. But I began to think of another interpretation of the dwelling-places, and that is this: our souls and spirits.

We have a temptation and a culture which defines happiness and sadness almost purely in terms of what is materially external to us: our possessions, the way others treat us, etc. That is certainly relevant — in that such blessings are to be gratefully received as a part of God's grace and provision, and pains are a real suffering to work through — but even more important and more central is what is internal to us and our interactions and relationship with God. Being an alcoholic is a worse suffering than being in prison. It is something related to this insight that is behind many Eastern religions defining Heaven and Hell to be defined almost purely by your internal state. One Zen koan tells us:

A Samurai came to a Zen master and said, "Show me the gates of Heaven and Hell."

The Zen master said, "Are you a Samurai? You look much more like a beggar. And that sword — I bet it is so dull that it could not cut off my head."

The enraged Samurai drew his sword, and raised it to strike the master down.

The Zen master said, "Now show me the gates of Heaven."

The Samurai sheathed his sword, bowed to the master, and left.

A person's bedroom is a place that has flavor and detail; it is an interesting place to explore, especially as compared to the sterility of a classroom or some other public place. A person's soul, too, has something of this color and distinctiveness; there are interests, memories, stories, and other things even more vital but which I have more

difficulty describing — the particular virtues and vices, the particular tendencies, which cause a person to act unlike any other. A soul, like a house, is a place of hospitality — a guest is invited into a host's house, to enjoy his comforts, his foods, and a friend is invited into another friend's soul, to enjoy it in a deeper form of the way in which we enjoy a friend's house. (In Heaven, there will be very much opportunity for hospitality; it will be the final place of community and celebration, and therefore our dwelling places can hardly be places of isolation.) For many years, I thought of this passage in terms of something of a more ornate, perhaps almost magical, physical edifice that would be nothing more; now, I see what is in retrospect obvious: when the old order of things has passed away and behold, all things are made new, our dwelling places will not simply be better purely physical buildings, but better than purely physical buildings. This is just as our bodies, which are dwelling-places of the Holy Spirit, will not simply be better purely physical bodies, but pneumatikon, spirit-bodies, better than purely physical bodies. I thought before of these rooms as physical rooms which we would decorate with artistic creations — and those artists among you will know what it means, and what a room means, when you are able to fill it with your artwork. I still do believe that — and I realized another form that will take. By our faith, and by our works, we are doing with our spirits what an artist does with a room when he toils over artwork to adorn it with. We are shaping the dwelling places we will have for our eternal play (and one of the images painted of Heaven is one of neither work nor rest, but pure and unbounded play). God is shaping us to become gods and goddesses, but he is not doing it in a

way that bypasses us and our free will; we are working with God in the work that will shape us forever.

Our souls, like our domiciles, are special places, far more than public places that anybody can enter without asking permission, in which to receive other people.

44: Nursing. The natural focal distance for an adult's eyes is twenty feet and on; the natural focal distance for an infant's eyes is eighteen inches, the distance between a woman's nipple and her nose. (Infants look at, and remember, noses rather than eyes.) Feeding, important as it may be, is only the beginning of what is going on when a mother is nursing a child. To put it another way, the necessity of physical feeding provides the occasion for a kything of love that provides even more necessary spiritual feeding.

45: Pregnancy. A fortiori.

46: Timeless moments. One person, speaking of singing a worship song, suggested thinking not so much in terms of "We start and stop this song," as "This song always has been going on and always will be going on; we just step into it for a time." In this spirit, there are moments of kything, often unsought and unattempted, which do not so much start and stop as are a stepping into the Eternal Kythe.

47: Parenting a child with a severe disease. At a bioethics conference, Dr. C. Everett Koop said, "There is a special bond that forms with a defective child, often far moreso than a normal child." He told a story from the practice of a Jewish pediatrician and colleague. A father lost a second child to Tay-Sachs, a degenerative disease whose people do not live to the age of four. Grieving, he said through tears, "He never gave me a moment's trouble." I am not sure why this is, but it may have

something to do with why I enjoy a small glass of wine more than a bottomless cup of Coke.

48: Corporate worship. Worship is a foretaste of Heaven, and it plays a focal role in the Eastern Orthodox emphasis on bringing Heaven down to earth; they describe their worship as stepping into Heaven. Worship is also the highest form of love. In these two aspects, at least, worship is kything. Corporate worship is a kything not only with God, but with the others you are worshipping with.

49: Janra-ball. This is a [game](#) I devised, and has been described as a Zen NOMIC. To excerpt the ingredients list:

Springfield, Monty Python, Calvin-Ball, body language, Harlem Globetrotters, sideways logic, Thieves' Cant, Intuition, counter-intuitive segues, spoon photography, creativity, Zen koans, Psychiatrist, adrenaline, perception, tickling, urban legend Spam recipe, swallowing a pill, illusionism, NOMIC, modern physics, raw chaos, F.D. & C. yellow number 5.

I originally hesitated to put this in, on the grounds that it is difficult to play, at least in a pure state. There've been a couple of times I've gotten together a group of people willing to play, and it didn't work. I thought it would require players with more of something — perception, intuition, creativity, spontaneity, etc.

— but in thinking recently, I have come to believe that it's something, like empathic listening, that can't just be turned on at will, especially by someone inexperienced (which would be everyone now). Joseph's behavior at the game last night persuaded me that it is indeed possible, perhaps best started at in small increments from a more structured game. (Maybe Pooh's

Corner will be able to play. Who knows?) I will say this: It's a difficult game to play, but if you can play it, it's an awesome kythe.

50: Synchronicity/attunement. As treated in *The Dance of Life*, people have rhythms about them — outside of conscious awareness — and when people are together, these rhythms can become attuned (and, if so, the people themselves are more attuned). This is something that is not as well appreciated in our culture as in others. The easiest example or analogue I can point to (I'm not sure which) is in walking together and holding hands.

When I was dating Rebecca, it took me a long time to learn to get in step, and stay in step — but things were smoother when I did.

51: A kind of openness. There is a kind of openness where you perceive something but can't put your finger on exactly what. If you can listen, be opening, look, then there is a sort of listening kything. I checked out a copy of *A Wind in the Door* yesterday, and when I was reading through to find insights for more ways of kything, I came on something that I felt was significant to what I'm writing, but I couldn't say what. I sat then, open, thinking, waiting to see what it was — and then realized that it was not the heart of a way of kything, but something to put at the beginning:

What he had actually seen she could not begin to guess. That he had seen something, something unusual, she was positive.

This is the same sort of feeling I felt about kything.

This is part of how kything is to Charles Wallace:

Meg said sharply, "Why? What did mother say?"  
Charles Wallace walked slowly through the high grass in  
the orchard. "She hasn't said. But it's sort of like radar  
blipping at me."

This kind of listening kythe is how I get a lot of the ideas for  
these items.

52: Introspection.

Then [Blajeny] sat up and folded his arms across his  
chest, and his strange luminous eyes turned inwards, so that  
he was looking not at the stars nor at the children but into  
some deep, dark place far within himself, and then further.  
He sat there, moving in, deeper and deeper, for time out of  
time. Then the focus of his eyes returned to the children,  
and he gave his radiant smile and answered Calvin's question  
as though not a moment had passed.

Introspection is a kything with oneself.

53: Forgiveness. Forgiveness is a spiritual act, a restoration  
of broken communion.

54: Artistic appreciation. In high school, I made a silver ring,  
designed to hold a drop of water as a stone. When I started to  
paint, I learned a new way of seeing. After a painting in which a  
pair of hands played prominently, I was captivated by the beauty  
of people's hands all around me; for the first time in my life, I  
saw in them a beauty as great as that of faces.

What an artist does is allow you to see through his eyes.  
When you look at a friend's watercolor, you are seeing the beach  
through her eyes, as you would not have perceived it yourself.  
When you read this list, you are thinking about the word 'kythe'  
through my mind.

55: Talking. This one is so obvious I overlooked it completely. The magic of symbols that allows mind-to-mind communication is one that is appreciated, for instance, when trying to work with someone who doesn't speak a common language with you.

56: Looking into another person, and telling him what you see. I have always enjoyed other people telling me what they see in me. For a time, I thought that was vanity, and vanity certainly played a part. But recently, I have come to see a deeper reason for asking this of other persons.

I have for a while enjoyed asking foreigners what they think of American culture, and probed a bit not only for the appreciation they will voice, but criticisms. Most foreigners can articulate the character of American culture better than can most Americans, and they have insights that wouldn't occur to an American. They see things that have become invisible to Americans. They have a distance, like aesthetic distance, that allows them to see what is too close to be visible to us.

For the same or analogous reasons, having another person tell you what he sees in you is another variant on introspection, like using a mirror in looking at yourself to see parts you can't look at directly. Different people who have known you for different amounts of time can see different parts of you.

When you tell another person what you see in him, you provide this sort of introspection; your words fuse with his knowledge of himself to form a deeper self-knowledge, and say more to him than they would mean to anyone else. They connect. They kythe. It is like the story of the crystal globe — only you can tell people how beautiful they are.

57: Driving. In the car this morning, after having to take my brother to school and my mother to work, I was thinking about the pod racing in Star Wars: Episode I — one of the most

Jedi/Force parts of the movie — and I realized I was really enjoying driving for the first time in years. (I started late in driving, and have a fear of it. I had enjoyed singing while driving, but not driving itself.) I was very aware of my surroundings, and connected, and entered flow. Though I stayed within the speed limit and there were no hazardous conditions, it was in a very real sense podracing. It was a kythe with my surroundings and especially with my car, which was as an extension of my body. It is entirely possible to kythe with technology (and I was seeking an example), to have your hands on a steering wheel or a keyboard so that you are thinking through them, and your thoughts are not on your hands or fingertips, but where the car is moving, or what letters are appearing on the screen.

Technology (techne, art + logos, logic, reason, domain of knowledge) is part of the creation of the imago Dei, and therefore has a role in God's order. There is a tendency for the sort of people interested in kything things to be Luddites, but this need not be. If you can kythe with God, with another person, with a shaggy dog, with the grass, with ideas, with experiences, then you can also kythe with a car, with a computer.

58: Pain. This one will probably be difficult for most Americans to understand, and I'm not sure I can explain it well — here I will probably be talking around my point mostly. We live in a painkilling culture, one that attempts to delete that entire region of human experience, and therefore neither understands nor profits from it.

A place to begin is to say that leprosy ravages the body through one very simple means: it shuts off a person's ability to feel pain. Exactly how shutting off pain causes such severe damage is left as a valuable exercise to the reader's imagination. Pain is an awareness of your body's state, and of what you can

and cannot do without aggravating an injury. I very rarely take painkillers, because I want to know exactly how my body is doing. (Sunday night was the first time in memory of taking a painkiller not prescribed by a doctor.)

In addition, pain is a present sensation; it is not in our nature to not notice. Intense pain can fill consciousness. (Some mentally ill people self-mutilate because the sensation of physical pain, if only momentarily, can take them out of their mental anguish.) If all our kything is as real as pain, we are doing well.

59: Death What was said about pain and our culture applies, *mutatis mutandis*, to death and our culture. (I don't know any good books on pain; a good, deep book on death is Peter Kreeft's *Love is Stronger Than Death*.) In other kythes, you kythe love, or ideas, or listening; in this kythe, you kythe yourself. The art of dying well is an art of letting go of a world you've known for years and giving yourself fully to God. That's about as full of a message as you can send.

60: Gift-giving. A good gift is at least three messages: a statement about the nature of the person giving the gift, a statement about the nature of the person receiving the gift, and something else peculiar to the character of the gift. None of these messages are symbolically encoded, and the result is that they can say things inexpressible in normal words. A gift is not worth a thousand words; there is no exchange rate between gifts and words.

61: Reminiscing. Reminiscing is a kything with memories.

62: Local traditions. There are traditions, like Pooh's Corner or Club Pseudo (a tradition at my high school, similar to an open mike at a coffeehouse). These traditions have a unique local flavor and personality, and create a special bond among participants. Janra-ball, if it works, would be another example.

63: Community. Community is like friendship, but it does not reduce to friendship. A community is more than a set of friendships, as a friendship is more than two isolated individuals.

64: Ellis lifeguarding. This entry should not be written by me; it should be written by my high school acquaintance Chuck Saletta. American Red Cross lifeguards are taught to respond to problems; Ellis lifeguards are taught to see them coming. Chuck has written that he knows ahead of time when a swimmer is going to be in distress, and also that on the highway he watches the cars ahead of him and is usually able to tell whether or not they'll turn on an exit — before they put their turn signals on. That has to involve an attention and attunement to the situation that is noteworthy.

65: Gathering.

"Has Mother actually told you all this?"

"Some of it. The rest I've just—gathered."

Charles Wallace did gather things out of his mother's mind, out of meg's mind, as another child might gather daisies in a field.

This is another passage that sticks in my mind as an insight into kything. I gather when I muse, when I have certain intuitions. I gather passages from the book. Where do you gather?

66: Firing a ballista at your television. Television is a crawling abomination from the darkest pits of Hell. It is a pack of cigarettes for the mind. It blinds the inner eye. It is the anti-kythe.

When I was in fourth grade, we read *The Last of the Really Great Wang-Doodles*, and then drew pictures. My teacher

commented that she could tell from the pictures who watched TV. A home without television is like a slice of chocolate cake without tartar sauce. Get rid of your television, and you will find yourself living life more fully, and kything more deeply.

Two good books dealing with this topic are Neil Postman's concise and lively *Amusing Ourselves to Death: Public Discourse in an Age of Show Business*, and Jerry Mander's in-depth *Four Arguments For the Elimination of Television*.

67: Boundaries. Boundaries are an important part of friendship; the boundaries of a message give it shape; drinking a certain amount of wine and then stopping enables you to enjoy it without becoming drunk. Boundaries are a kind of kythe, and also a part of other kythes; a hug is best if it is neither too short nor too long.

68: Thunderstorms. Imagine that you are a child, outside in a thunderstorm at night, with the rain warm and heavy, the wind blowing about, the trees dancing, everything suddenly illumined by flashes of lightning. Wild nights are my glory. This is a night to connect with, to drink in.

(Idea taken from Robin Munn.)

69: Using a knack. I am adept at finding pressure points on the body — not just the ones I know, but the ones I don't know. I can tell from looking if a person will say 'yes' or 'no' to a hug. More fallibly, I can sometimes guess if a person is ticklish (hi, Ashley!).

I don't know how I do any of these things, but these knacks are a form of kything.

70: Trying to kythe. I think it was Richard Foster who said that the very act of struggling to pray is itself a form of prayer. Last night during Pooh's Corner, my fear of driving began to act up, and I walked out of the building thinking, "I won't be able to

kythe now. I'm not in the proper frame of mind." Then I realized — no, I could kythe. I couldn't produce the same end result, but I could put myself into it. A small child's crayon drawing of a five-legged dog whose head is larger than its body is a beautiful thing, and it is made beautiful not by the performance criteria that a commercial product would be judged by, but by the love and effort that went into it.

I have attention deficit disorder. I can hyperfocus at times (exactly which times being largely out of my control), but quite often I haven't connected with Pooh's Corner. I haven't been in the silliness, drinking it in even as an observer. What I have realized in writing this entry is that that doesn't matter nearly as much as I thought it did, just as the crudity of the above described drawing doesn't matter very much. It doesn't matter if I often don't succeed. I try. I kythe.

71: Weight lifting. The amount of force coming from a muscle is the result, not only of the muscle's size and condition, but the amount of nervous impulse coming from the brain. People can normally summon only a small fraction of the total possible muscle impulse. One case where there can be full or near-full exertion is when people are terrified; they can possess something called hysterical strength, where it is entirely possible for a small, middle-aged woman to lift the back end of a car. Another is an epileptic seizure; in my EMT class, we were told not to try to restrain someone having a seizure, because bones will snap sooner than muscle strength will give out.

I trained with weights for a few years, and doing so was largely on will. I had pencil-thin arms and legs as a child, and worked to the point of having a Greek figure. (I now have a Greek figure plus a paunch, but we won't get into that.) I got to the point of being able to lift the full stack (as much resistance

as a machine designed for football players can give) on the better part of the machines, and (in moments of being macho and trying to do something I could brag about) walked a couple of short steps while carrying over 400 pounds of weight, and injured my hand by punching through stone tiles. I didn't get much bigger after a certain point. Only a small portion of my doing those things was muscle. The rest was mind.

Many of the items above have been kythes of drinking in. This a kythe of putting out.

72: Doing something new and difficult. When you are skilled at something, you don't have to put much of yourself into it to succeed. In high school, I put a lot of effort into trying to learn how to balance on a slack rope. I never really succeeded at what I aimed for, but I learned a couple of things. My balance improved a lot. One person watching me said it was like watching the sensei catching flies with chopsticks, in *The Karate Kid*. Even if I didn't succeed at my intention, I learned to put my whole self into it.

73: Going through a difficult experience together. Meg and Mr. Jenkins came to know each other in a way that never would have happened had things been light and sunny. It may not be seen for the pain at the moment, but afterwards a growing-closer has happened.

74: Intuitions. Being attuned to, and using, your intuition is another way of kything.

75: Knowing others.

[Meg:] "...Did you know it was one of Calvin's brothers who beat Charles Wallace up today? I bet he's upset—I don't mean Whippy, he couldn't care less—Calvin. Somebody's bound to have told him."

[Mrs. Murray:] "Do you want to call him?"

"Not me. Not Calvin. I just have to wait. Maybe he'll come over or something."

One form of communion comes from knowing another person so well that communication is unnecessary. There is something more in this passage than if Meg had called Calvin — far more.

76: The useless. Many of those areas of human intercourse which are cut out by American pragmatism are the areas of speech which most embody kything. Within speech, talking about how to get something done is not a kythe — certainly not compared to a discussion which conveys love or insight or theory. Kything is something that's not in Pierce's and Dewey's practical world.

77: Culture. Culture, often invisible to us, is a shared kythe across a group of people. It is the framework for communication, a kythe that gives other kythes their shape.

78: Wordless knowledge. When I was at Innes's house, she asked me if I thought my twin brothers Ben and Joe were introverted, extroverted, etc. My first response, after a bit of a pause, was, "I don't know." I thought some more, and realized that the truth was slightly different: it had never occurred to me to think about them in those terms.

After I read *Stranger in a Strange Land*, I began to realize that many of my deepest thoughts were not in English, not for that matter in anything like verbal language. When I write them down, it is usually a translation, and sometimes matter a far more difficult translation than between English and French. It is more like trying to translate a song into a poem. These thoughts are of a wordless thinking, like the kything of the fara.

Personal Knowledge, a profound book and an excellent cure

for insomnia, deals with those facets of human thought and interaction that do not reduce to words.

79: Being underwater. I felt that this was a kythe, but couldn't put my finger on how. I still can't fully articulate it, but it has a similar feel to a visual kythe. The beginning of [A Dream of Light](#) provides a good description of an underwater kythe:

You pull your arms to your side and glide through the water. On your left is a fountain of bubbles, upside down, beneath a waterfall; the bubbles shoot down and then cascade out and to the surface. To your right swims a school of colorful fish, red and blue with thin black stripes. The water is cool, and you can feel the currents gently pushing and pulling your body. Ahead of you, seaweed above and long, bright green leaves below wave back and forth, flowing and bending. You pull your arms, again, with a powerful stroke which shoots you forward under the seaweed; your back feels cool in the shade. You kick, and you feel the warmth of the sun again, soaking in and through your skin and muscles. Bands of light dance on the sand beneath you, as the light is bent and turned by the waves.

There is a time of rest and stillness; all is at a deep and serene peace. The slow motion of the waves, the dancing lights below and above, the supple bending of the plants, all form part of a stillness. It is soothing, like the soft, smooth notes of a lullaby.

Your eyes slowly close, and you feel even more the warm sunlight, and the gentle caresses of the sea. And, in your rest, you become more aware of a silent presence. You were not unaware of it before, but you are more aware of it now.

It is there:

Being.  
Love.  
Life.  
Healing.  
Calm.  
Rest.  
Reality.

Like a tree with water slowly flowing in, through roots hidden deep within the earth, and filling it from the inside out, you abide in the presence. It is a moment spent, not in time, but in eternity.

You look out of the eternity; your eyes are now open because you have eternity in your heart and your heart in eternity. In the distance, you see dolphins; one of them turns to you, and begins to swim. The others are not far off.

It lets you pet its nose, and nestles against you. You grab on to its dorsal fin, and go speeding off together. The water rushes by at an exhilarating speed; the dolphin jumps out of the water, so that you see waves and sky for a brief moment before splashing through the surface.

The dolphins chase each other, and swim hither and thither, in and out from the shore. After they all seem exhausted, they swim more slowly, until at last you come to a lagoon.

In the center, you see a large mass; swimming closer, you see that it is a sunken ship. You find an opening...

80: Becoming ancient. Most entries so far have focused on what you do when you kythe. This is an entry about who you are. When you are ancient, you have had ages to let God work with you. You have had time to grow mature. You have gained

experience. You have lived through many events and circumstances. You have smiled on generations. You have experienced change, both without you and within you. You have learned what is constant, both without you and within you. You have grown wise. You kythe with depth, with reality. You are like Senex (whose name means 'aged'), like the fara — deep, rooted, moving without motion, sharing in the age (however faintly) of the Ancient of Days. Become all this, and you will kythe.

81: Becoming a child. When you are a child, you look with wonder at every bit of the world God has made; you do not know jadedness. You do not know guile; it would never occur to you to wear a mask. You play. You are never afraid to come running for a hug. You stay out in the rain. You always want to grow. You always want to know, "Why?" You bear a peace no storm has troubled.

You can believe anything. You are like the little farandolae, dancing, swimming. Become all this, and you will kythe.

82: Doing something for its own sake. Someone said that a classic is a book that everybody wants to have read and nobody wants to read. There is a big difference between reading a book because you want to have read it, and reading it because you want to read it. The former is something to endure, the latter something to enjoy. For a while, when I drove, I would often drive five or ten miles under the limit, and when I started driving at the limit, it was mainly as a courtesy to not stress other drivers, and because I started driving on streets with heavier traffic where it would be hazardous to drive that much more slowly than the flow of traffic. I do not generally get tense (for reasons other than my fear of driving, and blunders I make as I still learn to drive), have nervous fidgets, get angry, or experience stress at red lights, slow traffic, and other delays that shoot some drivers' blood pressure through the roof. The

reason is that I am operating within a mindset of "I am driving; I am in the process of getting there; I will be there," as opposed to "I need to be there now, and I am tolerating this drive because it is the least slow means of getting there, and— Hey! That's another second's delay. Ooh, that makes me mad!" Pirsig treats this point at some length in the section of *Zen and the Art of Motorcycle Maintenance* that deals with climbing and his son's ego climbing.

Of course many activities are means to other activities, and we would be in a bad state if we couldn't do one thing to get at something else. But even then, intermediate activities that are trampled on are not good to do. Really wanting to do something, and doing it for its own sake, is a kythe with the activity that is better for both you and the activity.

83: Silence.

Through [Mr. Jenkins's] discouragement she became aware of Calvin. "Hey, Meg! Communication implies sound. Communion doesn't." He sent her a brief image of walking silently through the woods, the two of them alone together, their feet almost noiseless on the rusty carpet of pine needles. They walked without speaking, without touching, and yet they were as close as it is possible for two human beings to be. They climbed up through the woods, coming out of the brilliant sunlight at the top of the hill. A few sumac trees showed their rusty candles. Mountain laurel, shiny, so dark a green the leaves seemed black in the fierceness of sunlight, pressed towards the woods. Meg and Calvin had stretched out in the thick, late-summer grass, lying on their backs and gazing up into the shimmering blue of sky, a vault interrupted only by a few small clouds.

And she had been as happy, she remember, as it is possible to be, and as close to Calvin as she had ever been to anybody in her life, even Charles Wallace, so close that their separate bodies, daisies and buttercups joining rather than dividig them, seemed a single enjoyment of summer and sun and each other.

That was surely the purest form of kything.

When I was in France, Rebecca wrote a letter about some of the moments she valued most with me. There was one moment when we went into the fine arts center, and I improvised on the

organ for her,  
and then we sat  
in the silence  
in the dark  
not saying anything  
not doing anything  
just being.

Other people had talked with her and done things with her. I was the first person to be in the silence with her, and it profoundly affected her.

84: Dodge-ball. When I thought of this during a slow, back-burner brainstorm, I initially wanted to put it in because of pride and boastfulness: I wanted to impress you with how talented I am. Then I realized what I was thinking, and realized that was entirely out of place, and decided to definitely leave it out. But I still had some idle thoughts about it mulling about... and I mused... and realized something amazing. This definitely belongs in.

In dodge-ball, I couldn't throw worth beans. Still can't. But, in a lock-in for sophomores at IMSA, I joined a game of dodge-ball and hid around in the back and noticed that there were

... and the ground in the back... and noticed that there were fewer and fewer people left on my team... and then I was one of two... and then the only one. Then, for five minutes, I dodged the whole other team throwing at me, sometimes four or five balls at once, and then a ball brushed me. When I stopped and began to slow down, I realized that the soles of my bare feet were burning hot from the friction of my jumping. After another game like that, people decided that if it got down to the other team versus me, the game was a draw.

One of the upperclassmen supervising, Paul Vondrak, was a great thrower; he was able not only to throw accurately, but to throw much faster than anyone else. He would stand, wind up slowly, and throw like lightning. I think it only took him about five throws to nick me.

I was thinking about this latter item, and (examining the memory) realized that I was paying very close attention to him... then realized that I was attuned to him... then thought that it was almost like a martial artist... and then realized, in a flash of insight, that in the one game I was doing the same thing a Samurai does when he defeats ten men. I do not understand exactly why I was able to do this without any special training or experience, although it does lend some corroboration to the puzzling fact that as a karate white belt I was able to defeat two out of three of my blackbelt instructors in sparring. Now I know that I have had an experience I would not ordinarily expect to have access to. I guess I would chalk it up to an unusual talent for certain kinds of kything.

I was trying to analyze my state of mind in (especially) the five minute dodge at the end, and the first thing I realized was that I don't remember that state of mind too well — not as well as I remember feeling that my feet were hot afterwards. From what I remember my state of mind differed from normal

what I remember, my state of mind differed from normal consciousness. A hint of an explanation would be to say that the perceptual processing alone would have severely overloaded my conscious mind. It could also be described as flow or podracing. I know there's more, but I can't get at it. If I can better process this memory, I think I will better understand kything. As I mull over this, I think that those five minutes may qualify as the most intense kythe of my life.

85: Reading another person's body languages and emotions. As telekinesis is really moving things with your arms and telepathy is really talking, Charles Wallace's awareness, without being told, of what's going on in meg is really a perception of others' emotions. This is the origin for the spark of beauty in that facet of Charles Wallace's kything, and it is an area where I'd like to grow.

86: Withdrawing.

[The Shal's] moments of community are profound; their moments of solitude are even more profound. `Withdrawing' is what they call it; it is a time of stillness, and an expression of a love so profound that all other loves appear to be hate. It is a time of finding a secret place, and then withdrawing — from family, friends, and loved ones, from music and the beauty of nature, from cherished activities, from sensation — into the heart of the Father. It is a time of — it is hard to say what. Of being loved, and of loving. Of growing still, and becoming. Of being set in a right state, and realigned in accordance with the ultimate reality. Of purity from the Origin. Of being made who one is to be. Of communion and worship. Of imago dei filled with the light of Deus. Of being pulled out of time and knowing something of the eternal.

[Espiriticthus: Cultures of a Fantasy World not Touched  
by Sin.](#)

87: Zoning out. This is one of the last places one would look for kything; Robin observed that one of the central themes tying these entries together is presence, and this would seem to be the essence of absence. For all that... I found myself spacing out, and left the spacing out for introspection, and realized that my mental and emotional state was that of kything. A start of an explanation is that if it is an absence, it is entirely devoid of the Baudelarian flight urged in *Enivrez-vous*. It is a present absence; it goes into It is an egoless sliding into enjoyment. It is still and peaceful; it is quite restful; it is a good. Being in a similar attitude will help other kythes.

88: Playing Springfield. Springfield is a game with very simple rules: two people alternate naming state capitals, and the first person to name Springfield wins.

What makes it interesting is that it's not a game of mathematical strategy. It's a game of perception. The real objective is to win as late as possible, and that means reading the other person and seeing how far you can go: from nonverbal cues, you need to read his mind.

Springfield is probably comparable to poker.

89: Thinking deeply, prolongedly, and intensely about a question. I realized today that I had been thinking pretty hard about kything for several days, and thought I should take a sabbath from it: I would record ideas that I had, but not intentionally give conscious thought to the question. It was after I did that that I began to realize how deeply I had been kything with the idea of kything.

The first thing I noticed was that it was hard to stop

thinking. The second thing I realized was that I was still thinking of ways of kything. I probably don't have to devote any more conscious effort to thinking to complete the number of entries.

When you think in that manner, for a sufficient length of time, your thought acquires the momentum of a freight train. Mathematicians solve some of the most difficult problems after long and intense thought, and then cessation of conscious thought, usually to the point of forgetting it — and the solution comes. If it can be solved by continuous thought, it is not among the most difficult problems; the mathematician is not exercising his full abilities. When the storm ceases and the surface of the ocean stills, then the Leviathan stirs in the deeps. Deep calls to deep. This is perhaps the most profound kythe with an idea.

90: Experience. Experience in a domain constitutes and enables a kythe with that domain. My Mom asked me if I had a universal adaptor for her tape recorder, and I pulled one and said, "Is this the right jack? If it isn't, I have another." She said, "I don't know, let me see." A short while afterwards, she called me over to look at it, because "it seems to have two prongs." I looked at, and instantly realized that it didn't need an adaptor. It needed a power cord.

I was mildly irritated, and was finally able to put my finger on something I'd felt. Answering her help requests with technology has the same feel to me as explaining things to a small, naive child who doesn't understand how the world works. She sees technology as this mysterious, unpredictable black box which works by magic.

I thought a little more, as my mother is neither naive nor childish. She is an intelligent and well-educated woman. What I realized was that I was not appreciating my own experience. Experience enables a person to look at the surface and see the

depths — and a port for a power cord does not look fundamentally different from what a port for an adaptor might be. I see a computer as having definite inner workings which work according to understandable principle; when the computer is malfunctioning, I think I have a chance of understanding why. If my Mom thinks that the computer is a black box (you can see what it does, but not what's inside it), I think of it as a white box (you can see what's going on inside, and try to fix it if need be). The way I look at computers might be compared to the topographical anatomy I was taught in my EMT class, where you look at skin and see the underlying organs.

You kythe more when you're interacting with a white box than with a black box, and that comes with experience.

91: Closing your eyes.

[Charles Wallace] closed his eyes, not to shut out Louise, not to shut out Meg, but to see with his inner eyes.

I closed my eyes when visiting my friend Innes's house, and I realized what I was doing, and why: to focus, to connect, to concentrate. This is why couples close their eyes when they kiss; this is why we have the custom of closing our eyes when we pray. The image of a blind seer is a part of myth and literature; when we close our eyes, we momentarily blind ourselves so we can see.

92: Mental illness. Mental illness is not exactly a purely negative thing. It is a difference that is ecological in character, with positive as well as negative aspects. This very dark cloud has a silver lining, sometimes a mithril lining. This is why people with mental illness speak of a gift — something that puzzled me when I first heard it.

93: Mental health. If mental illness is a way of kything, then mental health is definitely a way of kything. Robin is a good

friend and an excellent listener, and he radiates health. And Joel

—

Robin once mentioned a theatre professor saying of his predecessor that with most people, they walk into a room and it's "What about me?" His predecessor walks into the room and it's, "What about you?"

I remember thinking, "I'd like to have a friend like that," and then, "I would like to be like that." A day later, I realized that I do have a friend like that: Joel. With Joel, it's "What about you?"

Joel is probably the best kyther I know.

94: Watching or studying a kythe.

[Meg] found herself looking directly into one of his eyes, a great, amber cat's eye, the dark mandala of the pupil, opening, compelling, beckoning.

She was drawn towards the oval, was pulled into it, was through it.

My brothers were playing, and I was watching Ben and Joe play. I became aware of an energetic character to the play, and then I recognized a kythe a split second before remembering the entry about play as kything. So I decided to watch — and then I realized I was in the kythe.

95: Nature. To be out in the woods, or looking at night at the sapphire sky and crystalline stars, or listen to the sounds of a forest, or to play with an animal, or wade barefoot through a cold, babbling brook — these are ways of kything with nature.

(Taken from Innes Sheridan.)

96: Swallowing a pill. Learning to swallow a pill was a long and traumatic experience for me; for the longest time, I tried my

hardest and just couldn't do it. The reason was precisely that I was trying my hardest: I was trying much too hard. When I finally did learn, I learned far better than most; I can now swallow several decent-sized pills on a sip of water — when I was last hospitalized, the nurses remarked at how little water I needed, and told me to drink more.

In what is for the most people a minor learning experience, I came to really appreciate how easy swallowing a pill is — to easy to force or accomplish by willpower. In this regard, it is not only an example of kything, but a symbol. Do, or do not. There is no try.

97: *Mystical experiences.* These are bestowed by God, and are not human doing; visions may come once or twice in a person's life, not at all for most people. When they do happen, they are a special moment of grace, and communion with God, and they can leave a person changed for life.

98: *Massage.* Being able to do backrubs is a good skill to take to college campuses. When you give another person a massage, you communicate with his body through touch, and relax the flesh, the body, and the person you are touching, more fully than he can himself. It is different from many other touches, in that it is not spontaneous or habitual; it is a special time set aside to connect.

99: *Saying farewell.*

Parting is such sweet sorrow.

-William Shakespeare

When someone's leaving, people say many of the things that they should have said long before but never got around to. Barriers come down. People realize how much others mean. They

That is an obvious insight into saying farewell. What is less obvious is that these things can happen at any time. It is not so much that people can't normally commune in this manner and are specially enabled to when someone leaves, as that people normally avoid this communion, and when some leaves they realize how bad it would be to them at any point. You can tell someone how much they mean to you any day. I did something like this for Robin recently, as I stopped from writing this to think about practicing what I was preaching. He and I are both glad I did. One part of the barriers coming down is that sharing yourself is inherently risky, and there is less risk if a person is leaving — if you share something that makes the other person think you are stupid, at least he'll be away. So people share more. If you realize this, you can share on ordinary days what you would normally share when saying farewell — and grow closer. It might be a good idea to hold a farewell party for someone when he's not going away. The same may be said for a funeral — there is something magnificent that goes on at a funeral, that doesn't really have to wait for a person's death.

100: Anything. Thursday night, I was at a band concert at Ben and Joe's school. Afterwards, when walking through the mass of people, there was a moment when I was looking down into a little girl's face, and as it passed I realized I was kything. There is a sense in which anything can be kything, if it is done in the right way.

Now we kythe darkly and through a glass. Then we shall kythe fully, spirit to spirit, even as we are fully kythed.

*soli deo gloria*

# The Labyrinth

What labyrinth is this,  
Around and within me?  
My God, my God, why have I forsaken Thee?  
My God, my God, why have I forsaken Thee?  
Why have I fled from Thy help,  
And the Word whom Thou hast shouted?  
My God, Thou criest out in the fullness of day,  
And in season of night, yet there is no silence in me.  
But Thou dwellest in a sanctuary:  
Even the praises of Israel.  
In Thee our fathers hoped,  
They hoped, and Thou deliveredst them.  
They cried to Thee, and were saved;  
They hoped in Thee, and were delivered.  
But I am a worm, no more a man,  
A reproach to mankind, and of a people despised.  
All who see laugh me to scorn,  
They speak with their lips,  
They shake their heads, saying,  
He once trusted in the Lord,  
Let Him deliver him,  
Let Him save him,  
If He still takes pleasure in him.

But Thou art He that drew me from the womb:  
My hope from my mother's breasts.  
I was cast on Thee from the womb;  
Thou wert my God even in my mother's belly.  
I stand afar off from Thee;  
For I have drawn nigh unto affliction,  
Where there are none who shall help.  
For bears have encompassed me;  
Ravening bears have circled round about me.  
They have opened their mouths against me,  
As a devouring and roaring dragon,  
As a dragon spewing fire and brimstone.  
I am poured out like water,  
Yea, my very bones are pulled out of place,  
My heart is like wax,  
Melting away in my bowels.  
My strong wealth is dried up like a potsherd,  
My tongue never sated in my throat,  
I have brought myself down,  
To the very dust of death.  
For many dogs have compassed me,  
The assembly of wicked doers hath beset me round,  
They ensnared my deeds and my movement.  
They have a count on all my bones,  
They observe and look on all I do and say.  
They have split among themselves what covered me,  
And my raiment perdureth but as perchance.  
What is this labyrinth?  
What is this I have enmeshed myself in?  
For in the [Sermon on the Mount](#),

Hear the Lord the word spake:  
No man can serve two masters:  
Thou canst not serve God and Mammon.  
What reached Mammon in the days of yore?  
Ox and ass, a field, a vine,  
A house of single room, by single lamp enlightened:  
What reaches Mammon in our tangled web?  
Lexus and iPhone, or Nokia and Government Motors,  
Alike impossible to medieval lord,  
And not so different in reality:  
Oh what a tangled web we weave,  
When we allow branding us to deceive!  
Space-conquering tools of train and car,  
Dwarfed not by supersonic airplane nor spacecraft,  
But by internet communication, and mobile,  
Stripped communication bearing not communion,  
In the panopticon of NSA forever recorded:  
For in the [Sermon on the Mount](#),  
Hear the Lord the word spake:  
No man can serve two masters:  
Thou canst not serve God and Mammon:  
When the apex of technology remained,  
But the humble workshop of humble artisan,  
Mammon's nature was spoken: not servant, but master,  
A cruel yoke to shoulder, bear, and live.  
But of our labyrinth,  
Technology is neither beginning nor end,  
Nor properly the center, for it sufficeth not,  
To say as of computer games already obsolete,  
You are in a maze of twisted Infocom parodies, all alike:  
Do not confuse the skin with the heart.

Nor think only of the ancient attack on manhood,  
Named porn, for it is not new:  
Not new in sepia etching, nor old crumbling book;  
Archaeologists dig it up in ancient ruins.  
But in decades of yore, yt poison,  
Called for a man to sneak into a store,  
Hoping no one would see his parked car,  
Beside a store of windows all papered;  
Behold a new thing:  
For now thou needest do no such thing,  
It is included in a utility well nigh indispensable,  
And thou needest not even seek temptation:  
With a good filter, thou wilt receive less,  
Of offers that make Hugh Hefner look like Botticelli,  
And shouldst thy natural lust not suffice thee,  
Thou wilt be told thou needest Viagra.  
But call this not the sum of it either:  
For SecondLife is called SecondWife,  
Not only because thou needest not hear the moralist's protest,  
Fornicate using your OWN genitals!  
Push this temptation aside, which is not the sole raison d'être:  
The true raison d'être be never new:  
The true raison d'être was known to desert monks,  
Ancient and today,  
And by these fathers is called,  
Temptation, passion, demon,  
Of escaping the world.  
SecondLife is the apotheosis,  
Nay, the next installment,  
Of what came in an earlier installment,  
In cinematic movie theatres,

Such as rural American volunteers preserve,  
As a piece of history to keep alive for the young,  
And moralists said more than that movies can be made lewd,  
For they spake of an escape into fantasy,  
Whether literal or metaphorical is a smaller question than it  
might seem:

For fantasy is fiction squared, and in Western history,  
Fiction emerged, with abstraction:  
Abs-trahere, from Latin,  
Meaning pulled back from real things,  
And fantasy and science fiction provide a next installment:  
If the characters and story be created whole cloth,  
Why not unfold a bit further:

Why not the story's world itself?  
And this ancient passion of escaping the world,  
Of which monks were ever presently warned,  
We devise more potent ways to escape,  
Where God has placed us,  
Whence thou wouldst do well to hear exhortation,  
Of disenchanting exiles of SecondLife:  
Get a first life!

We have many ways to create our own private world:  
With technology or with ancient imagination,  
Modern or postmodern in our bent,  
Our own private escape from what is around us,  
Our own private Hell,  
But this need not rule us!  
Tis a tangled labyrinth before us,  
And whilst we gain,  
In learning to use technology,  
Not to further our journeys of passion,

But as tools in living life rightly,  
The door to life rightly lived,  
Is not closed to those who are neither ancient nor rural:  
There is a little gain in learning to bear with silence,  
Endure hunger, live on less,  
As a remedy to covetousness count thy blessings,  
Pray through boredom,  
Yet here also,  
Do not mistake the skin for the heart.  
In the labyrinth, there is no hope:  
Only infinite possibilities to lose thy way.  
But above the labyrinth there is hope.  
And Christ is the Door,  
Now as much as ever;  
Ascesis in the Church is lifegiving,  
Now as much as ever,  
Unseen warfare can lead us to serene contemplation,  
Now as much as ever,  
And God is here.  
Paradise is wherever the saints are,  
And we can find Paradise even with a labyrinth,  
That surrounds us,  
With no room to escape:  
We do not need to escape.  
But Thou, O Lord, be not far from me,  
O mine every strength, hasten to help me.  
Save my soul from the glaive:  
My very nature from the power of the dog.  
Save me from the dragon's mouth:  
For let me learn humility as a unicorn's horn.  
I will declare Thy praise to my brethren:

In the midst of the Church I will praise Thee.  
You who fear the Lord, praise Him;  
All ye seed of Jacob, glorify him;  
For He hath not despised nor abhorred,  
The affliction of the afflicted:  
Neither hath He hidden his face from him,  
But when he cried to Him for help, He heard him.  
My praise is before thee in the great congregation;  
I will pay my vows before them that hold him in holy fear.  
The poor shall eat and be satisfied;  
And they that seek the Lord shall praise him;  
Let their hearts live forever!  
All the ends of the earth shall remember and turn to the Lord:  
And all the kindreds of the nations shall worship before him.  
For the Kingdom is the Lord's,  
And he is the Ruler of the nations.  
All the prosperous upon the earth shall eat and worship;  
All those that go down to the dust shall bow before him:  
And my soul eternally lives through him,  
My posterity shall serve him;  
The Lord will be declared to a generation yet to be born.  
They shall declare to a people yet to be formed,  
That by the Lord:  
It is finished.

# **The Law of Attraction: A Dialogue with an Eastern Orthodox Christian Mystic**

**Paidion:** I found some really interesting stuff about the Law of Attraction.

**Aneer:** What is it that you have found?

**Paidion:** This wonderful secret, the Law of Attraction, is a secret where if you understand how you attract what you think about... then you have the key to happiness!

**Aneer:** Have you seen what else the Law of Attraction could be?

**Paidion:** You mean the Law of Attraction could be more?

**Aneer:** Let me think about how to explain this...

**Paidion:** Did the Church Fathers say anything about the Law of Attraction? Or did the Bible?

**Aneer:** Where to start, where to start—the Law of Attraction says our thoughts are important, and that is true. Not just a little bit true, but deeper than a whale can dive. The Apostle writes:

Finally, brethren, whatsoever things are true, whatsoever things are honest, whatsoever things are just, whatsoever things are pure, whatsoever things are lovely, whatsoever things are of good report; if there be any virtue, and if there be any praise, think on these things.

**Paidion:** And there is something about "ask, seek, knock?"

**Aneer:** Yes, indeed:

Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you: For every one that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened.

It is part of the [Sermon on the Mount](#). But there is something that you may be missing about what is in the [Sermon on the Mount](#), and something you may be missing about the Law of Attraction.

**Paidion:** Why? Is there anything relevant besides the [Sermon on the Mount](#)?

**Aneer:** Yes indeed, from the first pages of [Genesis](#):

Now the serpent was more subtil than any beast of the field which the LORD God had made. And he said unto the woman, "Yea, hath God said, "Ye shall not eat of every tree of the garden?"

And the woman said unto the serpent, "We may eat of the fruit of the trees of the garden: But of the fruit of the tree which is in the midst of the garden, God hath said, Ye shall not eat of it,

neither shall ye touch it, lest ye die."

And the serpent said unto the woman, "Ye shall not surely die: For God doth know that in the day ye eat thereof, then your eyes shall be opened, and ye shall be as gods, knowing good and evil."

And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat,

The Law of Attraction is here. The very heart of the Law of Attraction is here. Have you read [The Magician's Nephew?](#)

**Paidion:** It is one of my favorite books.

**Aneer:** Do you remember what Jadis stole?

**Paidion:** How could Jadis steal anything? She was a queen!

**Aneer:** Then you have forgotten the verse when Jadis met a garden enclosed:

"Come in by the gold gates or not at all,  
Take of my fruit for others or forbear,  
For those who steal or those who climb my wall  
Shall find their heart's desire and find despair."

The story gives a glimpse of the Queen Jadis finding her heart's desire: undying years, and undying strength. She found everything the Law of Attraction promises. If the Law of Attraction does anything, you can see it unfold in Eve choosing to be attracted to the fruit, or Jadis.

But undying strength was not the only thing in the picture. When Jadis ate that apple, she might never age

or die, but neither could she ever live again. She cheated death, perhaps, but at the expense of Life. Which is to say that she didn't really cheat Death at all. And she damned herself to a "living" death that was hollow compared to her previous life she so eagerly threw away.

**Paidion:** So you think Eve was like Jadis? Halfway to being a vampire?

**Aneer:** Paidion, you're big on imagining. I want you to imagine the Garden of Eden for just a moment. Adam and Eve have been created immortal, glorious, lord and lady of all nature, and Eve tastes an exhilarating rush that has something very vampiric about it: a moment passed, and the woman who had never known pain found the seed of death deep inside her. And in a flash of insight, she realized something.

**Paidion:** What is it she realized?

**Aneer:** She had the seed of death eating away at her. Nothing could stop her from dying. And her deathless husband would watch her die.

**Paidion:** A sad end to the story.

**Aneer:** What do you mean?

**Paidion:** But it's a tragedy!

**Aneer:** It may be tragic, but how is it an end to Adam's story?

Adam was still deathless. He would live on; did you assume he would be celibate, or that Eve envisioned God to never provide him a wife to share in blessed happiness?

**Paidion:** Look, this is all very impressive, but is any of this really part of the ancient story?

**Aneer:** I cut off the story before its usual end. The end goes surprisingly fast:

And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat, and gave also unto her husband with her; and he did eat.

**Paidion:** Why? Is this just Eve's... solution... to... the... problem... of... Adam's... [shudder]

**Aneer:** Do you think your generation is the first to invent jealousy?

**Paidion:** But can't the Law of Attraction be used for good?

**Aneer:** When people speak of the Law of Attraction, it always sounds like the unearthing of the key to happiness.

**Paidion:** But what else could it be once we are attracting the right thoughts?

**Aneer:** What, exactly, are the right thoughts might be something interesting to discuss someday. But for now let me suggest that the Law of Attraction might be something very different, at its core, from the key to happiness: it could be the bait to a trap.

The [Sermon on the Mount](#) truly does say,

Ask, and it shall be given you; seek, and ye shall find; knock, and it shall be opened unto you: For every one that asketh receiveth; and he that seeketh findeth; and to him that knocketh it shall be opened.

but only after saying something that is cut from the same cloth:

But seek ye first the kingdom of God, and his righteousness; and all these things shall be added unto you.

The [Sermon on the Mount](#) finds it unworthy of the children of a loving and providing God to chase after food and clothing—or cars and iPods or whatever—as if they have to do so because their Heavenly Father has forgotten their needs. God knows our needs before we begin to ask, and it's a distraction for us to be so terribly concerned about the things that will be added to us if we put first things first and last things last.

**Paidion:** But what is wrong with wanting abundance?

**Aneer:** Have you read Plato's [Republic](#)?

**Paidion:** No.

**Aneer:** Did you know that royalty do not touch money?

**Paidion:** Why not? It would seem that a king should have the most right to touch money.

**Aneer:** Well, let us leave discussion of rights for another day. But there's something in the [Republic](#) where Plato knows something about gold, and it is the reason why royalty do not touch money.

**Paidion:** And that is?

**Aneer:** Plato is describing the guardians, the highest rulers of an ideal city. And what he says about them is that they have true gold in their character: they have a truer gold than gold itself, and they are set apart for something high enough that they would only be

distracted by handling the kind of gold that is dug up from the earth like something dead.

**Paidion:** But kings have palaces and jewels and such!

**Aneer:** Not in Plato's [Republic](#) they don't. The life of a ruler, of a king, in Plato is something like the life of a monk. It's not about having palaces of gold any more than being President is all about being able to watch cartoons all day!

**Paidion:** Ok, but for the rest of us who may not be royalty, can't we at least want abundance as a consolation prize?

**Aneer:** "The rest of us who may not be royalty?"  
What can you possibly mean?

**Paidion:** Um...

**Aneer:** All of us bear the royal bloodline of Lord Adam and Lady Eve. All of us are created in the divine image, made to grow into the likeness of Christ and—

**Paidion:** So we are all made to rule as kings?

**Aneer:** Read the Fathers and you will find that the real rule of royalty is when we rule over God's creation as royal emblems, as the image of God. For people to rule other people is not just not the only kind of royal rule: it's almost like a necessary evil. Do you know of the ritual anointing of kings? In the Bible, a man is made king when he is anointed with oil. Such anointing still takes place in England, for instance. And when a person receives the responsibility for sacred work in the Orthodox Church, he is anointed—chrismated—and in this anointing, the Orthodox Church has always seen the sacred anointing of prophet, priest, and king.

**Paidion:** But this is just for priests, right?

**Aneer:** Paidion, every one of us is created for spiritual

priesthood. Perhaps I wasn't clear: the anointing of prophet, priest, and king is for every faithful member of the Church, not just a few spiritual Marines. Chrismation, or royal anointing, is administered alongside baptism to all the faithful.

**Paidion:** And it's part of this royal dignity not to touch money?

**Aneer:** There is a very real sense in which Christians may not touch money. Not literally, perhaps; many Christians touch coins or other items, and so on and so forth. But there is a real sense in which Christians never have what you search for in abundance, because they have something better.

**Paidion:** Are you saying half a loaf is better than an abundance of loaves?

**Aneer:** I know a number of people who have found that an abundance of loaves is not the solution to all of life's problems. Easy access to an abundance of loaves can lead to weight issues, or worse.

May I suggest what it is that you fear losing? It isn't exactly abundance, even if you think it is.

**Paidion:** So am I mistaken when I think I want shrimp and lobster as often as I wish?

**Aneer:** Maybe you are right that you want shrimp and lobster, but you don't only want shrimp and lobster. You want to be able to choose.

Remember in Star Wars, how Luke and Ben Kenobi are travelling in the Millennium Falcon, and Kenobi puts a helmet on Luke's head that has a large shield completely blocking his eyesight? And Luke protests and says, "With the blast shield down, I can't even see.

How am I supposed to fight?" And then something happens, and Luke starts to learn that he can fight even without seeing what was in front of him, and Kenobi says, "You have taken your first step into a larger world."?

What you want is to have your ducks in a row and be able to see that you can have shrimp and lobster as often as you want.

What the [Sermon on the Mount](#) says is better than a way to do a better job of having your next meal right where you can see it. It says to put the blast shield down...

And take your first step into a larger world.

**Paidion:** I'm sure for a man of faith like you—

**Aneer:** Why call me a man of faith? I may not have all my ducks lined up in a row, but I have always known where my next meal is coming from.

**Paidion:** Well sure, but that's—

**Aneer:** Maybe everybody you know has that privilege, but a great many people in the world do not.

**Paidion:** That may be, but I still want abundance.

**Aneer:** May I suggest that you are reaching for abundance on a higher plane?

**Paidion:** Like what? What is this larger world?

**Aneer:** When you have the blast shield down over your eyes, what you receive is part of a life of communion with God. When you don't see where your next meal is coming from, and God still feeds you, you get a gift covered with God's fingerprints. You're living part of a dance and you are beckoned to reach for much deeper treasures. If you are asked to let go of treasures on

earth, it is so your hands can open all the wider to grasp treasures in Heaven.

**Paidion:** Maybe for super-spiritual people like you, but when I've tried anything like that, I've only met disappointments.

**Aneer:** I've had a lot of disappointments. Like marriage, for instance.

**Paidion:** You? You've always seemed—

**Aneer:** My wife and I are very happily married. We've been married for years, and as the years turn into decades we are more happily married—more in love. But our marriage has been a disappointment on any number of counts.

G.K. Chesterton said, "The marriage succeeds because the honeymoon fails." Part of our marriage is that it's not just a honeymoon; my wife is not some bit of putty I can inflate to the contours of my fantasies about the perfect wife; she is a real person with real desires and real needs and real virtues and real flaws and a real story. She is infinitely more than some figment of my imagination. She has disappointed me time and time again—thank God!—and God has given me something much better in her than if she was some piece of putty that somehow fit my imagination perfectly. By giving me a real woman—what a woman!—God is challenging me to dig deeper into being a real man.

**Paidion:** So all disappointments make for a happy marriage? Because...

**Aneer:** I'm not completely sure how to answer that. We miss something about life if we think we can only have a

happy marriage when we don't get any disappointments. Read the Gospel and it seems that Christ himself dealt with disappointments; his life on earth built to the disappointment of the Cross which he could not escape no matter how hard he prayed. But the Apostle Paul wrote about this disappointment:

Let this mind be in you, which was also in Christ Jesus: Who, being in the form of God, thought it not robbery to be equal with God: But made himself of no reputation, and took upon him the form of a servant, and was made in the likeness of men: And being found in fashion as a man, he humbled himself, and became obedient unto death, even the death of the cross. Wherefore God also hath highly exalted him, and given him a name which is above every name: That at the name of Jesus every knee should bow, of things in heaven, and things in earth, and things under the earth; And that every tongue should confess that Jesus Christ is Lord, to the glory of God the Father.

It is part of his glory.

If you have a disappointment, you have one problem. If you have a disappointment and you think that with such a disappointment you can't really be where you should be, you have two problems. Disappointments sting like ninety, but they can be drawn into something deeper and a richer life.

**Paidion:** So you'd rather be disappointed in life than get your way.

**Aneer:** Yes.

When I haven't gotten my way, that has been a stepping stone for a refinement on more than one level, a refinement in what I sought and what I wanted. I've gotten better things than if I always had a magic key that gave me what I thought I wanted. St. Paul said, "When I became a man, I put childish things behind me."

**Paidion:** Am I being childish if I wish the Law of Attraction could get me what I want? If I dream?

**Aneer:** What the Law of Attraction is a way to satisfy the kind of things childish people set their hearts on. Always getting your way is not an unattainable dream. Always getting your way is not a dream at all. Always getting your way is a nightmare. It is the nightmare of succeeding at being a spoiled brat where others have grown up in all the disappointments you hope to dodge.

**Paidion:** Is virtue its own reward?

Or is it just the consolation prize when you do the right thing even if you don't get a real reward?

**Aneer:** Let us return to Plato again.

Elsewhere in the [Republic](#), some people say some questionable things about goodness. Someone says, for instance, that what is good is whatever the stronger group wants, or something like that. And so someone asks if there's anything a good man has that the evil man does not.

Actually, the question is put much more strongly than that. We are asked to suppose that an evil man has every worldly benefit—a good name, wealth, good children, everything in life going his way. And let us

suppose that the good man gets quite the opposite: he is slandered and betrayed, loses everything, is tortured, and is finally crucified. Can we still say that the good man has anything the evil one does not?

**Paidion:** If that is the case, it's hard to see that the good man has anything valuable that the evil man does not.

**Aneer:** He has goodness.

**Paidion:** Well, yes, but besides—

**Aneer:** Paidion, how would you like to have all of the wealth in the world and the health with which to spend it?

**Paidion:** No thanks!

**Aneer:** Meaning that on those terms, no man in his right mind would choose any amount of wealth!

**Paidion:** Sure, if you have to spend all the money on doctor bills...

**Aneer:** All right.

Let's suppose you don't have to spend any of it on doctor bills. Suppose you're a billionaire with all kinds of free medical care, and with your billions of dollars comes the worst of health and the most atrocious suffering for the rest of your mercifully short life.

Billions of dollars must be worth that, right?

**Paidion:** Does this relate to Plato?

**Aneer:** Yes—

**Paidion:** Are you saying that the evil man had bad health? You didn't mention that at first.

**Aneer:** Well, that depends on what you mean by health.

Externally, he had the best of health, I suppose, and the good man had terrible diseases. But the condition of being evil is the spiritual condition of being diseased, twisted, and shrunken. Even our English words like

"twisted" and "sick" are signs of ancient recognition of evil as a spiritual disease. The evil man with worldly glory is the man who has all of the wealth in the world and the health with which to spend it—and the good man is the man who has nothing but his health. He has the one thing the evil man does not: his health!

**Paidion:** Is this about Heaven and Hell? Because however impressive they may be, we aren't there yet.

**Aneer:** Wrong. Heaven and Hell begin in this life. The eternal tree that forever stands in Heaven or Hell is planted and nourished in this life. The connection between this life and the next is a closer connection than you can imagine.

**Paidion:** All this sounds very wonderful, and I could wish it were true. For people like you who have faith, at least. I don't...

**Aneer:** Paidion, there was something that happened in [The Magician's Nephew](#), before Queen Jadis attracted to her the deathless strength that she desired. Something happened before then. Do you remember what?

**Paidion:** I'm not sure what.

**Aneer:** It's quite memorable, and it has quite a lot to do with the Law of Attraction.

**Paidion:** I am afraid to ask.

**Aneer:** Let me quote the Queen, then.

...That was the secret of secrets. It had long been known to the great kings of our race that there was a word which, if spoken with the proper ceremonies, would destroy all living things except the one who spoke it. But the ancient kings were

weak and soft-hearted and bound themselves and all who should come after them with great oaths never even to seek after the knowledge of that word. But I learned it in a secret place and paid a terrible price to learn it. I did not use it until she forced me to it. I fought to overcome her by every other means. I poured out the blood of my armies like water...

The last great battle raged for three days here in Charn itself. For three days I looked down upon it from this very spot. I did not use my power till the last of my soldiers had fallen, and the accursed woman, my sister, at the head of her rebels was halfway up those great stairs that led up from the city to the terrace. Then I waited till we were so close that we could not see one another's faces. She flashed her horrible, wicked eyes upon me and said, "Victory." "Yes," said I, "Victory, but not yours." Then I spoke the Deplorable Word. A moment later I was the only living thing beneath the sun.

**Paidion:** Are you saying that the Law of Attraction is like the Deplorable Word?

**Aneer:** The Law of Attraction is described in glowing terms but what is described so glowingly is that there's you, your thoughts, and a giant mirror called the universe... and that's it. Everything else is killed. Not literally, perhaps, but in a still very real sense. The reason you have not succeeded at getting what you want couldn't be because a powerful man, with his own thoughts and

motives, is refusing something you want, much less that God loves you and knows that what you want isn't really in your best interests. The powerful man is just part of the great mirror, as is God, if there is anything to God besides you. The only possible reason for you to not have something, the only thing that is not killed, is your thoughts.

And how I wish you could enter a vast, vast world which is not a mirror focused on you, where even the people who meet and know you have many other concerns besides thinking about you, who have their own thoughts and wishes and which is ruled by an infinitely transcendent God who is infinitely more than you even if you were made for the entire purpose of becoming divine, and perhaps even more divine than if you are the only thing you do not lump into the great mirror reflecting your thoughts.

**Paidion:** But how shall I then live? It seemed, for a moment, like things got better when I paid attention to my thoughts, and things in my life—

**Aneer:** If you think it seems like your thoughts matter, perhaps that's because your thoughts really are important, possibly more important than you can even dream of. Perhaps there are other things going on in the world, but it is your thoughts that stand at the root of everything you contribute to the tree that will stand eternally in Heaven or as Hell. I don't know how to tell you how important it is to attend to your thoughts, nor how to tell you that what you think of as morality is something which all the wise go upstream and deal with at the source, in the unseen warfare of vigilant

attention to one's thoughts. Little thoughts build to big thoughts and big thoughts build to actions, and spiritual discipline or "asceticism" moves from the hard battle of actions to the harder battle of thoughts. And thoughts aren't just about concepts; when I've had trouble getting a thought of doing something I shouldn't out of my head, sometimes I've reminded myself that what is not truly desired doesn't really last long. [The Philokalia](#) there, my point is that it is a lifetime's endeavor to learn how to pay proper attention to one's thoughts.

**Paidion:** Um... uh... did you say I was made to be divine? Did you mean it?

**Aneer:** Paidion, if being divine just means that there isn't anything that much bigger than us, then that's a rather pathetic idea of the divine, and I wouldn't give twopence for it. But if we really and truly understand how utterly God dwarfs us, if we understand what it means that God is the Creator and we are his creatures, and the infinite chasm between Creator and creature is then transcended so that we his creatures can become by grace what God is by nature—then that is really something and I would give my life for that way of being divine!

There is a hymn, of ancient age, that says, "Adam, wanting to be divine, failed to be divine. Christ became man that he might make Adam divine." Christ's life is an example of what it means to be divine: as a child he was a refugee, then grew up as a blue-collar worker, then lived as a homeless man, and died a slave's death so vile its name was a curse word. This is a tremendous clue-by-four about what true glory is. This is a divine clue-

by-four about what Adam missed when he decided that reigning as immortal king and lord of paradise and following only one simple rule wasn't good enough for him.

And it is in this messy life we live, with so many situations beyond our control and so many things we would not choose, that God can transform us so that we become by grace what he is by nature.

**Paidion:** Aneer, can I ever enter the vast world you live in? It seems I have, well...

**Aneer:** Well?

**Paidion:** Chosen to live in an awfully small world, thinking I was doing something big.

**Aneer:** All of us have. It's called sin. Not a popular word today, but realizing you are in sin is Heaven's best-kept secret. Before you repent, you are afraid to let go of something that seems, like the Ring to Gollum, "my precious." Afterwards you find that what you dropped was torment and Hell, and you are awakening to a larger world.

**Paidion:** But when can I do something this deep? My schedule this week is pretty full, and little of it meshes well with—

**Aneer:** The only time you can ever repent is now.

# Learning a Language Like Russian

[C.J.S. Hayward](#) [Library](#) [Articles](#) [Learning a  
Language Like Russian](#)

This post is most immediately about learning Russian for native English speakers, but most of the principles apply to learning other languages as well.

## A bizarre conversation with a psychologist

Here's an excerpt from a bizarre conversation with a psychologist who kept frequently insisting I had "**very few interests**"= well past the point that he gave the oddest body language in acknowledging I had master's degrees bridging math and computers (UIUC) and theology and philosophy (Cambridge, England), and (it also came up) I had briefly studied French at the Sorbonne—and in all of this, he still alleged in undiminished force to have "**very few interests**=":

**Me (trying another approach):** I'm a philologist.

**Him (looking to neutralize or dismiss it):** What on earth do you mean by that?

**Me:** Languages are like Scotch: one is a good start; two is just about perfect; three is not nearly half enough.

**Him:Me:** I've dipped a finger in a lot of languages, but I've read the Bible in five or six languages.

**Him (counting on fingers while guessing):** English, French, German, Latin, Greek, Hebrew.

**Me:** A dozen translations in English, two translations each in French and Spanish, Latin, Greek, modern Russian three times in the Synodal version, and I'm

working my way through the Slavonic...

**Him:** Russian is a tonal language, and it's the second hardest language for native English speakers to learn after Chinese.

I don't remember what I said next. Those were some of the most bizarre remarks about Russian I'd heard in my life.

At least one webpage I've seen about easy, medium, and hard languages for native English speakers placed Russian squarely in the middle of things to learn; the major qualification for difficulty is simply a vocabulary that doesn't overlap modern English that much; I would guesstimate that the number of Russian words a native English speaker would easily recognize amounts to less than 10% of the words one would encounter.

Beyond that, the grammar is not particularly slippery, or otherwise odd; the alphabet has strong and recognizable similarities to our own (compare CJK ideograms or even trying to see where one letter ends and another begins in Arabic for the un-initiated). It's actually a lot nicer an alphabet to outsiders than the English use of our alphabet is. Learning Russian is moderately difficult, but it's doable, and this page is here because I want to share what gleanings I've learned in my studies, and make things easier.

## A preliminary note: the Russian alphabet

The first point I'm mentioning is the alphabet. In a word, it's not a hard alphabet to learn; it's just unfamiliar and takes practice. I learned it on an iPhone app named "Learn to read Russian in three hours.= Good old fashioned flashcards should work just as well, or for that matter having the alphabet below handy for cross-reference in reading. (Or a memory technique discussed below.) Also, don't feel the need to make every sound.

The Russian R sound is trilled; I've tried at length to learn a trilled R and don't know how to make it. The H sound is a grated H, the kind that makes you sound like you are clearing your throat because you have a bad chest cold. I can sometimes make it, but I've heard native Russian speakers pronounce it as an English K, or an English H, so apparently both work. There is also a sound that sounds like an "sh=" followed immediately by a "ch="; I'm working on this and sometimes succeeding at making it one sound without a break between the "sh=" and "ch=" sounds. Don't sweat it overall; in most languages people will have some tolerance for imprecise sounds: if your worst liability is an inauthentic R or H sound, you're doing well!

[Open just this image to print it](#)

The letters you should pay attention to are those on the far left.

## **A first language-learning workhorse: A parallel Bible**

I will try to cover a few primary techniques, but the main workhorse I've found, after a lot of other things, is reading a parallel Russian-English Bible. I found, to my irritation, that all the Russian-English Bibles I could track down on Amazon were made by the Russian Bible Society, which is a Protestant organization that omits certain books of the Old Testament that are present both in the Russian and English translations. (The Reformers at least included those books in an appendix!) The modern Russian translation you will be wanting is the Synodal Version (RUSV), which was translated into Russian by Orthodox Christians rather than Protestants. I wanted [a nice leatherbound edition](#); there is also [a nice but cheaper option](#) (the only one really cheaper one I could find was [a paperback edition](#)).

Additionally, there is [at least one available parallel Slavonic-English prayer book I'm aware of](#). It could perhaps be better, but it's not too many words to learn, and the words are often the same as at Liturgy. There is also [a transliterated version of the Liturgy](#) that displays the English version as you hover over the transliterated Russian.

No matter how much you may want to learn Russian, please start forays into the Synodal Version **slowly**, and ramp up **slowly**.

As Orthodox mystagogy would have it, you don't begin exercise by running a marathon. What I would recommend instead is reading the Gospel of John the Theologian, and start with the prologue.

The basic initial technique is to look at the Russian side for a single verse like John 1:1, and then see if you can make connections to the English side. And if you don't on the first try, that's fine. But try again an hour later. If you're comfortable with a verse, move on to the next one. Before long you may be able to read a different verse each hour, and continue with hourly study. If you are comfortable trying to read one verse at a time, try reading two verses, and maybe not all the time. When you are genuinely comfortable reading two verses, move on to three. It is possible this way to get up to maybe a chapter:

"Little and often fills the purse.="

But by all means, no marathons, nor stretching yourself as hard as you can for a short while. One detail about lawn care is that the kind of sprinklers that are great for children to play in should only be used for that purpose as they are terrible at watering lawns. What happens to a lawn used by the sprinklers is that the stream of water is shot high up into the air, and with the same force slams down into the ground. If you slam water onto parched ground, it isn't absorbed; it can't be. What each droplet of a fist does, instead of being absorbed, is hammer the ground into a beaten shield that repels further droplets. And you end up with a deceptive situation where there is water streaming in rivulets over the surface of the wet-looking soil, but an inch down the soil remains as parched as before it was watered. This is something you don't want to do in educational situations, including learning a language. Little and often fills the purse.

One specific note to people who are in fact looking to learn

classical Hebrew and/or Koine Greek: you can fairly easily find [a good intralinear Bible](#), and to some people this looks like practically all language learning solved at once. However, I would pass on a caution: unless you have already learned multiple languages and already have that discipline, it's not perfect and you can easily create a habit of your eyes jumping to the intralinear English words and not really spending that much time, or making much progress, with Hebrew or Greek itself. However, one bit of discipline that I am using now is as follows. Use a specially cut rubber jar opener to only let you see the partial or complete line in the ancient language, and don't unveil to yourself the English term until you have stopped to ponder the ancient language's term and tried to figure it out without (intralinear) help.

## Making a jar opener into a study tool ([skip](#))

In earlier versions of this page, I recommended using index cards to hide and show things in a way that would be optimal.

After working with them, I found that unless you have the luxury of a page that is completely level, they slide around the page whether you want it or not. That problem was solved by making a cover out of a carefully cut rubber jar opener, which I obtained at a local grocery store.

[Good Cook rubber jar openers](#) include a circular jar opener, and a larger squarish jar opener. Either of them could be cut to be useful; I used the more square model but if I made too bad a mistake cutting it I could have used the other one. The unopened package looks like so:

[image omitted]

I made a first cut; mine was too deep and I cut a slight distance off the top. The point of the cut at the top is to be placed on top of a page, at the line of text you are working on, and to reveal a line of text, up to a point, and conceal what hasn't been revealed further.

[image omitted]

The full vertical height is too much; go to the bottom of the page on at least some intralinear Bibles and the rubber will fall over the bottom of the page. It was cut to height that was much

less but still appropriate:

[image omitted]

Note that at the top the top borders are closer.

Here are three examples of reading a line of the text. In all cases, the point is to place the whole Hebrew line in view, while hiding the intralinear English translation until the Hebrew has been given primary attention:

[image omitteds]

These specific images are adapted to Hebrew, as a language that reads right to left. If you want to work with an interlinear Greek New Testament you can use the same covering in almost the same way; you'll just pull the cover left to right, after first flipping the cover horizontally so it conceals what is to the right instead of what is to the left.

## Mega Memory

I am here mentioning something that has served me powerfully in the past, and works with multiple languages, but may not be as much needed in our setting.

[The Elements of New Testament Greek](#), the Greek textbook I was taught from, told you what you needed to learn in vocabulary, etc. [Greek to Me](#) does one better by providing a practical means to learn the vocabulary above rote memorization; it applies the classical memory technique in the first half of [Kevin Trudeau's Mega Memory](#) (I have a much shorter page and training tool online in [Memory and Prayer](#)), and it has been a tremendous accelerator in offering a five-times-faster alternative to looking things up in an old-fashioned print XYZ-English dictionary.

The reason I consider this to be optional now is that there is a faster alternative to avoid repeatedly looking up a term in a thick paper dictionary. You can go to [translate.google.com](http://translate.google.com), set it to translate from Russian to English, and spell things phonetically, or set your computer to let you type in Russian, and maybe buy keyboard stickers (or just post-it notes) putting Russian letters on top of your keys. There are two major Russian keyboard layouts both of which should be supported; there is one that is the standard layout ([stickers are available](#)), and one that is roughly phonetic for English speakers (I couldn't find any

stickers). If you are going to Russia, you will want the Russian standard keyboard layout; if you are not intending to go to Russia, you will probably find the phonetic layout to feel easier and more natural.

That stated, the memory technique has its uses, especially in getting a new alphabet down. It acts as scaffolding; you first remember XYZ through a vivid mental image from what is called "pegging", and then with repeated use the provisional mental image fades out of significance and you more quickly remember the word itself.

I will briefly comment that some people develop a strong initial impression that the memory technique is too much work for what it tries to do. I personally have found it not to live up to its hype, but I don't know anyone who has become proficient and still retains the initial bad impression. I would place it as one tool among others, and less decisive given today's technology offerings than it has been for me in the past.

## **A quieter memory technique**

The business world has come to recognize that multitasking is not a good thing, and divided attention is needlessly diluted attention. (The Orthodox Church has known this for much longer.)

There is a less striking memory technique of, when you discover or rediscover something or come across something worth keeping, stopping and pausing for a moment to simply give it your full attention. No mental images needed: just the studious slow, focused, and present attention Orthodoxy gives to anything worth keeping. This memory tool is something that combines well with many other techniques and resources.

## **Language classes**

Language classes aren't available to all of us; but they can provide another tool. I wanted to take a course in conversational Russian, but it didn't work out.

## DuoLingo

There are multiple computer training systems; Rosetta Stone is far from the only option. I don't have informed opinion about all of them, but [DuoLinguo](#) comes highly recommended, and I respect it myself.

## Subtitles

I have had difficulty locating edifying Russian-language film or video with English subtitles. However, if you do find something, it can be worth its weight in gold to try to make connections between the Russian you hear and the English you read. However, please note that there is not a complete correspondence between speech in the video and subtitles in another language. (You can have a few people talking but only the essential part is relayed in subtitle.)

Two gems I am aware of are [Ostrov](#) and [The Tale of Peter and Fevronia](#).

## **Conversations with native speakers (if available)**

Having a conversation, on a very basic level, can be helpful.

One note from Wheaton's Institute for Cross-Cultural Training: in dealing with a native speaker, you may be working and working and working on improving your language, and it remains just as hard to talk to that person.

There is a reason for this, and it is really OK. Some people who are sensitive to others' imperfect language abilities simplify what they say to match the proficiency of the person they are speaking with. This may mean that when you start they speak very simply, but they simplify less and less when they see you become more proficient. You are making progress talking with that person; it just doesn't feel like it.

## **Reading books in Russian**

This is not a first step in working on a foreign language, but when you are able it is tremendously valuable to read books in that language. What may come to mind first are the proverbial nineteenth-century Russian novels, but beside them there is a vast collection of spiritual literature available in Russian. When you are ready to read books in Russian, reading books really pays off.

## **Listening to liturgical music**

This also can be invaluable.

## **Experimenting**

Different techniques work best for different people; what works best for one person may not be best for another.

This point is worth experimenting on, and it is worth being in some sense watchful by paying attention for what works and what doesn't.

Enjoy!

# Lesser Icons: Reflections on Faith, Icons, and Art

C.S. Lewis's [The Voyage of the Dawn Treader](#) opens with a chapter called "The Picture in the Bedroom," which begins, "There was a boy called Eustace Clarence Scrubb, and he almost deserved it." Not long into the chapter, we read:

They were in Lucy's room, sitting on the edge of her bed and looking at a picture on the opposite wall. It was the only picture in the house that they liked. Aunt Alberta didn't like it at all (that was why it was put away in a little back room upstairs), but she couldn't get rid of it because it had been a wedding present from someone she did not want to offend.

It was a picture of a ship—a ship sailing straight towards you. Her prow was gilded and shaped like the head of a dragon with a wide-open mouth. She had only one mast and one large, square sail which was a rich purple. The sides of the ship—what you could see of them where the gilded wings of the dragon ended—were green. She had just run up to the top of one glorious blue wave, and the nearer slope of that

wave came down towards you, with streaks and bubbles on it.

She was obviously running fast before a gay wind, listing over a little on her port side. (By the way, if you are going to read this story at all, and if you don't know already, you had better get it into your head that the left of a ship when you are looking ahead is port, and the right is starboard.) All of the sunlight fell on her from that side, and the water on that side was full of greens and purples. On the other, it was darker blue from the shadow of the ship.

"The question is," said Edmund, "whether it doesn't make things worse, looking at a Narnian ship when you can't get there."

"Even looking is better than nothing," said Lucy. "And she is such a very Narnian ship."

"Still playing your old game?" said Eustace Clarence, who had been listening outside the door and now came grinning into the room. Last year, when he had been staying with the Pevensies, he had managed to hear them all talking of Narnia and he loved teasing them about it. He thought of course that they were making it all up; and as he was far too stupid to make anything up himself, he did not approve of that.

"You're not wanted here," said Edmund curtly.

"I'm trying to think of a limerick," said Eustace.

"Something like this:

Some kids who played games about Narnia  
Got gradually balmier and balmier—"

"Well, Narnia and balmier don't rhyme, to begin with," said Lucy.

"It's an assonance," said Eustace.

"Don't ask him what an assy-thingummy is," said Edmund. "He's only longing to be asked. Say nothing and perhaps he'll

go away."

Most boys, on meeting a reception like this, would have either cleared out or flared up. Eustace did neither. He just hung about grinning, and presently began talking again.

"Do you like that picture?" he asked.

"For Heaven's sake don't let him get started about Art and all that," said Edmund hurriedly, but Lucy, who was very truthful, had already said, "Yes, I do. I like it very much."

"It's a rotten picture," said Eustace.

"You won't see it if you step outside," said Edmund.

"Why do you like it?" said Eustace to Lucy.

"Well, for one thing," said Lucy, "I like it because the ship looks as if it were really moving. And the water looks as if it were really wet. And the waves look as if they were really going up and down."

Of course Eustace knew lots of answers to this, but he didn't say anything. The reason was that at that very moment he looked at the waves and saw that they did look very much indeed as if they were going up and down. He had only once been in a ship (and then only so far as the Isle of Wight) and had been horribly seasick. The look of the waves in the picture made him feel sick again. He turned rather green and tried another look. And then all three children were staring with open mouths.

What they were seeing may be hard to believe when you read it in print, but it was almost as hard to believe when you saw it happening. The things in the picture were moving. It didn't look at all like a cinema either; the colours were too real and clean and out-of-doors for that. Down went the prow of the ship into the wave and up went a great shock of spray. And then up went the wave behind her, and her stern

and her deck became visible for the first time, and then disappeared as the next wave came to meet her and her bows went up again. At the same moment an exercise book which had been lying beside Edmund on the bed flapped, rose and sailed through the air to the wall behind him, and Lucy felt all her hair whipping round her face as it does on a windy day. And this was a windy day; but the wind was blowing out of the picture towards them. And suddenly with the wind came the noises—the swishing of waves and the slap of water against the ship's sides and the creaking and the overall high steady roar of air and water. But it was the smell, the wild, briny smell, which really convinced Lucy that she was not dreaming.

"Stop it," came Eustace's voice, squeaky with fright and bad temper. "It's some silly trick you two are playing. Stop it. I'll tell Alberta—Ow!"

The other two were much more accustomed to adventures but, just exactly as Eustace Clarence said, "Ow," they both said, "Ow" too. The reason was that a great cold, salt splash had broken right out of the frame and they were breathless from the smack of it, besides being wet through.

"I'll smash the rotten thing," cried Eustace; and then several things happened at the same time. Eustace rushed towards the picture. Edmund, who knew something about magic, sprang after him, warning him to look out and not be a fool. Lucy grabbed at him from the other side and was dragged forward. And by this time either they had grown much smaller or the picture had grown bigger. Eustace jumped to try to pull it off the wall and found himself standing on the frame; in front of him was not glass but real sea, and wind and waves rushing up to the frame as they

might to a rock. There was a second of struggling and shouting, and just as they thought they had got their balance a great blue roller surged up round them, swept them off their feet, and drew them down into the sea. Eustace's despairing cry suddenly ended as the water got into his mouth.

I don't know that C.S. Lewis was thinking about icons or Orthodoxy when he wrote this, and I am reluctant to assume that C.S. Lewis was doing what would be convenient for the claims I want to make at icons. Perhaps there are other caveats that should also be made: but the caveats are not the whole truth.

I am not aware of a better image of what an icon is and what an icon does than this passage in Lewis. Michel Quenot's [The Icon: A Window on the Kingdom](#) is excellent and there are probably more out there, but I haven't come across as much of an evocative image as the opening to [The Voyage of the Dawn Treader](#).

I don't mean that the first time you see an icon, you will be swept off your feet. There was a long time where I found them to be clumsy art that was awkward to look at. I needed to warm to them, and appreciate something that works very differently from Western art. I know that other people have had these immediate piercing experiences with icons, but appreciating icons has been a process of coming alive for me. But much the same could be said of my learning French or Greek, where I had to struggle at first and then slowly began to appreciate what is there. This isn't something Orthodoxy has a complete monopoly on; some of the time Roman Catholic piety can have something much in the same vein. But even if it's hard to say that there's something in icons that is much more alive than there is something in

something in icons that is nowhere else, there is something in icons that I had to learn to appreciate.

A cradle Orthodox believer at my parish explained that when she looks at an icon of the Transfiguration, she is there. The Orthodox understanding of presence and memory is not Western and not just concerned with neurons firing in the brain; it means that icons are portals that bring the spiritual presence of the saint or archetypal event that they portray. An icon can be alive, some more than others, and some people can sense this spiritually.

Icons are called windows of Heaven. Fundamental to icon and to symbol is that when the Orthodox Church proclaims that we are the image of God, it doesn't mean that we are a sort of detached miniature copy of God. It doesn't mean that we are a detached anything. It is a claim that to be human is to be in relation to God. It is a claim that we manifest God's presence and that the breath we breathe is the breath of God. What this means for icons is that when the cradle Orthodox woman I just mentioned says that she is there at the Transfiguration, then that icon is like the picture of the Narnian ship. If we ask her, "Where are you?" then saying "Staring at painted wood" is like saying that someone is "talking to an electronic device" when that person is using a cell phone to talk with a friend. In fact the error is deeper.

An icon of a saint is not intended to inform the viewer what a saint looked like. Its purpose is to connect the viewer with Christ, or Mary the Theotokos, or one of the saints or a moment we commemorate, like the Annunciation when Gabriel told humble Mary that she would bear God, or the Transfiguration, when for a moment Heaven shone through and Christ shone as Christians will shine and as saints sometimes shine even in this life. I don't

know all of the details of how the art is put together—although it is art—but the perspective lines vanish not in the depths of the picture but behind the viewer because the viewer is part of the picture. The viewer is invited to cross himself, bow before, and kiss the icon in veneration: the rule is not "Look, but don't touch." any more than the rule in our father's house is "Look, but don't touch." The gold background is there because it is the metal of light; these windows of Heaven are not simply for people to look into them and see the saint radiant with Heaven's light, but Heaven looks in and sees us. When I approach icons I have less the sense that I am looking at these saints, and Heaven, than that they are looking at me. The icon's purpose is not, as C.S. Lewis's picture, to connect people with Narnia, but to draw people into Heaven, which in the Orthodox understanding must begin in this life. It is less theatrical, but in the end the icon offers something that the Narnian picture does not.

It is with this theological mindset that Bishop KALLISTOS Ware is fond, in his lectures, of holding up a photograph of something obviously secular—such as a traffic intersection—and saying, "In Greece, this is an icon. It's not a holy icon, but it's an icon."

That, I believe, provides as good a departure as any for an Orthodox view of art. I would never say that icons are inferior art, and I would be extremely hesitant to say that art is equal to icons. But they're connected. Perhaps artwork is lesser icons.

Perhaps it is indistinct icons. But art is connected to iconography, and even if that link is severed so that art becomes non-iconic, it dies.

Another illustration may shed light on the relation between iconography and other art. The Eucharist is the body and blood of Christ to Orthodox. It is not simply a sacrament, but the

sacrament of sacraments, and the sacrament which all other sacraments are related. And there are ways the Orthodox Church requires that this Holy Communion be respected: it is to be prepared for with prayer and fasting, and under normal circumstances it is only received by people who are of one mind as the early Church. It encompasses, inseparably, mystic communion with God and communion with the full brothers and sisters of the Orthodox Church.

How does an ordinary meal around a table with family compare? In one sense, it doesn't. But to say that and stop is to miss something fundamental. Eating a meal around a table with friends and family is communion. It is not Holy Communion, but it is communion.

A shared meal is a rite that is part of the human heritage. It persists across times, cultures, and religions. This is recognized more clearly in some cultures than others, but i.e. Orthodox Jewish culture says that to break bread is only something you do when you are willing to become real friends. The term "breaking of bread" in the New Testament carries a double meaning; it can mean either the Eucharist or a common meal. A common meal may not have Orthodox making the same astounding claims we make about the Eucharist, but it is a real communion. This may be why a theologian made repeatedly singled out the common meal in the Saint Vladimir's Seminary Education Day publication to answer questions of what we should do today when technology is changing our lives, sometimes for the better but quite often not.

I myself have not made that effort much, and I can say that there is a difference between merely eating and filling my animal needs, and engaging in the precious ritual, the real communion, of a common meal around a table.

If we compare a common meal with the Eucharist, it seems

very small. But if we look at a common meal and the community and communion around that meal (common, community, and communion all being words that are related to each other and stem from the same root), next to merely eating to serve our animal needs, then all of the sudden we see things that can be missed if we only look at what separates the Eucharist from lesser communions. A common meal is communion. It is not Holy Communion, but it is communion.

In the same sense, art is not the equal of sacred iconography. My best art, even my best religious art, does not merit the treatment of holy icons. But neither is art, or at least good art, a separate sort of thing from iconography, and if that divorce is ever effected (it has been, but I'll wait on that for how), then it generates from being art as a meal that merely fills animal, bodily needs without being communion degenerates from what a common meal should be. And in that sense I would assert that art is lesser iconography. And the word "lesser" should be given less weight than "iconography." I may not create holy icons, but I work to create icons in all of my art, from writing to painting to other creations.

In my American culture—this may be different in other areas of the world, even if American culture has a strong influence—there are two great obstacles to connecting with art. These obstacles to understanding need to be denounced. These two obstacles can be concisely described as:

- The typical secular approach to art.
- The typical Christian approach to art.

If I'm going to denounce those two, it's not clear how much wiggle room I am left over to affirm—and my goal is not merely to affirm but embrace an understanding of art. Let me begin to

to affirm but embrace an understanding of art. Let me begin to explain myself.

Let's start with a red flag that provides just a glimpse of the mainstream Christian view of art. In college, when I thought it was cool to be a cynic and use my mind to uncover a host of hidden evils, I defined "Christian Contemporary Music" in [Hayward's Unabridged Dictionary](#) to be "A genre of song designed primarily to impart sound teaching, such as the doctrine that we are sanctified by faith and not by good taste in music."

May God be praised, that was not the whole truth in Christian art then, and it is even further from being the whole truth today—I heartily applaud the "Wow!" music videos, and there is a rich stream of exceptions. But this doesn't change the fact that the #1 selling Christian series today is the Left Behind series, which with apologies to Dorothy Parker, does not have a single book that is to be set aside lightly. (They are all to be hurled with great force!)

If I want to explain what I would object to instead of simply making incendiary remarks about Christian arts, let me give a concrete example. I would like to discuss something that I discussed with a filmmaker at a Mennonite convention a couple of years I converted to Orthodoxy. I did not set out to criticize, and I kept my mouth shut about certain things.

What I did do was to outline a film idea for a film that would start out indistinguishably from an action-adventure movie. It would have one of the hero's friends held captive by some cardboard-cutout villains. There is a big operation to sneak in and deftly rescue him, and when that fails, all Hell breaks loose and there is a terrific action-adventure style firefight. There is a dramatic buildup to the hero getting in the helicopter, and as they are leaving, one of the villain's henchmen comes running with a shotgun. Before he can aim, the hero blasts away his knee

with a shotgun. Before he can aim, the hero blasts away his knee with a hollow-nosed .45.

The camera surprisingly does not follow the helicopter in its rush to glory, but instead focuses on the henchman for five or ten excruciating minutes as he curses and writhes in agony. Then the film slows down to explore what that one single gunshot means to the henchman for the remaining forty years of his life, as he nursed a spiritual wound of lust for vengeance that was infinitely more tragic than his devastating physical wound.

The filmmaker liked the idea, or at least that's what he thought. He saw a different and better ending than what I envisioned. It would be the tale of the henchman's journey of forgiveness, building to a dramatic scene where he is capable of killing the hero and beautifully lets go of revenge. And as much as I believe in forgiveness and letting go of revenge, this "happy ending" (roughly speaking) bespoke an incommensurable gulf between us.

The difference amounts to a difference of love. Not that art has to cram in as much love, or message about love or forgiveness, as it can. If that happens, it is fundamentally a failure on the part of the artist, and more specifically it is a failure of a creator to have proper love for his creation. My story would not show much love in action, and it is specifically meant to leave audiences not only disturbed but shell shocked and (perhaps) sickened at how violence is typically shown by Hollywood. The heartblood of cinematic craft in this film would be an effort to take a character who in a normal action-adventure movie is faceless, and which the movie takes pains to prevent us from seeing or loving as human when he is torn up by the hero's cool weapon, and give him a human face so that the audience feels the pain not only of his wounded body but the grievous spiritual wound that creates its deepest tragedy. That

grievous spiritual wound that creates the deepest tragedy. That is to say that the heartblood of cinematic craft would be to look lovingly at a man, unloving as he may be, and give him a face instead of letting him be a faceless henchman whose only purpose is to provide conflict so we can enjoy him being slaughtered. And more to the point, it would not violate his freedom or his character by giving him a healing he would despise, and announce that after his knee has been blasted away he comes to the point of forgiving the man who killed his friends and crippled him for life.

Which is to say that I saw the film as art, and he saw it as a container he could cram more message into. That is why I was disturbed when he wanted to tack a happy ending on. There is a much bigger problem here than ending a story the wrong way.

I don't mean to say that art shouldn't say anything, or that it is a sin to have a moral. This film idea is not only a story that has a moral somewhere; its entire force is driven by the desire to give a face, a human face, to faceless villains whose suffering and destruction is something we rejoice in other words. In other words, it has a big moral, it doesn't mince words, and it makes absolutely no apologies for being driven by its moral.

Then what's the difference? It amounts to love. In the version of the story I created, the people, including the henchmen, are people. What the filmmaker saw was a question of whether there's a better way to use tools to drive home message. And he made the henchman be loving enough to forgive by failing to love him enough.

When I was talking with one professor at Wheaton about how I was extremely disappointed with a Franklin Peretti novel despite seeing how well the plot fit together, I said that I couldn't put my finger on what it was. He rather bluntly

interrupted me and simply said that Peretti didn't love his characters. And he is right. In *This Present Darkness*, Franklin Peretti makes a carefully calculated use of tools at his disposal (such as characters) to provide maximum effect in driving home his point. He does that better than art does. But he does not love his characters into being; he does not breathe into them and let them move. It's not a failure of technique; it's a failure of something much deeper. In this sense, the difference between good and bad art, between [A Wind in the Door](#) and *Left Behind*, is that in [A Wind in the Door](#) there are characters who not only have been loved into being but have a spark of life that has been not only created into them but loved into them, and in *Left Behind* there are tools which are used to drive home "message" but are not in the same sense loved.

There is an obvious objection which I would like to pause to consider: "Well, I understand that elevated, smart people like you can appreciate high art, and that's probably better. But can't we be practical and look at popular art that will reach ordinary people?" My response to that is, "Are you sure? Are you really sure of what you're assuming?"

Perhaps I am putting my point too strongly, but let me ask the last time you saw someone who wasn't Christian and not religious listening to Amy Grant-style music, or watching the *Left Behind* movie? If it is relevant, is it reaching non-Christians? (And isn't that what "relevant" stuff is supposed to do?) The impression I've gotten, the strong impression, is that the only people who find that art relevant to their lives are Evangelicals who are trying to be relevant. But isn't the world being anti-Christian? My answer to that is that people who watch *The Chronicles of Narnia* and people who watch *Star Wars* movies are largely watching them for the same reason: they are good art. The

heavy Christian force behind *The Chronicles of Narnia*, which Disney to its credit did not edit out, has not driven away enough people to stop the film from being a major success. *The Chronicles of Narnia* is relevant, and it is relevant not because people calculated how to cram in the most message, but because not only C.S. Lewis but the people making the film loved their creation. Now, there are other factors; both *The Chronicles of Narnia* and *Star Wars* have commercial tie-in's. And there is more commercial muscle behind those two than the *Left Behind* movie. But to only observe these things is to miss the point. The stories I hear about the girl who played Lucy walking onto the set and being so excited she couldn't stop her hands from shaking, are not stories of an opportunistic actress who found a way to get the paycheck she wanted. They are stories of people who loved what they were working on. That is what makes art powerful, not budget.

There's something I'd like to say about love and work. There are some jobs—maybe all—that you really can't do unless you really love them. How? Speaking as a programmer, there's a lot of stress and aggravation in this job. Even if you have no difficulties with your boss, or co-workers, the computer has a sort of perverse parody of intelligence that means that you do your best to do something clearly, and the computer does the strangest things.

It might crash; it might eat your work; it might crash and eat your work; it might show something weird that plays a perverted game of hide and seek and always dodge your efforts to find out what exactly is going wrong so you can fix it. Novices' blood is boiling before they manage to figure out basic errors that won't even let you run your program at all. So programmers will be fond of definitions of "Programming, n. A hobby similar to banging

your head against a wall, but with fewer opportunities for reward."

Let me ask: What is programming like if you do not love it? There are many people who love programming. They don't get there unless they go through the stress and aggravation. There's enough stress and aggravation that you can't be a good programmer, and maybe you can't be a programmer at all, unless you love it.

I've made remarks about programming; there are similar remarks to be made about carpentry, or being a mother (even if being a mother is a bigger kind of thing than programming or carpentry). This is something that is true of art—with its stress and aggravation—precisely because art is work, and work can have stress and aggravation that become unbearable if there is no love. Or, in many cases, you can work, but your work suffers. Love may need to get dirty and do a lot of grimy work—you can't love something into being simply by feeling something, even if love can sometimes transfigure the grimy work—but there absolutely must be love behind the workgloves. It doesn't take psychic powers to tell if something was made with love.

I would agree with Franky Schaeffer's remark in [Addicted to Mediocrity: 20th Century Christians and the Arts](#), when he pauses to address the question "How can I as a Christian support the arts?" the first thing he says is to avoid Christian art. I would temper that remark now, as some Christian art has gotten a lot better. But he encouraged people to patronize good art, and to the question, "How can I afford to buy original paintings?" he suggests that a painting costs much less than a TV. But Schaeffer should be set aside another work which influenced his father, and which suggests that if Christian art is problematic, that doesn't mean that secular art is doing everything well.

When I was preparing for a job interview with an auction house that deals with coins and stamps, I looked through the 2003(?) Spink's Catalogue of British Coins. (Mainly I studied the pictures of coins to see what I could learn.) When I did that, a disturbing story unfolded.

The Spink's catalogue takes coins from Celtic and Roman times through medieval times right up through the present day.

While there are exceptions in other parts of the world, the ancient and early medieval coins all had simple figures that were not portraits, in much the way that a drawing in a comic strip like [Foxtrot](#) differs from Mark Trail or some other comic strip where the author is trying to emulate a photograph. Then, rather suddenly, something changes, and people start cramming in as much detail as they could. The detail reaches a peak in the so-called "gold penny", in which there is not a square millimeter of blank space, and then things settle down as people realize that it's not a sin to have blank space as well as a detailed portrait. (On both contemporary British and U.S. coinage, the face of the coin has a bas-relief portrait of a person, and then there is a blank space, and a partial ring of text around the edge, with a couple more details such as the year of coinage. The portrait may be detailed, but the coinmakers are perfectly willing to leave blank space in without cramming in more detail than fits their design. In the other world coinage I've seen, there can be some differences in the portrait (it may be of an animal), but there is a similar use of portrait, text, and blank space.

This is what happened when people's understanding of symbol disintegrated. The effort to cram in detail which became an effort to be photorealistic is precisely an effort to cram some reality into coins when they lost their reality as symbols. There are things about coins then that even numismatists (people who

study coins) do not often understand today. In the Bible, the backdrop to the question in Luke 20 that Jesus answered, "Show me a coin. Whose likeness is it, and whose inscription? ... Give what is Caesar's to Caesar, and what is God's to God," is on the surface a question about taxes but is not a modern gripe about "Must I pay my hard-earned money to the Infernal Revenue Service?", It is not the question some Anabaptists ask today about whether it is OK for Christians' taxes to support things they believe are unconscionable, and lead one pastor to suggest that people earn less money so they will pay less taxes that will end up supporting violence. It's not a question about anything most Christians would recognize in money today.

It so happens that in traditional fashion quarters in the U.S. today have a picture of George Washington, which is to say not only a picture but an authority figure. There is no real cultural reason today why this tradition has to be maintained. If the government mint started turning out coins with a geometric design, a blank surface, or some motto or trivia snippet, there would be no real backlash and people would buy and sell with the new quarters as well as the traditional ones. The fact that the quarter, like all commonly circulated coins before the dollar coin, has the image of not simply a-man-instead-of-a-woman but specifically the man who once held supreme political authority within the U.S., is a quaint tradition that has lost its meaning and is now little more than a habit. But it has been otherwise.

The Roman denarius was an idol in the eyes of many Jewish rabbis. It was stamped with the imprint of the Roman emperor, which is to say that it was stamped with the imprint of a pagan god and was therefore an idol. And good Jews shouldn't have had a denarius with them when they asked Jesus that trapped question. For them to have a denarius with them was worse on

some accounts than if Jesus asked them, "Show me a slab of bacon," and they had one with them. The Jewish question of conscience is "Must one pay tax with an idol?" and the question had nothing to do with any economic hardship involved in paying that tax (even though most Jews then were quite poor).

Jesus appealed to another principle. The coin had Caesar's image and inscription: this was the one thing he asked them to tell him besides producing the coin. In the ancient world people took as axiomatic that the authority who produced coinage had the authority to tax that coinage, and Jesus used that as a lever: "Then render to Caesar the things that are Caesar's, and to God's the thing that are God's."

This last bit of leverage was used to make a much deeper point. The implication is that if a coin has Caesar's image and we owe it to Caesar, what has God's image—you and I—are God's and are owed to God. This image means something deep. If it turns out that we owe a tax to Caesar, how much more do we owe our very selves to God?

Augustine uses the image of "God's coins" to describe us. He develops it further. In the ancient world, when coins were often made of precious and soft metals instead of the much harder coins today, coins could be "defaced" by much use: they would be rubbed down so far that the image on the coin would be worn away. Then defaced coins, which had lost their image, could be restruck. Augustine not only claims that we are owed to God; he claims that the image in us can be defaced by sin, and then restruck with a new image by grace. This isn't his whole theology for sin and grace, but it says something significant about what coins meant not just to him but to his audience.

During the Iconoclastic Controversy, not only in the East but before the overcrowded "gold penny", one monk, who believed in

showing reverence to icons, was brought before the emperor, who was trying to suppress reverence to icons. The emperor asked the monk, "Don't you know that you can walk on an icon of Christ without showing disrespect to him?" and the monk asked if he could walk on "your face", meaning "your face as present in this coin," without showing the emperor disrespect. He threw down a coin, and started to walk on it. The emperor's guards caught him in the act, and he was brutally assaulted.

These varying snapshots of coins before a certain period in the West are snapshots of coins that are icons. They aren't holy icons, but they are understood as icons before people's understanding of icons disintegrated.

When I explained this to one friend, he said that he had said almost exactly the same thing when observing the development or anti-development of Western art. The story I was told of Western art, at least until a couple of centuries ago, was a story of progress from cruder and more chaotic art. Medieval art was sloppy, and when perspective came along, it was improved and made clearer. But this has a very different light if you understood the older art's reality as symbol. In [A Glimpse of Eastern Orthodoxy](#), I wrote:

Good Orthodox icons don't even pretend to be photorealistic, but this is not simply because Orthodox iconography has failed to learn from Western perspective. As it turns out, Orthodox icons use a reverse perspective that is designed to include the viewer in the picture.

Someone who has become a part of the tradition is drawn into the picture, and in that sense an icon is like a door, even if it's more common to call icons "windows of Heaven." But it's not helpful to simply say "Icons don't use Renaissance

perspective, but reverse perspective that includes the viewer," because even if the reverse perspective is there, reverse perspective is simply not the point. There are some iconographers who are excellent artists, and artistry does matter, but the point of an icon is to have something more than artistry, as much as the point of visiting a friend is more than seeing the scenery along the way, even if the scenery is quite beautiful and adds to the pleasure of a visit. Cramming in photorealism is a way of making more involved excursions and dredging up more exotic or historic or whatever destinations that go well beyond a scenic route, after you have lost the ability to visit a friend. The Western claim is "Look at how much more extravagant and novel my trip are than driving along the same roads to see a friend!"—and the Orthodox response shows a different set of priorities: "Look how lonely you are now that you no longer visit friends!"

Photorealistic perspective is not new life but an extravagance once symbol has decayed. That may be one problem, or one thing that I think is a problem. But in the centuries after perspective, something else began to shift.

There is rich detail and artistry in this icon of the Prophet Elias. To those making their first contacts with Orthodox iconography, it may seem hard to appreciate—the perspective and proportions are surprising—but the things that make it something you need to learn are precisely the gateway to what an icon like this can do that mere photographs can never do.

In Giotto's painting of the dream of Joachim, one can see something probably that looks like an old icon to someone used to photorealistic art and probably looks photorealistic to someone used to icons. Not all medieval art is like this but this specific

... ..  
piece of medieval art is at once a contact point, a bridge, and a hinge.

Leonardo da Vinci's art is beginning to look very different from medieval art. In some ways Leonardo da Vinci's art is almost more like a photograph than a camera would take—Leonardo da Vinci's perspective is all the more powerful for the fact that he doesn't wear his grids on the outside, and in this picture Leonardo da Vinci makes powerful use of what is called "atmospheric perspective", giving the faroff place and above the Madonna of the Rocks' shoulder the blue haze that one gets by looking through a lot of air. Hence Leonardo da Vinci's perspective is not just a precise method of making things that are further away look smaller.

When Renaissance artists experimented with more photorealistic perspective, maybe they can be criticized, but they were experimenting to communicate better. Perspective was a tool to communicate better. Light and shadow were used to communicate better. It's a closer call with impressionism, but there is a strong argument that their departure from tradition and even photorealism was to better communicate how the outsides of things looked in different lighting conditions and at different times of day. But then something dreadful happened: not only artists but the community of people studying art learned a lesson from history. They learned that the greatest art, from the Renaissance onwards, experimented with tradition and could decisively break from tradition. They did not learn that this was always to improve communicate with the rest of us. And so what art tried to do was break from tradition, whether or not this meant communicating better to "the rest of us".

In at least some of Pablo Picasso's art, the photorealistic has vanished. Not that all Pablo Picasso art looks this way: some looks

---

like a regular or perhaps flattened image. But this, along with Picasso's other cubist art, tries to transcend perspective, and the effect is such that one is told as a curiosity the story of a museumgoer recognizing someone from the (cubist) picture Picasso painted of him. Of all the pictures I've both studied and seem live, this kind of Pablo Picasso art is the one where I have the most respect for the responses of people considered not to be sophisticated enough to appreciate Pablo Picasso's achievement.

Some brave souls go to modern art museums, and look at paintings that look nothing like anything they can connect with, and walk away humbled, thinking that they're stupid, or not good enough to appreciate the "elevated" art that better people are able to connect with. There's something to be said for learning to appreciate art, but with most of these people the problem is not that they're not "elevated" enough. The problem is that the art is not trying to communicate with the world as a whole.

Innovation is no longer to better communicate; innovation at times sneers at communication in a fashion people can recognize.

In an age before television, Jacques Louis David's depiction of the oaths of the Horatii was extraordinarily powerful political communication, even political propaganda. Jacques Louis David combines two things that are separate today: elevated things from classical antiquity, and a message that is meant to communicate to ordinary people. A painting like one of Jacques Louis David's was the political equivalent of a number of television news commentaries in terms of moving people to action.

The Franky Schaeffer title I gave earlier was [Addicted to Mediocrity: 20th Century Christians and the Arts](#); the title I did

not give is [Modern Art and the Death of a Culture](#), which has disturbing lettering and a picture of a man screaming on its cover art. If there is a deep problem with the typical Christian approach to arts (and it is not a universal rule), there is a deep problem with the typical secular Western approach to arts (even if that is not a universal rule either). A painting like "The Oaths of the Horatii" is no more intended to be a private remark among a few elite souls than [Calvin and Hobbes](#); [Calvin and Hobbes](#) may attract the kind of people who like other good art, but this is never because, as Calvin tells Hobbes about his snowman art which he wants lowbrows to have to subsidize, "I'm trying to criticize the lowbrows who can't appreciate this."

The concept of an artist is also deeply problematic. When I was taking an art history class at Wheaton, the professor asked people a question about their idea of an artist, and my reaction was, "I don't have any preconceptions." Then he started talking, and I realized that I did have preconceptions about the matter.

If we look at the word "genius" across the centuries, it has changed. Originally your "genius" was your guardian angel, more or less; it wasn't connected with great art. Then it became a muse that inspired art and literature from the outside. Then "genius" referred to artistic and literary giftedness, and as the last step in the process of internalization, "genius" came to refer to the author or artist himself.

The concepts of the artist and the genius are not the same, but they have crossed paths, and their interaction is significant. Partly from other sources, some artists take flak today because they lead morally straight lives. Why is this? Well, given the kind of superior creature an artist is supposed to be, it's unworthy of an artist to act as if they were bound by the moral codes that the common herd can't get rid of. The figure of the artist is put

up on a pedestal that reaches higher than human stature; like other figures, the artist is expected to have an enlightened vision about how to reform society, and be a vanguard who is above certain rules.

That understanding of artists has to come down in the Christian community. Artists have a valuable contribution; when St. Paul is discussing the Spirit's power in the Church, he writes (I Cor 12:7-30, RSV):

To each is given the manifestation of the Spirit for the common good. To one is given through the Spirit the utterance of wisdom, and to another the utterance of knowledge according to the same Spirit, to another faith by the same Spirit, to another gifts of healing by the one Spirit, to another the working of miracles, to another prophecy, to another the ability to distinguish between spirits, to another various kinds of tongues, to another the interpretation of tongues. All these are inspired by one and the same Spirit, who apportions to each one individually as he wills. For just as the body is one and has many members, and all the members of the body, though many, are one body, so it is with Christ. For by one Spirit we were all baptized into one body — Jews or Greeks, slaves or free — and all were made to drink of one Spirit. For the body does not consist of one member but of many. If the foot should say, "Because I am not a hand, I do not belong to the body," that would not make it any less a part of the body. And if the ear should say, "Because I am not an eye, I do not belong to the body," that would not make it any less a part of the body. If the whole body were an eye, where would be the hearing? If the whole body were an ear, where would be the sense of

smell? But as it is, God arranged the organs in the body, each one of them, as he chose. If all were a single organ, where would the body be? As it is, there are many parts, yet one body. The eye cannot say to the hand, "I have no need of you," nor again the head to the feet, "I have no need of you."

On the contrary, the parts of the body which seem to be weaker are indispensable, and those parts of the body which we think less honorable we invest with the greater honor, and our unpresentable parts are treated with greater modesty, which our more presentable parts do not require. But God has so composed the body, giving the greater honor to the inferior part, that there may be no discord in the body, but that the members may have the same care for one another. If one member suffers, all suffer together; if one member is honored, all rejoice together. Now you are the body of Christ and individually members of it. And God has appointed in the church first apostles, second prophets, third teachers, then workers of miracles, then healers, helpers, administrators, speakers in various kinds of tongues. Are all apostles? Are all prophets? Are all teachers? Do all work miracles? Do all possess gifts of healing? Do all speak with tongues? Do all interpret?

I would suggest that the secular idea of an artisan is closer to an Orthodox understanding of an artist than the secular idea of artist itself. Even if an artisan is not thought of in terms of being a member of a body, the idea of an artisan is one that people can accept being one member of an organism in which all are needed.

An artisan can show loving craftsmanship, can show a personal touch, can have a creative spark, and should be seen as pursuing honorable work; however, the idea of an artisan carries less bad

memorable work, however, the idea of an artist carries less baggage than the idea of an artist. They're also not too far apart: in the Middle Ages, the sculptors who worked on cathedrals were closer to what we would consider artisans who produced sculptures than being seen as today's artists. Art is or should be connected to iconography; it should also be connected to the artisan's craft, and people are more likely to give an artisan a place as a contributing member who is part of a community than artists.

If we look at technical documentation, then there are a number of believable compliments you could give if you bumped into the author. It would be believable to say that the documentation was a helpful reference met your need; that it was clear, concise, and well-written; or that it let you find exactly what you needed and get back to work. But it would sound odd to say that the technical writer had very distinctive insights, and even odder to say that you liked the author's personal self-expression about what the technology could do.

Technical writing is not glorified self-expression, and if we venerate art that is glorified self-expression, then maybe we have something to learn from how we treat technical writing.

If this essay seems like a collection of distinctive (or less politely, idiosyncratic) personal insights I had, or my own personal self-expression in Orthodoxy, theology, and faith, then that is a red flag. It falls short of the mark of what art, or Orthodox writing, should be. (And it is intended as art: maybe it's minor art, but it's meant as art.) It's not just that most or all of the insights owe a debt to people who have gone before me, and I may have collated but contributed nothing to the best insights, serving much more to paraphrase than think things up from scratch. Michel Quenot's [The Icon: A Window on the](#)

[Kingdom](#), and, for much longer, Madeleine l'Engle's [Walking on Water: Reflections on Faith and Art](#) have both given me a grounding. But even aside from that, art has existed for long before me and will exist for long after me, and I am not the sole creator of an Orthodox or Christian approach to the arts any more than a technical writer has trailblazed a particular technique of creating such-and-such type of business report.

Good art is freedom and does bear its human creator's fingerprints. Even iconography, with its traditional canons, gives substantial areas of freedom to the iconographer and never specify each detail. Part of being an iconographer is using that freedom well. However, if this essay is simply self-expression, that is a defect, not a merit. As an artist and writer, I am trying to offer more than glorified self-expression.

This Sunday after liturgy, people listened to a lecture taped from Bp. KALLISTOS Ware. He talked about the great encounter at the burning bush, when God revealed himself to Moses by giving his name. At the beginning of the encounter, Moses was told, "Take off your shoes, for the place you are standing is holy ground." Bp. KALLISTOS went on to talk about how in those days, as of the days of the Fathers, people's shoes were something dead, something made from leather. The Fathers talked about this passage as meaning by implication that we should take off our dead familiarity to be able to encounter God freshly.

I was surprised, because I had reinvented that removal of familiarity, and I had no idea it was a teaching of the Orthodox Church. Perhaps my approach to trying to see past the deadness of familiarity—which you can see in [Game Review: Meatspace](#)—was not exactly the same as what Bp. KALLISTOS was saying to begin a discussion about receiving Holy Communion properly. Yet

I found out that something I could think of as my own private invention was in fact a rediscovery. I had reinvented one of the treasures of Orthodoxy. Part of Orthodoxy is surrender, and that acknowledgment that anything and everything we hold, no matter how dear, must be offered to God's Lordship for him to do with as we please. Orthodoxy is inescapably a slow road of pain and loss. But there is another truth, that things we think are a private heresy (I am thinking of G.K. Chesterton's discussion) are in fact a reinvention, perhaps a crude reinvention, of an Orthodox treasure and perhaps an Orthodox treasure which meets its best footing, deepest meaning, and fullest expression when that jewel is set in its Orthodox bezel.

There are times when I've wanted to be an iconographer (in the usual sense). I don't know if that grace will ever be granted me, but there was one point when I had access to an icon painting class. When I came to it and realized what was going on, I shied away. Perhaps I wanted to learn to write icons (Orthodox speak of writing icons rather than painting them), but there was something I wasn't comfortable with.

Parishes have, or at least should have, a meal together after worship, even if people think of it as "coffee hour" instead of thinking of it as the communion of a common meal. The purpose is less to distribute coffee, which coffee drinkers have enough of in their homes, than to provide an opportunity (perhaps with a social lubricant) for people to meet and talk. That meeting and talking is beautiful. Furthermore, a parish may have various events when people paint, seasonally decorate, or maintain the premises, and in my experience there can be, and perhaps should be, an air of lighthearted social gathering about it all.

But this iconography class had lots of chatter, where people gathered and learned the skill of icon painting that began and

ended with a prayer but in between had the atmosphere of a casual secular gathering that didn't involve any particularly spiritual endeavor or skill. Now setting my personal opinions aside, the classical canons require that icons be written in prayer, concentration, and quiet. There are reasons for this, and I reacted as I did, not so much because I had heard people were breaking such-and-such ancient rule, but more because I was affronted by something that broke the rule's spirit even more than its letter, and I sensed that there was something askew. The reason is that icons are written in silence is that you cannot make a healthy, full, and spiritual icon simply by the motions of your body. An icon is first and foremost created through the iconographer's spirit to write what priests and canons have defined, and although the iconographer is the copyist or implementor and not original author, we believe that the icon is written by the soul of the iconographer—if you understand it as a particular (secular) painting technique, you don't understand it. That class, like that iconographer, have produced some of the dreariest and most opaque icons, or "windows of Heaven", that I have seen. I didn't join that class because however much I wanted to be an iconographer, I didn't want to become an iconographer like that, and in the Orthodox tradition you become an iconographer by becoming a specific iconographer's disciple and becoming steeped in that iconographer's spiritual characteristics.

Years ago, I stopped watching television, or at least started making a conscious effort to avoid it. I like and furthermore love music, but I don't put something on in the background. And, even though I love the world wide web, I observe careful limits, and not just because (as many warn) it is easy to get into porn. The web can be used to provide "noise" to keep us from coming face

to face with the silence. The web (substitute "television"<http://cjshayward.com/>"title="Jonathan's Corner → Orthodox Books Online, and More"music"<http://cjshayward.com/>"title="Jonathan's Corner → Orthodox Books Online, and More"newspapers"<http://cjshayward.com/>"title="Jonathan's Corner → Orthodox Books Online, and More"movies"<http://cjshayward.com/>for that matter, "Church Fathers" for how this temptation appears to you) can be used to anesthetize the boredom that comes when we face silence, and keep us from ever coming to the place on the other side of boredom. When I have made decisions about television, I wasn't thinking, on conscious terms, about being more moral and spiritual by so doing. I believe that television is a pack of cigarettes for the heart and mind, and I have found that I can be creative in more interesting ways, and live better, when I am cautious about the amount of noise in my life, even if you don't have to be the strictest "quiet person" in the world to reap benefits. Quiet is one spiritual discipline of the Orthodox Church (if perhaps a lesser spiritual discipline), and the spiritual atmosphere I pursued is a reinvention, perhaps lesser and incomplete, of something the Orthodox Church wants her iconographers to profitably live. There is a deep enough connection between icons and other art that it's relevant to her artists.

When I write what I would never call (or wish to call) my best work, I have the freedom to be arbitrary. If I'm writing something of no value, I can impose my will however I want. I can decide what I want to include and what I want to exclude, what I am going to go into detail about what I don't want to elaborate on, and what analogies I want to draw. It can be as much

dictated by "Me! Me! Me!" as I want. When I am creating something I value, however, that version of freedom hardly applies. I am not free, if I am going to create fiction that will resonate and ring true, to steamroll over my characters' wishes. If I do I diminish my creation. What I am doing is loving and serving my creations. I can't say that I never act on selfish reasons, but if I am doing anything of a good job my focus is on loving my creation into being and taking care of what it needs, which is simultaneously a process of wrestling with it, and listening to it with the goal of getting myself out of the way so I can shape it as it needs to be shaped.

There is a relationship that places the artist as head and lord of his creation, but if we reach for some of the most readily available ideas of headship and lordship, that claim makes an awful lot of confusion. Until I began preparing to write this essay, it didn't even occur to me to look at the human creator-creation connection in terms of headship or lordship. I saw a place where I let go of arbitrary authority and any insistence on my freedoms to love my creation, to listen to and then serve it, and care for all the little details involved in creating it (and, in my case, publishing it on the web). All of this describes the very heart of how Christians are to understand headship, and my attitude is hardly unique: Christian artists who do not think consciously about headship at all create out of the core of the headship relation. They give their works not just any kind of love, but the particular and specific love which a head has for a body. If art ends by bearing the artist's fingerprints, this should not be because the artist has decided, "My art must tell of my glory," but because loved art, art that has been served and developed and educed and drawn into manifest being, cannot but be the image, and bear the imprint, of its creator. That is how

art responds to its head and lord.

To return to spiritual discipline: Spiritual discipline is the safeguard and the shadow of love. This applies first and foremost to the Orthodox Way as a whole, but also specifically to art. Quiet is a lesser discipline, and may not make the front page. Fasting from certain foods can have value, but it is only good if saying no to yourself in food prepares you to love other people even when it means saying no to yourself. There are harsh warnings about people who fast and look down on others who are less careful about fasting or don't fast at all and judging them as "less spiritual". Perhaps fasting can have great value, but it is better not to fast than to fast and look down.

Prayer is the flagship, the core, and the crowning jewel of spiritual discipline. The deepest love for our neighbor made in God's image is to pray and act out of that prayer. Prayer may be enriched when it is connected with other spiritual disciplines, but the goal of spiritual discipline and the central discipline in creating art is prayer.

There is a passage in *George MacDonald* where a little girl stands before an old man and looks around an exquisite mansion in wonder. After a while the old man asks her, "Are you done saying your prayers?" The surprised child responds, "I wasn't saying my prayers." The old man said, "Yes you were. You just didn't realize it."

If I say that prayer drives art, I don't just mean that I say little prayers as I create art (although that should be true). I mean that when I am doing my best work, part of why it is my best work is that the process itself is an act of prayer. However many arbitrary freedoms I would not dare to exercise and deface my own creation, I am at my freest and most alive when I am listening to God and a creation about how to love it into being.

It is not the same contemplation as the Divine Liturgy, but it is connected, part of the same organism. The freedom I taste when I create, the freedom of service and the freedom of love, is freedom at so deep a level that a merely arbitrary freedom to manipulate or make dictatorial insistences on a creation pales in comparison to the freedom to listen and do a thousand services to art that is waiting for me to create it.

"He who does not love his brother whom he has seen, cannot love God whom he has not seen." (I Jn 4:20, RSV). If an artist does not love God and the neighbors whom he can see and who manifest the glory of the invisible God, he is in a terrible position to healthily love a creation which—at the moment, exists in God's mind and partially in its human creator, but nowhere else. This is another way of saying that character matters. I have mentioned some off-the-beaten-track glimpses of spiritual discipline; this leaves out more obvious and important aspects of love like honesty and chastity. The character of an artist who can love his works into being should be an overflow of a Christian life of love. Not to say that you must be an artist to love! Goodness is many-sided. This is true of what Paul wrote (quoted above) about the eye, hand, and foot all belonging to the body. Paul also wrote the scintillating words (I Cor 15:35-49, RSV):

But some one will ask, "How are the dead raised? With what kind of body do they come?" You foolish man! What you sow does not come to life unless it dies. And what you sow is not the body which is to be, but a bare kernel, perhaps of wheat or of some other grain. But God gives it a body as he has chosen, and to each kind of seed its own body. For not all flesh is alike, but there is one kind for men, another for animals, another for birds, and another for fish. There are

celestial bodies and there are terrestrial bodies; but the glory of the celestial is one, and the glory of the terrestrial is another. There is one glory of the sun, and another glory of the moon, and another glory of the stars; for star differs from star in glory.

So is it with the resurrection of the dead. What is sown is perishable, what is raised is imperishable. It is sown in dishonor, it is raised in glory. It is sown in weakness, it is raised in power. It is sown a physical body, it is raised a spiritual body. If there is a physical body, there is also a spiritual body. Thus it is written, "The first man Adam became a living being"; the last Adam became a life-giving spirit. But it is not the spiritual which is first but the physical, and then the spiritual. The first man was from the earth, a man of dust; the second man is from heaven. As was the man of dust, so are those who are of the dust; and as is the man of heaven, so are those who are of heaven. Just as we have borne the image of the man of dust, we shall also bear the image of the man of heaven.

These are words of resurrection, but the promise of the glorious and incorruptible resurrection body hinge on words where "star differs from star in glory". An artist's love is the glory of one star. It is no more the only star than the eye is the only part of the body. It is part of a scintillating spectrum—but not the whole spectrum itself!

I would like to also pause to respond to an objection which careful scholars would raise, and which some devout Orthodox would sense even if they might not put it in words. I have fairly uncritically used a typically Western conception of art. I have lumped together visual arts, literature, music, film, etc. and seem to assume that showing something in one case applied to every

case. I would acknowledge that a more careful treatment would pay attention to their differences, and that some stick out more than others.

I am not sure that a better treatment would criticize this assumption. However, let's look at one distinctive of Orthodoxy.

One thinks of why Western Christians talk about how the superficial legend goes that the leaders of (what would become) Russia went religion-shopping, and they saw that the Orthodox worship looked impressive, and instead of deciding based on a good reason, they went with the worship they liked best. Eastern Christians tend to agree about the details of what people believe happened, but we do not believe the aesthetic judgments were something superficial that wasn't a good reason. We believe that something of Heaven shone through, and if that affected the decision, people weren't making a superficial decision but something connected with Truth and the Light of Heaven and of God. We believe that worship, and houses of worship, are to be beautiful and reflect not only the love but the Light and beauty of Heaven, and a beautiful house of worship is no more superfluous to light than good manners are superfluous to love. The "beauty connection" has not meant that we have to choose between good homilies, music, liturgy, and icons. A proper Orthodox listing of what constituted real, iconic art may differ from a Western listing, and there's more than being sticks in the mud behind the fact that Orthodox Churches, by and large, do not project lyrics with PowerPoint. Part of what I have said about icons is crystallized in a goal of "transparency", that the goal of a window of Heaven is to be transparent to Heaven's light and love. Not just icons can be, or fail to be, transparent. Liturgical music can be transparent or fail to be transparent. Homilies can be transparent or fail to be transparent.

I've heard just enough bad homilies, that is opaque homilies that left me thinking about the homilist instead of God—to appreciate how iconically translucent most of the homilies I've heard are, and to realize that this is a privilege and not a right that will automatically be satisfied. The opaque Orthodox homilies don't (usually) get details wrong; they get the details right but don't go any further. But this is not the whole truth about homilies. A homily that is written like an icon—not necessarily written out but drawn into being first and foremost by the spirit, out of love, prayer, and spiritual discipline, can be not only transparent but luminous and let Heaven's light shine through.

Some wag said, "A sermon is something I wouldn't go across the street to hear, but something I'd go across the country to deliver." I do not mean by saying this to compete with, or replace, the view of homilies as guidance which God has provided for our good, but a successful homily does more than inform. It edifies, and the best homilies are luminously transparent. They don't leave the faithful thinking about the preacher—even about how good he is—but about the glory of God. When icons, liturgy, and homilies rise to transparency, they draw us beyond themselves to worship God.

My denser and more inaccessible musings might be worth reading, but they should never be read as a homily; the photographs in [my slideshow of Cambridge](#) might capture real beauty but should never be mounted on an icon stand for people to venerate; my best cooking experiments may be much more than edible but simply do not belong in the Eucharist—but my cooking can belong at coffee hour. The Divine Liturgy at its best builds up to Holy Communion and then flows into a common meal

(in my culture, coffee hour) that may not be Holy Communion but is communion, and just as my more edible cooking may not be fit for the Eucharist but belongs in a common meal, I am delighted to tell people I have a literature and art website at [Jonathan's Corner](#) which has both short and long fiction, musings and essays, poetry, visual art, and (perhaps I mention) computer software that's more artistic than practical. I have put a lot of love into my website, and it gives me great pleasure to share it. If its contents should not usurp the place of holy icons or the Divine Liturgy, I believe they do belong in the fellowship hall and sacred life beyond the sanctuary. Worshipping life is head and lord to the everyday life of the worshipping faithful, but that does not mean a denigration of the faithful living as lesser priests. The sacramental priesthood exists precisely as the crystallization and ornament of our priestly life in the world. As I write, I am returning from the Eucharist and the ordination of more than one clergy. Orthodox clergy insist that unless people say "Amen!" to the consecration of the bread and wine which become the holy body and the holy blood of Christ, and unless they say, "Axios!" ("He is worthy!") to the ordination, then the consecration or the ordination doesn't happen. Unlike in Catholicism, a priest cannot celebrate the Divine Liturgy by himself in principle, because the Divine Liturgy is in principle the work of God accomplished through the cooperation of priest and faithful, and to say that a priest does this himself is as odd as saying that the priest has a hug or a conversation by himself. The priest is head and even lord of the parish, but under a richer, Christian understanding of headship and lordship, which means that as the artist in his care he must listen to the faithful God has entrusted to his inadequate care, listening to God about who God and not the priest wants them to become, and both serve them and love them

into richer being. (And, just as it is wrong for an artist to domineer his creation, it is even more toxic for a priest to domineer, ahem, work to improve the faithful in his parish. The sharpest warning I've heard a bishop give to newly ordained clergy is about a priest who decided he was the best thing to happen to the parish in his care, and immediately set about improving all the faithful according to his enlightened vision. It was a much more bluntly delivered warning than I've said about doing that to art.) The priest is ordained as the crystallization and crown of the faithful's priestly call. The liturgy which priest (and faithful) is not to be cut off when the ceremony ends; it is to flow out and imprint its glory on the faithful's life and work. Not only the liturgical but the iconic is to flow out and set the pace for life.

Art is to be the broader expression of the iconic.

**Looking at**  
**Stranger in a**  
**Strange Land as a**  
**Modern**  
**Christological**  
**Heresy**

**Maximum Christ**

On a personal note, I write this as someone who became absorbed in [Stranger in a Strange Land](#), who has felt its pull, and who has overreached and undershot in the same act many times. The things I critique are never too far from home for me. But there is something interesting to be said, and it begins with Christological heresy.

The Eastern Orthodox Church has often been called the Church of the Seven Ecumenical Councils, and these councils, especially the early ones, were about who Christ was and is, namely Christology. The Orthodox Church rejected as heresy a

number of answers to the question, "Who is Christ?" as deficient. What the councils affirmed might be titled "[Maximum Christology](#)." And what they rejected was Christologies that were too small, and made Christ too little.

Arius, perhaps the most castigated of the heretics, taught that Christ was "a Creature, but not as one of the creatures," a pre-eminent created work through whom God created all else. (And his teaching is alive and well, especially among Protestants; what Arius invented, keeps getting re-invented.) The insight of Athanasius was that this "a-mermaid-at-best Christ" failed to bridge God and his Creation: he has been summarized as saying that Arius's Christ was an isolated post in the chasm between God and his Creation, and the proof that the chasm could never truly be bridged.

Nestorius came on another solution, that Christ included both complete God and complete man, but there was something like a gentleman's agreement; they were not fully united. The Council that rejected him affirmed that not only was Christ fully divine and fully human, but the divine nature and the human nature were fully united in Christ's person. Another council affirmed that while the divine and human natures were fully united, they yet remained unconfused. Other rejected teachings included that Christ had a human body but no human soul, the soul's job being done by the divine nature, or that Christ had most of a human soul but not a human will. (To which the Orthodox reply that this is a most curious omission: it is by the will that we fell from our original glory, and what is not taken up in Christ is not saved. The maxim goes, "What is not assumed [taken into Christ] is not deified." But more of that later.) The Church in rejecting these affirmed [the maximum Christology of a Maximum Christ](#), maximally God, maximally man, with the divine and human natures

maximally united, and yet maximally unconfused. The Christ worshipped by Orthodox is the [Maximum Christ](#).

One book commented that someone had made a perceptive study of Martin Luther's crisis of faith in light of modern identity crises, although Martin Luther probably would not have understood the comparison between his great crisis of faith and modern identity crises, and he almost certainly would have found the comparison reprehensible if he had understood it. In somewhat similar fashion, Robert A. Heinlein's [Stranger in a Strange Land](#), in either the cut or uncut edition, cannot be placed alongside Arius, Nestorius, or the other classic arch-heretics as trying to offer a compelling solution to the question, "Who is Jesus Christ?" Heinlein has been called a "sex-crazed, anti-Christian libertine," and [Stranger in a Strange Land](#) plays it to the hilt. But [Stranger in a Strange Land](#) admits a quite fruitful comparison to seductive Christological heresies, and I might suggest that this book, in which Heinlein was aiming for something monumental, is a Messiah story. Heinlein had nothing higher to shoot for. However anti-Christian Heinlein may be, he had nothing higher than a Messiah story to shoot for.

## Heinlein's Messiah

[The figure of Merlin, deepened, becomes Christ.](#) But I would like to clear away a distraction in Michael Valentine Smith, and avoid going down the road of, "Well, Christ has a dual nature, and Michael Valentine Smith also has a dual nature by the end of the book: he is both Martian and human."

[Stranger in a Strange Land](#) is **riveting**. You can love the book, or you can be offended at it, but yawning and asking if there's anything good on television is not an option, or at least not one I've met. Michael Valentine Smith "passed through the earth like a flame" and quite assuredly "never bored a soul," to use words Dorothy Sayer applied to Christ. He comes to offer a gospel, and to awaken people to abundant life. [Stranger in a Strange Land](#) is a cult classic, with devoted readers who have never liked another science fiction book, and there are people who tried to create and live the Church of All Worlds it outlines: quite an achievement for a work of fiction with no pretensions of being anything else.

In this book, which a number of people consider the greatest science science fiction novel ever written (sound similar to "the greatest drama ever told"?), Michael Valentine Smith is born and raised on Mars with the wealth of Martian culture; early on he is referred to as a man, and another character adamantly denies this, says that he is not a man, calling him a Martian with the

genes and ancestry of a man. He is brought to earth, but this is no homecoming, at least not at first; he faces the struggles and challenges of dealing with what is to him a completely alien culture and language.

Much of the early part of the book is concerned with his struggles; when the book moves on to the next stage, where he tries all sorts of professions, fails at most of them, and undergoes a sort of self-directed apprenticeship about living and doing things on our world. Here he is still struggling at being human, and his failures are often spectacular, but he has made a connection on something that eluded him earlier: he has something that those around him do not. He bears a wealth of Martian culture, language, and psychic powers, and he is gaining a foothold in how to do things on earth.

In the last part of the book, he begins a church, the Church of All Worlds, and uses the genre of a mystery religion to share the wealth of Martian culture. It is a microcosm of Mars on earth, as well as being presented as fully human, and the story culminates in the martyrdom of a man who gave and received culture shock practically everywhere he went.

## Tenets of faith

Towards the middle of [Stranger in a Strange Land](#), Michael asks Jubal, a father figure who gave Michael (much of) his humanity, why he didn't mention "faith" when Jubal told him the list of bad words he shouldn't say.

The "faith" that Michael rejects may well be a "faith" that Orthodoxy rejects too: if "faith" means believing in a God who does not interact with daily life, and a Heaven which only starts after death, then Orthodoxy rejects that "faith" too—as surely as Orthodoxy rejects "faith" without works. Faith in the Orthodox Church is something practical, an interaction that begins here and now, something that tastes and knows. To "grok" in Martian is to drink deeply and to know, and this is bedrock to Orthodox faith. So the "faith" that is rejected in *Stranger in a Strange Land* is something the Orthodox faith rejects too.

Nonetheless, it seems somewhat clumsy to speak of Michael's "tenets of faith" in the book, and I will strike through the "bad" word, writing, "tenets of ~~faith~~." (You are welcome to read this as "The word 'faith' is behind the line used to strike through it.")

I would like to look at several tenets of ~~faith~~ that run throughout the book, and underscore and unfold something: **It is possible to overreach and undershoot in the same act.** This happens in [Stranger in a Strange Land](#)'s tenets of ~~faith~~.

"Thou art God"

## THOU ART GOD

Mike, after struggling with human concepts, tells Jubal, "Thou art God!" and Jubal facepalms and says to back up. But Michael is confident and serene, and "Thou art God" becomes a foundational tenet of faith for the Church of All Worlds.

It has been said, "I would not give a fig for the simplicity this side of complexity, but I would give everything I own for the simplicity on the other side of complexity." And that is a hint of why everything simply being God from the beginning is much less powerful a drama than God creating something else besides himself, and then by his grace deifying it. "Pantheism", the idea that everything is God, has been called "paneverythingism," the idea that "everything is everything else"—and something like this is underscored by a joke later on in the book where one worm asks another, "Will you marry me?" and the other worm says, "Marry you? I'm your other end!" It kind of drains romance, and if that is being God, then it isn't really that much of an honor, or that big a deal, to be God. (Or, one might say, it isn't really that much of an honor to be Everything, like everything else.)

It has been observed that love poetry flourishes in cultures where people believe God has a conversation with something that is not-God. If everyone and everything is God by nature, if as the dialogue in the book goes the cat that eats the bird or mouse is God and the bird or mouse is God and it doesn't matter who is eaten, then being God does not hold a candle to the Orthodox teaching of divinization, that the Son of God became a Man and the Son of Man that men might become gods and the sons of God.

That is the simplicity on the other side of complexity: that is the deification on the other side of being created and not God.

Michael's Martian "Thou art God!" overreaches and undershoots in the same movement.

### **The Kiss of Brotherhood**

Within the bond of Michael's group, there was a kiss of brotherhood, and this among the most central tenets of faith—but Heinlein was really borrowing here. Remember the Bible on "Greet one another with a holy kiss?"

The kiss of love, shared within the community of the Church, is the one act the Bible calls holy. It has been said, "Examples of the kiss as a means of making and breaking enchantments have been found in the folklore of virtually every culture in the Western world," and this resonates with the holy kiss.

The Orthodox holy kiss is a microcosm of spiritual life. It is tied to Holy Communion, and receiving the Holy Mysteries is itself understood as a kiss. It is by the mouth that one breathes with one's spirit, and with the mouth that one receives communion, and though it is a kiss on the cheek, by implication it is a kiss on the mouth, displaced somewhat.

Perhaps there is much more to be said in this vein, even if the holy kiss seems somewhat restrained compared to the "all-out kiss of brotherhood" which was, um, more than a kiss. But there is another shoe to drop.

"Good fences make good neighbors:" we have a culture with boundaries and limits that are there for our protection. The difference between the Martian "kiss of brotherhood" and the Orthodox holy kiss is a bit like the difference between liberating yourself to be drunk all the time, and drinking wine in moderation. And the holy kiss is not a fixation: it is one of many things that fit into a larger reality, only one tree in a large

forest. This factor is completely lost in [Stranger in a Strange Land](#). Heinlein may have made much more of a to-do about the kiss itself, but there are some things in life where less is more.

The Orthodox holy kiss is much more striking in its original ancient context than one might imagine; and yet the Church preserved a balancing act with a holy kiss that respected boundaries. Exactly how it did so has changed over time, but balance has been preserved. Heinlein, to make it different from Christianity, toppled the balance by leaving nothing of personal or community boundaries. Destroy the balancing act, and the holy kiss becomes a gateway to pain.

In the "kiss of brotherhood", Heinlein overreached and undershot in the same act.

## Nakedness

In [Stranger in a Strange Land](#), the idea of wearing clothes for modesty is ridiculed as an irrational local custom. "Clothes optional" is a defining feature of the little bubble of Mars on earth. Not just a tenet of faith in the book, it was a basic practice when people tried to make a real-life Church of All Worlds following Heinlein's blueprint. But the bumper sticker saying, "God's original plan was to live in a garden with two naked vegetarians" is really missing something.

As to what exactly is missing, a frequent Orthodox hymn says of the Devil, "He who of old stripped you both naked" to Adam and Eve. What Adam and Eve had in the Garden of Eden was not something we re-create by taking our clothes off; we are in fact closer to Adam and Eve's original condition when we are clothed in modesty. The term "naked" itself comes from "nake", a verb that one would use to talk about stripping the natural covering

from a nut. Never mind that some cultures don't use clothes, and express their modesty in other ways. The natural condition is to present the person, not simply expose flesh, and the human person is presented properly when properly clothed. The New Eve, the Mother of God, is hymned, "Rejoice, robe of boldness for the naked!" because a person is naturally and properly presented when naturally and properly clothed.

Robert Heinlein sure makes nudity look good on paper. But from all reports, particularly Wendy Shalit's [A Return to Modesty](#), living nude is not all it's cracked up to be.

This attempt to remove barriers by removing clothing, too, overreaches and undershoots in the same act.

### **Laced with escapism**

[Stranger in a Strange Land](#) has bubbles of Martian culture, and Martian life, introduced to earth; and Orthodoxy brings the Kingdom of Heaven and eternal life into earth. But there is a difference. The literary work of [Stranger in a Strange Land](#), and the Martian culture it heralds, is laced with escapism. Escapism is not simply a tenet of faith; an escapist streak gives form and substance to every tenet of faith. By contrast, Orthodox eternal Life, lived here and now, is not escapist. It is intended for the here and now we are in, even the messy circumstances of our real lives, not the lives we might wish we were living.

It is difficult to describe the lust for escape, the lust to escape this world, that is laced through and through the novel and its movement. I tried to describe it in [Exotic Golden Ages and Restoring Harmony with Nature: Anatomy of a Passion](#). It is a lust I know well. And to those thirsting with that lust, there is good news and bad news. The bad news is that you can't make

the escape you thirst for. The good news is that you don't need to.

Orthodoxy seems exotic enough; when you start out, things are very exotic, and in a certain sense it becomes something better than exotic when you have worn the shoe for long enough. But it lifts up slogwork, and offers engagement where one is tempted to seek escape. [Stranger in a Strange Land](#), when its woven spell works its magic, leaves you wishing Martian culture was something you could enter. Orthodoxy leaves you able to enter the Kingdom of Heaven, and live the eternal life, where you are now, wherever you are now.

[Stranger in a Strange Land](#), in trying to reach for something beyond the ken of earth, overreaches and undershoots in the same act. We need to let go of escape and discover that escape is not needed.

### **Water brothers**

Water brothers are described as a very serious bond, "much more serious than a marriage," and the tenet of faith of water brothers is indeed more serious than Heinlein's version of marriage. But to some readers it seems mysterious how Heinlein tears up traditional, permanent, monogamous marriage and then rushes in with water brotherhood as if there was a gaping hole he needed to fill.

The seriousness of water brotherhood parallels the seriousness of marriage and monasticism the Orthodox Church celebrates, and arguably its "inner circle" version of friendship bears such gravity. I've never read a reviewer of [Stranger in a Strange Land](#) say, "You know, this 'water brother' bond is something I just can't relate to." Water brotherhood is good

and it appears different ways in different places. But in [Stranger in a Strange Land](#) its job is to fill a gaping hole after Heinlein has ripped up traditional marriage.

I remember reading a book where, to build up alchemy and give it a sense of transcendence, a character said he had studied all the world's religions and spurned them for the seriousness of alchemy. There was a very recognizable move of literary craft being made, if one that struck me as oddly: alchemy is not a more serious alternative to lightweight world religions, but a lightweight alternative to more serious world religions, and any one of Hinduism, Buddhism, Islam, Christianity, and sundry other religions offer a much meatier alternative to the alchemy that was being offered. Here, in [Stranger in a Strange Land](#), the same kind of move is offered: kindred, friendship, and even traditional marriage are dismissed to make way for the weight of water brotherhood. But we would do well to avoid lusting for the depth of "water brother" bonds and pursue deeper relationships with those around us, especially if we are married to them.

After parenthetically adding a note about "Good fences make good neighbors" being part of how you form healthy bonds, I would say that in Heinlein's thirst for transcendent friendship, he has overreached and undershot in the same move.

### **Martian discipline and powers**

Although the term "psychic" never appears for Martian disciplines and powers, Michael Valentine Smith and the people he trains in Martian discipline have psychic powers. If you follow their tenets of faith in this book, you should expect to develop psychic powers. Characters see things and communicate far away, they can psychically kill and make things disappear (though

a gun is very much a wrong thing, killing by psychic powers is a light and casual deal), and more. And on that point I would admit a comparison.

Orthodox saints levitate, see things past and future and know what is in others' minds, and shine with the Light of Heaven. But to mention this is misleading, because it is a side effect: [The Ladder of Divine Ascent](#) says that people who see these things are like people who look at a sunbeam and see specks floating in the sunbeam because they are looking at the sunbeam itself. Michael Valentine Smith psychically kills a great many people; the greatest of Orthodox saints have raised the dead. But the Orthodox voice is insistent, emphatic, adamant. Repenting of your sins is greater work than raising the dead! The saints insist: Feeding the hungry is greater work than raising the dead! The few saints who work miracles see less wish fulfillment than us, not more; their struggles are like the messy circumstances of our lives, only much moreso.

The freedom in [Stranger in a Strange Land](#) is the freedom of wish-fulfillment, of immature desires sated. The freedom in Orthodoxy is the freedom that counts: the Mother of God who is addressed, "Rejoice, robe of boldness for the naked!" is also addressed, "Rejoice, love that doth vanquish all desire," and the freedom in Orthodoxy is triumph over immature desire, and freedom to move on to more excellent things than one desires. In English, [Stranger in a Strange Land](#) tells us, being happy is a matter of functioning the way a person is meant to function; in Martian the statement amounts to a complete working manual. But Orthodoxy knows what it is, and has not only the Philokalia ([volume 1](#), [volume 2](#), [volume 3](#), and [volume 4](#)) written out of deep knowledge and experience of what the science of spiritual struggle entails, but has Tradition, a living voice that offers

bite-sized morcels to help day-by-day in our struggles. Orthodox Tradition trains us in the only freedom that really counts: not anything like psychic powers to sate unrefined desire, but transforming and transfiguring desire itself, which is itself greater work than raising the dead!

Heinlein offers powers equal to the powers of the saints in the superficial sense of the miraculous, and equal biofeedback-type control over their bodies so that one could stand through an ice storm naked (which some Orthodox saints can probably do), but without the most excellent way of the ABC of moral refinement and spiritual struggle. Fighting lust is one part of it, but not the only one, and here Heinlein offers heroes who win the Nobel prize for literature but do not deign to learn handwriting or typing. In Orthodoxy, the realization is that Nobel prizes are really not the bread-and-butter of life, but literacy in spiritual discipline is.

In psychic giants who embrace lust, Heinlein has overshot and underreached in the same heroes.

## The Heretic

The initial working title for [Stranger in a Strange Land](#) was, The Heretic, and this seems a carefully chosen title. On that point it is worth quoting St. Irenaeos, *Against Heresies*:

Their manner of acting is just as if one, when a beautiful image of a king has been constructed by some skilful artist out of precious jewels, should then take this likeness of the man all to pieces, should rearrange the gems, and so fit them together as to make them into the form of a dog or of a fox, and even that but poorly executed; and should then maintain and declare that this was the beautiful image of the king which the skilful artist constructed, pointing to the jewels which had been admirably fitted together by the first artist to form the image of the king, but have been with bad effect transferred by the latter one to the shape of a dog, and by thus exhibiting the jewels, should deceive the ignorant who had no conception what a king's form was like, and persuade them that that miserable likeness of the fox was, in fact, the beautiful image of the king.

This image seems apropos to the "practical gospel", if you will, in [Stranger in a Strange Land](#), and it doesn't speak much of

Michael Valentine Smith.

Or does it?

In antiquity, there were Alexandrian and Antiochian schools of thought, and the Alexandrian school understood Christ as a teacher and a bearer of important teachings. And from the Alexandrian perspective, St. Paul's epistles in the Bible are quite puzzling: they make almost nothing of the wealth of teaching preserved in the Gospels; there is little if any trace of the parables the Gospels keep finding in the Lord's mouth. And all of this is puzzling until you realize that St. Paul was not making an Alexandrian use of Christ as a pivotal Teacher, but laying the foundations for what would become the Antiochian school, which found the significance of Christ in his becoming incarnate as man, dying as a sacrifice, and rising from the dead and trampling down death by death. And that is everywhere in St. Paul's quite Christocentric letters.

And if we place [Stranger in a Strange Land](#)'s account of Michael Valentine Smith with respect to these poles, Heinlein's precept and example are alike Alexandrian: his Messiah is a Teacher who is significant for the tenets of faith he bears. At one point Michael is compared to the first man who discovered fire; in that sense he is more like the most important of many important saints than a Messiah proper. In the Orthodox Church, Christ alone is divine by nature; the faithful and even the saints are made to be divine by grace when God transcends the difference between Creator and creature. The uniqueness of Christ is too secure to be threatened by his divinizing work among the Church and Creation with it. And in that sense, Michael Valentine Smith stands the hero of a Messiah story, but in an Alexandrian sense.

Michael Valentine Smith is significant as a deliverer of tenets of **faith**.

And in that sense his story stands as a Christological heresy,  
like the heresies the Church rejected in confessing her  
[Maximum Christ](#).

# The Luddite's Guide to Technology

## *Fasting from Technologies*

Since the Bridegroom was taken from the disciples, it has been a part of the Orthodox Church's practice to fast. What is expected in the ideal has undergone changes, and one's own practice is done in submission to one's priest. The priest may work on how to best relax rules in many cases so that your fasting is a load you can shoulder. There is something of a saying, "As always, ask your priest," and that goes for fasting from technology too. Meaning, specifically, that if you read this article and want to start fasting from technologies, and your priest says that it won't be helpful, leave this article alone and follow your priest's guidance.

From ancient times there has been a sense that we need to transcend ourselves. When we fast, we choose to set limits and master our belly, at least partly. "Food for the stomach and the stomach for food—maybe, but God will destroy them both." So the Apostle answered the hedonists of his day. The teaching of fasting is that you are more than the sum of your appetites, and we can grow by giving something up in days and seasons. And

really fasting from foods is not saying, "I choose to be greater than this particular luxury," but "I choose to be greater than this necessity." Over ninety-nine percent of all humans who have ever lived never saw a piece of modern technology: Christ and his disciples reached far and wide without the benefit of even the most obsolete of electronic communication technologies. And monks have often turned back on what luxuries were available to them: hence in works like the *Philokalia* or the [Ladder](#) extol the virtue of sleeping on the floor. If we fast from technologies, we do not abstain from basic nourishment, but what Emperors and kings never heard of. At one monastery where monks lived in cells without running water or electricity, a monk commented that peasants and for that matter kings lived their whole lives without tasting these, or finding them a necessity. (Even Solomon in all his splendor did not have a Facebook page.)

In Orthodoxy, if a person is not able to handle the quasi-vegan diet in fasting periods, a priest may relax the fast, not giving *carte blanche* to eat anything the parishioner wants, but suggesting that the parishioner relax the fast to some degree, eating some fish or an egg. This basic principle of fasting is applicable to technology: rather than immediately go cold turkey on certain technologies, use "some fish or an egg" in terms of older technologies. Instead of texting for a conversation, drive over to a nearby friend.

(Have you ever noticed that during Lent many Orthodox Christians cut down or eliminate their use of Facebook?)

As mentioned in [Technonomicon](#), what we call space-conquering technologies might slightly more appropriately be called body-conquering technologies, because they neutralize

Donald Knuth, one of the leading lights in computer science, got rid of his email address well over a

some of the limitations of our embodied state. The old wave of space-conquering technologies moves people faster or faster than they could move themselves, and older science fiction and space opera often portrays bigger and better versions of this kind of space conquering technologies: personal jet packs, cars that levitate (think Luke Skywalker's land speeder), or airplanes that function as spacecraft (his X-Wing). What is interesting to me here is that they serve as bigger and better versions of the older paradigm of space-conquering technologies, even if Luke remains in radio contact with the Rebel base. That is the older paradigm. The newer paradigm is technologies that make one's physical location irrelevant, or almost irrelevant: cell phones, texting, Facebook, and remote work, are all not bigger and better ways to move your body, but bigger and better ways to do things in a mind-based context where the location of your body may be collected as in Google Plus, but your actual, physical location is really neither here nor there.

decade ago. He said that email was good for being on top of the world, and what he wanted was to be at the bottom of the world and do research. In other words, he had certain goals, and he found that email was not a helpful luxury in reaching those goals. Knuth is also a (non-Orthodox) Christian.

## My own technology choices

I purchased a MacBook Pro laptop, and its specs are really impressive. Eight cores, eight gigabytes of RAM, a 1920x1200 17" display, and gracefully runs Ubuntu Linux, Windows XP, Windows 7, and Windows 8 as guest OS'es. And it is really obsolete in one respect: it doesn't have the hot new Retina display that has been migrated to newer MacBook Pros. I want to keep it for a long time; but my point in mentioning it here is that I did not purchase it as the hot, coolest new thing, but as a last hurrah of an old guard. The top two applications I use are Google Chrome and the Mac's Unix terminal, and the old-fashioned laptop lets me take advantage of the full power of the Unix command line, and lets me exercise root privilege without voiding the warranty. For a Unix wizard, that's a lot of power. And the one major thing which I did not "upgrade" was replacing the old-fashioned spindle drives with newer, faster solid state drives. The reason? Old-fashioned spindle drives can potentially work indefinitely, while spindle drives wear out after a certain number of times saving data: saving data slowly uses the drive up. And I realized this might be my only opportunity in a while to purchase a tool I want to use for a long while.

Laptops might continue to be around for a while, and desktops for that matter, but their place is a bit like landline phones. If

you have a desk job, you will probably have a desktop computer and a landline, but the wave of the future is smartphones and tablets; the hot, coolest new thing is not a bulky, heavy MacBook, but whatever the current generation of iPad or Android-based tablet is. One youngster said, "Email is for old people," and perhaps the same is to be said of laptops.

I also have an iPhone, which I upgraded from one of the original iPhones to an iPhone 4, not because I needed to have the latest new thing, but because my iPhone was necessarily on an AT&T contract, and however much they may advertise that the EDGE network my iPhone was on was "twice the speed of dialup," I found when jobhunting that a simple, short "thank you" letter after an interview took amazingly many minutes for my phone to send, at well below the speed of obsolete dial-up speeds I had growing up: AT&T throttled the bandwidth to an incredibly slow rate and I got a newer iPhone with Verizon which I want to hold on to, even though there is a newer and hotter model available. But I am making conscious adult decisions about using the iPhone: I have sent perhaps a dozen texts, and have not used the iPod functionality. I use it, but I draw lines. My point is not exactly that you should adopt the exact same conscious adult decisions as I do about how to use a smartphone, but that you make a conscious adult decision in the first place.

And lastly, I have another piece of older technology: a [SwissChamp XLT](#), the smallest Swiss Army Knife that includes all the functionality of a [SwissChamp](#) while also having the functionality of a [Cybertool](#). It has, in order, a large blade, small blade, metal saw, nail file, metal file, custom metal-cutting blade, wood saw, fish scaler, ruler in centimeters and inches, hook remover, scissors, hooked blade, straight blade with concave curved mini-blade, pharmacist's spatula, cybertool (Phillips

screwdrivers in three sizes, Torx screwdrivers in three sizes, hexagonal bit, and a slotted screwdriver), pliers, magnifying glass, larger Phillips screwdriver, large slotted screwdriver, can opener, wire stripper, small slotted screwdriver, can opener, corkscrew, jeweller's screwdriver, pin, wood chisel, hook, smaller slotted screwdriver, and reamer. It's somewhat smaller than two iPhones stacked on top of each other, and while it's wider than I like, it is also something of a last hurrah. It is a useful piece of older technology.

I mention these technologies not to sanction what may or may not be owned—I tried to get as good a computer as I could partly because I am an IT professional, and I am quite grateful that my employer let me use it for the present contract. I also drive a white 2001 Saturn, whose front now looks a bit ugly after cosmetic damage. I could get it fixed fairly easily, but it hasn't yet been a priority. (But this car has also transported the Kursk Root icon.) But with this as with other technologies, I haven't laid the reins on the horse's neck. I only use a well-chosen fragment of my iPhone's capabilities, and I try not to use it too much: I like to be able to use the web without speed being much of an issue, but I'm not on the web all the time. And I have never thought "My wheels are my freedom;" I try to drive insofar as it advances some particular goal.

And there are some things when I'm not aware of the brands too much. I don't really know what brands my clothing are, with one exception, Hanes, which I am aware of predominantly because the brand name is sewed in large, hard-to-miss letters at the top.

And I observe that technologies are becoming increasingly "capture-proof". Put simply, all technologies can be taken away from us physically, but technologies are increasingly becoming

something that FEMA can shut off from far away in a heartbeat. All network functionality on smartphones and tablets are at the mercy of network providers and whoever has control over them; more broadly, "The network is the computer," as Sun announced slightly prematurely in its introduction of Java; my own Unix-centric use of my Mac on train rides, without having or wanting it to have internet access during the train ride, may not be much more than a historical curiosity.

But the principle of fasting from technology is fine, and if we can abstain from foods on certain days, we can also abstain from or limit technologies on certain days. Furthermore, there is real merit in knowing how to use older technologies. GPS devices can fail to pick up a signal. A trucker's atlas works fine even if there's no GPS signal available.

## The point of this soliloquoy

The reason I am writing this up is that I am not aware of too many works on how to use technology ascetically. St. Paul wrote, [There is great gain in godliness with contentment; for we brought nothing into the world, and we cannot take anything out of the world; but if we have food and clothing, with these we shall be content.](#) This statement of necessities does not include shelter, let alone "a rising standard of living" (meaning more things that one uses). Perhaps it is OK to have a car; it is what is called "socially mandated", meaning that there are many who one cannot buy groceries or get to their jobs without a car. Perhaps a best rule of thumb here is, to repeat another author, "Hang the fashions. Buy only what you need." It is a measure by which I have real failings. And don't ask, "Can we afford what we need?", but "Do we need what we can afford?" If we only purchase things that have real ascetical justification, there's something better than investing for the left-over money: we can give to the poor as an offering to Christ. [Christ will receive our offering as a loan.](#)

Some years ago I wanted to write *The Luddite's Guide to Technology*, and stopped because I realized I wasn't writing anything good or worthy of the title. But the attitude of the Church Fathers given the technology of the day: monasticism

renounces all property, and the faithful are called to renounce property in their hearts even if they have possessions. Monastic literature warns the monk of seeking out old company, where "old company" does not mean enticement to sexual sin exactly, but one's very own kin. The solitary and coenobetic alike cut ties to an outside world, even ties one would think were sacrosanct (and the Bible has much to say about caring for one's elders). If a monk's desire to see his father or brother is considered a temptation to sin that will dissipate monastic energy, what do we have to make of social media? The friendships that are formed are of a different character from face-to-face relationships. If monks are forbidden to return to their own kin as shining example, in what light do we see texting, email, IM's, and discussion forums? If monks are forbidden to look at women's faces for fear of sexual temptation, what do we make of an internet where the greatest assault on manhood, porn, comes out to seek you even if you avoid it? It's a bit like a store that sells food, household supplies, and cocaine: and did I mention that the people driving you to sample a little bit of cocaine are much pushier than those offering a biscuit and dip sample?

The modern Athonite tradition at least has Luddite leanings; Athos warns against national identification numbers and possibly computers, and one saint wrote apocalyptically about people eating eight times as much as people used to eat (has anyone read [The Supersizing of America?](#)) and of "wisdom" being found that would allow people to swim like fish deep into the sea (we have two technologies that can do that: SCUBA gear and submarines), and let one person speak and be heard on the other side of the world (how many technologies do we have to do that? Quite a lot).

All of this is to say that Orthodoxy has room to handle

technologies carefully, and I would suggest that not all technologies are created equal.

## The Luddite's Guide to Technology

For the different technologies presented my goal is not exactly to point to a course of action as to suggest a conscious adult decision to make, perhaps after consulting with one's priest or spiritual father. And as is usual in Orthodoxy, the temptation at least for converts is to try to do way too much, too fast, at first, and then backslide when that doesn't work.

It is better to keep on stretching yourself a little.

Sometimes, perhaps most of the time, using technology in an ascetical way will be countercultural and constitute outlier usage.

[A](#) [B](#) [C](#) [D](#) [E](#) [F](#) [G](#) [H](#) [I](#) [J](#) [K](#) [L](#) [M](#) [N](#) [O](#) [P](#) [Q](#) [R](#)  
[S](#) [T](#) [U](#) [V](#) [W](#) [X](#) [Y](#) [Z](#)

### Advertising

Advertising is kin to manipulation, propaganda, and pornography.

Advertising answers the question, "Was economic wealth made for man, or man for economic wealth?" by decisively saying, "Man was made for economic wealth." It leads people to buy things that are not in their best interest. If you see someone using a technology as part of a [form of life](#) that is unhelpful, the kind of thing that makes you glad to be a

Luddite, you have advertising to thank for that.

Advertising stirs discontent, which is already a problem, and leads people to ever higher desires, much like the trap of pornography. The sin is covetousness and lust, but the core structure is the same. Advertising and pornography are closely related kin.

Advertising doesn't really sell product functionality; it sells a mystique. And we may have legitimate reason to buy the product, but not the mystique. And maybe back off on a useful purchase until we are really buying the product and not the mystique.

### Alcohol

Alcohol is not exactly a new technology, although people have found ways of making stronger and stronger drinks as time goes on. However, there is a lesson to learn with alcohol that applies to technology.

One article read outlined a few positions on Christian use of alcohol, ending with a position that said, in essence, "Using alcohol appropriately is a spiritual challenge and there is more productive spiritual work in drinking responsibly than just not drinking." I don't think the authors would have imposed this position on people who know they have particular dangers in using alcohol, but they took a sympathetic look at positions of Christians who don't drink, and then said "The best course of all is not from trying to cut off the danger by not drinking, but rising to the spiritual lesson."

Yet an assumption behind all of the positions presented is that alcohol is something where you cannot safely lay the reins on the horse's neck. You need to be in command, or to put it differently ceaselessly domineer alcohol if you use it.

This domineering is easy for some people and harder for others, and some people may be wisest to avoid the challenge.

Something of the same need exists in our use of technology. We may use certain technologies or may not, but it is still a disaster to let the technology go wherever it wills. Sometimes and with some technologies, we may abstain. Other technologies we may domineer, even if we may find if we are faithful that "my yoke is easy and my burden is light:" establishing dominion and holding the reins may be easier when it becomes a habit. But the question with a technology we use is not, "May we use it as much as we want, or not at all?", any more than the question about wine would be, "May we use it as much as we want, or not at all?" Proper use is disciplined. Proper use is domineering. And we do not always have it spelled out what is like having one or two drinks a day, and what is like having five or ten. Nor do we have other rules of thumb spelled out, like, "Think carefully about drinking when you have a bad mood, and don't drink in order to fix a bad mood."

The descriptions of various "technologies and other things" are meant to provide some sense of what the contours of technologies are, and what is like drinking one or two drinks, and what is like drinking five or ten drinks a day.

#### Anti-aging medicine

The Christian teaching is that life begins at conception and ends at natural death, and not that life begins at 18 and ends at 30.

The saddest moment in [The Chronicles of Narnia](#) comes when we hear that Her Majesty Queen Susan the Gentle is "no longer a friend of Narnia;" she is rushing as quickly as

possible to the silliest age of her life, and will spend the rest of her life trying to remain at that age, which besides being absolutely impossible, is absolutely undesirable.

Quite a lot of us are afflicted by the Queen Susan syndrome, but there is a shift in anti-aging medicine and hormone replacement therapy. Part of the shift in [assistive technologies](#) discussed below is that assistive technologies are not just intended to do what a non-disabled person can do, so for instance a reader can read a page of a book, giving visually impaired people equivalent access to a what a sighted person could have, to pushing as far what they think is an improvement, so that scanning a barcode may not just pull up identification of the product bearing the barcode, but have [augmented reality](#) features of pulling a webpage that says much more than what a sighted person could see on the tab.

One of the big tools of anti-aging medicine is hormone replacement therapy, with ads showing a grey-haired man doing pushups with a caption of, "My only regret about hormone replacement therapy is that I didn't start it sooner," where the goal is not to restore functionality but improve it as much as possible. And the definition of improvement may be infantile; here it appears to mean that a man who might be a member of the AARP has the same hormone levels as he did when he was 17.

There was one professor I had who was covering French philosophy, discussed Utopian dreams like turning the seas to lemonade, and called these ideas "a Utopia of spoiled children." Anti-aging medicine is not about having people better fulfill the God-ordained role of an elder, but be a virtual youth. Now I have used [nutriceuticals](#) to bring more energy and be able to create things where before I was not,

and perhaps that is like anti-aging medicine that has me holding on to youthful creativity when God summons me to go [Further up and further in!](#) But everything I know about anti-aging is that it is not about helping people function gracefully in the role of an elder, but about making any things about aging optional.

In my self-absorbed [Seven-Sided Gem](#), I talked about one cover to the AARP's magazine, then called My Generation, which I originally mistook for something GenX. In the AARP's official magazine as I have seen it, the [marketing proposition](#) is the good news, not that it is not that bad to be old, but it is not that old to be old. The women portrayed look maybe GenX in age, and on the cover I pulled out, the person portrayed, in haircut, clothing, and posture, looked like a teenager. "Fifty and better people" may see political and other advice telling them what they can do to fight high prescription prices, but nothing I have seen gives the impression that they can give to their community, as elders, out of a life's wealth of experience.

Not that there are not proper elders out there. I visited a family as they celebrated their son's graduation, and had long conversations with my friend's mother, and with an elderly gentleman (I've forgotten how he was related). She wanted to hear all about what I had to say about subjects that were of mutual interest, and he talked about the wealth of stories he had as a sailor and veterinarian. In both cases I had the subtle sense of a younger person being handled masterfully by an elder, and [the conversation was unequal](#)—unequal but entirely fitting, and part of the "entirely fitting" was that neither of them was trying to say, "We are equal—I might as well be as young as you."

Anti-aging medicine is not about aging well, but trying to be a virtual young person when one should be doing the serious, weight, and profoundly important function as elders.

### Assistive technologies

This, at least, will seem politically incorrect: unless they have an inordinate monetary or moral cost, assistive technologies allow disabled people to function at a much higher level than otherwise. And I am not going to exactly say that people with disabilities who have access to assistive technologies should turn them down, but I am going to say that there is something I am wary of in the case of assistive technologies.

There is the same question as with other technologies: "Is this really necessary? Does this help?" A blind friend said,

I was recently interviewed for a student's project about assistive technology and shopping, and I told her that I wouldn't use it in many circumstances. First of all, I think some of what is available has more 'new toy' appeal and is linked to advertising. Secondly, I think some things, though they may be convenient, are dehumanising. Why use a barcode scanner thingummy to tell what's in a tin when I can ask someone and relate to someone?

Now to be clear, this friend does use assistive technologies and is at a high level of functioning: "to whom much is given, much is required." I get the impression that the assistive technologies she has concerns about, bleed into [augmented reality](#). And though she is absolutely willing to

use assistive technologies, particularly when they help her serve others, she is more than willing to ask as I am asking of many technologies, "What's the use? Does this help? Really help?"

But there is another, more disturbing question about assistive technologies. The question is not whether individual assistive technologies are helpful when used in individual ways, but whether a society that is always inventing higher standards for accessibility and assistive technology has its deepest priorities straight. And since I cannot answer that out of what my friend has said, let me explain and talk about the Saint and the Activist and then talk about how similar things have played out in my own life.

I write this without regrets about my own efforts and money spent in creating assistive technologies, and with the knowledge that in societies without assistive technologies many disabled people have no secular success. There are notable examples of disabled people functioning at a high level of secular success, such as the noted French Cabalist Isaac the Blind, but the much more common case was for blind people to be beggars. The blind people met by Christ in the Gospel were without exception beggars. And there are blind beggars in first world countries today.

So what objection would I have to assistive technologies which, if they may not be able to create sight, none the less make the hurdles much smaller and less significant. So, perhaps, medicine cannot allow some patients to read a paper book. Assistive technologies make a way for them to access the book about as well as if they could see the book with their eyes. What is there to object in making disabled people more able to function in society as equal

contributors?

The answer boils down to the distinction between the Saint and the Activist as I have discussed them in [An Open Letter to Catholics on Orthodoxy and Ecumenism](#) and [The Most Politically Incorrect Sermon in History: A Commentary on the Sermon on the Mount](#). The society that is patterned after the Saint is ordered towards such things as faith and contemplation. The society patterned after the Activist is the one that seeks to ensure the maximum secular success of its members. And if the Activist says, "Isn't it wonderful how much progress we have made? Many disabled people are functioning at a high level!", the Saint says, "There are more things in Heaven and earth than are dreamed of in your Activism. We have bigger fish to fry." And they do.

Now to be clear, I am not saying that you should not use assistive technologies to help give back to society. Nor do I regret any of the time I've spent on assistive technologies.

The first idea I wanted to patent was an assistive technology. But we have bigger fish to fry.

There is a way in which I am a little like the blind beggar in many societies that took the Saint for their pattern. It's on a much lesser scale, but I tried my hardest to earn a Ph.D. in theology. At Cambridge University in England the faculty made me switch thesis topic completely, from a topic I had set at the beginning of the year, when two thirds of the year had passed and I had spent most of my time on my thesis. My grades were two points out of a hundred less than the cutoff for Ph.D. continuation, and Cambridge very clearly refused for me to continue beyond my master's. So then I applied to other programs, and Fordham offered an assistantship, and I honestly found cancer easier than some

of the things that went wrong there. I showed a writeup to one friend and he wrote, "I already knew all the things you had written up, and I was still shocked when I read it." All of which to say is that the goal I had of earning a doctorate, and using that degree to teach at a seminary, seemed shattered. With all that happened, the door to earning a Ph.D. was decisively closed.

Now I know that it is possible to teach at a seminary on a master's; it may be a handicap, but it certainly does not make such a goal impossible. But more broadly God's hand was at work. For starters, I survived. I believe that a doctor would look at what happened and say, "There were a couple of places where what happened could have killed you. Be glad you're alive." And beyond that, there is something of God's stern mercy: academic writing takes a lot more work than being easy to read, and only a few people can easily read it. I still have lessons to learn about work that is easy to read, and this piece may be the least readable thing I've written in a while. But all the same, there is a severe mercy in what God has given. I have a successful website largely due to chance, or rather God's providence; I was in the right place at the right time and for all my skill in web work happened to have successes I had no right to expect.

And God works through assistive technologies and medicine. When I was in middle school, I had an ankle that got sorer and sorer until my parents went to ask a doctor if hospitalization was justified. The doctor's response, after taking a sample of the infection, said, "Don't swing by home; go straight to the hospital and I'll take care of the paperwork on this end for his admission." And I was hospitalized for a week or so—the bed rest day and night

being the first time ever that I managed to get bored teaching myself from my father's calculus textbook—and after I was discharged I still needed antibiotic injections every four hours. That involved medical treatment is just as activist as assistive technology, and without it I would not have written any the pieces on this website besides the Apple ][ BASIC [four dimensional maze](#).

I am rather glad to be alive now.

So I am in a sense both a ~~Ph.D.~~ person who was lost on Activist terms, but met with something fitting on a Saint's terms, and a person who was found on Activist terms. God works both ways. But still, there are more things in Heaven and earth than are dreamed of in Activism.

### Augmented Reality

When I was working at the National Center for Supercomputing Applications, one part of the introduction I received to the CAVE and Infinity Wall virtual reality was to say that virtual reality "is a superset of reality," where you could put a screen in front of a wall and see, X-ray-style, wires and other things inside the wall.

Virtual reality does exist, and is popularized by [Second Life](#) among many others, but that may not be the main niche carved out. The initial thought was virtual reality, and when the dust has started to settle, the niche carved out is more a matter of augmented reality. Augmented reality includes, on a more humble level, GPS devices and iPhone apps that let you scan a barcode or QR code and pull up web information on the product you have scanned. But these are not the full extent of augmented reality; it's just an early installment.

It is an opportunity to have more and more of our experience rewritten by computers and technology.

Augmented technology is probably best taken at a lower dose and domineered.

### Big Brother

Big Brother is a collection of technologies, but not a collection of technologies you choose because they will deliver a Big Brother who is watching you. Everything we do electronically is being monitored; for the moment the U.S. government is only using it for squeaky-clean apparent uses, and has been hiding its use. Even the Amish now are being monitored; they have decided not to hook up to a grid, such as electricity or landline phones, but cell phones can be used if they find them expedient to their series of conscious decisions about whether to adopt technologies. Amish use the horse and buggy but not the car, not because the horse is older, but because the horse and buggy provide some limited mobility without tearing apart the local community. The car is rejected not because it is newer, but because it frees people from the tightly bound community they have. And because they carry cell phones, the NSA tracks where they go. They might not do anything about it, but almost everything about us is in control of Big Brother. And though I know at least one person who has decided carrying a cell phone and having an iPass transponder is not worth being tracked, you have to be more Luddite than the Luddites, and know enough of what you are doing that you are already on file, if you are to escape observation.

Big Brother has been introduced step by step, bit by bit. First there were rumors that the NSA was recording all Internet traffic. Then it came out in the open that the NSA was indeed recording all Internet traffic and other electronic communications, and perhaps (as portrayed on one

TV program) we should feel sorry for the poor NSA which has to deal with all this data. That's not the end. Now Big Brother is officially mainly about national security, but this is not an outer limit either. Big Brother will probably appear a godsend in dealing with local crime before an open hand manipulating the common citizen appears. But Big Brother is here already, and Big Brother is growing.

#### Books and ebooks

I was speaking with one friend who said in reference to Harry Potter that the Harry Potter series got people to read, and anything that gets people to read is good. My response (a tacit response, not a spoken one) is that reading is not in and of itself good. If computers are to be used in an ascetically discriminating fashion, so is the library; if you will recall my earlier writing about slightly inappropriate things at Cambridge and worse at Fordham, every single person I had trouble with was someone who read a lot, and presumably read much more than someone caught up in Harry Potter mania.

Orthodoxy is at heart an oral, or oral-like culture, and while it uses books, it was extremely pejorative when one friend said of a Protestant priest in Orthodox clothes, "I know what book he got that [pastoral practice] from." The first degree of priesthood is called a 'Reader', and when one is tonsured a Reader, the bishop urges the Reader to read the Scriptures. The assumption is not that the laity should be reading but need not read the Scriptures, but that the laity can be doing the job of laity without being literate. Or something like that. Even where there is reading, the transmission of the most important things is oral in character, and the shaping of the laity (and presumably

clergy) is through the transmission of oral tradition through oral means. In that sense, I as an author stand of something exceptional among Orthodox, and "exceptional" does not mean "exceptionally good." Most of the Orthodox authors now came to Orthodoxy from the West, and their output may well be appropriate and a fitting offering from what they have. However, the natural, consistent result of formation in Orthodoxy does not usually make a non-author into an author.

As far as books versus ebooks, books (meaning codices) are a technology, albeit a technology that has been around for a long time and will not likely disappear. Ebooks in particular have [a long tail effect](#). The barriers to put an ebook out are much more than to put a traditional book out.

It has been said that ebooks are killing Mom and Pop bookstores, and perhaps it is worth taking opportunities to patronize local businesses. But there is another consideration in regards to books versus cheaper Kindle editions. The Kindle may be tiny in comparison to what it holds, and far more convenient than traditional books.

But it is much more [capture proof](#).

"Capture proof"

In military history, the term "capture proof" refers to a weapon that is delicate and exacting in its maintenance needs, so that if it is captured by the enemy, it will rather quickly become useless in enemy soldier's hands.

The principle can be transposed to technology, except that possessing this kind of "capture proof" technology does not mean that it is an advantage that "we" can use against "them." It comes much closer to say that FEMA can shut down its usefulness at the flick of a switch. As time has

passed, hot technologies become increasingly delicate and capture proof: a laptop is clunkier than a cool tablet, but the list of things one can do with a tablet without network access is much shorter than the list of things can do with a laptop without network access. Or, to take the example of financial instruments, the movement has been towards more and more abstract derivatives, and these are fragile compared to an investment in an indexed mutual fund, which is in turn fragile compared to old-fashioned money.

"Cool," "fragile," and "capture proof" are intricately woven into each other.

Einstein said, "I do not know what weapons World War III will be fought with, but World War IV will be fought with sticks and stones." We might not have to wait until World War IV. Much of World War III may be fought with sticks and stones.

### Cars

Perhaps the most striking Luddite horror of cars that I have seen is in C.S. Lewis. He talked about how they were called "space-conquering devices," while they should have been called "space-annihilating devices," because he experienced [future shock](#) that cars could make long distances very close. (And someone has said, "The problem with the English is that they think a hundred miles is a long distance, and the problem with the U.S. is that they think a hundred years is a long time.") The "compromise solution" he offered was that it was OK to use cars to go further as a special solution on weekend, but go with other modes of transport for the bread-and-butter of weekdays. (And this is more or less how Europeans lean.)

Cars are one of many technologies that, when introduced,

caused [future shock](#). It's taken as normal by subsequent generations, but there is a real sense of "This new technology is depriving us of something basically human," and that pattern repeats. And perhaps, in a sense, this shock is the pain we experience as we are being lessened by degrees and slowly turning from man to machine-dominated.

#### CFLs and incandescent bulbs

There is something striking about CFL's. American society has a long history of technology migrations, and a thorough enough "out with the old, in with the new" that working 16mm film projectors, for instance, now fetch a price because we have so thoroughly gotten rid of them in favor of video. And people who use them now aren't using them as the normal way to see video; they may want to see old film canisters and maybe even digitize them (so they can be seen without the use of a film projector).

Compare with other countries such as Lebanon which have no real concept of being obsolete; they have a mix of old and new technologies and they get rid of an old piece of technology, not because it is old, but because it is worn out.

The fact that we are transitioning to CFL's for most purposes is not striking; transitions happen all the time. One could trace "If you have a phone, it's a landline," to "You can have a two pound car phone, but it's expensive," to "You can have a cell phone that fits in your hand, but it's expensive," to "You can have a cell phone, which is much cheaper now," to "You can have a cell phone that does really painful Internet access," to "You can have a cell phone with graceful Internet access." And there have been many successions like this, all because the adopters thought the new technology was an improvement on the old.

CFL's are striking and disturbing because, while there may be a few people who think that slightly reduced electricity usage (much smaller than a major household appliance) justifies the public handling fragile mercury containers, by and large the adoption is not of a snazzier successor to incandescent bulbs. Not only must they be handled like live grenades, but the light is inferior. The human race grew up on full-spectrum light, such as the sun provides. Edison may not have been aiming for a full-spectrum light, but his light bulb does provide light across the spectrum; that is an effect of an incandescent light that produces light that looks at all near. This is a strange technology migration, and a rather ominous omen.

Given that most bulbs available now are CFL's, there are better and worse choices. Some bulbs have been made with a filter outside the glass so they give off light that looks yellow rather than blue. I wouldn't look for that in and of itself. But some give a full spectrum, even if it is a bluish full spectrum, and that is better. There are also lights sold that are slightly more shatter resistant, which is commendable, and there are some bulbs that are both full spectrum and shatter resistant. I'd buy the last kind if possible, or else a full spectrum CFL, at a hardware store if possible and online if not.

But I would momentarily like to turn attention from the extinction of regular use of incandescent bulbs to their introduction. Candles have been used since time immemorial, but they're not a dimmer version of a light bulb. Even if you have candlesticks and candles lit, the candle is something of a snooze button or a minor concession: societies that used candles still had people active more or less during daylight

hours. (Daylight Saving Time was an attempt to enable people to use productive daylight hours which they were effectively losing.) People who used candles were still effectively tied to the cycle of day and night. Light bulbs caused a shock because they let you operate as early or as late as you wanted. Candles allowed you to wrap up a few loose ends when night had really fallen. Light bulbs made nighttime optional. And it caused people [future shock](#).

I have mentioned a couple of different responses to CFL's: the first is to buy full spectrum and preferably shatter resistant (and even then handle the mercury containers like a live grenade), the second is turning to the rhythm of day and light and getting sunlight where you can. Note that inside most buildings, even with windows, sunlight is not nearly as strong as what the human person optimally needs. Let me mention one other possibility.

There is a medical diagnosis called 'SAD' for 'Seasonal Affective Disorder', whose patients have lower mood during the winter months when we see very little light. The diagnosis seems to me a bit like [the fad diagnosis of YTD, or Youthful Tendency Disorder, discussed in The Onion](#). If you read about it and are half-asleep it sounds like a description of a frightening syndrome. If you are awake you will recognize a description of perfectly normal human tendencies. And the SAD diagnosis of some degree of depression when one is consistently deprived of bright light sounds rather normal to me. And for that reason I think that some of the best lighting you can get is with something from the same manufacturer of the [Sunbox DL SAD Light Box Light Therapy Desk Lamp](#). That manufacturer is one I trust; I am a little wary of some of their cheaper

competitors. There is one cheaper alternative that provides LED light. Which brings me to a problem with LED's. Basically, LEDs emit light of a single color. While you can choose what that color may be, white represents a difficult balancing act. If you've purchased one of those LED flashlights, it has what is called "lunar white", which is basically a way of cheating at white light. (If you've ever gone to a dark closet and tried to pick out clothing by a lunar white flashlight, this may be why you had trouble telling what color your clothing was.) Expensive as they may be, [a Sunbox light box may fit in to your best shot at taking in a healthy level of light.](#)

#### Children's toys

Charles Baudelaire, in his "la Morale du Joujou" ("the moral of the toy") talks about toys and the fact that the best toys leave something to the imagination. Children at play will imagine that a bar of soap is a car; girls playing with dolls will play the same imagined drama with rag dolls as they will with dolls worth hundreds of dollars. There has been a shift, where Lego sets have shifted from providing raw material to being a specific model, made of specialized pieces, that the child is not supposed to imagine, only to assemble.

Lego sets are perhaps the preferred childhood toy of professional engineers everywhere; some of them may have patronized Lego's competitors, but the interesting thing about Legos that are not "you assemble it" models is that you have to supply something to what you're building. Lego the company might make pieces of different sizes and shapes and made them able to stick together without an adhesive; I wouldn't downplay that achievement on the part of the manufacturer, but the child playing with Legos

supplies half of the end result. But this is not just in assembly; with older models, the Legos didn't look exactly like what they were supposed to be. There was one time when I saw commercials for a miniature track where some kind of car or truck would transport a payload (a ball bearing, perhaps), until it came to a certain point and the payload fell through the car/track through a chute to a car below. And when I asked my parents to buy it for me and they refused, I built it out of Legos. Of course it did not look anything like what I was emulating, but I had several tracks on several levels and a boxy square of a vehicle would carry a marble along the track until it dropped its payload onto a car in the level below. With a bit of imagination it was a consolation for my parents not getting the (probably expensive) toy I had asked for, and with a bit of imagination a short broom is a horse you can ride, a taut cord with a sheet hung over it is an outdoor tent, and a shaky box assembled from sofa cushions is a fort. Not, perhaps, that children should be given no toys, or a square peg should be pounded into a round hole by giving everyone old-style Lego kits, but half of a children's toy normally resides in the imagination, and the present fashion in toys is to do all the imagining for the child.

And there is a second issue in what is imagined for children. I have not looked at toys recently, but from what I understand dragons and monsters are offered to them. I have looked rather deeply into what is offered to children for reading. The more innocuous part is bookstores clearing the classics section of the children's area for Disney Princess books. The more serious matter is with [Dealing with Dragons and other Unman's Tales.](#)

## The Cloud

Cloud computing is powerful, and it originated as a power tool in supercomputing, and has now come down to personal use in software like [Evernote](#), a note-taking software system that synchronizes across all computers and devices which have it installed.

Essentially, besides being powerful, cloud computing, besides being very powerful, is one more step in abstraction in the world of computing. It means that you use computers you have never even seen. Not that this is new; it is a rare use case for someone using the Web to own any of the servers for the sites he is visiting. But none the less the older pattern is for people to have their own computers, with programs they have downloaded and/or purchased, and their own documents. The present trend to offload more and more of our work to the cloud is a step in the direction of vulnerability to [the damned backswing](#). The more stuff you have in the cloud, the more of your computer investment can be taken away at the flick of a switch, or collapse because some intervening piece of the puzzle has failed. Not that computers are self-sufficient, but the move to the cloud is a way of being less self-sufficient.

[My website](#) is hosted on a cloud virtual private server, with one or two "hot spares" that I have direct physical access to. There are some reasons the physical machine, which has been flaky for far longer than a computer should be allowed to be flaky (and which keeps not getting fixed), is one I keep as a hot spare.

## Contraception and Splenda

There was one mostly Catholic where I was getting annoyed at the degree of attention given to one particular

topic: I wrote,

Number of posts in this past month about faith: 6  
Number of posts in this past month about the Bible:

8

Number of posts in this past month about the  
Eucharist: 9

Number of posts in this past month extolling the  
many wonders of Natural Family Planning: 13

The Catholic Church's teaching on Natural Family Planning is not, "Natural Family Planning, done correctly, is a 97% effective way to simulate contraception." The Catholic Church's teaching on children is that they are the crown and glory of sexual love, and way down on page 509 there is a footnote saying that Natural Family Planning can be permissible under certain circumstances.

And if I had known it, I would have used a quotation from Augustine I cited in [Contraception, Orthodoxy, and Spin Doctoring: A Look at an Influential but Disturbing Article](#):

Is it not you who used to counsel us to observe as much as possible the time when a woman, after her purification, is most likely to conceive, and to abstain from cohabitation at that time, lest the soul should be entangled in flesh? This proves that you approve of having a wife, not for the procreation of children, but for the gratification of passion. In marriage, as the marriage law declares, the man and woman come together for the procreation of children. Therefore whoever makes the procreation of children a greater sin than copulation, forbids marriage, and makes the woman

not a wife, but a mistress, who for some gifts presented to her is joined to the man to gratify his passion. Where there is a wife there must be marriage. But there is no marriage where motherhood is not in view; therefore neither is there a wife. In this way you forbid marriage. Nor can you defend yourselves successfully from this charge, long ago brought against you prophetically by the Holy Spirit ([source](#); the Blessed Augustine is referring to [I Tim 4:1-3](#)).

Thus spoke the Catholic Church's favorite ancient theologian on contraception; and to this it may be added that the term 'Natural Family Planning' is deceptive and perhaps treacherous in how it frames things. There is nothing particularly natural about artificially abstaining from sexual intercourse precisely when a woman is capable of the greatest desire, pleasure, and response.

The chief good of the marriage act is that it brings in to being new images of God; "a baby is God's vote that the world should go on." The chief good of eating is that it nourishes the body. Now there are also pleasures, but it is an act of confusion to see them as pleasure delivery systems and an act of greater confusions to frustrate the greater purpose of sex or eating so that one may, as much as possible, use them just as pleasure delivery systems.

There are other strange effects of this approach: for starters, Splenda use correlates to increased weight gain. Perhaps this is not strange: if you teach someone, "You can eat as much candy and drink as many soft drinks as you like," the lesson is "You can consume more without worrying about your waistline," and you will consume more: not only more

foods containing Splenda, but more foods not containing Splenda.

There is an interesting history, as far as "Natural" Family Planning goes, about how in ancient times Church Fathers were skeptical at best of the appropriateness of sex during the infertile period, then people came to allow sex during the infertile period despite the fact that it was shooting blanks, and then the West came to a point where priests hearing confessions were to insinuate "Natural" Family Planning to couples who were using more perverse methods to have sex without children, and finally the adulation that can say that Natural Family Planning is the gateway to the culture of life.

Contraception and Splenda are twins, and with Splenda I include not only other artificial sweeteners, but so-called "natural" sweeteners like Agave and Stevia which happen not to be manufactured in a chemical factory, but whose entire use is to do Splenda's job of adding sweetness without calories. What exists in the case of contraception and Splenda alike is neutralizing a greater good in order to have as much of the pleasure associated with that good as possible. It says that the primary purpose of food and sex, important enough to justify neutralizing other effects as a detriment to focusing on the pleasure, is to be a pleasure delivery system.

About pleasure delivery systems, I would refer you to:

### [The Pleasure-Pain Syndrome](#)

The dialectic between pleasure and pain is a recurrent theme among the Fathers and it is something of a philosophical error to pursue pleasure and hope that no pain

will come. If you want to see real discontent with one's sexual experiences, look for those who are using Viagra and its kin to try to find the ultimate sexual thrill. What they will find is that sex becomes a disappointment: first sex without drugged enhancement becomes underwhelming, and then Viagra or Cialis fail to deliver the evanescent ultimate sexual thrill.

### The damned backswing

There is a phenomenon where something appears to offer great improvements, but it has a damned backswing. For one example in economics, in the 1950's the U.S. had an unprecedentedly high standard of living (meaning more appliances in houses—not really the best measure of living), and for decades it just seemed like, [It's Getting Better All the Time](#). But now the U.S. economy is being destroyed, and even with another regime, we would still have all the debts we incurred making things better all the time.

Another instance of the damned backswing is how medieval belief in the rationality of God gave rise to the heroic labors of science under the belief that a rational God would create a rational and ordered world, which gave way to modernism and positivism which might as well have put science on steroids, which in turn is giving way to a postmodernism and subjectivism that, even as some of it arose from the philosophy of science, is fundamentally toxic to objectivist science.

[I invite you to read more about the damned backswing.](#)

### Email, texting, and IM's

"Email is for old people," one youngster said, and email is largely the wave of the past. Like landlines and desktop computers, it will probably not disappear completely; it will

probably remain the communication channel of corporate notifications and organizational official remarks. But social communication via email is the wave of the past: an article in [A List Apart](#) said that the website had originated as a mailing list, and added, "Kids, go ask your parents." When texting first caught on it was neither on the iPhone nor the Droid. If you wanted to say, "hello", you would probably have to key in, "443355555666". But even then texting was a sticky technology, and so far it is the only common technology I know of that is illegal to use when driving. It draws attention in a dangerous way and is treated like alcohol in terms of something that can impair driving. It is a strong technological drug.

The [marketing proposition](#) of texting is [an intravenous drip of noise](#). IM's are similar, if not always as mobile as cell phones, and email is a weaker form of the drug that youth are abandoning for a stronger version. Now, it should also be said that they are useful, and the proper ascetical use is to take advantage of them because they are useful (or not; I have a phone plan without texting and I text rarely enough that the default \$.20 per text makes sense and is probably cheaper than the basic plan.

Fasting and fasting from technologies

[And when the woman saw that the tree was good for food, and that it was pleasant to the eyes, and a tree to be desired to make one wise, she took of the fruit thereof, and did eat, and gave also unto her husband with her; and he did eat.](#)

The healing of this comes in partly by eating, in the Holy

Mysteries where we eat from the Tree of Life. But this is no imitation of Eve's sin, or Adam's. They lived in the garden of paradise, and there is no record of them fasting before taking from the Tree of the Knowledge of Good and Evil. Before we take communion, we answer the question "Where are you?", the question in which God invited Adam and Eve to come clean and expose their wound to the Healer, and we prepare for confession and answer the question Adam and Eve dodged: "Where are you?" We do not live in a garden of delights, but our own surroundings, and we turn away from sensual pleasures. Adam and Eve hid from God; we pray to him and do not stop praying because of our own sordid unworthiness. And, having prepared, we eat from the Tree of Life.

[You shall not surely die.](#) and [Your eyes shall be opened,](#) [and you shall be as gods.](#) are some of the oldest [marketing propositions](#), but they are remarkably alive in the realm of technology. [Witness the triumph of hope over experience in the artificial intelligence project.](#) Witness a society like the meticulously groomed technology of a Buddha who saw an old man, a sick man, and a dead man, and wondered whatever on earth they can mean. Mortality may be as total in our generation as any other, but we've done a good job of hiding it. Perhaps doctors might feel inadequate in the face of real suffering, but modern medicine can do a lot. In many areas of the third world, it might be painful, but it is not surprising to play with a child who was doing well two weeks ago and be told that he is dead. Death is not something one expects in homes; it is out of sight and half out of mind in hospitals and hospices. All of this is to say that those of us in the first world have a death-denying society, and if we

have not ultimately falsified "You will surely die," we've done a pretty good job of being in denial about it. And "You shall be as gods" is the marketing proposition of luxury cars, computers, smartphones, and ten thousand other propositions. My aunt on discovering Facebook said, "It feels like I am walking on water," and Facebook offers at least a tacit [marketing proposition](#) of, "You shall be as gods." Information technology in general, and particularly the more "sexy" forms of information technology, offer the [marketing proposition](#) of, [Your eyes shall be opened, and you shall be as gods.](#)

There was one time as an undergraduate when I tried to see what it would be like to live as blind for a day, and so I was blindfolded and had a fascinating day which I wrote up for my psychology class. Now I would be careful in saying based on one day's experience would let me understand the life experience of being blind, any more than a few days spent in Ontario entitle me to say that I understand Canadian culture. However, the experience was an interesting challenge, and it had something to do with fasting, even if it was more adventuresome than fasting normally is.

Fasting is first and foremost fasting from food, but there are other things one can fast from. Some Orthodox bid Facebook a temporary farewell for fasting seasons. On fasting days, we are bidden to cut back on sensory pleasures, which can mean cutting back on luxury technologies that give us pleasure.

I'm not sure how much fastiing from technologies should form a part of one's rule; it is commonplace to discuss with one's priest or spiritual father how one will keep one's fast,

and with what oikonomia if such is needed. But one of the rules of fasting is that one attempts a greater and greater challenge. Far from being a spiritual backwater, Lent is the central season of the Christian year. And so I will present twenty-three things you might do to fast from technology.

(Or might not.)

1. Sleep in a sleeping bag on the floor. (Monks mention sleeping on the floor as a discipline; the attenuated fast of sleeping on a sleeping bag on the floor may help.)
2. Leave your smartphone at home for a day.
3. Leave all consumer electronics at home for a day.
4. Only check for email, Facebook, etc. once every hour, instead of all the time.
5. Don't check your email; just write letters with a pen or [lead pencil](#).
6. Camp out in your back yard.
7. Read a book outside, using sunscreen if appropriate.
8. Organize some outdoor activity with your friends or family.
9. Don't use your computer or smartphone while you are preparing for the Eucharist.
10. Basic: If you have games and entertainment apps or application, don't play them when you are fasting.
11. Harder: If you have games and entertainment applications, delete them.
12. Basic: Spend an hour outside with a book or an ebook Kindle, doing nothing but read and observe the trees, the wind, and the grass growing. ([You are welcome to use my ebooks.](#))
13. Harder: Spend an hour outside, but not with a book, just observing the trees, the wind, and the grass growing.

14. Don't use your car for a week. It's OK to get rides, and it may be a pleasure speaking with your friends, but experience being, in part, dependent, and you may be surprised how some of your driving suddenly seems superfluous.
15. Shut off power for an hour. If you keep your fridge and freezer doors shut, you shouldn't lose food, and sometimes power loss has meant adventure.
16. Turn off your computer's network access but still see what you can do with it for a day. (The Luddite's Guide to Technology is written largely on a computer that doesn't have internet access for the majority of the time it is being used to write this.)
17. Especially if you have a beautiful screensaver, set your computer to just display a blank screen, and have a single color or otherwise dull wallpaper for a time, perhaps for a fasting season.
18. Switch your computer's resolution to 800x600 or the tiniest it can go. That will take away much of its status as a luxury.
19. Make a list of interesting things to do that do not involve a computer, tablet, or smartphone.
20. Do some of the vibrant things on the list that do not involve a computer, tablet, or smartphone.
21. Use computers or whatever other technologies, not for what you can get from them, but what you can give through them.
22. Bear a little more pain. If pain is bearable, don't take pain medication. If you can deal with a slightly warmer room in the summer, turn down the air conditioning. If you can deal with a slightly cooler room in the winter,

turn down the heat.

23.

**Visit a monastery.**

A monastery is not thought of in terms of being Luddite, but monasteries tend to be lower in level than technology, and a good monastery shows the vibrancy of life not centered about technology. And this suggestion is different.

All the other suggestions say, "I would suggest." The suggestion about the monastery says, "God has given."

**Food**

There is some ambiguity, or better yet a double meaning, when the New Testament uses the term "breaking bread." On one level, breaking bread means a shared meal around the table. On another, it means celebrating the Eucharist.

You can say that there is one sacrament, or that there are seven, or that there are a million sacraments. A great many things in life have a sacramental dimension, even if the man on the street would not consider these to be religious matters. There is something sacramental about friendship. And there is something sacramental about a meal around a table. Even if the sacramental character of a meal is vanishing.

Proverbs said, "[Better is a dinner of herbs where love is than a fatted ox and hatred with it.](#)" Today one may draw forth an implication: "Better is a dinner of really bad fast food than the most exquisite [Weston A. Price Foundation](#) meal where there is hatred."

However, there are ways that the sacramental character of meals is falling away. Many foods are not intended to be eaten around a table with family or friends: think of microwave dinners and the 100 calorie snack pack. Read

[Nourishing Traditions](#), which tells how far our industrial diet has diverged from meals that taste delicious precisely because they are nutritionally solid.

But besides the plastic-like foods of the industrial diet, there is another concern with munching or inhaling. The Holy Eucharist can legitimately be served, in an extreme case, with plastic-like foods. For that matter it is normal for it to be made with white flour, and white flour is high on the list of foods that should be limited. And it would be a mistake to insist on whole wheat flour because it is overall healthier. But with extreme exceptions such as grave illness, the Holy Mysteries are not to be consumed by oneself off in a corner.

They are part of the unhurried unfolding of the Divine Liturgy, which ideally unfolds rather naturally into the unhurried unfolding of a common meal.

Both eating snacks continually to always have the pleasure of the palate, and the solo meal that is inhaled so it can be crammed into an over-busy schedule, fall short of the (broadly) sacramental quality of a common meal around a table.

In Alaska there are many people but not so many priests, and therefore many parishes rarely celebrate the Divine Liturgy. And a bishop, giving advice, gave two pastoral directions to the faithful: first that they should pray together, and second that they should eat together.

Let us try harder to eat with others.

"Forms of life" (Wittgenstein)

I'm not Wittgenstein's biggest fan, and I wince when people speak of "after Wittgenstein." But his concept of "forms of life" is relevant here. A form of life is something that is structural to how people live, and normally tacit; a

professor was searching for an example of "forms of life" to give to the class, and after a couple of minutes of silence I said, "You are trying to do a difficult thing. You are trying to find something that is basically tacit and not consciously realized, but that people will recognize once it is pointed out.

I guess that you have thought of a few possibilities and rejected them because they fall around on one of those criteria." And he searched a bit more, and gave the example of, "It used to be that procreation was seen as necessary for human flourishing. Now people think that limiting procreation is seen as necessary for human flourishing."

Arguably a Luddite's Guide to Forms of Life would be more useful than The Luddite's Guide to Technology, but in the discussion of different technologies there is always a concern for what Wittgenstein would call forms of life. It is possible to turn on the television for 10 minutes a day for weather information, and that retains the same form of life as not using television at all. Watching television for hours a day is, and shapes, a distinct form of life. And in some sense the basic question addressed in this work is not, "What technologies are you using?" but "What forms of life do you have given your technology usage?"

### Future shock

Some people have said that Americans are in a constant state of "future shock," "future shock" being understood by analogy to "culture shock", which is a profoundly challenging state when you are in a culture that tramples assumptions you didn't know you had. Not all of future shock is in relation to technology, but much of it is.

We think of a "rising standard of living," meaning more unfamiliar possessions in many cases, and even if the

economy itself is not a rising standard of living now, we have accepted the train of new technology adoption as progress, but there has been something in us that says, "This is choking something human." And in a sense this has always been right, the older technologies as the new, for movies as much as [augmented reality](#).

One author said, "The future is here. It's just unevenly distributed."

### GPS

GPS is in general an example of something that has a double effect. Traditionally [advertising](#) in an overall effect helps people to covet what a company has to offer, and the behavior stimulated by the advertising is to advance the company's interest, even though the company never says "We are making this so that we will acquire more money or market share." As in [How to Win Friends and Influence People](#), the prime actor is attempting to pursue his or her own interests, while it is presented entirely as being to the advantage of the other party on the other party's terms.

Apple didn't just change the game by making the first smartphone done right, in which regard the iPhone is commonly considered more significant than the Macintosh. The company that invented and still sells the Macintosh has established something more important than owning a Macintosh: owning an iPhone or iPad, which unlike the Macintosh generate a steady subscription income stream. The price for my MacBook was 100% up front: now that I've made the one-time purchase, I do not have any further financial obligations that will filter to Apple. My iPhone, on the other hand, has a subscription and contract; part of my hefty baseline phone bill goes to Apple. And if I were to

purchase an iPad, I would have two subscriptions. (The main reason I have not seriously moved towards buying an iPad is not what I would pay up front; it is adding another subscription.)

The GPS also has a double effect. It is what science fiction writers called a "tracking device." Now it is a terrifically useful traffic advice; part of the marketing proposition offered for Sila on the iPhone 4 S is that it makes terrifically resourceful use of a GPS. ("I feel like a latte."—and it is the GPS that Sila uses to find nearby locations where one might find a latte.) On a more pedestrian level GPS for driving (or biking, or walking) has become so entrenched that people don't know what they'd do without it to reach unfamiliar locations. I have never heard someone question the utility of a GPS for this or other purposes, and I've heard of interesting-sounding hobbies like geocaching where you navigate to specified coordinates and then search out and find some hidden attraction in the area indicated by the GPS.

But for all of these things, GPSes, as well as cell phones in general, provide one more means for [Big Brother](#) (and possibly more than one [Big Brother](#)) to know exactly where you go, when you go there, what the patterns are, and other things where [Big Brother](#) will keep closer tabs on your whereabouts and activities than your spouse or parent. IBM published a book on "Why IBM for Big Data?" and made it very clear that [Big Brother](#) analysis of data isn't just for No Such Agency. It's also for the corporate world. One author told the seemingly attractive story of having made repeated negative posts on his FaceBook wall, slamming an airline after repeated problems, and the airline reached out to him

and gave him a service upgrade. This was presented in the most positive light, but it was very clear that business were being invited to use IBM's expertise to do Big Data [Big Brother](#) analysis on social networks.

Guns and modern weapons (for fantasy swords, see [Teleporters](#))

Let me give a perhaps controversial preamble before directly talking about weapons.

I have spoken both with NRA types and anti-gun advocates, and there is a telling difference. The anti-gun advocates point to hard-hitting, emotional news stories where a walking arsenal opens fire in a school and kills many people. The NRA types may briefly talk about selective truth-telling and mention an incident where someone walked into a church armed to kill a bear, and an off-duty security guard who was carrying a gun legally and with the explicit permission of church leadership, "stopped the crime." But that is something of a tit-for-tat sideline to the main NRA argument, which is to appeal to statistical studies that show that legal gun ownership does not increase crime.

I have a strong math background and I am usually wary of statistics. However, I find it very striking that anti-gun advocates have never in my experience appealed to statistics to show that legal gun ownership increases crime, but only give hard-hitting emotional images, while the bread-and-butter of NRA argument is an appeal to research and statistics. I've never personally investigated those statistics, but there is something suspicious and fishy when only one side of a debate seriously appeals to research and statistics.

With that preamble mentioned, learning to really use a

gun is a form of discipline and stillness, and I tried to capture it in the telescope scene in [Within the Steel Orb](#). Hunting can be a way to be close to your food, and I approve of hunting for meat but not hunting for taxidermy. However, [sacramental shopping](#) for weapons is as bad as any other [sacramental shopping](#). I would tentatively say that if you want skill with a weapon, and will train to the point that it becomes something of a spiritual discipline, then buying a weapon makes sense. If you want to buy a gun because all the cool guys in action-adventure movies have one, or you are not thinking of the work it takes to handle a gun safely and use it accurately, I would question the appropriateness of buying a gun.

(Owning a gun because that is part of your culture is one thing; buying a gun because they are glamorized in movies is another thing entirely.)

And that is without investigating the question of whether it is appropriate to use violence in the first place. St. George the soldier and the passion-bearers Ss. Boris and Gleb are both honored by the Church; yet the better path is the one set forth in the [Sermon on the Mount](#).

Heating and air conditioning

A college roommate commented that middle class Americans had basically as much creature comforts were available. Not that they can buy everything one would want; but there is a certain point beyond which money cannot purchase necessities, only luxuries, and then a certain point after that where money cannot purchase luxuries, only status symbols, and a point beyond that where money cannot purchase any more meaningful status symbols, only power. And middle class Americans may well not be able to purchase

every status symbol they want, but really there is not much more creature comfort that would come with ten times one's salary.

Heating and air conditioning are one such area, and monastics wear pretty much the same clothing in summer and winter. One Athonite monk talked about a story about how several Russian sailors made a fire and stood close, and still did not feel warm, while islanders who were barely clad stood some distance off and were wincing because of the heat. We lose some degree of spiritual strength if we insist on having cool buildings in the summer and warm buildings in the winter. Even just cutting back a bit, so that buildings are warm but not hot in the summer and cool but not cold in the winter would constitute a spiritual victory. Usually this sort of thing is argued for environmental reasons; I am not making the argument that the lowered utility usage is good for the environment but that the lowered utility usage is constructive and, in the old phrase, "builds character." Indoor tracks exist, but in the summer I see bicyclists and runners exercising hard in the summer. These people are not super-heroes, and exercising in the heat really does not seem to be much of a deterrent to getting one's artificially added exercise. The human body and spirit together are capable of a great deal more sturdiness, when instead of always seeking comfort we learn that we can function perfectly well after adjusting to discomfort. (And this is not just with heating and air conditioning; it is true with a lot of things.)

### Hospitality

There is an ancient code of hospitality that recently has been influenced by consumer culture. What commercial

marketing does, or at least did, to make a gesture of friendship and welcome was by offering a selection of choices carefully fitted to the demographics being targeted.

Starbucks not only established that you could market an experience that would command a much higher price than a bottomless cup of coffee at a regular diner; they sold not one coffee but many coffees. You had a broad selection of consumer choices. Starbucks was doubtlessly more successful than some frozen yoghurt places I visited in grad school, which offered something like fifty or more flavors and varieties of yoghurts and had staff who were mystified when customers said, "But I just want some frozen yoghurt!" As a nuance, Starbucks offers guidance and suggestions for the undecided—and a large number of choices for the decided.

And in light of the hospitality industry, hosts offer guests choices and sometimes mystify them by the offering: a guest, according to the older (unwritten) code, did not have the responsibility of choosing what would be offered.

Now perhaps I need to clarify, or maybe don't need to clarify, that if you have a severe peanut allergy and your host offers you a peanut butter and jelly sandwich, you are not duty bound to accept it. But even then, social graces come to play. I remembered one time, at a feast although not strictly a host/guest relationship, when I offered a friend a glass of port and he kindly reminded me that he was a recovering alcoholic. I apologized profusely, and he stopped me and said, "I appreciate the offer, I just can't drink it." So then I offered him something he could consume, and he took it and thanked me for it. Social graces apply.

But this is something of a footnote. There is a story of a

staretz or monastic spiritual father who was going with one of a monk's disciples, and they visited a monastery that was feasting with bread, and the elder and disciple both shared in that informal communion, and then the two of them resumed their journey. The disciple asked the master if he could drink water, and to his astonishment was told no. The master, in answering his question, said, "That was love's bread. But let us keep the fast." The Fathers are very clear: as one priest said, "Hospitality trumps fasting." And the assumption there is that fasting is important enough. This piece originated with the title, "Fasting from Technologies."

But hospitality is even more important.

The ancient rule of hospitality, although this is never thought of in these terms with today's understanding of authority, is that the host has a profound authority over the guest which the guest will obey, even to the point of trumping fasting. But this is not what we may think of as despotism: the entire purpose and focus of the host's role in hospitality is to extend the warmest welcome to the guest. I remember one time when a friend visited from Nigeria, and although I set some choices before them, when I said, "We can do A, B, and C; I would recommend B," in keeping with hospitality they seemed to always treat my pick as tacit authority and went along with me. It was a wonderful visit; my friend made a comment about being treated like royalty, but my thought was not about how well I was treating them. My thought was that this would probably be the last time I saw my friend and her immediate family face to face, and I'd better make it count.

I might comment that this is tied to our inability today to understand a husband's authority over his wife and the

wife's submission. The rôle is somewhat like that of host and guest. A liberal source speaking on [the Ephesians haustafel as it dealt with husbands and wives](#) said that it did not portray marriage in terms of the husband's authority, while a conservative source understood authority at a deeper level: it said that nowhere here (or anywhere else in the Bible) are husbands urged, "Exercise your authority!", but the text that says, [Wives, submit yourselves unto your own husbands, as unto the Lord](#), also says, [Husbands, love your wives, even as Christ also loved the Church, and gave himself for it](#). If the wife's role is to submit herself to her husband as to the Lord, the husband's role is to give up his life as Christ was crucified for the Church.

And all of this seems dead to us as we have grown dead to it. The role of hospitality, including authority, is infinitely less important than marriage, yet we see a husband's authority as external and domineering, when it is less external than the host's authority. And I am drawn to memories of visiting one very traditional couple where both of them exuded freedom and comfort and dealing with them felt like a foot sliding into a well-fitting shoe. But if we see a husband having authority over a wife as a foreign imposition and nothing like the implicit authority we do not even recognize between host and guest (where the host's authority consists in making every decision to show as much kindness as possible to the guest), this is not a defect in marriage but in our deafened ears.

An intravenous drip of noise

"Silence is the language of the age to come," as others have said. Hesychasm is a discipline of stillness, of silence, of [Be still and know that I am God](#). Whether spiritual silence

is greater than other virtues, I do not wish to treat here; suffice it to say that all virtues are great health, and all vices are serious spiritual diseases, and all are worth attention.

There are a number of technologies whose [marketing proposition](#) is as a noise delivery system. The humble radio offers itself as a source of noise. True, there are other uses, such as listening to a news radio station for weather and traffic, but just having a radio on in the background is noise. Other sources of noise include television, iPods, smartphones, the web, and top sites like FaceBook, Google Plus, and the like. Right use of these tends to be going in and out for a task, even if the task lasts five hours, versus having noise as a drone in the background.

In terms of social appropriateness, there is such a thing as politely handling something that is basically rude. For one example, I was visiting a friend's house and wanted to fix his printer, and apologetically said I was going to call my brother and called him to ask his opinion as a computer troubleshooter. I handled the call as something that was basically rude even though the express purpose was to help with something he had asked about and it was a short call.

And it was handled politely because I handled it as something that is basically rude. And other people I know with good manners do sometimes make or receive a cell phone call when you otherwise have their attention, but they do so apologetically, which suggests that just ignoring the other person and making a phone call is rude. In other words, they politely handle the interruption by treating it as something that is basically rude, even if (as in the case I mentioned) the entire intention of the call was to help me

help the friend I was visiting.

Something like this applies to our use of technology. There are things that are entirely appropriate if we handle them as something that is basically "rude." Or, perhaps, "noisy." The equivalent of making a long phone call when you are with someone, without offering any apology or otherwise treating it as basically rude, is laying the reins on the horse's neck and allowing technologies to function as a noise delivery system. And what we need is to unplug our intravenous drip of noise.

Silence can be uncomfortable if you are used to the ersatz companionship of noise. If you have been in a building and step outside into the sunlight at noon, you may be dazzled. Most spiritual disciplines stretch us into something that is uncomfortable at first: the point is to be stretched more each time. The Philokalia talks about how people hold on to sin because they think it adorns them: to this may be added that after you repent and fear a shining part of you may be lost forever, you realize, "I was holding on to a piece of Hell." Silence is like this; we want a noise delivery system as a drone, and once we begin to get used to its absence, there is a deeper joy. It may take time; it takes something like a year for a recovering alcoholic's brain chemistry to reset. But once we have got rid of the drug, once we have repented and sought to bear fruit worthy of repentance, we may find ourselves (to adapt the title of a book) **blindsided by joy.**

Killing time

"You cannot kill time," the saying goes, "without injuring eternity."

At least one breakdown of mobile users has said that

they fall into three groups: "Urgent now," people who have some degree of emergency and need directions, advice, contingency plans, and the like, "Repeat now," people who are monitoring information like whether or how their stocks are doing, and "Bored now," people who are caught and have some time to kill, and look for a diversion.

"Bored now" use of cell phones is simply not constructive spiritually; it offers a virtual escape for the here and now God has given us, and it is the exact opposite of the saying, "Your cell [as a monk] will teach you everything you need to know."

#### The lead pencil

The lead pencil is a symbol of an alternative to an overly technologized world; one organization of people who have made a conscious decision to avoid the encroachment of technology chose the lead pencil as their emblem and formed the Lead Pencil Club.

But the lead pencil is a work of technology, and one that 99% of humans who ever lived have never seen any more than a cuneiform stylus or any other writing implement. And even such a seemingly humble technology comes about in an impressive fashion; [one economist wrote a compelling case that only God knows how pencils are made.](#)

Sitting down and writing letters is a valuable discipline, but the norm that has been lived by 99% of the human race is oral culture; anthropologists have increasingly realized that the opposite of "written" culture is not "illiterate" culture but "oral" culture. And the weapon that slides through the chink in oral culture's armor is the writing implement, such as the lead pencil. It is not the computer, but the lead pencil and its kin, that serve as a disease vector

to destroy age-old orality of culture.

This is not to say that you can't try to use computer keyboards less and pens and pencils more. But understand that you're not turning the clock all the way back by writing handwritten letters, however commendable the love in handwritten letters may be. The lead pencil is a technology and to those societies that embrace it, it is the death knell to an old way.

The long tail

The long tail can be your best friend, or an insidious enemy.

Let me briefly outline the long tail. A retail bookstore needs to sell one copy of a book in a year's time, or else it is losing them money: shelf space is an expensive commodity.

And all of this leads to a form of implicit censorship, not because bookstores want to stamp out certain books, but because if it's not a quick seller or a safe bet it's a liability.

By contrast, Amazon has large volumes of shelf space; their warehouses might comfortably store a city. And it costs them some money to acquire books, but the price of keeping books available is insignificant compared to a brick-and-mortar bookstore. And what that means, and not just on Amazon, that the economic censorship is lifted. People used to wonder who would be able to fill hundreds or more cable channels; now Youtube would be hard pressed to reduce itself down to a thousand channels. And so a much larger portion of Amazon's profits comes from having an enormous inventory of items that occasionally make a sale.

There is specialization implicit in the long tail; if you want to know how to make something, chances are pretty good that some blog explains how. And the proper ascetical use of

technology, or Luddite if you prefer, uses things differently than the mainstream. Nobody in a phone store is going to tell you that an intravenous drip of noise in terms of text messages that go on even when you are trying to sleep does not make you happier than if you use texting when there is a special need. Some of the best resources you will find for ascetical use of technology are to be found in the long tail.

But there is something else that comes with it. The temptation is to be off in our own customized worlds, with everything around our interests. And that is a form of spiritual poverty. Part of an age-old asceticism has been learning how to deal with the people who are around you, localist style, instead of pursuing your own nooks and crannies. The monoculture of retail stores in America was first a problem, not because it had no long tail effects, but because it supplanted at least an implicit localism. Local cultures gave way to plastic commercial culture.

And we can use the long tail to our profit, if we don't lay the reins on the horse's neck. Shopping on the Internet for things that won't be local stores is one thing; shopping on the Internet so you don't have to get out of your pyjamas is another.

The long tail can be a gold mine, but it is subject to [the damned backswing](#).

#### Marketing proposition

There was one CIA official who said, being interviewed by a journalist, that he would never knowingly hire someone who was attracted by the romance of cloak and dagger work. Now this was quite obviously someone who did want to hire people who would be a good fit, but someone who wants to join a cloak and dagger agency as a gateway to have life feel

like a James Bond movie is off on the wrong foot.

I doubt if any major intelligence agency has promoted James Bond movies because they think it's a good way to draw the right recruits, but James Bond movies function as highly effective advertisements. They may not lead people to be able to stick out the daily grind and level of bureaucracy in a three-letter government agency, but they give a strong sense that spying is cool, and cool in a way that probably has only the most accidental resemblance to life in one of those bureaucratic organizations.

Cop shows likewise show police officers pulling their guns out much more than in real life; it is a frequent occurrence on the cop shows I've seen, while the last figure I heard was that real, live, flesh and blood police officers draw a gun on the job (apart from training) once every few years if even that.

Advertisement is produced as a service to the companies whose goods and services are being advertised, but the real message they sell is if anything further from the truth than the "accidental advertisement" of James Bond movies advertising a romantic version of bureaucratic intelligence agencies and cop shows making a dramaticization that effectively ignores the day-to-day work of police officers because it just doesn't make good drama. (What would happen to the ratings of a cop show if they accurately portrayed the proportion of time that police officers spend filling out paperwork?)

Advertising sells claims that are further out. Two examples discussed in a class showed a family that moved, and what was juxtaposed as cementing this bonding time was a vacuum cleaner. In another commercial, racial harmony was

achieved by eating a hamburger. The commercials that stuck with me from childhood were in one case kids jumping around with rotating camera angles because they were wearing a particular brand of shoes: When I asked my parents for those shoes, they explained to me that the commercial was made to make me want them, and I took a marker and colored the patterns on the bottom of the shoes on the add on to my shoes. Another one showed a game of Laser Tag that was end to end acrobatics. Now I have never played Laser Tag, and I get the impression people like it, but I doubt that its gear confers the ability to do theatrically delivered acrobatics.

Marketing is usually more subtle and seductive than I have portrayed it here. The vacuum cleaner did not offer any words connecting the appliance with family connectedness; it's just that this family was going through a major experience and the vacuum cleaner appeared with perfect timing just at the center of that memory. The marketing message that is portrayed is seductive and false, and it is never the right basis to judge the product on. The product may be the right thing to buy and it may well be worth buying, but only after one has rejected the mystique so masterfully built up in the marketing proposition. If it is right for me to study ninjutsu, it will only be right after I have rejected the ninja mystique, something which the nearest dojo does in fact do: they refer to the martial art they teach as "toshindo", nor "ninjutsu", even though they refer to essentially the same thing in Japanese.

I have said earlier, or rather repeated, the words, "Hang the fashions. Buy only what you need." They bear repeating, but is there anything else to add? I would add three things:

1. Reject [sacramental shopping](#).
2. Reject the mystique advertising has sold you this product on.
3. Wait until your heart becomes clear about what is the best choice, and then make the best choice.

The best choice, in the third world, may be to buy a Mercedes-Benz instead of a Ford because you cannot afford to replace a Ford in six years.

But take care of the spiritual housecleaning first.

### Martial arts

There have been two times in my life that I have studied martial arts, and both of them have been times of exceptional spiritual dryness. I have not felt any particular dryness when learning how to use a bow and arrow—or a .22—but there is something different about at least internal Asian martial arts. Practicing them, like Orthodoxy, is walking along a way. And it would seem somewhat confused to try to pursue one of these ways along with the Orthodox way.

I am careful of declaring this in the absolute; the literature is ambivalent but there are soldiers who bear the cross of St. George, and many of them have training in Asian martial arts. That looks to me grey, as outlined in [the timeless way of relating](#).

I am tempted to train in ninjutsu: partly for technique, partly because the whole of the training includes stealth, and partly for practical self-defense. But I am treating that desire as a temptation, on the understanding that God can impress things on my conscience if he wants me to enter training.

MMO's (Massive Multiplayer Online Role Playing Games, like

World of Warcraft)

["Do You Want to Date My Avatar?" was designed and created as a viral video.](#) and something about it really stuck.

There are common threads between many of the things there, and an MMO is a cross between the MUDs I played in high school, and SecondLife. The MUDs were handled from pure text, leaving imagery in the player's imagination; MMO's provide their own imagery. Another form of escape.

## Money and financial instruments

The Fathers commenting on St. Job also illustrate another principle of such wealth as existed then. St. Job is reported as having thousands of herd animals and thousands of beasts of burden, the wealthiest of the men of the East. But there are somewhat pointed remarks that wealthy Job is not reported to possess gold or silver. His wealth was productive wealth, living wealth, not a vault of dead metal coins. In modern terms he did not live off an endowment of stocks and bonds, but owned and ran a productive business.

Endowments are a means of being independently wealthy, and this ultimately means "independent from God." Now the wealthiest are really as dependent on God as the poorest; let us remember [the parable of the rich fool, in which a man congratulates himself for amassing everything he would need and that night the angels demanded his soul from him.](#) The ending is much sadder than St. Job's story.

Those of us in the world usually possess some amount of money, but there is something that makes me uncomfortable about the stock market overall, even moreso for the more abstract financial instruments. What one attempts to do is gain the most money from one's existing money as much as possible, given the amount of risk you want and possibly including such outliers as ethical index funds which only index stocks deemed to meet an ethical standard. The question I have is, "What are we producing for what we get out of the stock market?" Working in a job delivers tangible value, or at least can. Investing in the stock market may be connected with helping businesses to function, but more and more abstract forms of wealth have the foul smell that

heralds the coming of [the damned backswing](#).

I would suggest as a right use of wealth acquiring tools that help you work, and being generous even or especially if money is tight. And explicitly depending on God.

### Movies

When movies had arrived on the scene and were starting to have a societal effect, at least one Luddite portrayed a character moving from one movie to another in escapism.

The premise may seem quaint now, but a little bit of that keeps on happening with new technologies.

One fellow parishioner talked about how in Japan, anime shows aired with a certain animation technique, and all of the sudden emergency rooms were asking why they were being inundated with people having epileptic seizures. And when they saw the connection, Japan stopped cold in its use of that animation technique. He said that that underscored to him the power of television and movies.

I don't quite agree with him, any more than I would agree with using findings that extremely high levels of artificial light—fluorescent or incandescent—cause problems, and we should therefore be very wary of lighting. For most sedentary people, even with artificial light (fluorescent or incandescent), the level of exposure to light is materially lower than natural exposure to the sun, and people who spend their time indoors tend to see less light (significantly less light) than people living outdoors. I didn't accept his conclusion, but he followed with another insight that I can less easily contest.

He asked if I saw movies infrequently (we had not discussed the topic, but he knew me well enough to guess where I might stand), and I told him that I usually don't

watch movies. He asked me if I had ever observed that an hour after seeing a movie, I felt depressed. I had not made any connection of that sort, even if now it seems predictable from [the pleasure-pain syndrome](#). And now I very rarely see movies, precisely because the special effects and other such tweaks are stronger than I am accustomed to seeing; they go like a stiff drink to the head of the teetotaler. And on this score I would rather not be the person who has a stiff drink every so often, and whose body tolerates alcohol better, but the person whose system hasn't had to make such an adjustment, an adjustment that includes losses. The little pleasures of life are lost on someone used to a rising standard of special effects, and the little pleasures of life are more wholesome than special effects.

#### Multitasking

As I discussed in [Religion And Science Is Not Just Intelligent Design Vs. Evolution](#), one of the forms of name-dropping in academic theology is to misuse "a term from science": the claim to represent "a term from science" is endemic in academic theology, but I can count on the fingers of one hand the number of times I've read "a term from science" that was used correctly.

One book said it was going to introduce "a term from computer science," toggling, which meant switching rapidly between several applications. The moral of this story was that we should switch rapidly between multiple activities in our daily lives.

What I would have said earlier is, "While that moral might be true, what it is not is a lesson from computer science." What I would say now is, "Never mind if that is a lesson from computer science. The moral is fundamentally

flawed."

In the [Sermon on the Mount](#), Matthew 6:22, Christ says, "If your eye be," and then a word that doesn't come across in translation very well. It is rendered "healthy" (NIV), "clear" (NASB), "sound" (RSV), and "good" (NKJV, NLT). Only the King James Version properly renders the primary sense of haplous as "single." This may be a less user-friendly translation but it captures something the other translations miss. The context of the discussion of the eye as the lamp of the body is about choosing whether to have a single focus in serving God, or try to multitask between serving God and money. Haplous does have "healthy", "clear", "sound", and "good" as secondary meanings, but the primary meaning is the less accessible one that I have only found in the Greek and in the King James. If the eye is the lamp of the body, and it is important that the eye be single, then by extension the whole person is to be single, and as one aspect of this single eye, give a whole and single attention to one thing at a time. Now this is not necessarily a central, foreground focus in the [Sermon on the Mount](#), but as its logic unfurls, even as spiritual silence unfurls, a single eye gives its whole and undivided attention to one thing at a time. (And study after study has shown that increased productivity through multitasking is an illusion; divided attention is divided attention and hurts all manner of actions.)

#### Nutriceuticals

The term "nutriceuticals is itself an ambiguous and ambivalent term.

On the one hand, 'nutriceuticals' can refer to the diet advanced by the [Nourishing Traditions](#) school, and while nutrition should not be considered on its own without

reference to the big picture of exercise, work, light, almsgiving, fasting, prayer, and the Holy Mysteries, there is something to the recipes and type of diet advocated in Nourishing Traditions.

There are also the different, and differently excellent, nutraceuticals of [a company that combines absolutely top-notch supplements with a pushy, multi-lev—I mean, a unique opportunity to become CEO of your own company.](#) (I am formally a distributor; [please contact me if you want to be a customer or possibly distributor without being pushed to drink Kool-Aid.](#))

However, it seems that everybody selling certain things wants to be selling "nutraceuticals", and there are people selling "synthetic testosterone" as a "nutraceutical." Friends, I really hope that the offer of "synthetic testosterone" is false advertising, because if it is false advertising they are probably delivering a better product than if it's truth in advertising. Testosterone is a steroid, the chief of the anabolic steroids used to get muscles so big they gross girls out. Now testosterone does have legitimate medical uses, but using steroids to build disgustingly huge muscles can use up to a hundred times what legitimate medical use prescribes, and it does really nasty things to body, mind, and soul.

I get the impression that most things sold as nutraceuticals are shady; to authorities, illegal nutraceuticals are probably like a water balloon, where you step on it one place and it just slides over a bit to the side. It used to be that there were perhaps a dozen major street drugs on the scene; now there is a vast bazaar where some "nutraceuticals" are squeaky-clean, and some

"nutriceuticals" are similar in effect to illegal narcotics but not technically illegal, and some of them are selling testosterone without medical supervision or worse.

So buyer beware. There's some good stuff out there (I haven't talked about goji berries), but if you want a healthy diet to go with healthy living, read and cook from [Nourishing Traditions](#), and if you want another kind of good nutraceutical supplement without being pushed to drink Kool-Aid, [contact me and you might be my first customer](#). (No, I don't have dreams of striking it rich through, um, "my business." I am satisfied enough with my job.)

### Old Technologies

There is a Foxtrot cartoon where the mother is standing outside with Jason and saying something like, "This is how you throw a frisbee."—"This is how you play catch."—"This is how you play tennis." And Jason answers, "Enough with the historical re-enactments. I want to play some games!" (And there is another time when he and Marcus had been thrown out of the house and were looking at a frisbee and saying, "This is a scratch on the Linux RAID drive.")

Old technologies are usually things that caused changes and moved people away from what might be called more natural [forms of life](#). However, they represent a lower drug dose than newer technologies. [The humble lead pencil](#) may be historically be the kind of technology that converted cultures away from being oral; however, a handwritten letter to an old friend is profoundly different from a stream of texts. And in my technological soliloquy above, two out of the three technologies I mentioned represent an old tradition. Being familiar with some of the best of older technologies may be helpful, and in general they do not have

the layers on layers of fragile character that have been baked into new technologies. A Swiss Army Knife is still a portable toolchest if something messes up with the Internet. Bicycles are not a replacement for cars—you can't go as fast or as far, or stock up on groceries—but many people prefer bicycles when they are a live option, and a good bicycle has far fewer points of failure than a new car.

I noted when I was growing up that a power failure meant, "Office work stops." Now more recently an internet or network failure means, "Office work stops," and there is someone who said, "Systems integration is when your computer doesn't work because of a problem on a computer you never knew existed." Older technologies are in general not so fragile, and have more of a buffer zone before you get in to [the damned backswing](#).

#### Online forums

Online forums are something of a mixed blessing. They can allow discussion of obscure topics, and have many of the benefits of the [the long tail](#). I happily referred someone who was learning Linux to [unix.stackexchange.com](http://unix.stackexchange.com). But the blessing is mixed, and when I talked with my priest about rough stuff on an Orthodox forum, he said, "People love to talk about Orthodoxy. The real challenge is to do it."

Online forums may be more wisely used to consult for information and knowhow, but maybe not the best place to find friends, or perhaps a good place to find friends, but not a good place to use for friendship.

Planned obsolescence, fashion, and being built NOT to last

When I made one visit to the Dominican Republic, one thing that surprised me was that a substantial number of the vehicles I saw were Mercedes-Benz or other luxury

brands by U.S. standards, while there were no or almost no U.S. cars. The reason I was given to this by my youth pastor is that you can keep a German engineered car up and running for 30 years if you take care of it; with a U.S. car you are doing well to have a car still running after 10 years. German cars, among others, are engineered and built to last; U.S. cars are engineered and built NOT to last. And in the Dominican Republic economy, buying a car that may well run for 30 years is something people can afford; buying a car that may only last 5-7 years is a luxury people cannot afford. An old but well-cared-for Mercedes Benz, Saab, Volvo, or BMW will probably last longer than a new car which is "imported from Detroit."

One of the features of an industrial economy is that the economy needs to have machines in production and people buying things. If we ask the question, "Was economic wealth made for man, or man for economic wealth," the decisive answer of industrial economy is, "Man was made for economic wealth." There are artificial measures taken to manipulate culture so as to maximize production and consumption of economic wealth, three of which are planned obsolescence, fashion, and being built NOT to last.

Planned obsolescence socially enforces repeat purchases by making goods that will have a better version available soon; in computers relatively little exploration is done to make a computer that will last a long time, because computers usually only need to last until they're obsolete, and that level of quality is "good enough for government work." I have an iPhone 4 and am glad not to be using my needlessly snail-like AT&T-serviced iPhone 1, but I am bombarded by advertisements telling me that I need an

iPhone 4S, implying that my iPhone 4 just doesn't cut it any more. As a matter of fact, my iPhone 4 works quite nicely, and I ignored a link advertising a free port of the iPhone 4's distinctive feature Sila. I'm sure that if I forked out and bought an iPhone 4S, it would not be long before I saw advertisements breeding discontent about my spiffy iPhone 4S, and giving me a next hot feature to covet.

In the Middle Ages, fashion changed in clothing about once per generation. In our culture, we have shifting fashions that create a manufactured social need to purchase new clothing frequently, more like once per year. People do not buy clothing nearly so often because it is worn out and too threadbare to keep using, but because fashion shifted and such-and-such is in. Now people may be spending less on fashion-driven purchases than before, but it is still not a mainstream practice to throw a garment out because further attempts to mend it will not really help.

And lastly, there is the factor of things being made to break down. There are exceptions; it is possible for things to be built to last. I kept one Swiss Army Knife for twenty years, with few repairs beyond WD-40 and the like—and at the end of those twenty years, I gave it as a fully functional hand-me-down to someone who appreciated it. There is a wide stripe of products where engineers tried to engineer something to last and last, and not just German engineers. However, this is an exception and not the rule in the U.S. economy. I was incredulous when a teacher told me that the engineering positions some of us would occupy would have an assignment to make something that would last for a while and then break down. But it's true. Clothing, for instance, can be built to last. However, if you buy expensive new

clothing, it will probably wear out. Goodwill and other second-hand stores sometimes have things that are old enough to be built to last, but I haven't found things to be that much sturdier: your mileage may vary. And culturally speaking, at least before present economic difficulties, when an appliance breaks you do not really take it in for repairs.

You replace it with a newer model.

All of these things keep purchases coming so the gears of factories will continue. Dorothy Sayers' "The Other Six Deadly Sins" talks about how a craftsman will want to make as good an article as possible, while mechanized industry will want to make whatever will keep the machines' gears turning. And that means goods that are made to break down, even when it is technologically entirely feasible for factories to turn out things that are built to last.

All of these answer the question, "Was economic wealth made for man, or man for economic wealth?" with a resounding, "Man was made for economic wealth."

Porn and things connected to porn

There is a story about a philosopher who was standing in a river when someone came to him. The philosopher asked the visitor, "What do you want?" The visitor answered, "Truth!" Then the philosopher held the visitor under the water for a little while, and asked him the second time, "What do you want?" The visitor answered, "Truth!" Then the philosopher held the visitor under water for what seemed an interminable time, and let him up and asked, "What do you want?" The visitor gasped and said, "Air!" The philosopher said, "When you want Truth the way you want air, you will find it."

The same thing goes for freedom from the ever-darker

chain called pornography, along with masturbation and the use of "ED" drugs to heighten thrills (which can cause nasty street drug-like effects even in marriage). To quote the [Sermon on the Mount](#) (RSV):

"You have heard that it was said, 'You shall not commit adultery.' But I say to you that every one who looks at a woman lustfully has already committed adultery with her in his heart.

"If your right eye causes you to sin, pluck it out and throw it away; it is better that you lose one of your members than that your whole body be thrown into hell. And if your right hand causes you to sin, cut it off and throw it away; it is better that you lose one of your members than that your whole body go into hell.

The Church Fathers are clear enough that this must not be taken literally; canon law forbids self-castration. But if you want to be free from addiction to pornography, if you want such freedom the way you want air, then you will do whatever it takes to remove the addiction.

What are your options? I'm not going to imitate the Dilbert strip's mentioning, "How to lose weight by eating less food," but there are some real and concrete steps you can take. If you shut off your internet service, and only check email and conduct internet business in public places with libraries, that might be the price for purity. If you are married, you might use one of many internet filters, set up with a password that is only known to your wife. You could join a men's sexual addiction support group: that may be the price of freedom from porn, and it is entirely worth it. The

general rule of thumb in confession is not to go into too much detail in confessing sexual sins, but going to confession (perhaps frequently, if your priest or spiritual father allows it) can have a powerful "I don't want to confess this sin" effect. Another way to use the Internet is only go to use it when you have a defined purpose, and avoid free association browsing which often goes downhill. You could ask prayers of the saints, especially [St. Mary of Egypt](#) and [St. John the Long-Suffering of the Kiev Near Caves](#). You could read and pray "The Canon of Repentance to Our Lord Jesus Christ" in the [Jordanville prayer book](#) and [St. Nectarios Press's Prayers for Purity](#), if your priest so blesses.

Lust is the disenchantment of the entire universe: first it drains wonder and beauty out of everything else, and then it drains wonder and beauty out of itself: the only goal of lust is more lust. It works like a street drug. St. Basil the Great compared lust to a dog licking a saw: the dog keeps licking it because it likes the taste it produces, but it does not know that it is tasting its own woundedness, and the longer it keeps up at this, the deeper the wounds become.

Furthermore, an account of fighting sexual sin is incomplete if we do not discuss gluttony. What is above the belt is very close to what is below the belt, and the Fathers saw a tight connection between gluttony and lust. **Gluttony is the gateway drug to lust.** "Sear your loins with fasting," the Fathers in the Philokalia tells us; the demon of lust goes out with prayer and fasting.

#### Sacramental shopping

I remember when I had one great struggle before surrendering, letting go of buying a computer for my studies, and then an instant later feeling compelled to buy it. The

only difference was that one was sacramental shopping to get something I really needed, and the other was just getting what I needed with the "sacramental shopping" taken out.

In American culture and perhaps others, the whole advertising industry and the shape of the economy gives a great place to "sacramental shopping", or shopping as an ersatz sacrament that one purchases not because it is useful or any other legitimate concern, but because it delivers a sense of well-being. Like Starbucks, for instance. Some have argued that today's brand economy is doing the job of spiritual disciplines: hence a teacher asks students, "Imagine your future successful self. With what brands do you imagine yourself associating?" and getting no puzzled looks or other body language indicating that students found the question strange. I've mentioned brands I consume both prestigious and otherwise; perhaps this piece would be better if I omitted mention of brands. But even if one rejects the ersatz spirituality of brands, not all brands are created equal; my previous laptop was an IBM Thinkpad I used for years before it stopped working, and the one before that was an Acer that demonstrated "You get what you pay for." Investing in something good—paid for in cash, without incurring further debt—can be appropriate. Buying for the mystique is spiritual junk food. (And in telling about my iPhone, I didn't mention that I tried migrating to a Droid, before realizing its user interface didn't stack up to the iPhone's.)

"Hang the fashions. Buy only what you need," is a rejection of brand economy as a spiritual discipline. Buy things on their merits and not because of the prestige of

the brand. And learn to ignore the mystique that fuels a culture of discontent. Buy new clothes because your older clothing is wearing out, not because it is out of fashion. (It makes sense to buy classic rather than trendy.)

### SecondLife

Most of the other technologies mentioned here are technologies I have dealt with myself, most often at some length. SecondLife by contrast is the one and only of the technologies on this list I haven't even installed due to overwhelming bad intuitions when I tried to convince myself it was something I should be doing.

It may be, some time later, that SecondLife is no longer called SecondWife, and it is a routine communication technology, used as an audio/visual successor to (purely audio) phone conversations. The web was once escape, one better than the Hitchhiker's *Guide to the Galaxy*, and now it can be explored but it is quite often used for common nuts and bolts. No technology is permanently exotic: perhaps sometime the world of SecondLife will seem ordinary. But for now at least, it is an escape into building an alternative reality, and almost might as well be occult, [as the foundations of modern science](#), for the degree of creating a new alternate reality it involves.

Smartphones, tablets, netbooks, laptops, and desktop computers

Jakob Nielsen made a distinction between computers that are movable, meaning laptops and netbooks which can be moved with far less difficulty and hassle than a desktop system, and mobile, meaning that they are the sort of thing a person can easily carry. Netbooks cross an important line compared to full-sized laptops; a regular laptop weighs

enough on the shoulder that you are most likely to take a laptop in its carrying case for a reason, not just carry it like one more thing in a pocket. Netbooks, which weigh in at something like two pounds, are much lighter on the shoulder and they lend themselves more readily to keeping in a backpack, large purse, or bag of holding, without stopping to consider, "Do I really want to carry this extra weight?" Not that this is unique to netbooks; tablets are also light enough to just carry with you. Smartphones cross another important line: they are small enough to keep tucked in your pocket (or on your belt).

I was first astonished when I read that one iPhone user had completely displaced her use of the desktop computer. It surprised me for at least three reasons. First, the iPhone's screen is tiny compared to even a small desktop screen; one thing programmers tend to learn is the more screen space they have, the better, and if they have any say in the matter, or if they have savvy management, programmers have two screens or one huge screen. Second, especially when I had an iPhone 1 that came with painfully slow and artificially limited bandwidth, the niche for it that I saw was as an emergency surrogate for a real computer that you use when, say, you're driving to meet someone and something goes wrong. A bandwidth-throttled iPhone 1 may be painfully slow, but it is much better than nothing. And lastly, for someone used to high-speed touch typing on a regular keyboard, the iPhone, as the original Droid commercials stomped on the sore spot, "iDon't have a real keyboard." You don't get better over time at touch typing an iPhone keyboard because the keyboard is one you have to look at; you cannot by touch move over two keys to the left

to type your next letter. What I did not appreciate then was that you give the iPhone keyboard more focus and attention than touch typing a regular keyboard calls for; the "virtual keyboard" is amazing and it works well when you are looking at it and typing with both thumbs. And once that conceptual jolt is past, it works well.

But what I didn't appreciate when that woman said she had stopped using her computer was that the desktop computer is wherever you have to go to use the desktop computer, while the iPhone is in one's pocket or purse. And there is an incumbency advantage to the iPhone that is in one's pocket or purse. It's not just that you can only use your home computer when you are at home; if you are in one room and the computer is in another, it is less effort to jot a brief email from the phone than go to the other room and use the computer.

Laziness is a factor here; I have used my iPhone over my computer due to laziness. But more broadly a desktop or even laptop computer is in something of a sanctuary, with fewer distractions; the smartphone is wherever you are, and that may be a place with very few distractions, and it may be a place with many distractions.

Smartphones, tablets, netbooks, laptops, and desktops are all computers. The difference between them is how anchored or how portable they work out to be in practice. And the more mobile a computer is, the more effectively it will be as a noise delivery system. The ascetical challenge they represent, and the need to see that we and not the technologies hold the reins, is sharper for the newer and more mobile models.

Social networks

I personally tend not to get sucked in to Facebook; I will go to a social networking site for a very particular reason, and tend not to linger even if I want something to do. There is a reason for this; I had an inoculation. While in high school

I served as a student system administrator, on a system whose primary function in actual use was a social network, with messages, chatting, forums, and so on and so forth. I drank my fill of that, so to speak, and while it was nowhere near so user-friendly as Facebook, it was a drug from the same family.

Having been through that, I would say that this is not what friendship is meant to be. It may be that friends who become physically separated will maintain correspondence, and in that case a thoughtful email is not much different from a handwritten letter. As I wrote in [Technomicon:](#)

[Technology, Nature, Asceticism:](#)

- "Social networking" is indeed about people, but there is something about social networking's promise that is like an ambitious program to provide a tofu "virtual chicken" in every pot: there is something unambiguously social about social media, but there is also something as different from what "social" has meant for well over 99% of people as a chunk of tofu is from real chicken's meat.
- There is a timeless way of relating to other people, and this timeless way is a large part of asceticism. This is a way of relating to people in which one learns to relate primarily to people one did not choose, in friendship had more permanency than many today now give marriage, in which one was dependent on others

(that is, interdependent with others), in which people did not by choice say goodbye to everyone they knew at once, as one does by moving in America, and a social interaction was largely through giving one's immediate presence.

- "Social networking" is a very different beast. You choose whom to relate to, and you can set the terms; it is both easy and common to block users, nor is this considered a drastic measure. Anonymity is possible and largely encouraged; relationships can be transactional, which is one step beyond disposable, and many people never meet others they communicate with face-to-face, and for that matter arranging such a meeting is special because of its exceptional character.
- Social networking can have a place. Tofu can have a place. However, we would do well to take a cue to attend to cultures that have found a proper traditional place for tofu. Asian cuisines may be unashamed about using tofu, but they consume it in moderation—and never use it to replace meat.
- We need traditional social "meat." The members of the youngest generation who have the most tofu in their diet may need meat the most.

### "Teleporters"

I use the term "teleporters" because I do not know of a standard name, besides perhaps the name of one of the eight capital vices, for a class of technologies and other things that are in ways very different from each other but all have the same marketing proposition: escape. Not that

one needs technologies to do this; metaphysics in the occult sense is another means to the same end. But all of them deliver escape.

A collection of swords is not usually amassed for defense: the owner may be delighted at the chance to learn how to handle a medieval sword, but even if the swords are "battle ready" the point is not self-defense. It's a little bit of something that transports us to another place. Same thing for movies and video games. Same thing for historical re-enactments. Same thing, for that matter, for romances that teach women to covet a relationship with a man that could never happen, and spurn men and possibilities where a genuinely happy marriage can happen. And, for that matter, ten thousand things.

There are many things whose marketing proposition is escape, and they all peter out and leave us coveting more. They are spiritual poison if they are used for escape. There may be other uses and legitimate reasons—iPhones are, besides being "avoid spiritual work" systems, incredibly useful—but the right use of these things is not found in the marketing proposition they offer you.

### Television

Television has partly been ousted with Facebook; TV is stickier than ever, but it still can't compete with the web's stickiest sites.

However, a couple of Far Side cartoons on television are worth pondering; if they were written today, they might mention more than TV.

In one cartoon, the caption reads, "In the days before television," and a whole family is staring blankly at a blank spot on a wall, curled around it as if it were a television. The

irony, of course, is that this is not what things were like before television began sucking the life out of everything. The days before television were that much more dynamic and vibrant; Gary Larson's cartoon, with a caption that simply subtracts television from the eighties, is dripping with ironic clarity about precisely what the days before television were **not**.

In the other cartoon, an aboriginal tribesman stands at the edge of a chasm, a vine bridge having just been cut and fallen into the chasm and making the chasm impassible. On the other side were a group of angry middle-class suburbanites, and the tribesman was holding a television.

The caption read, "And so Mbogo stood, the angry suburbanites standing on the other side of the chasm. Their idol was now his, as well as its curse."

Some years back, an advertising executive wrote, [Four Arguments for the Elimination of Television](#) (one friend reacted, "The author could only think of four?"), and though the book is decades old it speaks today. All of the other technologies that have been stealing television's audiences do what television did, only more effectively and with more power.

I said at one point that the television is the most expensive appliance you can own. The reasoning was simple. For a toaster or a vacuum cleaner, if it doesn't break, it costs you the up front purchase price, along with electricity, gas, or any other utilities it uses. And beyond those two, there is no further cost as long as it works. But with television, there was the most powerful propaganda engine yet running, advertising that will leave you keeping up with the Joneses (or, as some have argued after comparing

1950's kitchen appliances with 1990's kitchen appliances, keeping up with the Trumps). In this ongoing stream, the programming is the packaging and the advertising is the real content. And the packaging is designed not to steal the show from the content. Today television rules less vast of a realm, but megasites deliver the same principle: the reason you go to the website is a bit of wrapping, and the product being sold is you.

Our economy is in a rough state, but welcome to keeping up with the Trumps version 2.0. The subscription fees for smartphones and tablets are just the beginning.

The timeless way of relating

Christopher Alexander saw that computers were going to be the next building, and he was the champion who introduced computer-aided design to the field of architecture. Then he came to a second realization, that computer-aided design may make some things easier and faster, but it does not automatically make a building better: computer aided design makes it easier to architect good and bad buildings alike, and if you ask computers to make better buildings, you're barking up the wrong fire hydrant.

But this time his work, [A Timeless Way of Building](#), fell on deaf ears in the architectural community... only to be picked up by software developers and be considered an important part of object-oriented software design. The overused term MVC ("model-view-controller"), which appears in job descriptions when people need a candidate who solves problems well whether or not that meant using MVC, is part of the outflow of object-oriented programming seeing something deep in patterns, and some programmers have taken a profound lesson from [A Timeless Way of Building](#)

even if good programmers in an interview have to conceal an allergic reaction when MVC is presented as a core competency for almost any kind of project.

There really is [A Timeless Way of Building](#), and Alexander finds it in some of ancient and recent architecture alike. And in the same vein there is a timeless way of relating. In part we may see it as one more piece of it is dismantled by one more technology migration. But there is a real and live timeless relating, and not just through rejecting technologies.

C.S. Lewis, in a passage in [That Hideous Strength](#) which has great romantic appeal if nothing else, talks about how everything is coming to a clearer and sharper point. Abraham was not wrong for his polygamy as we would be for polygamy, but there is some sense that he didn't profit from it. Merlin was not something from the sixth century, but the last survival in the sixth century of something much older when the dividing line between matter and spirit was not so sharp as it is today. Things that have been gray, perhaps not beneficial even if they are not forbidden, are more starkly turning to black or white.

This is one of the least convincing passages for Lewis's effort to speak of "mere Christianity." I am inclined to think that something of the exact opposite is true, that things that have been black and white in ages past have more leniency, more grey. Not necessarily that leniency equals confusion; Orthodoxy has two seemingly antithetical but both necessary principles of *akgravia* (striving for strict excellence) and *oikonomia* (the principle of mercifully relaxing the letter of the law). We seem to live in a time of *oikonomia* from the custom which has the weight of canon

law, where (for instance) the ancient upper class did far less physical exertion than the ancient lower class and slaves, but middle class fitness nuts today exercise less than the ancient upper class. Three hours of aerobic exercise is a lot. While we pride ourselves on abolishing legal slavery, we wear not only clothing from sweatshops made at the expense of preventable human misery, but large wardrobes and appliances and other consumer goods that bear a price tag in human misery. Many Orthodox have rejected the position of the Fathers on contraception from time immemorial, [and the Church has been secularized enough for many to get their bearings from one article.](#)

But two things are worth mentioning here. The first is that this is a time that invites prophets. Read [the Old Testament prophets](#): prophets, named "the called ones" in [the Old Testament](#) never come when things are going well to say "Keep it up. Carry on your good work!" They come in darker days.

Second, while we live in a time where mere gloom is called light and we rely on much more oikonomia than others, oikonomia is real Orthodoxy in proper working order, and in ways Orthodoxy with oikonomia is much greater than rigidly rejecting oikonomia. The people who call themselves "True Orthodox", or now that "True Orthodox" sounds fishy, rename the term "Genuine Orthodox" to avoid the troubles they have created for the name of "True Orthodox." And despite observing the letter of canons more scrupulously than even the most straight-laced of normal Orthodox, these people are people who don't get Orthodoxy, and would do well to receive the penance of eating a thick steak on a strict fast day.

And despite having so many slices taken out, the timeless way of relating is alive and well. It is present at a meal around table with friends. It is present when a man and wife remain together "til death do us part." It is present when Catholics adore the Eucharist, or Evangelicals don't miss a Sunday's church for years and keep up with their quiet times and Bible studies. "Conversation is like texting for adults," said our deacon, and the timeless way of relating is there when people use texting to arrange a face-to-face visit. The timeless way of relating is always close at hand.

#### Video games

I was introduced to the computer game rogue and while in school wanted to play rogue / UltraRogue for as long as I could. When I decided in grad school that I wanted to learn to program, I wrote [a cruffy and difficult-to-understand roguelike game implemented in 60,000 lines of C.](#)

Those many hours I played in that fantasy land were my version of time lost in television. There are things I could have done that I didn't: create something, explore time outside, write letters. And as primitive and humble as rogue is, it stems from the same root as World of Warcraft. It is one of several technologies I have tasted in an egg: rogue, UltraRogue, [The Minstrel's Song](#), and different MUDs; or a command-line computer doing the work of a social network. And on that score, see [Children's toys](#) on Baudelaire's "la Morale du Joujou". The newer games and social network may connect more dots and do some of your imagining for you.

The core remains: you sit in front of a computer, transported to a fantasy land, and not exploring the here and now that you have been placed in in all its richness.

#### The Web

When I was a boy and when I was a youth, it was a sheer delight to go to Honey Rock Camp. I don't want to elaborate on all of my fond memories but I would like to point to one memory in particular: the web.

Resourceful people had taken a World War II surplus piece of netting, attached it to the edges of a simple building, and pulled the center up by a rope. The result was everything a child wants from a waterbed, and I remember, for instance, kids gathering on the far side of the web, my climbing up the rope, and then letting go and dropping five or ten feet into the web, sending little children flying. And as with my other macho ways of connecting with children, if I did this once I was almost certainly asked to do it again. (The same goes, for some extent, with throwing children into the web.)

I speak of that web in the past tense, because after decades of being a cherished attraction, the web was falling apart and it was no longer a safe attraction. And the people in charge made every effort to replace it, and found to everyone's dismay that they couldn't. Nobody makes those nets; and apparently nobody has one of those nets available, or at least not for sale. And in that regard the web is a characteristic example of how technologies are handled in the U.S. ("Out with the old, in with the new!") Old things are discarded, so the easily available technologies are just the newer one.

Software is fragile; most technological advances in both software and hardware are more fragile than what they replace. Someone said, "If builders built buildings the way programmers write programs, the first woodpecker that came along would destroy civilization." The web is a

tremendous resource, but it will not last forever, and there are many pieces of technology stack that could limit or shut off the web. Don't assume that because the web is available today it will equally well be available indefinitely.

## Conclusion

This work has involved, perhaps, too much opinion and too much of the word "I"; true Orthodox theology rarely speaks of me, "myself, and I," and in the rare case when it is really expedient to speak of oneself, the author usually refers to himself in the third person.

The reason I have referred to myself is that I am trying to make a map that many of us are trying to make sense of. In one sense there is a very simple answer given in monasticism, where renunciation of property includes technology even if obediences may include working with it, and the words [Do not store up treasures on earth](#) offer another simple answer, and those of us who live in the world are bound not to be attached to possessions even if they own them. [The Ladder of Divine Ascent](#) offers a paragraph addressed to married people and a book addressed to monastics, but it has been read with great profit by all manner of people, married as well as monastic.

Somewhere amidst these great landmarks I have tried to situate my writing. I do not say that it is one of these landmarks; it may be that the greatest gift is a work that will spur a much greater Orthodox to do a much better job.

My godfather offered me many valuable corrections when I entered the Orthodox Church, but there is one and only one I would take issue with. He spoke of the oddity of writing

something like "the theology of the hammer"; and my own interest in different sources stemmed from reading technological determinist authors like [Neil Postman](#), and even if a stopped clock is right twice a day, their Marxism is a toxic brew.

However, I write less from the seductive effects of those books, my writing is not because they have written XYZ but because I have experienced certain things in mystical experience. I have a combined experience of decades helping run a Unix box that served as a social network, and playing MUDs, and sampling their newer counterparts. My experience in Orthodoxy has found great mystical truth and depth in the words, [Every branch in me that beareth not fruit he taketh away: and every branch that beareth fruit, he purgeth it, that it may bring forth more fruit.](#) Part of that pruning has been [the involuntary removal of my skills as a mathematics student](#); much of it has been in relation to technology. [The Bible](#) has enough to say about wealth and property as it existed millenia ago; it would be strange to say that [Do not store up for yourselves treasures on earth](#) speaks to livestock and owning precious metals but has nothing to do with iPads.

One saint said that the end will come when one person no longer makes a path to visit another. Even with social media, we now have the technology to do that.

Let our technology be used ascetically, or not at all.

# **The ~~Martian~~ Human Complete Set of Working Instructions to Happiness**

**Life, the Paleo Diet,  
(Paleo) Orthodoxy, and  
Other Things**

**Michael:** Robert Heinlein, in [Stranger in a Strange Land](#), wrote, "Happiness is a matter of functioning the way a human being is organized to function... but the words in English are a mere tautology, empty. In Martian they are a complete set of working instructions." Would that we had such a set of working instructions!

**Photios:** But such exists, or rather such is not needed.

**Michael:** How? I've read [Stranger in a Strange Land](#) and can still only guess at it.

**Photios:** This reminds me of a forum where a young Asian told of some white guys driving by in a car and making "Chinese-like sounds" at him, and asked, "What about these white suburbanite middle-class..." and one of the more liberal members of the forum said, "Question asked, question answered."

**Michael:** Ok, I'll bite. What's your point?

**Photios:** Well it's hard to talk about [Stranger in a Strange Land](#) without discussing sex, and I'd like to start there.

In the real world, outside of the novel, there have been many studies to determine which maverick experiments make for the greatest sexual happiness. And to the dismay of the people running the study, the answer, unless they are willing to lie outright, is that a married couple in the traditional sense, straight, faithful, lifelong, no porn, open to parenting children, experiences far and away the greatest pleasure and overall happiness. And this is a finding of dismay because the assumption is that if you're really going to have a good time, you've got to be breaking rules, and the question "Which rebels against traditional marriage have it best?" meets the one entirely unwelcome answer: "Traditional marriages have it best."

Heinlein posits one maverick arrangement. Ok, this doesn't constitute maverick now, but it did when [Stranger in a Strange Land](#) first came out, and it was a point Heinlein needed to make with a sledgehammer. He posited free love within a tightly guarded nest. And on that point I would recall a counselor who said that after decades of seeing people in every conceivable living arrangement and some he couldn't conceive, only

underscored more strongly that the traditional rules about sexuality are intended for our benefit and not to keep us away from the good stuff.

You seem to assume that the "complete working manual" would be some super-secret or super-elite document only available to a few, or some super-secret way of reading the [Bible](#) or whatnot. But remember the maxim learned by many in the military: "When you assume, you make an ass out of U and me!" There is something as good as a complete working manual, and your assumption is one best dismantled.

**Michael:** Oof. What about [the Paleo diet or lifestyle](#): what do you think about that?

**Photios:** I practice a modified form of it, but I don't preach it much more than I preached about the diet I practiced before then. And to be an un-modified form of [the Paleo diet](#) is at least a concession in Orthodoxy.

**Michael:** So Orthodoxy and its cooking traditions have a scientifically better basis than [the Paleo diet](#)?

Traditional Orthodox diets are based on the kinds of food people ate after the agricultural revolution; unless you believe the earth is younger than the agricultural revolution's dates, no matter where you draw the line for the first humans, the departure from hunter-gatherer living is only an eyeblink compared to the total time people have been around.

**Photios:** And most Orthodox saints believed in a young earth; I don't share that belief, let alone the crypto-Protestant "Creation Science" that was popular with [Fr. Seraphim \(Rose\)](#) and unknown to most saints. But that is beside the point.

**Michael:** Then what is your point? Why is [the Paleo diet](#) not scientifically superior?

**Photios:** I do not hold any other diet to be superior, on scientific grounds, to [the Paleo diet](#). But scientific grounds are not the only grounds to judge by. Never mind that the authors of [Proverbs](#) were scientifically illiterate by our standards. The proverb still stands: [Better is a dinner of herbs \[including bread\] than a fatted ox and hatred with it.](#)

**Michael:** Can't we allow for greater ignorance in the past?

**Photios:** We can allow for different ignorance, but not greater ignorance—and what an odd thing for a [Paleo](#) devotee to say! And thinking about some things on materialistic terms is a material error.

**Michael:** Such as?

**Photios:** Once upon a time surgeons would do surgery with dirty hands, horse spit and all, and Pasteur's revolution came by and said to be sanitary, which is why to this day the preferred medical practice is for surgery to be done in as sanitary and sanitized conditions as possible.

And over-zealots of Pasteur's style of sanitization thought that the best way to give an infant a best shot at life is to keep things as sanitary as possible, and for all this "Emperor's New Clothes" improved sanitary conditions, the infant mortality in hospitals was atrociously high. And then someone had the very unscientific idea of bringing in old women to touch, cuddle, and hold infants for half an hour, or an hour, or two hours or whatever each day. And infant mortality plummeted overnight. With that one change, many more infants survived early hospitalization.

And something of the same error relates to kissing icons. Materialistic-minded people wince at kissing something that other people have kissed—but it is an overall strengthening, not weakening, that comes from paying reverence to icons and relics. And you can push it more forcefully and say that it's as unsanitary as kissing all those people on the mouth, and for that matter the two or three kisses on the cheek given occasionally in some jurisdictions and frequently in other jurisdictions are a tamer version of kissing on the mouth—in fact, by liturgical implication, the kiss on the cheek by implication is a kiss on the mouth. And in areas of helping infants survive the beginning of life, or kissing icons, or kissing Orthodox Christians, the Pasteurized version is the wrong route.

It's not just that we are justified in taking a health detriment if we do not practice Pasteur's idea of sanitation. We actually are better off even in matters of health. With what is known about touch and the beginning of life, it would now be a foolhardy proposition to eliminate touch as far as possible from a baby's life in order to obtain good sanitation. And with what is known about touch at the beginning of life, it is not considered ethical to explore the effects of reducing touch in infants' lives. It is, however, ethical to explore the effects of increasing touch in infants' lives, for instance by placing a newborn infant against its mother's body for thirty to forty-five minutes before going to business as usual, and the effect of increased touch is not only decreased mortality but greatly improved well-being.

And if I may quote a second snippet from the Bible:  
[Train yourself in godliness; for while bodily training is of some value, godliness is of value in every way, as it holds promise for the present life and also for the life to come.](#)

[The Paleo Solution](#) says that exercise is important and diet is indispensable. I would rather say that exercise and diet may be important, but godliness is indispensable. Perhaps the past few thousand years have been aberration from the naturally good diet our race has enjoyed, but however adamant we may be that [Paleo living](#) is better, keep in mind that the Bible and many of the Fathers lived in cultures where everyone up to the king ate bread as the main food, and it is bread and no other food that is honored in the Eucharist and in prosphora. You may hold if you want that it is seriously damaging to eat even the purest organic whole grain bread, but the Bible got its work done during millenia and cultures where the main staple food was bread, and the Gospel was much deeper than getting back paleo hunter-gather eating and living. And hospitality trumps fasting in Orthodoxy, hospitality should trump diet as well. And that is the biggest area where I make the most concession against [the paleo diet](#); I gratefully accept hospitality as it is given. If you're far enough in [the paleo diet](#) that breaking its rules actually makes you sick—I'm not—then maybe it is appropriate to explain your dietary needs, but insofar as much as it is possible, let hospitality alike trump fasting and diet.

**Michael:** None the less, there is something haunting, something I wish to be true, in "Jubal learned that... (f)

it was not possible to separate in the Martian tongue the human concepts: 'religion,' 'philosophy,' and 'science' ..."

**Photios:** Well said indeed, and you can have something better than a hope such things can be. Instead of hoping for things from another world, you can [enjoy, in the legal sense](#), the things in this real world from whose pierced side they were taken. Religion, philosophy, and science are inseparable in "[Physics](#)", and I encourage reading it.

But let me take a step back, far back. Let's look at the world of television commercials, or a glitzy animated commercial on the Internet. Whether selling cars or clothing, internet access or movies, they are selling escape from the here and now. It may be a car, almost invariably portrayed as sensual, mysterious, and intimate—which are really not what we would best do to seek in a car—but a car that delivers from the burden of the here and now. Clothing adorns the wearer and relieves the wearer of the necessity of appearing as she appears here and now. Internet access is more than just bandwidth; it is portrayed by people who have escaped the here and now. Or a movie or a video game; you have seen the commercials blanketing people recently and saying everyone has a bit of a soldier in them. What they are selling is escape into another world.

On this point I would like to talk about the predecessor to the present [Archdruid of Canterbury](#), who would have flatly have denied that any escape from reality satisfies, or perhaps that there is anywhere to escape to but reality. And even that way of talking

violates his writing; in the ancient world, one said, "\_\_\_\_\_ said \_\_\_\_\_," while in the modern world one says both "\_\_\_\_\_ said \_\_\_\_\_," and "\_\_\_\_\_ would have said \_\_\_\_\_." And this transformation is deep enough that students, trying to understand what a past author wrote, find it natural and not in the least provocative to ask, "What would \_\_\_\_\_ have said about \_\_\_\_\_?" when everybody in the room knows that the author never touched on the matter in question.

On this point, Anselm, admittedly after the schism, and for that matter Muslims are right. It is not the case that there are a large number of "possible worlds" and we happen to inhabit one of these fantasy-like worlds; there is a reality that Allah or God has created, and it is fundamental confusion to escape it, even in thought. So [Stranger in a Strange Land](#) makes a world where free love within a circle of people is allowed—and after ripping marriage apart re-constructs quite a large chunk of marriage in his free love. A man is not forbidden to seek love outside of his nest, but once inside the nest he is entirely free from desire for anyone outside of the nest. That is a reconstruction of what Heinlein has dismantled in marriage: one might speak of marriage as a nest of two, only a nest where fidelity represents not an inescapable preference but a legitimate and freely given choice. Heinlein divorced repeatedly, but a nest of water brothers is permanent. [Stranger in a Strange Land](#)'s nest of water brothers is drawn from the wounded side of reality, only this time it is not the Lord's doing. Eve may have been drawn

from the wounded side of Adam, and the Church may have been drawn from the wounded side of Christ, pouring out blood and water, but this is a matter of "Satan cannot create, he can only mock", and having rejected the real cistern: [\[M\]y people have committed two evils: they have forsaken me, the fountain of living waters, and hewed out cisterns for themselves, broken cisterns, that can hold no water.](#) And this is the choice of escape: to forsake the fountain of living water, and draw from the wounded side of reality broken cisterns that can hold no water. If you read [Within the Steel Orb](#), it peddles escape and seemingly alien wisdom, but it is a mutilation of reality that is offered: the session about controlling the telescope is in fact based in riflery, but if it were not taken from riflery it would have to be taken from somewhere else. And the session about dropping Einstein's name and claiming to ponder the deeper implications of relativity could just as well have been written in a story set in this world, or for that matter in actual live discussion.

And the emphatic choice of cannibalism among the book's features is if anything further proof that there is no other reality out there to draw on. In terms of *épater la bourgeoisie*, cannibalism delivers shock and presumably offense. But, while Heinlein compares the alien Martian world's cannibalism to the Eucharist at some point, and indeed it is an obvious comparison, one has to ask, "Where is the profound draw to cannibalism except for allowing something that is forbidden?" It is not clear to me, or to many others, what the advantage is of having one more form of meat available and even in

the book the prevalence of cannibalism does not offer clear and sincere benefits like the water brotherhood, or great psychic abilities (or both water brotherhood and great psychic powers) that Heinlein builds up in the book. If you want to eat forbidden food, forbidden at least in American culture (which does not offer the only set of rules around), you can eat animals that are kept as pets and companions: eat dog, cat, or horse. All three of these are edible, and for that matter there are cultures on earth where any or all of these are permitted food. But if the question arises, "What is the benefit of eating these animals beyond the foods permitted in American culture?" I don't see what the substantive answer would be, except for something related to our emotional reaction at the thought of eating a pet. [The Paleo Solution](#) and the call to return to more recent historical diets in [Nourishing Traditions](#) might never forbid eating cats, dogs, or horses, but neither one paints a nutritional picture where we are advised to eat the kinds of animals we keep as pets because they provide something we can't get, or can't as easily get, from eating animals Americans think of as meat. Come to think of it, neither text suggests that Jews or Muslims are missing out on any needed nutrients if they don't eat pig or other unclean animals. [The Paleo Solution](#) argues that there are essential amino acids and essential fats but no essential carbohydrates: "essential" meaning something we need and our bodies cannot make from other foods. However, there is no suggestion at all that we need to eat more types of meats, let alone cherished dogs, cats, and

horses, let alone human flesh, to be properly nourished.

Now the Martian culture which was big on cherishing things admitted cannibalism of loved ones was a way of cherishing them, but even then the Wikipedia provides a motive for cannibalism that offers a more serious incentive than having yet another form of meat: "Both types of cannibalism can also be fueled by the belief that eating a person's flesh or internal organs will endow the cannibal with some of the characteristics of the deceased." This belief, which would offer some real motivation to desire "Martian" cannibalism, is entirely absent in [Stranger in a Strange Land](#), and friends and killed enemies are both eaten without distinction for "food".

**Michael:** Who are you to make such a judgment?

**Photios:** Let me tell you about one person who decided he was going to be an icefisher, so he purchased a bunch of equipment, walked over on the ice, and started to drill down. He got down two inches before a deep, booming voice said, "There are no fish there!"

He looked around and quietly moved his equipment over 50 feet, and started to drill there. No sooner had he started than a deep booming voice said, "There are no fish there either!"

He picked up his equipment, moved over a hundred feet, looked around before drilling, when the same voice said, "Nor are there any fish there!"

He looked around and said, "Who are you, God?"

The voice said, "No! I'm the arena manager!"

I'm not the arena manager, but I am an arena employee.

**Michael:** [Pause] So we should all become monks, or something like that? I've heard some people say that every Orthodox Christian is called to be a monastic.

**Photios:** Every Orthodox Christian is called to be an ascetic, and asceticism, or spiritual struggle, is the beating heart of monasticism. And monasticism is higher than life in the world.

**Michael:** So married life in the world is sort of a "monasticism lite"?

**Photios:** Erm, kind of.

**Michael:** Meaning, "No."

**Photios:** Meaning, "No." The monastic who is saved is saved through the struggle of monastic asceticism, and the married man who is saved is saved through the struggle of caring for a family. Monasticism is higher than married life in the world.

Married life in the world is not the highest path, but it is not improved by trying to make it "virtual monasticism." Maybe a monk requires obedience to a spiritual father, and an intentionally disruptive sleep cycle, and food deliberately cooked to be as bland as it can be. Married couples have another yoke to bear, and it is a sad thing for people to get married and then "try to make up for it" by imitating monasticism. Marriage is not a sin, but holy matrimony. And it brings with it childbearing, if God so wills, so that the couple is no longer living for themselves alone but for their children. You might have heard the saying, "Men love women. Women love children. Children love pets. Life isn't fair." But if we return to the Heinlein quote you gave a while back, "Happiness is a matter of functioning the way a

human being is organized to function... but the words in English are a mere tautology, empty. In Martian they are a complete set of working instructions." Happiness in monasticism is functioning the way the monastic asceticism is organized to function, and happiness in married life in the world is functioning the way the married asceticism is organized to function. It may happen that a couple marries, has children, much later live together as brother and sister, and then split off to separate monasteries. In that sense celibacy and marriage are not mutually exclusive, and the couple is still considered to be married even if they have passed the realm of carnal knowledge. But even this is not normative to marriage; it is one of many forms holiness takes.

And here a man is reminded of Confucius's *Analects*, and its "ritual", which the Western mind may have trouble understanding because in the West "ritual," if not used metaphorically to speak of someone always giving a speech at family reunions, has a religious center of gravity. But in Confucius's whole realm of thought, "ritual" was something like a graduation ceremony or a town parade, with a civic center of gravity. And on that point someone speaking to Confucius praised someone else for doing ritual very well. And Confucius, answering somewhat indirectly, essentially said, "Ritual dictates that only a monarch may place a gate in front of his door, but he has a gate in front of his door," and mentioned one or two other areas where the man in question usurped privilege that did not belong to him. The implication is a strong criticism: this man, who is

praised for his performance in ritual and who probably worked much harder to do ritual correctly than most, undercuts it in a way that is reminiscent of [tithing mint, dill, and cummin, and neglecting justice, mercy, and faith](#). Performing the details of ritual correctly really didn't help much for someone who lacked the humility that ritual was designed to foster. At heart, placing a monarch-like gate in front of his door made him less, not more, like a monarch, and in fact placed him further from the monarch than if he did ritual, in a way that was proper to his station, without copying the privileges of people in a higher place.

**Michael:** Well, at least it's an obscure phenomenon, limited to people who are trying to be devout in the wrong way.

**Photios:** Obscure? Obscure? Obscure? The entire question of feminism hinges on a confusion that is the fruit of the same tree.

**Michael:** How so?

**Photios:** Let me quote three passages that sometimes you'll see even conservatives trying to balance out, for instance by comparing what is asked of wives with what is asked of husbands:

[But I want you to understand that the head of every man is Christ, the head of a woman is her husband, and the head of Christ is God.](#)

[I permit no woman to teach or to have authority over men; she is to keep silent. For Adam was formed first, then Eve; and Adam was not deceived, but the woman was deceived and became a transgressor. Yet woman will be saved through bearing children, if she continues in faith and](#)

love and holiness, with modesty.

Be subject to one another out of reverence for Christ. Wives, be subject to your husbands, as to the Lord. For the husband is the head of the wife as Christ is the head of the church, his body, and is himself its Savior. As the church is subject to Christ, so let wives also be subject in everything to their husbands. Husbands, love your wives, as Christ loved the church and gave himself up for her, that he might sanctify her, having cleansed her by the washing of water with the word, that he might present the church to himself in splendor, without spot or wrinkle or any such thing, that she might be holy and without blemish. Even so husbands should love their wives as their own bodies. He who loves his wife loves himself. For no man ever hates his own flesh, but nourishes and cherishes it, as Christ does the church, because we are members of his body. "For this reason a man shall leave his father and mother and be joined to his wife, and the two shall become one flesh." This mystery is a profound one, and I am saying that it refers to Christ and the church; however, let each one of you love his wife as himself, and let the wife see that she respects her husband.

**Michael:** And what do conservatives have to say for these, besides the fact that they are old and are culturally conditioned?

**Photios:** Well, they might start with the obvious and say that **you** are culturally conditioned.

**Michael:** And then what?

**Photios:** And then that someone who eats from the million year old paleo diet as the food that is optimal for Homo sapiens should not dismiss a two thousand year old text

as just too old to be worth listening to.

**Michael:** Ouch. And then what?

**Photios:** Well, in the last and longest quote, compare what is asked of husbands and of wives and who bears the brunt of the pleas. The wife is told to submit to her husband as if to the Lord. And yes, I've checked the Greek. "Wives, submit to your husbands as is fitting in the Lord" is a minor mutilation. The text says, "Wives, submit to your husbands as if to the Lord."

But the burden of the text—incidentally, in the densest passage in the [New Testament](#) for references to the Church—falls on husbands. If wives are called to show the Church's submission to Christ, husbands are to lay down their lives and die for their wives if needed. If wives bear the duty of submitting to their husbands as the Church submits to Christ, husbands are called to lay their lives down for their wives as Christ laid down his life for the Church. Wives are called to give to their husbands what the Church gives to Christ; husbands are called to give wives what Christ gives to the Church.

One might say that the sigil of male headship and authority is not a crown of gold, but a crown of thorns. People coming to this text afresh might be staggered at how much more is expected of husbands than of wives.

And the same people might be even more staggered that the text is politically incorrect because of the claim it makes on wives.

**Michael:** So the text evens out to be egalitarian after all.

**Photios:** What was the venom the Serpent poured into Eve's ear? Egalitarianism! "You shall be as gods," meaning "You shall be equal to some greater than you." And let's

pause for a moment.

There was a time—it happened to be brief, but that is beside the point—when the Serpent had stung Eve but Adam still reigned as mortal. Eve already felt the seed of death growing in her heart, even though it would be long years before the venom grew to the point of killing her completely. And let's think about what was in her heart. She was mortal; Adam was still immortal. At some point she would die, and then what? God said, "It is not good for man to be alone;" would Adam simply be celibate? Or would rather God not give her another immortal wife, to be his forever? Was there anything Eve could do to prevent Adam reigning immortal as another woman's husband?

**Michael:** Ouch.

**Photios:** It is said in some witchcraft that you knowingly allow a demon to possess you. And when that moment comes, you realize that you have allowed evil into you the same way you know that you are violently ill. You may not repent in the least, but demons are never merciful to those they inhabit. Perhaps they enable magic; but they never give the glow of spiritual health, nor can they.

Eve knew and felt the seed of death growing in her heart, that in her attempt to be like gods, she had lost her godlike ladyship over the whole Creation. And she made her second egalitarian move. The first move was to try to be equal to "gods", perhaps exalted ranks of seraphim, cherubim, thrones, dominions, powers, authorities, principalities, archangels, and angels. And her second egalitarian move was to make Adam her

equal in mortality. And she succeeded; as the Serpent stung Eve, so Eve stung her then-immortal husband who would otherwise outlive her and belong to another woman.

This is the politics of envy. This is the root of the war on educational excellence. This is the radix of Janteloven. This is the vice that moved Saul to seek David's murder as soon as he heard, "Saul has slain his thousands, and David his tens of thousands." Envy says, in essence, "I don't care if we're three feet tall or ten feet tall. All I want is that you not be taller than me."

In conversations that cross denominations and confessions, one can say with Calvinists, "We are totally depraved and stunted in our spiritual growth; we have a spiritual height of about three feet." Or one can say with Orthodox, "The image of God is present even in the most hardened sinner; the most spiritually astute Orthodox, especially monastics, find much good in the people they see; so we are at a spiritual height of about six feet." But woe to the unwary soul who says, "Monastics are six feet tall and laity are five feet tall," or "Clergy are six feet tall and laity are five feet tall," or, to give a hypersensitive trigger, "Men are six feet tall and women are five feet tall." That will unleash an explosion that dwarfs any response to Calvinists saying, "We are totally depraved and steeped in sin; we are spiritually three feet tall, if even that." Better to say that everyone is exactly one foot tall than to say that heights vary somewhere around six feet and on average most men are taller than most women, let alone that men have one role and women another.

And this general point, perhaps more focally dealt with in matters of men and women, has to do with a broader sense of pseudomorphosis affecting all modern life. Are you familiar with the term 'pseudomorphosis' in its usual Church usage?

**Michael:** I've heard... things like icons being painted in a more Western fashion, or that figure... what was it... Cyril Lucaris, the bishop whose "profession of faith" really had much more to do with Calvinism than Orthodoxy; there was that book, called [Protestant Patriarch](#), which I suppose I should read. I think there's more, but I'm forgetting the examples. Wait, there was also something about people thinking theology was philosophy whose subject-matter was God...

**Photios:** Yes; the term 'pseudomorphosis' in Orthodox culture is something like the term 'Oreo' in African-American culture, for someone who is black on the outside but too white on the inside, and acts white. The examples you gave of pseudomorphosis are all valid.

**Michael:** Ok, so we've established the meaning of 'pseudomorphosis.' What next? Do we need to say anything more to establish that the politics of envy, as you call it, is no ingredient to human happiness?

**Photios:** We haven't quite established it, not yet, because I want to use it as a metaphorical springboard to discuss something else.

**Michael:** What is that something else?

**Photios:** 'Pseudomorphosis' in standard Orthodox usage is a bit of a hydra; it's not easy to pin down, but in traditional Orthodox unsystematic fashion, it is possible to get a sense of it. As I am using here, it has

to do with all sorts of things in modern living. [The paleo diet](#) is one attempt to remedy a pseudomorphosis. I will not say if it succeeds or fails, but what it attempts to do is replace "foods" that are an anomaly in the human diet and which our body is not really well served by eating, with foods that are the standard tradition diet of the human race. The book also covers some other things, like what kind of artificially added exercise will best simulate the active lives of our forbears, and here at least I am not so interested in whether it succeeds or fails as the implicit powerful recognition that we are in an iron mask under unnatural conditions. If one were to ask Robb Wolf who he would intend [The Paleo Solution](#) to, if economics etc. were no obstacle, I believe he would answer, "Everyone who is not a hunter-gatherer today."

That is one aspect of pseudomorphosis. Another aspect is how men and women are understood, or misunderstood, and how sex is seen. Another aspect is the politics of envy. Another aspect is how so many of us [spend large chunks of time looking at a flickering screen](#). These are five of maybe a hundred holes that are being drilled down into the ice, and the arena employees' lungs are sore from shouting, "There are no fish there!"

**Michael:** Then where are the fish?

**Photios:** Some centuries back, though this may seem hard to imagine now, philosophy was understood differently; in our day philosophy is understood as an academic discipline, as something with arguments you study and respond to, and philosophy has always been that to an

extent. But in ancient times philosophy was first a way one walked and secondarily about ideas. And a number of people, all men I think, arrived at the conclusion that the truest way of philosophy was that of monasticism, which kept things alive from Plato, for instance, that do not necessarily live in a philosophy department today.

The observation that monasticism is the height of a certain understanding of philosophy, where like Mike's Martians' philosophy, religion, and science are inseparable, is a profitable observation whether or not one is a monk. [The Ladder of Divine Ascent](#), to pick one

classic, addresses perhaps two sentences of exhortation to those outside the monastic world, but it has been read, it is said, with utmost spiritual profit to Orthodox in all walks of life. Perhaps the letter in its strict sense should not always be applied to laity. There is still much of benefit, as with the [Philokalia](#) the book [Orthodox Psychotherapy](#) is essentially a realization that before Freud began positing theories about what can go wrong with us, and how what is tangled in us can be untangled and freed, the Orthodox [Philokalia](#) which could be called 'the science of spiritual struggle,' takes on that territory and does a better job. And perhaps it would be better to talk with one's priest about reading selections; reading the [Philokalia](#) when one has not been prepared for it can be an exercise in frustration. But this is best done with the consultation of one's priest.

**Michael:** So, with all of this said, what can I get that will make me happiest?

**Photios:** Well, if you're thinking in terms of dollars, let's say you get however many million dollars you think would

make you happy. Then you will discover that you still have all of your problems and the money doesn't keep you happy—at least not for long. So you will have the rare opportunity to be wealthy beyond your wildest nightmares, and perhaps after you have one luxury after another lose its glamour, failing to give either lasting satisfaction or happiness, that you will come to a realization worth every penny of your millions of dollars: in seeking happiness from wealth, you might as well have been trying to coax a stone to lay an egg.

**Michael:** Then is there no hope?

**Photios:** [So faith, hope, love abide, these three](#). Hope remains; you just have to look for it in the right places. You are assuming that your happiness will come from what you get, but you make a living by what you get and a life by what you give. [\[T\]he Son of man came not to be served but to serve, and to give his life as a ransom for many](#), and this is the key to the happiness of functioning as a person is organized to function. Forbes's survey of the happiest jobs in America found that there was little correlation between job happiness and the amount of money made: and in fact one of the twenty happiest jobs is one of the few Americans feel the need to cover up with euphemisms: no one is a plain old secretary any more; they are all executive assistants, administrators, and the like. But notwithstanding the fact that America thinks being a secretary needs a euphemism, being a secretary ranked as one of the twenty happiest jobs in America, alongside bank tellers who serve clients by helping them with financial nuts and bolts, and some customer service

representatives. And there is a very simple reason for that. Among many others, secretaries serve.

And that is, if we may return to Heinlein one of the three keys that unlocks "Happiness is a matter of functioning the way a human being is organized to function... but the words in English are a mere tautology, empty. In Martian they are a complete set of working instructions." Now Michael Valentine Smith mentions 'faith' as belonging among the list of obscene words Jubal told him not to use, and he is emphatic: not faith but climbing the peaks of spiritual discipline.

However, the [Philokalia](#) in its embrace of faith does climb the peaks of spiritual discipline. And all of these are a preliminary that many people don't need; human fulfillment is found, not in being served, but in serving.

Such was Christ's act; such was his example.

Not that reading the [Philokalia](#) is necessary to salvation. Monks have reached the peaks of mystic contemplation without having any books; among the many notable monastics who never read anything, and in fact did not know how to read, is [St. Mary of Egypt](#). And one minor clergy said, "There are two books you do not read: the [Philokalia](#) and the [Rudder](#)," not because they are bad—they are arguably the second and third most important collections to Orthodoxy outside the Bible—but because they have raw industrial strength power that has not been selected, boiled to essentials, and then packaged in a way that will just fit anyone who reads it. [The Philokalia](#) is a collection of texts at all various levels of spiritual maturity, and the [Rudder](#) is basically a book of rules for bishops to apply with

strictness or leniency as is pastorally appropriate to the situation. And the [Rudder](#) has some of the most valuable rules the Orthodox Church owns; but it still should not be confused with ordinary devotional materials designed to build up and edify the lay faithful.

And one may adapt St. Paul and say, "**If I have all manner of knowledge of antiquarian texts and I read the [Philokalia](#) and the [Rudder](#), but I do not serve in love, I am nothing.**"

**Michael:** So then it's all we learned in kindergarden?

**Photios:** There are all sorts of minor insights along the way. There is a Rabbinic tradition of having a *kelal*, a nutshell that for its brevity none the less concentrates the distilled essence of Scripture; such as, [He has showed you, O man, what is good; and what does the LORD require of you but to do justice, and to love kindness, and to walk humbly with your God?](#), and what I am going to quote is not a *kelal*; it's from the rest of the Scripture and has something of a character of a footnote. But Ecclesiasticus tells us, [Honor the physician with the honor due him, according to your need of him, for the Lord created him; for healing comes from the Most High, and he will receive a gift from the king.](#) And there is a place for exercise; there is a place for diet. There may be also a place for "Let the buyer beware", because fads come and go; the author of [The Paleo Solution](#) all but killed himself trying to eat healthily by being a vegetarian; [the paleo diet](#) is posed to be the next fad diet and that is reason to view it carefully. The medical community, like many others, has its fads and changes its conclusions much more

quickly than developments in research would warrant. Still I wouldn't make these things the center. "Honor the physician..." is not a kelal at all, let alone one that should be the rudder of your life.

**Michael:** If I may ask, what is the greatest kelal?

**Photios:** It's one endorsed by a rabbi you've heard of.

**Michael:** Sorry, but I'm really not up to par on all things Jewish. Could you quote it for me?

**Photios:** You shall love the Lord your God with all your heart, and with all your soul, and with all your mind. This is the great and first commandment. And a second is like it, You shall love your neighbor as yourself.

# **Changes in Mac OSX Over Time: The Good Parts**

## **C++: The Good Parts**

C++ is the best example of second-system effect since the  
OS/360 project - Henry Spenser

Even Bjarne Stroustrup has some sense that there is indeed a  
smaller and more elegant language struggling to get out of C++.

He is right that that language is not Java or C#, but I would  
suggest that this more elegant language has been right under our  
noses the whole time: **C!**

## **Now if we could turn back the clock on MacOS**

I used to think that OSX was my favorite flavor of Unix. Now I think that the Mac, iPad, iPhone, and Apple Watch may be preferred for nontechnical users on all counts, but Apple has been more and more going its own way, and the result has made an environment that is more and more hostile to Unix / Linux gurus. Some of this is discussed further in [Macs are now Super.Computer.s running "IRIX" a Super.Computer. OS!](#)

## Terminal confusion

I have narrated above the breakage that shipped to me with OSX 12.2.4; the breakage that shipped with the OSX 12.2.2 update was Terminal.app crashing on a regular basis. And while I don't wish to patronize developers who work with graphical IDEs, the two most heavily used applications I have are Google Chrome and Terminal. When I poked around, I was pointed to [an Apple developer bug first posted in 2016 that has 147 "I have this problem too" votes](#)... I wish they had done something more polite to Unix users than breaking and not fixing Terminal, like setting a Terminal.app background image of someone flipping the bird at command-line Unix / Linux types. Really, flipping the bird would be markedly more polite.

In conversations with technical support about malfunctioning in Apple's version of Apache, it took me an escalation all the way to level 3 support before I spoke with someone who knew that the Macintosh had a command line (let alone having any idea what that meant). And I was told that Apple supported GUI use of e.g. webservers, but not command line.

More broadly, it's been harder and harder by the year to get things working and I was astonished after initial difficulties installing SuiteCRM what my research turned up: Apple has

removed parts of the OS that that project needed to run.

## An even bigger shock

A much bigger shock came when I created a Linux VM to install some open source software projects I had meant to install natively.

I was **shocked** about how easy it was.

It was the command line version of "Point and click".

I realized that over the years I had become more and more accustomed to installing open source software under MacOS being like out-stubborning an obscure and crufty flavor of Unix (such as Irix on NCSA supercomputers, with a general comment of "Nothing works on Irix!"). And working on installing major open source projects recalls [a favorite xkcd comic about the joy of first meeting Python](#).

**Tolerating upgrades that  
break software:**

*Do you remember how  
people used to just accept  
the forever close at hand  
BSOD?*

Before Windows XP came out, I remember trying to make a point to a non-hacker friend that "Computers are logical but not rational." Meaning that from a programming standpoint they ideally do neither more nor less than what the logic in a computer program called for, but state-of-the-art AI could not make sense of the basics of a children's "I Can Read" book. (For that matter, computers cannot understand the gist of a program.

They may execute the program, but only programmers understand the gist.)

She said, "I disagree. What if you're using a computer and the mouse freezes?"

In the ensuing conversation, I failed completely in my efforts to communicate that **incessant** crashes on par with the Blue Screen of Death were simply not an automatic feature of how computers act, and that my Linux box did not malfunction at anywhere near the violence of Windows, on which point I quote

Tad Phetteplace:

In a surprise announcement today, Microsoft President Steve Ballmer revealed that the Redmond-based company will allow computer resellers and end-users to customize the appearance of the Blue Screen of Death (BSOD), the screen that displays when the Windows operating system crashes.

The move comes as the result of numerous focus groups and customer surveys done by Microsoft. Thousands of Microsoft customers were asked, "What do you spend the most time doing on your computer?"

A surprising number of respondents said, "Staring at a Blue Screen of Death." At 54 percent, it was the top answer, beating the second place answer "Downloading XXXScans" by an easy 12 points.

"We immediately recognized this as a great opportunity for ourselves, our channel partners, and especially our customers," explained the excited Ballmer to a room full of reporters.

Immense video displays were used to show images of the new customizable BSOD screen side-by-side with the older static version. Users can select from a collection of "BSOD Themes," allowing them to instead have a Mauve Screen of Death or even a Paisley Screen of Death. Graphics and multimedia content can now be incorporated into the screen, making the BSOD the perfect conduit for delivering product information and entertainment to Windows users.

The BSOD is by far the most recognized feature of the Windows operating system, and as a result, Microsoft has historically insisted on total control over its look and feel. This recent departure from that policy reflects Microsoft's recognition of the Windows desktop itself as the "ultimate information portal." By default, the new BSOD will be

configured to show a random selection of Microsoft product information whenever the system crashes. Microsoft channel partners can negotiate with Microsoft for the right to customize the BSOD on systems they ship.

Major computer resellers such as Compaq, Gateway, and Dell are already lining up for premier placement on the new and improved BSOD.

Ballmer concluded by getting a dig in against the Open Source community. "This just goes to show that Microsoft continues to innovate at a much faster pace than open source. I have yet to see any evidence that Linux even has a BSOD, let alone a customizable one."

Most of the software upgrades I have purchased in over a decade of Mac ownership have been because an OSX upgrade broke them completely.

On this point I would distinguish between Windows and Mac on the one hand, and Linux on the other. Microsoft and Apple both need to make changes that people have to buy different software over time; Linux may include mistakes but there is no built-in need to radically change everything on a regular basis. Now some Linux programming may change quickly: front-end web developers face a very volatile list of technologies they should know. However, something said about Unix applies to Linux to a degree that is simply unparalleled in Windows or Mac: "Unix has a steep learning curve, but you only have to climb it once."

OSX admittedly has better UX than Linux, and possibly it make sense for open source types to buy a Mac, run VMware Fusion in Unity mode, and do Linux development and open source software use from a Linux Mint VM. (My own choice is just to do Linux, with Windows VM's for compatibility.) However, for Unix

and Linux wizards, the container is one that occasionally gives a nasty surprise.

**Beautiful things work  
better:  
*An interesting solution***

I've given a once-over to Linux Mint Sonya, to address UX tweaks and to echo some of that old glory. As is appropriate to an appliance, passwords are not needed (though the usual root methods of assigning a Linux password work better). The desktop and background are laid out to be truly beautiful!

To pick one little example of improved UX: copy is Control-C, and paste is Control-V, with gnome-terminal or without; if you want to send a literal Control-C, then Shift-Control-C will do that, and likewise for Control-V. This cuts down on frustrating attempts to remember, "In this context, will I copy by typing Control-C, or Control-Shift-C?" There are other little touches.

For instance, Chrome is already installed, and the default Firefox search engine is configured out of the box to be, drum roll please... **Google!**"

Mint comes with a search engine that in my experience only have SERPs with ads above the fold that are formatted exactly or almost exactly like real organic search results. And not only is Google not the main search engine: it is FUDded, banished to a list options that are either not monetizable to Mint's makers, or are considered problematic and potentially unsafe. (Mint's FUDding does not distinguish which is which; it is set up to make

Google look seedy.)

Perhaps you don't like the Aqua interface; it is if nothing else the gold star that North Korea's ~~One Star Linux~~ Red Star Linux offers, and people seem interested in an Aqua-themed Linux enough to write HOWTO's to get a root shell and migrate to English. Even if they advise against serious use, not because a fresh install has software that's years obsolete software, but because the entire environment could be described not so much as having spyware, but **being** spyware.

Or perhaps it might served as a change of scenery, a virtual vacation of a virtual machine.

### [Download](#)

This is a virtual machine from [VMware Workstation Player](#). If you have not used virtualization software before, you may need to turn on hardware virtualization on your BIOS.

You can likely find instructions to do this by searching for "bios enable hardware virtualization" and adding the manufacturer and model for your machine. If you aren't feeling brave, just ask for help from the local teenage computer guru.

**Macs Are Now  
Super.Computer.s  
Running "IRIX",  
a  
Super.Computer.  
OS!**

But worst of all is what they've done  
To software that we used to run  
Like dbx and even /bin/cc.  
Compilers now have license locks  
Wrapped up in OpenWindows crocks —  
We even have to pay for GCC!  
The applications broke;  
/usr/local went up in smoke.  
The features we've depended on  
Before too long will all be gone  
But Sun, I'm sure, will carry on  
By peddling Solaris,  
Forever singing,  
"Bye, bye, SunOS 4.1.3!  
ATT System V has replaced BSD

ATT System V has replaced BSD.  
You can cling to the standards of the industry  
But only if you pay the right fee —  
Only if you pay the right fee . . ."

Lyrics by N.R. "Norm" Lunde, [The Day that SunOS Died](#), to  
the tune of "American Pie."

## The operating system of supercomputers

When I was studying math at the University of Illinois, my first year's support was as a teacher's assistant, and my second one, that I was quite happy about, was as a research assistant at the National Center for Supercomputing Applications. I walked in vaguely hoping to work on Cray supercomputers: in fact I worked on successor supercomputers made by Silicon Graphics. And really, the main workhorse computer I was working with had 32 CPU's, which wasn't their most powerful, but today you need to really dig today to find a computer with 32 CPU's even though twenty years have passed since then.

Part of my work was system administration, which covered software installation, updates, and related responsibilities. In addition to this I made one major program that addressed a critical interest. It would run some software in question with different numbers of CPU's, giving flexibility and control in producing a graph that shows at a glance how the program is running at the specified numbers of CPU's. I have no idea why any revision of that program would still be in use today, but one of the extremely pressing questions on the minds of the userbase was, "Is my program scaling the way I am attempting to do to increased CPU's?" and this program succeeded enough to answer that question at a glance.

I considered, and still consider my time there to be a great privilege, and I remember seeing an e-mail offering a privately owned(!) used SGI Octane for \$8000. The SGI computers were really something.

However, the OS those computers were tied to was another deal entirely. They ran a flavor of Unix called Irix, and in a social setting where Unix chauvinism was mainstream. I mentioned above that I installed software; that does not usually qualify as evidence of any particularly great skill; on Linux today you can run "sudo apt-get install apache2" and maybe enter a password and everything is neatly tucked away. There might be something substantial going on behind the scenes, but the requisite effort and knowledge to install Apache really just boils down to the command line equivalent to "point and click."

This is not true of the SGI version of Unix called Irix. Everyone I remember dealing with was a Unix wizard, but I do not recall a single person who liked Irix. I remember one person voicing hopes that some would port Linux to run on SGI supercomputers. For an example of what was wrong, and a particularly obnoxious example, read the following:

#### **Introduction**

Thank you for purchasing InCom's PowerComp Libraries. At InCom, customer satisfaction is our number one priority, and we hope that you will be pleased with the power of our libraries. Please follow all of the instructions in order to enjoy a quick and easy installation.

#### **Getting Started**

In this guide, information which you will need to supply will be enclosed in angle brackets, <like this>. Commands which you

will have to enter will be indented,

like this.

You will need to provide a loading directory, in which to load the material from tape (/tmp/pcl is recommended), and a permanent installation directory (/usr/local/pcl is recommended).

### **Loading From Tape**

First create and change directory to the loading directory:

```
mkdir <working directory>  
cd <working directory>
```

Now you are ready to load the software from tape.

The specific device name needed to load the tape varies with hardware vendors, and may be found in Appendix A, "Vendors and Device Names".

Load the software from tape:

```
tar xvf /dev/<device name>
```

You have now loaded all of the software from tape, and are ready to compile and install the PowerComp libraries.

### **Compiling and Installing the PowerComp Libraries**

Compiling and installing the libraries is handled by a user-friendly shell script. You will need to provide some information to the script, such as your organization name and registration number. To run the script, type

```
/bin/sh pcl/pcl.install -d <installation directory>
```

Follow the script's directions, and provide the information which it prompts for.

When the script prompts you for the directory in which the distribution files are located, you will find that you are unable to provide it with any directory which the script will deem satisfactory...

Then spit into the computer's ventilation slots. This will complete different circuits inside the computer, causing its motherboard and cards to function in ways that the engineers never intended, thereby making your system compatible with our libraries.

Reboot your computer. The installation is now complete.

(N.B. I posted this and the XEmacs maintainer asked permission to include it under the XEmacs installation instructions.)

This was written after attempting an installation under Irix and finding that I was being prompted for a directory location by a shell script that rejected every single reasonable (and unreasonable) answer I provided. I don't know exactly what the result of that installation attempt was; if I recall correctly, my boss was not the faintest bit surprised that I had extensively offered directories and that no single directory was ever accepted by the installer. The general comment I remember is, "Nothing works under Irix!"

If I may boast a bit, my achievements at the National Center for Supercomputing Applications hold two things that were noteworthy: providing a nifty tool that helped with a major need, and installing basic software under circumstances where the level of difficulty installing something on Irix could be on par with out-stubborning a cat.

I've been involved with several flavors of Unix before and since then; I was in charge of a Santa Cruz Operation Unix lab for a previous position and I cut my teeth as a system

for a previous position, and I cut my teeth as a system administrator on (4.1.3, BSD) SunOS in high school, as well as Linux distributions including Gentoo (mentality as taken from forum signature: 'Ubuntu: an African word meaning, 'Gentoo is too hard for me.''), which is penny wise and pound foolish in that it allows much tighter optimizations of binaries than anything I know, but regular updates would frequently break, and one used standard investigative skills to search for who found the breakage before you, and what it was that made it work. In other words, the cost of shaving off microseconds or milliseconds off of executing XYZ software was easily an hour a week of your time playing mechanic for random breakage as your computer was kept up to date. And that was after learning specialized search approaches to find pages saying "I had this go wrong and here is how I fixed it or found a workaround."

## OSX as a flavor of Unix

For a long time I thought in terms of MacOS being my favorite flavor of Unix. (N.B. My Unixy usage, for instance, included Homebrew for Unix software not available as a regular Mac app, and my two most heavily used applications were Chrome and Terminal, with VMware in third place.) I'd done plenty of easy software installations, and problematic installations as well, and I was content with either. When certain things like installing software became harder, I didn't particularly notice.

However, I did notice when, trying to build up my Mac to function as a server running several useful websites, that it was taking a while to install SugarCRM. And I was caught off guard when web discussion said that Apple had removed certain OS components that SugarCRM tried to run. (Huh?) I opted for a plan B of trying to install SugarCRM on a Linux Mint virtual machine under VMware.

I was astonished at how easy it was, and how much a matter of "Follow your nose." It was the Linux command-line equivalent of "point and click": follow a short, simple set of instructions (if even that), and you have a working software installation in no time. Then I installed one or two additional packages. Again, practically "point and click" difficulty level. These things that I had wrestled with on my Mac, sometimes winning, sometimes not, and Linux Mint cut like a hot knife through butter.

I shifted gears then; I no longer wanted to make the websites (SugarCRM / SuiteCRM, Request Tracker, MediaWiki, etc.) based on my Mac and resort to proxying for a Linux Mint VM for the remainder I couldn't get working on my Mac; I thought I'd make a fresh start on a new Linux VM without any history, and this time through aim to make an appliance that could profitably be offered to others.

Unfortunately, I began this appliance project after installing an update to OSX 10.12.4, and once that update was in place I began to experience multiple daily crashes from every VMware Virtual Machine I tried. Suddenly installing things under Linux was harder than directly on my Mac.

I have admittedly been using a slightly old (7.1.3) VMware Fusion, and I'd consider upgrading it. However, a fresh copy of VirtualBox seems do to predictably well at everything I have tried; an up-to-date VMware Fusion installation is off the critical path for me now.

(I believe that my last VMware Fusion update was after the time VMware stopped cold after an Apple OS upgrade.)

## Terminal confusion

I have narrated above the breakage that shipped to me with OSX 12.2.4; the breakage that shipped with the OSX 12.2.2 update was Terminal.app crashing on a regular basis. And while I don't wish to patronize developers who work with graphical IDE's, the two most heavily used applications I have are Google Chrome and Terminal. When I poked around, I was pointed to [an Apple developer bug first posted in 2016 that has 147 "I have this problem too" votes](#). It's not resolved, and people are advised to circumvent the (immediate) problem by using [iTerm2](#). But I would like to make a point, and again no slight is intended against developers who leverage graphical IDE's like PyCharm:

I have used the Unix / Linux command line for decades, and it is a powerful toolchest to be able to use. While there are of course differences between Linux and MacOS's BSD-based computing environments, I find it quite helpful that my main way of doing Unixy things on a Mac works essentially unchanged on a Linux Virtual Private Server, or shelled in to my father's NetBSD server, or in general being able to work with someone and have full superpowers merely by downloading PuTTY and not making further demands on a Windows box's hard drive and resources.

Maybe I would program better if I knew how to really take advantage of a top-notch IDE, but as things stand, I acquired a One Laptop Per Child to serve as a tool for a disabled child, and

in following a HOWTO to beef up the laptop to serve these kinds of needs, I was still surprised and delighted when I pulled up a Red Hat command line terminal window and felt, "This speaks my language!" Apple, if anything, is giving cues that it is actively forgetting, if not its Unixy internals, at least Unix guru customers. I wish they had done something more polite to Unix users than breaking and not fixing Terminal, like setting a Terminal.app background image of someone flipping the bird at command-line Unix / Linux types. Really, flipping the bird would be markedly more polite.

That's what broke for the Unix crowd with 10.12.2.

My VMware installation became heavily destabilized with 10.12.4.

**I have no idea what is next.**

As far as Terminal goes, destabilizing it to some degree would make an excellent move to tell Unix wizards "You're not wanted here," while people using a Mac as it is marketed now, getting powerful software from the hardware store instead of hacking in Python, wouldn't grasp the difference even with extended explanation.

## Failing to support mainstream Unix developer interests

(Originally posted as part of a [StackExchange question here](#); the question is left very technical as originally written, and skip down to [the next section](#).)

More recently I posted another issue: there's something called Apache installed, and I can't do an `apachectl start` twice without getting an error of `/System/Library/LaunchDaemons/org.apache.httpd.plist: service already loaded`, but I can't for the life of me connect to port 80 on localhost. I posted on apple.SE at <https://superuser.com/questions/1185171/how-do-i-get-apache-to-run-from-osx-sierra-10-12-13> :

I've made multiple searches for e.g. "apache Sierra", but haven't been able to find my issue.

I have a MacBook Pro running OSX Sierra 10.12.3, and it seems to have some version of Apache installed, but I can't connect on port 80 (or 443), either with a browser, or by running `telnet localhost 80`. If I run `apachectl restart`, it runs without reported error; if I run `apachectl stop` it runs without reported error; if I run `apachectl start` when I think Apache is running, it gives an error message, `/System/Library/LaunchDaemons/org.apache.httpd.plist:`

service already loaded. `A` which `apachectl` gives  
`/usr/sbin/apachectl`, so I believe I'm running OSX's native  
Apache and not a version pulled in from Homebrew.  
What can/should I be doing so that Apache is running  
normally?

Thanks,

After the question was old enough to be eligible for bounty,  
and I had gotten off the phone with Apple technical support, I  
flagged it for moderator attention and requested migration to  
ServerFault.

In the technical support call, which lasted a bit short of an  
hour, I was escalated twice; even the first escalation was with  
someone who didn't know the command line and didn't know what  
Apache was. I was told that Apple offers Server which may  
include Apache, installable from the store, and supported GUI-  
driven use of Server, but Apple technical support does not offer  
help for the command line or command-line-driven Apache setup  
and configuration file editing.

Those both look like significant red flags. It's mainstream for  
users who want Macs to offer Unix functionality to want a stable  
Terminal.app and it's mainstream for web developers to want a  
working Apache installation on their box even if it's not shared.

Now I know that MacOS and iOS, with their `NSStrings`, owe a  
nearly indelible debt to Unix. And there are workarounds, like  
[iTerm2](#) and Homebrew or source builds of Apache, and I'm using  
iTerm2 and plan on building another Apache. But I see ominous  
writing on the wall; it seems that Apple is losing its respect for  
hackerdom.

Are there other examples or signs that Apple is dropping care  
for Unix hackers?

**“On [date], Apple announced the death of the Mac. And Apple couldn’t be happier!”**

One article, I read an article about the introduction of the iPad, with a title like, “On [date], Apple announced the death of the Mac. And Apple couldn’t be happier!” The announcement of “the death of the Mac” was a reference to the release of the iPad, a device that is giving other devices including the Mac a run for its money. And indeed a basic observation holds: Go to a computer store and ask for a smartphone or tablet, and a salesperson will try to guide you to choosing between a dizzying array of options. Go to a computer store and ask for a desktop PC, and you may get some comment like, “They’re out in the back, next to the mainframes.”

At the risk of belaboring the obvious, on technical grounds iOS devices are a more purist Steve Jobs-like version of the Mac. Or at least they are as programming goes. As regards physical technology, they represent something that is smaller, lighter, use a touchscreen well (with high pixel density!), and in general more shrewdly adjusted than any laptop or desktop I am aware of, Macs and e.g. MacBook Air’s specifically included. But if we bracket the step from movable laptops to mobile iPhones

and iPads, and look from a programming perspective, iOS is basically MacOS (if you're in the App store for either, you're using e.g. NSStrings), but stricter and more focused around some UX concerns. There is a command line for iOS devices, developers apparently consider it essential, and my understanding is that a jailbroken iOS device usually unhides it. However, the technical aspects have been corralled, out of heavily Unix-powered, OSX-based tools, to be able to say, "There's an app for that!", and present users with a hand-picked set of offerings in a walled garden. It is technically possible to program your own device, but only if you pay a developer's subscription membership, and one gets the sense that Apple allows people programming own devices as a necessary evil to get a flow of app submissions that will allow regular customers to have every app etc. that Apple would like to be included among the iOS ecosystem. And my own attempts to migrate from a Mac to an iOS devices have been failures, because one window-filling app (even if that app allows remote access to a server's command line) does not support complex tasks with multiple terminal windows with each terminal window doing its own part.

But here is something that I did not hear from Apple being delighted at "the death of the Mac." It is also different related suggestions that XCode could be available to Linux, possibly in order to obviate the need to sell Macs to enable developers to target iOS. My original interpretation was that, over time, iOS device sales would bury MacBook sales, as mobile sales seem to everywhere be burying laptop sales. And that may have been all that a journalist writing a punchy headline really meant.

But what I've observed is different. Unix wizards seem to be less and less welcome to use Macs as offering a very nice consumer OS with all the comforts of \$HOME. We're being kicked

out, or at least there are clearer and clearer hints to go away. Allowing Terminal.app not to remain broken, and (AFAIK) not even steering people to [iTerm2](#) when developers ask for any workaround, is a step beyond how institutions like Barnes & Nobles would play classical music that on some counts was used to subtly tell teenagers that they were not welcome to hang out. Frequent Terminal.app crashes are not in any sense subtle; they create a hostile environment to customers who want the Unix command line without perturbing general public customers who will in all likelihood not know what a Unix command line is.

Top-notch iPads are being sold as "Super. Computer."s, and OSX's progressive Unix breakage is starting to seem like the supercomputer OS I used, Irix. I grew up with Ultrix, and I've had exposure to more flavors of Unix than I can remember, and more Linux distributions than I can remember, and Gentoo and Sierra 1.12.4 have together done the best I've seen yet to give nasty Irix a run for its money. During the time, I have done software installations that would succeed without further attention after a "brew install \_\_\_\_\_" or "aptitude install \_\_\_\_\_". I've also done installation-driven research investigations that rival outstuborning a cat as far as difficulty goes. I hadn't really noticed how many attempts to get something working under OSX included repeated web searches, or how many immediate approaches had been failing, until I went to a Linux VM to try and see if I could install SuiteCRM, and encountered a difficulty one notch above "point and click," not more. I don't remember if I was given installation instructions, but if there were, they were short, they worked the first time, and they were unobtrusive enough that I've forgotten them completely.

**The more installments complete coming in, the more it looks like the Unix side of OSX is turning into Irix.**

## Epilogue

This article was posted while I did not know where my iPhone was. For the second time since acquiring this iPhone 7, I have lost it and been unable to locate it by usual means, such as calling my iPhone from another line and should have heard vibration, although I believe it is in the house as my iPad is proxying phone calls to my iPhone and sound is crisp and clear. My Apple ID password is locked in my iPhone password manager (my fault; I should have been using redundant password managers from the beginning), and so I can only look up my password to use Find My iPhone if I track down and use my iPhone. There is only one recovery option driven by a manual anti-fraud investigative process on Apple's end, and it's been a couple of days since I attempted to exercise that option. I called Apple technical support and after a couple of dead-end calls spent a fifteen or twenty minute call with a tech support person who checked in with her supervisor and explained that, because I had requested some days before to recover Apple ID account access, that she was not allowed to do anything to change my password or otherwise let me in. I asked about an ETA for my multi-day password recovery, and simply was not provided with any estimate of any sort even though I had a good rapport with the technical support representative and she tried to give me practically everything she could.

There is no one for shiny gadgets like Apple, although I gave my Apple Watch to my brother because I thought he'd genuinely like the "Mickey Mouse watch" bit and I found that the watch I thought I could program was on a device that didn't even have a web browser. I'm not saying I couldn't enjoy a programmable Android watch, but I am right now happy to have a 20bar water resistant compass watch (not a smartwatch) to take to my adventures. Right now the brand is appealing to me less and less.

# The Magician's Triplet: Magician, Scientist, Reformer

I would like to take a Protestant church's electronic sign for a starting point. The sign, with a portrait of Martin Luther to the right, inviting people to an October 31st "Reformation Day potluck." When I stopped driving to pick up a few things from ALDI's, I tweeted:

**I passed a church sign advertising a "Reformation Day" potluck.**

**I guess Orthodox might also confuse Halloween with the Reformation...**

Those words, if one steps beyond a tweet, may be taken as a witty jibe not obviously connected with reality. Some people might ask an obvious question: "What train of thought was behind **that** jab?" And I'd like to look at that, and answer that real or imagined interlocutor who might wonder.

## [The Abolition of Man](#) and [The Magician's Twin](#)

When I first read [The Abolition of Man](#) as a student at [Calvin College](#), I was quite enthralled, and in my political science class, I asked, "Do you agree with C.S. Lewis in *The Abolition of Man* abâ€™" and my teacher, a well-respected professor and a consummate communicator, cut me off before I could begin to say which specific point I was inquiring about, and basically said, "Yes and amen to the whole thing!" as as brilliant analysis of what is going on in both modernist and postmodernist projects alike.

C.S. Lewis's [The Abolition of Man](#) (available online in a [really ugly webpage](#)) is a small and easily enough overlooked book. It is, like [Mere Christianity](#), a book in which a few essays are brought together in succession. In front matter, Lewis says that the (short) nonfiction title of [The Abolition of Man](#) and the (long) novel of [That Hideous Strength](#) represent two attempts to make the same basic point in two different literary formats. It isn't as flashy as [The Chronicles of Narnia](#), and perhaps the first two essays are not captivating at the same level of the third. However, let me say without further argument here that the book is profoundly significant.

Let me bring in another partner in the dialogue: [The Magician's Twin: C.S. Lewis, Science, Scientism, and Society](#). The title may need some explanation to someone who does not know

Lewis, but I cannot ever read a book with so big a thesis so brilliantly summarized in so few words. There are allusions to two of his works: [The Abolition of Man](#), which as discussed below calls the early scientist and the contemporary "high noon of magic" to be twins, motivated by science, but science blossomed and magic failed because science worked and magic didn't. (In other words, a metaphorical Darwinian "survival of the fittest" cause science to ultimately succeed and magic to ultimately fail). In [The Magician's Nephew](#), Lewis has managed to pull off the rather shocking feat of presenting and critiquing the ultimately banal figures of the Renaissance magus and the Nietzschean *Äœbermensch* (and its multitude of other incarnations) in a way that is genuinely appropriate in a children's book. The title of "The Magician's Twin," in three words including the word "The", quotes by implication two major critiques Lewis provided, and one could almost say that the rest, as some mathematicians would say, "is left as an exercise for the reader."

The book has flaws, some of them noteworthy, in particular letting [Discovery Institute](#) opinions about what Lewis would say trump what in fact he clearly **did** say. I detected, if I recall correctly, collisions with bits of [Mere Christianity](#). And the most driving motivation is to compellingly argue Intelligent Design. However, I'm not interested in engaging origins questions now (you can read my muddled ebook on the topic [here](#)).

What does interest me is what [The Magician's Twin](#) pulls from [The Abolition of Man's](#) side of the family. On that point I quote Lewis's last essay at length:

Nothing I can say will prevent some people from describing this lecture as an attack on science. I deny the charge, of course: and real Natural Philosophers (there are

some now alive) will perceive that in defending value I defend inter alia the value of knowledge, which must die like every other when its roots in the Tao [the basic wisdom of mankind, for which Lewis mentions other equally acceptable names such as "first principles" or "first platitudes"] are cut. But I can go further than that. I even suggest that from Science herself the cure might come.

I have described as a 'magician's bargain' that process whereby man surrenders object after object, and finally himself, to Nature in return for power. And I meant what I said. The fact that the scientist has succeeded where the magician failed has put such a wide contrast between them in popular thought that the real story of the birth of Science is misunderstood. You will even find people who write about the sixteenth century as if Magic were a medieval survival and Science the new thing that came in to sweep it away. Those who have studied the period know better. There was very little magic in the Middle Ages: the sixteenth and seventeenth centuries are the high noon of magic. The serious magical endeavour and the serious scientific endeavour are twins: one was sickly and died, the other strong and thrived. But they were twins. They were born of the same impulse. I allow that some (certainly not all) of the early scientists were actuated by a pure love of knowledge. But if we consider the temper of that age as a whole we can discern the impulse of which I speak.

There is something which unites magic and applied science while separating both from the wisdom of earlier ages. For the wise men of old the cardinal problem had been how to conform the soul to reality, and the solution had been knowledge, self-discipline, and virtue. For magic and applied

science alike the problem is how to subdue reality to the wishes of men: the solution is a technique; and both, in the practice of this technique, are ready to do things hitherto regarded as disgusting and impious " such as digging up and mutilating the dead.

If we compare the chief trumpeter of the new era (Bacon) with Marlowe's Faustus, the similarity is striking. You will read in some critics that Faustus has a thirst for knowledge. In reality, he hardly mentions it. It is not truth he wants from the devils, but gold and guns and girls. 'All things that move between the quiet poles 'shall be at his command' and 'a sound magician is a mighty god'. In the same spirit Bacon condemns those who value knowledge as an end in itself: this, for him, is to 'use as a mistress for pleasure what ought to be a spouse for fruit.' The true object is to extend Man's power to the performance of all things possible. He rejects magic because it does not work; but his goal is that of the magician. In Paracelsus the characters of magician and scientist are combined. No doubt those who really founded modern science were usually those whose love of truth exceeded their love of power; in every mixed movement the efficacy comes from the good elements not from the bad. But the presence of the bad elements is not irrelevant to the direction the efficacy takes. It might be going too far to say that the modern scientific movement was tainted from its birth: but I think it would be true to say that it was born in an unhealthy neighbourhood and at an inauspicious hour. Its triumphs may have been too rapid and purchased at too high a price: reconsideration, and something like repentance, may be required.

Is it, then, possible to imagine a new Natural Philosophy,

continually conscious that the natural object' produced by analysis and abstraction is not reality but only a view, and always correcting the abstraction? I hardly know what I am asking for. I hear rumours that Goethe's approach to nature deserves fuller consideration " that even Dr Steiner may have seen something that orthodox researchers have missed. The regenerate science which I have in mind would not do even to minerals and vegetables what modern science threatens to do to man himself. When it explained it would not explain away. When it spoke of the parts it would remember the whole. While studying the It it would not lose what Martin Buber calls the Thou-situation. The analogy between the Tao of Man and the instincts of an animal species would mean for it new light cast on the unknown thing. Instinct, by the only known reality of conscience and not a reduction of conscience to the category of Instinct. Its followers would not be free with the words only and merely. In a word, it would conquer Nature without being at the same time conquered by her and buy knowledge at a lower cost than that of life.

Perhaps I am asking impossibilities.

I'm drawing a blank for anything I've seen in a life's acquaintance with the sciences to see how I have ever met this postulate as true.

In my lifetime I have seen a shift in the most prestigious of sciences, physics (only a mathematician would be insulted to be compared with a physicist), shift from an empirical science to a fashionable superstring theory in which physics abdicates from the ancient scientific discipline of refining hypotheses, theories, and laws in light of experiments meant to test them in a

feedback loop. With it, the discipline of physics abdicates from all fully justified claim to be science. And this is specifically physics we are talking about: hence the boilerplate Physics Envy Declaration, where practitioners of one's own academic discipline are declared to be **scientists-and-they-are-just-as-much-scientists-as-people-in-the-so-called-"hard-sciences"-like-physics.**

I do not say that a solution could not come from science; I do say that I understand what are called the STEM (Science, Technology, Engineering, and Mathematics) disciplines after people started grinding a certain very heavy political axe, I've had some pretty impressive achievements, and C.S. Lewis simply did not understand the science of his time too far above the level of an educated non-scientist: probably the biggest two clues that give away [The Dark Tower](#) as the work of another hand are that the author ineptly portrays portraiture gone mad in a world where portraiture would never have come to exist, and that the manuscript is hard science fiction at a level far beyond even Lewis's science fiction. Lewis may have written [the first science fiction title in which aliens are honorable, noble beings instead of vicious monsters](#), but [The Dark Tower](#) was written by someone who knew the hard sciences and hard science fiction much more than Lewis and humanities and literature much less. (The runner-up clue is anachronous placement of Ransom that I cannot reconcile with the chronological development of that character at any point in the [Space Trilogy](#).)

However, that is just a distraction.

## A third shoe to drop

There are three shoes to drop; one prominent archetype of modern science's first centuries has been hidden.

Besides the figure of the Renaissance Magus and the Founding Scientist is the intertwined figure of the Reformer.

Now I would like to mention three reasons why Lewis might have most likely thought of it and not discussed it.

**First of all**, people who write an academic or scholarly book usually try to hold on to a tightly focused thesis. A scholar does not ordinarily have the faintest wish to write a 1000-volume encyclopedia about everything. This may represent a shift in academic humanism since the Renaissance and Early Modern times, but Lewis has written a small, focused, and readable book. I don't see how to charitably criticize Lewis on the grounds that he didn't write up a brainstorm of every possible tangent; he has written a short book that was probably aiming to tax the reader's attention as little as he could. Authors like Lewis might agree with a maxim that software developers quote: "The design is complete, not when there is nothing more to add, but when there is nothing more to take away."

**Second of all**, it would cut against the grain of the Tao as discussed (the reader who so prefers is welcomed to use alternate phrasing like "first platitudes"). His appendix of quotations illustrating the Tao is relatively long and quotes

Ancient Egyptian, Old Norse, Babylonian, Ancient Jewish, Hindu, Ancient Chinese, Roman, English, Ancient Christian, Native American, Greek, Australian Aborigines, and Anglo-Saxon, and this is integrated with the entire thrust of the book. If I were to attempt such a work as Lewis did, it would not be a particularly obvious time to try to make a sharp critique specifically about one tradition.

**Thirdly and perhaps most importantly, C.S. Lewis is a founder of ecumenism as we know it today, and with pacifism / just war as one exception that comes to mind, he tried both to preach and to remain within "mere Christianity", and it is not especially of interest to me that he was Protestant (and seemed to lean more Romeward to the end of his life). C.S. Lewis was one of the architects of ecumenism as we know it (ecumenism being anathematized heresy to the Orthodox Church as of 1987), but his own personal practice was stricter than stating one's opinions as opinions and just not sledgehammering anyone who disagrees. There is a gaping hole for the Mother of God and Ever-Virgin Mary in the Chronicles of Narnia; Aslan appears from the Emperor Beyond the Sea, but without any hint of relation to any mother that I can discern. This gaping hole may be well enough covered so that Christian readers don't notice, but once it's pointed out it's a bit painful to think about.**

For the first and second reasons, there would be reason enough not to criticize Reformers in that specific book. However, this is the reason I believe C.S. Lewis did not address the third triplet of the Renaissance Magus, the Founder of Science, and the Reformer. Lewis's words here apply in full force to the Reformer: "It might be going too far to say that the modern scientific movement was tainted from its birth: but I think it would be true to say that it was born in an unhealthy

neighbourhood and at an inauspicious hour."

You have to really dig into some of the history to realize how intertwined the Reformation was with the occult. Lewis says, for one among many examples, "In Paracelsus the characters of magician and scientist are combined." Some have said that what is now called Lutheranism should be called Melancthonism, because as has happened many times in history, a charismatic teacher with striking influence opens a door, and then an important follower works certain things out and systematizes the collection. In Melancthon the characters of Reformer, Scientist, and Astrologer are combined. Now I would like to address one distraction: some people, including Lewis ([The Discarded Image](#)), draw a sharp distinction between astrology in the middle ages and the emptied-out version we have today. He says that our lumping astrology in with the occult would have surprised practitioners of either: Renaissance magic asserted human power while astrology asserted human impotence. [The Magician's Twin](#) interestingly suggests that astrology as discussed by C.S. Lewis is not a remnant of magic but as a precursor to present-day deterministic science. And there is an important distinction for those who know about astrology in relation to Melancthon. Medieval astrology was a comprehensive theory, including cosmology and psychology, where "judicial astrology", meaning to use astrology for fortune-telling, was relatively minor. But astrology for fortune-telling was far more important to Melancthon. And if there was quite a lot of fortune-telling on Melancthon's resume, there was much more clamor for what was then called natural philosophy and became what we now know as science.

Another troubling weed in the water has to do with Reformation history, not specifically because it is an issue with

the Reformation, but because of a trap historians fall into. Alisdair McGrath's [Reformation Theology: An Introduction](#) treats how many features common in Protestantism today came to arise, but this kind of thing is a failure in historical scholarship. There were many features present in Reformation phenomena that one rarely encounters in Protestant histories of the Reformation. Luther is studied, but I have not read in any Protestant source his satisfied quotation about going to a bar, drinking beer, and leering at the barmaids. I have not seen anything like the climax of [Degenerate Moderns: Modernity as Rationalized Sexual Misbehavior](#), which covers Martin Luther's rejection of his vow of celibacy being followed by large-scale assault on others' celibacy ("liberating" innumerable nuns from their monastic communities), Luther's extended womanizing, and his marriage to a nun as a way to cut back on his womanizing. For that matter, I grew up in the Anabaptist tradition, from which [the conservatism of the Amish](#) also came, and heard of historic root in terms of the compilation of martyrdoms in [Martyr's Mirror](#), without knowing a whisper of the degree to which Anabaptism was the anarchist wing of the Reformation.

Questions like "Where did Luther's Sola Scriptura come from?", or "Where did the Calvinist tradition's acronym TULIP for 'Total Depravity', 'Unconditional Election', 'Limited Atonement', 'Irresistible Grace', and the 'Perseverance of the Saints?' come from?" are legitimate historical questions. However, questions like these only ask about matters that have rightly or wrongly survived the winnowing of history, and they tend to favor a twin that survived and flourished over a twin that withered and died. This means that the chaos associated with the founders of Anabaptism do not linger with how truly chaotic the community was at first, and in general Protestant

accounts of the Reformation fail to report the degree to which the Reformation project was connected to a Renaissance that was profoundly occultic.

## **A big picture view from before I knew certain things**

In [AI as an Arena for Magical Thinking among Skeptics](#), one of the first real works I wrote as an Orthodox Christian, I try to better orient the reader to the basic terrain:

We miss how the occult turn taken by some of Western culture in the Renaissance and early modern period established lines of development that remain foundational to science today. Many chasms exist between the mediaeval perspective and our own, and there is good reason to place the decisive break between the mediaeval way of life and the Renaissance/early modern occult development, not placing mediaeval times and magic together with an exceptionalism for our science. I suggest that our main differences with the occult project are disagreements as to means, not ends—and that distinguishes the post-mediaeval West from the mediaevals. If so, there is a kinship between the occult project and our own time: we provide a variant answer to the same question as the Renaissance magus, whilst patristic and mediaeval Christians were exploring another question altogether. The occult vision has fragmented, with its dominion over the natural world

becoming scientific technology, its vision for a better world becoming political ideology, and its spiritual practices becoming a private fantasy.

One way to look at historical data in a way that shows the kind of sensitivity I'm interested in, is explored by Mary Midgley in *Science as Salvation* (1992); she doesn't dwell on the occult as such, but she perceptively argues that science is far more continuous with religion than its self-understanding would suggest. Her approach pays a certain kind of attention to things which science leads us to ignore. She looks at ways science is doing far more than falsifying hypotheses, and in so doing observes some things which are important. I hope to develop a similar argument in a different direction, arguing that science is far more continuous with the occult than its self-understanding would suggest. This thesis is intended neither to be a correction nor a refinement of her position, but development of a parallel line of enquiry.

It is as if a great island, called Magic, began to drift away from the cultural mainland. It had plans for what the mainland should be converted into, but had no wish to be associated with the mainland. As time passed, the island fragmented into smaller islands, and on all of these new islands the features hardened and became more sharply defined. One of the islands is named Ideology. The one we are interested in is Science, which is not interchangeable with the original Magic, but is even less independent: in some ways Science differs from Magic by being more like Magic than Magic itself. Science is further from the mainland than Magic was, even if its influence on the mainland is if anything greater than what Magic once held. I am interested in a

scientific endeavour, and in particular a basic relationship behind scientific enquiry, which are to a substantial degree continuous with a magical endeavour and a basic relationship behind magic. These are foundationally important, and even if it is not yet clear what they may mean, I will try to substantiate these as the thesis develops. I propose the idea of Magic breaking off from a societal mainland, and sharpening and hardening into Science, as more helpful than the idea of science and magic as opposites.

There is in fact historical precedent for such a phenomenon. I suggest that a parallel with Eucharistic doctrine might illuminate the interrelationship between Orthodoxy, Renaissance and early modern magic, and science (including artificial intelligence). When Aquinas made the Christian-Aristotelian synthesis, he changed the doctrine of the Eucharist. The Eucharist had previously been understood on Orthodox terms that used a Platonic conception of bread and wine participating in the body and blood of Christ, so that bread remained bread whilst becoming the body of Christ. One substance had two natures. Aristotelian philosophy had little room for one substance which had two natures, so one thing cannot simultaneously be bread and the body of Christ. When Aquinas subsumed real presence doctrine under an Aristotelian framework, he managed a delicate balancing act, in which bread ceased to be bread when it became the body of Christ, and it was a miracle that the accidents of bread held together after the substance had changed. I suggest that when Zwingli expunged real presence doctrine completely, he was not abolishing the Aristotelian impulse, but carrying it to its proper end. In like fashion, the scientific movement is not a repudiation of the

magical impulse, but a development of it according to its own inner logic. It expunges the supernatural as Zwingli expunged the real presence, because that is where one gravitates once the journey has begun. What Aquinas and the Renaissance magus had was composed of things that did not fit together. As I will explore below under the heading ["Renaissance and Early Modern Magic,"](#) the Renaissance magus ceased relating to society as to one's mother and began treating it as raw material; this foundational change to a depersonalised relationship would later secularise the occult and transform it into science. The parallel between medieval Christianity/magic/science and Orthodoxy/Aquinas/Zwingli seems to be fertile: real presence doctrine can be placed under an Aristotelian framework, and a sense of the supernatural can be held by someone who is stepping out of a personal kind of relationship, but in both cases it doesn't sit well, and after two or so centuries people finished the job by subtracting the supernatural.

**What does the towering  
figure of the Reformer  
owe to the towering figure  
of the Renaissance  
Magus?**

However little the connection may be underscored today, mere historical closeness would place a heavy burden of proof on the scholar who would deny that the Reformation owes an incalculable debt to the Renaissance that it succeeded. Protestant figures like Francis Schaeffer may be sharply critical of the Renaissance, but I've never seen them explain what the Reformation directly inherited.

The concept *Sola Scriptura* (that the Bible alone is God's supreme revelation and no tradition outside the Bible is authoritative) is poured out from the heart of the Reformation cry, "Ad fontes!" (that we should go to classical sources alone and straighten out things from there). The term "Renaissance" / "Renascence" means, by mediation of two different languages, "Rebirth", and more specifically a rebirth going back to original classic sources and building on them directly rather than by mediation of centuries. Luther owes a debt here even if he pushed past the Latin Bible to the Greek New Testament, and again past the revelation in the Septuagint or Greek Old

Testament (the patristic Old Testament of choice) to the original Hebrew, dropping quite a few books of the Old Testament in the process. (He contemplated deeper cuts than that, and called the New Testament epistle of James a "letter of straw," fit to be burned.)

The collection of texts Luther settled on is markedly different to the Renaissance interest in most or all of the real gems of classical antiquity. However, the approach is largely inherited. And the resemblance goes further.

I wrote above of the Renaissance Magus, one heir of which is the creation of political ideology as such, who stands against the mainland but, in something approaching Messianic fantasy, has designs to tear apart and rebuild the despicable raw material of society into something truly worthwhile and excellent by the power of his great mind. On this point, I can barely distinguish the Reformer from the Renaissance Magus beyond the fact that the Reformer's raw material of abysmal society was more specifically the Church.

[Exotic Golden Ages and Restoring Harmony with Nature: Anatomy of a Passion](#) was something I wrote because of several reasons but triggered, at least, by a museum visit which was presented as an Enlightenment exhibit, and which showed a great many ancient, classical artifacts. After some point I realized that the exhibit as a whole was an exhibit on the Enlightenment specifically in the currents that spawned the still-living tradition of museums, and the neo-classicism which is also associated that century. I don't remember what exact examples I settled on, and the article was one where examples could be swapped in or out. Possible examples include the Renaissance, the Reformation, Enlightenment neo-classicism, various shades of postmodernism, neo-paganism, the unending Protestant cottage industry of

reconstructing the ancient Church, unending works on trying to make political ideologies that will transform one's society to be more perfect, and (mumble) others; I wrote sharply, "**Orthodoxy is pagan. Neo-paganism isn't,**" in [The Sign of the Grail](#), my point being that if you want the grandeur of much of any original paganism (and paganism can have grandeur), you will do well to simply skip past the distraction and the mad free-for-all covered in even pro-paganism books like [Drawing Down the Moon](#), and join the Orthodox Church, submitting to its discipline.

The Renaissance, the founding of modern science, and the Reformation have mushy, porous borders. This isn't how we conceptualize things today, but then you could have pretty much been involved one, or any two, or all three.

**The Renaissance Magus, the Founder of Science, and the Reformer are triplets!**

**Halloween: The Second  
U.S. National Holiday:  
*Least Successful  
Christianization Ever!***

There has been some background noise about Christianity incorporating various pagan customs and transforming them, often spoken so that the original and merely pagan aspect of the custom appears much more enticing than anything else. My suspicion is that this has happened many times, although most of the such connections I've heard, even from an Orthodox priest, amount to urban legend.

For example, one encyclopedia or reference material that I read when I was in gradeschool talked about how, in the late Roman Empire, people would celebrate on December 21st or 22nd, and remarked briefly that Christians could be identified by the fact that they didn't bear swords. The Roman celebration was an annual celebration, held on the solstice, and Christians didn't exactly observe the pagan holiday but timed their own celebration of the Nativity of Christ so as to be celebrated. And along the centuries, with the frequent corruptions that occurred with ancient timekeeping, the Nativity got moved just a few days to the 25th. However, ever recent vaguely scholarly treatment I have read have said that the original date of the Nativity was determined by independent factors. There was a religious belief

stating that prophets die on an anniversary of their conception or birth, and the determination that placed the Nativity on December 25th was a spillover calculation to a date deemed more central, the Annunciation as the date when Christ was conceived, set as March 25th.

I do not say that all claims of Christianization of pagan custom are bogus; probably innumerable details of Orthodoxy are some way or other connected with paganism. However, such claims appearing in the usual rumor format, much like [rumor science](#), rarely check out.

However, Halloween is a bit of anomaly.

**Of all the attempts to Christianize a pagan custom, Halloween is the most abject failure.** In one sense the practice of Christmas, with or without a date derived from a pagan festival, does not seem harmed by it. The Christmas tree may or may not be in continuity with pre-Christian pagan customs; but in either case the affirmative or negative answer does not matter that much. It was also more specifically a custom that came from the heterodox West, and while Orthodox Christians might object to that or at least not see the need, I am not interested in lodging a complaint against the custom. Numerous first-world Christians have complained about a commercialization of Christmas that does in fact does matter and poisons the Christmas celebration: C.S. Lewis, one might mention here, [sounds off with quite a bit of success](#). My own college-day comment in [Hayward's Unabridged Dictionary](#) went:

**Christmas**, n. A yearly holiday celebrating the coming of the chief Deity of Western civilization: Mammon.

And commercial poisoning of the Christmas spirit was also

core to my [The Grinch Who Stole Christmas](#). One might join many others and speak, instead of a Christianization of a pagan custom, of the commercialization of a Christian custom.

However, Halloween, or various archaic spellings and names that are commonly dug up, has kept its original character after a thousand years or so, and the biggest real dent in its character is that you don't need to dress up as something dead or occult (or both); the practice exists of dressing up for Halloween as something that is not gruesome. Celebrities and characters from treasured TV shows and movies are pretty much mainstream costumes. But it is a minority, and the Christmas-level escalating displays in people's front yards are, at least in my neck of the woods, all gruesome.

Martin Luther is in fact believed by many to have published his 95 theses (or at least made another significant move) on October 31, 1517, and people have been digging it up perhaps more than ever, this year marking a 500th anniversary. I only heard of "Reformation Day" for the first time as a junior in college, and the wonderful professor mentioned above asked me, "What do you think of celebrating Reformation Day?" and probably expecting something pungent. I answered, "I think celebrating one ghastly event per day is enough!"

Christianization attempts notwithstanding, Halloween seems to be growing and growing by the year!

## **Alchemy no longer needs to come out of the closet**

Today the occult is in ascendancy and alchemy is coming out of the closet, or rather has been out of the closet from some time and still continuing to move away from it. Now there have been occult-heavy times before; besides the three triplets of Renaissance Magus, Founder of Science, and Reformer several centuries back, the Victorian era was at once the era of Romanticism and Logical Positivism, and at once an era with very strictly observe modesty and of a spiritualism that posited a spiritual realm of "Summer-land" where gauzy clothing could quickly be whisked away. Alchemy is now said to be more or less what modern science arose out of, and people are no longer surprised to hear that Newton's founding of the first real physics that is part of the physics curriculum was given a small fraction of the time he devoted to pursuing alchemy. I haven't yet gotten all the way through Owen Barfield's [Saving the Appearances: A History of Idolatry](#) as it reads to me as choking antithesis to an Orthodox theology that is pregnant with icon. However, one of the steps along the way I did read was one talking about the heart, and, characteristic of many things in vogue today, he presents one figure as first introducing a mechanistic understanding of the heart as a pump that drives blood through the system of vessels: that much is retained at

far greater detail in modern science, but in that liminal figure, such as alchemists love, the heart was still doing major alchemical jobs even if his successors may have abandoned them.

Today there are some people who have made some sharp apologetic responses. Books endorsed on Oprah may treat alchemy as supreme personal elevation. However, conservative authors acknowledge some points while condemning others as barren. It is perhaps true that alchemy represents a tradition intended to transform the practitioner spiritually. But alchemy is false in that spiritual transformation is approached through master of technique and "sympathetic magic" as Bible scholars use the term. We do not need a technique to transform us spiritually. We may need repentance, faith, spiritual discipline that is neither more nor less than a cooperation with God, and communion, and in the Holy Mysteries we have a transformation that leaves gold in the dust. And alchemy is in the end positively **anemic** when it stands next to full-blooded religion. And really, what person in any right mind would crawl on broken glass to create gold when Someone will give you the [Providence of the true Dance](#) and make the divine Life pulse through your blood? A while ago, I wrote a poem, [How Shall I Tell an Alchemist?](#) which is I think where I'll choose to end this section:

# How Shall I Tell an Alchemist?

The cold matter of science“  
Exists not, O God, O Life,  
For Thou who art Life,  
How could Thy humblest creature,  
Be without life,  
Fail to be in some wise,  
The image of Life?  
Minerals themselves,  
Lead and silver and gold,  
The vast emptiness of space and vacuum,  
Teems more with Thy Life,  
Than science will see in man,  
Than hard and soft science,  
Will to see in man.  
How shall I praise Thee,  
For making man a microcosm,  
A human being the summary,  
Of creation, spiritual and material,  
Created to be,  
A waterfall of divine grace,  
Flowing to all things spiritual and material,

A waterfall of divine life,  
Deity flowing out to man,  
And out through man,  
To all that exists,  
And even nothingness itself?  
And if I speak,  
To an alchemist who seeks true gold,  
May his eyes be opened,  
To body made a spirit,  
And spirit made a body,  
The gold on the face of an icon,  
Pure beyond twenty-four carats,  
Even if the icon be cheap,  
A cheap icon of paper faded?  
How shall I speak to an alchemist,  
Whose eyes overlook a transformation,  
Next to which the transmutation,  
Of lead to gold,  
Is dust and ashes?  
How shall I speak to an alchemist,  
Of the holy consecration,  
Whereby humble bread and wine,  
Illumine as divine body and blood,  
Brighter than gold, the metal of light,  
The holy mystery the fulcrum,  
Not stopping in chalice gilt,  
But transforming men,  
To be the mystical body,  
The holy mystery the fulcrum of lives transmuted,  
Of a waterfall spilling out,  
The consecration of holy gifts,

That men may be radiant,  
That men may be illumined,  
That men be made the mystical body,  
Course with divine Life,  
Tasting the Fountain of Immortality,  
The transformed elements the fulcrum,  
Of God taking a lever and a place to stand,  
To move the earth,  
To move the cosmos whole,  
Everything created,  
Spiritual and material,  
Returned to God,  
Deified.

And how shall I tell an alchemist,  
That alchemy suffices not,  
For true transmutation of souls,  
To put away searches for gold in crevices and in secret,  
And see piles out in the open,  
In common faith that seems mundane,  
And out of the red earth that is humility,  
To know the Philosopher's Stone Who is Christ,  
And the true alchemy,  
Is found in the Holy Orthodox Church?  
How Shall I Tell an Alchemist?

**Most of us are quite clueless, and we are just as much clueless as people in the so-called “hard science” like physics!**

If one begins to study not exactly physics itself, but the people who best contributed to 20th century physics, the first and most popular name will likely be Albert Einstein. However, if one extends the list of names, Nobel Prize laureate Richard P. Feynman will come up pretty quickly. He provided a series of lectures now known as [the Feynman lectures](#), which are widely held as some of the most exemplary communication in the sciences around. He also gave a graduation lecture called “Cargo Cult Science” in which he demonstrates a lack of understanding of history. Its opening sentences read,

During the Middle Ages there were all kinds of crazy ideas, such as that a piece of rhinoceros horn would increase potency. (Another crazy idea of the Middle Ages is these hats we have on today—“which is too loose in my case.”) Then a method was discovered for separating the ideas—“which was to try one to see if it worked, and if it didn’t work, to eliminate it. This method became organized, of course, into science. And it developed very well, so that we are now

in the scientific age.

Sorry. No. This gets an F. Parts are technically true, but this gets an F. It is not clear to me that it even reaches the dignity of cargo cult history. (On Feynman's account, cargo cults usually managed to make something look like real airports.) If you don't understand history, but leap centuries in a single bound, don't presume to summarize the whole of it in a short paragraph.

Feynman's attempt to summarize as much of the sciences as possible in a single sentence is impressively well-done. This is not.

I wish to make use of Darwin, and what I will call "Paleo-Darwinism", which I would distinguish from any version of Darwinism and evolution which is live in the academy.

What is called "Darwinism" or "evolution" has changed markedly from anything I can meaningfully connect with the theory Darwin articulated in [The Origin of Species](#).

Some of the terms remain the same, and a few terms like "natural selection" even keep their maiden names. However, Darwin's theory was genuinely a theory of **evolution**, meaning that life forms slowly **evolve**, and we should expect a fossil record that shows numerous steps of gradual transitions. There are multiple live variations of evolution in biology departments in mainstream academics, and I don't know all the variations. However, my understanding is that part of the common ground between competing variations is that the fossil record is taken at face value and while there is common ancestry of a form, all the evidence we have is that there long periods of extreme stability with surprisingly little change worthy of the name, which are suddenly and miraculously interrupted by the appearance of new forms of life without preserved record of intermediate forms.

For this discussion I will be closer to Darwin's theory in the original, and I wish to explicitly note that I am not intending, or pretending, to represent any theory or concept that is live in the biological sciences. By "Evolution" I mean Paleo-Evolution, an ongoing acquirement of gradual changes. And I would furthermore want to note the distinction between natural selection, and artificial selection.

Artificial selection, meaning breeding, was presumably a readily available concept to the 19th century mind. It was, or at least should be, a readily available concept thousands of years older than the dawn of modern science. Farmers had controlled mating within a gene pool to increase certain traits and diminish others. To an economy that was at least a little closer to farming, breeding was the sort of concept well enough available that someone might use it as a basis for an analogy or metaphor.

It appears that Darwin did just that. He introduced a concept of natural selection, something that might seem odd at first but was intelligible. "Natural selection" meant that there was something like breeding going on even in the absence of a breeder. Instead of farmers breeding (I think the term ecosystem may be anachronism to place in Darwin's day and it apparently does not appear in his writing, but the term fits in Paleo-Darwinism as well as in newer forms like a glove), natural selection is a mechanism by which the natural environment will let organisms that survive continue to propagate, and organisms that can't survive won't propagate either. There is a marked difference between animals that are prey animals and those that aren't. Animals that contend with predators tend to have sharp senses to notice predators, the ability to flee predators, and the ability to put up a fight. None of these traits is absolutely essential, but mice that do not evade cats cease to exist. Dodos

in Darwin's day, or field chickens in the 19th century U.S., did not face predators and at least the dodos were quickly hunted to extinction when humans discovered the place.

I wish to keep this distinction between two different methods and selections in saying that artificial selection is not the only selection and the scientific method is not the only selection either.

What else is there? Before a Paleo diet stopped some really nasty symptoms, I read [Nourishing Traditions](#). That book documents, in scientific terms, ways and patterns of eating that are beneficial, even though those dishes appeared well before we had enough scientific understanding to dissect the benefits.

Buttered asparagus, for instance, provides a nutritionally beneficial that is greater than the nutritional value of its parts.

And there are many things; the author, celebrating fermentation, says that if you have a Ruben, you are eating five fermented foods.

**The point I would make about (here) diet is that independently of scientific method, societies that had choices about what to eat tended by something like natural selection to optimize foods within their leeway that were beneficial.**

Science has a very valuable way to select theories and laws that is really impressive. However, it is not the only winnowing fork available, and the other winnowing fork, analogous to natural selection, is live and powerful. And, though this is not really a fair comparison, a diet that has been passed down for generations in a society is almost certainly better than the industrial diet that is causing damage to people worldwide who can't afford their traditional cuisine.

There exist some foods which were scientifically engineered to benefit the eater. During World War II, experiments were

run on volunteers to know what kind of foods would bring the best benefits and best chance of survival to liberated, starving concentration camp prisoners. Right now even my local government has gotten a clue that breast milk is vastly better for babies than artificial formula, but people have still engineered a pretty impressive consolation prize in baby formulas meant to be as nourishing as possible (even if they still can't confer the immune benefits conferred by mother's milk). However, 99% of engineered foods are primarily intended to make a commercially profitable product. Concern for the actual health of the person eating the food is an afterthought (if even that).

**Withered like  
Merlinâ€™and, in a mirror,  
withered like me!**

I would like to quote [That Hideous Strength](#), which again was an attempt at a novel that in fictional format would explore the same terrain explored in the three essays of the nonfiction [The Abolition of Man](#); it is among the book's most haunting passages to me.

“...But about Merlin. What it comes to, as far as I can make out, is this. There were still possibilities for a man of that age which there aren't for a man of ours. The earth itself was more like an animal in those days. And mental processes were much more like physical actions. And there wereâ€™well, Neutrals, knocking about.”

“Neutrals?”

“I don't mean, of course, that anything can be a real neutral. A conscious being is either obeying God or disobeying Him. But there might be things neutral in relation to us.”

“You mean eldilsâ€™angels?”

“Well, the word angel rather begs the question. Even the OyÃ©resu aren't exactly angels in the same sense as our guardian angels are. Technically they are Intelligences. The

point is that while it may be true at the end of the world to describe every eldil either as an angel or a devil, and may even be true now, it was much less true in Merlin's time. There used to be things on this Earth pursuing their own business, so to speak. They weren't ministering spirits sent to help fallen humanity; but neither were they enemies preying upon us. Even in St. Paul one gets glimpses of a population that won't exactly fit into our two columns of angels and devils. And if you go back further . . . all the gods, elves, dwarves, water-people, fate, longaevi. You and I know too much to think they are illusions."

"You think there are things like that?"

"I think there were. I think there was room for them then, but the universe has come more to a point. Not all rational beings perhaps. Some would be mere wills inherent in matter, hardly conscious. More like animals. Othersâ€"but I don't really know. At any rate, that is the sort of situation in which one got a man like Merlin."

"It was rather horrible. I mean even in Merlin's time (he came at the extreme tail end of it) though you could still use that sort of life in the universe innocently, you couldn't do it safely. The things weren't bad in themselves, but they were already bad for us. They sort of withered the man who dealt with them. Not on purpose. They couldn't help doing it. Merlinus is withered. He's quite pious and humble and all that, but something has been taken out of him. That quietness of his is just a little deadly, like the quiet of a gutted building. It's the result of having his mind open to something that broadens the environment just a bit too much. Like polygamy. It wasn't wrong for Abraham, but one can't help feeling that even he lost something by it."

"Cecil," said Mrs. Dimble. "Do you feel quite comfortable about the Director's using a man like this? I mean, doesn't it look a bit like fighting Belbury with its own weapons?"

"No. I had thought of that. Merlin is the reverse of Belbury. He's at the opposite extreme. He is the last vestige of an old order in which matter and spirit were, from our modern point of view, confused. For him every operation on Nature is a kind of personal contact, like coaxing a child or stroking one's horse. After him came the modern man to whom Nature is something to be dead—"a machine to be worked, and taken to bits if it won't work the way he pleases. Finally, come the Belbury people who take over that view from the modern man unaltered and simply want to increase their powers by tacking on the aid of spirits—"extra-natural, anti-natural spirits. Of course they hoped to have it both ways. They thought the old magia of Merlin which worked with the spiritual qualities of Nature, loving and reverencing them and knowing them from within, could be combined with the new goetia—"the brutal surgery from without. No. In a sense Merlin represents what we've got to get back to in some different way. Do you know that he is forbidden by the rules of order to use any edged tool on any growing thing?"

I find this passage to speak a great truth, but coming the opposite direction! Let me explain.

I might briefly comment that the virtues that are posited to have pretty much died with Merlin are alive and kicking in Orthodoxy; see "[Physics.](#)" The Orthodox Christian is in a very real sense not just in communion with fellow Orthodox Christians alive on earth: to be in communion with the Orthodox Church is

to be in communion with Christ, in communion with saints and angels, in communion with Creation from stars to starlings to stoplights, and even in a certain sense in communion with heterodox at a deeper level than the heterodox are in communion with themselves. This is present among devout laity, and it is given a sharper point in monasticism. It may be completely off-limits for a married or monastic Orthodox to set out to be like Merlin, but a monastic in particular who seeks first the Kingdom of God and his perfect righteousness may end up with quite a lot of what this passage sells Merlin on.

Now to the main part: I think the imagery in this passage brings certain truths into sharper contrast if it is rewired as a parable or allegory. I do not believe, nor do I ask you to believe, that there have **ever** been neutral spirits knocking about, going about on their own business. However, the overall structure and content work quite well with technologies: besides apocalyptic prophecies about submarines and radio being fulfilled in the twentieth century, there is something very deep about the suggestion that technology "sort of withers" the person dealing with it. I think I represent a bit of a rarity in that I have an iPhone, I use it, but I don't use it all that much when I don't need it. In particular I rarely use it to kill time, or when I know I should be doing something else. That's an exception! The overall spiritual description of Merlin's practices fits our reception of technology very well.

I have [a number of titles on Amazon](#), and I would like to detail what I consider the most significant three things I might leave behind:

1. [The Best of Jonathan's Corner](#): This is my flagship title, and also the one I am most pleased with reception.

2. ["The Seraphinians: "Blessed Seraphim Rose" and His Axe-Wielding Western Converts:](#) More than any other of my books this book is a critique, and part of its 1.4 star review on Amazon is because Fr. Seraphim's following seems to find the book extremely upsetting, and so the most helpful review states that the book is largely unintelligible, and casts doubt on how sober I was when I was writing it. I'm a bit more irritated that the title has received at least two five-star reviews that I am aware of, and those reviews universally vanish quickly. (I tried to ask Amazon to restore deleted reviews, but Amazon stated that their policy is that undeleting a censored review constitutes an unacceptable violation of the reviewer's privacy.)
3. [The Luddite's Guide to Technology:](#) At the time of this writing, I have one review, and it is kind. However, I'm a bit disappointed in the book's relative lack of reception. I believe it says something significant, partly because it is not framed in terms of "religion and science", but "technology and faith". Right and ascetically-based use of technology would seem to be a very helpful topic, and if I may make a point about Merlin, he appears to have crossed the line where if he drove he could get a drunk driving conviction. We, on the other hand, are three sheets to the wind.

**"They sort of withered the man who dealt with them:"**  
*Mathematician and Renaissance Man*

I ranked 7th in the nation in the 1989 MathCounts competition, and that is something to be very humble about. There's more than just jokes that have been floating around about, "How can you tell if a mathematician is an

extravert?" "He looks at your feet when he talks to you!"

In the troubled course of my troubled relationship with my ex-fiance, I am not interested in disclosing my ex-fiance's faults. I am, however, interested in disclosing my own faults in very general terms. The root cause in most cases came from acting out of an overly mathematical mind, very frequently approaching things as basically a math problem to solve and relating to her almost exclusively with my head rather than my heart, and really, in the end, not relating to her as properly human (and, by the same stroke, not relating to myself as properly human either).

I do not say that the relationship would have succeeded if I had avoided this fault and the blunders that came up downwind of it. I am also not interested in providing a complete picture. I mention this for one reason: to say that at a certain level, a very mathematical mind is not really good for us!

This is something that is true at a basic level; it is structural and is built into ourselves as persons. Some vices are in easier reach. The Orthodox understanding is that the nous or spiritual eye is the part of us that should guide us both; the dianoia or logic-related understanding has a legitimate place, but the relation between the nous and the dianoia should ideally be the relationship between the sun and the moon. One Orthodox figure characterized academic types as having a hypertrophied or excessive, out-of-check logic-handling dianoia, and a darkened nous. I plead guilty on both counts, at least in my mathematical formation.

I might also recall a brief point from [Everyday Saints](#), a book that has managed to get a pretty long book hold waitlist at some libraries. A Soviet government agent commented, rather squeamishly, that highly educated prisoners were the first to

crack under torture.

Prayerful manual labor is considered normative in Orthodox monasticism, and in a monastery, the novices who are asked to do extensive manual labor are being given a first choice offering. The fact that abbots do less labor than most other monks is not a privilege of authority. Rather, it is a deprivation. The reduced amount of manual labor is a concession to necessities, and many abbots would exchange their responsibilities with those of a novice in a heartbeat.

(I have been told, "Bishops wish they were novices!")

Along more recent lines, I have been called a Renaissance man, or less often a genius. I felt a warm glow in being called a Renaissance man; I took the term as a minor social compliment recognizing broad-ranging interests and achievements, and not really much more than that, or much more important. Then I pulled up the Wikipedia article for "polymath," read the section on Renaissance men, and my blood ran cold.

The article does not even pretend to list detail of what was expected of Renaissance men, but as I ran down the list of distinctions, I realized that I had pretty much every single achievement on the list, and education, and a good deal more. And what came to me was, "I'm coming down on the side of Barlaam and not St. Gregory Palamas!" (For non-Orthodox readers, Barlaam and St. Gregory were disputants in a controversy where Barlaam said that Orthodox monks chiefly needed lots of academic learning and what would today be called the liberal arts ideal, and St. Gregory said that monks chiefly need the unceasing prayer usually called "prayer of the heart.")

There was one executive who said, "I climbed to the top of the corporate ladder only to find that it was leaning against the wrong building," and that's pretty much where I found myself.

I have had less of a mathematical mind by the year, and I am hoping through monasticism to let go of things other than thoroughly seeking God, and let go of my Renaissance man chassis. My hope in monasticism is to try and follow the same path St. Gregory Palamas trod, and spend what time I have remaining in repentance (better late than never).

I now have a silence somewhat like the silence of a gutted building.

I seek the silence of hesychasm.

One wise priest said again and again, "The longest journey we will take is the journey from our mind to our heart."

# **Maximum Christ, Maximum Ambition, Maximum Repentance**

*Repent, for the Kingdom of God is near!*

That is how the way was paved,  
For the coming of the Son of God,  
Perfect God and Perfect Man:  
Maximum God and Maximum Man,  
Maximally united,  
Yet the Divine and human natures,  
Maximally unconfused:

This is what the Church proclaims,  
In her maximum Christology,  
Proclaiming the Maximum Christ.

*Repent, for the Kingdom of God is near!*

*Repent, and believe the Gospel.*

The *Revelation to St. John* tells,  
Words that bear hard truth in hard times:  
*And I heard the altar cry,*

"Yea, Lord God the Almighty,  
True and just are thy judgments!"  
The fourth angel poured his bowl on the sun,  
And it was allowed to scorch men with fire;  
Men were scorched by the fierce heat,  
And they cursed the name of God,  
Who had power over these plagues,  
And they did not repent and give him glory.  
The fifth angel poured his bowl on the throne of the beast,  
And its kingdom was in darkness;  
Men gnawed their tongues in anguish,  
And cursed the God of heaven  
For their pain and sores,  
And did not repent of their deeds.  
If our time looks like a time of plagues,  
Do not be like these.  
Repentance is not intended,  
For a more ideal time:  
Do not pray as the Blessed Augustine:  
"O Lord, give me chastity and continence,  
But not yet,"  
Do not seek to repent later,  
But keep on struggling to repent now.  
Do you live in tough times,  
And do you fear for even worse disasters?  
Repent, for the Kingdom of God is at hand.  
Do you not see?  
Are your eyes closed?  
God is not gone in a global financial crisis:  
Do you not see,  
The hand of God,

Working to give in hard times,  
What we overlooked in a comfortable age?  
Can you not see a God  
Who whispers in our pleasures,  
Shouts in our pains,  
Whispers also, in times of comfort and ease,  
And shouts in a time of crisis,  
Crisis,  
Κρισις,  
A Greek word meaning,  
"Judgment."  
If we experience judgment,  
Do we need to assume the Judge has abandoned his post?  
Do we really need to try and escape him?  
**Make friends quickly with your accuser!**  
Would you rather know God as your friend or accuser?  
**It hurts you to kick against the goads.**  
Are you terrified to face what you have to repent of?  
Take courage:  
Repentance terrifies like nothing else,  
An unconditional surrender,  
Terrifying to a saint as much as to either of us,  
Only afterwards does it show its true nature,  
As an awakening and more:  
As Heaven's best-kept secret.  
God has ambitions for you,  
Beyond your wildest dreams,  
And commands you to want the best for yourself.  
And if it seems that God only gives you,  
Things that are harder and worse,  
Then you do not understand this:

God's desires for you are beyond your wildest dreams:  
Your wildest dreams are yet not wild enough,  
To see the true good that God holds in store for you.

And if you say,

"Beautiful words, but I have a tough life,"

Know that words like these come from tough lives,  
Hard realities where something great shines so brightly:

The Light of God in Heaven.

Do you fear the loss of your treasures on earth,  
Are you afraid you do not have enough to survive?

Lay up for yourselves treasures in heaven,  
where neither moth nor rust consumes,  
and where thieves do not break in and steal,

Nor do global economic meltdown or hyperinflation

Do anything but strip away a mask,

That makes it look as if we can live by bread alone,

Or comfort ourselves with a "rising standard of living,"

Like as to moving from an ancient, rounded, nourishing diet,

To "upgrade" to cotton candy,

Seeking a Utopia of spoiled children,

Because what we need is not what a child wants to spoil him,

But to grow to be men:

And this crisis, κρίσις, may do much more,

Than separate the men from the boys:

It will help some boys learn to be men,

Learning under the iron yoke of law,

What we kept putting off under the freedom of grace,

As we curse the cruel judgment of a Judge,

Who "cruelly" shouts,

"Sorry, son, it is time for you now,

To move on to better things.

I have real ambitions for you,  
And I want what is truly good as you cannot,  
And I know what is truly good as you cannot.

Try again.

Try again about what you really want.  
I want you to taste the River of Life,  
And you keep on trying to drink filth,  
**Like your dog drinking from your toilet:**

Please try again.

I want you to have real treasure,  
And if what it takes is my taking away every treasure on earth,  
Everything that you want,  
And everything you turn to for security,  
So that you lose your job,  
And your possessions begin to wear out,  
And some of your technologies come to fail,  
In ways you had never even imagined,  
And your investments become worthless,  
And your luxuries vanish one by one,  
And the government does everything people want it to,  
But the results get worse and worse,  
And maybe you even pray,  
**Give us this day our daily bread,**  
Because you do not know,  
Where your next meal is coming from,  
Who knows?

Perhaps you will listen to me shout,  
When you found my whisper easy to ignore,  
Perhaps you will stop chasing after shadows.

Perhaps you will grasp reality:  
Perhaps you will know real treasure,

Real treasure,  
Next to which a bull market,  
Is but mist, vapor, and shadow."

Repent, and believe the Gospel.

Our entire understanding of what it means to be God,  
And our entire understanding of what it means to be man,  
Is the Maximum Christ.

For man is created for maximum glory,  
And God ever beckons us to reach higher,  
When we in confusion reach far below,  
Far less than the glory we were made for.

Every sin does this,  
Even pride.

What do we want in pride?  
Inevitably something that sparkles and shimmers,  
But is cotton candy and mirage,  
Next to the humble things we turn our nose up at.

In pride we turn up our nose,  
At abundant health,  
And do not want the freedom of movement,  
Of a body in health,  
But clingingly cherish,  
Our "extra-special" movement of broken bone,  
And yet we wonder why we hurt,  
And why we are not satisfied,  
Even though we have what we clingingly cherish,  
Not knowing it is the seed of Hell.

You do not understand the measure of man,  
Until you know in Christ,

Who, though he was in the form of God,  
Did not count equality with God a thing to be grasped,

But emptied himself,  
Taking the form of a servant,  
Being born in the likeness of men.  
And being found in human form,  
He humbled himself,  
And became obedient unto death,  
even death on a cross.

Therefore God has highly exalted him,  
And bestowed on him the name which is above every name,  
that at the name of Jesus every knee should bow,  
in heaven and on earth and under the earth,  
and every tongue confess that Jesus Christ is Lord,  
to the glory of God the Father.

We do not understand greatness except in Christ,  
And in Christ we understand that greatness is humble,  
For there is something missing in our lives,  
Until they are oriented by Christ,  
And we know that pride cannot be enough:  
God summons us to the heights of humility.

Repent, for the Kingdom of Heaven is at hand.

Repent, and live real life in a virtual world.  
Industrial food is not like the food of ancient times:  
It is tasty on the outside,  
Manipulated like plastic on the inside,  
A cherry flavored drink engineered that the palate may  
reminisce of cherry taste,  
While holding nothing of the nourishment and sustenance,  
That comes with cherry sweetness in nature,  
Almost like eating an "apple" molded of styrofoam,  
Injected with Splenda,  
Sprayed with petroleum-based fragrance,

And sprinkled with vitamin extract,  
So it may be marketed as health food.  
Do not think that this be isolated as a phenomenon:  
It is a microcosm of our virtual world,  
Where so much of our reality is virtual,  
That "virtual reality" neither begins nor ends with SecondLife.  
Christ knew a life of technologies,  
The son of a carpenter with tools and wood,  
But never like techno-pagans,  
Was his technology  
The technology of molding nature to man's every whim,  
Seeking HumanLife version 2.0:  
Or if you believe that Christ's technology was exactly that,  
But less advanced,  
At least know that it is different,  
As a pint of beer,  
From a pint of rum:  
As today we mold nature to our whims,  
Graduating from pint of rum to pint of absinthe,  
Our TV's always on, and stronger brew,  
Placing before our souls, our mind's eyes,  
The strange brew of HumanLife 2.0... 3.0... 4.0...  
Trying to improve on timeless reality,  
And failing,  
And failing.  
Entranced by technology with its flickering screens,  
[Twice imprisoned in Plato's "Allegory of the Cave,"](#)  
The gate to the timeless way of human life,  
Lies open, and if the path be narrow and hard,  
It has always been narrow and hard:  
Our hindrances may be our aids,

If we use them rightly,  
In asceticism,  
If we go against the flow,  
Of technologies ever more brittle,  
From appliances, cookware, and clothing built to last,  
To possessions that keep wearing out,  
To more and more disposable possessions,  
When we abandon glass plates for the convenience of paper.  
From computers discarded because they are obsolete,  
To computers whose solid state drives become something you use  
up,  
From physical computers that are in your control,  
To virtual cloud computers,  
That you may easily use now,  
But can be taken away by any number of human actions,  
Or system failures:  
"Systems integration is when your computer will not work,  
Because of a problem on a computer you've never heard of;"  
"If builders built buildings the way programmers wrote  
programs,  
The first woodpecker that came along would destroy civilization."  
Use technology but don't trust it.  
We are digging a pit,  
In how we use technology,  
And the progress we embrace,  
Is digging ourselves in deeper.  
And what is true of technology,  
Is also true of much more:  
The story of our culture, our world, our economy,  
Is as a game of chess against a demonic adversary,  
Where we have greedily captured:

An unguarded pawn here, and a bishop there,  
Never heedful of the trap we were stepping into,  
Taking seeming advantage of our opponent's cunning bait,  
All the way to sealing his checkmate against us,  
Until our world and society have lost the game,  
And yet still redemption is open to us,  
Redemption open to every one who repents,  
Living real life even in a virtual world.  
But if we repent, the Kingdom of God ever remains nigh.  
You have already met Christ.

So have I,  
Both of us many times,  
And yet we forget this central fact.  
Wonder when you have met him?  
Hear Christ's own words,  
Hear Christ's own Christology unfold:  
When the Son of man comes in his glory,  
And all the angels with him,  
Then he will sit on his glorious throne.  
Before him will be gathered all the nations,  
And he will separate them one from another,  
As a shepherd separates the sheep from the goats,  
And he will place the sheep at his right hand,  
But the goats at the left.  
Then the King will say to those at his right hand,  
"Come, O blessed of my Father,  
Inherit the kingdom prepared for you,  
From the foundation of the world;  
For I was hungry and you gave me food,  
I was thirsty and you gave me drink,  
I was a stranger and you welcomed me,

I was naked and you clothed me,  
I was sick and you visited me,  
I was in prison and you came to me."  
Then the righteous will answer him,  
"Lord, when did we see thee hungry and feed thee,  
Or thirsty and give thee drink?  
And when did we see thee a stranger and welcome thee,  
Or naked and clothe thee?  
and when did we see thee sick or in prison and visit thee?'  
And the King will answer them,  
"Truly, I say to you,  
As you did it to one of the least of these my brethren,  
You did it to me."

Then he will say to those at his left hand,  
"Depart from me, you who are damned,  
Into the eternal fire prepared for the devil and his angels;  
For I was hungry and you gave me no food,  
I was thirsty and you gave me no drink,  
I was a stranger and you did not welcome me,  
naked and you did not clothe me,  
sick and in prison and you did not visit me."

Then they also will answer,  
"Lord, when did we see thee hungry or thirsty,  
Or a stranger or naked or sick or in prison,  
And did not minister to thee?"

Then he will answer them,  
"Truly, I say to you,  
as you did it not to one of the least of these,  
you did it not to me."

Could this be irrelevant to survival?  
People survived the Great Depression by sharing:

If you don't share because you have little,  
You simply don't get it.  
The less you have,  
The more you need to be generous, and believe,  
Riches do not profit in the day of wrath,  
But righteousness delivers from death.  
If you want to survive,  
Help others survive:  
Lend to the Lord and he will repay you,  
In his time:  
He who is kind to the poor lends to the LORD,  
And he will repay him for his deed.  
Comfort ye, comfort ye my people,  
saith our God:  
Fear not: for, behold,  
I bring you good tidings of great joy,  
which shall be to all people:  
Christ wills to be incarnate in us,  
Not in some other circumstance, but now.  
The Son of God became a man,  
That men might become the sons of God:  
The Incarnation,  
Is for us today.  
If our earthly hope is stripped away,  
Our heavenly hope beams brighter:  
The mighty arm of God in divine providence,  
Rippling with muscle such as easy times rarely know.  
If our cherished neighborhood frisbee is shut down,  
Perhaps it is because we are summoned,  
To reach for gold at spiritual Olympics,  
To become men,

And as in the great hymn to love,  
Put childish ways behind us.

Repent, for the Kingdom of God is near!  
Awake, O sleeper, and arise from the dead,  
and Christ shall give you light.

Awaken to God's maximum ambitions for you.  
But the door to the heart can only be opened from the inside,  
And the door of the heart that opens to God,  
Is called repentance,

The door we are terrified to open:

The door we must open:

Arise, shine; for your light has come,  
and the glory of the LORD has risen upon you.

The time is fulfilled, and the kingdom of God is at hand;  
Repent, for the Kingdom of God is near!

# Meat

I was sitting at a table with my classmates, and there was one part of the conversation in particular that stuck in my mind. One of my classmates was a vegan, and my professor, who was Orthodox but usually was not as strict as some people are observing Orthodox fasts, said that he was challenged by that position. He talked about Orthodox monasticism, which usually avoids meat, and its implication that meat is not necessary. I wanted to contribute to that discussion, but my sense was that that wasn't quite the time to speak. When I explored it after that meal, it seemed more and more to be something that was part of a deep web, connected to other things.

## **What is Theophany? And what does it have to do with meat?**

When I became Orthodox, one of the biggest pieces of advice the priest who received me (my spiritual father) gave me was to take five or ten years to connect with the liturgical rhythm. Now in the Orthodox Church advice from spiritual fathers is like a doctor's prescription in that what is given to one person may not be good at all for another: like a prescription given by a doctor, it is given to one person for that specific person's needs, and should not normally be seen as universal advice that should be good for everyone. However, that doesn't mean that advice is perversely designed to be useless to everyone else. I believe this was good pastoral advice not because of something ultimately idiosyncratic about me—something true of me but no one else—but because of something I share with a lot of other people, especially other Westerners.

In the Orthodox Church, there are days, weeks, and years as in the West, but what they mean is different. In some respects the similarity is deceptive. The biggest difference is less a matter of linear vs. cyclical time, as that in the West time is like money: people will say, "Time is money," and if it is a metaphor, it is none the less a metaphor that captures people's outlook very well. Time is like a scarce commodity; it's something you use to

get things done, and you can not have enough, and run out of time. Language of "saving time" like one would save resources is because the way people treat time is very close to how one would treat a commercial resource that you use to get things done. This may be deeply rooted in some Orthodox, especially Western members of the Orthodox, but instead of time being like a limited supply of money, time is like a kaleidoscope turning. There are different colors—different basic qualities held in place by worship, prayer at home, fasting from certain foods, feasting, commemorating different saints and Biblical events, and being mindful of different liturgical seasons—and they combine in cycles of day, week, and year, given different shades as people grow. Again, this is much less like "Time is money." than "Time is the flow of colors in a kaleidoscope."

One of those seasons is called "Theophany," and it is defined by the third most important feast in the year. I am writing in that season, and it seems an appropriate enough season to write this piece. It fits Theophany.

"Theophany" means "the manifestation of God." That word does not refer to icons or animals. But the way that God was manifest in Theophany has every relevance to icons and animals.

Theophany is the celebration of the Lord Jesus' baptism in the river Jordan, and at one point this was not celebrated from what we now celebrate in Christmas. At that baptism, the Father spoke from Heaven and said, "This is my beloved Son, in whom I am well pleased," the Son was baptized, and the Spirit appeared in the form of a dove. The Trinity was made manifest, but more to the point, the Trinity of God was made manifest to and through material Creation.

The Fathers have never drawn a very sharp line between Christ the Savior of men and Christ the Savior of the whole

creation. This isn't something the Fathers added to the Bible: the Son of God has entered into his creation so completely that the Bible itself says that Christ is "the image of the invisible God, the firstborn of every creature: For by him were all things created, that are in heaven, and that are in earth, visible and invisible, whether they be thrones, or dominions, or principalities, or powers: all things were created by him, and for him: And he is before all things, and by him all things consist."

When Christ was baptized in water, he blessed the whole creation. Yes, he set a precedent for his followers. I wouldn't want to diminish that. But if you draw the line and say the story is relevant to our being baptized but nothing more, you have cut off its fundamental relevance to the whole Creation. The Orthodox liturgy never forgets the rest of the created order, and the liturgy for Theophany crystallizes this in the service for the blessing of the water:

Great art thou, O Lord, and wonderful are thy works, and no word doeth justice to the praise of thy wonders; for by thy will thou didst bring out all things from nonexistence into existence; and by thy might thou dost control creation, and by thy providence thou dost govern the world. Thou it is who didst organize creation from the four elements, and crowned the cycle of the year with four seasons. Before thee tremble supersensual powers; thee the sun praiseth, the moon worshippeth, the stars submit to thee, the light obeyeth, the tempests tremble, the springs worship thee.

Thou didst spread out the heaven like a tent; thou didst establish the earth on the waters. Thou didst surround the sea with sand. Thou didst pour out the air for breathing.

Thee do the angelic hosts serve; thee the ranks of the

archangels do worship, the many-eyed cherubim, the six-winged seraphim, as they stand in thy presence and fly about thee, hiding with fear from thine unapproachable glory...

And shortly the water is blessed, opening a season of blessing in which people's houses are blessed, icons are blessed, people are blessed, and so on. To be human is to be created for worship, but it is not only humans; every material creature and every spiritual creature (the "supersensual powers", the "many-eyed cherubim", and other figures in the liturgy quoted above) are not only created to worship but have a place in what could be called a united organism.

People today are seeking a harmony between man and nature, and some people may wonder if Orthodoxy has a basis for such a harmony. The answer is a yes and no. Let me explain.

If we ask a different question, "What would harmony between humans and technology be? What would a society look like?" then there might be an image of people caring for machines, adapting themselves to them, and so on and so forth.

And that image, or that projection, would lead to a deceptive image among societies today. If we are talking about the kind of technology in the first world today, then the first world today not only is better attuned with technology than the second or third world, but has done something with technology that is simply without parallel in the first 99.999% (literally) of the time humans have been around. Although some other nations like Japan may have a slight edge over my native USA, I'm going to focus on the USA for the simple reason that I know it better.

In the USA, which has something about technology that exceeds what has been done in the same vein in the first 99.999% of the time humans have been around, there are people who develop technology and are carefully attuned to it. And the

...the develop technology, and are carefully attuned to it. And the culture is optimized to support technology in a way that I didn't appreciate until I lived in the second world. You may be able to count on your fingers the number of societies that have ever managed, in the entire history and prehistory of the human race, to be more attuned to technology. And yet the society is not what one would imagine if one tried to imagine a society in harmony with technology.

This is a society with a minority current making Luddite arguments about why computers are bad (and to me the arguments have more weight than some might suspect). There are also people who have no academic axe to grind about the sociological effects of video games, but hate learning new programs. The predominant computer operating system is the most insecure operating system, the one that most exposes its users to viruses and worms—better operating systems are available, at very least from a security and privacy perspective, for free in some cases, but the industry standard is the one that leaves its users most vulnerable to malicious software.

Furthermore, people do not hold technology as objects of reverence, or at least most people don't. Not only is it not a big deal to dispose of no-longer-wanted technology, but "planned obsolescence" means that technology is made to be thrown away. When technology is broken, it will probably be replaced instead of being repaired. You can be very educated and know very little about technology. And the list goes on.

Now I ask: Is this attunement with technology? And the answer is "Yes," but it is the kind of attunement seen in real society (perhaps more perfectly in Japan and other places), not what one would imagine as "harmony with technology." The difference between the two is like the difference between romantic relationships—the kind you have with another flesh-

and-blood human who has things that your imagination didn't put there—and romantic fantasies. In fact people don't think in terms of "harmony with technology;" to ask if American culture lives in harmony with technology is a question few Americans would ask.

Does Orthodoxy have a key to harmony with nature? Let me give one clue. No single technology—not SUVs, not environmentally incorrect inks, not styrofoam—dictates a heavy environmental footprint. Even if there were no soy inks, the printer in itself need not dictate environmental damage. What dictates environmental damage is waste. And Orthodoxy never tells a society what technologies it may and may not use—when someone ran an anti-SUV advertisement asking, "What would Jesus drive?" Orthodoxy may well agree with the archaeologist who in essence said, "Speaking as someone who's done excavations in the Holy Land's rugged terrain, you basically need an SUV, and Jesus with his twelve disciples would have driven a Hummer." (This does not mean that we all need Hummers. I get rides from people but don't own a car myself.) Even if Orthodoxy does not give a list of what technologies its people can't use, Orthodoxy does join voices with many other Christians in saying that part of the walk of virtue is living simply, meaning using what you need but being willing to ask "Do we need what we can afford?" instead of just "Can we afford what we need?" This simplicity is not lived consistently in the first world, but the classical virtue of living simply, formulated at a time when people simply were not thinking in environmentalist terms, has implications for appropriate stewardship of the earth. Living simply has usually been conceived as something that deals with rich and poor—almost all people in the first world who have a home would be considered rich—but it is part of a right ordering

that will rightly orient people and society to the material world.

But there is another side to the issue. In the Western way of looking at it, there is a fundamental opposition between harmony (shaded by equality) and domination (shaded by inequality). Harmony, by definition, does not include domination. But the way the Eastern Church approaches it fits neither into the Western boundaries of harmony nor the Western boundaries of domination. The link between man and nature needs harmony, but it is incomplete if it cannot include domination and even destruction. The PETA position, admittedly extreme for people who have animal rights sympathies, is that a duck is a rat is a goat is a boy. To them, meat is murder, not just as a way of exaggerating something deep, but in a literal sense. And I cannot agree with that. If I could kill a goat and save a girl, I would do so. And beyond that, I eat meat, more than most people (at least before low-carb diets came in vogue, and perhaps after).

## The smock

When I was a boy, my art teacher told the class to get smocks, and my father gave me an unwanted shirt—but he would have given me his best shirt if I needed it. I used it and it kept me from getting clay and paint on my other clothing. (In other words, I destroyed it.) That wasn't the only thing of my parents' that I destroyed. I destroyed the meals my mother cooked for me (usually by eating them and throwing away as little as possible—you wouldn't want them when I was done). I destroyed things that weren't working by taking them apart to see what was inside. I destroyed clothing that my mother brought for me, usually by wearing it out. If my parents had back every penny they spent on something that I destroyed, they would have a good deal more money.

However, my parents did not raise me to be a destructive man. The smock is an example of justified destruction. The fact that my father gave me one of his shirts to destroy as a smock does not mean that it didn't matter if I destroyed his shirts. He would have been quite bothered if I had rubbed red clay onto all of his shirts. Quite a lot of the destruction I did was appropriate. It was justified destruction within a context, and I believe it illustrates what it means to say both that destruction can be permissible, and that destruction matters. To speak of justified destruction is both to say that destruction can be

justified and that justification needs to be justified: it is acceptable to destroy a dress shirt when a smock is needed, but destroying a dress shirt needs to be justified, and is not appropriate when it is not justified.

The concept of "raw materials" applied to the natural world isn't a very Orthodox concept, for much the same reason that it would seem strange to interpret our house as merely a bunch of raw materials for me to destroy at will. The examples above notwithstanding, my parents did not want me to be destructive, and the fact that I was permitted to destroy things was not the central truth of the matter. It would be much closer to the truth to say that I was in that home to grow into a Christian and a man, and be a member of that family. There was also a footnote that said I could destroy some things in some circumstances. But even the things which I was permitted to destroy were not "raw material". A shirt has value in itself, as a shirt, even if it is used as a smock.

The problem with considering the items in my parents' house is raw material is that they have both status and value independently of what I might get out of destroying them. It might matter that I would benefit from destroying the shirt by using it as a smock, but the heart of the matter is that "potential for making a smock" is neither the only status nor the only value of a dress shirt.

An icon, a picture painted to help make spiritual realities manifest, has value as the emblem of a view of the Creation where science and materialism do not tell the whole story, where matter has spiritual qualities above the legitimate observation of scientists, and where saying "Nature is simply what science describes" is as fundamentally erroneous as saying "Your value as a human being is simply what you get when you subtract your

financial liabilities from your assets." If an icon is spiritual, if it is part of God manifesting himself through matter and restoring matter to his circle of blessing, then there is something inadequate if the only meaning to "matter" is "what science describes." Matter is a part of the treasurehouse of God, and the icon is spiritual not as an exception to inert matter and raw material, but as the crystallization of something at the heart of Creation. Seeing the natural world as raw material is almost as strange from an Orthodox perspective as seeing people in terms of their financial net worth. It's the same kind of error.

Of the possessions in my parents' house, not all are equal, and it makes a difference whether I am destroying a plastic cup or a landscape painted by my mother. In God's own house with his treasures, not all are of equal value. There are some of these treasures that exist, in their way reflecting a God who is existence itself: rocks, for instance. There are some possessions which exist in a deeper sense, having an existence that is alive, a reflection of a God who is not only Being itself but Life itself.

Then, beyond these oaks and roses, there are treasures which exist and even live in a way that moves: gazelles and badgers. As the pinnacle of material creation and the microcosm that brings together the material and the spiritual, are creatures that exist, live, and move in out of rationality—on a richer and more interesting understanding of "rationality" than most people would associate with the word today. That would be the realm of men. Lastly, there are bodiless rational spirits, rank on rank of angels.

We can destroy treasures that exist, live, and even move, and some people think that in dire circumstances we may destroy the highest of material treasures, the ones that are rational. But that does not mean that it's all the same to destroy rocks, plants, and animals. Destroying a plant—to make a vegan's meal,

for instance—is more serious than smashing a pebble. (Unfortunately, you can't live off of a diet of rocks.) Destroying an animal is far more serious, and there are sources which suggest it is more a concession than what we would think of today as a right. You can find people arguing that meat is more of a condition to weakness and medical concerns than something healthy people should need to resort to.

## Kosher meat

In Judaism, "kosher" is not only a matter of whether the meat comes from a clean animal like a cow or a sheep or an unclean animal like a pig. It also is a matter of how the animal was slaughtered.

The butcher says a blessing over the animal and then makes a single motion with a knife that has to be sharp, and is specified so that the animal dies as swiftly and painlessly as possible. Its lifeblood is also to be poured out as thoroughly as possible—because the animal's life belongs to God, not to us, and even if we may kill it, Judaism at least frames acceptable slaughter in a way that shows respect for the animal killed.

If we look at a Jewish shepherd with his flock of sheep, under second temple Judaism, and a contemporary (to him) pagan Greek swineherd with his flock of pigs, they (or at least the Jew) would have seen themselves as complete opposites, at least after taking into account that they both raise a group of animals.

There may have been a difference in whether all the animals were being raised for meat, but let's ignore that for the sake of argument. The Greek swineherd might have found the comparison rather insulting: to Greeks, Jews were these antisocial people who wouldn't mingle in polite company and for some reason treated one of the most delicious meats (pork) as if it were something revolting and putrid. In other words, Greeks perceived

Jews as rather a bit weird, a beer or two short of a six-pack. The Jew, however, would have certainly found the comparison insulting to the extreme: not only was this figure a goy, a heathen dog, but he was raising pigs. Saying that he was like a swineherd is offensive in much the same way it would be offensive to tell a UPS delivery driver who is proud of helping the business world and contributing a little to help the economy run smoothly, that that she is like a gang's drug runner because they both deliver packages, whether the packages are productive business documents or street drugs. The Jew would have been more offended by the comparison, but for people who raise flocks of animals, the Jew and Greek would have seen themselves as very different.

But let's compare them to how pigs are raised today, in today's factory farming. Pigs spend almost their entire lives in tiny cells, with an hour of artificial light a day—the rest of the day being surrounded by darkness—constricted in cells too small for them to turn around, deprived of a herd animal's normal contact with other animals from its herd, traumatized not only by sounds but by the unending stench of rotting feces. The workers who treat them come down with atrocious respiratory diseases—and they are exposed to the vile air for a few hours a day instead of 24/7 as the pigs are. I don't believe that feeding animals antibiotics is innately wrong, but with pigs it serves as an inappropriate band-aid for the damage caused by a dungeon—if that is a strong enough word—which is such a toxic environment that feeding the animals constant antibiotics actually makes a marked difference in the number of pigs killed by the life in their dungeon.

If we compare the Jew and the Greek herd-keepers, suddenly they look the same, and some things take on a new significance.

Both allowed their herds to graze at least some of the time. Both allowed their animals to have natural contact with other like animals as part of a herd. Both raised their animals in daylight. Both raise their animals in places that gave them not just room to turn around, but room to move about normally. And now I'd like to ask what the Jewish shepherd (at least) would have thought of the factory farming way of raising (in the example above) pigs. Or, if you prefer, a rabbi.

Do you know how when you step on a tack or stub your toe, you feel tremendous pain, immediately, but if you get in a car accident and really need to go to the emergency room, it takes a while for the pain to register? My suspicion is that kosher slaughter techniques leave an animal unconscious and possibly dead before the pain has had time to register. Even if it is not painless slaughter, the specific rules are motivated by a principle that reduces suffering in a timespan of only a few minutes. And non-kosher slaughter, unless people go out of their way to cause suffering, cannot come anywhere near the suffering which factory farming inflicts on pigs. For that matter, it's not clear how one would go about creating a torment-filled slaughter technique that would come anywhere near the lifelong suffering animals experience in factory farming. My suspicion is that people who are criminally convicted of cruelty to animals (at least in the U.S.) cause nowhere near the suffering before the animal is dead that factory farms do. To the best of my knowledge, Orthodox Judaism has not made rules about how an animal must be treated for its entire life to provide kosher meat, but if the rules were being articulated today, I suspect that the rules would recognize that lifelong torment is more of a problem than failing to kill an animal quickly and with a minimum of pain (as well as pouring its blood out as a reverent recognition

that the life of an animal belongs to the Lord).

Before further discussion about factory farming's evil side, I would like to explain what it has allowed. Raising animals the traditional way is expensive, requiring a lot of land and a lot of manpower. Factory farming—stacking animal cells in warehouse-like fashion and in general treating animals like mere machines—is a way to automate and mechanize the production of both meat and animal products like eggs and cheese. It is a tremendous way to cut corners, and the result is that things that come from animals are drastically reduced in price, drastically cheaper.

It is difficult, at least in the first world, for people to understand that for most of history people have not been vegetarians but neither did they eat meat every day. There have been a few hunter tribes that had a meat-based diet. For most people whose food came from farms, bread or rice has been the staple food. Meat was for special occasions or a seasoning; eating meat every day would seem strange to most people, like ordering lobster every time you feel like a snack, or drinking Champagne with every meal. Meat, being an expensive thing to produce, was something people didn't have as the basis for normal meals. If you are an American adult—and you have not made a conscious choice early in your life to drastically reduce or eliminate meat from your diet—then you have almost certainly eaten much more meat than Jesus did. This does not automatically mean that we shouldn't eat meat ever, or that we should eat meat rarely, but it does suggest that eating meat every day is not really the traditional way of doing things, even if most people were not vegetarians. A lot of people today love lobster and Champagne, but that doesn't mean it's normal in my society to have them every day. It might be telling that the "Our Father" Jesus gave doesn't say, "Give us today our daily meat," but "Give us today

our daily bread." That doesn't mean that we shouldn't eat meat, but it seems not to assume, as people sometimes do, that meat is the main food.

## Three American rules

I'd like to point out something more about American culture. Where I was growing up, I heard that a restaurant, Dragon West, had been closed down for improper use of domestic animals. For those of you who don't have X-ray goggles, "improper use of domestic animals" is an opaque bureaucratic euphemism for the fact that they were serving dogs as food. The reason the restaurant was shut down has to do with the fact that eating dogs is culturally offensive to much of American culture, and there is a reason for that.

There's a rule in America that if you keep a particular type of animal as a pet, you don't eat that kind of animal's meat. The rule is not absolute, and part of it is that most kinds of pets (carnivorous cats, for instance) would make poor livestock, and most kinds of livestock (behemoth bovine, for instance) would be hard to keep in a suburban home. And the rule isn't absolute. Aside from rabbits, people swallow goldfish, although they seem to do that precisely because it crosses a line. But once you acknowledge a jagged border, it's not just true that we happen not to eat the most common pets; many Americans would find the idea of eating a dog or cat to be nauseating. And it's deeply seated enough to close down a restaurant.

You can, at some restaurants I've been to, order fish head curry. That doesn't get a place shut down, but it breaks another

rule. More specifically, it breaks the rule that meat shouldn't give obvious clues that it came from an animal. Fish, which look the least like people, can be sold with their heads on. But unless you go out of your way, chickens are sold without head and feathers, and red meat and pork (which are from non-human mammals) is sold with even fewer clues that it's some of the flesh of a slaughtered animal. Not that a detective couldn't figure it out, but meat is sold in a form that hides where it came from, and people buying or eating beef would probably be grossed out by having a cow's severed head nearby. Surely some of this is for economic reasons, but Americans who eat meat tend not to want to be reminded where it came from.

Lastly, people can be disturbed by the idea of eating certain kinds of "gross" things, things that creep and crawl—eating a tarantula or scorpion would be disturbing. (Interestingly, this rule seems to have a clause that says, "except if it came from the sea," so the tarantula's watery cousin the crab is fair game, as is the scorpion's cousin the lobster.) That observation aside, the animals used to evoke horror in movies are generally not used as food.

My point in this is not to say that we all have rules, or think that only Orthodox Jews and Muslims have dietary rules. Even if the last rule has a strange exception, these rules are not random.

A devout Muslim will not eat pork and a devout Hindu will not eat beef, but the reasons are opposite: to the Muslim, a pig is an abomination, while to the Hindu, the god Shiva's steed is a cow, and it would be an affront to Shiva to kill his steed for food. So we have abstinence out of disrespect and out of respect.

In the last rule I gave, "Thou shalt not eat anything creepy," is an abstinence out of disrespect: spiders and lizards are dirty

things that aren't clean enough to eat. But neither of the first two rules is like this. The rules against eating animals that could be used as pets, and meat that looks too much like it came from an animal, are not rules of disrespect but rules of "Don't remind me that an animal was killed for this." The average suburbanite would rather be fed by meat from a kind of animal he has never interacted with closely—i.e. a cow—than think, "This came from a dog like the one I had growing up."

This adds some complexity to the picture of "America is a place where people eat lots of meat and that's that." It suggests that, even if we eat lots of meat, there is something residual, a reticence that tries not to know that meat comes from slaughtered animals. (That is even without adding any knowledge of what it means for livestock to be raised under factory farming, which in my mind far outweighs the slaughter itself.)

## Two things animal rights activists won't tell you

Not all meat is created equal.

I had a bear of a time learning what specific conditions animals are raised under. Animal rights activists tend to want to treat animals as people, and only tell about what is inhumane, never what is humane, and so they will never tell you that beef cattle are raised under much nicer conditions than pigs. The people involved in factory farming seem not to advertise what they are doing. This makes not the easiest conditions to find out how much cruelty is associated with different things. (Or maybe

I was just looking in the wrong places.)

What I was able to find—or the impression I was able to get—makes for a sort of ascending scale of cruelty, moving from least cruel (no more cruel than traditional animal husbandry) to most cruel. This scale isn't perfect, but it's the one I use.

Before we get on the scale, there is soy milk (which I've found to be available at grocery stores, and the chocolate is easiest to get used to), soy cream cheese, and so on. I still haven't gotten the hang of liking tofu. I've found some other soy substitutes not to taste equivalent, but to taste good enough, and soy is claimed to have a complete protein signature.

At the base of the scale, the purest and most humane end, include ocean caught fish and seafood, and organic and free

range anything. Organic food (which goes a little further than free range food—free range means that livestock can move about, free range, instead of being confined to coffinlike cells) can be found if you look for it at some supermarkets, and can be found at yuppie, granola music listening places like Whole Foods, which stacks exclusively organic produce, is pure as the driven snow, and has prompted a nickname of Whole Paycheck.

Next up the list are beef and mutton. Beef cattle do end up in fattening lots where they have little space, but they spend most of their lives growing up on open grazing land, able to move about, see sunlight, and be part of a herd.

Next up are eggs and dairy products. Because of the moral tenor of factory farming, animals can be treated cruelly even if they're not exactly being raised for their meat, and if you order a cheeseburger, there's more cruelty in the cheese than in the burger. Dairy cattle live much like pigs, although less of their lives (and therefore less cruelty) goes into producing a gallon of milk than a comparable amount of pork.

Last on the list are chicken, pork, turkey, and (the worst) veal. Many people know veal is cruel; pork and chicken are not much better. Chickens have a space roughly equal to a letter-sized paper folded in half, and farmers melt much of their beaks off (this is called "debeaking" by the farmers and the literature) because the living conditions cause so much fighting that the chickens would kill each other if they had their beaks and could peck like normal chickens would.

That is one of two things the animal rights crowd won't tell you. There's one other major thing I found that they don't advertise.

In the Orthodox tradition, part of the story is fasting, which doesn't mean abstaining from all foods and drinking only water,

but usually means abstaining from some foods. The requirement on paper is to essentially go to a vegan diet (shellfish are allowed; oil and alcohol aren't) and avoid most meat and animal products. This is more of a measuring stick than a requirement on paper, and some Orthodox bishops are concerned that new converts do not fast strictly. But, among people that observe fasting, most people go at least a notch or two closer than usual to a vegan diet. A little less than half the year has some fast or other, and the fast can be relaxed to some degree while still being observed. There are seasons of fasting, as well as days of the week.

What I realized in relation to fasting is that I hadn't expected what fasting would really do. Giving up some of my favorite tastes was obvious, and I experienced that. But craving meat and not giving into that craving came up, and I don't know that I consciously expected that, but it didn't surprise me. What did surprise me was consciousness, or more properly the effect it had on my consciousness.

Fasting quiets sinful habits and makes it easier to fight them. But at the same time, it drains energy and puts your mind in a fog. I have reason to believe that's not the final effect, that your body responds differently over time, but fasting affects different people somewhat differently, and the effect on me is quite strong.

What I realized, that animal rights activists will not tell you, was that the main difference in giving up meat (temporarily or permanently) is not the taste; it's not even really the craving, even if you fight a strong craving. It's consciousness, and when one friend said he was going to cut meat mostly out of his diet as he married his mostly vegetarian fiancée, I strongly urged him to monitor his state of consciousness.

## Why I'm glad I can't eat Splenda

When I eat more than a little Splenda, it makes me sick—nothing life-threatening or anything like that; I don't need a medical alert bracelet. But Splenda doesn't agree with me. If I eat a little, nothing happens. If I eat a bit more than that, I feel mildly sick. If I eat a lot, not only will I feel sick but nature will call with a louder-than-usual voice.

It's a shame, really. Every other artificial sweetener I've tried doesn't taste right; it tastes like something that's meant to taste like sugar, but fails. Splenda tastes like sugar's cousin come in for substitute duty, instead of complete strangers dressed up to vaguely resemble sugar. And I'm not the only person who likes the taste.

Actually, I don't think it's a shame at all. Perhaps it has its downsides: I suddenly can't eat most desserts, because at least where I buy desserts it's hard to find a dessert sweetened with real, honest sugar. If you can't eat Splenda, you can't eat most desserts. And perhaps I will have to turn down more than a tiny serving of some hand-cooked desert made by the friend I am visiting. But there's something to real, honest sugar, and it betrays something about Splenda.

A couple of friends in Kenya sent a newsletter trying to explain to the Western mind that people value a ring of oil as

evidence of a stew's richness, that bread lists its calories as how much energy it provides for hard work, and they underscored that the calorie is a unit of energy. This is a totally different attitude from in the U.S., when calories count as strikes against food.

It is also a healthier attitude, which underscores that food is eaten to nourish the body. Now God, in his generosity, has made it a pleasure as well, but we don't need the pleasure, and we do need the nutrition (i.e. nourishment).

Splenda represents an effort to sever the link between eating and nourishment. It may be physically healthier to eat one ice cream bar sweetened with Splenda than with sugar, but it is not spiritually healthier, and there may be hidden consequences to the message, "I can eat and eat and not get fat." Not only is that bad for the spirit, in that it causes you to fall short of the full stature of being human. If you think about it, it may end up being bad for the waistline.

Splenda is, in short, a very attractive invitation to become a moral eunuch.

In contrast to this, I remember a plaque with a picture of a pig, which said, "Eat to live. Don't live to eat." It is the same mindset as Richard Foster saying (I think quoting someone), "Hang the fashions. Buy only what you need." Maybe he was talking about clothes, but it applies to foods too.

## A private response

I try to eat animal products and meat, as much as are necessary for me be able to function. Unfortunately, I've found that I need a lot to function, partly for medical reasons. When I am receiving hospitality, I eat freely from what is offered to me; when I buy food, I buy a lot of beef, tuna, and chocolate soy milk. I try to get the minimum I need to function, and to take as much as I can from the lowest end of the cruelty scale. (I try. Sometimes I eat more than I need.) I also try to avoid wasting food and really try to avoid wasting meat—if it bothers me to see a pig raised in cruelty so I can eat a pork chop, it would be even worse for that pork chop to be thrown into the trash.

But there's something wrong with that. I don't mean that I chose the wrong private response to this dilemma. I think that as far as private responses go, it's at least tolerable. Perhaps other people have chosen different responses, and maybe it could be better, but the problem is that it is a private response in the first place.

PETA, officially "People for the Ethical Treatment of Animals" and labelled by some as "People Eating Tasty Animals," tend to be the sort of people Rush Limbaugh would have lampooned when he wanted to give the impression that all liberals were crackpots. They made a gruesome TV commercial telling children to run from their fisherman fathers, apparently for

much the same reason you'd run from a serial killer. They've probably done quite a lot that will prevent moderates and conservatives from taking animal welfare concerns seriously. But there is one area in which they are perfectly rational.

If, as they believe, meat is literally murder, and if, as they believe, imprisoning animals under lifelong conditions of misery is morally equivalent to imprisoning humans under lifelong conditions of misery, then it is entirely inappropriate to say "I'll privately choose to be a vegan and you can privately eat your meat, and we can disagree without being disagreeable."

Whatever else they may have wrong, what they have right is that society's default placement for the matter, of private decisions where people exercise their own private judgment on what if any dietary restrictions it may be. If they are completely wrong, and there is nothing wrong with veal, then maybe they have a private right to eat as if their erroneous beliefs are true, but if substantial parts of their claims are true, even the claims I have made, then there are real problems with the way American culture frames it.

I think I'm going to have to leave this approach "depricated without replacement"; I don't see anything better that could believably replace it.

## **An animal lover**

I've been told I'm good with animals. I certainly love pets, other peoples' as well as my own: when I visit certain friends, I usually have a pet on my lap.

There was one point when a friend was moving into the area, and (for reasons I don't understand) asked me to stay with her dog, who was afraid of men. (Even though there were women in the group of friends who had come to help her.) At the beginning, it was very clear that the dog was nervous about being at the other end of a leash from me. But after half an hour, the dog's head was in my lap as I petted him, and when the group came, he was jumping up and down and wanted to meet the men as well as the women in the group. Part of what happened was because I knew how to approach slowly and let an animal get used to me, but part of it was probably something else.

That is probably the most exotic, or at least most impressive, story I can muster about my being good with animals. If I visit friends with pets, I usually ask to see the pets. And I believe my family's warm atmosphere is part of why our cat is nineteen years old and still catches mice. This is not to say that we love our cat more than one friend, whose dog was hit by a car, or another friend, whose dog died of cancer. But it is to say that she might not have lived nearly so long if we merely gave her food and water, and that when she was attacked and was found

curled up and not moving, she desperately needed a vet's attention, but I'm not sure she would have pulled through if she didn't have the love and prayers she received. (As it is, we are delighted that she pulled through and is back to being her old sweet self.)

When I left to study, I moved to an apartment where pets were not allowed—not dogs, not goldfish. (And even if they were allowed, I wouldn't want to buy a pet that I wasn't reasonably confident I could care for properly with vacations, moves, etc. I wouldn't want to put a pet to sleep because it was no longer convenient to me.) So, I thought, I knew the perfect creative solution. I would buy a Furby—a furry stuffed animal that talks and moves, due to the technology inside. (In other words, a pet that wouldn't make messes or upset the powers that be.)

So I tried to convince myself that I could enjoy it as a pet, and for a while I thought I was successful: the Furby spoke its own language, and I learned a few words, being fond of languages. It would respond to my commands at least some of the time. The perfect pet for my situation... and it took a while before I acknowledged that there was something creepy about it. It wasn't creepy when it just stood there, looking like a stuffed animal and adding color to my room. But when it opened and closed its eyes, the technology seemed different from what I was expected. It almost seemed like the unnatural un-life of a vampire. I knew, of course, that it would run according to technology, and having done a master's thesis about artificial intelligence running into a brick wall, I knew that it wouldn't be truly intelligent. Yet I didn't count on the creep effect. Now the Furby stands as a decoration in my room, one I like looking at.

But it isn't really to conserve battery power that I don't activate it very often. I recognize it as an impressive technical

achievement, but not as a pet.

There's a spark of something that is there in a real animal that isn't there in a robot dressed in a stuffed animal costume, and it was driven home to me when I tried to pretend that it didn't make a difference. There is something special about existing, and there is something more special about living as a plant does, and something about the moving force that is an animal. Something that I can enjoy when I am with pets.

What is the point of this? Am I saying that being an animal lover is an obligation? No. I do not believe that the minimum acceptable requirement is being an animal lover. I don't think there is any moral imperative to learn how to deal with animals or have the faintest desire for a pet. But I would say that it is part of the spectrum of things that are acceptable. Not everyone needs to be a big animal lover, but it is an appropriate exercise of freedom. Not everyone needs to be a wine aficionado, but it makes sense to savor subtle differences in flavor and aroma for good wines that doesn't make sense with Mountain Dew. Slowly savoring a tiny taste of different years of Mouton Cadet rouge is not incongruous; slowly savoring a tiny taste of different years of Mountain Dew is absurd. It might me good for making a delightful lampoon of wine snobs, but Mountain Dew does not merit a treatment ordinarily reserved for wine. For the same reason, there is something that fits about luxuriating on a waterbed that does not fit about trying to luxuriate and savor a sleeping bag on a hard floor. There is no moral obligation to seek out a waterbed or even a bed, but there's a difference between a waterbed and a floor. Similar things could be said about painting with oil paints versus trying to paint with SAE 10W-40 motor oil. There's something there to animals that means that they make much better pets than shampoo bottles, so that being

an animal lover is a fitting response whether or not it is a moral obligation. And that "something there" is present whether or not you are an animal lover.

There's something there. The "something there" of animals undergirds the possibility of people enjoying pets as some of us do, a "something there" that is not human and is less than humanity, but is something more than almost anything else in nature. There is also "something more" than machinery, and while there are not ethical problems about cruelty in how we treat machinery, there is a dimension to a farm animal that isn't there for economic assets in general. That means that there are ethical concerns surrounding meat and animal products even after some of us acknowledge that God has given us authority to slaughter his creatures.

Animal rights activists tend to think animal rights means treating animal rights as human. When people have treated me as human, they have given me a bedroom and made other rooms available. They have spent time with me, and made good food available—not raw unless there was good reason to serve it raw. They have given me Christmas presents and a million other signs of respect that animals do not merit. If I looked at things in terms of rights (**I don't**), I would draw a much narrower and much more modest list of rights for animals: being part of a herd, moving about out doors, seeing sunlight during the day, and so on. Nothing about beds and cooked foods, but treated like an animal, which is much less than being treated as human, but it's also different from being treated like a mere piece of machinery.

This leaves loose ends untied. I haven't explained why the breeding that went into the breed of 96% of turkeys sold in America (which causes an ungodly amount of meat to grow on a

skeleton and beast that really aren't built to carry anywhere near that much weight—imagine the frame of a compact car supporting the bulk and weight of a full-fledged SUV) is cruel, and the breeding of housecats (which also introduces profound changes that some animal rights activists call out-and-out cruel) is appropriate stewardship with regard to God's creation. And this article is dense enough without exploring all of those.

Environmentally conscious readers may not be pleased to note that my ranking of cruelty encourages people to buy foods that have some of the worst environmental footprint—a pound of beef is said to require 4000 gallons of our scarce water. You can make meat with less impact on the environment if you are willing to cut corners, not only economically but morally. But I would argue that cruelty concerns are heavier than even environmental. And those are presumably not the only loose ends I've left. But there are a couple of points I would like to underscore.

First, thinking in terms of "raw material" is inappropriate. Destruction may be justified, but if so it is justified destruction of items that have something to them besides what economic use we might be able to find. The whole system of factory farming treats animals as mere economic assets who cannot suffer or whose suffering is not as important as making the most money.

That causes terrible, usually lifelong suffering. Cruelty to animals matters.

Second, cause as much cruelty as you need to, but not more. Try to have the lightest footprint that doesn't cause trouble to you—trouble meaning something more than "A cheese and bacon omelet would really hit the spot." (In my case trouble meant difficulty concentrating on my studies, and since then I've learned what my body can handle.) Eat to live. Don't live to eat. Remember that not all foods are created equal. Aside from soy,

organic animal products and meat, and sea-caught fish and seafood are by far the least cruel; beef is more cruel than these, but less cruel than animal products like milk, cheese, and eggs; dairy and other animal products are less cruel than most meats, including turkey, pork, chicken, and especially veal. If you are eating meat because it tastes good and not because your body needs its nutrition and energy, that is unnecessary.

Third, caring about the living conditions of farm animals has been framed as a liberal thing. That may be because there's a problem which arose, and liberals have been better at waking up to something conservatives should have been noticing. If you are dubious of my credentials as a conservative, I invite you to read [Our Food from God](#), published in a Christian journal that argues long and hard against even the more moderate forms of feminism. It's not just liberals who have a strong moral ground to criticize factory farming. It's just that liberals have been quicker to wake up and say, "Houston, we have a problem."

Seeing animals only as financial assets whose suffering is not important, instead of God's treasures which may be judiciously destroyed but have value independent of their economic usefulness, is the same basic error as seeing a person in terms of financial worth. The error is more grievous in seeing a person in terms of money, but that same basic error—as opposed to keeping a light footprint and trying to keep to justified destruction—has caused terrible animal suffering. Consider ways in which you might limit suffering you cause, and consider emailing a friend a link to [cjshayward.com/meat/](http://cjshayward.com/meat/). And maybe visit the store locator for [Whole Paycheck, er, Whole Foods](#).

# Memory and Prayer

**Note to people searching for "please pray for me right now":** I pray for all of my visitors each day. I am already praying for you. Please [send me an email](#), if you like, so I can pray for you more specifically.

I'll explain that in just a moment. Before I explain what it is, I want to explain why it is here. That is something deeply connected with prayer.

For much of my life, I have irregularly prayed one simple prayer. What is it? I'll skip the first minute. After the first minute, it goes, "Um, God, let's see... I want to talk with you... um, uh, help me to be a better person... and help my friend's knee to get better... um, uh, I really want to pray more..." It would start whenever I remembered to pray, which was inconsistent, and continue for as long as I could stand praying without anything to say, which wasn't long. Even though I have much experience with this prayer, it's not one I recommend.

If you pray that prayer, I do not want to criticize you for it. What I do want to do is give you a real alternative, so you can pray something else if you want. There is a connection I made which allows me to have an hour of good prayer each night. I'd like to share it with you. There's a little bit of a story.

One time at lunch, my best friend Robin gave me a pen and a piece of paper, and asked me to name twenty items (whatever I wanted) for him to write down. He looked at the paper for about a minute, and then handed it back to me. Then he recited all twenty items. Then backwards. Then he invited me to quiz him. If I gave a number, he gave the corresponding item. If I gave an item, he told me its number.

He explained that he was reading a book of powerful ways to apply a simple memory technique. That particular book wasn't magical; any of several others would have worked just as well, but there is useful memory technique that isn't taught as widely here as it has been. Later, I asked for the title, and read the book. I stopped partway through, but the portion I read and acted on was very useful.

When I go to a library, I no longer need to write call numbers down. It's quite a convenience not to have to hunt for pencils and paper. It's nice, when I'm falling asleep and remember something for tomorrow, to know I can remember in the morning without writing it down. I've learned to read Latin in a month, which may help me get into a good graduate school.

Before I go further, I want to address one concern a friend raised. In essence, she said, "You can use this, but you're brilliant. Will it work for the rest of us?" The answer to that is a resounding yes.

This works on the same principle as material that is taught in special education so mentally retarded students can helpfully interact with the rest of us. It doesn't require an abstract mind because it works very concretely, and I had to work a little harder to use them than most other people would. You don't need to think like me to use it; it works for all kinds of people.

There's a way of linking two things together, called pegging:

you have some pegs that you can hang things on. To do that, you represent each one with an image, and imagine some vivid, ludicrous, surreal, dreamlike image combining those two. Suppose that you want to peg the word 'transcribe' to your toes. How can you do that?

Remember when you were a child, and played with rebuses. You see an image of a hat next to several ones. Does it make any sense? At once! Or, more properly, you looked at it a little while, and then realized that "hat ones" sounds almost the same as "At once!" And you solved the rebus.

I want you, after reading this, to close your eyes and imagine something. We're going to break down the word 'transcribe' into 'train' and 'scribe'. To put them together, imagine that there's a commuter train rushing by, and on top of it is a giant scribe, sitting so he straddles the train, writing great, flaming letters on top of the train. He starts at the front, and slides back until he falls off the last car. Close your eyes and imagine for a moment; that's the representation of 'transcribe'.

Now imagine that your big toenail is a tunnel, like a train's tunnel into the mountain, and imagine that just after the scribe falls off the train, it vanishes into that hole. Imagine it vividly.

Or for another example: suppose you need cucumbers for your kid's project, and want to remember them when you stop by the grocery store. Imagine an inch-long black spike growing out of your heel, pointed down and back. Now imagine you are kicking and puncturing a cucumber with your heel again and again, until the cucumber looks like Swiss cheese—and then you use the spike to cut away one end of the cucumber and hollow it out, and slide the end over the spike so you have a Swiss cheese cucumber peel sticking to your foot.

Now imagine that you also need butter, so you imagine that

you have a stick of butter on your knee, which you are using like an ice skate, kneeling, to move around a giant frying pan.

Think about your toes. What do you remember? Your heel?

Your knees?

That's the basis for pegging. You can use different parts of your body to store things, and now when you think about your toes, you'll remember the train with flaming letters disappearing, and the scribe, and you can solve the rebus to remember the word: transcribe.

I suggest the following list of parts of your body to use as pegs. Stand alone somewhere and say, "One, toes... Two, heel..." aloud while touching that part of your body. I felt sheepish when I did it, but that gives you and me a solid place in memory to put things, and it's well worth it:

1. Toes
2. Heel
3. Ankle
4. Knee
5. Thigh
6. Waist
7. Ribs
8. Spine
9. Fingertips
10. Knuckles
11. Palm
12. Wrist
13. Elbow
14. Shoulder
15. Neck
16. Chin

17. Lips
18. Nose
19. Eyes
20. Ears

Print this page out if you need to. It's worth it. If you'd like a book that explains this more easily, something meant to be doable and practical, I've found [Kevin Trudeau's Mega Memory](#) (available on [audio cassette](#)) to be an excellent introduction. Pick up a copy and give it half an hour a day.

Each day, add to that list one thing to pray for. I knew well enough that prayer was good. I wanted to, but when I found something I wanted to pray for, I forgot it; when I wanted to pray, I could never remember what I had to pray for. You can avoid that. I now have a nice, long list of things to pray for—that God would bless certain people, or that he would make me the sort of person that will make Heaven real to others, or that people around me would sense God's presence, or simply enjoying God's presence myself. I pray for an hour before falling asleep at night. What about waiting? I don't fidget as much; I can use unexpected waits as a time to pray. I count myself much better off that way.

There are other ways as well. Jerry Root, a teacher at Wheaton, mentioned that you can pray for one person when you brush your teeth, another when you turn on a light switch, another when you open a door. When you have a time to pray and have learned to pray for that list, add to it. One day decide what you will pray when you put on your shoes. Add your own list of daily activities. When that's in place, why don't you pray when you see certain things?

The contraption at the beginning of this page is a tool I

created to practice this pegging. You can create a list, commit it to memory, and be quizzed on it. If a twenty item list is too much to start off with, start with three: you can choose how many items are on the list. Add one more each day. Before you know it, you'll be able to handle twenty items. Bookmark this page so you can come back.

I've heard people say a lot of good things about prayer. They've said, for instance, that prayer is not just a celestial vitamin, something good if unpleasant, but a great kindness. They've said it's a privelege to bring requests before the King of Heaven. They've said it's part of how God works with us, and makes us ready to be with him. All of this and more is true; Richard Foster's [Prayer](#) is one of many books if you wonder, "Why do Christians say prayer is good?" I have written this especially for people who want to pray but have trouble praying when they can't remember what to say. Now you can. Thanks to V.V. on Sun's Java forum and all my beta testers.

# On Mentorship

The specific principles which I see as applicable to mentorship are as follows:

- Love is the foundation to all healthy human relationships. The mentoring relationship is first and foremost a human relationship, and will function best if it is a relationship between whole persons built on love and friendship.
- Effective teaching in that context begins, not with the mentor talking, but listening. There are at least three reasons for this:
  - Listening is valuable in and of itself.
  - When a person is listened to, it helps him to trust and open up. This will help the teacher to gain a very important trust in instructing the student.
  - It will give the mentor a basis to connect with the student, and tailor messages to him.
- Beauty is forged in the eye of the beholder. A willing student can be powerfully shaped by a mentor who looks at him and sees him, not merely as he is, but as he will become.
- Effective mentoring is not only teaching of one specific area, but first and foremost a teaching about life. It is teaching of life and wisdom in such a way as to usually take the form of a kind of specific lesson.

- The mentor should approach the relationship as being for the student's benefit, and only incidentally for his own. He should be willing to do things that are difficult for him, and he should be happy for the student's success — even (especially) when the student does better than him, or catches him in error.
- The mentor should not only be concerned with imparting knowledge, but more importantly concerned with helping the student to think and use knowledge effectively.
- The mentor should not be trying to clone himself or make the student an extension of himself. He should try to help the student be the person God created him to be, not who the mentor wants to be or in fantasy would selfishly like him to be.
- The student should not be passive, regarding the mentorship as something which is done to him. He should regard it as a resource to take advantage of in his efforts to actively learn. He should take responsibility on himself for his own progress. He should concentrate on actively listening, and asking intelligent questions. The student should be like Prometheus, looking for every opportunity to steal knowledge from his teacher.
- Both parties should work hard — not asking "Can this work?", but "How will we make this work?" Persistent in making things work, the mentor should none the less vary his methods of explanation, like water flowing down a hill — it will get around obstacles, and it does so by flowing around and through them, which is in turn accomplished by adapting its shape to whatever there is, and thereby slipping around obstacles that would stop a rolling rock.

[N.B. The following segment refers to the following joke/story, recounted in Reader's Digest:

A professor believed that his students were mindlessly copying too much of his lectures instead of thinking and then writing down key points. One day in class, he interrupted his lecture and said, "Stop. I want you to put down your pens and pencils and listen to me.

You are not here to transcribe my lectures. You are here to think first and foremost, and only then to write down the essence of what I am saying. You don't have to write down every word I say verbatim. Now, any questions?"

One student raised her hand. "Yes?" "How do you spell 'verbatim'?"]

- A rare but important part of teaching is shattering limits on the way a person is thinking ("How do you spell 'verbatim'?"). This should never be done lightly or as a first approach, nor should it be done carelessly or insensitively. It needs to be done with the utmost care, and is probably very difficult to do well. That stated, a mentor does a student no service by helping him to write down an hour's worth of requests to stop writing and start thinking.
- Metacognitive thought is important both for mentor and apprentice. The mentor should be thinking about both his own thought and the student's, and when the student isn't hearing what the mentor is saying, the mentor should ask, "How am I thinking? How is he thinking? Why are we not connecting?" — but he should primarily be concerned for the student's thought. The student should be thinking about both people's thought as well — the mentor's, because it is

an example of how an expert thinks, and his own, because if he understands how he is thinking he will be better prepared to transcend his current limits. Both of them should expect the other to periodically have an alien insight to share that won't fit in their present mindsets.

- The mentor should be emotionally intelligent, and be sensitive to the emotions and emotional needs of the student. If the student is not in the right emotional state, learning will be almost impossible. We are not just pure, emotionless minds, and we can be far more effective if we care for emotions and use them then if we act as if emotions were not a serious part of us. If either person is not able to give full attention, a meeting should be either shortened or postponed.
- The mentor, precisely because he is a unique leader, should take the attitude of a servant to the student, just as Jesus washed his disciples' feet.
- The mentor should realize that the lesson he is teaching is first, who he is; second, what he does; third, what he says. The mentor should model an excitement and interest in the material, and focus less on what to think than how to think. He should also model before the student effective human relationships with other people.
- In the beginning especially, the mentor should not deluge the apprentice with information. Assimilating new and foreign information — particularly when you don't have a framework to put things into — is hard, and overloading a student prevents him from learning anything. A mentor should begin by asking questions of the student, trying to understand him better, and only slowly ease into talking about philosophical frameworks and then details of the subject area of the

mentoring.

- The mentor and eventually the student should know not only their cognitive strengths, but at least as importantly their cognitive weaknesses — both those that are part of being human, and those that are specific to a person. Code Complete (referenced below) says that there is a tenfold productivity difference made when programmers use principles and techniques grounded in a respect for cognitive weaknesses.
- The mentor should be an expert in his field, and should also be continuing to learn and do research. Graduation is not the end of learning, but a beginning of a new kind of learning.
- The mentor should help the student to put the day's lessons into practice. The student should be asking the question, "How can I apply this? How can I practice it?" Homework will help the student to learn, although perhaps shouldn't be started until the mentor has earned the student's trust and the student is motivated to use homework assignments to squeeze every last benefit out of time with the mentor.
- The student should be safe and free to make mistakes, for a couple of reasons. First, if he isn't making at least some mistakes, he probably isn't being challenged enough or learning enough new material. Second, a mistake is a tremendous educational opportunity. It provides a unique insight into the student's thought, and therefore should be treasured, grasped, analyzed.
- There is no quick fix. The most effective (and, for that matter, even the fastest) way to get results is to work slowly, patiently, unhurriedly towards achieving mastery. There is often a tradeoff between optimizing for short term and long term effectiveness; patiently working for long term

payoffs will ultimately produce the highest dividends.

I will also mention several books which provide a backdrop to my comments, three that I would strongly recommend and four that I would suggest:

Strongly Recommended:

- The Bible. That has provided the theological and philosophical grounding to my thought as a whole; it gives the structure/meta-structure which I fit the other points into. (This is the most important, but it is not necessary to read cover to cover before beginning anything. Fifteen or thirty minutes a day will add up to a lot if continued for a couple years.) Particularly relevant passages that come to mind are Matthew 5-7 (the Sermon on the Mount), I Cor. 13 (the hymn to love), much of the Johannine writings (esp. John 13-17), and certain areas of Proverbs.
- Seven Habits of Highly Effective People. A classic.
- How to Win Friends and Influence People. Although much of the influence it deals with is persuasive in character, the same principles apply to the kind of influence necessary to effectively mentor.

Suggested:

- Listening, A Practical Approach. Probably one among many books on listening, this deals with an extremely valuable and neglected area of communication.
- Emotional Intelligence. We are not pure minds, and we can cripple ourselves terribly if we do not handle our emotions effectively. If we do, they will help us greatly.
- Code Complete: A Practical Handbook of Software

Construction. In computer science, most of the programming materials talk about how to effectively use computers, taking advantage of their strengths and dealing with their weaknesses, to get a computer to do something. This book talks about how to effectively use your mind, taking advantage of its strengths and dealing with its weaknesses, to get a computer to do something. The kind of thinking involved is applicable far beyond computer science.

- Gandhi's writings. I could mention specific chapters in what I've read, but I will say that there is a general theme of spiritual force instead of physical force, and the spiritual force which he advocates (which helped him to turn bitter enemies into warm friends) has tremendous relevance to mentorship. In *Autobiographical Reflections*, in a chapter entitled "Ahimsa or the way of nonviolence", he comments that when a parent slaps a child, what affects the child is not so much the sting of the slap, as the offended love which lies behind that slap.

# Modus Tollens

## *Meandering Reflections on Life, Faith, and Politics*

### Modus Tollens in Propositional Logic

In the pursuit of knowledge,  
Every day something is added.  
In the practice of the Tao,  
Every day something is dropped.

The Tao Te Ching, 48

$\hat{a}_{\frac{1}{4}} \sim \hat{I}^3 \check{I} \check{Z} \hat{I} \mu \hat{a}_{\frac{1}{4}} \hat{I}^{\frac{1}{4}} \hat{I}^1 \hat{a}_{\frac{1}{4}} i \hat{a}_{\frac{1}{4}} \hat{I}^{\frac{1}{4}} \check{I} \in \hat{I} \mu \hat{I} \gg \hat{I} \check{I} \check{I}, \hat{a}_{\frac{1}{4}} i$   
 $\hat{a}_{\frac{1}{4}} \in \hat{I} \gg \hat{I} \cdot \hat{I}, \hat{I}^1 \hat{I}^{\frac{1}{2}} \hat{I} \textcircled{R}, \hat{I}^{\circ} \hat{I} \pm \hat{a}_{\frac{1}{2}} \eta \hat{a}_{\frac{1}{2}} \diamond \check{I} \in \hat{I} \pm \check{I}, \hat{I} \textcircled{R} \check{I} \diamond \hat{I}^{\frac{1}{4}} \hat{I} \check{I} \check{I} \dots \hat{a}_{\frac{1}{2}} \diamond$   
 $\hat{I}^3 \hat{I} \mu \check{I} \% \circ \check{I} \diamond \hat{I}^3 \check{I} \textcircled{O} \check{I}, \hat{a}_{\frac{1}{4}} \diamond \check{I} f \check{I}, \hat{I}^1 \hat{I}^{\frac{1}{2}} \hat{A} \cdot \check{I} \in \hat{a}_{\frac{3}{4}} \eta \hat{I}^{\frac{1}{2}} \hat{I}^{\circ} \hat{I} \gg \hat{a} \check{I} \hat{I}^{\frac{1}{4}} \hat{I} \pm$   
 $\hat{a}_{\frac{1}{4}} \diamond \hat{I}^{\frac{1}{2}} \hat{a}_{\frac{1}{4}} \diamond \hat{I}^{\frac{1}{4}} \hat{I} \check{I} \hat{a}_{\frac{1}{2}} \eta \hat{I}^{\frac{1}{4}} \hat{a}_{\frac{1}{2}} \check{I} \dagger \hat{I} \check{I} \diamond \hat{I} \check{I} \hat{I}^{\frac{1}{2}} \hat{I}^{\circ} \hat{I} \pm \check{I} \diamond \check{I} \in \hat{a}_{\frac{1}{2}}, \hat{I}^{\frac{1}{2}}$   
 $\hat{I} \pm \hat{a}_{\frac{1}{4}} \check{I} \diamond \hat{I} \mu \hat{I}^1 \hat{I} \pm \hat{a}_{\frac{1}{2}} \diamond \check{I}, \check{I} \textcircled{O}, \hat{I}^{\circ} \hat{I} \pm \hat{a}_{\frac{1}{2}} \eta \check{I} \in \hat{a}_{\frac{3}{4}} \eta \hat{I}^{\frac{1}{2}} \check{I}, \hat{a}_{\frac{1}{2}},$

I am the true Vine, and my Father is the Vinedresser.

Every branch in me that does not bear fruit, He takes away,  
and every branch that bears fruit He prunes, that it may  
bear more fruit.

John 15:2

Tolle, lege.

Take, read.

A child, to the Blessed Augustine

In the steps of logic, interestingly claimed by both the disciplines of mathematics and philosophically (or perhaps, disowned by both disciplines), the proof of any great theorem has something paradoxical. Step by step, you go from one statement to another that is more general and asserts less, until at the end you reach a significant and quite specific conclusion at the end. At each step of the way, there is something you lose and something you give up. But when all the blocks are in places, you have a conclusion that is far more substantial than any of the losses ensued.

Modus tollens, for which this piece is named, is one of two prominent "inference rules" in logic. Modus ponens, the way of adding, powers such syllogisms as, "If all men are mortal and Socrates is a man, then Socrates is mortal." Modus tollens, by contrast, is the way of taking away, and it powers such syllogisms as, "If all men are mortal and the Archangel Michael is not mortal, then the Archangel Michael is not a man." Now symbolic logic does not deal too much in concrete syllogisms; it is often concerned with more abstract pursuits, but these provide at least slightly concrete of an illustration of two of the major workhorses in symbolic logic. And they are not mutually exclusive to use; I may take modus tollens as my point of departure for

this work, but please understand that it would be absurd to say that a logician who agrees with me would stop using modus ponens in proofs and argument.

## Blinding light

When I was young I enjoyed night and darkness, and the beauty that things have once your eyes are accustomed to the night. When driving at night, I loathed headlights: I used them in full accordance with the law, and I was glad that other drivers would see me, but I was painfully aware of something I am much less aware of now: headlights effectively limit my vision to where they are pointing; if I want to look to the side of the road, I see far less than my eyes can see when they are accustomed to darkness. I wrote in [my cynical dictionary](#),

**Flashlight**, n. An instrument of imperception which obscures vision by producing a concentrated glare at one point which is sufficiently intense to prevent the user from seeing anything else. Environmentalists have brought the cleverness of this device one step further by producing the solar powered flashlight.

It was much later that I would learn that as far as core insight goes, I had reinvented a basic building block of ninjutsu. Ninjutsu recognizes that we see optimally in the dark when we have not seen strong light, such as that produced by cars and flashlights, for at least 20-30 minutes (some would prefer longer). The optimal condition from a ninja's perspective is to retain such night-optimized vision, while any opponents would see

bright lights enough to lose that vision. And there are many layers of insight in that basic perspective: a flashlight is not simply, as a naive user would expect, something that lets us see where we could not see. It works in a way that shuts down our natural night vision, the vision that not only ninjas but a million years of our human race had as the only, and best, way to see in the night. If I may put it in these terms, the ninja preference for "natural night vision" should not be seen as a distinguishing feature that sets ninjas apart from other people today, but a retained continuity with the only game in town for well over 99% of the times humans have walked the earth. I don't want to downplay or diminish the achievement represented by the whole suite of ninja stealth skills, but trying to retain one's natural night vision is not so much a matter of "Wow, what insight and skill!" as "They have a clue!"

## A supreme instance of a universal law

In the [Arthurian Torso](#), C.S. Lewis makes a point about vicarious salvation: "He saved others, himself he cannot save," the wicked barb of sarcasm unleashed as Christ hung on the Cross with nails through his wrists and labored breaths piercing his lung, is a definition of the Kingdom. All salvation, everywhere and in every place, is vicarious. Every man may paddle his neighbor's canoe but not his own. And as regards Anselm, who argued that the race of men owed a debt that could only be paid by a man and simultaneously could only be paid by God, so only God made man in Christ could pay the debt, did not describe a fundamental exception that is irrelevant to the workings of the universe, but the supreme instance of a universal law. "He saved others, himself he cannot save" is written lightly in small letters in our lives and deeply engraved on the most monumental scale in Christ, but we participate in what Christ has offered.

I have referenced Western symbolic logic, the Tao Te Ching, and ninjutsu in connection with "Every branch that bears fruit, [the Vinedresser] prunes that it may bear more fruit." But the intent is not syncretistic. It is to point to the supreme instance of a universal law. A ninja instructor teaching stealth, I would imagine, might tell someone eager to use a flashlight, "Let me show you what things look like if you put that flashlight away for

20 or 30 minutes." Robb Wolf, in advocating a neo-Paleo human diet that consists of the same sort of things people ate for a million years before the extremely recent agricultural revolution, says, "Put down that donut. For that matter, put down that organic whole wheat bread, even if it's not modern wheat but spelt. Would you please try eating just the fuel the human body is made to run on?" But this is not with an intent of syncretism to write some hymn that begins praising Christ and melts into praise of Krishna. The universal law is a law that plays out in many places and is recognized in many ways outside of the Church. For that matter, quite a lot of the Church's wealth is to be found outside of its proper boundaries; at one place Chesterton defends the Church against things it is charged with simply by calling on [The Witness of the Heretics](#). The boundaries of the Church may rightly be retained, but the Church found Christians before Christ among the pagans as well as among Israel. And pruning is at one stroke a treasure of God in the Church and something forever to be found across the realms of men, who are in any case made in the image of God.

## The age of the damned backswing and *modus tollens*

The damned backswing is a real phenomenon, but it need not be the last word; every thing that is taken away can be a cutting of the Vinedresser.

Since ninjutsu decided that it is better for a ninja to have real night vision, artificial light, even of fire, was treated as something that would quench natural night vision. But in our time the pure organic light of incandescent bulbs has been progressively phased out in favor of the plastic light of fluorescent bulbs, whose buzzing is a nuisance even to the blind.

There are further steps away from the organic white of incandescent bulbs; LED lights offer a lunar white which is not helpful if you wish to pick out an outfit where the colors fit with each other instead of clashing; lunar white looks white but it provides a greyscale vision with colors barely discernible. (And is there a hint of the future in that lunar white light bulbs have no mercury and take a fraction of a CFL's power draw?) Once conservatives balked at the brightness of new (incandescent) light bulbs, offering vision comparable to sunlight at any time and any place. But the stern hand of a government that believes it knows better than us may be wielded by one who knows better than government. This One who knows better than government

might use the pest of the fluorescent light to draw people to use the day as day and the night as the night. And that may be gain and not loss. We may lose the organic light of incandescent light sources to gain the Organic light of the Sun.

## The many ages of *modus ponens*

Reading, on a doctor's advice, [The Paleo Solution](#) rumbled with a few implications. Probably the biggest change in perspective was that I viewed the New Testament as incredibly ancient, and the Old Testament as even more ancient. [The Paleo Solution](#) suggests that the most profound change in the time humans have been around has been the agricultural revolution, which took place after 99.5% of the time people have been around. While *Genesis* may place nomads alongside builders of cities, *Exodus* fairly clearly assumes the agricultural revolution has taken place. And even on purely secular grounds the New Testament exists in a closer-to-modern era. Historians may note that people in the U.S. made a very conscious technological decision to have roads connecting places. In the time of the New Testament, there were Roman roads which vastly outstrip any transportation technology in the Old Testament, and the spread of the New Testament, which includes letters to diverse cities, was partly affected by the Roman roads.

And all of that is to look without enlightenment at the Old and New Testaments as well-preserved signposts to where we are technologically today. But let us continue without enlightenment for a moment.

## **Plastic for breakfast, lunch, snack, or dinner**

The book [It's Getting Better All the Time](#) could helpfully be placed alongside [Nourishing Traditions](#). The Powells' "Publisher comments" on [It's Getting Better All the Time](#) states:

### **Publisher Comments:**

There has been more material progress in the United States in the 20th Century than in the entire world in all previous centuries combined.

### **Book News Annotation:**

This work by economist Julian L. Simon (d. 1998) was left unfinished at his death but was completed and prepared for publication by his colleague, Stephen Moore. The title states the bias, which is further explicated in the introduction: "...there has been more improvement in the human condition in the past 100 years than in all of the previous centuries combined since man first appeared on the earth." In support, 100 trends pertaining to the health and welfare of, mainly, US inhabitants are presented in graphs, with interpretive text that maintains the "getting better" thrust (and the conservative orientation of the author and the publisher).

Interestingly, Simon's wife injects an alternate view in a brief foreword in which she discusses her reservations about describing the 20th century in the positive terms used in the book, and she tells of her conversations with her husband on the subject. Annotation c. Book News, Inc., Portland, OR (booknews.com)

### **Synopsis:**

There has been more material progress in the United States in the 20th century than in the entire world in all previous centuries combined. Almost every measure of health, wealth, safety, nutrition, affordability and availability of consumer goods and services, environmental quality, and social conditions indicates rapid improvement.

With over 100 four-color figures and tables, this book shatters the myths about progress that are often perpetuated by doomsayers in the media and academia.

[Nourishing Traditions](#) takes the agricultural revolution as a healthy starting point, but it offers something, even to someone following the Paleo diet, that [The Paleo Solution](#) does not. It discusses progress that has been made, and what comes clear is that this is progress from a corporation's perspective, not progress from a human health perspective. Factory farmed milk, for instance, is not the natural health food it is presented to be. Never mind the question of whether milk represents a part of the Paleo diet. Factory farmed milk has such substances as pus mixed in with the milk from the unnatural condition the cows are under, and 2% milk has its skim portion mixed in from powdered skim milk, and on this point [Nourishing Traditions](#) effectively says, "Cholesterol is your friend. Oxidized cholesterol, such as

that produced in powdered skim milk, is your enemy." I remember one time taking the claim that organic food tastes better as one more marketing ploy to justify Whole Paycheck's heavy costs. Then, after a time of eating only organic strawberries when I ate strawberries—out of a dutiful sense that it was better for me—I ate a conventionally farmed strawberry and wondered, "What is this that I have bitten into?" My concern here is only incidentally about pleasure, which really does not help us as much as we think. It is something deeper. If you want a rough, unscientific but accurate gauge of how nourishing fruit is, taste how sweet it is. It's that simple. The taste is not simply a pleasure delivery system; it is also a signal about how nourishing things are for you. And I remember commenting to one parent who was concerned about his children's sweet tooth, "That sweet tooth is a God-given aid. It should be rewarded, not with candy, but with sweet fruit." And candy is as bad as nutritionists say it is, but you'd be amazed how sweet the best organic fruit tastes.

I remember picking up a bottle of Aldi's "Fit and Active" French dressing to read the ingredient list, and stopping at the first ingredient because the first ingredient was corn syrup. This may be progress from a corporation's perspective, to sell a product consisting large of corn syrup as a health food; it is not progress from a health-oriented savvy consumer perspective.

What has happened with all foods where I live, unless you specifically know what you are doing and are looking for exceptions and are willing to pay noticeably more, is that food is manipulated by chemical wizardry much like a plastic replica. It may be obvious to the discerning that "cherry flavored XYZ" does not exactly has the taste of cherries. The reason why this is the case is that if anything is produced on a mass scale, the

engineering process for food finds out what the chemicals are that combine to give a cherry its flavor, and then the cheapest way is found to add these chemicals so that there is a cherry-like taste, but one that heralds none of the health benefits of eating cherries.

And this is, if anything, the subtle objection to [It's Getting Better All the Time](#). It is the objection that moving from something flavored with cherries to something engineered to taste like it was flavored with cherries is a negative amount of progress. The more obvious objection is not to point to plastic-like engineered foods—or plastic-like engineered pop culture—but to say that we are in an unmistakable global financial crisis, and none of the upward trends discussed in the book are enough to take away the quite bleak economic picture in the U.S., which less than twenty years into the third millenium, is quite drastically failing to retain the prosperity and security of the twentieth century heralded in [It's Getting Better All the Time](#). If the twentieth century brought more change than anything before, it may be the change that precedes [the damned backswing](#). I know that there are people who like to put a positive face on things, especially with the current president Barack Obama, but I have yet to see a journalist say that the present employment picture and number of people out of work is better than in the 50's and 80's. As far as journalists go, I have seen the shift from a war in Afghanistan under Bush that was something we should never have gotten into, to one Nobel Peace Prize later, a war in Afghanistan under Obama with vile enemies who cut off the nose and ears of a woman portrayed on the cover of Time Magazine, because she ran away from an abusive husband. Now I have little doubt that the Taliban did all that and worse, but it was doing all that and worse when the war in

Afghanistan was Bush's war. And with the shift from Bush to Obama, significant progress has been made in reduced jobless statistics, with perhaps the exception of your family and those people you know who are trying to find a job. Not that this is all Obama's responsibility, regardless of the charge some people make that he wants to make America into a third world nation.

The U.S. economy would presumably also be in hard times if McCain had won the election, and it was really quite nasty before Obama took office. But [It's Getting Better All the Time](#) champions "change," and President Obama champions "change," and both seem to invite multiple aspects of [the damned backswing](#).

In my early work [The Grinch Who Stole Christmas](#), I wrote a story, not of a Grinch trying to kill Christmas by stealing presents, but of a Grinch trying to kill Christmas by overwhelming it with more presents than people would imagine. It tells a story of taking away by giving, and the real story of the twentieth century may not be the logician's proof that gives away more and more until something substantial is proven, but the opposite story of receiving more and more until true poverty comes, both on a spiritual and on a material level.

## Embracing *modus tollens*

There are many layers to things; there is at least one material layer to the U.S.'s economic condition, and at least one spiritual layer, and the best picture is one that recognizes what is going on materially but recognizes that the outer shell has an inner sanctum and in this struggle *we wrestle not against flesh and blood, but against principalities, against powers, against the rulers of the darkness of this world, against spiritual wickedness in high places*. Politics is important, but even with the best candidates in high political positions the struggle is not about flesh and blood, or about logistics and voting trends. On that score I would quote an Orthodox priest who said, "Whatever happens, I will vote and go to confession."

And in an age of *modus tollens*, Satan is nothing more than a hammer in the hand of God. There are layers to events, but not only a material and a physical layer. St. Joseph's words to his brothers, *As for you, you meant evil against me; but God meant it for good, to bring it about that many people should be kept alive, as they are today*, has more than one dimension, and one dimension is that what Satan means for evil, God means for good. That is the entire point of *God the Spiritual Father* and *God the Game Changer*.

We tend to think of God's Providence in terms of what he gives, but the same Divine Providence that gives also takes away.

St. Job lost all of his possessions and then rid himself of the one outward possession the Devil could still take from him, and said, "Naked I came from my mother's womb, and naked shall I return; the LORD gave, and the LORD has taken away; blessed be the name of the LORD." He lost massive wealth, but the story in its end is not of the Devil's victory, but of God's victory in St. Job. Perhaps St. Job never on earth knew what we are told from the beginning, that Satan, the Accuser, the Slanderer who stands before God slandering his saints day and night, found no one he considered worthy of temptation and God allowed his property and his health to be taken away, **not** as punishment for his sins, but as a champion who held fast to worshipping God no matter what happened to him. By the end of the book, the Devil is made ridiculous and is all but pushed out of the picture; his slanders against St. Job were just that, slander. God changes the game in speaking out of the whirlwind, but the St. Job who lost everything is the St. Job who gained a place standing before the throne of God in glory. God wins, and God wins in and through St. Job.

St. Paul writes of "want" or lacking things, **Not that I complain of want; for I have learned, in whatever state I am, to be content. I know how to be abased, and I know how to abound; in any and all circumstances I have learned the secret of facing plenty and hunger, abundance and want. I can do all things in him who strengthens me.** The Providence of God is not only in what we think we need; it also comes with *modus tollens*, when God takes away what we think we need. St. Paul elsewhere says, **There is great gain in godliness with contentment; for we brought nothing into the world, and we cannot take anything out of the world; but if we have food and clothing, with these we shall be content.** That's a much shorter list of what we consider

essentials even for the poor; those who give of their own to care for the poor would generally like to see the poor have housing, for instance, with heating and air conditioning. The general list of things one may have around the poverty line are much longer than "but if we have food and clothing, with these we shall be content." And some of our luxuries are less edifying than they may seem to us; in some sense the Providence of *modus tollens* may be God taking away a bottle of wine and saying, "You've had enough."

## The prophetic word

In Malaysia, one cartoon portrayed Americans at a lavish banquet with half-eaten plates of food set aside casually, while a television showed an emaciated child holding out a hand to give. And where America stands now is a place which the prophetic voice has much to speak to. (Note that by saying this I am not claiming to be a prophet; merely restating what the prophets would have said based on what is on the public record.) We encourage, foster, and nourish narcissism, with each generation more proud than the last. We use our money for ourselves when we could give much more to the poor. We have a number of abortions that exceeds the number of Jews killed in the Holocaust, not to mention embryonic stem cell research. We have the Internet as a porn delivery service, so that a basic household utility now includes unsolicited pornography. We have accepted sodomy as normal, as an alternate lifestyle that others rarely speak out against. It is considered normal for a Christian to practice (Hindu-derived) yoga, and such things as alchemy (celebrated in a patchwork quilt at the American Medical Association headquarters) and Freemasonry increasingly come out, too. Any one of these things would be grave enough; taken together they represent a fall off a moral cliff. And it is old news at best that we patronize sweatshops and otherwise enjoy comfort at the expense of preventable human misery. And God

does not let such things slide forever; he gives opportunities to repent, perhaps, and then judgment so that under an iron hand people may learn what they refused to learn by the law of grace.

Perhaps, or perhaps not, "[E]ven if these three men, Noah, Daniel, and Job, were in it, they would deliver but their own lives by their righteousness, says the Lord GOD... Even if Noah, Daniel, and Job were in it, as I live, says the Lord GOD, they would deliver neither son nor daughter; they would deliver but their own lives by their righteousness." applies to our situation.

The righteous may be saved by their faith in any case. "The righteous shall live by faith" is originally a quote from the Old Testament when God's judgment was about to be unleashed.

In any case, after we have gone apostate under *modus ponens*, it looks as if we shall experience the refining fire of *modus tollens*, of God providing as he chastises. Not that Barack Obama is devoted to doing the Lord's will; Buckley's quote, "I would rather be governed by the first two thousand people in the Boston telephone directory than by the two thousand people on the factory at Harvard University," applies in full force, and if you say that it seems an extremely uncharitable reading, and unreal, to say that Barack Obama wishes to make the U.S. a third world nation, I would say that you do not understand Harvard Ph.D.'s. Wishing the U.S. were a third world nation is nothing strange for a graduate of Harvard. When he announced that health plans could no longer discriminate on the basis of pre-existing conditions, my first thought was, "He is banking on the premise that Americans can't do basic math." Speaking as someone who has worked briefly in the insurance industry, one of the basic rules if you are going to run a profitable insurance business is that you exclude bad risks: if you are an auto insurer, you want people who have few accidents, if any, on their record,

and not daredevils with a stream of one accident after another.

And you charge less for people with a squeaky-clean driving record than you do to someone who you're willing to take on but has a few accidents. It may be a wonderful thing in the short term for people with pre-existing conditions to now be able to get coverage, but unless insurance is going to cost vastly more, it cuts away the ability of non-government insurers to do business —as has already started to happen. Fewer businesses are offering health insurance plans.

But this is almost a side point, a distraction. Let us assume the worst, that the President holds no love for America and is re-elected at the next election. The same rules apply.

## Tools of God

C.S. Lewis said that all do the will of God, Satan and Judas as instruments, Peter and John as sons. And it is a fundamental mistake to think that Barack Obama is too bad to be an instrument of the Lord's action. No one, not Satan, is too bad to do the will of God. I'm not sure how to put this delicately, but it is not at all clear to me that it is to the U.S.'s edifying benefit to be a first world nation. Some have said that across history powerful nations have played the role of gangsters and weaker nations have played the role of prostitutes. In [The Last Battle](#), enemies push true Narnians to a stable said to be devoted to the demon-god Tash, and we read:

"I feel in my bones," said Poggin, "that we shall all, one by one, pass through that door before morn. I can think of a hundred deaths I would rather have died."

"It is indeed a grim door," said Tirian. "It is more like a mouth."

"Oh, can't we do anything to stop it?" said Jill in a shaken voice.

"Nay, fair friend," said Jewel, nosing her gently. "It may be for us the door to Aslan's country and we shall sup at his table tonight."

Jewel spoke only a guess, but none the less spoke words of

truth. It is through that door they meet Heaven, and God's providence will not be thwarted by leaders who are questionable in their pursuit of goodness. God's providence is not just for when we have good presidents; it is equally true if we have not-so-good presidents. It has been twice or thrice that modern medicine saved my life, first-world medicine that I doubt I could afford if the present economy worsens and worsens and worsens. But this will not be responsible for my death: all of us die, save one or two like Elijah; mortality is total in every generation. My death may be sooner if good medicine is denied me, but it is inevitable by some means, and as one Orthodox priest said, "There's nothing that goes wrong in Orthodoxy that a funeral cannot solve." We will be judged by how we live with the hands we have been dealt, not whether we could have been dealt a better hand, or rather a hand that was more to our liking.

**Everything that happens is  
either a blessing from  
God, or a temptation that  
has been allowed for our  
strengthening**

Still God reigns sovereign. Still he rules. Persecutions may come, but only if God allows it, and only the degree that he allows. Persecutions have been one of many ways God has strengthened the Church, and the normal condition of Orthodoxy is to live under hardship, with such things as fasting and voluntary self-deprivation existing as surrogate hardships. And if God's Providence comes by taking away one thing we think we need, this is not a failure of his Providence but as much a success of his Providence as when he answers our prayers. We may lose artificial light and find our true night vision. All of this is a Providence that whispers in the way of adding, *modus ponens*, and shouts in the way of taking away, *modus tollens*.

It has been said, "Whatever you focus on, that is your God." We are not to focus our attention on the demons; the [?Ladder?](#) says that the proper use of arrogance is towards the demons. Focus on God, and the demons themselves will be ministers of trials and temptations that make you stronger in the sight of God. And while I intend to vote, in one of the most monumental

elections in U.S. history, it is a mistake to believe that God will only provide if the election goes as I would wish it to; God's providential love is not so fragile, nor near to being so fragile.

**God the Spiritual Father ever provides, is ever loving,  
ever Light.**

# **Monasticism for Protestants**

## Alice in Wonderland

I was given a copy of [Singled Out: Why Celibacy Must Be Reinvented in Today's Church](#). I've read some but not all of it, and I've read the introduction in full. I really have more to say than that the Orthodox tacit response to hearing an Evangelical say, "I've been reading the Fathers" when they have only been reading the Blessed Augustine is, "Ouch!" Saint as he may be, the Blessed Augustine is not any kind of legitimate polestar for navigating the Fathers, and when [Singled Out](#) deals with a Tertullian who fell into heresy and gave Augustine a singularly bad precedent, the best thing to say to Evangelicals is, "You do not understand monasticism as it exists in the Orthodox Church." Possibly parts of the book I didn't get to start to bring in quotes from the Orthodox Church's Greek Fathers, but I have not found such a passage and it certainly doesn't set the stage. Alan Perlis said something entirely relevant to Protestants who wish to understand Orthodox monasticism: "The best book about programming for the layman is [Alice in Wonderland](#), but that's just because the best book about anything for the layman is [Alice in Wonderland](#)." And the best book for Evangelicals on Orthodox monasticism is decidedly [Alice in Wonderland](#).

I wish to state briefly, and without explanation, that the first step in understanding Orthodox monasticism is understanding it is nothing Protestants can project. One routine

moment in a conversation with a respected parishioner, informally called "the godfather of us all" within the parish, came when he had said he wanted to understand Orthodoxy and asked an Orthodox Christian what books to read, was told, "You don't understand Orthodoxy by reading books. You understand Orthodoxy by participating in the services." And if the Orthodoxy of the parish is not something to analyze, it is all the more confusing to understand monastic Fathers without even being Orthodox. Regarding sexuality, for instance, monasticism knows as well as anything else that sex is a powerful impulse, and it has powerful built-in features intended, ultimately, to transform carnal desire into a desire for God. Part of this is an extreme caution in monks' dealings with women, but the same caution is present in the (admittedly less numerous) warnings by Mothers for nuns dealing with men. One nineteenth-century Russian monk compared the Christian living in the world to a wildflower, with the monastic (male or female) compared to a flower that needs to be in a "hothouse" (i.e. a heavily curated greenhouse) to flourish. Marriage is a good and honorable thing, but it's not just marriage where sexuality serves a legitimate purpose. Monasticism does not provide a track where sexual impulses become simply absent or unimportant; it provides a track where sexual impulses are to be one of several areas where the human is transformed according to divine glory.

## A theology of failure

My first real point about [Singled Out](#) is that is that the introduction does not call for a new theology of celibacy. It calls for an old theology of failure.

Let me take an instance with St. Paul, and for the moment ignore his celibacy completely, which is not my point here. His accomplishments include raising the dead, planting numerous churches, and writing half the volumes of the New Testament. Sometimes people speak of someone having nothing left to prove; on human terms his accomplishments are about as stellar as mortal Christian has achieved. When he wrote 2 Timothy in particular, and knew that his end was near, he had about as much claim as anybody in Christian history to say, "I came. I saw. I conquered." But what he instead says is "I have fought the good fight. I have run the race. I have kept the faith." These words do not bear a whisper of saying, "I achieved." They say instead, "I was faithful."

Saints on the whole are faithful and are not affected terribly differently by success and failure, and this is normative. If we look at school sports, there is a momentous spiritual edifice of sportsmanship, however imperfectly applied: "It's not whether you win or lose; it's how you play the game." Now teams of athletes who have to give a game their best their best may end up winning remarkably often, but this is not a best strategy of

winning. It is a best strategy **above** winning.

Saints seem to exhibit something like sportsmanship in that they are concerned about being faithful rather than succeeding or failing. This adds a certain tint to the whole moral atmosphere, and saints, which one tries to tell even in a work from the Anabaptist tradition like [Martyr's Mirror](#), show in the living color of story what a holy life looks like. "Every Christian must bear his cross," and this applies to successes and failures alike. Marriage is meant to be blessed by as many children as God is generous enough to give, and childlessness is a curse. Some have said that marriage is not an institution for children to grow up in, but an institution for parents to grow up in. To those who are married with children, the children should be a joy, but raising them is the cross by which parents are to be saved. However, God does not always give this blessing, and to parents who want to welcome children but are not able to do so, childlessness is itself a cross by which the parents to be saved. Lastly for now, I would suggest that if there are people who endorse marriage is normal, and want to be married but end up always a bridesmaid but never a bride, lack of marriage is itself a saving cross. Disrespect for marriage is a sin, and the career path of monasticism provides a practical and valuable resource, not just to monastics themselves, but also to devout Orthodox families who tend to visit monasteries. But if, as described in [Singled Out](#) authors grew up hoping for marriage and their dreams did not come true, what is needed is not a new theology of celibacy but an old theology of failure and the crosses by which we are saved. And so far as I can tell, the authors are entirely innocent of contact with Orthodox monasticism.

I am trying to get to Mount Athos and become a member of a respected monastic community. However, I am not obligated to

succeed in connecting with any of the monasteries on the planned pilgrimage. I am furthermore not obligated to succeed in being able to pay for the trip. I am trying, and under the conditions I feel fully obligated to give it my best, but I am not obligated to succeed. (**Willing to make a donation?**)

Here we are still on the outside porch of Orthodox monasticism, and not on the inside. But I would suggest that the Orthodox understanding of monasticism provides a robust and excellent old theology of celibacy, and also that "every Christian must bear his cross" and the old theology of failure have every relevance to those who seek marriage but do not arrive at it.

## Looking at *Stranger in a Strange Land* as an old Western idol

Robert A. Heinlein's cult classic *Stranger in a Strange Land*, a book which was published in 1961, inspired many flower children, and has never gone out of print, is a Western book, and Western in a sense in which most Western Christians legitimately disavow.

Early on in the book when Heinlein is loosening up his readers' boundaries, Heinlein has the hero and heroine basically naked together in the strictest innocence and for entirely legitimate reasons, and the reader is invited to judge the cop who has a dirty mind because of what he reads into them being naked together. When the cop needlessly strikes the heroine, the hero kills him with psychic powers, but only after Heinlein assures us that the cop did not strike her as hard as he used to hit his wife.

The episode serves as a sort of gateway drug en route to a Utopianism in which promiscuity is fãted, and for the only time I've seen in literature being raped is a helpful and invigorating experience, and while Heinlein grinds the most massive axe against firearms for no explained reason, killing (and cannibalism) become even more casual than promiscuity. Charles Manson, a serial killer who viewed murder as just a habit like smoking a cigarette, denied having read the title at all, although the book's influence was in some circles ubiquitous, and one of Manson's own

children bore the hero's first, middle, and last name, "Michael Valentine Smith." All of this makes for a singular profile even as far as Utopias go.

While Heinlein eagerly rips marriage to shreds, there is a covenant (although not called by that name) of "water brotherhood", which is some combination of reinventing marriage, only dumber, and reinventing the Church, only dumber. The "Thou art God!" epiphany Michael shares with the fatherly Jubal and the joke about one worm saying to another, "Will you marry me?" and the other saying, "Marry you? I'm your back end!" are reinventing Hinduism, only dumber. While certain aspects of the book show Heinlein has apparently "taken inspiration" from Hinduism, in the sense a web designer might use as a euphemism from outright theft of their intellectual property, Hinduism itself is deeper than a whale can dive. Now I am not endorsing Hinduism but I recall, if nothing else, words which I thought came from G.K. Chesterton but cannot now trace, that if you are considering world religions, you will save yourself a great deal of time by exploring just Christianity and Hinduism: Islam is just a Christian heresy and Buddhism is just a Hindu heresy. And really, it's not just Hinduism that offers a more interesting theology than Heinlein. Buddhism and Taoism are themselves more interesting than Heinlein's sporadically cherry-picking bits of Hinduism. (And it might at least be helpful to place, "Thou art nothing!" alongside "Thou art God!") I recall one class at Fordham where the professor spoke of speaking with a Hindu scholar (I think he mentioned lots of wine having been consumed), and the professor saying that he was perfectly happy with God being incarnate in Christ, but why only one? (The great teachers in the Western understanding, plus perhaps various mythological figures, are held in Hinduism to be Avatars

in which God / gods came down in human semblance; there are points of contact with Incarnation, although those interested in theological exactness might note that the conception of an Avatar is not that of Incarnation but of the kind of Docetism which sees Christ as human only in a deceptive appearance, the Divine Nature being incapable of being made man.) But let me return to incarnation in a moment.

And finally on the point of this Utopian novel, what [Stranger in a Strange Land](#) offers is a Gospel, but only a Gospel made dumber. One Christian editor, in personal conversation, talked about choosing the name for an article. Editors often do this better than authors, by the way. The title amounted to "Maximum Christology," which asserted that the findings of the Christological Councils are in every way those of a [Maximum Christ](#): maximally God, maximally human, maximally united, with the divine and human natures maximally distinguished. And some of these heroes are of a sub-maximum Christ figure. As I said in [an overly long and complex homily](#) in [The Sign of the Grail](#), the figure of Merlin, if pushed to absolute fullness and depth, becomes the figure of Christ. The same is true of the hero, Michael Valentine Smith. No matter what attacks Heinlein places on Christianity and the morals he falsely assumes to be distinctly Christian (by the way, Christianity is in general much more comfortable about legitimately acceptable touch than Hinduism: if you want touch in Hinduism, [Kali's Child](#) comes highly recommended; Kali is a demon-goddess who wears a necklace of skulls and madness is the special blessing she bestows), Heinlein's debt to the Gospel is incalculably greater than his debt to Hinduism. Even the hero's martyrdom owes its debt to Christianity; the Bhagavad-Gita may have Sri Krishna exhorting Arjuna the Conqueror of Sloth to enter a battle and strike those

doomed to death; I am out of my depth as far as interpretation of the Bhagavad-Gita goes but martyrdom is celebrated neither on the part of divine charioteer nor human noble, even if some commentators (like Gandhi) held martyrdom in the most profound respect. There is no sense I get that either charioteer or ruler gave his life as a ransom for many, nor that martyrdom is the noblest death to die, nor, so far as I know, planted a Church that we marked by referring to years as AD and BC in its infinite shadow. The whole story is the Gospel made dumber, a point I tried to argue in [Looking at Stranger in a Strange Land as a Modern Christological Heresy](#).

But there is one point of redeeming virtue. Michael, the hero, says, **"Happiness is a matter of functioning the way a human being is organized to function... but the words in English are a mere tautology, empty. In Martian they are a complete set of working instructions."** And in fact we have such a complete working instructions in monasticism. Now I would like to underscore that marriage is a sacrament and the normal choice it is expected that most Orthodox will follow; I will not extol marriage at length but it is worth extolling, as in [this beautiful video about Saints Peter and Fevronia \(with English subtitles\)](#).

## Beggars and the divine

There was one point where I was hospitalized with, among others, a woman (a former ballerina, but that's beside the point), bordering on homelessness. I wondered, "Is there any way I can lighten this cross?" and in fact there was, and I did so when closing out the visit. Part of the difficulty was that she needed to keep track of numerous mostly small items, and that is difficult when homeless. I had an item now not available new, a geeky messenger bag, which was then cheap, easily replaceable, and like nothing else I've found anywhere near the price point.

And it had both large capacity and multiple compartments.

Before I gave it to her our dealings were polite if distant; we never connected interpersonally. And after her warm thanks, our dealings remained polite if distant; while I struck up a friendship with another guy, she and I never clicked as friends, let alone something romantic. And I really think neither of us was obligated to any friendship.

Then why the gift?

To put things in melodramatic terms, none of us goes to sleep knowing we will wake up. Were I to fall asleep that night in time and wake up in eternity, I would have greatly preferred the bag to be in her possession than mine.

If that sounds melodramatic, read to this apocalyptic passage from the Gospel according to St. Matthew:

When the Son of man shall come in his glory, and all the holy angels with him, then shall he sit upon the throne of his glory: And before him shall be gathered all nations: and he shall separate them one from another, as a shepherd divideth his sheep from the goats: And he shall set the sheep on his right hand, but the goats on the left.

Then shall the King say unto them on his right hand, *â€˜Come, ye blessed of my Father, inherit the kingdom prepared for you from the foundation of the world: For I was an hungred, and ye gave me meat: I was thirsty, and ye gave me drink: I was a stranger, and ye took me in: Naked, and ye clothed me: I was sick, and ye visited me: I was in prison, and ye came unto me.â€™*<sup>TM</sup> Then shall the righteous answer him, saying, *â€˜Lord, when saw we thee an hungred, and fed thee? or thirsty, and gave thee drink? When saw we thee a stranger, and took thee in? or naked, and clothed thee? Or when saw we thee sick, or in prison, and came unto thee?â€™*<sup>TM</sup> And the King shall answer and say unto them, *â€˜Verily I say unto you, Inasmuch as ye have done it unto one of the least of these my brethren, ye have done it unto me.â€™*<sup>TM</sup>

Then shall he say also unto them on the left hand, *â€˜Depart from me, ye who are damned, into everlasting fire, prepared for the devil and his angels: For I was an hungred, and ye gave me no meat: I was thirsty, and ye gave me no drink: I was a stranger, and ye took me not in: naked, and ye clothed me not: sick, and in prison, and ye visited me not.â€™*<sup>TM</sup> Then shall they also answer him, saying, *â€˜Lord, when saw we thee an hungred, or athirst, or a stranger, or naked, or sick, or in prison, and did not serve thee?â€™*<sup>TM</sup> Then shall he answer them, saying, *â€˜Verily I say unto you,*

Inasmuch as ye did it not to one of the least of these, ye did it not to me.™ And these shall go away into everlasting punishment: but the righteous into life eternal.♦

It is the clear teaching of Westerners I know who care for the poor that giving money to beggars is making a problem worse, and it is the clear teaching of the Orthodox Church to give something. I've never really heard any Orthodox authority say you should give a lot; the suggestion, without a number being ever stated that I have heard, is that you should give a small amount that is entirely within your power. If they use that money to buy drugs that is no more your fault than it is God's fault for giving you free will that you use to commit abominable sins. Furthermore, I have heard even my relatives pronounce the word "**beggars**" like they are some kind of disgusting vermin. They are not. When we answer before Christ's throne, we will answer a great deal more for how we have treated homeless beggars than we will for those in our family and our social circles. I personally view beggars as altars by which I may show small kindnesses to Christ.

A monastic living under a vow of poverty may be under a slightly different set of rules. Monastics are said to be "above alms," and to a visitor of the same sex, the words "Is not a word better than a gift?" apply, the point being that you can meet the dues of hospitality even if there is nothing you could give even if you wanted. But the core principle is this unchanged: beggars, like everyone else, are made in the image of God, and the point of becoming a Christian is neither more nor less to become by grace what Christ is by nature. None of us is divine "without any help," so to speak, and the Hindu "Namaste" meaning "I recognize that the innermost part of you is a drop of God," which I have

only heard from New Agers (Hindus have treated me with respect enough but they usually greet me with "Hi," "Hello," "Good morning," etc.) is not in the literal sense Orthodox. Christ and Christ alone among mankind is divine by nature. However, Christ's action is to make men divine by grace, and ultimately rise above the wall which separates God and Creation. And in that sense, while Orthodox Christianity does not have a great collection of avatars who are all divine by nature, it does have a great collection of saints who are genuinely and properly divine by grace. Even among the rest of us, what is most at our core may not be directly and properly a drop of God himself, but it is to be created in the divine image: to be human is to be a symbol of God in an extraordinarily profound sense, a symbol that both represents and embodies, so that every act of kindness or cruelty rendered to our neighbor is by that fact kindness or cruelty rendered to Christ. My response to my teacher about "Why only one avatar?" and the teacher clarifying that he meant only real avatars, was more than technically correct on my part. "Divine by grace" is real. It is perhaps not, in terms of origins, something that came to be with "divine by nature" built in, but that is not the point. Heaven will be filled by people who were and will be even more "partakers of the divine nature", genuinely and really divine by means of grace, and this is what we were created for in the first place. We were created to come to a place where the very distinction between Uncreated and created is transcended.

## Monasticism as supreme privilege within the Orthodox Church

As I wrote on a social network:

There is a saying that virtue is its own reward, epigrammatic enough that Spaceman Spiff / Calvin wants to teach horrid aliens that virtue is its own reward.

Both physically and spiritually, virtue really is its own reward. Though athletes might train for competitions, the advantages of physical health are not mainly looking better in a swimsuit, but having your body function as it was meant to function and your mind clearer as well. For another example, a recovering alcoholic who has been years sober, or perhaps with slips treated as a real problems and **stopped** as real problems, the main advantage is not removing the expense of heavy alcohol purchases, nor improved nutrition as alcohol is a genuine nutrient that in large quantities can displace alcoholics' intake of more balanced nutrition, nor the annoyance of other people constantly getting on their case for drinking too much. The chief reward for being years sober is that you have abandoned a suffering you wouldn't wish on your worst enemy: the reward for sobriety is sobriety, including feeling much, much, much better. (I

opened with drunkenness in the homily **A Pet Owner's Rules.**)

But without contradiction to virtue being its own reward, virtue is also the reward of repentance. The Philokalia says that people hold on to sin because they think it adorns them.

My understanding is that Evangelicals have said that repentance is an unconditional surrender, and it is. My godfather talked about it as the most terrifying experience at all. God demands an unconditional surrender of us, not for his sake, but for ours. Once we surrender we realize, "I was holding on to a piece of Hell!" The primary Orthodox metaphor for repentance is awakening, and I've been happiest when I've repented of something I've been in the grips of. In one sense I'm at my happiest when I am writing something new. (And in that sense, I wrote, **Repentance, Heaven's Best-Kept Secret**")

One last point. The terms of monasticism are the terms of the highest privilege the Orthodox Church has to offer. I also expect that it will cut certain sins much shorter, but there is more than a resource I really think I would wiser not decline. Monasticism is spoken of as repentance, and while it is desirable to have tears and the joyful sorrow of compunction, entering monasticism to repent of your sins ideally bears Heaven's best-kept secret. If you repent, however great the sorrow it straightens out your heart, and commonly straightens out the body somewhere along the line. Monks (actually, all of us) are forbidden ambition to seek any ordination, but seeking to become a bishop, besides being a temptation, is a confused way to drop the real treasure in a perturbed haste to grab a consolation prize. God's blessing may be on ordained monks who just want to be

monks, such as abbots and bishops, but the highest position of privilege is not that of the highest bishop. It is that of a mere monastic whose sights are set much higher than mere ecclesiastical office. And on that note I wrote **A Comparison Between the Mere Monk and the Highest Bishop.**

I am not seeking misery. I am seeking great privilege, much greater privilege than my educations.

## Monasticism as “*a complete set of working instructions*”

The Blue Zones, coming out of a study of where people live the longest, identifies certain hotspots of the map researchers originally marked in blue. There are, according to the Wikipedia entry, nine common themes:

1. Moderate, regular physical activity.
2. Life purpose.
3. Stress reduction.
4. Moderate calories intake.
5. Plant-based diet.
6. Moderate alcohol intake, especially wine.
7. Engagement in spirituality or religion.
8. Engagement in family life.
9. Engagement in social life.

On Mount Athos, the place I hope to go, and God willing repent of my sins into great old age, every single one of these things is present. (I do not know if Athos is an unstudied hotspot; Athos is a bit hard to reach even for Orthodox, and possibly it is a curiosity that was unknown.) Now there is not the usual sense of engagement with family life, but a healthy Orthodox parish, let alone monastery, is in a deep sense family

Orodox parish, let alone monastery, is in a deep sense family and "family" is not simply one metaphor among others. The fact that there are probably fathers and sons, or brothers, or uncles and nephews, on the holy mountain is beside the point. However, I would like to drill down on the least "spiritual" of them all.

In a monastery ([see a video of Holy Cross Hermitage that gives monasticism a concrete face](#)), there is prayer in liturgy and prayer in near-constant work, with no divide between sacred and secular. People, or at least young monks, are kept occupied, but this is primarily for their needs rather than the monastery and there are stories of ancient monks who would rather make an enormous pile of baskets every year and burn them than be idle.

Like in the blue zones, large amounts of time are spent in moderate activity. And one of the things I realized is that "fitness nut" level exercise, with one qualification mentioned below, is really a consolation prize compared to always being engaged in obedience. It's a bit like saying, "Well, I don't have leisure in my schedule for a glass of wine with my dinner, so once a week I'll have 100 grams of Everclear." The analogy may break down in that alcohol is hardly a need, but the point stands that sipping one glass of wine with dinner is for most of us good, while blasting a throat-parching payload of 100 grams of absolute alcohol all at once is for most of us dubiously helpful.

The one exception I will mention is that there are cases where people push farther, but in the long term moderate exercise is better than world-class exercise. Remember the former ballerina I mentioned? She wasn't especially old. Top-notch ballerinas don't retire because audiences don't like wrinkles; top-notch ballerinas retire because you can only put that heavy a load on your body for so many years, and the number of years is short compared to normal aging. The usual lifespan is short among an African people that run around eightv

mesquite is short among an African people that run around eighty miles a day hunting deer by running after it until it collapses from exhaustion; these people don't die old. And I remember one bodybuilder at my high school who looked quite impressive asking if it was healthy to lift weights, and the presentation giver, perhaps insensitively, said that an extra pound of muscle was just as hard on the heart as an extra pound of fat: it may be striking to have incredibly thickly muscled arms and legs, but there's more than an unofficial consensus among women that ridiculously huge muscles are ugly. The human body as a whole is not at its health when those are its proportions. The human body can be pushed to marathons or triathlons, but there are long-term problems that you don't get from hours a day of moderate activity. There are many excesses above near-constant moderate activity that can be sustained at least for a time, but the moderate version is optimal.

And there is a further point I would like to mention, which is simply that the Fathers are very clear that when you are doing an obedience, nine tenths of your attention should be on cultivating and maintaining your inner state, and only one tenth on the physical act. This point was underscored with infinite gentleness when I visited one monastery and the Archimandrite stated that he was assigning obediences for the day and asked if anybody wanted to request anything. I asked him for something with vigorous exercise. He assigned me to work with a monastic aspirant on firewood; what this meant practically was that he and I would work together to gather trees that had been cut up with chainsaws but not further dealt with, and load them into the back of a truck and then unload them at the woodpile. The exercise was delightfully invigorating, and I was able to relieve a partner who was exhausted after being asked to move bigger and

bigger and bigger wood; on my end, there were moments where I knew that my weight plus the wood block's weight amounted to well over three hundred pounds, and it was pushing my feet into the ground hard enough that I worried my workboots might come off when I lifted my feet and pulled them out of the mud they were sunk in. But vigorous as that may have been, there was a significant problem: I wasn't really praying that much. When I mentioned this, the abbot expressed deep gratitude for my work, and apologized for his shortcoming with me, saying he had not served me adequately in what he had asked me to do. The apology was, with infinite politeness and gentleness, correcting me for a basic beginner's mistake: doing an obedience without sufficient prayer, and the next obedience he assigned me was something else that was manual labor but not nearly as much force. While the work he assigned was useful to the monastery and would help keep them warm at winter, he was far more concerned about whether the obedience was a practical help to my prayer than what external work I accomplished. And the practice of assigning obediences to visitors is not primarily a message of, "You are staying with us and we would like you to pull at least some of your weight," even if that may also be true, but "We invite you to join us by praying with us in the temple as we sing our prayers, and we would also like to invite you to join us to pray as you engage in prayerful work with us outside the temple."

And the work is not secular; it is sacred even if it could be performed in a secular way.

Let's look at the three classic vows.

## Obedience

I'm a bit of an outsider looking in as far as monastic obedience goes, but I would prefer that my writing, at least in theology, were something I was working with and receiving a blessing, including periodically being expected to submit.

One sliver of a window came from a remark I needed to explain (as well as translate) to my parents. We were at a Mexican family-run restaurant, and as we were almost heading out the door, I said something that positively lit up the restaurant staff. I said, "La comida esta hecha con amor," possibly making some minor language error; the phrase literally translated was "The food is made with love." Which needed some explanation about why I would say that and why the staff would light up. There is a belief in Mexican culture that food made with love is delicious, while on the opposite end food made in anger and upset will taste terrible and possibly cause indigestion or other nastiness.

That belief is properly part of Mexican culture, but it is of much earlier vintage. One tidbit from monastic literature has a king or someone from a king's court asking an abbot why food at the monastery, which was made from the simplest ingredients, tasted so good, while food at the royal court made with the best ingredients available tasted worse. The abbot said that food at the court could easily be made amidst conflict and anger, while

at the monastery everything was done after receiving a blessing; under normal circumstances "obedience" includes monks seeking the abbot's blessing for essentially any action. But this is more than asking permission, or at least more than receiving permission. If an abbot gives a monk a blessing to do something, the monk has not just gotten an OK to move ahead. The abbot has declared the blessing of God, and one result of obedience and submission that asks blessings is that what you do has many more blessings pronounced on it than most non-monastics ever see.

People who are above my pay grade, who know obedience from within, speak of obedience as utter freedom. I'm not in a place to confirm that firsthand, but I believe I've identified an obedience-shaped void in my life. In writing related to theology, what I have to say is tapering down, but even more than that I want to write in an asymmetrical collaboration of obedience where I am writing under a blessing if I write, and not writing but asking a blessing upon my person if I am not giving a blessing to write. Furthermore, and more poignantly, I've been pretty wrong at certain things, and dangerously wrong at that. Part of monasticism that is most repellent to outsiders is that you don't just confess your sins, but you make a daily confession of all your thoughts to your abbot. I want that. I want to be in a situation where I may still be wrong, perhaps very wrong, but the "wrong" is stopped quickly by an abbot who may see red flags much sooner than I do. And I see monasticism as a sort of ultimate privilege in terms of cleaning house spiritually.

There was one class I remember the professor voicing an existentialist sentiment: "Total liberty is the very worst of prisons." On a not entirely unrelated note, Aristotle said, "He who teaches himself has a fool for a master." Political freedoms

may be valuable, but they are nothing compared to freedom from one's sin and one's passions. The words "May you have all of the wealth in the world and the health with which to spend it" sound pleasant to begin with but they are pure and simple a curse. Being spiritually in such a state is worse than a physical lack of health, and Orthodoxy tries to develop each person as is best for that specific person. It also, like the lighter-grade analog to older spiritual work found in today's non-directive counseling, stipulates that the spiritual healer is to have no interest or personal benefit in directing a disciple. Binding myself to discipleship is placing myself in the care of a spiritual father whose job description is to help me grow into the greatest freedom there is. And right now I do not know what true freedom is. I am the prisoner and slave of my sins and passions, and a good spiritual father has the keys to unlock that prison. I do not expect every freedom that is available from an abbot. **I only expect the one freedom that matters.**

## Chastity

The chief benefit of celibacy is enumerated by St. Paul. He gives no decisive commandment, but clearly outlines a spiritual advantage to chastity. The married person needs to have a divided attention split between *God* and spouse. The celibate person is free to have 100% devotion to *God*.

I might comment briefly that there are three options that can be acceptable, even if it is possible to fail spiritually in all three. The first is marriage, something that is expected of most of the faithful. The second is monasticism, which essentially offers a full complement of spiritual resources meant to entirely maximize the kind of goodness that can stem from celibacy. The third is celibacy outside of monasticism, which is less than ideal but can be appropriate (especially under a theology of failure).

I've been in the third option and am presently wishing I had joined monasticism ages ago. But I cannot change the past; I can only influence the present and the future, aiming for monasticism and accepting a possibility of failure.

## A few details about sexuality:

While I was researching the [the holy kiss](#), I was assigned, among other texts, to read Foucault's history of sexuality. That's one reading recommendation I should have dropped faster than a hot potato. The text may not be in any sense sexy, but it does porn-style spiritual damage well enough. However, I wish to pull one minor point and one major point.

The minor point is that understanding another age's sexuality is an [Alice in Wonderland](#) matter. Meaning that before study you don't understand another world's sexuality and you are wrong about assumptions you don't even have.

In the Greek world, appealed to by those who wish to "re-queer" society, the completion of training might well be a consummation between teacher and pupil. We have dirty jokes about "Confucius say secretary not part of furniture until screwed on desk," but they are "just" dirty jokes, not automatic expectations for practical action. The usual pagan paterfamilias would rape all slaves (male or female didn't matter much) as an assertion of absolute authority over slaves.

And having said this much, I would like to put one particular point pulled from those dreary books: one pagan philosopher was asked, "How often should I have sex?" and answered, "As often as you wish to deplete your energy." This is not an absolute

interdiction, nor does it suggest Christian ideas of marriage between a man and a woman, but it provides a profound glimpse into a monasticism in which, on the Holy Mountain, there are no women, nor youths who may look too much like a woman's beauty, and in monasticism there is an exhortation, almost a leitmotif, of "Refrain from embraces."

Sexuality does not become unimportant in monasticism. It becomes an infinitely sharper peak, and it is transformed to unending desire for God.

## Poverty

Years before I joined the Orthodox Church, there was a Sunday school type class, and I walked in really wincing, expecting a secular investment lesson and knowing that the parishioner who would be giving it was a lawyer. To my astonishment the substance of his lesson, illustrated and underscored with stories from his professional experience, was to say that the book of Proverbs hit the nail on the head in everything it said about wealth. The one sentence I remember from that class was, "Endowments aren't so great." He asked what it meant to be "independently wealthy," and clarified that what that really meant was "independent from God", and state that seeking God's providence was far better than chasing after more and more wealth.

In my own time I have become more and more skeptical about how much wealth and property give us. My work [The Luddite's Guide to Technology](#), which I'm a bit disappointed hasn't received more attention, has as its premise that individual technologies have both upsides and downsides and that the people selling technologies are a whole lot quicker to sell you on the upsides than on downsides that may be terrible but are often not obvious.

Monasticism is in many ways simply living the Gospel, and the Gospel says, "Do not store up treasures on earth." Monastics

take this as straightforward guidance for optimal living. In addition, though I do not know all of what factors into this conclusion, those above my pay grade spiritually seem as quickly to identify monastic poverty with freedom as they are to identify monastic obedience with freedom.

My mother told a story of a friend visiting one of her friends in Puerto Rico. The visitor looked around and said, "You don't have any food in your pantry." The hostess said, "No, I don't, but I will. And why would I need something now? I wouldn't need God."

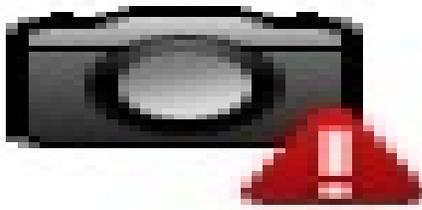

This may be sharper than monastic communities which look after monastics' needs, but to my knowledge the monastic embrace of poverty is an embrace of God that seeks everything needed from his providence, rather than make an ersatz providence by providing for oneself financially.

I'll take an educated guess that some monastics view their poverty as having gotten rid of a great many things to worry about. Almost, if vulgarly, as a man saying, "I lost 235 pounds in one weekend!"

## A note on historical background

To put something baldly, I believe that the iconoclasm of the Reformation was significantly less guilty than the iconoclasm that was rejected by the Seventh Ecumenical Council.

I remember one time going through [Spink's Catalogue of British Coins](#), and watching in horror as the Western understanding of symbol disintegrated across the centuries before my eyes. Originally there were simple figures on coins, but nothing seriously attempting photorealism. Then there was a frenzy of detail that created a "gold penny" (the word "penny" does not automatically mean minimal economic value in the world of those who study coins), and then things settled to such more restrained portraits as adorn coins today.

I saw the same horror and the same story as I visited the Cloisters, New York City's medieval art museum built from bits of monasteries from Europe, and saw the same disintegration across the centuries from icon proper to stronger and stronger (or, if you prefer, stranger and stranger) attempts to be three

dimensional until paintings started to morph into being half-statue. All of this was in late medieval Europe, and the situation was what an Evangelical might call "bankrupt" or "spiritually dead." Some of this I trace in more detail in [Lesser Icons: Reflections on Faith, Icons, and Art](#).

The icons rejected by iconoclasts in the Byzantine Empire at the time were those of full-blooded Orthodox usage, and iconoclasts then were guilty of rejecting the full force of something good. The icons rejected by iconoclasts in the Reformation were "icons" that had been depleted and dead for hundreds of years. If a Reformation iconoclast were to look at the icons around and say, "All those icons should be burned!" one Orthodox response might almost be, "Ok if I bring matches and kindling?"

Something of the same played out in a disintegration of monasticism into proto-University. The Universities we know were started by monks, if later taken over by Renaissance men; monasteries in the West were great centres of learning. Some people have said that after the Great Schism the West got the head and the East got the heart; I have heard an Orthodox parish priest (incidentally, a parish priest with a doctorate) say, "The longest journey we will take is the journey from our head to our heart." His point is not uniquely monastic, but Orthodox monasticism is very directly intended to help those of us who are too much in our heads to reach our hearts.

The difference between Eastern and Western monasticism came to a head in the dispute between St. Gregory Palamas and the Renaissance man Barlaam. The conclusion reached by the Church, even without an ecumenical council, was that St. Gregory was defending Orthodoxy in what he held, and Barlaam was importing a heresy. I do not claim that Barlaam spoke for the

entire Western fashion, nor do I deny the near-certain presence of continuities between Western monastic practice and Eastern hesychastic prayer. However, I do assert that Barlaam represented something that was in the mainstream range of Western monasticism and broader trends.

What did Barlaam teach, some readers may want to know. In a nutshell, it was [the Renaissance ideal](#). The answer I would give is, "Something like the liberal arts ideal today," the cultured liberal arts ideal in so many Christian-founded colleges whose apostasy from any sense of Christianity is documented in [The Dying of the Light](#), in a pattern that sheds unflattering light on how effective it is to found a Christian university. Barlaam taught, like a good Renaissance man, that the noblest exercise of human dignity was to reason and philosophize about God. St. Gregory taught that the noblest exercise of human dignity was to behold the uncreated Light of God and directly experience God. Barlaam wanted monastics to be educated and cultured. St. Gregory wanted monks to prayerfully contemplate inner stillness; Barlaam gave the pejorative term "navel-gazing" for one specific way some people have taught stillness. St. Gregory wanted monasticism to remain what it had always been; Barlaam wanted monasticism to adapt to features of what was then in vogue in the broader European cultures.

One interstitial note as I have at least hinted at Orthodox wariness towards the Blessed Augustine: he is essentially a Church Father as an Evangelical who would conceive of a Church Father. He reasons philosophically about God, and constantly references Scripture. Evangelicals may object to the Renaissance, but the Renaissance and Reformation are tangled with each other more than one might, and Barlaam's approach is not irrelevant to Evangelicalism. The Blessed Augustine is an

astute philosopher and his analysis has layers of depth, but he doesn't have St. Gregory's strengths. That stated, there are also Church Fathers as a Church Father would conceive of a Church Father. [St. Maximos Confessor](#) readily comes to mind, although he's not the easiest author to cut your teeth on. [St. John Chrysostom](#) wrote dozens of volumes, too many for most people to really read, but he is an eminently clear communicator.

At this point I am ready to make some comments about Martin Luther that wouldn't have made much sense earlier. Martin Luther took a vow of celibacy and then had the most prodigious exploits of a man who cannot keep his willy where it belongs. Alongside Reformers destroying icons were Reformers "liberating" monastics, many of whom served Luther's pleasures. (It has been said that Luther's doctrine of the "bondage of the will" is not something you get by reading the Bible, but a theological rationalization that absolved Luther of guilt for his exploits.) This much is not in dispute historically; it's just something his Protestant successors are not eager to divulge. (A study of Luther's incontinence provides the concluding chapter for [Degenerate Moderns](#).)

The Reformers attacked what remained of holy icons, and what remained of holy monasticism. We don't quite have 100% conformity here, as there have been (and are) Anglican monastics, the famous Taizé<sup>©</sup> monastery in France, and perhaps others, but there have also been Mennonites who want to have icons. There remain pockets in Protestantism of almost everything the Reformers ever attacked. None the less, monasticism was a healthy bedrock in the east, then started to become shifting sand in the West, and then for entirely understandable reasons, as understandable as initial Protestant iconoclasm, the Reformers saw monasticism as simply not helpful.

My point in mentioning this offensive point is to say that certain things in Orthodoxy are not something that Protestants have weighed in the balance and found wanting but something not encountered in the first place, and furthermore that the oddities of a Roman Church after half a millennium's separation from Eastern Orthodoxy in fact do not speak for Orthodoxy, no matter how strong the subtle temptation fill in understanding of bottom-up Orthodoxy with top-down Roman assumptions. Monasticism in the Orthodox Church is an [Alice in Wonderland](#) matter for Protestants.

# Repentance

I wrote, [Repentance, Heaven's Best-Kept Secret](#), and I almost wish I hadn't.

[Repentance, Heaven's Best-Kept Secret](#) argues that repentance is often a gateway to a completely unexpected and unsought joy.

However true that may be, the real reward for repentance is not a pleasant mood. The real reward, and the reward one should seek most of all, is then untangling and straightening out of one's tangled and sinful soul, and being in a better condition spiritually.

(And by the way, there is nothing mercenary whatsoever about repentance out of the hope of being in a better condition spiritually, and gaining more virtue and being cleansed of more sin. Those are right and proper things one should be seeking as rewards for repentance.)

Repentance is foundational to monasticism, enough so that monasticism is spoken of as repentance. In my partially informed opinion, there may be a case to be made that repentance is more basic or essential to monasticism than even the vows of poverty, obedience, and chastity; and that poverty, obedience, and chastity provide a structure or shelter in which the real work of repentance can grow.

And repentance, and live spiritual life after awakenings of repentance, may be the core reality of why monasticism is the

supreme condition of privilege within the Orthodox Church. It is a strong medicine for spiritual health, and I believe it may eclipse even poverty, obedience, and chastity, however cardinaly important each one may be.

## A Utopia that works

I remember one class, years back, where the professor summarized a Utopian ideal that called for (among other things) turning the oceans to sweet lemonade as "a Utopia of spoiled children." And there seem to be a lot of Utopian visions that end up as Utopias of spoiled children.

I'm not current on Utopian visions from feminists (or, if you would rather put it this way, every feminist author and more that I have read in my studies offers some highly unstable Utopian vision), but Utopian visions by men, without such a restraining hand, call for men to have free and easy access to essentially as many women as they wanted. Not, perhaps, that this is a new feature to the Western form of life of Utopian visions; many pre-Christian giants were polygamists and the Solomon who asked for wisdom and left us three books of the Bible lost his salvation after his prolific efforts in this field. I've read, if only in summary form, of a text suggesting that men are capable of great extraneity, summarized some of the people and objects men have used for sexual pleasure, and concludes that a man who reaches a successful marriage does so by a great deal of restraint and discipline, and not by simply laying the reins of male desire on the horse's neck. And even more offensively, the text suggests that gay men are largely capable of straight marriage, have often tasted heterosexual pleasure, and suggests

that the level of discipline for a gay man to have a successful marriage to a woman is really not by leaps and bounds greater than the discipline required of a straight man. (If I recall correctly, the author was not straight. He just chose not to be ruled by base desire.)

[Stranger in a Strange Land](#)'s Utopian vision has a fatherly Jubal and a main hero male readers should identify with who is some sort of superman with a harem of four (or more) women who all worship him and never seem to make real demands or have real needs. (The living situation reminds of one book, by a counselor a good deal to the left of me, who said that as a counselor in California he has seen people in every living situation you could think of and probably some you couldn't think, and the more he has seen other living situations work out in practice, the more he thinks God's rules are meant to help us and not to harm us.) And the grounds of Heinlein's Utopian living situation places his Utopia as a Utopia of spoiled children where boys do not grow into proper men. I would suggest that the Orthodox concept of marriage is fundamentally more interesting. It calls for something the hero never reaches, at least not before provoking martyrdom. It calls for men (and women) to grow up and act as adults. It calls for self-transcendence

[The tale of Saints Peter and Fevronia](#) mentioned earlier has one brief segment where Saints Peter and Fevronia are sailing on a boat, and the man handling the boat starts looking at Saint Fevronia and having ideas. Saint Fevronia tells him to take a bowl and dip it in the water by one side of the boat, and taste the water, and then dip it in the water on the other side and taste it. She asks him if the water tastes the same or different as drawn from the two sides. He says that they both taste the same. She says then, "So it is with women," and asks why he is thinking of

her when he has a wife who is just as much a woman. St. John Chrysostom, in decrying a theatre that was largely that day's version of internet porn, or at least awfully uncensored, constantly spoke of theatre that insulted the shared nature of women. There is a tremendous good that is possible in a man being married to one and only one wife. Is there really more good to obtained from more women? Or do you wish to go to the gas station and spill ten or fifteen gallons of gas on the ground because you keep on pumping twice as much gas as your tank will hold?

Monasticism offers a Utopia for mature adults. Stranger in a Strange land lays the reins on the horse's neck. Monasticism reins things in further and offers a path that is even more a challenge to grow to adulthood. Not that it is a denial of sexual desire; no monastic literature I've read assumes monastics are sexless (most seem to assume monks have plenty of hormones to cope with), and the choice made is to provide a supportive environment to restrain sexual desire and then lead sexual passions, among others, to ultimately be transfigured if it is a successful monastic vocation.

Utopias seem to not work out much as perpetual motion machines do not keep working. Perpetual motion machines are attempted out of confusion about basic physical realities, and Utopias are attempted out of confusion about basic spiritual realities. But monasticism is that odd gem of a Utopia that works.

Becoming a true member of this Utopia, if I succeed, will probably be the hardest thing I ever do, but it is the best choice I can make.

# The Metacultural Gospel

I want to tell you about my best friend, Nathaniel. When we were getting to know each other, Nathaniel told me that he was God come down in human form. I thought for a moment and said, "If that's true, you aren't doing a very good job of it." He laughed, and said, "You're probably right."

Where can I begin to describe him? Perhaps you've had this experience. When there's someone you don't know very well, it's easy to say "Yeah, I know him. He's that hockey player who tells the worst puns." But when it's someone you're close to, best-buddies intimate with, then words fail you. I could begin by saying, "Nathaniel was a construction worker," which would leave most people with two impressions. The first impression is that he was strong and had calloused hands, which is true. The second impression is that he wasn't much in the brains department, which is out-and-out false. He didn't have too much in the way of formal schooling — stopped after getting his high school diploma — but Nathaniel was absolutely brilliant. I still remember the time when I had him over at my place, reached on my shelf, pulled out the Oxford Companion to Philosophy, and read aloud the entry for 'aestheticism', and then began a devastating critique. I don't remember his whole argument, but the first

part pointed out that there was an assumed and unjustified opposition between aesthetic and other (i.e. instrumental) attitudes, with an argument that seemed to challenge aestheticism by pointing out that there are other ways of viewing art. He asked if one would challenge the activity of working by pointing out the legitimacy of eating and sleeping. Nathaniel was the first kindred spirit I found in philosophy and other things; he challenged and stretched me, but he was the first person I met who had also thought things I thought no one else would ever understand.

I'd like to explain a little more about the conversation where I told him that if he was God come down in human form, he wasn't doing a very good job of it. How can I put this? It wasn't that he was inhuman — certainly not the sort of thing usually conjured by the term 'inhuman', with some sort of indecency or cruelty or monstrosity. He was human — he just challenged my conceptions of what it meant to be human. (I thought I was unusual!) Being with him was like realizing one had woken up in a different world — in so many little ways. He fit in, but he wasn't like anybody else.

One of my first shocks came when I saw him chatting, naturally and freely, with some support staff at my office. At first I thought that they were for some reason old friends of his, but he disabused me of that notion. When we talked about it afterwards, I realized the extent to which I had treated support staff like part of the furniture. He seemed to be able to talk with everyone — young (he's one of few adults I've known who could enter a child's world and really play), old, rich, poor, American, international, it didn't matter. He could enter the house of a Klu Klux Klansman for dinner and then leave and spend the rest of the evening with a follower of Minister Farrakahn —

being on friendly terms with both. He was very good at entering other people's worlds — but he had very much his own world. And there were a thousand little things about it — like how, in his letters, he always wrote 'I' as 'i' and 'you' as 'You'.

I was talking with him about Harold Bloom's treatment of cultures as caves (as per Plato's "Allegory of the Television, er, Cave"), when I came to the strangest realization. Nathaniel did and did not live in a culture. He did live in American culture in the sense that he spoke the language, literally and figuratively, enjoyed hamburgers, and couldn't handle chopsticks to save his life. You might say that he spoke the culture as would a foreign anthropologist who had given it a lot of study, but I wouldn't. He owned American culture. But at the same time, he didn't pick up any of its blind spots. I had given some thoughts to something I call metaculture — something that happens when a kid grows up exposed to multiple cultures, or when someone is really smart and just doesn't think like anyone else does, and doesn't breathe his host culture the way most people do. I had been aware of something metacultural in myself, where I felt like I was a composite of cultures and eras, with something that wasn't captured in any single one of them. I was groping towards something from below, when he had it, all of it, from above.

Where I started to climb up to the mouth of the cave, he descended from the world above and met me. I had thought about the phrase "the wave of the past" as an inversion of "the wave of the future", challenging the worship and even concept of modern progress, where each age gets better than the one before; I had been aware of something of real merit grasped by ages past that have been lost in our mad pursuits. And then

Nathaniel showed me the wave of Heaven.

Nathaniel spent most of his life as a construction worker. He

did a better job at seeming ordinary than I do at least; only his mother Camilla seemed to be able to even guess at who he really was. His family was visiting someone at Wheaton College, and — before I go further, there's something I need to explain about Wheaton.

Wheaton College is a devout place, a religious Harvard if you will. And their approach to religion has its quirks. The temperance movement, which condemned God's creation of alcohol as evil, made a practice of having people sign a Pledge to abstain from alcohol. Wheaton College is one of few places where that practice is alive, and required of every member. Of course they say that they are not making a moral condemnation, but only a prudential measure, but their actions, even what they call their prohibition (which forbids most dancing as well), are deafening.

At the reception, they ran out of soda, and ran out of punch. Camilla kept tugging on Nathaniel's sleeve and asking him to do something. Finally he told them to fill a cooler with tap water — then drew off a cup of the beverage and sent it to the administrator in charge.

It was champagne.

The champagne was dumped, the cooler rinsed out, and filled with water, and it somehow held champagne again. I was embarrassed enough to be drinking champagne (the best I ever tasted) out of a plastic cup. But the administration had a more serious embarrassment to deal with — but I am getting off topic.

I was impressed with their response — they are better than their Pledge — and Nathaniel was still welcome on their campus after that happened.

There are other cases where response to his eccentricities did not receive such a positive response. There was one time when we were visiting a really big church, and (after some really

impressive instrumental music) the lights were dimmed, and an overhead projector began to display all sorts of computer graphics, and then there was a gunshot, and another, and another; the overhead image disappeared. The gunshots continued; someone turned on the lights, and there was Nathaniel, holding a powerful handgun, shooting the projector. (It was such a strange thing to see a pacifist holding a gun.) I think he emptied a total of about three clips into it, before putting the gun into his pocket. The people around him were cringing in fear, but not terror, or perhaps you could say terror, but not fear; they were afraid, but not of the gun. I think some of them were a little afraid of whatever would make a man angry enough to fire a gun in a church.

About that time, the pastor got over being stunned and glared at him and asked, "How dare you fire a gun in my sanctuary?" He glared back and said, "How dare you take God's sanctuary and making it into a circus? This is supposed to be a house of prayer and worship for all people, and you are making it into mere amusement, a consumer commodity. Is this church set up because these people do not have televisions, that they can flip on and be titillated? Church is a place to disciple men and conform them to God, not a place to conform religion so that it will appeal to spoiled brats. The reason that you are losing people to MTV is that you are doing a second rate job of being an MTV, not a first rate job of being a church. Cleanse this place of your vaudeville filth and make it a place where men are drawn into God's presence to glorify him and enjoy him forever. If not, much worse awaits you than bullet holes in your projector."

There was another time, when we were out of town for Easter and he came to the city's First Baptist. Everybody was wearing business suits and really nice dresses — everybody but

Nathaniel. Nathaniel was comfortably arrayed in blue jeans, a plain white T-shirt, and big, heavy, black steel-toed workboots.

There was an invisible stir, and about five minutes into the sermon the pastor stopped, and said, "Young man, I suppose you'd like to explain why the best you can give God on the holiest day of the year is clothing that teenagers wear to McDonald's."

Nathaniel, with perfect composure, said, "Yes, indeed. God is Spirit, and those who worship him must worship him in Spirit and in truth, not in this set of clothing or that set of clothing, nor in this or that outer form of worship or ceremonial observance, nor some particular style of music. You don't know who you are worshipping, if you think (because you can worship God by wearing nice clothes) that nice clothes are necessary for worship. The hour is coming, is indeed already here, when God seeks worshippers who will worship him beyond the external shells that their particular traditions have associated with worship. God is calling. Are you ready to answer?"

It was not long after that that we were out in a van, going to this camp. Duncan was driving; Duncan is a devout man, and a proud graduate of Jehu's Driving School. He was blasting down the highway, which was virtually empty, and everyone but Nathaniel was involved in a very intense discussion; Nathaniel (don't ask me how he does this) was in the back seat, with his head up against a pillow, sleeping. By then I noticed that a wind was rocking our car, and I realized why we were all alone on the road. There was a terrific thunderstorm going on all around, and as I looked out the window there was a flash of lightning, and several of us saw this big twister coming right at the van. I was barely collected enough to jump to the back of the van and shake

Nathaniel awake, and asked, "Don't you care if we die?!?"

Nathaniel seemed irritated at having been woken up, and asked,

"What's the matter? Don't you have any faith?" Then he turned to the storm — or the twister, at any rate, and said, "Peace!" And then, all of a sudden, everything stopped. The wind died down, the tornado dissipated, and within minutes we could see the sun shining. It was at that point that I wet my pants.
